

- 澳門大學的校徽由一個五座城堡冠頂的盾牌和分別用中葡文書寫的「澳門大學」的校名字樣組成。
- 書上的鑰匙是知識之匙，用以打開知識寶庫；四周的海浪代表著大學身處中國海域的一個小島上。
- 大橋寓意文化的溝通，是連接東西方文化的象徵。
- 「仁、義、禮、知、信」為中國聖賢提倡的五種美德典範。
- 校徽採用紅、藍、金三色，代表著希望、幸福及人類之進步。

Emblem

For University of Macau

- The emblem of the University of Macau features a five-towered crest encircled by golden rings and the name of the University in Chinese and Portuguese.
- The key on the book is the key to knowledge, and the waves represent the University in its island setting in the South China Sea.
- The Bridge links together the Eastern and Western cultures.
- On the ribbon is a Chinese motto listing the five virtues of an ideal scholar: humanity, integrity, propriety, wisdom and sincerity.
- The colours are red for hope, blue for the joy of well-being, and gold for the advancement of humanity.

Vision

澳門大學以立足澳門，共建灣區，融入國家，走向世界為發展定位，通過以學生為本的優質教育、具國際影響力的重點研究，以及高水平的社會服務，矢志成為一所國際公認的卓越大學。

The University of Macau (UM) wishes to position itself as a university with firm roots in Macao, while at the same time being committed to participating in the development of the Greater Bay Area. UM hopes to integrate itself into national development while reaching out to the world. Through quality student-centred education, key research subjects with international impact, and a high standard of community services, it aspires to become an internationally recognised university of excellence.

Mission

澳門大學充分發揮其以中華文化為主流、多元文化共存的校園環境，協同學院與書院的全人教育體系以及國際化的辦學模式等特色 and 優勢，致力於：

The University of Macau endeavours to leverage its uniqueness and strengths, as highlighted by a learning environment where Chinese culture plays a major role and diverse cultures coexist, and by a system of whole-person education underpinned by faculties and residential colleges in an international education setup. The university is committed to:

- 秉承“仁、義、禮、知、信”的校訓；
Upholding the university motto – Humanity, Integrity, Propriety, Wisdom and Sincerity;
- 培養具家國情懷、國際視野、全球競爭力和有社會責任感的公民和創新型人才，服務澳門、國家及世界發展所需；
Cultivating citizens with innovative abilities who exhibit love for their home country, possess global perspectives and competitiveness, and shoulder social responsibilities necessary for the development of Macao, the nation and beyond;
- 促進學術研究，推動產學研合作，助力澳門經濟社會可持續發展，助力粵港澳大灣區建設、服務國家，貢獻人類；
Promoting academic research and industry-academia-research cooperation to facilitate sustainable socio-economic development of Macao and support the development of the Guangdong-Hong Kong-Macao Greater Bay Area, thus serving the nation and humanity at large;
- 植根澳門，多層次、全方位服務澳門社群，造福澳門社會。
Being firmly rooted in Macao, serving and enriching the local community at multiple levels and on all fronts.

The University

Introduction

Founded in 1981, the University of Macau (UM) is an international public comprehensive university in Macao, with a multicultural campus and a system of whole-person education underpinned by faculties and residential colleges in an international education setup. 80 per cent of its faculty members are from outside Macao. With English as the main medium of instruction, the university is committed to producing creative and socially responsible graduates with a global mindset and international competitiveness.

Quality Education

Teaching units at UM include Faculty of Arts and Humanities, Faculty of Business Administration, Faculty of Education, Faculty of Health Sciences, Faculty of Law, Faculty of Science and Technology, Faculty of Social Sciences, Honours College, Graduate School, and Centre for Continuing Education. Research institutes include Institute of Advanced Studies in Humanities and Social Sciences, Institute of Applied Physics and Materials Engineering, Institute of Chinese Medical Sciences, Institute of Collaborative Innovation, Institute of Microelectronics, Asia-Pacific Academy of Economics and Management, and Centre for Macau Studies.

Currently, there are more than 13,500 students at UM. For undergraduate education, the university adopts a '4-in-1' collaborative education model, which consists of discipline-specific education, general education, research and internship education, and community and peer education. With a credit system and a collegiate system, the university offers over 120 degree programmes at bachelor's, master's, and doctoral levels, covering a variety of fields, including literature, language, business administration, marketing, accounting, finance, international integrated resort management, science, education, biomedical science, law, history, economics, psychology, sociology, communication, engineering, computer science, and Chinese medical sciences.

International Reputation

UM is ranked No 193 in the Times Higher Education (THE) World University Rankings, No 14 in the THE Young University Rankings, No 36 in the THE Asia University Rankings, and No 1 in the Association of Portuguese Speaking Universities. In the Quacquarelli Symonds (QS) World University Rankings, it is ranked No 245. It is among the top 1% in Essential Science Indicators (ESI) rankings in 14 subjects, namely Engineering, Materials Science, Computer Science, Chemistry, Pharmacology & Toxicology, Clinical Medicine, Psychiatry/Psychology, Biology & Biochemistry, Social Sciences, General, Molecular Biology & Genetics, Agricultural Sciences, Economics & Business, Environment/Ecology, and Mathematics.

The Faculty of Business Administration at UM has received accreditations from three major international accreditation bodies: the EFMD Quality Improvement System (EQUIS) of the European Foundation for Management Development (EFMD), the Association to Advance Collegiate Schools of Business (AACSB), and the Association of MBAs (AMBA).

Internationalisation

UM is an international university with a multicultural campus. It adopts a modern governance model and recruits faculty members internationally. 80 per cent of its faculty members are from outside Macao. The university's international characteristics have attracted outstanding students from around the world, which in turn has created a vibrant, multicultural campus. UM constantly expands its international network and actively builds new platforms for international collaboration in order to broaden the students' horizons. It has signed collaboration agreements with nearly 320 higher education institutions spanning over 30 countries and regions and UM students can enjoy exchange opportunities offered by more than 170 partner institutions in over 30 countries and regions. The university also provides students with many internship opportunities, both local and

overseas, in order to enhance their employability upon graduation.

Outstanding Faculty

UM has recruited a team of high-calibre faculty members from around the world. Many of them have earned prestigious titles, such as member of Academia Europaea (Academy of Europe), fellow of the Royal Academy of Engineering, fellow of the Royal Society of Chemistry, fellow of the Royal Society of Biology, fellow of the Institution of Engineering and Technology, member of the European Academy of Sciences and Arts, member of the Portuguese Academy of Sciences, fellow of the Institute of Electrical and Electronics Engineers, fellow of the American Association for the Advancement of Science, fellow of the American Society of Civil Engineers, fellow of the American Society of Mechanical Engineers, fellow of the Society of Photographic Instrumentation Engineers, and Chang Jiang Scholar Chair Professor (Ministry of Education).

Not only does the university constantly search for high-calibre scholars, it also offers attractive work conditions through the UM Talent Programme to enable faculty members to achieve their full potential so that they can produce outstanding results. As part of the programme, the UM Macao Fellow scheme aims to nurture young local scholars and encourage talented professionals to develop their careers in Macao.

A Unique Residential College System

UM's residential college (RC) system provides a platform for knowledge integration based on the university's '4-in-1' model of whole-person education. This is unique among universities in Macao. There are currently ten RCs at UM, namely Chao Kuang Piu College, Cheng Yu Tung College, Cheong Kun Lun College, Choi Kai Yau College, Henry Fok Pearl Jubilee College, Lui Che Woo College, Ma Man Kei and Lo Pak Sam College, Moon Chun Memorial College, Shiu Pong College, and Stanley Ho East Asia College. As a complement to the university's faculty-based system, the RCs serve as a vehicle for whole-person education through systematic planning of experiential programmes, with the aim of nurturing students who are successful in their studies and whole-person development. The RCs strive to enhance students' seven competencies: responsible citizenship, global competitiveness, knowledge integration, teamwork and collaboration, service and leadership, cultural engagement, and healthy lifestyle.

Cutting-edge Research

UM adopts a research policy that can be summarised as 'highlighting characteristics, leveraging strengths, creating peaks, and strengthening cooperation', with a focus on supporting academic disciplines that reflect Macao's characteristics, meet the needs of Macao and the country, and are in line with international trends. UM has established a '3+3+3+3' strategic research blueprint, with the four '3s' referring to three state key laboratories (State Key Laboratory of Quality Research in Chinese Medicine, State Key Laboratory of Analog and Mixed-Signal VLSI, and State Key Laboratory of Internet of Things for Smart City), three emerging research fields (precision medicine, advanced materials, and regional oceanology), three interdisciplinary research fields (artificial intelligence and robotics, data science, and cognitive and brain sciences), and three research platforms for the humanities and social sciences (Institute of Advanced Studies in Humanities and Social Sciences, Centre for Macao Studies, and Asia-Pacific Academy of Economics and Management). The university encourages interdisciplinary collaboration, especially the integration of modern technology in humanities and social sciences.

In terms of chip research, UM has launched various cutting-edge studies for the development of electronic systems, with analog-to-digital converter and ultra-low-power RF integrated circuit being the two major research directions. The university also actively promotes research in power management and microfluidic technology. UM researchers in microelectronics have received different awards, including a second prize of the State Scientific and Technological Progress Award, the Xplorer Prize, and a number of Macao Science and Technology Awards. 15 papers

from UM were accepted at the International Solid-State Circuits Conference 2023, which is testament to UM's leading position in microelectronics research. As for Chinese medicine research, UM is committed to enhancing the quality of Chinese medicine and establishing international standards. UM has established quality standards for more than 20 Chinese medicinal herbs for authoritative publications such as United States Pharmacopeia (USP), European Pharmacopoeia (Ph. Eur.), and Chinese Pharmacopoeia (ChP), and have received a second prize of the State Scientific and Technological Progress Award, gold awards at the International Exhibition of Inventions of Geneva, over 40 Macao Science and Technology Awards, and the Macao Science and Technology Special Award. With the 'dual carbon' strategy and the creation of a livable and resilient smart city as the guiding principle, UM researchers in the field of Internet of Things for smart city are committed to strategic fundamental and applied research, and have produced a number of internationally influential and iconic results. UM has received a second prize of the State Scientific and Technological Progress Award, the Guanghua Engineering Science and Technology Prize, and a number of Macao Science and Technology Awards.

UM also actively strengthens entrepreneurship and knowledge transfer to enhance the social impact of its research results. Zhuhai UM Science & Technology Research Institute was the first industry-academia collaboration demonstration base established by UM and UMTEC Limited in the Greater Bay Area (GBA) for this very purpose. The institute is a hub of cooperation between Zhuhai and Macao in building an international science and technology innovation centre in the GBA. It relies on the research strengths of the three state key laboratories and institutes with competitive disciplines to integrate into the GBA and participate in national research projects, promote technology transfer, and foster emerging industries. The university's Centre for Innovation and Entrepreneurship obtained approval to serve as a national co-working space in 2019 and has incubated over 50 start-ups to assist faculty members and students in transferring their research results.

Building Strong Alliances

UM has established close strategic partnerships with leading academic institutions in China and abroad, including those in Portuguese- and English-speaking countries. The university has launched joint training programmes with a number of world-renowned universities, including Imperial College London, the University of Edinburgh, the University of Bristol, Queen's University Belfast, Temple University, the University of Lisbon, Tsinghua University, Fudan University, Zhejiang University, and South China University of Technology.

In addition, UM has established five joint laboratories with institutes under the Chinese Academy of Sciences to carry out joint research and development projects in five areas, namely brain science, artificial intelligence, spatial information, marine environment and ocean engineering, and precision medicine.

Serving Macao

The university has spared no effort in the study of the different aspects of Macao, including literature, history, society, law, education, and commerce, in order to provide empirical data and advanced theories for enriching the cultural life and enhancing the well-being of Macao residents. It has established the Macao Base for Primary & Secondary Education in Humanities & Social Sciences, and the Macao Base for Primary & Secondary STEM Education to support basic education in Macao. In addition, UM actively supports Macao's development into 'One Centre, One Platform, and One Base' by nurturing professionals in various fields, including language, Chinese history and culture, data science, innovation and entrepreneurship, physics, chemistry, and biology.

In line with the Macao SAR government's policy 'Education for Macao, Talent for Macao', the university continues to offer new degree programmes to nurture more high-level professionals to promote economic diversification in Macao. In 2020, it established the Public Administration

Training Centre to help build a talent pipeline for the Macao SAR government.

An Environment Conducive to Education

Thanks to the support of the central and Macao SAR governments, UM received approval in 2009 to build its new campus on Hengqin island in Guangdong province, which would come under the jurisdiction of the Macao SAR government. Then President Hu Jintao officiated at the groundbreaking ceremony for the campus on 20 December 2009. UM relocated to the new campus in 2014. Separated from Taipa by a river, the campus covers approximately one square kilometre, with the lush Hengqin Hill serving as a beautiful backdrop. Designed with a people-centred approach, the campus aims to provide an environment that is conducive to scholarly pursuits. The campus is equipped with a complete set of teaching facilities, including a well-stocked library, the University Hall, an Olympic-standard swimming pool, a sports complex, an archery range, basketball courts, a sports climbing wall, and gym rooms.

Support to the University

UM has progressed in leaps and bounds in recent years, thanks to the support of the central government, the Macao SAR government, and all sectors of society. The current president Xi Jinping has visited UM and has given important instructions for the university's future development. In 2018, President Xi replied to a joint letter from UM and several other higher education institutions in Macao, instructing them to cultivate more patriotic and Macao-loving talent and create more scientific and technological achievements.

As a public comprehensive university in Macao, with the Macao SAR chief executive serving as its chancellor and chair of the University Assembly, UM enjoys the unparalleled advantage of having the unreserved support of the SAR government. In 2016, it became the first institution of higher learning in Macao to receive the Medal of Merit—Education from the SAR government, in recognition of its contributions to education.

Vision and Mission

Today's UM is on the threshold of a new era. It will continue to uphold the five virtues listed in the university motto, namely humanity, integrity, propriety, wisdom, and sincerity, to make further improvements and bring about innovation. As a university firmly rooted in Macao, UM strives to participate in the development of the GBA, integrate itself into national development, and reach out to the world. UM aims to become an internationally recognised university of excellence through quality student-centred education, internationally impactful research, and high-quality community services.

The Senate and its Sub-Committees

(For academic year 2023/2024*)

The Senate

The Senate is the supreme body responsible for academic affairs of the University and guides the University in its teaching and research activities. It plays a leading role in the University's pursuits of teaching and research activities and ensures high academic standards and rigour.

Chair

Prof. Yonghua SONG 宋永華教授, Rector

Members

Prof. Michael King Man HUI 許敬文教授, Vice Rector (Academic Affairs)

Prof. Rui Paulo da Silva MARTINS 馬許願教授, Vice Rector (Global Affairs)

Prof. Wei GE 葛偉教授, Vice Rector (Research)

Prof. Kai Meng MOK 莫啓明教授, Vice Rector (Student Affairs)

Dr Claudia Jian XU 徐建博士, Vice Rector (Administration)

Prof. Jie XU 徐杰教授, Dean of Faculty of Arts and Humanities

Prof. Jun YU 余俊教授, Dean of Faculty of Business Administration

Prof. Lianghuo FAN 范良火教授, Dean of Faculty of Education

Prof. Chuxia DENG 鄧初夏教授, Dean of Faculty of Health Sciences

Prof. Io Cheng TONG 唐曉晴教授, Dean of Faculty of Law

Prof. Cheng-Zhong XU 須成忠教授, Dean of Faculty of Science and Technology

Prof. Richard Weixing HU 胡偉星教授, Dean of Faculty of Social Sciences

Prof. Pak Kin WONG 王百鍵教授, Dean of Graduate School

Prof. Rose Neng LAI 黎寧教授, Dean of Honours College

Prof. Cheng-Zhong XU 須成忠教授, Interim Director of Institute of Collaborative Innovation

Prof. Xin CHEN 陳新教授, Director of Institute of Chinese Medical Sciences

Prof. Matthew Ting Chi LIU 劉丁己教授, Director of Centre for Continuing Education

Prof. Zikang TANG 湯子康教授, Director of Institute of Applied Physics and Materials Engineering

Prof. Rui Paulo da Silva MARTINS 馬許願教授, Director of Institute of Microelectronics

Prof. Xingzhong YU 於興中教授, Director of Institute of Advanced Studies in Humanities and Social Sciences

Prof. Rico Long Wai LAM 林朗為教授, Registrar

Dr Jianzhong WU 吳建中博士, University Librarian

Ms Carol Kei WONG 汪淇女士, Director of Rector's Office

Prof. Katrine Ka Ki WONG 王嘉祺教授, Director of Centre for Teaching and Learning Enhancement

Mr Paul Chap Chong PANG 彭執中先生, Dean of Students

Prof. Defeng LI 李德鳳教授, Faculty of Arts and Humanities

Prof. Qingjie WANG 王慶節教授, Faculty of Arts and Humanities

Prof. Yulin YUAN 袁毓林教授, Faculty of Arts and Humanities

Prof. Damian SHAW 肖德勉教授, Faculty of Arts and Humanities

Prof. Glen TIMMERMANS, Faculty of Arts and Humanities

Prof. Jeremy De CHAVEZ, Faculty of Arts and Humanities
 Mr Kevin Michael MAHER, Faculty of Arts and Humanities
 Prof. Raymond Chi Ho LOI 雷智豪教授, Faculty of Business Administration
 Prof. Li MIAO 苗莉教授, Faculty of Business Administration
 Prof. Jason Zezhong XIAO 蕭澤忠教授, Faculty of Business Administration
 Prof. Morris Ming LIU 劉明教授, Faculty of Business Administration
 Prof. Glenn MCCARTNEY 默希廉教授, Faculty of Business Administration
 Prof. Henry Chun Kwok LEI 李振國教授, Faculty of Business Administration
 Prof. Feng TANG 唐豐教授, Faculty of Business Administration
 Ms Winnie Un Fong KUAN 關婉芳女士, Faculty of Business Administration
 Prof. Biying HU 胡碧穎教授, Faculty of Education
 Prof. Bing WEI 魏冰教授, Faculty of Education
 Prof. George Chun Wai CHENG 鄭振偉教授, Faculty of Education
 Prof. Frank Yang GONG 龔陽教授, Faculty of Education
 Mr Frankie U Kei WONG 黃宇棋先生, Faculty of Education
 Prof. Edwin Chong Wing CHEUNG 張仲榮教授, Faculty of Health Sciences
 Prof. Vivien Ya-Fan WANG 王雅凡教授, Faculty of Health Sciences
 Prof. Wakam CHANG 曾華鑫教授, Faculty of Health Sciences
 Dr Jung Woo PARK 朴政友博士, Faculty of Health Sciences
 Prof. Bing SHUI 稅兵教授, Faculty of Law
 Prof. Muruga Perumal RAMASWAMY 白祿孟教授, Faculty of Law
 Prof. Teresa Lancry A.S. ROBALO, Faculty of Law
 Mr Heng Man HO 何慶文先生, Faculty of Law
 Prof. Zhiguo GONG 鞏志國教授, Faculty of Science and Technology
 Prof. Vai Pan IU 姚偉彬教授, Faculty of Science and Technology
 Prof. Ken Kam Weng TAM 譚錦榮教授, Faculty of Science and Technology
 Prof. Lei ZHU 祝雷教授, Faculty of Science and Technology
 Prof. Kun Pang KOU 高冠鵬教授, Faculty of Science and Technology
 Prof. Fai WONG 黃輝教授, Faculty of Science and Technology
 Prof. Li LUO 羅力教授, Faculty of Science and Technology
 Mr Miguel Junior GOMES DA COSTA, Faculty of Science and Technology
 Prof. Tianji CAI 蔡天驥教授, Faculty of Social Sciences
 Prof. Tien Tsung LEE 李天宗教授, Faculty of Social Sciences
 Prof. Lampo LEONG 梁藍波教授, Faculty of Social Sciences
 Prof. Angela Wen-Yu CHANG 張文瑜教授, Faculty of Social Sciences
 Prof. Jianhua XU 徐建華教授, Faculty of Social Sciences
 Prof. Tony Huiquan ZHANG 張匯泉教授, Faculty of Social Sciences
 Mr Raymond Fei Loi LAI 黎飛雷先生, Faculty of Social Sciences

Mr Chon U KAM 甘晉譽先生, Student representative of UM Students' Union
 Ms Zhen MA 馬真女士, Student representative of UM Postgraduate Association

Secretary

Prof. Rico Long Wai LAM 林朗為教授, Registrar

The Standing Committees of the Senate include:

1. General Affairs Committee
2. Research Committee
3. Academic Quality Assurance Committee
4. Library Committee
5. Information and Education Technology Committee
6. Graduate Studies Committee
7. General Education Committee
8. Committee on Teaching and Learning Enhancement
9. Scholarship Committee
10. Sports Committee
11. Staff-Student Consultative Committee
12. Student Disciplinary Committee

1. General Affairs Committee

The General Affairs Committee handles admission and academic affairs, advises the Senate on the creation and revision of programmes, courses and academic regulations and provides preparatory work for the Senate meetings.

Composition

Chair

Prof. Yonghua SONG 宋永華教授, Rector

Members

Prof. Michael King Man HUI 許敬文教授, Vice Rector (Academic Affairs)

Prof. Rui Paulo da Silva MARTINS 馬許願教授, Vice Rector (Global Affairs)

Prof. Wei GE 葛偉教授, Vice Rector (Research)

Prof. Kai Meng MOK 莫啓明教授, Vice Rector (Student Affairs)

Prof. Jie XU 徐杰教授, Dean of Faculty of Arts and Humanities

Prof. Jun YU 余俊教授, Dean of Faculty of Business Administration

Prof. Lianghuo FAN 范良火教授, Dean of Faculty of Education

Prof. Chuxia DENG 鄧初夏教授, Dean of Faculty of Health Sciences

Prof. Io Cheng TONG 唐曉晴教授, Dean of Faculty of Law

Prof. Cheng-Zhong XU 須成忠教授, Dean of Faculty of Science and Technology

Prof. Richard Weixing HU 胡偉星教授, Dean of Faculty of Social Sciences

Prof. Pak Kin WONG 王百鍵教授, Dean of Graduate School

Prof. Rose Neng LAI 黎寧教授, Dean of Honours College

Prof. Xin CHEN 陳新教授, Director of Institute of Chinese Medical Sciences

Prof. Zikang TANG 湯子康教授, Director of Institute of Applied Physics and Materials Engineering

Prof. Pui In MAK 麥沛然教授, Representative of Institute of Microelectronics

Prof. Rico Long Wai LAM 林朗為教授, Registrar

Ms Carol Kei WONG 汪淇女士, Director of Rector's Office

Prof. Xingzhong YU 於興中教授, Interim Director of Institute of Advanced Studies in Humanities and Social Sciences

2. Research Committee

The Research Committee plans, promotes and governs research activities of the University. It also approves research project funding and assists in managing external research funding.

Composition

Chair

Prof. Wei GE 葛偉教授, Vice Rector (Research)

Members

Prof. Defeng LI 李德鳳教授, Associate Dean of Faculty of Arts and Humanities
 Prof. Raymond Chi Ho LOI 雷智豪教授, Associate Dean of Faculty of Business Administration
 Prof. Mingming ZHOU 周明明教授, Associate Dean of Faculty of Education
 Prof. Renhe XU 徐仁和教授, Associate Dean of Faculty of Health Sciences
 Prof. Dan WEI 魏丹教授, Associate Dean of Faculty of Law
 Prof. Xiao-Chuan CAI 蔡小川教授, Associate Dean of Faculty of Science and Technology
 Prof. Anise Man Sze WU 胡文詩教授, Associate Dean of Faculty of Social Sciences

Prof. Pak Kin WONG 王百鍵教授, Dean of Graduate School
 Prof. Cheng-Zhong XU 須成忠教授, Interim Director of Institute of Collaborative Innovation
 Prof. Xin CHEN 陳新教授, Director of Institute of Chinese Medical Sciences
 Prof. Sai Weng SIN 冼世榮教授, Representative of the State Key Laboratory of Analog and Mixed-Signal VLSI
 Prof. Peng LI 李鵬教授, Director of the State Key Laboratory of Quality Research in Chinese Medicine
 Prof. Zikang TANG 湯子康教授, Director of Institute of Applied Physics and Materials Engineering
 Prof. Yonghua SONG 宋永華教授, Director of the State Key Laboratory of Internet of Things for Smart City
 Prof. Man Kay LAW 羅文基教授, Representative of Institute of Microelectronics

Prof. Damian John SHAW 肖德勉教授, Faculty of Arts and Humanities
 Prof. Li MIAO 苗莉教授, Faculty of Business Administration
 Prof. Bing WEI 魏冰教授, Faculty of Education
 Prof. Edwin Chong Wing CHEUNG 張仲榮教授, Faculty of Health Sciences
 Prof. Teresa Lancry A.S. ROBALO, Faculty of Law
 Prof. Lei ZHU 祝雷教授, Faculty of Science and Technology
 Prof. Tianji CAI 蔡天驥教授, Faculty of Social Sciences

3. Academic Quality Assurance Committee

The Academic Quality Assurance Committee arranges for prior academic assessment of new programmes and courses and periodic academic review of existing ones and manages to evaluate and improve the teaching quality, standard and performance of each teaching unit.

Composition

Chair

Prof. Michael King Man HUI 許敬文教授, Vice Rector (Academic Affairs)

Members

Prof. Jie XU 徐杰教授, Dean of Faculty of Arts and Humanities

Prof. Jun YU 余俊教授, Dean of Faculty of Business Administration
Prof. Lianghuo FAN 范良火教授, Dean of Faculty of Education
Prof. Chuxia DENG 鄧初夏教授, Dean of Faculty of Health Sciences
Prof. Io Cheng TONG 唐曉晴教授, Dean of Faculty of Law
Prof. Cheng-Zhong XU 須成忠教授, Dean of Faculty of Science and Technology
Prof. Richard Weixing HU 胡偉星教授, Dean of Faculty of Social Sciences

Prof. Qingjie WANG 王慶節教授, Faculty of Arts and Humanities
Prof. Glenn MCCARTNEY 默希濂教授, Faculty of Business Administration
Prof. George Chun Wai CHENG 鄭振偉教授, Faculty of Education
Prof. Vivien Ya-Fan WANG 王雅凡教授, Faculty of Health Sciences
Prof. Bing SHUI 稅兵教授, Faculty of Law
Prof. Kun Pang KOU 高冠鵬教授, Faculty of Science and Technology
Prof. Lampo LEONG 梁藍波教授, Faculty of Social Sciences

Prof. Zikang TANG 湯子康教授, Director of Institute of Applied Physics and Materials Engineering
Prof. Xin CHEN 陳新教授, Director of Institute of Chinese Medical Sciences
Prof. Rose Neng LAI 黎寧教授, Dean of Honours College
Prof. Matthew Ting-Chi LIU 劉丁己教授, Director of Centre for Continuing Education
Prof. Katrine Ka Ki WONG 王嘉祺教授, Director of Centre for Teaching and Learning Enhancement
Prof. Cheng-Zhong XU 須成忠教授, Interim Director of Institute of Collaborative Innovation
Prof. Pui In MAK 麥沛然教授, Representative of Institute of Microelectronics
Prof. Rico Long Wai LAM 林朗為教授, Registrar
Prof. Pak Kin WONG 王百鍵教授, Dean of Graduate School
Dr Joey Chi Ngai LAO 柳智毅博士, Director of Strategy and Planning Office

Mr Chon U KAM 甘晉譽先生, Student representative of UM Students' Union
Ms Zhen MA 馬真女士, Student representative of UM Postgraduate Association

4. Library Committee

The Library Committee sets development and improvement plans for the Library and ensures that the resources the Library acquires in each academic year meet the needs of teaching and research of various academic units of the University.

Composition

Chair

Prof. George Chun Wai CHENG 鄭振偉教授, Faculty of Education

Members

Dr Jianzhong WU 吳建中博士, University Librarian

Prof. Glen TIMMERMANS, Faculty of Arts and Humanities
Prof. Rachel Xiaorong MA 馬笑蓉教授, Faculty of Business Administration
Prof. Yan WANG 王燕教授, Faculty of Education
Dr Weiwei LIU 劉蔚蔚博士, Faculty of Health Sciences
Prof. Xiaobo ZHAI 翟小波教授, Faculty of Law
Prof. Seak Weng VONG 黃錫榮教授, Faculty of Science and Technology

Prof. Leon Meng U IEONG 楊鳴宇教授, Faculty of Social Sciences
 Dr Carolina Oi Lam UNG 吳靄琳博士, Institute of Chinese Medical Sciences
 Prof. Hou IAN 殷灝教授, Institute of Applied Physics and Materials Engineering
 Prof. Yan ZHU 諸媽教授, Institute of Microelectronics

Mr Long In CHAO 周朗賢先生, Student representative of UM Students' Union
 Ms Honggui XU 徐洪歸女士, Student representative of UM Postgraduate Association

5. Information and Education Technology Committee

The Information and Education Technology Committee sets the University's policy and regulations for the use of information and education technology in academic and administrative work. It evaluates and introduces new technologies and facilities, in order to enhance the efficiency of teaching, research and learning.

Composition

Chair

Prof. Kun Pang KOU 高冠鵬教授, Faculty of Science and Technology

Members

Mr Antony SI TOU 司徒珮璠先生, Director of Information and Communication Technology Office

Prof. Jeremy DE CHAVEZ, Faculty of Arts and Humanities
 Prof. Soey Sut Ieng LEI 李雪瑩教授, Faculty of Business Administration
 Prof. Andy Chun Wai FAN 范進偉教授, Faculty of Education
 Prof. Ningyi SHAO 邵寧一教授, Faculty of Health Sciences
 Prof. Muruga Perumal RAMASWAMY 白祿孟教授, Faculty of Law
 Prof. Leong Hou U 余亮豪教授, Faculty of Science and Technology
 Mr Raymond Fei Loi LAI 黎飛雷先生, Faculty of Social Sciences

Prof. Defang OUYANG 歐陽德方教授, Institute of Chinese Medical Sciences
 Prof. Hui PAN 潘暉教授, Institute of Applied Physics and Materials Engineering
 Prof. Chi Seng LAM 林智聲教授, Institute of Microelectronics
 Dr Christopher Allen FULTON, Centre for Teaching and Learning Enhancement
 Ms Stephanie Sao Lai IO 姚秀麗女士, Student Affairs Office

Mr Seng Hang PUN 潘星行先生, Student representative of UM Students' Union
 Ms Yufei LIU 劉雨飛女士, Student representative of UM Postgraduate Association

6. Graduate Studies Committee

The Graduate Studies Committee examines and governs the development plans on postgraduate study programmes and research projects. It also handles admission and academic affairs relating to postgraduate programmes.

Composition

Chair

Prof. Yonghua SONG 宋永華教授, Rector

Members

Prof. Michael King Man HUI 許敬文教授, Vice Rector (Academic Affairs)
Prof. Rui Paulo da Silva MARTINS 馬許願教授, Vice Rector (Global Affairs)
Prof. Wei GE 葛偉教授, Vice Rector (Research)
Prof. Pak Kin WONG 王百鍵教授, Dean of Graduate School

Prof. Defeng LI 李德鳳教授, Associate Dean of Faculty of Arts and Humanities
Prof. Raymond Chi Ho LOI 雷智豪教授, Associate Dean of Faculty of Business Administration
Prof. Mingming ZHOU 周明明教授, Associate Dean of Faculty of Education
Prof. Hanming SHEN 沈漢明教授, Associate Dean of Faculty of Health Sciences
Prof. Dan WEI 魏丹教授, Associate Dean of Faculty of Law
Prof. Xiao-Chuan CAI 蔡小川教授, Associate Dean of Faculty of Science and Technology
Prof. Tianji CAI 蔡天驥教授, Associate Dean of Faculty of Social Sciences

Prof. Yue ZHANG 張月, Faculty of Arts and Humanities
Prof. Maggie Xiaoqing FU 傅曉青教授, Faculty of Business Administration
Prof. Yisu ZHOU 周憶粟教授, Faculty of Education
Prof. Xuanjun ZHANG 張宣軍教授, Faculty of Health Sciences
Prof. Xiaobo ZHAI 翟小波教授, Faculty of Law
Prof. Hannah Wanhuan ZHOU 周萬歡教授, Faculty of Science and Technology
Prof. Richard DENNIS FITZGERALD, Faculty of Social Sciences

Prof. Maggie Pui Man HOI 許貝文教授, Institute of Chinese Medical Sciences
Prof. Zikang TANG 湯子康教授, Institute of Applied Physics and Materials Engineering
Prof. Sai Weng SIN 冼世榮教授, Institute of Microelectronics

Prof. Katrine Ka Ki WONG 王嘉祺教授, Director of Centre for Teaching and Learning Enhancement
Prof. Rico Long Wai LAM 林朗為教授, Registrar
Ms Carol Kei WONG 汪淇女士, Director of Rector's Office

Ms Zhen MA 馬真女士, Student representative of UM Postgraduate Association

7. General Education Committee

The General Education Committee develops policies and objectives of general education curriculum, to assess the general education courses and to keep the curriculum under regular review. It also handles other related affairs at the request of the Senate and advises on the annual budget in support of its own areas of work.

Composition

Chair

Prof. Michael King Man HUI 許敬文教授, Vice Rector (Academic Affairs)

Members

Prof. Kai Meng MOK 莫啓明教授, Vice Rector (Student Affairs)

Prof. Nevla DOLCINI, Faculty of Arts and Humanities
Prof. Jacky Fok Loi HONG 洪福來教授, Faculty of Business Administration
Prof. Zhaowei KONG 孔兆偉教授, Faculty of Education
Prof. Gary WONG 黃值富教授, Faculty of Health Sciences

Dr Ke LI 李可博士, Faculty of Law

Prof. Hannah Wanhuan ZHOU 周萬歡教授, Faculty of Science and Technology

Prof. Hongyu WANG 王紅宇教授, Faculty of Social Sciences

Prof. Victoria Lai Cheng LEI 李麗青教授, Honours College

Prof. Jiahong LU 路嘉宏教授, Institute of Chinese Medical Sciences

Prof. Billy Kar Wei NG 吳嘉偉教授, Institute of Applied Physics and Materials Engineering

Prof. Chi Hang CHAN 陳知行教授, Institute of Microelectronics

Prof. Katrine Ka Ki WONG 王嘉祺教授, Director of Centre for Teaching and Learning Enhancement

Prof. Rico Long Wai LAM 林朗為教授, Registrar

Mr Paul Chap Chong PANG 彭執中先生, Dean of Students

Mr Chon U KAM 甘晉譽先生, Student representative of UM Students' Union

8. Committee on Teaching and Learning Enhancement

The Committee on Teaching and Learning Enhancement assists the Centre for Teaching and Learning Enhancement to pursue standard of teaching and learning excellence. It endorses the funding of projects and educational programmes related to teaching and learning enhancement. It also submits strategic proposals to the Senate, and advises on the annual budget in support of its own areas of work.

Composition

Chair

Prof. Michael King Man HUI 許敬文教授, Vice Rector (Academic Affairs)

Members

Prof. Ricardo MOUTINHO, Faculty of Arts and Humanities

Prof. Tony Zhenjiang QIN 秦振江教授, Faculty of Business Administration

Prof. Bobby Ho-Hong CHING 程浩航教授, Faculty of Education

Prof. Henry Hang Fai KWOK 郭珩輝教授, Faculty of Health Sciences

Prof. Rostam NEUWIRTH, Faculty of Law

Prof. Che Man CHENG 鄭智文教授, Faculty of Science and Technology

Prof. Angela Wen-Yu CHANG 張文瑜教授, Faculty of Social Sciences

Prof. Benjamin Kidder HODGES, Honours College

Prof. Maggie Pui Man HOI 許貝文教授, Institute of Chinese Medical Sciences

Prof. Guichuan XING 邢貴川教授, Institute of Applied Physics and Materials Engineering

Prof. Yong CHEN 陳勇教授, Institute of Microelectronics

Ms Alice Chong Kok FONG 馮鍾珏女士, Graduate School

Ms Betty Wai Hong CHANG 曾偉紅女士, Academic Affairs Office

Academic Dress for Graduates

Academic Dress for Graduates

Specifications of the Graduation Gown

Doctoral Degrees

Doctor of Philosophy

Gowns

- round sleeves in blue
- blue silk piping in front
- front pleats, hook and eye closure
- back yoke cord and button
- 9 cm hem
- in red color

Hoods - red hood with blue silk hem

Caps - round cap in black color with gold tassel

Professional Doctorates

Gowns

- round sleeves in purple
- purple silk piping in front
- front pleats, hook and eye closure
- back yoke cord and button
- 9 cm hem
- in red color

Hoods - red hood with purple silk hem

Caps - round cap in black color with gold tassel

Master's Degrees

Gowns

- sleeves with arm slits closed
- front pleats, hook and eye closure
- back yoke cord and button
- 8.5 cm hem
- in black color

Caps - square cap in black color with black tassel

Hoods - black hood with 1 cm gold silk hem and color silk hem ranging from 4.5 to 7 cm, progressively wider towards the odd-shaped flap at the back of the hood

Faculty of Arts and Humanities - purple silk hem

Faculty of Business Administration - silver silk hem

Faculty of Education - blue silk hem

Faculty of Health Sciences - bitter lemon silk hem

Faculty of Law - red silk hem

Faculty of Science and Technology - orange silk hem

Faculty of Social Sciences - green silk hem

Institute of Applied Physics and Materials Engineering – navy blue silk hem

Institute of Chinese Medical Sciences - yellow silk hem

Institute of Collaborative Innovation - kelly green silk hem

Institute of Microelectronics - cobalt blue silk hem

Bachelor's Degrees

Gowns

- round sleeves
- front pleats, hook and eye closure
- 6 cm hem
- in black color

Caps - square cap in black color with black tassel

Hoods - black hood with color silk hem ranging from 4 to 4.5 cm, progressively wider towards the odd-shaped flap at the back of the hood

Faculty of Arts and Humanities - purple silk hem

Faculty of Business Administration - silver silk hem

Faculty of Education - blue silk hem

Faculty of Health Sciences - bitter lemon silk hem

Faculty of Law - red silk hem

Faculty of Science and Technology - orange silk hem

Faculty of Social Sciences - green silk hem

Honours College

Stole – purple with 1 cm gold silk hem, embroidered with UM and HC logos

Admission Rules

PhD and Other Doctoral Degree Programmes

(Approved by the Rector on 22 January 2024)

1. ADMISSION REQUIREMENTS

1.1 General Entry (for Master's Degree Holders)

Possess a Master's degree or academic background recognized as equivalent by the University of Macau.

1.2 Accelerated Entry (for Master's Students)

Have been registered in a Master's Programme at the University of Macau for at least one year.

Have successfully finished the coursework part with outstanding performance and have demonstrated strong research ability.

1.3 Direct Entry (for Bachelor's Degree Holders)

Possess a Bachelor's degree with outstanding performance and have demonstrated strong research ability.

1.4 Proof of English Proficiency

Applicants who received their Bachelor/Master's degree from a university where the medium of instruction was not English are required to provide any of the following as proof of English proficiency:

- Obtained a TOEFL* score of 550 (paper-based examination)/80 (Internet-based examination) or above or,
- An IELTS* overall score of 6.0 or above with no sub-score lower than 5.5 or,
- College English Test (CET) score is acceptable to some academic units, please visit corresponding website of each academic unit for details.

*Note: TOEFL and IELTS scores are valid for two years from the test date.

For exceptional cases, admission should be endorsed by the Dean/Director of the academic unit concerned and be approved by the Graduate School.

Note:

Some programmes may have additional admission requirements. Please visit the corresponding website <https://grs.um.edu.mo/> for more details.

2. APPLICATION PROCEDURES

Online application forms will be available during the application period. Applicants should submit their application via the Online Application System of the University at <https://grs.um.edu.mo/>. The University will only accept application via the Online Application System.

2.1 Read carefully the important notes before you proceed with your application.

2.2 You must have an e-mail address to register as a new user in order to submit an application. Applicants who have successfully registered will receive a reference number (e.g. 2XXXXXXX) and password by e-mail. You must keep such information to login to your account throughout the whole application procedure. (If you fail to receive the e-mail within 2 days, please contact us by phone at 8822 4898 or by e-mail at gradschool@um.edu.mo.)

- 2.3 Complete all relevant sections of the Online Application. It is recommended that you supply a local mobile number so that the University may notify applicants of any news by e-mail and SMS.
- 2.4 Scan and upload all required documents to the Online Application System. All submitted documents must be in A4 size, PDF format and the total size for all attached documents should NOT be greater than 6MB.

The documents should include:

- 2.4.1 Identification card copy.
- 2.4.2 Personal curriculum vitae.
- 2.4.3 Passport size photo (in JPG format with 300dpi, with no border and white background).
- 2.4.4 Certificates and academic transcripts:
 - 2.4.4.1 General Entry (for Master's Degree Holders): each of the certificate and academic transcript of both the Bachelor's degree and Master's degree
 - 2.4.4.2 Accelerated Entry (for Master's Students): Bachelor's degree certificate and academic transcript, Master's academic transcript in University of Macau
 - 2.4.4.3 Direct Entry (for Bachelor's Degree Holders): Bachelor's degree certificate and academic transcript.
- 2.4.5 Non-UM current students must submit a testimonial which must be issued in not more than 60 days prior to the submission of the application for the PhD and other doctoral degree Programme.
- 2.4.6 Applicants currently studying in the final year of a Master's degree programme at the University of Macau do not need to submit the Master's degree transcript and testimonial.
- 2.4.7 Recommendation Forms. Applicants must use the recommendation forms provided by the Graduate School. Each application must contain two completed recommendation forms. At least one of the two recommendation forms must be completed by a university academic. The other one can be completed by either a university academic or an employer. Applicants can submit them either online or by post. However, to avoid possible postal delay, online recommendations are recommended.
 - 2.4.7.1 If you prefer to submit online recommendations, you must make sure your referees submit your recommendations to us before the application deadline. An automatic notification e-mail will be sent to the applicant once we receive the recommendations. If applicants do not receive this e-mail, it means your referee has not submitted the online recommendation for you yet. You should contact your referee as soon as possible to make sure that it is submitted by the application deadline.
 - 2.4.7.2 If you choose to submit by post, the forms should be sealed in an envelope by your referee and forwarded/sent to the Graduate School directly. Please write on the envelope your application number YP-CX-XXXX-X or reference number 2XXXXXXX before sending the recommendation form to us.
- 2.4.8 A statement addressing the area or topic of the applicant's interest in pursuing PhD

and other doctoral studies. The statement must be of no more than 15 pages or of size less than 1 MB.

- 2.4.9 Proof of English proficiency (Please refer to Item 1.4 under Admission Requirements for details).
- 2.4.10 Applicants who received their Bachelor/Master's degree from a university where the medium of instruction was English are required to provide a proof of English as the medium of instruction, if deemed necessary, issued by the applicants' university where their Bachelor/Master's degree was obtained (UM's current students and graduates are not required to provide such proof).
- 2.4.11 Other documents as requested by the programme for which the candidate is applying (if applicable).
- 2.4.12 Application without the above mentioned documents enclosed will not be processed.
- 2.4.13 Documents submitted to the University will not be returned to the applicant.
- 2.5 Verify all application data before submitting the application. Once the application is submitted, no data can be changed. Each applicant can submit only one application in the same academic year. If necessary, the applicant can indicate in his/her application a maximum choice of two programmes in one application with priority given to each programme. Although the applicant can apply for two programmes, application fee will be charged once only.
- 2.6 Settle the application fee by the deadline of the application period (For more details, please refer to 2.11).
- 2.7 Once the application fee is settled, an acknowledgment e-mail with an application number (YP-CX-XXXX-X) will be sent to you by e-mail. Applications without an application number will not be regarded as valid. If you do not receive any acknowledgment e-mail, please contact us by e-mail at gradschool@um.edu.mo.
- 2.8 Academic documents (such as recommendation forms, certificates, testimonials, academic transcript, etc.) submitted must be of the same language version as that of the thesis language of the programme being applied. Otherwise, the application will not be considered.
- 2.9 Admission for PhD and other doctoral degree programmes in principle is open all year round. For practical purpose, most students should be admitted in the first semester of the forthcoming academic year. However, if necessary they can also be admitted in the second semester as requested by the academic unit concerned.
- 2.10 Admission results will be released via the Online Application System. Candidates should follow the admission procedures as stipulated in the Online Application System and the offer letter to confirm acceptance. Offered candidates must settle the non-refundable deposit listed on the debit note for payment, the non-refundable deposit will be used to offset part of the tuition fee payable for that academic year. If candidates fail to confirm acceptance and settle the fees within the prescribed period as printed on the offer letter, the offer of admission will be cancelled. All fees paid are non-refundable.
- 2.11 Applicants will be given conditional offer in the following circumstances.
 - 2.11.1 applicants currently studying in the final year of Bachelor's degree programmes (Direct Entry) / Master's degree programmes (General Entry) will be conditionally offered and will only be formally admitted upon successful completion of their

Bachelor's degree programmes (Direct Entry) / Master's degree programmes (General Entry) with overall result satisfying the admission requirements.

2.11.2 in special cases, applicants are required to submit proof of English proficiency before formally admitted.

2.12 The application fee for each application is MOP200.00. The application fee is non-refundable.

The application fee payments must be made by the deadline of the application period:

2.12.1 by online payment (please follow the payment instructions on the website);

2.12.2 by cheque, bank draft or cashier's order drawn on a bank in Macao and made payable to the "University of Macau". An additional handling charge of MOP50 is required for each foreign bank draft or cashier's order. However, the exact amount of handling fees depends on the amount charged by banks. Our University reserves the right to recover the difference.

(Applicants who choose option 2.11.2 must print the application fee payment slip after they have completed the application at the Online Application System and submit the slip to the Treasury Section at Room 1012, Administration Building for payment.)

3. INTERVIEW

If interviews are required, the academic unit concerned will inform the applicants about the interview details.

4. TUITION FEES

4.1 Please refer to the Tuition Fees Scheme for postgraduate programmes (which is available at GRS webpage: <https://grs.um.edu.mo/>) for further details.

4.2 Tuition Fees are subject to revision annually.

5. PHD FUNDING

The UM PhD Scholarship and UM PhD Teaching Research Assistant are available to PhD students of the University which serve as source of stipend for students. Please refer to the *Guidelines for the UM PhD Scholarship and the UM PhD Teaching Research Assistant* for further details.

6. TERMINATION OF APPLICATION OR STUDY

6.1 Applicants must guarantee that the information given in the application form is TRUE and the UM reserves the right to terminate an application or study at any time if any information given in his/her application form is found later to be untrue, false or incorrect.

6.2 Students must should not enrol/register in any other universities upon registration at the University (except those with Joint Programme Agreements approved by the University). If students are found to be registered for more than one higher education programme, the UM reserves the right to terminate his/her application or study at any time.

7. DEFERMENT OF STUDY FOR NEW STUDENTS

7.1 New students can apply for deferment of study for not more than one academic year.

Application for such deferment should be made before class commencement. New students must fulfil all the conditions stated in their offer letters and submit the required amount of non-refundable deposit before they become eligible to apply for deferment of study. Such applications will only be permitted for medical reasons and exceptional cases with sound justification. For medical reasons, students are required to submit medical certificates issued by hospitals at the time of application. For exceptional cases with sound justification, students are required to specify the reason and submit written certifications at the time of application.

- 7.2 Students who have deferred their studies and wish to return to the University should apply for resumption of study. Resumption is not granted automatically. Besides, new students are not permitted to transfer to another programme when they apply for resumption of study.
- 7.3 If students neither apply for resumption of study nor submit another deferment application before class commencement of the next semester after they have reached the previously approved deferment period, they will be considered having withdrawn from the University, and they have to apply for re-admission of study later if they wish to return to the University.

8. PERSONAL IDENTIFICATION

Applicants' identity is subject to the personal identification document held. Applicants must hold valid personal identification documents for admission:

- 8.1 Valid Macao identification card for Macao students;
- 8.2 Valid Hong Kong permanent identification card for Hong Kong students;
- 8.3 Valid Taiwan identification document for Taiwan region students;
- 8.4 Valid Mainland China identification card for Mainland China students;
- 8.5 Valid foreign passport for international students.
- 8.6 Non-local applicants must ensure that their identification documents can fulfil the entry requirements in Macao and they are eligible to apply for "Special Authorization to Stay" (study visa) after arrival. Non-local applicants should take responsibility that their identification documents held must comply with the Law of Macao to apply for "Special Authorization to Stay" for study purpose in Macao. For details, please refer to the Macao Public Security Police Force Immigration Department Office's website.
- 8.7 The University reserves the right to reject admission of students who hold expired or invalid personal identification documents. Students will be responsible for any consequences that might incur, should they fail to legally stay and study in Macao due to their personal identification reason. For Mainland China identification card or passport holders, please refer to the admission guidelines for PhD and other doctoral degree Programmes for Mainland China applicants at <https://grs.um.edu.mo/>.

9. SUBMISSION OF DOCUMENTS

- 9.1 For Application:
Applicants must scan and upload all required documents to the Online Application System of the University for application. Otherwise, the application will not be considered. (For details, please refer to Point 2.4.)
- 9.2 Upon Offer of Admission:
Upon offer of admission, candidates will be requested to provide certified true copies of their academic documents or to present the originals before/during registration, otherwise, the offer of admission will be cancelled and the candidate will not be eligible for registration. All submitted documents will not be returned.

All documents submitted must be in A4 size. Applicants who fail to provide the required documents for verification or complete registration within specific period will be disqualified from admission and subsequent enrolment in the University.

10. SPECIALIZATION

For details, please refer to Specialization for PhD and other Doctoral Degree Programmes at the Graduate School's website: <https://grs.um.edu.mo/>.

Master's Degree & Postgraduate Certificate/ Diploma Programmes

(Approved by the Rector on 22 January 2024)

1. LIST OF MASTER'S DEGREE PROGRAMMES TO BE OFFERED IN 2024/2025

Faculty	Programme Code	Programme	Medium of Instruction	Normal Duration of Study
Faculty of Arts and Humanities	MAHELS	1. Master of Arts - English Studies	English	2 academic years
	PMAHCLN PMAHCLT	2. Master of Philosophy - Chinese Linguistics - Chinese Literature	Chinese	
	PMAHPISLCS	3. Master of Philosophy - Portuguese Language & Intercultural Studies (Literary & Cultural Studies) ^②	Portuguese	
	PMAHPISLG	- Portuguese Language & Intercultural Studies (Applied Linguistics) ^②		
	MAHTRSTEC	4. Master of Arts - Translation Studies(English - Chinese)	Chinese/ English	
	MAHTRSTPC	- Translation Studies (Portuguese - Chinese) ^②	Chinese/ Portuguese	
	MAHHIT	5. Master of Arts - History	English & Chinese	
	MAHCCHC	- Chinese History and Culture	Chinese	
	MAHPHIL	- Philosophy	Chinese/ English	
	MFA	6. Master of Fine Arts	Chinese/ English	3 academic years
Faculty of Business Administration	EMBA	1. Executive Master of Business Administration	Chinese & English	2 academic years
	MBA	2. Master of Business Administration	English	
	MSBACT MSBFNA MSBIRT MSBBAS	3. Master of Science - Accounting - Finance - International Integrated Resort Management - Business Analytics		
Faculty of Education	PMECCCI PMECCIE	1. Master of Philosophy ^② - Curriculum & Instruction - Curriculum & Instruction - English - Language Education	Chinese and English	2 academic years
	PMEDEA	- Educational Administration		
	PMEDECD	- Early Childhood Education and Child Development		
	PMEDEPY	- Educational Psychology		
	PMEDPSS	- Physical Education & Sport Studies		
	MAEDTES	2. Master of Arts in Teaching English to Speakers of Other Languages	English	

Faculty	Programme Code	Programme	Medium of Instruction	Normal Duration of Study
Faculty of Law	MSLLCBD MSLLCPL MSLLCIP MSLLBUL	1. Master of Law (Chinese Language) - Constitutional Law, Basic Law and Administrative Law - Criminal Law and Criminal Procedural Law - Civil Law and Intellectual Property Law - International Business Law	Chinese	2 academic years
	MELLEUR MELLINL MELLCOL	2. Master of Law in European Union Law, International Law and Comparative Law (English Language) - European Union Law - International Law - Comparative Law	English	
	MIBLINB	3. Master of Law in International Business Law (English Language)

	MSSPAD	- Public Administration ^②	Chinese	
	MSSCRI	- Criminology and Criminal Justice	English but supplemented with Chinese	3 academic years
	MSSECO	- Economics ^①	English	
	MSSCCPY	- Clinical Psychology	English	
Faculty of Science & Technology	PMSSMOS	3. Master of Philosophy - Macao Studies	Chinese and English	2 academic years
	MSCCVLHE	1. Master of Science in Civil Engineering - Hydraulics and Environmental Engineering	English	2-3 academic years
	MSCCOS	2. Master of Science in Computer Science		2 academic years
	MSCICIV	3. Master of Science in Civil Engineering		
	MSCIECT	4. Master of Science in Electrical and Computer Engineering		
	MSCIEMG	5. Master of Science in Electromechanical Engineering		
	MSTMAT	6. Master of Science in Mathematics		
	MSCIFNT	7. Master of Science in Financial Technology		
	MSCIIOT	8. Master of Science in Internet of Things		
	MSCICES	9. Master of Science in Coastal Environment and Safety		
	MSCIRAS	10. Master of Science in Robotics and Autonomous Systems		
	MSCIAI	11. Master of Science in Artificial and Intelligence		
Institute of Applied Physics and Material Engineering	MSCICPR	12. Master of Science in Construction Project Management		
	MSCISOT	13. Master of Science in Smart Ocean Technology		
	MSPIVM	1. Master of Science in Innovative Materials	English	2 academic years

Faculty	Programme Code	Programme	Medium of Instruction	Normal Duration of Study
Institute of Collaborative Innovation	MSDDTSAIA MSDDTSMKA MSDDTSFIT MSDDTSSYC MSDDTSPMD MSDDTSCPG MSDDTSATL MSDDTSSGO	1. Master of Science in Data Science - Artificial Intelligence Applications - Marketing Analytics - Financial Technology - Data Strategy and Compliance - Precision Medicine - Computational Linguistics - Analytics in Teaching and Learning - Smart Governance	English/ Chinese	2 academic years
	MSDCON	2. Master of Science in Cognitive Neuroscience	English	
Institute of Chinese Medical Sciences	PMCMCMS PMCMCMAD MCMCMADM	1. Master of Philosophy - Chinese Medicinal Science - Medicinal Administration 2. Master of Science - Medicinal Administration	English but supplemented with Chinese	2 academic years
	MSCEMIC PMSCEMIC	1. Master of Science in Microelectronics 2. Master of Philosophy in Microelectronics	English	2 academic years 3 academic years

Most of the above programmes are evening programmes, classes start after 6:00 p.m. Please consult the Academic Unit concerned for exact class schedule.

① Courses will normally be conducted in daytime during weekdays.

② Please visit the Graduate School's website for more details regarding the specific English proficiency requirement.

2. LIST OF POSTGRADUATE CERTIFICATE / DIPLOMA PROGRAMMES TO BE OFFERED IN 2024/2025

Faculty	Programme Code	Programme	Medium of Instruction	Normal Duration of Study
Faculty of Education	PGCEPRD PGCEPYD PGCESED	1. Postgraduate Certificate in Education ^② - Pre-Primary Education ^② - Primary Education ^② - Secondary Education ^②	Chinese	1 academic year
	LML	1. Introduction to Macao Law ^②	Chinese	2 academic years

② Please visit the Graduate School's website for more details regarding the specific English proficiency requirement.

3. ADMISSION REQUIREMENTS

3.1. Master's Degree Programmes

3.1.1 An applicant of a Master's degree programme must possess a Bachelor's degree or academic background recognized as equivalent by the University of Macau. An applicant may also be required to possess other knowledge or professional experience.

3.1.2 Applicants currently studying in the final year of Bachelor's degree programmes may also submit applications. Successful applicants will be provisionally offered and will only be formally admitted upon successful completion of their Bachelor's degree programmes with overall result satisfying the requirements set by the respective programme.

3.1.3 Applicants should have achieved the equivalent* of an overall result of Grade C+ or better in the Bachelor's degree studies. (Except for the Faculty of Law)

3.1.4 Applicants must fulfil the Language Proficiency requirement of the specific programme.

* The equivalent means 2.3 on the 4.0 GPA scale, 14 on the 20-point scale or 70 out of 100.

3.2. Postgraduate Certificate / Diploma Programmes

3.2.1 An applicant of a postgraduate certificate / diploma programme must possess a Bachelor's degree or academic background recognized as equivalent by the University of Macau. An applicant may also be required to possess other knowledge or professional experience.

3.2.2 Applicants currently studying in the final year of Bachelor's degree programmes may also submit applications. Successful applicants will be provisionally offered and will only be formally admitted upon successful completion of their Bachelor's degree programmes with overall result satisfying the requirements set by the respective programme.

3.2.3 Applicants must fulfil the Language Proficiency requirement of the specific programme.

3.3 Applicants who received their Bachelor/Master's degree from a university where the medium of instruction was not English are required to provide one of the following as proof of English proficiency:

- Obtained a Level 6 of the College English Test (CET) score of 430 or;
- Obtained a TOEFL* score of 550 (paper-based examination)/80 (Internet-based examination) or;
- An IELTS* overall score of 6.0 or above with no sub-score lower than 5.5 or;
- Passed the Level 4 or Level 8 of the Test for English Majors (TEM).

Some academic units may have different requirements for proof of English proficiency.

Please visit the corresponding academic unit's website for more details.

*Note: TOEFL and IELTS scores are valid for two years from the test date.

3.4 Please refer to the programme information for individual programme's specific admission requirements.

4. APPLICATION PROCEDURES

Online application forms will be available during the application period. Applicants should submit their application via the Online Application System of the University at <https://grs.um.edu.mo/>. The University will only accept application via the Online Application System.

- 4.1 Read carefully the important notes before you proceed with your application.
- 4.2 You must have an e-mail address to register as a new user in order to submit an application. Applicants who have successfully registered will receive a reference number (e.g. 2XXXXXXX) and password by e-mail. You must keep such information to login to your account throughout the whole application procedure. (If you fail to receive the e-mail within 2 days, please contact us by phone at 8822 4898 or by e-mail at gradschool@um.edu.mo.)
- 4.3 Complete all relevant sections of the Online Application. It is recommended that you supply a local mobile number so that the University may notify applicants of any news by e-mail and SMS.
- 4.4 Scan and upload all required documents to the Online Application System. All submitted documents must be in A4 size, PDF format and the total size for all attached documents should NOT be greater than 6MB.

The documents should include:

-
- 4.4.1 Identification card copy.
- 4.4.2 Photo (passport size photo in JPG format with 300dpi, with no border and white background; this photo will be used for making the student identification card for all offered applicants.).
- 4.4.3 Certificate(s) and academic transcript(s) for the programme(s) taken and documents supporting information given in the application form.
- 4.4.4 Applicants currently studying in the final year of Bachelor's degree programmes should submit their most updated academic transcript (It must include at least 3 years' results, if the transcript has more than one page, you should scan all pages in ONE FILE and upload it at the appropriate area.), testimonial and documents supporting information given in the application form.
(Applicants currently studying in the final year of Bachelor's degree at the University of Macau do not need to submit the Bachelor's degree transcript and testimonial, other documents remain the same with other applicants.)
- 4.4.5 Applicants (in-service teachers) of Postgraduate Certificate in Education Programme (PGCE) must submit one Teacher's I.D. card copy.
- 4.4.6 Recommendation forms
- 4.4.6.1 Applying for the Postgraduate Certificate in Education Programme, in-service teachers must use the paper recommendation form provided by the Faculty of Education (this recommendation form can be downloaded at the Graduate School's website at <https://grs.um.edu.mo/>). Pre-service teachers must use the paper recommendation form provided by the Graduate School. Only one recommendation form is required, the form should be sealed in an envelope by your referee and forwarded/sent to the Graduate School directly.
- 4.4.6.2 No recommendation form is required from applicants of Introduction to Macao Law programme (LML) and Improvement of Legal Practice and Language programme (LPL).
- 4.4.6.3 Applicants of all the other programmes must use the recommendation forms provided by the Graduate School. Each application must submit two recommendation forms. One of the recommendation forms must be completed by university academics. If applying for admission to programmes taught in English, English recommendation forms should be used.
- 4.4.6.4 Further to 4.4.6.3, paper recommendation and online recommendation forms are both accepted. If you prefer to submit online recommendation forms, you must make sure your referees submit your recommendation forms to us before the application deadline. An automatic notification e-mail will be sent to the applicant once we receive the recommendation forms. If applicants do not receive this e-mail, that means your referee has not submitted the online recommendation form for you yet. You should contact your referee as soon as possible to make sure that it is submitted by the application deadline. If you choose to use paper recommendation forms, the forms should be sealed in an envelope by your referee and forwarded/sent to the Graduate School directly. Please write on the envelope your application number DP-CX-XXXX-X or reference number 2XXXXXXX before sending the recommendation form to us.
-

- 4.4.7 Proof of English proficiency (please refer to Item 3.3 under Admission Requirements for details.)
- 4.4.8 Applicants who received their Bachelor/Master's degree from a university where the medium of instruction was English are required to provide a proof of English as the medium of instruction, if deemed necessary, issued by the applicants' university where their Bachelor/Master's degree was obtained (UM's current students and graduates are not required to provide such proof).
- 4.4.9 Students applying for admission to programmes taught in English must submit English version of certificate(s)/testimonial(s) and academic transcript(s).
- 4.4.10 Application without the above mentioned documents enclosed will not be processed.
- 4.4.11 Documents submitted to the University will not be returned to the applicant.
- 4.5 Verify all application data before submitting the application. Once the application is submitted, no data can be changed. Each applicant can submit only one application in the same academic year. If necessary, the applicant can indicate in his/her application a maximum choice of two programmes with priority given to each programme. Although the applicant can apply for two programmes, application fee will be charged once only.
- 4.6 Settle the application fee by the deadline of the application period (For more details, please refer to Point 7).
- 4.7 Once the application fee is settled, an acknowledgment e-mail with an application number (DP-CX-XXXX-X) will be sent to you by e-mail. Applications without an application number will not be regarded as valid. If you do not receive any acknowledgment e-mail, please contact us by e-mail at gradschool@um.edu.mo.
- 4.8 If the academic documents provided are not in Chinese/English/Portuguese, applicants must submit an English version of certificate(s)/testimonial(s) and academic transcript(s) issued by the respective university/institution. Applicants can also submit translated English copies of the documents. Otherwise, the application will not be considered.
- 4.9 Late applications will be considered only under very special circumstances.
- 4.10 Admission results will be released via the Online Application System. Candidates should follow the admission procedures as stipulated in the Online Application System and the offer letter to confirm acceptance. Offered candidates must settle the non-refundable tuition fee of 1st semester or the non-refundable deposit listed on the debit note for payment. The non-refundable deposit will be used to offset part of the tuition fee payable for that academic year. If candidates fail to confirm acceptance and settle the fees within the prescribed period as printed on the offer letter, the offer of admission will be cancelled. All fees paid are non-refundable.
- 4.11 Applicants will be given conditional offer in the following circumstances.
 - 4.11.1 Applicants currently studying in the final year of Bachelor's degree programmes will be conditionally offered and will only be formally admitted upon successful completion of their Bachelor's degree programmes with overall result satisfying the admission requirements.
 - 4.11.2 In special cases, applicants are required to submit proof of English proficiency before formally admitted.

5. SELECTION

Should an interview be required for application to a certain programme, the academic unit concerned will inform candidate for further details of the interview.

6. MASTER ASSISTANTSHIPS

Assistantships are available to Master students of the University which serve as source of stipend for students. Please refer to the *Funding Guidelines for Research Assistantships* and *Funding Guidelines for Teaching Assistantships* for further details.

7. APPLICATION FEE

The application fee for each application is MOP200.00. The application fee is non-refundable. The application fee payments must be made by the deadline of the application period:

- 7.1 by online payment (please follow the payment instructions on the website);
- 7.2 by cheque, bank draft or cashier's order drawn on a bank in Macao and made payable to the "University of Macau". An additional handling charge of MOP50 is required for each foreign bank draft or cashier's order. However, the exact amount of handling fees depends on the amount charged by banks. Our University reserves the right to recover the difference.

(For 7.2, applicants must print the application fee payment slip after they have completed the application at the Online Application System and submit it to the Treasury Section at Room 1012, Administration Building for payment.)

8. TUITION FEES

- 8.1 Please refer to the Tuition Fees Scheme of postgraduate Programmes (which is available at GRS webpage: <https://grs.um.edu.mo/>) for further details.
- 8.2 Tuition Fees are subject to revision annually.

9. DEFERMENT OF STUDY FOR NEW STUDENTS

- 9.1 New students can apply for deferment of study for not more than one academic year. Application for such deferment should be made before class commencement. New students must fulfil all the conditions stated in their offer letters and submit the required amount of non-refundable tuition fee or non-refundable deposit before they become eligible to apply for deferment of study. Such applications will only be permitted for medical reasons and exceptional cases with sound justification. For medical reasons, students are required to submit medical certificates issued by hospitals at the time of application. For exceptional cases with sound justification, students are required to specify the reason and submit written certifications at the time of application.
- 9.2 Students who have deferred their studies and wish to return to the University should apply for resumption of study. Resumption is not granted automatically. Besides, new students are not permitted to transfer to another programme when they apply for resumption of study.
- 9.3 If students neither apply for resumption of study nor submit another deferment application before class commencement of the next semester after they have reached the previously approved deferment period, they will be considered having withdrawn from the University, and they have to apply for re-admission of study later if they wish to return to the University.

10. COURSE EXEMPTION

Students who have completed equivalent or convertible courses in any tertiary education

institutions may apply for course exemption to the academic unit concerned on or before the last day of course add/drop period. Applications should be submitted to the respective academic unit and be accompanied by supporting documents, showing that the students have passed equivalent courses elsewhere.

11. CANCELLATION OF PROGRAMMES

The University reserves the right not to offer any programmes, or to suspend student intake temporarily, if supervening conditions require.

12. TERMINATION OF APPLICATION OR STUDY

- 12.1 Applicants must guarantee that the information given in the application form is TRUE and the University of Macau reserves the right to terminate an application or study at any time if any information given in his/her application form is found later to be untrue, false or incorrect. Should such a case occur, no fees will be refunded.
- 12.2 Students must not enrol/register in any other universities upon registration at the University (except those with Joint Programme Agreements approved by the University). If students are found to be registered for more than one higher education programme, the University of Macau reserves the right to terminate his/her application or study at any time.

13. PERSONAL IDENTIFICATION

Applications' identity is subject to the personal identification document held. Applicants must hold valid personal identification documents for admission:

- 13.1. Valid Macao identification card for Macao students;
- 13.2. Valid Hong Kong permanent identification card for Hong Kong students;
- 13.3. Valid Taiwan identification document for Taiwan region students;
- 13.4. Valid Mainland China identification card for Mainland China students;
- 13.5. Valid foreign passport for international students.
- 13.6. Non-local applicants must ensure that their identification documents can fulfil the entry requirements in Macao and they are eligible to apply for "Special Authorization to Stay" (study visa) after arrival. Non-local applicants should take responsibility that their identification documents held must comply with the Law of Macao to apply for "Special Authorization to Stay" for study purpose in Macao. For details, please refer to the Macao Public Security Police Force Immigration Department Office's website.
- 13.7. The University reserves the right to reject admission of students who hold expired or invalid personal identification documents. Students will be responsible for any consequences that might incur, should they fail to legally stay and study in Macao due to their personal personal identification reason.

For Mainland China identification card or passport holders, please refer to the admission guidelines for Master's Degree Programmes for Mainland China applicants at <https://grs.um.edu.mo/>.

14. SUBMISSION OF DOCUMENTS

- 14.1. For Application:
Applicants must scan and upload all required documents to the Online Application System of the University for application. Otherwise, the application will not be considered. (For details, please refer to Point 4.4.)
- 14.2. Upon Offer of Admission:
Upon offer of admission, candidates will be requested to provide certified true copies of their academic documents or to present the originals before/during registration, otherwise, the offer of admission will be cancelled and the candidate will not be eligible for

registration. All submitted documents will not be returned.

All documents submitted must be in A4 size. Applicants who fail to provide the required documents for verification or complete registration within specific period will be disqualified from admission and subsequent enrolment in the University.

15. ADMISSION FOR STUDENTS WITH DISABILITIES

With the purpose of providing an equal admission opportunity, necessary study environment and facilities for students with disabilities, the University has devised the “Admission Policy for Students with Disabilities”.

Please visit the website at <https://grs.um.edu.mo/> for details.

ADMISSION RULES

Bachelor's Degree Programmes

(Approved by the Rector on 28 November 2023)

- List of Bachelor's programmes to be offered in 2024/2025**
(Columns of "Joint Admission Examination subjects" and "UM Admission Examination subject" applicable to admission channel by "Admission Examination" only)

Faculty	Programme code	Programme	Language of instruction	Stream requirement	Joint Admission Examination subjects	UM Admission Examination subject	Remarks
Faculty of Arts and Humanities	FAHCLL	Bachelor of Arts - Chinese Language and Literature	Chinese (Cantonese and Mandarin)	--	Chinese English Mathematics Standard Paper	--	--
	FAHENS	Bachelor of Arts - English Studies	English				
	FAHHST	Bachelor of Arts - History	English but supplemented with Chinese (Cantonese and Mandarin)				
	FAHJAP	Bachelor of Arts - Japanese Studies	Japanese				No basic knowledge of Japanese is required.
	FAHPTS	Bachelor of Arts - Portuguese Studies	Portuguese				No basic knowledge of Portuguese is required.

2. Application Requirement

2.1 Applicants may apply for admission to the bachelor's programme by the following channels, whichever is applicable to them:

2.1.1 Admission Examination

Applicants with any of the following qualifications may apply for bachelor programme by Admission Examination:

2.1.1.1 Form 6 graduates or equivalent.

- 2.1.1.2 Candidates currently enrolled in Form 6 or equivalent.
2.1.1.3 For applicants aged 23 or above on 1 September 2024.

2.1.2 Direct Admission

Applicants obtained with public examination result or qualifications for undergraduate admission may apply by Direct Admission channel. You can refer to Item 4 for details.

3. Admission Examination

- 3.1 Applicants should settle the application fee within the application period. Applications will be regarded as invalid should the applicant fail to pay the application fee by the application deadline. The application fee is non-refundable.

Admission channel	Application period	Application fee
Admission Examination	03 – 17/01/2024	MOP250

3.2 Application requirements

Application requirements	Required academic documents
3.2.1 Form 6 graduates or equivalent.	<ul style="list-style-type: none"> Copies of certificate(s) and academic transcripts for Form 6 or equivalent in secondary school.
3.2.2 Candidates currently enrolled in Form 6 or equivalent.	<ul style="list-style-type: none"> Copies of academic transcripts for the first semester of Form 6 or equivalent in secondary school. If the Form 6 transcript is not available during the application period, applicants may submit the Form 5 transcript together with the page stating you are a current Form 6 student extracted from the DSEDJ student card.
3.2.3 For applicants aged 23 or above on 1 September 2024	---

- 3.3 Applicants should take the examination subjects according to the admission requirements of their applied programmes. Admission Examination includes:

- 3.3.1 Joint Admission Examination for Macao Four Higher Education Institutions (Subjects: Languages and Mathematics) (hereinafter referred to as "JAE")
Four higher education institutions of Macao namely the University of Macau, Macao Polytechnic University, Macao Institute for Tourism Studies and Macau University of Science and Technology (hereinafter referred to as "the Four Institutions") jointly implement the "Joint Admission Examination for Macao Four Higher Education Institutions (Subjects: Languages and Mathematics)" since 2017. JAE refers to the admission examinations on four subjects, namely Chinese, Portuguese, English and Mathematics jointly organised by the Four Institutions. Any written examination or interview for subjects other than these four subjects shall be arranged and announced by the Four Institutions individually. JAE subjects includes **Chinese (JC01), Portuguese Paper A (JP01), Portuguese Paper B (JP02), English (JE01),**

Mathematics Standard Paper (JM01) and Mathematics Supplementary Paper (JM02).

- 3.3.2 University of Macau Admission Examination (hereinafter referred to as “UM Admission Examination”)
Except the JAE subjects, according to the UM programmes' admission requirement, applicants also need to sit for UM Admission Examination subject in order to meet the admission requirement. UM Admission Examination subject is **Physics (H101)**.
- 3.4 Application for exemption from taking particular Admission Examination subjects
- 3.4.1 Admission Examination candidates may apply for exemption from taking particular Admission Examination subjects if they meet the below requirement:
- 3.4.1.1 Chinese (JC01)
Applicants without basic education in Chinese Language and Literature during the last three years of study in secondary education may apply for exemption from the JAE Chinese subject. However, applicants who have applied for the programmes with Chinese as the medium of instruction must sit for the JAE Chinese; otherwise the application will not be processed.
- 3.4.1.2 English (JE01)
Applicants who have attained any of the following results may apply for exemption from the JAE subject English.
- 3.4.1.2.1 Test of English as a Foreign Language (TOEFL)
▪ Internet-based test / IBT Home edition: a minimum score of 79.
- 3.4.1.2.2 International English Language Testing System (IELTS)
▪ Band 6.0 or above.
- 3.4.1.3 Mathematics Standard Paper (JM01) and Mathematics Supplementary Paper (JM02)
During the last three years of secondary school study, applicants who have been awarded the “First Class or Second Class Award” in the Individual Category of Inter-School Mathematics Competition organized by the Education and Youth Development Bureau (DSEDJ) may apply for exemption from taking the JAE subject Mathematics Standard Paper and Mathematics Supplementary Paper.
- 3.4.2 Application procedure
- 3.4.2.1 Applicants must submit below required application documents to the Registry within the period of **11/12/2023 - 05/01/2024** (applicants applying to other higher education institutions must abide by the application period and regulations established by the relevant institution(s).):
- 3.4.2.1.1 Exemption applications should be submitted with a completed application form of “Exemption from Taking Admission Examination Subjects” (REG/Form/050) form. The application form can be downloaded from the Registry's website of “Admission Examination”.
- 3.4.2.1.2 Exemption applications should be submitted with certified true copies of supporting documents (applicants can bring both originals and copies of

documents while the copies will be certified by Registry staff on site).

- 3.4.2.2 Applicants have to state their programme choices on their Exemption Application forms. Exemption will be considered based on these choices as well as the documents submitted.
- 3.4.2.3 Exemption applications without supporting documents or late applications will not be processed.
- 3.4.2.4 If the application for exemption of any JAE subject is approved by all the applied institution(s), a remark "Examination Exempted" will be printed for that subject on the candidate's JAE Examination Permit. On the notification of the Admission Examination results, the results for any subject exempted will be represented as "Exempted".
- 3.4.2.5 If the application for exemption of the JAE subject is not approved by all the applied institution(s), the candidate must attend the examination in order to fulfil the admission requirements of the institution(s).
- 3.4.2.6 Candidates who are granted exemption will be pooled together with all the other applicants for admission selection. To be considered eligible for admission, candidates still have to fulfil other admission criteria of the programmes.

3.5 Preferential Admission Scheme

- 3.5.1 The University has introduced the "Preferential Admission Scheme" for the candidates of the Admission Examination who possess documented merits in these fields: academic awards, sports, musicianship, dance, community service or participation in UM Summer Camp. Upon examination and verification by the University, applicants with any of the above talents will be awarded 20 to 50 additional points for all of their Admission Examination results. Please visit our website of "Preferential Admission Scheme" for details.
- 3.5.2 Applicants must submit an on-line application together with all required documents within the application period of **15 - 31/01/2024**.

3.6 Admission Policy for Students with Disabilities

When applying for admission to the University, applicants with a disability may choose to disclose their conditions on a voluntary basis and request a special arrangement for admission assessment. For the application procedure of JAE special arrangement, please refer to the appendix "Information of Joint Admission Examination (JAE) for Macao Four Higher Education Institutions (Subjects: Languages and Mathematics)" for detailed information. For application for University of Macau Admission Examination special arrangement, please visit Registry's website of "Admission Policy for Students with disability" for details.

3.7 Announcement and Rechecking of Admission Examination results

- 3.7.1 JAE and UM Admission Examination results will be released via the On-line Application System. Notification on Admission Examination results will be released only within the prescribed period of that current year and the result will not be re-issued.

- 3.7.2 A candidate may apply to recheck his/her Admission Examination results while the request should be made before the prescribed deadline after the release of Admission Examination results.
- 3.7.3 The Chief Examiner of concerned subject will re-check the scores for each section, the total score of the answer sheet and any written scripts completed for the examination.
- 3.7.4 For application procedure of rechecking JAE subjects results, please refer to the appendix "Information of Joint Admission Examination (JAE) for Macao Four Higher Education Institutions (Subjects: Languages and Mathematics)". If candidates request for rechecking UM Admission Examination subject result, please refer to point 3.7.5.
- 3.7.5 Rechecking procedures
 - 3.7.5.1 Candidates should submit an on-line application form for rechecking Admission Examination results to the Registry within the specified period. Late applications will not be processed.
 - 3.7.5.2 MOP50 is charged for rechecking the Admission Examination subject.
 - 3.7.5.3 Candidates will be informed by email of their rechecking results within 5 working days after the application deadline.
 - 3.7.5.4 The rechecked results will be served as the final decision. Further request for rechecking will not be accepted.
 - 3.7.5.5 Under no circumstances will the University disclose the examination papers and answers of a candidate.
- 3.8 Offer and Admission process
 - 3.8.1 Selection of qualified Admission Examination candidates will be based on the candidates' priority of choices, Admission Examination results and the admission quotas of each programme. For applicants of Faculty of Education programmes, qualified candidates need to attend the interview as one of the selection criteria.
 - 3.8.2 Offer results will be released via the On-line Application System. A notification email and an SMS will be sent to candidates. The admission decision released is the final result of all choices applied, not the result of particular choice(s).
 - 3.8.3 Candidates should follow the admission procedures as stipulated in the On-line Application System and the offer letter to confirm acceptance. Offered candidates must settle the non-refundable tuition fee of 1st semester listed on the debit note for payment. If candidates fail to confirm acceptance and settle the fees within the prescribed period as printed on the offer letter, the offer of admission will be cancelled. All fees paid are non-refundable.
 - 3.8.4 Offered candidates will be requested to provide certified true copies of documents stated in the "Offer of Admission" for registration. Candidates may choose to submit originals of documents requested, or present the originals and copies for certification by the Registry. Offered candidates who fail to provide the original of the required documents for verification or complete new student registration within specific period will be disqualified from admission and subsequent enrolment in the University.

3.8.5 All documents submitted will not be returned.

3.8.6 Candidates who receive an admission offer cannot change programme of study.

3.9 Summer English Programme

3.9.1 Except Bachelor of Arts in Chinese Language and Literature, Bachelor of Education in Chinese and Bachelor of Law in Chinese Language, Bachelor of Law (Conducted in Chinese and Portuguese), Bachelor of Law in Portuguese Language programmes, offered candidates with the English (JE01) subject score below a specific score must take and pass the Summer English Programme before admission can be confirmed. Classes will be scheduled in July 2024 (exact date will be announced on Registry website).

3.9.2 The programme fee will be announced and settled upon offer of admission. Students who fail to settle the fees within the prescribed period will be disqualified from admission.

3.10 University of Macau Lotus Scholarship for Admission Examination

3.10.1 Candidates with outstanding performance in the Admission Examination will be granted the above Scholarship and they do not need to apply therefor. The awardees will first be notified by phone and email. Official letter will be released during the notification of the Admission Examination offer results. Please refer to the Registry's website of "Undergraduate Admissions" for details.

3.10.2 Scholarship selection is based on a candidate's Admission Examination result, not including the bonus marks added through "Preferential Admission Scheme".

3.10.3 Candidates who have been exempted from taking particular Admission Examination subject(s) will not be eligible for selection of University of Macau Lotus Scholarship for Admission Examination.

3.10.4 All eligible candidates must hold a valid Macao I.D. card and will be registered students of the current year. Otherwise, the University reserves the right to disqualify the student's scholarship.

3.11 Important dates for Admission Examination

Date	Description
11/12/2023 ~ 05/01/2024	▪ Application period for exemption from taking particular Admission Examination subjects (must be submitted by paper application to the Registry)
03 ~ 17/01/2024	▪ Application period for Admission Examination (All applications must be submitted via On-line Application System)
15 ~ 31/01/2024	▪ Application period for Preferential Admission Scheme for Admission Examination (All applications must be submitted via On-line Application System)
06 ~ 17/03/2024	▪ Download JAE and UM Admission Examination permit via On-line Application System
14 ~ 17/03/2024	▪ JAE and UM Admission Examination
Early April 2024	▪ Interview for eligible applicants (applicable to programme of Faculty of Education only)

Date	Description

The offer must be of current admission year while all conditions, if any, must be fulfilled; or — Hold the public examination result for admission to a bachelor programme. If the result was taken in past years, the University has the right to request for additional information such as study record and transcript of higher education institutions thereafter from the time of examination taken. 	<ul style="list-style-type: none"> ■ Academic transcripts for Form 6 or equivalent in secondary school; AND ■ Official offer letter for bachelor programme of current year issued by a non-local higher education institution; or ■ Official public examination result. 	<ul style="list-style-type: none"> ■ Form 6 completion certificate or equivalent; AND ■ Academic transcripts for Form 6 or equivalent; and ■ Official offer letter for bachelor programme of current year issued by a non-local higher education institution; or ■ Official public examination result.

4.2 Applicants must have met the below application requirements and upload all the required documents such as personal identification document and academic documents during the application period; otherwise the application will not be processed.

Admission channel	Application period	Application fee
Direct Admission	30/01 ~ 05/04/2024	MOP300

4.3 Applicants should settle the application fee within the application period. Applications will be regarded as invalid should the applicant fail to pay the application fee by the application deadline. The application fee is non-refundable.

4.4 English Requirement

4.4.1 For applicants applying by Direct Admission, the English requirement stipulated in above-mentioned qualifications can be substituted by other public examination results stated in 4.1.

4.4.2 Students applying for a programme with English as the main teaching medium have to attend an interview to evaluate the applicant's English proficiency for admission. Applicants who have attained the following results may be exempted from the said interview:

Category	Requirement
Test of English as a Foreign Language (TOEFL)	Internet-based test / IBT Home edition: a minimum score of 79

International English Language Testing System (IELTS)	Band 6.0 or above.
International General Certificate of Secondary Education (IGCSE)	Grade C / 5 or above in English subject.
For Malaysian students	<ul style="list-style-type: none"> • UEC-Senior English Language Grade B4 or above; or • SPM English Language Grade C or above; or • STPM English Language Grade C or above; or • MUET Band 4 (Aggregated Score: 180-219)

4.5 Offer and Admission process

- 4.5.1 Assessment of admission will only be made on the academic documents submitted along with the on-line application. Admission selection will be based on the applicant's choices of programmes, admission quotas and interview (when applicable).
- 4.5.2 Offer results will be released via the On-line Application System. Notification email and SMS will be sent to candidates. The admission result released is the final academic decision of the application.
- 4.5.3 Candidates should follow the admission procedure as stipulated in the On-line Application System and the offer letter to confirm acceptance. Offered candidates must settle the non-refundable tuition fee of 1st semester listed on the debit note for payment. If candidates fail to confirm acceptance and settle the fees within the prescribed period as printed on the offer letter, the offer of admission will be cancelled. All fees are non-refundable.
- 4.5.4 Offer candidates will be requested to provide certified true copies of documents stated in the "Offer of Admission" during the registration period. Candidates may choose to submit originals of documents requested, or present the originals and copies for certification by the Registry. Offer candidates who fail to provide the original of the required documents for verification and complete new student registration within specific period will be disqualified from admission and subsequent enrolment in the University.
- 4.5.5 Candidates who receive an admission offer cannot change programme of study.
- 4.5.6 All documents submitted will not be returned.
- 4.5.7 According to the "Regulations of the Programmes of the University of Macau", students must withdraw from their original universities before transferring to the University of Macau.

4.6 Important Dates

Date	Description
30/01 ~ 05/04/2024	▪ Application period for Direct Admission (submitted via On-line Application System)
Mid June 2024	▪ Candidates who receive admission offers are required to download "Offer of Admission", debit note for payment and related documents via the On-line Application System ▪ Return the signed "Statement of Acceptance" for admission confirmation within the specified period
Early July 2024	▪ New students are required to download registration information via the On-line Application System
10 ~ 19/07/2024	▪ Payment period of Residential College fee and security deposit
24 ~ 26/07/2024	▪ New students registration: submit all required documents (originals and copies) and medical examination reports in order to validate the offer
12 ~ 13/08/2024	▪ New students move in Residential Colleges
12 ~ 18/08/2024	▪ New Student Orientation
19/08/2024	▪ Commencement of class for 2024/2025 academic year

Note: The above schedule is subject to change.

5. Mainland China Students Admission

5.1 Mainland China students may apply with below qualifications:

5.1.1 College Entrance Examination (Gaokao)

Applicants must take the College Entrance Examination in 2024 for admission to our bachelor's programme while the result needs to attain the admission standard of key universities in China. As for the score of English subject, the minimum requirement is 110 or above (on the base of 150 for English subject whilst score for other scale will be adjusted accordingly).

5.1.2 Non-Gaokao qualification (international curriculum or international public examination result)

Applicants must be potential secondary school graduates; currently enrolled in a mainland/ overseas school of international curriculum or have attained any of the public examination results recognized by UM. Please refer to the Registry website of "Mainland China" for details.

5.1.3 Mainland China students who are currently enrolled in Macao's other higher education institutions may apply by Non-Gaokao qualification. Applicants must meet below requirements:

5.1.3.1 The candidate must be enrolled in a 4-year bachelor's programme at a local recognized higher education institution; and

5.1.3.2 The cumulative Grade Point Average (GPA) should be 3.7 or above on a 4.0 scale; and

- 5.1.3.3 The applicant's College Entrance Examination score (during his/her admission year to year one of the other local higher education institution) must have achieved at least 10% above the admission standard of key universities in China.
- 5.1.3.4 English requirement:
- 5.1.3.4.1 The English subject result of the College Entrance Examination in the admission year to year one of other local higher education institution must reach 110 or above (based on 150 as the highest mark, the other grading system will be proportionally adjusted); or
- 5.1.3.4.2 Test of English as a Foreign Language (TOEFL): Internet-based test / IBT Home edition: a minimum score of 79; or
- 5.1.3.4.3 International English Language Testing System (IELTS): Band 6.0 or above
- 5.1.3.5 Required documents
- 5.1.3.5.1 The latest academic transcript showing all courses and grades completed in a bachelor's programme and a testimonial issued by the applicant's current higher education institution; and
- 5.1.3.5.2 The College Entrance Examination result (in the applicant's admission year to year one of the local higher education institution); and
- 5.1.3.5.3 The English result of College Entrance Examination, TOEFL or IELTS.

6. Admission Policy for Students with Disabilities

With the purpose of providing equal education opportunities for students with disabilities, the University has devised the "Admission Policy for Students with Disabilities". When applying for admission to the University, applicants with a disability may choose to disclose their conditions on a voluntary basis and request a special arrangement for admission assessment.

Please visit Student Affairs Office's website of "Disability Support Service" for information on disability support.

7. Personal Identification Documents

- 7.1 Applicants' identity is subject to the personal identification document held. Applicants must hold below valid personal identification documents during the whole application and admission process:

Identity Category	Personal Identification Document
Macao Student	a valid Macao I.D. card
Hong Kong Student	a valid Hong Kong I.D. card (applicants who apply with a non-permanent Hong Kong I.D. card due to the student

Identity Category	Personal Identification Document
	visa purpose for entry are not regarded as a Hong Kong student)
Taiwan Student	a valid Taiwan passport
Mainland China Student	a valid Mainland China I.D. card
International Student	a valid foreign passport

- 7.2 Where applicants hold more than one identification document, they can only use one throughout the whole admission process (i.e. application till registration). For instance, if an applicant holds both Macao and Hong Kong identity cards, he/she can only choose to use his/her Macao I.D. card or Hong Kong I.D. card for admission .
- 7.3 Applicants holding a non-permanent Macao I.D. card, a non-permanent Hong Kong I.D. card, or identification from other regions or countries should take responsibility that their identification documents held must comply with the Law of Macao to apply for “Special Authorization to Stay” for study purpose in Macao. For details, please refer to the Immigration Department of Macao Public Security Police Force’s website.
- 7.4 University reserves the right to reject admission of students who hold expired or invalid personal identification documents. Students will be responsible for any consequences that might incur should they fail to legally stay and study in Macao due to their personal identification reason.

8. Application Procedures

8.1 Create an application account

- 8.1.1 The University will only accept application via the On-line Application System.
- 8.1.2 Applicants must have a valid email address and register as a new user before they can submit an application.
- 8.1.3 Applicants who have successfully registered the new account will receive a login number (e.g. 24xxxxxx) and a password by SMS message and email. For the purpose of observing the privacy of their admission and personal data, it is imperative that the applicants do not disclose their login number and password to anybody else as these will be used to access the On-line Application System for application, the Admission Examination permit, Admission Examination results, offer letter, debit notes for tuition fees and registration information for new students.
- 8.1.4 If applicants fail to receive the email within 2 days, please contact the Registry.

8.2 Change of information

- 8.2.1 Upon registration as a new user, applicants of Admission Examination can update any information as well as programme choice whether or not the applicant has submitted his/her application or paid the application fee.
- 8.2.2 No further revision or change of programme choice may be accepted after 23:59 on the date of the application deadline.
- 8.2.3 No further revision of programme choice or application information/documents can be accepted for Direct Admission applicants after the application fee has been settled.

8.3 Application documents format

8.3.1 Applicants must scan and upload the following documents to the On-line Application System:

- 8.3.1.1 Identification document (both sides on one A4 paper in PDF format);
- 8.3.1.2 Photo (only applicable for Direct Admission applicants; passport size photo in JPEG/GIF/PNG format preferably in JPEG file with 300dpi, with no border and white background);
- 8.3.1.3 Required academic documents. Documents to be uploaded in each field can be more than one page. Please scan all pages continuously in black & white colour format and save them in a single PDF file (less than 5MB) before uploading.
- 8.3.1.4 Total size for all uploaded documents should not be greater than 10MB.

8.3.2 All application documents must be submitted within the application period. Otherwise, the application will not be processed.

8.3.3 The University reserves the right to request the applicant to provide proof and related academic documents for admission. The University also reserves the right to verify the documents submitted.

8.3.4 If the academic documents provided are not in Chinese/English/Portuguese, applicants must submit an English version of certificate(s)/testimonial(s) and academic transcript(s) issued by the respective university/institution. Applicants may also submit translated English certified true copies of the documents.

8.4 Application number

8.4.1 After the application fee is settled, an acknowledgment email with an application number (format: AP-C4-XXXX-X) will be sent to the applicant by SMS message and email. The on-line application is complete upon receipt of this application number.

8.4.2 If the applicant do not receive any acknowledgment by SMS or email 2 days after fee payment, please contact the Registry.

9. New Student Registration

9.1 All new students must complete the registration in person by submitting required academic documents and medical reports to validate qualifications and health condition fit for admission. Students who have not completed registration will not be able to enroll courses or attend class.

9.2 Students who cannot complete registration in accordance with assigned schedules may submit a request, supported by proof, to the Registry for late registration. The application result will be notified by email. Students who request for late registration must settle the fees such as Residential College Cost and Security Deposit within the dates specified.

9.3 New students must complete registration no later than 2 weeks prior to class commencement. Otherwise, the offer of admission will be cancelled. The tuition fee paid and other fees will not be refunded.

10. Fees

Applicants should visit to the website <https://reg.um.edu.mo/admissions> for details of tuition fee and residential college cost of 2024/2025.

11. Termination of Application or Study

11.1 The University reserves the right to terminate any application, offer, scholarship, registration and study:

11.1.1 that is found to include untrue and/or incorrect information that would affect the qualification requirements stipulated by the University; or

11.1.2 that contains forged academic or related documents; or

11.1.3 where the applicant displays any misconduct or misbehaviour during the admission or examination process.

11.2 Should any of the above cases occur, the applicant should take full responsibility for all consequences.

11.3 In consideration of adequate utilization of admission quota, if an applicant has accepted our undergraduate admission offer but still accepts another offer by other admission channels, the University reserves the right to terminate his/her admission.

11.4 For disqualified applications, all documents submitted and fees paid will not be returned or refunded.

11.5 For applicants found to have provided any untrue or incorrect application, the University reserves the right to reject his/her application thereafter.

12. Cancellation of Programmes and Fees Refund

12.1 The University reserves the right not to offer any programmes, or to suspend student intake temporarily, if supervening conditions require.

12.2 In case of programme cancellation, the tuition fees and related fees paid (except application fee) will be refunded.

12.3 Nevertheless, if an offered student of Admission Examination cannot successfully complete the Form 6 study and fails to meet the University's entrance requirement, the student may apply for refund of tuition fees and related fees in accordance with the university's rules. The student should submit support documents to the Registry for such application.

13. Deferment of Study

13.1 Non-registered new students can apply for deferment of study for no more than one academic year. Such applications will only be permitted for medical reasons and students are required to submit latest medical certificates issued by hospitals to prove that he/she is not suitable for admission. Application for deferment should be made before the specified date.

13.2 Non-registered new students must fulfil all the conditions stated in their offer letter and

settle the non-refundable tuition fee before they can become eligible to apply for deferment of study. The deadline for deferment application will be 2 weeks prior to class commencement.

- 13.3 Non-registered new students are not permitted to transfer to another major/programme when they apply for resumption of study.

14. Credit Transfer and Course Exemption

According to the "Regulations of the Programmes of the University of Macau", credits obtained by completing the courses of degree programmes at other higher education institutions may be transferred through application for course exemption after students have been admitted to University of Macau programmes. The normal limit on the number of credits that can be transferred to a University of Macau programme is one-third of the total credits required to complete the programme of study.

**Joint Admission Examination (JAE) for
Macao Four Higher Education Institutions
(Subjects: Languages and Mathematics)**

1. Introduction

Four higher education institutions of Macao namely the University of Macau, Macao Polytechnic University, Macao Institute for Tourism Studies and Macao University of Science and Technology (hereinafter referred to as “the Four Institutions”) jointly implement the “Joint Admission Examination for Macao Four Higher Education Institutions (Subjects: Languages and Mathematics)” (hereinafter referred to as “JAE”). JAE refers to the admission examinations on four subjects, namely Chinese, Portuguese, English and Mathematics jointly organised by the Four Institutions. Any written examination or interview for subjects other than these four subjects shall be arranged and announced by the Four Institutions individually.

The Four Institutions shall admit students according to their own admission criteria. Candidates are advised to check the rules/regulations of relevant institution for the corresponding admission requirements for individual programmes. As JAE is not a unified examination, there is no centralized allocation. Candidates may be admitted by multiple institutions for their higher education choices.

2. JAE Subjects and Timetable

Due to different examination requirements needed for the degree programmes by the Four Institutions, candidates should refer to the relevant institution for the admission requirements of the programme(s) they wish to apply to before the application.

Examination Date	Examination Time	Subject & Code	Scope & Type of Question
14/03/2024 (Thursday)	18:00-20:30 (2.5 hours)	Portuguese Paper A (JP01)	Reading comprehension (35%), Language use (30%), Composition (35%)
15/03/2024 (Friday)	18:00-20:00 (2 hours)	Portuguese Paper B (JP02)	Reading comprehension (40%), Language use (40%), Composition (20%)
16/03/2024 (Saturday)	15:30-17:30 (2 hours)	Chinese (JC01)	Knowledge of language (40%), Reading literacy (20%), Composition (40%)
17/03/2024 (Sunday)	10:00-12:00 (2 hours)	English (JE01)	Language use (40%), Reading comprehension (30%), Composition (30%)
17/03/2024 (Sunday)	15:30-17:30 (2 hours)	Mathematics Standard Paper (JM01)	Multiple choice (60%), Questions (40%)
17/03/2024 (Sunday)	18:00-19:00 (1 hour)	Mathematics Supplementary Paper (JM02)	Questions

3. Eligibility of Candidates

JAE candidates must fulfil one of the following criteria:

- 3.1 Completed secondary education (Form 6 graduate) or equivalent, or
- 3.2 Currently attending Form 6 or equivalent, or
- 3.3 Aged 23 or above on 1 September 2024 with special talent but without the above required qualifications.

4 Result Release and Admission Criteria

- 4.1 Candidates can check their examination results from the online application system of the institution they have applied to in early May 2024.
- 4.2 According to the admission requirement and quota of each programme, the Four Institutions will base on JAE results, other necessary admission assessment (if any) and interview (if any) for the selection process.
- 4.3 The admission results of candidates will be individually released by the Four Institutions via their admission webpage.

5 Exemption from Taking Particular Subject of the JAE

- 5.1 Owing to different exemption criteria of each institution, candidates should refer to the applied institution(s) for the respective exemption criteria of each JAE subject.
- 5.2 If candidates wish to apply for exemption of certain JAE subject, they must abide by the application period and regulations established by the relevant institution.

6 Special Examination Arrangements for Students with Disabilities

- 6.1 To provide an equal admission opportunity, students with disabilities can apply for special examination arrangements, e.g. extension of the examination time, arrangement of a separate examination room, using the computers provided for answering the questions, etc. The application of special examination arrangements will be assessed and approved by the Assessment Committee.
- 6.2 Applicants are required to submit the following documents to IFTM (Mong-Há Campus) one month prior to the yearly JAE application deadline (i.e. before 31 December in the year preceding the examination):
 - 6.2.1 A completed "Application Form of Special Examination Arrangements for Students with Disabilities" of the JAE;
 - 6.2.2 An assessment report and other relevant diagnosis documents / proof issued by a registered medical practitioner in Macao, such as the "Disability Assessment Registration Card" issued by the Social Welfare Bureau of Macao SAR.
- 6.3 Detailed information on "Special Examination Arrangements for Students with Disabilities for Joint Admission Examination for Macao Four Higher Education Institutions (Subjects: Languages and Mathematics)" can be downloaded from the webpages of the Four Institutions.

7 2024 JAE Important Dates

Event	Date
Application Deadline for Special Examination Arrangement of the Students with Disabilities	31 December 2023
2024/2025 Application Period of the Four Institutions	03 - 17 January 2024
Issuance of JAE Examination Permit	06 - 17 March 2024

Event	Date
JAE Examination	14 - 17 March 2024
JAE Result Release and Announcement of the Admission Offer by the Four Institutions	Early May 2024
Application for Rechecking of JAE Results	To be announced upon release of JAE result

Academic Regulations and Rules

Regulations of the Programmes of the University of Macau

(Approved by the University Council on 23 April 2019)

Article 1 Academic Year

An academic year covers the period from August to July. Each year consists of two semesters, plus an optional intensive summer term.

Article 2 Medium of Instruction

The mediums of instruction are English, Chinese and Portuguese, with English as the main medium of instruction.

Article 3 Programme Operation

1. Bachelor's Degree Programmes
 - 1) The normal period of study is four years;
 - 2) The minimum credit requirement for graduation is 120 credits.
2. Master's Degree Programmes
 - 1) An applicant of a master's degree programme must possess a bachelor's degree or academic background recognized as equivalent by the University of Macau. An applicant may also be required to possess other knowledge or professional experience.
 - 2) Programme duration:
 - (1) The programme duration is at least 18 months.
 - (2) The minimum period of coursework study is normally 12 months and the maximum period is 24 months.
 - 3) Modes of study:

In accordance with the study plan and relevant regulations, a student must complete the required courses and complete one of the following modes:

 - (1) to write an academic thesis and to pass a public oral defence;
 - (2) to write a project report
 - (3) to attend approved professional internship and to submit an intern report.

The period for the completion of the academic thesis, project report or intern report is normally six months.
 - 4) An examination committee proposed by the academic unit concerned and approved by the Senate is responsible for the assessment of the thesis and oral defence.
3. Doctoral Degree Programmes
 - 1) Doctor of Philosophy (PhD) Programmes
 - (1) An applicant of a PhD programme must possess a master's degree or academic background recognized as equivalent by the University of Macau or a bachelor's degree with outstanding academic results;
 - (2) The programme duration is normally three years;
 - (3) PhD programmes are research-based programmes. A PhD student is required

- to write and submit a thesis which makes an original contribution to the knowledge or professional discipline concerned, and to pass a public oral defence;
- (4) The academic unit may require students to complete specific courses as part of the admission requirements;
- (5) An examination committee proposed by the academic unit concerned and approved by the Senate is responsible for the assessment of the thesis and oral defence.
- 2) Other Doctoral Degree Programmes
 - (1) An applicant of other doctoral degree programme must possess a master's degree or academic background recognized as equivalent by the University of Macau or a bachelor's degree with outstanding academic results, as well as, substantial experience at a senior management/business level;
 - (2) The programme duration is normally three years;
 - (3) The programmes involve coursework, a thesis and public oral defence.
4. Other Programmes
All academic units of the University of Macau may offer other degree, diploma and certificate programmes. The programme operation must be consistent with the University of Macau rules concerned.

Article 4 Students' Application and Registration

1. Students must fulfil the admission requirements stated in the rules concerned or pass the related examinations when applying for admission to different programmes of the University.
2. All students admitted to the University of Macau will be considered as registered students upon payment of tuition fees and submission of all required documents set by the University of Macau within the specified period. All returning students will be considered as registered students upon payment of tuition fees and other fees set by the University of Macau within the specified period.
3. Registration records of undergraduates and postgraduates are managed by the Registry and the Graduate School respectively.

Article 5 Student Records

1. Student records include status records and academic records.
2. Student records of undergraduates and postgraduates are managed by the Registry and the Graduate School respectively.

Article 6 Transfer from Other Universities

1. Students of other universities transferring to the University of Macau must fulfil the conditions and requirements stated in the Admission Rules before they are admitted to the University of Macau.
2. Students must withdraw from their original universities before transferring to the University of Macau.

Article 7
Credit Transfer

1. Credits obtained by completing the courses of degree programmes at any tertiary education institutions may be transferred after students have been admitted to programmes of the University of Macau.
2. The normal limit on the number of credits that can be transferred to a programme of the University of Macau is one-third of the total credits required to complete the programme of study.

Article 8
Rules

The University of Macau shall formulate and approve the relevant internal rules in accordance with this Regulations and other applicable legislation.

ACADEMIC REGULATIONS AND RULES

General Rules Governing PhD and Other Doctoral Degree Programmes

(Approved by the Rector on 22 May 2023)

A. ADMISSION

1. Admission is governed by the University Admission Rules (GRS.09-4/201602/050). Applicants must satisfy the University admission requirements, and any additional requirements imposed by the academic unit they intend to enter.
2. Students should not enrol/register in any other universities upon registration at UM.
3. A student of the University is required to observe the General Rules, and those rules and procedures which govern admission requirements, examinations, fees and charges.

B. GENERAL

1. The University offers full-time programmes of study leading to the degrees of Doctor of Philosophy (PhD) and other doctoral degree including Doctor of Business Administration, Doctor of Education, Doctor of Public Administration or such other degrees approved by the University authority.
2. PhD programmes are research-based programmes. Other doctoral degree programmes are professional programmes requiring students with substantial experience at a senior management or business level.
3. Students will be awarded a PhD or other doctoral degree provided that they have:
 - a. completed the coursework as stated in the curriculum of the degree;
 - b. passed the prescribed assessments stated in Section O;
 - c. fulfilled other coursework requirements set by the academic unit;
 - d. written a thesis and passed the oral defence;
 - e. paid the prescribed fees;
 - f. fulfilled the requirements of the regulations and rules of the University.
4. Each individual academic unit may issue special rules applying to specific PhD and other doctoral degree programmes, within the general framework of the present General Rules. However, any standard for qualification requirements, performance of candidates and/or else, as provided for in the present General Rules, may not be set to a lower or less strict level by the special rules issued for any programme by the relevant academic unit.
5. Students must register in a programme of study on the specified dates in any one academic year, with compulsory attendance at classes.
6. The maximum period of studies will be 150% of the normative period of the programme. For working students, it will be two times the normative period of studies. Less than 1 academic year will be counted towards 1 academic year. Students who cannot complete the programme within the periods above will be required to discontinue their studies.

C. ACADEMIC YEAR

An academic year covers the period from August to July. Each year consists of two semesters. Each semester consists of approximately seventeen weeks of scheduled classes, including examinations.

D. REGISTRATION

1. New students will be considered registered students upon completion and submission of all registration materials to the Graduate School with tuition fees settled, while returning students will be considered registered students upon settlement of tuition fees.
2. A student must register in the name which appears in his/her personal identification documents.
3. Student Cards
 - a. All students will be issued with student cards (UM Campus Card).
 - b. The student card is a student's personal identification document. It is not transferable.
 - c. In case of loss or damage of a student card, a student should apply for a replacement by submitting an application form to the Graduate School. A card replacement fee will be charged to the student.
 - d. Students may refer to the "Rules Governing the Use of UM Campus Card" for further details.
4. Late Registration
 - a. Students may apply for late registration if they cannot complete the process within the scheduled period. Application form for late registration should be submitted to the Graduate School at least three working days before the scheduled registration period.
 - b. Late registration fees will be charged to students who do not apply for late registration three working days before the scheduled registration period. Students who have applied for late registration but failed to complete the process within the approved period will also be charged a late registration fee.
 - c. Late registration can be considered once only.
 - d. Apart from medical reason, registration can only be delayed for at most five calendar days after commencement of classes. If late registration is anticipated for medical reasons, a medical certificate should be attached to the student's application for late registration. Applications for registration later than the above period will not be accepted except for medical reasons and other extraordinary circumstances. In such case, late registration application requires the approval from the Dean/Director of the academic unit concerned.
 - e. In any case, students must also make sure that they will still be able to enrol in either course work or thesis in the semester that they register. Otherwise, they will not be considered as an active student and will have to defer their studies.
 - f. The admission offer for students who fail to complete the required registration procedures by the designated deadline will be invalidated.
 - g. Students will not be entitled to register if the non-refundable deposit has not been settled.
5. Students with insufficient academic background may be considered and will be given provisional status. Students admitted under provisional status have to complete the additional courses required when they were admitted. Students passing their provisional status should be endorsed by the Dean/Director of the academic unit concerned and approved by the Dean of Graduate School, before becoming eligible for the qualifying examination for PhD students or thesis proposal assessment for students in other doctoral degree programmes.

E. CREDIT AND COURSE LOAD

A credit unit is equal to one lecture hour per week for one semester. One session (2 to 3 hours) per week of laboratory or practice work for one semester can also be counted as one credit unit.

F. COURSE RETAKE

Students may apply for retaking a course. The student should obtain the consent of the Dean/Director of the academic unit concerned by securing required signatures. All applications must be approved and the courses to be retaken must be enrolled before the deadline of the add/drop period. The fees for retaking any courses are calculated based on the number of credits of the retake course. For non-credit bearing course, the retake fees shall be one credit.

If a student retakes a course, only the course grade for the latest attempt will appear on the student's transcript.

G. COURSEWORK AND COURSE ENROLMENT

1. All students should complete the required coursework. All courses should be completed before the oral defence. A student who does not pass a compulsory course in a second attempt may be required to discontinue his or her studies.
2. Except under special circumstances as approved by the Dean/Director of the academic unit concerned, students are advised to follow the study plan specified by the programme in which they have enrolled. It should be noted that no substitutions are allowed under any circumstances for compulsory courses.
3. The courses offered by any academic unit are normally open to students enrolled in that unit and to students enrolled in other academic units either as electives permitted by, or as requirements set by, those academic units.
4. A student shall not be allowed to take courses with conflicting time schedules.
5. Students will not be entitled for enrolment or course add/drop if there is any outstanding tuition fee.
6. On-line Enrolment
During the enrolment period, students of specified programmes of studies will enrol course on-line. Students who are not able to enrol on-line during the specified period may complete the process manually.
7. Course Add/Drop
 - a. Students may make changes to their enrolment records during the course add/drop period. Requests for adding or dropping courses other than the add/drop period due to late registration should be approved by the Dean/Director of the academic unit concerned.
 - b. Adding a new course depends on the availability of section quota.
 - c. A student who drops a course without going through the prescribed procedure will be given a failing grade, "F" or "NP" for that course.
8. Withdrawal from Individual Courses
Students may withdraw from an individual course after the course add/drop period on condition that he/she still has at least one course (including doctoral thesis) enrolled after the course is withdrawn. When students wish to withdraw from a course after the add/drop period, they should complete and submit an application form to the Graduate School at least 5 working days before the final examination. A "W" grade will be given to the withdrawn course and the tuition fee for the withdrawn course will not be refunded. Any application submitted after the aforementioned deadline will not be considered.
9. Students should always look carefully at their enrolment records. If they are not sure if their enrolment records are correct, they may seek advice from the academic unit concerned. Students are responsible for following up any updates, errors or omissions.

10. Study Plan

A study plan is a guide to what students have to accomplish in order to complete their programme of studies. Students are advised to consult their study plans during selection of courses for enrolment. They should keep their study plans and any subsequent adjustments for future reference during course enrolment and for graduation purposes.

11. Course Designations

- a. Courses specified in the postgraduate programmes are designated as Compulsory Major course, Required Elective or Free Elective.
- b. Compulsory Major courses must be taken in the semester indicated. A student who fails a Compulsory Major course is required to retake that course.
- c. Required Electives are courses chosen by the student but within a group of courses designed for this purpose by the programme. Required Electives may be taken at other times. A student who fails a Required Elective will be required to either retake the same course or take another course within the same group.
- d. Free Electives are selected by the student in areas inside or outside the major as designated in the curriculum, subject to the academic unit's approval. A student who fails a Free Elective will not be required to retake the course. Such students may take another course to fulfill graduation requirements. Within individual programmes, some courses may not be considered Free Electives.

H. COURSE EXEMPTION

1. Students who have completed equivalent or convertible courses in any tertiary education institutions may apply for course exemption to the academic unit concerned on or before the last day of course add/drop period. In the case of course exemption, credits will be granted to replace the original UM course. Exempted courses will be assigned a grade "X" and will be shown in the transcript of academic record, but will not be counted towards the GPA.

Applications should be submitted to the respective academic unit and be accompanied by supporting documents, e.g. course outlines, official course descriptions, lecture hours, study plans, course grades etc., showing that the students have passed equivalent courses elsewhere.

2. Students may apply for course exemption for any courses.
3. Course exemptions are considered valid only after they are endorsed by the head of department or programme coordinator of the course offering units and approved by the Dean/Director of the academic unit concerned.
4. The upper limit on the number of credits that can be transferred to a programme is one-third of the total credits required.

I. COURSE WAIVER

1. Students who have not completed equivalent courses in other tertiary education institutions but have attained the knowledge and skills of specific UM courses may apply for a course waiver to the academic unit concerned before the last day of course add/drop period. In the case of course waiver, no credits will be granted, and students will be required to take a related course approved by the head of department or programme coordinator to fulfill the credit requirement. Waived courses will be assigned a grade "CW" and will be shown in the transcript of academic record, but will not be counted towards the GPA.

Applications must be submitted to the respective academic unit and be accompanied by an explanation for the waiver request and supporting documents (if any). Proof of the acquired

competence is required.

2. Students may apply for course waiver for any courses.
3. Course waivers are considered valid only after they are endorsed by the head of department or programme coordinator and approved by the Dean/Director of the academic unit concerned.
4. All exceptional cases are subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.

J. ATTENDANCE REQUIREMENTS

1. According to item 2 of article 27 of the Higher Education Law (Law no. 10/2017), all the course instructors are required to take class attendance.
2. A student who cannot attend classes can apply for leave of absence to the course instructor. Permission for the leave of absence cannot be more than 50% of its scheduled teaching periods in the aggregate.
3. A student who is absent without applying for leave of absence from a course for more than 20% of its scheduled teaching periods in the aggregate will not be allowed to take the final examination and will receive a failing grade for that course.

K. GRADING SYSTEM

1. The below grading system is applicable to all academic units except the Faculty of Law:

Letter Grades	Grade Points	Percentage
A	4.0	93-100
A-	3.7	88-92
B+	3.3	83-87
B	3.0	78-82
B-	2.7	73-77
C+	2.3	68-72
C	2.0	63-67
C-	1.7	58-62
D+	1.3	53-57
D	1.0	50-52
F	0	Below 50

Letter grades are official grades. Grades other than F are passing grades.

2. For the Faculty of Law, 20-point scales are official grades. Scales at 10 or above are passing grades.
3. Other Grades

Grades	Definition	Remark
CW	Course Waiver	Assigned to a course that has been waived.
DX	Deferred Result	A temporary grade assigned to the students who ask for a supplementary examination with justifiable reasons.

Grades	Definition	Remark
I	Incomplete	Used when work is necessarily delayed through no fault of the student, such as a medical problem.
NP	Fail	Given to a course where the results are not counted towards the GPA.
P	Pass	
T	Audit	Assigned when an auditing student has completed, to the satisfaction of the instructor, the conditions established at registration as an auditing student.
W	Withdrawal	Assigned when a student has withdrawn from a course. The result will not be counted towards the GPA.
X	Course Exempted	Assigned in the case of a course exemption.

L. PERIOD OF STUDY

The normative study period of all PhD programmes is 4 years while the normative study period of other doctoral degree programmes is 3 years.

M. RESIDENCE REQUIREMENT

Except students admitted in the joint programmes and students in other doctoral degree programmes, the normal residence period of a student is 3 years while the minimum residence period is 12 months. The residence requirement is part of the graduation requirement. Exceptional case is subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.

N. RESEARCH SUPERVISION

1. The Faculty/Institute Graduate Studies Committee will administer the appointments of supervisor(s), temporary supervisor, mentor and Advisory Committee of a student in PhD or other doctoral degree programmes.
 - a. The supervisor has the primary responsibility for directing and advising a student throughout his/her study period, especially during the preparation of the thesis.
 - i. Supervisor(s) of a PhD student should be appointed at the admission of a student.
 - ii. Mentor of a student in other doctoral degree programmes should be appointed before the student can identify the supervisor. Once the supervisor is appointed, the mentor is not required.
 - iii. Supervisor or mentor must evaluate the progress report of the student required by the Rules on the Progress Report of the Postgraduates of the University of Macau.
 - b. The temporary supervisor has the primary responsibility for directing and advising a student during his/her supervision period.
 - i. The temporary supervisor of a PhD student should be appointed at the admission of a student if the student cannot identify the supervisor or the supervisor can no longer serve. The admission of PhD students with temporary supervisor should be considered as exceptional cases only. The temporary supervisor of a student in other doctoral degree programmes should be appointed if the supervisor can no longer serve.
 - ii. The temporary supervisor must evaluate the progress report of the student as required by the Rules on the Progress Report of the Postgraduates of the University of Macau.

- iii. The temporary supervisor can only supervise the student for at most one year. If the student cannot identify the supervisor within one year after his/her initial registration, he/she will be discontinued from the programme.
 - c. The Advisory Committee of PhD or other doctoral degree programmes is intended to provide additional academic advice to the student during the coursework period, for the qualifying examination, and for the preparation of the thesis proposal.
 - i. Each newly admitted student will be assigned an Advisory Committee to provide guidance after his/her initial registration.
 - ii. Student should take additional course(s) advised by the supervisor.
 - iii. The Committee will also provide advice about the qualifying examination and the thesis proposal, the acceptability of the proposed thesis topic, the appropriateness of the proposed methodology, and the adequacy of the literature search. Upon approval of the student's thesis proposal, the Committee will advise the candidate about the preparation of the thesis and assist the supervisor, in monitoring the candidate's progress.
 - iv. The membership of the Advisory Committee should include the thesis supervisor(s) plus at least one member. The member(s), appointed by the Faculty/Institute Graduate Studies Committee, should represent academic disciplines relevant to the thesis topic. When appropriate, the member(s) may be selected from more than one faculty/institute. In addition, the member(s) may be appointed from outside UM if necessary.
2. The appointments of the supervisor(s), mentor and Advisory Committee of a student in PhD or other doctoral degree programmes are officially approved by the Faculty/Institute Graduate Studies Committee.
3. Changes of the supervisor(s), mentor and/or the membership of the Advisory Committee of a student in PhD or other doctoral degree programmes can be made upon the approval from the Faculty/Institute Graduate Studies Committee.

O. ASSESSMENTS

1. Each PhD student must pass three assessments during his/her study. The three assessments include a qualifying examination, a thesis proposal assessment and a final thesis oral defence examination.
2. Each student in other doctoral degree programmes must pass a thesis proposal assessment and a final thesis oral defence examination during his/her study.
3. The qualifying examination and thesis proposal assessment are administrated by the Faculty/Institute Graduate Studies Committee.

P. QUALIFYING EXAMINATION

1. The qualifying examination will assess the ability and background of the student for the enrolled PhD programme.
2. Each faculty/institute will define the form and operation procedures of the qualifying examination according to its own needs.
3. A PhD student must pass the qualifying examination within 2 years after his/her initial registration. Academic units should inform the Graduate School on the following day a student passes the qualifying examination. Unless special approval of an extension of this period from Vice Rector (Academic Affairs) is granted, a student failing to pass the qualifying examination will be discontinued from the enrolled PhD programme. An application related

to extension beyond the stipulated period to pass the qualifying examination is subject to the consideration of Faculty/Institute Graduate Studies Committee, the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs).

4. A PhD student who fails the qualifying examination on the first attempt may take the examination again. If the student fails the examination a second time, his/her study will be discontinued from the relevant PhD programme.

Q. THESIS PROPOSAL ASSESSMENT

1. The thesis proposal assessment will examine the quality of the planned research, ensuring that it meets UM standards.
2. The thesis proposal assessment may be carried out simultaneously with the qualifying examination or afterwards.
3. The thesis proposal assessment will include submission of a written proposal from the student and its presentation to an assessment panel. The assessment panel will include a chairperson appointed by the Faculty/Institute Graduate Studies Committee (this chairperson should not be a member of the Advisory Committee), along with the Advisory Committee members. A student who fails the thesis proposal assessment the first time may take the assessment again. If the student fails the assessment a second time, his/her study will be discontinued from the enrolled programme.
4. A PhD student who passes the thesis proposal assessment will be considered as a PhD candidate at the University of Macau.
5. The Faculty/Institute Graduate Studies Committee will administer the thesis proposal assessment. For PhD student, academic unit will submit the passed and fully revised thesis proposal together with the names of the student, supervisor(s) and the assessment panel to the Graduate School for official approval of PhD candidacy. For student in other doctoral degree programmes, academic unit should inform the Graduate School once a student passes the thesis proposal assessment.
6. A PhD student must achieve PhD candidacy within 3 years after his/her initial registration at the University of Macau by passing the qualifying examination and thesis proposal assessment. A student in other doctoral degree programmes must pass the thesis proposal assessment within 2.5 years after his/her initial registration at the University of Macau. The maximum period for achieving the PhD candidacy or passing the thesis proposal assessment will not be extended in general. A student who cannot achieve PhD candidacy or pass the thesis proposal assessment as governed by the above term will be discontinued from the enrolled programme.
7. A student who would like to extend his/her study period to achieve PhD candidacy or pass the thesis proposal assessment should submit the application form with the justified reason(s) endorsed by the supervisor before the end of the study period to the academic unit concerned. The application is subject to the consideration of Faculty/Institute Graduate Studies Committee, the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs).

R. THESIS FORMAT, SUBMISSION AND PUBLICATION

1. Candidates are advised to study thoroughly and follow strictly the Guidelines Governing the Format of Theses of PhD and Other Doctoral Degree Programmes when writing their thesis. Candidates may refer to the Graduate School's homepage (<https://grs.um.edu.mo/>) for

- details of the said Guidelines.
2. Before a candidate submits a thesis for examination, he/she shall pass one copy of the thesis to the supervisor(s) for assessment. If the supervisor(s) confirm(s) that the thesis is ready for submission, a "thesis submission" form should be completed as endorsement.
 3. A candidate shall submit five copies of his/her thesis, together with the "thesis submission" form, to the academic unit concerned. The thesis shall conform in layout, binding and presentation as required by the academic unit concerned.
 4. The examination committee shall declare in writing to accept/reject the thesis.
 5. If a thesis is rejected by the examination committee, the candidate shall re-submit the thesis following the above mentioned thesis submission procedures within the period as decided by the examination committee. The re-submission deadline shall not exceed the maximum period of study. A candidate shall only re-submit the thesis once only.
 6. A candidate must submit properly bound copies of the final version of the thesis approved by the examination committee upon successful completion of the oral defence examination. The exact number of copies of thesis and the submission deadline will be specified by the academic unit concerned.
 7. To ensure a uniform appearance of the theses of the PhD and other doctoral degree programmes, the bound Library copy must be first sent to the academic unit concerned for checking before it will be finally housed in the Library.
 8. A candidate must also submit a soft copy of the said thesis to the academic unit concerned for onward transmission to the University Library, in ways and format as determined by the University Library.
 9. All theses will be published with the ProQuest UMI Dissertation Publishing. Exceptions would be allowed for special cases with sound justification and proper approval. The University Library will process the thesis publication procedures with the UMI.

S. FORMATION OF ORAL DEFENCE EXAMINATION COMMITTEE

1. After the candidate has submitted the thesis to the academic unit concerned, the Academic Council of the academic unit shall decide whether to submit a proposal for the examination committee to the Rector for approval.
2. The candidate shall normally be informed of the official composition of the examination committee after the official appointment.
3. The examination committee shall be chaired by the Rector, or his/her delegated Vice Rector, Full Professors, Distinguished Professors or Chair Professors who have been the supervisor of at least three PhD students who have successfully graduated.
4. The examination committee shall be composed of the supervisor and at least three examiners, one of whom must be from non-Macau academic institution.
5. The examination committee shall be composed of at least three members who have completed a graduate degree at doctoral level in the relevant discipline.
6. The oral defence examination should take place in accordance with the Procedures for Formation of the Oral Defence Examination Committees of PhD and Other Doctoral Degree Programmes.

-
7. Within 60 days after the announcement of the composition of the examination committee, the examination committee shall declare in writing to accept the thesis or recommend its revision to the candidate with supporting reasons.
 8. In the case of thesis revision, the candidate shall revise the thesis or declare to maintain it unchanged as presented within 120 days. The period cannot be extended.
 9. If the candidate does not submit the revised thesis nor declare waiving the revision within the said period, he/she shall be considered to have given up the oral defence examination. The examination committee is dismissed.

T. ORAL DEFENCE EXAMINATION

1. The oral defence examination shall be held normally within 60 days after:
 - a. The day on which the thesis is officially accepted by the examination committee for oral defence examination.
 - b. The day on which the thesis revision or the declaration waiving the revisions is submitted.
2. The academic unit concerned shall give the candidate at least one week's notice of the date of oral defence examination.
3. The oral defence examination is an open examination. The candidate shall present the thesis and defend it in front of an examination committee.
4. Prior to the oral defence examination, the examination committee shall decide the speaking order and method of its members.
5. After the thesis presentation and the question and answer session, the examination committee shall discuss and evaluate the candidate's performance. By open ballot voting, the committee shall decide to go into the final resolution deliberation session.
6. Final Resolution Deliberation Session:
 - a. A resolution must be decided by majority vote and open ballot voting with supporting statements. No committee voting member can abstain from voting.
 - b. The final resolution of the oral defence examination shall be delivered as pass (P), conditional pass (CP) or fail (NP).
 - i. Pass with no revision: The candidate has to submit the final copy to academic unit within one week.
 - ii. Pass with minor revisions: Revised version to be assessed by supervisor(s) only / all Examination Committee Members. The candidate should complete the thesis revision as requested by the Examination Committee and submit the revised thesis with the "Confirmation of Thesis Revision" form to the academic unit within 3 months from the date of the oral defence examination. The above stated period can be extended with dean's recommendation and Vice Rector (Academic Affairs)'s approval.
 - iii. Conditional pass, subject to major revisions: The candidate has to take the oral defence examination again within a year.
 - iv. Fail: The candidate has to be discontinued from the PhD or other doctoral degree programme.
7. The academic unit concerned shall submit the graduation proposal to the Graduate School for graduation check within one month after the final thesis is submitted to the academic unit.
8. The oral defence examination and the resolution-deliberation discussions must be put on

record. A proposal for the award of degrees shall be submitted to the Senate for approval. The minutes of the oral defence examination shall record the voting results and comments on the oral defence.

U. APPEAL AGAINST RESULTS

No appeal against the final academic decision of an examination committee is permitted.

V. TUITION FEE

All students shall pay the tuition fees according to the tuition fee scheme of the admitted/resuming academic year and settle their tuition fees before the deadline set by the University.

W. GRADUATION

Graduation and Issue of Graduation Certificates

Upon successful completion of studies, thesis writing and oral defence and with the approval from the Senate, academic awards are conferred on students at a congregation.

Students eligible for academic awards for that particular year will be notified in writing of the details regarding the congregation, the collection of academic dress, and the award certificate.

The graduation certificate will be issued once only, as there will be no second printing. **Students are therefore strongly advised to ensure the safe-keeping of this important document.**

The University reserves the right to withhold conferment of an award on a student who has outstanding fees owed to the University, or who has otherwise failed to discharge all obligations towards the University.

X. DISCONTINUATION OF STUDIES

1. A student shall be required to discontinue studies under the following circumstances:
 - a. A student who has failed a compulsory course more than once.
 - b. A student who has failed a second qualifying examination.
 - c. A student who has failed a second thesis proposal assessment.
 - d. A student (under the temporary supervisor's supervision) who cannot identify the supervisor within 1 year.
 - e. A PhD student who cannot pass the qualifying examination within 2 years or achieve PhD candidacy within 3 years.
 - f. For other doctoral degree programmes, a student who cannot pass the thesis proposal assessment within 2.5 years.
 - g. A student who cannot complete his/her study within the maximum period of studies.
 - h. A student who has failed the oral defence examination.
 - i. A student who is graded "Unsatisfactory" twice in the progress report.
2. Students whose studies have been discontinued due to unsatisfactory academic performance or who have exceeded their maximum study period cannot register as a student of the University within the subsequent year (two semesters).

Discontinued students returning after one year (two semesters)

For students who have been discontinued from their studies due to unsatisfactory academic performance, they should apply for re-admission and such application must be approved by the Vice Rector (Academic Affairs) with the recommendation from the Dean/Director of the academic unit concerned.

For students who have been discontinued from their studies by exceeding the maximum

study duration, they should apply for regular admission as new students following all the procedures and rules for new students.

Y. TRANSFER OF PROGRAMME

1. Students cannot change programme/major. However, any special request is approved by the Dean/Director of the academic unit concerned of the programme/major transferred to.
2. A student who cannot manage to accomplish the PhD or other doctoral degree programmes can transfer to Master's degree programme. The application must be recommended by the principal supervisor, endorsed by the Faculty/Institute Graduate Studies Committee and approved by the Graduate School. The Master's degree will be awarded provided that he/she has successfully completed all the graduation requirements of the relevant Master's degree programme.

Z. DEFERMENT OF STUDY

1. Application for deferment of study from a withdrawn or inactive student will not be considered. For definitions of withdrawn and inactive students, please refer to item AA and AC respectively.
2. Students who wish to postpone their studies should apply for deferment of study by submitting an application form to the Graduate School and securing the required signatures from the Dean/Director of the academic unit concerned before leaving the University. The University does not guarantee such students that the degree programme/courses will remain constant after they return to the University.
3. Withdrawal grades will be recorded for each course at the time the student receives permission to defer. The grades are either "W", meaning that the student defers the study before the examination period, or "F", meaning that the student does not take the examinations but defers during or after the examination period. However, if a student defers the study after completing all the courses and examinations of a semester, all academic credits/grades are given for the courses taken in that semester.
4. Students can apply for deferment of study for not more than 2 semesters at one time. If students wish to prolong their deferment period, they should submit another application before class commencement of the next semester after they have reached the previously approved deferment period. The total approved period of deferment of study cannot accumulate to more than 6 semesters. Any exceptional cases are subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.
5. New students can apply for deferment of study for not more than one academic year. Application for such deferment should be made before class commencement. New students must fulfill all the conditions stated in their offer letters and submit the required amount of non-refundable deposit before they become eligible to apply for deferment of study. Such applications will only be permitted for medical reasons and exceptional cases with sound justification. For medical reasons, students are required to submit medical certificates issued by hospitals at the time of application. For exceptional cases with sound justification, students are required to specify the reason and submit written certification at the time of application.
6. Students who have deferred their studies and wish to return to the University should apply for resumption of study. Resumption is not granted automatically (See the item AD - Resumption/Re-admission of Study for details). Besides, new students are not permitted to transfer to another research area when they apply for resumption of study.

7. If students neither resume nor defer the studies before class commencement of the next semester after they have reached the previously approved deferment period, they will be considered having withdrawn from the University, and they have to apply for re-admission of study later if they wish to return to the University (See the item AD - Resumption/Re-admission of Study for details).

AA. WITHDRAWAL FROM THE UNIVERSITY

1. Students who wish to terminate their studies at the University prior to graduation should apply for withdrawal of study by submitting an application form to the Graduate School.
2. Withdrawal grades will be recorded for each course at the time the student receives permission to withdraw. The grades are either "W", meaning that the student withdraws from the University before the examination period, or "F", meaning that the student does not take the examinations but withdraws during or after the examination period. However, if a student withdraws from the University after completing all the courses and examinations of a semester, all academic credits/grades are given for the courses taken in that semester.
3. Students who withdraw from the University and later wish to return must apply for re-admission of study. Re-admission of study is not granted automatically and is with lower priority than resumption of study during application consideration subject to quota availability (See the item AD - Resumption/Re-admission of Study for details).

AB. CHECK-OUT

1. All withdrawn, suspended or discontinued students and those applying for deferment of study are required to complete and submit the check-out forms to the Graduate School before leaving the University. Students are required to clear all outstanding matters with the department concerned.
2. All graduates are not required to come in person to the University to complete the check-out procedures. However, students who have any outstanding records must clear their records with the department concerned. Otherwise, certificates of graduation and other official documents will not be issued.
3. A student may authorise another person to process the check-out procedures by filling in Graduate School's official authorisation letter. I.D. copies of both parties must be submitted.
4. Students who withdraw voluntarily from the University sever their connection with the University.
5. If students leave the University in the course of study without going through the check-out procedures, no official document (such as testimonial, transcript or graduation certificate) will be issued.

AC. INACTIVE STUDENTS

1. Students admitted or resuming in academic year 2013/2014 or before who do not settle their tuition fees (including continuation fee) ten calendar days after the commencement of classes in any semester will be considered inactive students.
2. Students admitted or resuming in academic year 2014/2015 onwards who do not enrol in any courses or do not settle their tuition fees ten calendar days after the payment deadline in any semester will be considered inactive students.

-
3. Students admitted in academic year 2016/2017 onwards who do not maintain at least 3 credits of enrolment per semester prior to the stage of extended thesis supervision will be considered inactive students.
 4. Inactive students will be prohibited from attending classes, using any services or facilities of the University, and applying for any official documents. For students who become inactive from academic year 2015/2016 onwards, the maximum inactive duration is two semesters cumulatively. If inactive students wish to return to the University within the inactive duration, they must make up the check-out procedures and apply for re-admission of study. An administration fee will be charged for the late check-out procedures, and a re-admission fee based on the number of inactive semesters will be charged upon approval of re-admission. Please refer to "Fees and Other Charges" for the relevant fees. Re-admission of study is not granted automatically and is with lower priority than resumption of study during application consideration subject to quota availability. Also, inactive students are with lower priority than withdrawn students for re-admission (See the item AD - Resumption/Re-admission of Study for details).

AD. RESUMPTION/RE-ADMISSION OF STUDY

1. Students who have deferred their studies and wish to return to the University should apply for resumption of study, while withdrawn, discontinued or inactive students should apply for re-admission of study.
2. Students returning to the University either through resumption or re-admission can continue their study with all the previous academic records. However, the procedures for resumption and re-admission are different from each other and re-admission is with lower priority than resumption of study during application consideration subject to quota availability. Also, discontinued and inactive students are with lower priority than withdrawn students for re-admission.
3. It should be noted that the total duration for deferment of study, withdrawal of study, and inactive period should not exceed six semesters altogether, and the inactive period should not exceed two semesters independently. No resumption or re-admission of study will be considered if students cannot fulfill this duration requirement. Any exceptional cases are subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.

Students who cannot return to the University through resumption or re-admission have to apply for regular admission if they wish to study at the University afterwards and all the previous academic records will be expired.

4. **Procedures for Resumption of Study**
When students apply for resumption of study, they should submit written applications to the Graduate School before class commencement of a certain semester for the approval from the Dean/Director of the academic unit concerned. Any applications submitted on/after the first day of classes will be directly rejected by the Graduate School. The applicants must meet all the admission requirements prevailing at the time of resumption and successful applications will be effective in the specific semester required by the students.

In addition, all resuming students who have deferred their studies due to health issues are required to submit a Medical Examination Report to the Graduate School during the resumption process. This report is to prove that the student has recovered from the health issues and is capable of pursuing his/her studies at the University. If a student has already had a medical check-up within three months prior to resumption, he/she may submit a certified true copy of that medical report.

5. Procedures for Re-admission of Study

When withdrawn and inactive students apply for re-admission of study, they should submit written requests to the Graduate School for the approval from the Dean/Director of the academic unit concerned. For inactive students, they must make up the check-out procedures before applying for re-admission; however, they are not required to obtain approval from the Dean/Director of the academic unit concerned for the check-out. Also, an administration fee will be charged for the late check-out procedures, and a re-admission fee based on the number of inactive semesters will be charged upon approval of re-admission (Please refer to "Fees and Other Charges" for the relevant fees).

When discontinued students apply for re-admission of study, they should submit written requests to the Graduate School for the approval from the Vice Rector (Academic Affairs) with the recommendation from the Dean/Director of the academic unit concerned. All re-admission applications should be submitted to the Graduate School before class commencement of a certain semester and any applications submitted on/after the first day of classes will be directly rejected by the Graduate School. The applicants must meet all the admission requirements prevailing at the time of re-admission and successful applications will be effective in the following semester.

6. All resuming and re-admitted students should pay their tuition fees according to the tuition schemes of the resuming/re-admitted year and are required to check the study plan with the general office of the academic unit concerned.

AE. CHANGE OF PERSONAL INFORMATION

1. Students should inform the Graduate School immediately of any change of personal particulars entered in the students' registration records.
2. For changes of address (such as home address, postal address and email address) and contact numbers, requests may be sent through email. All current students can also directly change their addresses and contact numbers through the myUM (<https://myum.um.edu.mo>).
3. For changes of other personal particulars not mentioned above, students must submit an application form to the Graduate School in person with personal identification documents presented. Such application will not be accepted after graduation or withdrawal from the University.

AF. CERTIFICATION

1. Academic Transcripts and Testimonials

- a. An academic transcript is a certification of a student's record of academic performance at the University and it shows the student's grades obtained in a programme up to the latest final examination taken. Students can apply for transcripts after the academic reports have been released. A testimonial is a certification of the student's present registration status with regard to his/her studies at the University.
- b. Students can apply for academic transcript or testimonial by submitting an application from to the Graduate School. The charge per copy may be found in "Fees and Other Charges". If students submit their applications by post in Macao, a cheque or cashier's order for the amount due should be enclosed. For overseas applicants, payment must be paid by either cashier's order or bank draft; an additional handling fee will be charged. Please refer to "Fees and Other Charges" for further details.
- c. To avoid delay, please remember that requests for transcripts by other parties must bear the student's authorisation before the Graduate School can process the requests. During examination and assessment periods, the issuing of transcripts may be

suspended or delayed.

- d. The University reserves the right to withhold an academic transcript or a testimonial from a student who has outstanding fees owing to the University, or who has otherwise failed to discharge all obligations towards to the University.

2. **Certified True Copy of Academic Documents**

Students may apply for certified true copies of academic documents issued by the University, such as graduation certificates and academic transcripts, by submitting an application form to the Graduate School. Please refer to “Fees and Other Charges” for the relevant charges. However, the Graduate School will provide a free service to students who apply for admission to the programmes offered by the University.

AG. ACADEMIC HONESTY

Students should uphold the principle of academic integrity and pursue their studies with passion and honesty. They should avoid committing any act of academic dishonesty, including but not limited to cheating, fabrication, collusion and plagiarism. Plagiarism is a serious academic offence and the University shall penalize the student who is proved to have incorporated others' works as his/her own work according to the “Student Disciplinary Regulations of the University of Macau” (SAO.03/201406/100). Regarding the types and handling procedures of academic dishonesty, please refer to the “Rules on Handling Student Academic Dishonesty” (AAO-REG.04/201112/068).

Annex

FEES AND CHARGES

For details about fees and charges, please refer to the “Fees and Charges” section of the UM Academic Calendar or the homepage of the Treasury Section of the Finance Office (<https://fo.um.edu.mo/>).

IMPORTANT ANNOUNCEMENTS

Notices such as important announcements, examination schedules or university activities will be posted on notice boards. There are also electronic bulletin boards, which display messages campus-wide and can be easily accessed through the campus computer network. In addition, the University sends important notices to students through SMS (short message service) or emails (university’s accounts only). Students should check the campus notice-boards, electronic bulletin boards and university’s email accounts to learn about University news and events.

General Rules Governing Master's Degree & Postgraduate Certificate/Diploma Programmes

(Approved by the Rector on 22 May 2023)

Items marked with an asterisk * are applicable to master's degree programmes only.

A. ADMISSION

1. Admission is governed by the University Admission Rules (GRS.09-4/201602/000). Applicants must satisfy the University admission requirements, and any additional requirements imposed by the academic unit they intend to enter.
2. Students are normally admitted as "first-year students".
3. Students should not enrol/register in any other universities upon registration at UM.
4. A student of the University is required to observe the General Rules, and those rules and procedures which govern admission requirements, examinations, fees and charges.

B. GENERAL

1. The University offers full-time programmes of study leading to the degrees of Master of Arts (MA), Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Master of Education (MEd), Master of Law (LLM), Master of Science (MSc), Master of Engineering (MEng), Master of Social Sciences (MSocSc), Master in Public Administration (MPA), Master of Philosophy (MPhil) or such other degrees approved by the University authority.
2. Students will be awarded a master's degree provided that they have:
 - a. completed the coursework as stated in the curriculum of the degree;
 - b. passed the required courses and one of the following options:
 - (1) to write a thesis and to pass a public oral defence;
 - (2) to write a project report;
 - (3) to attend approved professional internship and to submit a report;
 - c. paid the prescribed fees;
 - d. fulfilled the requirements of the regulations and rules of the University.
3. Each individual academic unit may issue special rules applying to specific master's degree and/or postgraduate certificate/diploma programmes, within the general framework of present General Rules. However, any standard for qualification requirements, performance of candidates and/or else, as provided for in present General Rules, may not be set to a lower or less strict level by the special rules issued for any programme by the relevant academic unit.
4. Students must register in a programme of study on the specified dates in any one academic year, with compulsory attendance at classes.
5. The maximum period of studies will be 150% of the normative period of the programme. For working students, it will be two times the normative period of studies. Less than 1 academic year will be counted towards 1 academic year. Students who cannot complete the programme within the periods above will be required to discontinue their studies.
6. Auditing students may study courses at any level subject to acceptance by the appropriate academic authority. An auditing student can attend a course and participate in activities up

to and including writing the final examination, but will receive a "T" grade. These courses may not lead to a degree but may be submitted to the academic unit concerned for consideration if the student wishes to convert to a degree-awarding programme.

C. ACADEMIC YEAR

An academic year covers the period from August to July. Each year consists of two semesters. Each semester consists of approximately seventeen weeks of scheduled classes, including examinations.

D. REGISTRATION

1. New students will be considered registered students upon completion and submission of all registration materials to the Graduate School with tuition fees settled, while returning students will be considered registered students upon settlement of tuition fees.
2. A student must register in the name which appears in his/her personal identification documents.
3. Student Cards
 - a. All students will be issued with student cards (UM Campus Card).
 - b. The student card is a student's personal identification document. It is not transferable.
 - c. In case of loss or damage of a student card, a student should apply for a replacement by submitting an application form to the Graduate School. A card replacement fee will be charged to the student.
 - d. Students may refer to the "Rules Governing the Use of UM Campus Card" for further details.
4. Late Registration
 - a. Students may apply for late registration if they cannot complete the process within the scheduled period. Application form for late registration should be submitted to the Graduate School at least three working days before the scheduled registration period.
 - b. Late registration fees will be charged to students who do not apply for late registration three working days before the scheduled registration period. Students who have applied for late registration but failed to complete the process within the approved period will also be charged a late registration fee.
 - c. Late registration can be considered once only.
 - d. Apart from medical reason, registration can only be delayed for at most five calendar days after commencement of classes. If late registration is anticipated for medical reasons, a medical certificate should be attached to the student's application for late registration. Applications for registration later than the above period will not be accepted except for medical reasons and other extraordinary circumstances. In such case, late registration application requires the approval from the Dean/Director of the academic unit concerned.
 - e. In any case, students must also make sure that they will still be able to enrol in either course work or thesis in the semester that they register. Otherwise, they will not be considered as an active student and will have to defer their studies.
 - f. The admission offer for students who fail to complete the required registration procedures by the designated deadline will be invalidated.
 - g. Students will not be entitled to register if the non-refundable deposit has not been settled.

E. CREDIT AND COURSE LOAD

The minimum number of credits for Master's degree programmes is 30. A credit unit is equal to one lecture hour per week for one semester. One session (2 to 3 hours) per week of laboratory or

practice work for one semester can also be counted as one credit unit.

F. COURSE RETAKE

Students may apply for retaking a course. The student should obtain the consent of the Dean/Director of the academic unit concerned by securing required signatures. All applications must be approved and the courses to be retaken must be enrolled before the deadline of the add/drop period. The fees for retaking any courses are calculated based on the number of credits of the retake course. For non-credit bearing course, the retake fees shall be one credit.

If a student retakes a course, only the course grade for the latest attempt will appear on the student's transcript and will be included in the calculation of the GPA.

G. COURSE ENROLMENT

1. Except under special circumstances as approved by the Dean/Director of the academic unit concerned, students are advised to follow the study plan specified by the programme in which they have enrolled. It should be noted that no substitutions are allowed under any circumstances for compulsory courses.
2. The courses offered by any academic unit are normally open to students enrolled in that unit and to students enrolled in other academic units either as electives permitted by, or as requirements set by, those academic units.
3. A student shall not be allowed to take courses with conflicting time schedules.
4. Students will not be entitled for enrolment or course add/drop if there is any outstanding tuition fee.
5. **On-line Enrolment**
During the enrolment period, students of specified programmes of studies will enrol course on-line. Students who are not able to enrol on-line during the specified period may complete the process manually.
6. **Course Add/Drop**
 - a. Students may make changes to their enrolment records during the course add/drop period. Requests for adding or dropping courses other than the add/drop period due to late registration should be approved by the Dean/Director of the academic unit concerned.
 - b. Adding a new course depends on the availability of section quota.
 - c. A student who drops a course without going through the prescribed procedure will be given a failing grade, "F" or "NP" for that course.
7. **Withdrawal from Individual Courses**
Students may withdraw from an individual course after the course add/drop period on condition that he/she still has at least one course (including thesis) enrolled after the course is withdrawn. When students wish to withdraw from a course after the add/drop period, they should complete and submit an application form to the Graduate School at least 5 working days before the final examination. A "W" grade will be given to the withdrawn course and the tuition fee for the withdrawn course will not be refunded. Any application submitted after the aforementioned deadline will not be considered.
8. Students should always look carefully at their enrolment records. If they are not sure if their enrolment records are correct, they may seek advice from the academic unit concerned. Students are responsible for following up any updates, errors or omissions.

9. **Study Plan**
A study plan is a guide to what students have to accomplish in order to complete their programme of studies. Students are advised to consult their study plans during selection of courses for enrolment. They should keep their study plans and any subsequent adjustments for future reference during course enrolment and for graduation purposes.
10. **Course Designations**
 - a. Courses specified in the postgraduate programmes are designated as Compulsory Major course, Required Elective or Free Elective.
 - b. Compulsory Major courses must be taken in the semester indicated. A student who fails a Compulsory Major course is required to retake that course.
 - c. Required Electives are courses chosen by the student but within a group of courses designed for this purpose by the programme. Required Electives may be taken at other times. A student who fails a Required Elective will be required to either retake the same course or take another course within the same group.
 - d. Free Electives are selected by the student in areas inside or outside the major as designated in the curriculum, subject to the academic unit's approval. A student who fails a Free Elective will not be required to retake the course. Such students may take another course to fulfill graduation requirements. Within individual programmes, some courses may not be considered Free Electives.

***H. THESIS REGISTRATION**

A student who chooses the thesis option must submit a thesis proposal endorsed by his/her thesis supervisor with the approval of the Dean/Director of the academic unit concerned. The supervisor or mentor must evaluate the progress report of the student required by the Rules on the Progress Report of the Postgraduates of the University of Macau.

I. TUITION FEE

All students shall pay the tuition fees according to the tuition fee scheme of the admitted/resuming academic year and settle their tuition fees before the deadline set by the University.

J. COURSE EXEMPTION

1. Students who have completed equivalent or convertible courses in any tertiary education institutions may apply for course exemption to the academic unit concerned on or before the last day of course add/drop period. In the case of course exemption, credits will be granted to replace the original UM course. Exempted courses will be assigned a grade "X" and will be shown in the transcript of academic record, but will not be counted towards the GPA.

Applications should be submitted to the respective academic unit and be accompanied by supporting documents, e.g. course outlines, official course descriptions, lecture hours, study plans, course grades etc., showing that the students have passed equivalent courses elsewhere.

2. Students may apply for course exemption for any courses.
3. Course exemptions are considered valid only after they are endorsed by the head of department or programme coordinator of the course offering units and approved by the Dean/Director of the academic unit concerned.
4. The upper limit on the number of credits that can be transferred to a programme is one-third of the total credits required.

K. COURSE WAIVER

1. Students who have not completed equivalent courses in other tertiary education institutions but have attained the knowledge and skills of specific UM courses may apply for a course waiver to the academic unit concerned before the last day of course add/drop period. In the case of course waiver, no credits will be granted, and students will be required to take a related course approved by the head of department or programme coordinator to fulfill the credit requirement. Waived courses will be assigned a grade "CW" and will be shown in the transcript of academic record, but will not be counted towards the GPA.

Applications must be submitted to the respective academic unit and be accompanied by an explanation for the waiver request and supporting documents (if any). Proof of the acquired competence is required.

2. Students may apply for course waiver for any courses.
3. Course waivers are considered valid only after they are endorsed by the head of department or programme coordinator and approved by the Dean/Director of the academic unit concerned.
4. All exceptional cases are subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.

L. ATTENDANCE REQUIREMENTS

1. According to item 2 of article 27 of the Higher Education Law (Law no. 10/2017), all the course instructors are required to take class attendance.
2. A student who cannot attend classes can apply for leave of absence to the course instructor. Permission for the leave of absence cannot be more than 50% of its scheduled teaching periods in the aggregate.
3. A student who is absent without applying for leave of absence from a course for more than 20% of its scheduled teaching periods in the aggregate will not be allowed to take the final examination and will receive a failing grade for that course.

M. EXAMINATION AND ASSESSMENT

1. Coursework
 - a. A student will take course examinations, where each course will be examined or otherwise assessed at the end of the semester in which it is offered.
 - b. For medical or other compelling reasons, a student who is unable to sit for any course examination must apply in writing with a certificate signed by a registered medical practitioner at the earliest possible moment (but not later than seven calendar days after the examination concerned) to the academic unit for leave of absence.
 - c. A student who is absent from any examination without permission will be given a failing grade for that examination.
 - d. In some courses, assessment may be made otherwise than by examination when the programme of study so specifies.
 - e. A student will be examined or assessed for every course he/she has registered for on the basis of his/her performance in that course. Criteria for examination or assessment may include one or any combination of the following: attendance, class-work, written assignments, laboratory work, field work, research papers, tests or examinations.

- * 2. Thesis Writing
All courses should be completed before the oral defence. A student shall be examined by

examiners at an oral defence on the subject of the thesis and/or approved course of study and research.

***N. EXAMINATION COMMITTEE**

For student who chooses the project report / internship and report option:

1. The examination committee shall be composed of:
 - a. The supervisor;
 - b. One academic staff.
2. The approval of the formation of the examination committee for project report / internship and report shall be obtained from the Dean/Director of the academic unit concerned or his/her delegate.

For student who chooses the thesis option:

1. After the candidate has submitted the thesis to the academic unit concerned, the Academic Council of the academic unit shall decide whether to submit a proposal for the examination committee to the Rector for approval.
2. The candidate shall be informed of the official composition of the examination committee.
3. The examination committee shall be composed of:
 - a. Two suitably qualified members of academic staff from the specific area of the master's degree programme;
 - b. The thesis supervisor.
4. Within 30 days after notifying the candidate of the composition of the examination committee, the examination committee shall declare in writing to accept the thesis or recommend its revision to the candidate with supporting reasons.
5. In the case of thesis revision, the candidate shall revise the thesis or declare to maintain it unchanged as presented within 90 days.
6. If the candidate does not submit the revised thesis nor declare waiving the revision within the said period, he/she shall be considered to have given up the oral defence examination. The examination committee is dismissed.
7. A candidate must submit properly bound copies of the final version of the thesis approved by the examination committee upon successful completion of the oral defence examination. The exact number of copies of thesis and the submission deadline will be specified by the academic unit concerned. In addition, a candidate must also submit a soft copy of the said thesis to the academic unit concerned for onward transmission to the University Library, in ways and format as determined by the University Library.

***O. ORAL DEFENCE EXAMINATION AND REPORT PRESENTATION**

For student who chooses the thesis option:

1. The oral defence examination shall take place within 60 days after:
 - a. The day on which the thesis is officially accepted; or
 - b. The day on which the thesis revision or the declaration waiving the revision is submitted.
2. The oral defence examination shall be held with the presence of at least three members of the examination committee, one of whom must be the thesis supervisor.
3. The oral defence examination shall not exceed 90 minutes, during which the examination committee members can join in discussion.

4. When the oral defence examination is completed, the examination committee members shall meet to assess the examination and set out a deliberation on the candidate's final classification by open ballot, with supporting reasons. No abstention is permitted.
5. A resolution must be decided by majority vote. The chairperson of the examination committee has the deciding vote when there is a tie.
6. The final resolution shall be delivered in the form of pass "P", conditional pass "CP" or fail "NP".
7. The proposal for the award of degrees shall be submitted to the Senate for approval. The minutes of the oral defence examination shall be submitted together with the proposal and shall record the voting results and comments on the oral defence.

Final Resolution Deliberation Session:

1. The final resolution of the oral defence examination and report presentation shall be delivered as pass (P), conditional pass (CP) or fail (NP).
 - i. Pass (P) with no revision: The final resolution should be submitted to the academic unit concerned to prepare for the student's graduation.
 - ii. Pass (P) with minor revisions: Revised version to be assessed by supervisor(s) only. The candidate should complete the revision as requested by the Examination Committee within 3 months from the date of the oral defence examination / report presentation or unless otherwise specified, nevertheless, the revision should be completed within his/her maximum period of studies. When the supervisor accepts the revision, the acceptance should be indicated in the final resolution form and the final resolution should then be submitted to the academic unit concerned to prepare for the student's graduation.
 - iii. Conditional pass (CP), subject to major revisions: The candidate has to significantly revise the thesis / report and to take the oral defence examination / report presentation again within his/her maximum period of studies.
 - iv. Fail (NP): The candidate has to be discontinued from the enrolled programme.

P. GRADING SYSTEM

1. The below grading system is applicable to all academic units except the Faculty of Law:

Letter Grades	Grade Points	Percentage
A	4.0	93-100
A-	3.7	88-92
B+	3.3	83-87
B	3.0	78-82
B-	2.7	73-77
C+	2.3	68-72
C	2.0	63-67
C-	1.7	58-62
D+	1.3	53-57
D	1.0	50-52
F	0	Below 50

Letter grades are official grades. Grade points are used for the purpose of calculating the GPA. Grades other than F are passing grades.

2. For the Faculty of Law, 20-point scales are official grades. Scales at 10 or above are passing grades.

3. Other Grades

Grades	Definition	Remark
CW	Course Waiver	Assigned to a course that has been waived.
DX	Deferred Result	A temporary grade assigned to the students who ask for a supplementary examination with justifiable reasons.
I	Incomplete	Used when work is necessarily delayed through no fault of the student, such as a medical problem.
NP	Fail	Given to a course where the results are not counted towards the GPA.
P	Pass	
T	Audit	Assigned when an auditing student has completed, to the satisfaction of the instructor, the conditions established at registration as an auditing student.
W	Withdrawal	Assigned when a student has withdrawn from a course. The result will not be counted towards the GPA.
X	Course Exempted	Assigned in the case of a course exemption.

Q. GRADE POINT AVERAGE (GPA)

1. Semester GPA - This is a figure ranging from 0 to 4.0 (A=4.0) used to indicate the average performance of a student in the semester concerned.
 - a. Semester GPA:

$$\frac{\text{Total weighted points of all courses taken in the semester concerned}}{\text{Total number of credits enrolled in the semester concerned}}$$
 - b. Weighted points:

$$\text{Grade points} \times \text{the number of credits of the course concerned}$$
2. Cumulative GPA – This is a figure ranging from 0 to 4.0 (A=4.0) used to indicate the overall performance of a student in all the semesters of the specified years of studies.

Cumulative GPA:

$$\frac{\text{Total weighted points for all courses taken}}{\text{Total number of credits enrolled in all semesters}}$$

R. GRADUATION HONOURS

1. For Master's degree programmes, honours upon graduation are awarded as follows:
 - Excellent
 - Very Good
 - Good
2. For postgraduate certificate/diploma programmes, a graduation certificate will be awarded upon graduation, with no classification of honours.
3. Graduation and Issue of Graduation Certificates

*A student must complete all the required course work and obtain a minimum overall result of Grade B- (GPA 2.7) or 14 in 20-point scale for FLL and fulfill any other requirements as specified by the academic unit concerned as the graduation requirement.

Upon successful fulfillment of all graduation requirements and with the approval from the University's Senate, academic awards are conferred on students at a congregation.

Students eligible for academic awards for that particular year will be notified in writing of the details regarding the congregation, the collection of academic dress, and the award certificate.

The graduation certificate will be issued once only, as there will be no second printing. **Students are therefore strongly advised to ensure the safe-keeping of this important document.**

The University reserves the right to withhold conferment of an award on a student who has outstanding fees owed to the University, or who has otherwise failed to discharge all obligations towards the University.

S. DISCONTINUATION OF STUDIES

1. A student shall be required to discontinue studies under the following circumstances:
 - a. A student who has failed a Compulsory Major course more than once.
 - b. A student who has enrolled in more than 1 course and has failed two-thirds of the credit units for courses taken in one semester.
 - c. A student who has failed the oral defence examination.
 - d. A student who has failed the report presentation.
 - e. A student who cannot complete his/her study within the maximum period of studies.
2. Students whose studies have been discontinued due to unsatisfactory academic performance or who have exceeded their maximum study period cannot register as a student of the University within the subsequent year (two semesters).

Discontinued students returning after one year (two semesters)

For students who have been discontinued from their studies due to unsatisfactory academic performance, they should apply for re-admission and such application must be approved by the Vice Rector (Academic Affairs) with the recommendation from the Dean/Director of the academic unit concerned.

For students who have been discontinued from their studies by exceeding the maximum study duration, they should apply for regular admission as new students following all the procedures and rules for new students.

T. CHANGE OF MAJORS

Students cannot change programme/major. However, any special request is approved by the Dean/Director of the academic unit concerned of the programme/major transferred to.

U. DEFERMENT OF STUDY

1. Application for deferment of study from a withdrawn or inactive student will not be considered. For definitions of withdrawn and inactive students, please refer to item V and X respectively.
2. Students who wish to postpone their studies should apply for deferment of study by submitting an application form to the Graduate School and securing the required signatures from the Dean/Director of the academic unit concerned before leaving the University. The University does not guarantee such students that the degree programme/courses will remain constant after they return to the University.

3. Withdrawal grades will be recorded for each course at the time the student receives permission to defer. The grades are either "W", meaning that the student defers the study before the examination period, or "F", meaning that the student does not take the examinations but defers during or after the examination period. However, if a student defers the study after completing all the courses and examinations of a semester, all academic credits/grades are given for the courses taken in that semester.
4. Students can apply for deferment of study for not more than 2 semesters at one time. If students wish to prolong their deferment period, they should submit another application before class commencement of the next semester after they have reached the previously approved deferment period. The total approved period of deferment of study cannot accumulate to more than 6 semesters. Any exceptional cases are subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.
5. New students can apply for deferment of study for not more than one academic year. Application for such deferment should be made before class commencement. New students must fulfill all the conditions stated in their offer letters and submit the required amount of non-refundable deposit before they become eligible to apply for deferment of study. Such applications will only be permitted for medical reasons and exceptional cases with sound justification. For medical reasons, students are required to submit medical certificates issued by hospitals at the time of application. For exceptional cases with sound justification, students are required to specify the reason and submit written certification at the time of application.
6. Students who have deferred their studies and wish to return to the University should apply for resumption of study. Resumption is not granted automatically (See the item Y - Resumption/Re-admission of Study for details). Besides, new students are not permitted to transfer to another programme when they apply for resumption of study.
7. If students neither resume nor defer the studies before class commencement of the next semester after they have reached the previously approved deferment period, they will be considered having withdrawn from the University, and they have to apply for re-admission of study later if they wish to return to the University (See the item Y - Resumption/Re-admission of Study for details).

V. WITHDRAWAL FROM THE UNIVERSITY

1. Students who wish to terminate their studies at the University prior to graduation should apply for withdrawal of study by submitting an application form to the Graduate School.
2. Withdrawal grades will be recorded for each course at the time the student receives permission to withdraw. The grades are either "W", meaning that the student withdraws from the University before the examination period, or "F", meaning that the student does not take the examinations but withdraws during or after the examination period. However, if a student withdraws from the University after completing all the courses and examinations of a semester, all academic credits/grades are given for the courses taken in that semester.
3. Students who withdraw from the University and later wish to return must apply for re-admission of study. Re-admission of study is not granted automatically and is with lower priority than resumption of study during application consideration subject to quota availability (See the item Y - Resumption/Re-admission of Study for details).

W. CHECK-OUT

1. All withdrawn, suspended or discontinued students and those applying for deferment of study are required to complete and submit the check-out forms to the Graduate School

before leaving the University. Students are required to clear all outstanding matters with the department concerned.

2. All graduates are not required to come in person to the University to complete the check-out procedures. However, students who have any outstanding records must clear their records with the department concerned. Otherwise, certificates of graduation and other official documents will not be issued.
3. A student may authorise another person to process the check-out procedures by filling in Graduate School's official authorisation letter. I.D. copies of both parties must be submitted.
4. Students who withdraw voluntarily from the University sever their connection with the University.
4. If students leave the University in the course of study without going through the check-out procedures, no official document (such as testimonial, transcript or graduation certificate) will be issued.

X. INACTIVE STUDENTS

1. Students admitted or resuming in academic year 2013/2014 or before who do not settle their tuition fees (including continuation fee) ten calendar days after the commencement of classes in any semester will be considered inactive students.
2. Students admitted or resuming in academic year 2014/2015 onwards who do not enrol in any courses or do not settle their tuition fees ten calendar days after the payment deadline in any semester will be considered inactive students.
3. Inactive students will be prohibited from attending classes, using any services or facilities of the University, and applying for any official documents. For students who become inactive from academic year 2015/2016 onwards, the maximum inactive duration is two semesters cumulatively. If inactive students wish to return to the University within the inactive duration, they must make up the check-out procedures and apply for re-admission of study. An administration fee will be charged for the late check-out procedures, and a re-admission fee based on the number of inactive semesters will be charged upon approval of re-admission. Please refer to "Fees and Other Charges" for the relevant fees. Re-admission of study is not granted automatically and is with lower priority than resumption of study during application consideration subject to quota availability. Also, inactive students are with lower priority than withdrawn students for re-admission (See the item Y - Resumption/Re-admission of Study for details).

Y. RESUMPTION/RE-ADMISSION OF STUDY

1. Students who have deferred their studies and wish to return to the University should apply for resumption of study, while withdrawn, discontinued or inactive students should apply for re-admission of study.
2. Students returning to the University either through resumption or re-admission can continue their study with all the previous academic records. However, the procedures for resumption and re-admission are different from each other and re-admission is with lower priority than resumption of study during application consideration subject to quota availability. Also, discontinued and inactive students are with lower priority than withdrawn students for re-admission.
3. It should be noted that the total duration for deferment of study, withdrawal of study, and inactive period should not exceed six semesters altogether, and the inactive period should

not exceed two semesters independently. No resumption or re-admission of study will be considered if students cannot fulfill this duration requirement. Any exceptional cases are subject to the endorsement from the Dean/Director of the academic unit concerned and the approval from the Vice Rector (Academic Affairs) via the Graduate School.

Students who cannot return to the University through resumption or re-admission have to apply for regular admission if they wish to study at the University afterwards and all the previous academic records will be expired.

4. Procedures for Resumption of Study

When students apply for resumption of study, they should submit written applications to the Graduate School before class commencement of a certain semester for the approval from the Dean/Director of the academic unit concerned. Any applications submitted on/after the first day of classes will be directly rejected by the Graduate School. The applicants must meet all the admission requirements prevailing at the time of resumption and successful applications will be effective in the specific semester required by the students.

In addition, all resuming students who have deferred their studies due to health issues are required to submit a Medical Examination Report to the Graduate School during the resumption process. This report is to prove that the student has recovered from the health issues and is capable of pursuing his/her studies at the University. If a student has already had a medical check-up within three months prior to resumption, he/she may submit a certified true copy of that medical report.

5. Procedures for Re-admission of Study

When withdrawn and inactive students apply for re-admission of study, they should submit written requests to the Graduate School for the approval from the Dean/Director of the academic unit concerned. For inactive students, they must make up the check-out procedures before applying for re-admission; however, they are not required to obtain approval from the Dean/Director of the academic unit concerned for the check-out. Also, an administration fee will be charged for the late check-out procedures, and a re-admission fee based on the number of inactive semesters will be charged upon approval of re-admission (Please refer to "Fees and Other Charges" for the relevant fees).

When discontinued students apply for re-admission of study, they should submit written requests to the Graduate School for the approval from the Vice Rector (Academic Affairs) with the recommendation from the Dean/Director of the academic unit concerned. All re-admission application should be submitted to the Graduate School before class commencement of a certain semester and any applications submitted on/after the first day of classes will be directly rejected by the Graduate School. The applicants must meet all the admission requirements prevailing at the time of re-admission and successful applications will be effective in the following semester.

6. All resuming and re-admitted students should pay their tuition fees according to the tuition schemes of the resuming/re-admitted year and are required to check the study plan with the general office of the academic unit concerned.

Z. CHANGE OF PERSONAL INFORMATION

1. Students should inform the Graduate School immediately of any change of personal particulars entered in the students' registration records.
2. For changes of address (such as home address, postal address and email address) and contact numbers, requests may be sent through email. All current students can also directly change their addresses and contact numbers through the myUM (<https://myum.um.edu.mo>).

-
3. For changes of other personal particulars not mentioned above, students must submit an application form to the Graduate School in person with personal identification documents presented. Such application will not be accepted after graduation or withdrawal from the University.

AA. CERTIFICATION

1. Academic Transcripts and Testimonials

- a. An academic transcript is a certification of a student's record of academic performance at the University and it shows the student's grades obtained in a programme up to the latest final examination taken. Students can apply for transcripts after the academic reports have been released. A testimonial is a certification of the student's present registration status with regard to his/her studies at the University.
- b. Students can apply for academic transcript or testimonial by submitting an application form to the Graduate School. The charge per copy may be found in "Fees and Other Charges". If students submit their applications by post in Macao, a cheque or cashier's order for the amount due should be enclosed. For overseas applicants, payment must be paid by either cashier's order or bank draft; an additional handling fee will be charged. Please refer to "Fees and Other Charges" for further details.
- c. To avoid delay, please remember that requests for transcripts by other parties must bear the student's authorisation before the Graduate School can process the requests. During examination and assessment periods, the issuing of transcripts may be suspended or delayed.
- d. The University reserves the right to withhold an academic transcript or a testimonial from a student who has outstanding fees owing to the University, or who has otherwise failed to discharge all obligations towards to the University.

2. Certified True Copy of Academic Documents

Students may apply for certified true copies of academic documents issued by the University, such as graduation certificates and academic transcripts, by submitting an application form to the Graduate School. Please refer to "Fees and Other Charges" for the relevant charges. However, the Graduate School will provide a free service to students who apply for admission to the programmes offered by the University.

AB. ACADEMIC HONESTY

Students should uphold the principle of academic integrity and pursue their studies with passion and honesty. They should avoid committing any act of academic dishonesty, including but not limited to cheating, fabrication, collusion and plagiarism. Plagiarism is a serious academic offence and the University shall penalize the student who is proved to have incorporated others' works as his/her own work according to the "Student Disciplinary Regulations of the University of Macau" (SAO.03/201406/100). Regarding the types and handling procedures of academic dishonesty, please refer to the "Rules on Handling Student Academic Dishonesty" (AAO-REG.04/201112/068).

Annex

FEES AND CHARGES

For details about fees and charges, please refer to the “Fees and Charges” section of the UM Academic Calendar or the homepage of the Treasury Section of the Finance Office (<https://fo.um.edu.mo/>).

IMPORTANT ANNOUNCEMENTS

Notices such as important announcements, examination schedules or university activities will be posted on notice boards. There are also electronic bulletin boards, which display messages campus-wide and can be easily accessed through the campus computer network. In addition, the University sends important notices to students through SMS (short message service) or emails (university’s accounts only). Students should check the campus notice-boards, electronic bulletin boards and university’s email accounts to learn about University news and events.

General Rules Governing Bachelor's Degree Programmes

(Approved by the Rector on 19 December 2023)

A. ADMISSION

1. Admission is governed by the University Admission Rules ([Admission Rules Governing Bachelor's Degree Programmes](#), [Admission Rules Governing Master's Degree & Postgraduate Certificate/Diploma Programmes](#), [Admission Rules Governing PhD and Other Doctoral Degree Programmes](#)). Applicants must satisfy the University admission requirements, and any additional requirements imposed by the academic unit they intend to enter.
2. Students should not enrol/register in any other universities upon registration at UM.
3. A student of the University is required to observe the General Rules, and those rules and procedures which govern admission requirements, examinations, fees and charges.

B. GENERAL

1. The University offers programmes of study leading to the degrees of Bachelor of Arts (BA), Bachelor of Business Administration (BBA), Bachelor of Education (BEEd), Bachelor of Law (LLB), Bachelor of Science (BSc), Bachelor of Social Sciences (BSocSc) or such other degrees as approved by the University authority.
2. Students will be awarded the appropriate bachelor's degree provided that they have:
 - a. undertaken a programme of study for a period normally of not less than four years for bachelor programmes; and
 - b. completed the prescribed courses; and
 - c. passed the prescribed examinations; and
 - d. paid the prescribed fees; and
 - e. fulfilled the requirements of the rules of the University.
3. Students must register in a programme of study on the specified dates in any one academic year, with compulsory attendance at classes.
4. The minimum duration of studies will be 75% of the normal duration of the programme while the maximum duration of studies will be 175% of the normal duration of the programme.

C. ACADEMIC YEAR

An academic year covers the period from August to July. Each year consists of two semesters, plus an optional intensive summer term. Each semester consists of approximately seventeen weeks of scheduled classes, including examinations.

D. REGISTRATION

1. New students are normally admitted as "first-year students" and will be considered registered students upon proper completion and submission of all registration materials to the Registry with tuition fees settled, while returning students will be considered registered students upon settlement of tuition fees.
2. Students are normally categorised as first, second, third, fourth or fifth year based on the number of credits gained. In special cases, such as transferring from one programme to another, or falling behind in studies because of failure in many courses, categorisation will be

based on the advice of the academic unit.

3. A student must register in the name which appears in his/her personal identification documents.
4. Student Cards
 - a. All students will be issued with student cards (UM Campus Card).
 - b. A student card cannot be used by anybody other than the holder.
 - c. In case of loss or damage of a student card, a student should apply for a replacement by submitting an [application](#) to the Registry. A card replacement fee will be charged to the student.
 - d. Students may refer to the [Rules Governing the Use of UM Campus Card](#) for further details.

E. CREDIT AND COURSE LOAD

1. The number of teaching hours of a credit is at least 15. Teaching hours include all kinds of face-to-face contact hours, such as lecture hours, laboratory hours, tutorial hours and legal practice, etc.
2. The number of study hours of a credit is 45. Study hours include the time required for any forms of teaching modes. Besides the ones mentioned in the above point, they also include internship, project, field work or practical training, laboratory or experimental work, participation in seminars, conference or assessment, etc.
3. Course Load for Students
 - a. In addition to the credits taken for Community and Peer Education courses, a student is normally allowed to take a maximum of 21 credits in a semester (an academic unit may allow less as the maximum).
 - b. A student may take up to 24 credits in a semester if he/she achieves a cumulative GPA of 2.0 or better. Student who wishes to increase the course load should submit a written application with strong justification to his/her home academic unit. Endorsement from the head of the department or programme coordinator and approval from the Dean of student's home academic unit must be sought.

F. COURSE ENROLMENT

1. Course Enrolment includes two processes, pre-enrolment and course add/drop. Students may refer to the [Course Enrolment Handbook](#) for further details.
2. Except under very special circumstances as approved by the Dean of the academic unit concerned, students are advised to follow the study plan specified by the programme in which they have enrolled. The number of credits/courses taken is restricted to the requirements of the academic unit for the semester. It should be noted that no substitutions are allowed under any circumstances for compulsory courses.
3. The courses offered by any academic unit are normally open to students enrolled in that unit, and to students enrolled in other academic units either as electives permitted by, or as requirements set by, those academic units.
4. A student shall not be allowed to take courses where lecture-time schedules conflict.
5. Students will not be entitled to proceed to pre-enrolment or course add/drop if there is any outstanding tuition fee.
6. Course Add/Drop
 - a. Students may make changes to their enrolment records during the course add/drop period. Requests for adding or dropping courses other than the add/drop period will not

be considered.

- b. Adding a new course depends on the availability of section quota.
- c. A student who drops a course without going through the prescribed procedures will be given a failing grade, "F" or "NP" for that course.

7. Withdrawal from Individual Courses

Students may withdraw from an individual course after the course add/drop period subject to the following conditions:

- a. Students must maintain their enrolment(s) in a minimum of three credits of course(s) after the withdrawal.
- b. Students are allowed to withdraw from a maximum of one course per semester. Additionally, they are limited to a total of six course withdrawals during their undergraduate study at UM, regardless of the credit units of each course.
- c. Students are permitted to withdraw from a particular course only once. Subsequent withdrawals from the same course will not be permitted.

The above-mentioned conditions do not apply to first-year students placed on the lowest English language levels (E1a and E1b levels). These students are not eligible to withdraw from any courses during their first two registered semesters at UM.

Students who wish to withdraw from a course after the add/drop period should submit an [online application](#) to the Registry no later than the end of the 11th week of a semester. For Summer Term, students who wish to withdraw from a course should submit an [online application](#) to the Registry at least 5 working days before the last class of the course concerned. A "W" grade will be assigned to the withdrawn course and the tuition fee for the withdrawn course will not be refunded. Any application submitted after the aforementioned deadline or any application for reinstatement of a withdrawn course will not be considered.

- 8. Students should always look carefully at their enrolment records. If they are not sure whether their enrolment records are correct, they may seek advice from the academic unit concerned. Students are responsible for following up any updates, errors or omissions.

9. Study Plan

A study plan is a guide to what students have to accomplish in order to complete their programme of studies. Students are advised to consult their study plans during selection of courses for enrolment. They should keep their study plans and any subsequent adjustments for future reference during course enrolment and for graduation purposes.

10. Course Designations

Courses specified in the undergraduate programmes are designated as Compulsory Major course (CM), Required Elective (RE), Community and Peer Education course (CPE), Languages and Skills course (L&S), General Education course (GE), Free Elective (FE) or Minor course (MI).

- a. Compulsory Major courses must be taken in the semester indicated. A student who fails a Compulsory Major course is required to retake that course.
- b. Required Electives are courses chosen by the student but within a group of courses designed for this purpose by the programme. Required Electives may be taken at other times. A student who fails a Required Elective will be required to either retake the same course or take another course within the same group.
- c. Community and Peer Education courses focus on experiential learning and are run jointly by the Faculties and the Residential Colleges. A student who fails a Community and Peer Education course will be required to retake that course.
- d. Languages and Skills courses include English language courses, Chinese language course, Portuguese language course and Information Technology course. A student who fails an English language course or Information Technology course will be required to retake that course. A student who fails a Chinese or Portuguese language course

- will be required to either retake the same course or take the other course.
- General Education courses are courses listed in the General Education Programme. A student who fails a compulsory General Education course will be required to retake that course. A student who fails an elective General Education course will be required to either retake the same course or take another course within the same area. Within individual major programmes, some restrictions on the selection of General Education courses may be prescribed.
 - Free Electives are selected by the student in areas inside or outside the major as designated in the curriculum, subject to the academic unit's approval. A student who fails a Free Elective will be required to either retake the same course or take another course to fulfil graduation requirements. Within individual programmes, some courses may not be considered Free Electives.
 - Minor courses are courses designated by the Minor Programme.

G. UNDERGRADUATE CURRICULUM MODEL

The following undergraduate curriculum model is implemented in academic year 2019/2020 onwards:

Course Types		No. of Credits
1.	Major (CM + RE)	40 – 66
2.	Community and Peer Education (CPE)	3
3.	Languages and Skills ^a (L&S)	3 – 15
4.	General Education (GE)	24 – 27
5.	Free Elective (FE)	9 – 50
Minimum Credit Requirement		120

^a Students who test out of the Languages and Skills course(s) are required to make up the credits by taking additional Free Elective(s).

H. COURSE RETAKE

- A student can retake a course only if the course result is below Grade C (2.0).
- There is no limit to the number of times a student retakes a course. The results of all attempts will be recorded and shown on the transcript. Only the highest grade among all attempts will be considered in GPA calculation: if this grade is Grade C (2.0) or below, it will be counted towards the GPA; if this grade is above Grade C, only Grade C (2.0) will be counted towards the GPA.

I. COURSE EXEMPTION

- Students who have completed equivalent courses in any tertiary education institutions may apply for course exemption to the academic unit concerned before the first day of the semester. In the case of course exemption, credits will be granted to replace the original UM course. Exempted courses will be assigned a grade "X" and will be shown in the transcript of academic record, but will not be counted towards the GPA or SA.

Applications should be submitted to student's home academic unit and be accompanied by supporting documents, e.g. course outlines, official course descriptions, lecture hours, study plans, course grades etc, showing that the students have passed equivalent courses

elsewhere.

2. Course exemptions are considered valid only after they are endorsed by the head of department or programme coordinator of the course offering units and approved by the Dean of student's home academic unit.
3. A course can be exempted only if it meets the following three requirements:
 - a. The course applied for course exemption must be deemed at same degree level.
 - b. Course Content
The course applied for course exemption must have at least 80% content similarity. The head of department or programme coordinator/head of GE Programme/GE course area coordinator can judge the course content.
 - c. Lecture Hour
The lecture hours of the course applied for course exemption must have at least 80% as the course offered by UM. One UM credit is equal to one lecture hour per week for one semester and the total number of teaching weeks of a semester is at least 15.

Study Hour
For courses completed under the European Credit Transfer System (ECTS) without having 80% lecture hours as the UM-offered course, the study hours of the course applied for course exemption must have at least 80% as the course offered by UM. One UM credit is equal to 45 study hours for one semester.
4. The normal limit on the number of credits that can be transferred to a programme is one-third of the total credits required.
5. For courses completed in UM-initiated outbound programmes without comparable courses offered by UM, students can still transfer them to UM as free electives with a maximum of six credits. Endorsement from the head of department or programme coordinator and approval from the Dean of student's home academic unit are required.
6. All exceptional cases are subject to the recommendation of the Dean of student's home academic unit and the approval of Vice Rector (Academic Affairs) via the Registry.

J. COURSE WAIVER

1. Students who have not completed equivalent courses in any tertiary education institutions but have attained the knowledge and skills of specific UM courses may apply for a course waiver to the academic unit concerned before the first day of the semester. In the case of course waiver, no credits will be granted, and students will be required to take a related course approved by the head of department or programme coordinator to fulfil the credit requirement. Waived courses will be assigned a grade "CW" and will be shown in the transcript of academic record, but will not be counted towards the GPA or SA.

Applications must be submitted to student's home academic unit and be accompanied by an explanation for the waiver request and supporting documents (if any). Proof of the acquired competence is required.

2. Students may apply for course waiver for any courses. For the course in Community and Peer Education "Residential College Experiential Learning", students may apply for course waiver on the condition that they have possessed a degree from a comparable tertiary education institution.
3. Course waivers are considered valid only after they are endorsed by the head of department or programme coordinator of the course offering units and approved by the Dean of student's home academic unit.

4. All exceptional cases are subject to the recommendation of the Dean of the student's home academic unit and the approval of Vice Rector (Academic Affairs) via the Registry.

K. ATTENDANCE AND ABSENCE

1. Attendance
 - a. Participation in the work of a course is a precondition for a student's achievement of credits in that course.
 - b. A student whose studies are discontinued will not be permitted to attend classes during the period of suspension.
2. Absence
 - a. A student who cannot attend classes because of illness must inform the teacher concerned in writing at the earliest opportunity and seek his/her approval. When longer absence is necessary (over three days) or when absence from examinations is in question, a student must submit in writing an application for leave of absence to the Dean or Director of the course offering unit concerned, together with a certificate signed by a registered medical practitioner for approval.
 - b. A student who, during his studies, desires leave of absence for more than two full consecutive days for non-medical reasons must apply to the Dean or Director of the course offering unit concerned in writing at the earliest opportunity, stating the reasons for which the leave of absence is sought. Permission for such leave will only be granted in exceptional circumstances and on a case-by-case basis.
 - c. A student who is absent without applying for leave of absence from a course for more than 20% of its scheduled teaching periods in the aggregate will not be allowed to take the final examination and will receive a failing grade for that course.
 - d. If the expected period of leave is of a significant duration, students should apply for deferment of studies.

L. EXAMINATION AND ASSESSMENT

1. A student will take course examinations, where each course will be examined or otherwise assessed at the end of the semester in which it is offered.
2. For medical or other compelling reasons, a student who is unable to sit for any course examination must apply in writing with a certificate signed by a registered medical practitioner at the earliest possible moment (but not later than seven calendar days after the examination concerned) to the Dean or Director of the course offering unit for leave of absence.
3. A student who is absent from any examination without permission will be given a failing grade for that examination.
4. In some courses, assessment may be made otherwise than by examination when the programme of study so specifies.
5. A student will be examined or assessed for every course he/she has registered for on the basis of his/her performance in that course. Criteria for examination or assessment may include one or any combination of the following: attendance, class-work, written assignments, laboratory work, field work, research papers, tests or examinations.

M. GRADING SYSTEM

1. The below grading system is applicable to all academic units except the Faculty of Law:

Letter Grades	Grade Points	Percentage
A	4.0	93-100
A-	3.7	88-92
B+	3.3	83-87
B	3.0	78-82
B-	2.7	73-77
C+	2.3	68-72
C	2.0	63-67
C-	1.7	58-62
D+	1.3	53-57
D	1.0	50-52
F	0	Below 50

Letter grades are official grades. Grade points are used for the purpose of calculating the GPA. Grades other than F are passing grades.

- For the Faculty of Law, 20-point scales are official grades. Scales at 10 or above are passing grades.

3. Other Grades

Grades	Definition	Remark
CW	Course Waiver	Assigned to a course that has been waived.
DX	Deferred Result	A temporary grade assigned to the students who ask for a supplementary examination with justifiable reasons.
I	Incomplete	Used when work is necessarily delayed through no fault of the student, such as a medical problem. This grade must be converted to a regular grade by the commencement of the following semester; otherwise it will be converted to "F".
NP	Fail	Given to a course where the results are not counted towards the GPA or SA.
P	Pass	
W	Withdrawal	Assigned when a student has withdrawn from a course. The result will not be counted towards the GPA or SA.
X	Course Exempted	Assigned in the case of a course exemption.

N. GRADE POINT AVERAGE (GPA)

- Semester GPA – This is a figure ranging from 0 to 4.0 (A=4.0) used to indicate the average performance of a student in the semester concerned.

a. Semester GPA:

Total weighted points of all courses taken in the semester concerned

Total number of credits enrolled in the semester concerned

b. Weighted points:

Grade points x the number of credits of the course concerned

- Cumulative GPA – This is a figure ranging from 0 to 4.0 (A=4.0) used to indicate the overall performance of a student in all the semesters of the specified years of studies.

Cumulative GPA:

Total weighted points of all courses taken in all semesters

Total number of credits enrolled in all semesters

3. The presentation of GPA is truncated, not rounded, to two decimal places.

O. SCALE AVERAGE (SA)

1. Semester SA – This is a figure ranging from 0 to 20 used to indicate the average performance of a student in the semester concerned.

- a. Semester SA:

Total weighted points of all courses taken in the semester concerned

Total number of credits enrolled in the semester concerned

- b. Weighted points:

20-point scale x the number of credits of the course concerned

2. Cumulative SA – This is a figure ranging from 0 to 20 used to indicate the overall performance of a student in all the semesters of the specified years of studies.

- Cumulative SA:

Total weighted points of all courses taken in all semesters

Total number of credits enrolled in all semesters

3. The presentation of SA is truncated, not rounded, to two decimal places.

P. ACADEMIC HONOURS

Dean's and Rector's Honour Lists

Students in bachelor's degree programmes will be placed on the Dean's and Rector's Honour List at the end of the first or second semester if they meet the following criteria:

■ **For Dean's Honour List:**

An eligible student should be a registered student in the relevant semester who completes at least 15 credits or the number of credits required by the designated study plan of the semester at the University and achieves a semester GPA of 3.3 / semester SA of 14 or better in that semester.

■ **For Rector's Honour List:**

The Rector's Honour List is compiled on the Dean's recommendation. Only the best registered student in each academic unit will be selected, and the candidates must complete at least 15 credits or the number of credits required by the designated study plan of the semester at the University and achieve a semester GPA of 3.5 / semester SA of 16 or better in both semesters of that academic year.

Students going out for study, research, exchange, or other relevant academic activities or on leave for one semester or one academic year would not be included in the Dean's or Rector's Honour Lists in that semester or academic year.

Q. GRADUATION

1. Students are required to fulfil the following requirements in order to graduate:
 - a. GPA Requirement
For programmes using GPA system, students are required to achieve a cumulative GPA of 2.0 or above.
 - b. Residential College (RC) Requirement
Mandatory residence of two semesters is normally required for the 1st year students. All students are required to fulfil the requirements specified by the RC system and the affiliated RC.

The University will **NOT** issue any certificates to those students who pass all the required courses but do not fulfil both the minimum GPA requirement and the RC requirement for graduation. However, transcripts will be issued to the students.

2. Graduation and Issue of Graduation Certificates

Upon successful completion of studies, fulfilment of both the GPA requirement and the RC requirement at the University, and with the approval of the University's Senate, academic degrees are conferred on students at a congregation.

Students eligible for academic degrees for that particular year, including those graduating after semester 1 and semester 2, will be notified in writing of the details regarding the congregation, the collection of academic dress, and the graduation certificate.

The graduation certificate will be issued once only, as there will be no second printing. **Students are therefore strongly advised to ensure the safe-keeping of this important document.**

The University reserves the right to withhold conferment of a degree on a student who has outstanding items owed to the University, or who has otherwise failed to discharge all obligations towards the University.

R. ACADEMIC WARNING, PROBATION AND DISCONTINUATION OF STUDIES

1. Academic Warning

A student shall be placed on Academic Warning if he/she has obtained a semester GPA or cumulative GPA below 1.70 in any registered semester.

A student on Academic Warning will receive a written warning about his/her unsatisfactory academic performance and the required academic advising from the concerned academic unit.

2. Academic Probation

A student shall be placed on Academic Probation for one semester if he/she has obtained a semester GPA or cumulative GPA below 1.70 in any two consecutive registered semesters. A student on Academic Probation will receive a written warning about his/her unsatisfactory academic performance. The study load of the student shall be restricted to a maximum of 12 credits. Such student shall be required to seek academic advice from his/her home academic unit on a regular basis (usually at least once a month) during the probation semester. His/Her performance shall be reviewed at the end of the probation semester:

- a. If a student obtains both semester GPA and cumulative GPA of 1.70 or above in the probation semester, his/her Academic Probation will be lifted.
- b. If a student obtains either a semester GPA or cumulative GPA below 1.70 in the probation semester, his/her Academic Probation will be extended for one more semester.
- c. If a student obtains both semester GPA and cumulative GPA below 1.70 in the probation semester, he/she will be required to discontinue his/her studies.

The Registry will send the list of students to be discontinued of studies to the concerned academic units for confirmation. For special cases, the Dean of the academic unit concerned may extend the probation period for one more semester with strong justifications. In any case, a student shall be placed on Academic Probation for not more than three registered semesters.

3. Students whose studies have been discontinued due to unsatisfactory academic performance cannot be re-admitted to the *same programme* in the following periods, unless special approval has been granted by the Vice Rector (Academic Affairs):

- a. within the following year (two semesters) after discontinuation; or
- b. three years (six semesters) after discontinuation.

Discontinued students who wish to be re-admitted to the same programme other than the periods mentioned above should apply for re-admission, and such application shall be considered and approved by the Dean of the academic unit concerned (See the item Y – Resumption/Re-admission of Study for details).

S. TRANSFER OF PROGRAMME

1. Students may apply for transfer of programme within the scheduled period in each semester and may apply to a maximum of two programme choices according to the order of preferences. Students are not eligible to apply for transfer of programme in their first registered semester at UM.
2. All applications must be approved by the Dean of the academic unit of the programme transferred to.
3. The approved applications for transfer of programme will be effective in the following semester.
4. Any student can have only one approved transfer of programme during his/her undergraduate study at UM.
5. For students transferring between programmes of same grading system, the results of courses taken and the credits gained previously will all be included in the GPA or SA calculation for graduation.
6. For students transferring between the programmes of different grading systems, the credits gained previously will all be counted.
 - a. If the courses taken previously are not required by the programmes that students transfer to, the results of courses taken previously will not be counted towards the final results for graduation.
 - b. If the courses taken previously are required by the programmes that students transfer to, the results of courses taken previously will all be counted towards the final results for graduation.

T. PURSUING MINOR PROGRAMMES

1. A minor programme requires 30-35 credits of courses.
2. A student who wishes to apply for enrolling in a minor programme should achieve a cumulative GPA of 2.0 or above (Grade C or better).
3. Students may apply for minor programme within the scheduled period in each semester and can pursue a maximum of two minor programmes but they are not eligible to apply for it in their first registered semester at UM. Students having prior approval for pursuing minor programme will be given priority in course enrolment. However, students without prior approval may also apply for qualification of a minor programme in the 2nd semester of the final year of study if they have successfully enrolled in all the courses required by the minor programme.
4. Changing minor programme is subject to approval of the academic unit of the minor programme changed to. Any student can have only one approved change of minor programme during his/her undergraduate study at UM.
5. In order to graduate with a minor qualification, a student must complete all requirements of

the enrolled minor programme, as well as all the requirements of the major programme of study. The courses taken for minor programme cannot be counted towards students' major programme and vice versa. The results achieved from the minor courses will not be calculated towards the GPA calculation for graduation.

6. Students who graduate with a minor qualification will have a certificate awarded together with a separate transcript indicating all the courses taken for the minor programme.
7. A student who wishes not to continue their enrolled minor programme should apply for withdrawal from minor programme by submitting an [application form](#) to the Registry. The courses taken previously for the withdrawn minor programme will all be counted towards students' major programme and included in the GPA calculation for graduation.

U. DEFERMENT OF STUDY

1. Application for deferment of study from a withdrawn or inactive student will not be considered. For definitions of withdrawn and inactive students, please refer to item V and X respectively.
2. Students who wish to postpone their studies should apply for deferment of study by submitting an [online application](#) to the Registry. The University does not guarantee such students that the degree programmes/courses will remain constant after they return to the University.
3. Students can apply for deferment of study for not more than two semesters at one time. If students wish to prolong their deferment period, they should submit another application before the first day of the next semester after they have reached the previously approved deferment period. The total approved period of deferment of study cannot accumulate to more than six semesters.
4. First-year registered students can apply for deferment of study for not more than one academic year. Such applications will only be permitted for medical reasons and exceptional cases with sound justification. For medical reasons, students are required to submit medical certificates issued by hospitals at the time of application. For exceptional cases with sound justification, students are required to specify the reason and submit written certification at the time of application.
5. Students who have deferred their studies and wish to return to the University should apply for resumption of study. Resumption is not granted automatically (See the item Y - Resumption/Re-admission of Study for details). Besides, students are not permitted to transfer to another programme when they apply for resumption of study.
6. If students neither apply for resumption of study nor submit another deferment application before the first day of the next semester after they have reached the previously approved deferment period, they will be considered having withdrawn from the University, and they have to apply for re-admission of study later if they wish to return to the University (See the item Y - Resumption/Re-admission of Study for details).

V. WITHDRAWAL FROM THE UNIVERSITY

1. Students who wish to terminate their studies at the University prior to graduation should apply for withdrawal from studies by submitting an [online application](#) to the Registry.
2. Withdrawal grades will be recorded for each course at the time the student receives permission to withdraw. The grades are either "W", meaning that the student withdraws from the University before the examination period, or "F", meaning that the student does not take the examinations but withdraws during or after the examination period. However, if a student

withdraws from the University after completing all the courses and examinations of a semester, all academic credits/grades are given for the courses taken in that semester.

3. Students who withdraw from the University and later wish to return must apply for re-admission of study. Re-admission of study is not granted automatically. It is with lower priority than resumption of study during application consideration and is subject to quota availability (See the item Y - Resumption/Re-admission of Study for details).

W. CHECK-OUT

1. All withdrawn, discontinued students and those applying for deferment of study are required to complete the [check-out procedures](#) before leaving the University. Students are required to clear all outstanding matters with the department concerned.
2. If students leave the University in the course of study without going through the check-out procedures, no official document (such as testimonial, transcript or graduation certificate) will be issued.

X. INACTIVE STUDENTS

1. Students who fail to enrol in at least three credits of course(s) or do not fully settle their tuition fees in any semester will be considered inactive students.
2. Students are required to settle their tuition fees before the payment deadline. When students fail to settle their tuition fees by the due date, they may settle their overdue payment with an overdue administrative charges within 10 calendar days after the payment deadline (Please refer to [Fees and Other Charges](#) for details). Any requests for late payment after 10 calendar days of the payment deadline will not be considered and any students who do not have their tuition fees fully settled by the said time will be considered inactive students.
3. Inactive students will be prohibited from attending classes, using any services or facilities of the University, and applying for any official documents. For students who become inactive from academic year 2015/2016 onwards, the maximum inactive duration is two semesters cumulatively. If inactive students wish to return to the University within the inactive duration, they must apply for re-admission of study. Re-admission of study is not granted automatically. It is with lower priority than resumption of study during application consideration and is subject to quota availability. Also, inactive students are with lower priority than withdrawn students for re-admission (See the item Y - Resumption/Re-admission of Study for details).

Y. RESUMPTION/RE-ADMISSION OF STUDY

1. Students who have deferred their studies and wish to return to the University should apply for resumption of study, while withdrawn, discontinued or inactive students should apply for re-admission of study.
2. Students returning to the University either through resumption or re-admission can continue their study with all the previous academic records. However, the procedures for resumption and re-admission are different from each other. Re-admission is with lower priority than resumption of study during application consideration and is subject to quota availability. Also, discontinued and inactive students are with lower priority than withdrawn students for re-admission.
3. It should be noted that the total duration for deferment of study, withdrawal of study, and inactive period should not exceed six semesters altogether, and the inactive period should not exceed two semesters independently. No resumption or re-admission of study will be considered if students cannot fulfil this duration requirement. In this case, all academic

records will be expired and students have to apply for admission if they wish to study at the University afterwards.

4. Procedures for Resumption of Study

When students apply for resumption of study, they should submit an [application form](#) to the Registry before the first day of a certain semester for the approval from the Dean of student's home academic unit. Any applications submitted on/after the first day of classes will be directly rejected by the Registry. The applicants must meet all the admission requirements prevailing at the time of resumption and successful applications will be effective in the specific semester required by the students.

In addition, all resuming students who have deferred their studies due to health issues are required to submit a [Medical Examination Report](#) to the Registry during the resumption process. This report is to prove that the student has recovered from the health issues and is capable of pursuing his/her studies at the University. If a student has already had a medical check-up within three months prior to resumption, he/she may submit a certified true copy of that medical report.

5. Procedures for Re-admission of Study

When withdrawn, discontinued and inactive students apply for re-admission of study, they should submit written requests to the Registry for the approval from the Dean of student's home academic unit. For inactive students, they must make up the check-out procedures before applying for re-admission, however, they are not required to obtain approval from the Dean of student's home academic unit for the check-out. Also, an administration fee will be charged for the late check-out procedures, and a re-admission fee based on the number of inactive semesters will be charged upon approval of re-admission (Please refer to [Fees and Other Charges](#) for the relevant fees). All re-admission application should be submitted to the Registry before the first day of a certain semester and any applications submitted on/after the first day of classes will be directly rejected by the Registry. The applicants must meet all the admission requirements prevailing at the time of re-admission and successful applications will be effective in the following semester.

6. All resuming and re-admitted students should pay their tuition fees according to the tuition schemes of the resuming/re-admitted year and are required to check the study plan with the general office of the academic unit concerned.

Z. CHANGE OF PERSONAL INFORMATION

1. Students should inform the Registry immediately of any change of personal particulars entered in the students' registration records.
2. For changes of address (such as home address, postal address and email address) and contact numbers, requests may be sent through email. All current students can also directly change their addresses and contact numbers through the myUM (<https://myum.um.edu.mo>).
3. For changes of other personal particulars not mentioned above, students must submit an [application form](#) to the Registry in person with personal identification documents presented. Such application will not be accepted after graduation or withdrawal from the University.

AA. CERTIFICATION

1. Academic Transcripts and Testimonials
 - a. An academic transcript is a certification of a student's record of academic performance at the University and it shows the student's grades obtained in a programme up to the latest final examination taken. Students can apply for transcripts after the e-academic reports have been released. A testimonial is a certification of the student's present

- registration status with regard to his/her studies at the University.
- b. Students can apply for academic transcript or testimonial by submitting an [application](#) to the Registry. The charge per copy may be found in [Fees and Other Charges](#).
 - c. To avoid delay, please remember that requests for transcripts by other parties must bear the student's authorisation before the Registry can process the requests.
 - d. The University reserves the right to withhold an academic transcript or a testimonial from a student who has outstanding fees owing to the University, or who has otherwise failed to discharge all obligations towards to the University.
2. Certified True Copy of Academic Documents
- Students may apply for certified true copies of academic documents issued by the University, such as graduation certificates and academic transcripts, by submitting an [application form](#) to the Registry. Please refer to [Fees and Other Charges](#) for the relevant charges.

AB. ACADEMIC HONESTY

Students should uphold the principle of academic integrity and pursue their studies with passion and honesty. They should avoid committing any act of academic dishonesty, including but not limited to cheating, fabrication, collusion and plagiarism. Plagiarism is a serious academic offence and the University shall penalize the student who is proved to have incorporated others' works as his/her own work according to the [Student Disciplinary Regulations of the University of Macau](#). Regarding the types and handling procedures of academic dishonesty, please refer to the [Rules on Handling Student Academic Dishonesty](#).

Examination Rules

(Approved by the Rector on 05 July 2024)

General Instructions

1. Responsibility to Attend Examinations

- a. Candidates are responsible for checking the dates, times and locations of their examinations from the examination schedules, and for presenting themselves for examination at the appointed place and time. Examination schedules will be announced by the Registry or academic unit at least one month prior to the examination period.
- b. Where all or part of the assessment for an examination is by means other than of a formally invigilated written examination, the instructor will announce details of the appropriate arrangements, and it is the candidate's responsibility to acquaint themselves with these details.
- c. A candidate who is unable to attend an examination under normal conditions because of illness, misadventure, or other extenuating circumstances, or who would be significantly disadvantaged if required to do so, may be permitted to sit the examination under special conditions. Such special arrangements, which may include (if necessary) additional time, a re-scheduling of the examination, the use of dictating or other assistance, and/or the use of premises outside the University, will be approved in advance by the Dean/Director of the academic unit concerned. In all other respects, the University regulations governing examinations will apply. Candidates requesting special arrangements on medical grounds will be required to substantiate their requests with a medical certificate or other documentary evidence. Candidates requesting special arrangements on other grounds may be required to reimburse the University for expenses incurred in such arrangements.
- d. A candidate is required to inform the academic unit concerned in writing immediately if for any reason he/she is unable to sit for an examination because of illness, accident or other causes, or if there is any factor arising immediately prior to or during the examination which the candidate believes could adversely affect his/her performance and which he/she wishes to be taken into account when assessing that performance. The candidate's letter must state clearly the examination in question, the cause of the absence or the manner in which the performance was affected, and must enclose the relevant supporting documentary evidence, e.g., medical certificates.
- e. Any candidate failing to give notice as specified in Examination Rule (1.d) above within seven working days after the examination to the academic unit concerned may lose the opportunity to have these circumstances taken into account or to appeal on these grounds against the decision of the Academic Council/Pedagogic Committee.
- f. A candidate who asks for rearrangement of final examinations with mere justification that he/she has to attend external examinations, e.g., TOEFL, CET4/6, etc., will not be accepted.

2. Use of Materials and Aids

- a. No stationery will be provided at the examination venue. Candidates should provide themselves with the necessary writing and drawing tools.
- b. All questions in a written examination must be answered using only answer booklets, supplementary sheets and other materials provided by the University for that examination. Candidates at any examination, either written or practical, will not be permitted to make use of any paper, books, notes, dictionaries, instruments, aids or other materials unless expressly authorized in the rubric of the examination paper. Details of any such materials

and aids which may be permitted in the examination will be provided to candidates in advance by the examiners. Authorized materials and aids will be subject to inspection by the invigilators.

- c. Where electronic calculators are permitted for use in an examination, these instruments should be non-programmable unless expressly allowed, hand-held, self-powered, and silent in operation. These should not possess any graphic or word-display facilities, e.g., electronic dictionaries, smart watches, etc. Candidates may not use any external media associated with an electronic calculator, such as instruction booklets, magnetic cards or memory modules. Candidates are responsible for ensuring that their calculators are in working order, and have a sufficient power supply, and that alternative means of calculating are available in the event that their electronic calculators fail during an examination.
- d. Except authorized materials and aids, candidates are prohibited from using any other electronic devices, e.g., smart phones and watches, electronic dictionaries, etc., during an examination.
- e. Mathematical tables and all other materials provided by the University for use in examinations must not be removed by candidates from the examination venue.

3. Before the Examination

- a. Candidates are required to bring along their personal I.D. cards and UM Campus Cards whenever they have an examination for verification purposes. Candidates who are unable to present their cards will not be allowed to write the examination.
- b. Invigilator should ensure that only examination candidates are allowed to enter the examination venue.
- c. Candidates should check their examination venues and seat numbers from their Final Examination Timetable.
- d. Candidates will be admitted into the examination venue at least 5 minutes before the commencement of an examination. Candidates who arrive late and are admitted will not be given extra time. No candidate will be admitted into an examination venue 45 minutes after the commencement of an examination.

4. Entry to Examination Venue

- a. Candidates shall not enter the examination venue until permitted to do so by an invigilator. Upon entering the examination venue, candidates become subject to the authority of the invigilators and must act according to any instructions given by an invigilator.
- b. Candidates are advised not to leave their study materials and personal property outside the entrance of the examination venue due to the risk of losing such items. Such property should be deposited in a place well away from the candidates, as directed by the invigilator.
- c. Candidates with watch alarms or other apparatus which could create noise, e.g., calculators, smart phones etc., should switch them off and disconnect them from the internet before entering the examination venue, and place them under their seats in a position clearly visible to invigilators. These electronic devices must not be switched on or used during the examination or before the candidates leave the examination venue.
- d. No food or drink is allowed inside the examination venue.
- e. No photo taking/recording is allowed inside the examination venue.
- f. Candidates shall observe silence within the examination venue except when it is necessary to communicate with an invigilator and that it will not cause any unnecessary distraction to other candidates. A candidate who persists in causing disturbance to other candidates after a warning may be required to discontinue the examination and leave the examination venue.

5. During the Examination

- a. Candidates shall not start writing until given permission to do so by the invigilator.

-
- b. Candidates should first read through the whole question paper when an examination begins. If a wrong question paper was being handed out, or if the questions indicate that other materials should have been given out, but have not been, candidates should inform the invigilator immediately.
 - c. Candidates should pay attention to any general directions which may be stated either on the cover page of the examination paper or at the beginning of each question. They should also listen carefully to the presiding invigilator's announcements.
 - d. Invigilators shall make announcement for instructions of the examination and remind candidates of the consequences of cheating before an examination starts.
 - e. Candidates must write the subject title, subject code and their student number clearly on the front page of each answer booklet and on the cover page of the examination paper.
 - f. Candidates must read the instruction printed on the examination question paper before doing the examination.
 - g. No candidate will be permitted to leave the examination venue during the first 45 and last 15 minutes of the examination.
 - h. Candidates wishing to leave the examination venue temporarily will be permitted to do so under the supervision of an invigilator. Under such circumstance, candidates shall not bring any unauthorized electronic devices with them when leaving the examination venue, nor shall they use any unauthorized electronic devices when they are away from the examination venue.
 - i.
 - i) If circumstances arise during an examination which, in the opinion of the invigilator, render it necessary for the examination to be cancelled or postponed, the invigilator will stop the examination and, as soon as possible, arrange for the written scripts to be collected and report the matter to the respective academic unit.
 - ii) When a report is made under such circumstances, the academic unit concerned will investigate the matter reported and take action if necessary. In the event another examination is ordered to be held, the new examination will be deemed to be the prescribed examination, and a report will be made to the Dean/Director of the academic unit concerned.

6. Collection of Scripts

- a. During the last 15 minutes of each examination period, candidates must remain in their seats until they are told to leave by the invigilator.
- b. It is the responsibility of the candidate to ensure that all loose pages are securely fastened into the answer booklet and that all work which is to be considered by the examiners is handed in. No work that is removed by the candidate from the examination venue will be accepted for consideration by the examiners.

7. Conduct of Candidates

- a. Candidates shall comply with the Examination Rules and all instructions given by an invigilator.
- b. Candidates shall observe silence within the examination venue except when it is necessary to communicate with an invigilator, and that it will not cause any unnecessary distraction to other candidates. A candidate who persists in causing disturbance to other candidates after a warning may be required to discontinue the examination and leave the examination venue.
- c. No person may impersonate a candidate, nor may any candidate permit himself/herself to be impersonated at any examination.
- d. During an examination, candidates shall not communicate in any way with other candidates, nor give or receive any information, materials or aids to or from other candidates, nor make use of any materials or aids not specifically authorized for that examination.
- e. i) Candidate who is found cheating or misconduct will be informed by the invigilator, who is empowered with the authority, of the academic unit concerned, to discontinue the

examination. Expulsion from the examination venues should occur only when it is felt that such disciplinary action is essential.

ii) The academic unit concerned reserves the right to withhold issuing the results of examinations within the investigation period.

8. Disqualification

If any of the following circumstances arises during the examination, such behavior will be considered as cheating or misconduct. The candidate will be disqualified and a failing grade (i.e. F/NP) will be given for the course together with a verbal or written warning. In severe cases, a disciplinary panel may be called to handle the case. A record of such proceedings will be kept in the student's file:

- i) A candidate disobeys the instructions given by the invigilator.
- ii) A candidate impersonates another candidate, or a candidate permits himself/herself to be impersonated.
- iii) A candidate improperly obtains knowledge of examination papers prior to the examination.
- iv) A candidate starts to write any notes or answer any question without permission or announcement before the examination starts, or a candidate who continues to write after the invigilator has announced the completion of the examination.
- v) A candidate is found to have any unauthorized article(s)/material(s) on/in the examination desk or on his/her person.
- vi) A candidate communicates or attempts to communicate improperly with any person inside or outside the examination venue.
- vii) A candidate uses any unauthorized notes, books or electronic devices, e.g., smart phones and watches, electronic dictionaries, etc.
- viii) A candidate copies from the work of another candidate.
- ix) A candidate leaves and enters the examination venue without permission.
- x) A candidate persists in causing noise/disturbance to other candidates after a warning.

9. Disturbance

In the case of disturbance during an examination, e.g., very loud external noise, the invigilator may authorize additional time after the scheduled time given.

10. Supplementary/Re-Sit Examination

a. Supplementary Examination

- i) A candidate who is not able to attend an examination due to sickness or any other special reason as approved by the Dean/Director of his/her academic unit may apply for a supplementary examination. If medical set up is required in the examination venue, he/she will have to submit medical certificate(s) or other supporting document(s) issued by a hospital recognized by the Government. All charges will be borne by the candidate.
- ii) A student who is absent from an examination will be requested to submit a written request with valid reasons, under normal circumstances, to the academic unit concerned within seven working days from the date on which the examination is held.
- iii) A candidate will lose his/her right to apply for a supplementary examination if (10.a.ii) is not fulfilled.

b. Supplementary examinations are normally held two weeks after the end of the final examination period.

c. Fee for Supplementary Examination

Administrative fee will be charged for the supplementary examination and no action will be taken to update the student record if payment is not settled. Please refer to the Table of Fees

for the relevant charges.

d. **Re-Sit Examination**

Resit examinations are not applicable to students admitted or resuming in academic year 2016/2017 onwards.

11. Appeal

- a. A candidate requesting a review of his/her examination performance will commence his/her appeal by sending to the office of his/her academic unit a letter stating the grounds of the review and presenting relevant evidence within three weeks of the issue of the academic reports.
- b. A complaint about the academic judgment of an examiner or an Academic Council/Pedagogic Committee cannot be considered as valid grounds for an application for review.
- c. Every appeal case will be reviewed through the Academic Council/Pedagogic Committee only once and their conclusion will be the final decision of the case.
- d. The academic unit concerned will inform the student in writing of the decision in each case.
- e. Under no circumstances will the examination script be released.

12. Cognizance of Examination Rules

Every candidate will be deemed to have both understood and accepted these examination rules.

ACADEMIC REGULATIONS AND RULES

Student Disciplinary Regulations of the University of Macau

(Approved by the University Council on 25 June 2014)

Article 1 Competence

1. These Internal Regulations are established by the University Senate in accordance with the provisions of Article 37 of the Charter of the University of Macau approved by the Executive Order No. 14/2006.
2. For the efficient performance of the power conferred by Sub-item (17) of Item 1 of Article 36 of the Charter of the University of Macau, approved by the Executive Order No. 14/2006, by virtue of the circumstances of any student disciplinary offence, the University Senate delegates the relevant power to the following authorities for disciplinary actions: Dean of Faculties, Head of Independent Academic Units, Dean of Students, Master of Residential Colleges, or the Student Disciplinary Committee.

Article 2 Scope of Application

These regulations apply to all students of the University of Macau.

Article 3 Offences

1. Any one of the following acts is considered as a disciplinary offence:
 - 1) any conduct seriously disturbing teaching, study, research, other academic activities, or operations of the University;
 - 2) any misuse of the facilities of the University, or unauthorized entry into or occupation of the reserved facilities of the University;
 - 3) any conduct detrimental to the reputation, liberty, safety or privacy of any member of the University (faculty, staff, students);
 - 4) any conduct detrimental to the reputation of the University;
 - 5) theft of or voluntary damage to the property of the University and its members;
 - 6) falsification or misuse of documents or records of the University;
 - 7) any form of cheating in assignments, tests, examinations, or violation of any of the regulations governing the conduct of examinations;
 - 8) any form of plagiarism in academic work;
 - 9) any misrepresentations or false statements made in any application or documents submitted to the University;
 - 10) failure to comply with directions of the University.
2. The nature, circumstances and consequences of the offences and the attitude of the offender shall be taken into consideration in imposing penalties.

Article 4

Disciplinary Authorities and Proceedings

1. The disciplinary authorities include: Dean of Faculties, Head of Independent Academic Units, Dean of Students, Master of Residential Colleges and the Student Disciplinary Committee.
2. Offences directly related to pedagogic issues shall be addressed to the Dean of the Faculty or Head of the Independent Academic Unit to which the student belongs.
3. Other offences shall be referred to the Dean of Students or Master of Residential Colleges, who shall handle the case or decide to refer it to the Student Disciplinary Committee.
4. The disciplinary authorities shall appoint a panel to investigate the offence or the complaint.
5. The panel shall have a minimum of three members, including representatives of Faculty, Independent Academic Unit or Residential College, Student Affairs Office and students.
6. The panel shall prepare a report not only to present the findings of its investigation but also to recommend related penalties.
7. The report shall be submitted within 10 working days after the appointment to this effect. The disciplinary authority concerned may decide to extend the time limit for the submission of the report for another 10 working days.
8. The related authority shall notify the student concerned in writing about the alleged offence in due course. The student may defend himself/herself within 10 working days after receiving the notification.
9. The disciplinary authority may require the student concerned to attend a hearing, or the student is entitled to request a hearing in his/her written defence. The disciplinary authority may also require other persons related to the offence to attend a hearing.
10. Default of the student shall not affect the decision made by the disciplinary authorities.
11. The disciplinary authority shall decide the case within 10 working days after hearing or receiving the student's defence. If additional proceedings are justified, the said period may be extended for another 10 working days.
12. All decisions made by disciplinary authorities shall be communicated in writing to the student concerned and recorded by the University.
13. The time limit for initiating disciplinary proceedings is one year after the offence was committed.

Article 5

Decision on Penalties Imposed by Disciplinary Authorities

1. The disciplinary authorities shall impose one or a combination of the following penalties on a student who has committed the offences defined in Article 3:
2. Penalties:
 - 1) attend educational or community programmes as deemed appropriate;
 - 2) receive verbal or written warning;

- 3) make restitution or compensation, where applicable;
 - 4) receive suspension from class, any academic or other student rights, benefits, privileges and/or rights of using facilities for a specified period of time;
 - 5) record demerit(s);
 - 6) result in expulsion.
3. A total of three written warnings will result in one demerit.
 4. A total of three demerits may result in expulsion from the University.
 5. Any case which may result in expulsion shall be reviewed by the Student Disciplinary Committee. Case of expulsion from the University shall be approved by the Rector.

Article 6 Accessory Penalties

The relevant authorities may impose accessorially the suspension or the loss of scholarship, prizes or other academic rights or benefits of the student.

Article 7 Student Disciplinary Committee

1. The Student Disciplinary Committee is a standing committee of the University Senate and the members shall be appointed by the University Senate.
2. The Student Disciplinary Committee is a disciplinary authority which shall review and comment on any expulsion cases and review cases handled by Dean of Faculties, Head of Independent Academic Units, Dean of Students, or Master of Residential Colleges.
3. The Student Disciplinary Committee may advise and make recommendations on student disciplinary matters of the University.
4. The Student Disciplinary Committee shall reach its decision by a simple majority, meaning more than half of the valid votes cast.
5. The Student Disciplinary Committee shall consist of the following members:
 - 1) The Dean of Students, who shall be the Chair;
 - 2) The Registrar or his/ her representative;
 - 3) Two full or associate professors, recommended by the Rector;
 - 4) One administrative unit head, recommended by the Rector;
 - 5) One representative of the University of Macau Students' Union.
 - 6) One representative of the University of Macau Postgraduate Association.
6. The Student Affairs Office shall provide the Student Disciplinary Committee with the necessary technical and administrative support.
7. Conflict of interest with the student under investigation shall be avoided in the formation of the Student Disciplinary Committee:
 - 1) All members shall have no conflict of interest with the student;
 - 2) Members listed in Sub-items 1), 2), 5) and 6) above shall be represented by their delegate should they have any conflict of interest with the student, the delegate shall be appointed by the Rector.

Article 8

Appeal Process

1. An appeal against the decision that results in penalty imposed by the disciplinary authorities may be submitted to the Student Disciplinary Committee within 10 working days. Appeals must be in writing.
2. The Student Disciplinary Committee shall appoint an appeal panel of three members representing faculty, staff and students to handle the appeal case. The panel shall have no previous intervention in that specific case.
3. An appeal against the decision that results in penalty imposed by the Student Disciplinary Committee may be submitted to the Vice Rector (Student Affairs) within 10 working days. Appeal must be made in writing.
4. The Vice Rector (Student Affairs) shall appoint an appeal panel of three members, representing faculty, staff, and students to handle the appeal case. The panel shall have no previous intervention in that specific case.
5. The appeal panel shall review the case and make its recommendation.
6. The decision made by the Vice Rector (Student Affairs) is final.
7. When the decision involves expulsion penalty, the case shall be approved by the Rector.

Article 9

Report to the Academic Unit and Other Authorities

1. Any penalty imposed on a student shall be reported to the faculty or the Independent Academic Unit concerned and the Student Affairs Office or the Residential College. The record of the student will be taken into consideration before the award of any scholarship, prize and/or privilege.
2. Any penalty imposed on a student may be shared with the parents or guardians of the student depending on the nature of the case.
3. According to the law, any criminal or serious case shall be reported to the Rector and the authorities of justice of the Macao Special Administrative Region.

Article 10

Confidentiality

All the information of student disciplinary cases is strictly confidential. Disclosure of such information must be duly justified and approved by the Student Disciplinary Committee or the Vice Rector (Student Affairs) in writing.

Article 11

Revision

These regulations are subject to revision by the University Senate.

Article 12
Other Specific Regulations and Rules

These Student Disciplinary Regulations do not prejudice the application of other specific regulations and rules and the penalties of academic and administrative units that are approved according to the regulations of the University.

Rules on Handling Student Academic Dishonesty

(Approved by the Rector on 06 December 2011)

I. Types of Academic Dishonesty

This section aims to provide UM students an understanding of the most common types of academic dishonesty, with a focus on plagiarism.

Academic dishonesty may be broadly defined as any fraudulent actions or attempts by a person to use unauthorised or unacceptable means in any academic work. It is any type of cheating that occurs in relation to an academic exercise and can come in many different forms including cheating, fabrication, collusion, and plagiarism.

The following are some examples of academic dishonesty. These examples, however, are by no means exhaustive:

1. **Cheating** is intentionally using or attempting to use unauthorised materials, information, or study aids in any academic exercise. It includes but is not limited to:
 - Copying from another student during an exam or on an assignment;
 - Giving or receiving information during an exam;
 - Using unauthorised material during an exam;
 - Obtaining exam questions and/or answers from a student who has already taken the exam;
 - Asking someone to take an exam or write a paper on his/her behalf;
 - Collaborating on homework assignments, take-home tests and quizzes without authorisation from the instructor;
 - Submitting the same paper/thesis, or substantial portions of the same paper/thesis, for credit or degree more than once.
2. **Fabrication** is the invention or falsification of sources, citations, data, or results and recording or reporting them in an academic exercise. Examples include:
 - Citing a source that does not exist;
 - Making up or falsifying evidence or data or other source materials;
 - Falsifying research papers or reports by selectively omitting or altering data that do not support one's conclusions or claimed experimental precision.
3. **Collusion** is facilitation of dishonesty by helping other students engage in academic dishonesty. Though the facilitator may not benefit personally from providing assistance to another, the facilitator's act similarly violates academic integrity. Examples of collusion include:
 - Knowingly or negligently allowing one's work to be used by other students without prior approval from the instructor;
 - Knowingly allowing others to copy answers in exams, tests and other assignments;
 - Taking an exam or writing a paper for another student.
4. **Plagiarism** is defined as the appropriation of another person's ideas, processes, results or words without permission and/or due acknowledgment. It covers all forms of work submitted to the University for assessment (assignments, essays, take-home examinations, projects, theses and all other forms of coursework). Plagiarism is intellectual theft. When using another person's words, ideas or results, whether such words, ideas or results have been published or not, one must obtain permission and/or give that person appropriate credit, or else one will be stealing the intellectual property belonging to another.

II. Plagiarism

Plagiarism has become more serious with the relative ease of reproducing information that is readily available from the Internet. Students have been discovered to have 'cut and pasted' materials from various electronic sources and passed them off as their own. In academia, plagiarism is regarded as academic dishonesty and a serious offence. Like other forms of academic dishonesty, students who have committed plagiarism will face disciplinary measures ranging from an F grade to expulsion from the University. Students are expected to read the Regulations of the Student Discipline of the University of Macau for the mechanism for handling student disciplinary cases.

Some students have claimed that they were not aware of committing plagiarism. Inadvertent plagiarism is nonetheless considered an offence. Lack of awareness is no excuse, and plagiarism, whether intentional or inadvertent due to ignorance or carelessness, is still a violation of academic integrity. After all, plagiarism is a simple concept of copying without proper acknowledgement. The University has made the Rules easily accessible and all students are expected to read and follow it. If any student has any questions about plagiarism or other issues pertaining to academic integrity, he/she should consult the instructor.

We must be careful to recognise the people from whom we borrow ideas, just as we expect others to acknowledge the ideas that we ourselves have worked hard to develop. To avoid plagiarism, every direct quotation must be identified by quotation marks or appropriate indentation and both direct quotation and paraphrasing must be cited properly according to the accepted format for the particular discipline or as required by the instructor in a course.

Obviously, if you make a copy of an assignment done by a classmate and submit it as your own, you are guilty of plagiarism but there are many other forms of plagiarism. Some common examples of plagiarism are:

1. Verbatim plagiarism or word-for-word plagiarism
The most common type of plagiarism is copying word for word from a source (e.g. the published works, the essays or theses of other persons, etc.) without using quotation marks and without citing the source. Even if you add some words of your own around the text that you copied directly from a source, you must identify the quote by placing quotation marks around it in order to distinguish it from your own words, and you must also acknowledge the source by providing a citation.
2. Substantial copying with minor modifications
If you reproduce another person's text with only minor changes, such as adding/deleting a few words, rearranging the order of words or phrases, and changing the sentence structure (e.g. using passive voice to replace active voice in the original), and do not give proper attribution, you are committing plagiarism.
3. Mosaic plagiarism
If you copy phrases or sentences from a source or a variety of sources or merely change a few words here and there, and then join those bits and pieces together without carefully identifying the quotes with quotation marks and citing the sources, the result is a mosaic of other people's ideas and words. You are responsible for making clear distinctions between your ideas and the ideas of the others who have informed your work and for following the correct citation style to avoid plagiarism.
4. Apt phrase
If you use an author's distinctive term or phrase without proper attribution, it is plagiarism. If you want to use the author's original words, you must put those words in quotation marks and provide a citation.

5. Paraphrase

Paraphrasing means taking another person's ideas and putting those ideas in your own words. Paraphrasing does not mean replacing a word or two in someone else's sentence with synonyms. When you paraphrase, your task is to distill the source's ideas in your own words and restate the ideas in your own words. It is a fine way to use another person's ideas to support your own argument as long as you attribute the material to the author and cite the source. However, if you rephrase someone else's text in your own words without attribution, you will be representing someone else's ideas as your own and that is plagiarism.

The rule of thumb here is simple: Whenever you use published ideas that are not your own, you need to give credit to the source and cite properly according to the accepted format for the particular discipline or as required by the instructor in a course (For unpublished ideas, on top of the above, you need to obtain permission from the author(s).). Make sure that the sources are properly referenced. Plagiarism occurs when you present as your own work, without due acknowledgment, any material that was obtained from another source, regardless of how or where you acquired it, and regardless of whether you committed plagiarism intentionally or unintentionally.

It is every student's duty to find out what plagiarism is. The University has set out these rules to provide more information but the above illustrations may not cover every situation. There are books explaining plagiarism and guides to referencing in the UM Library. If you feel uncertain about what constitute plagiarism and how to avoid it, consult your instructor or the Librarian.

Advanced technology has made plagiarism easier. At the same time, advanced technology has also made detection of plagiarism easier for instructors. It is highly likely that your fellow classmates are also referring to the same texts, and your instructor has probably read the sources before reading your paper. When you copy, the shift in writing style will also be obvious to your experienced instructor. Avoid plagiarism by all means. The University would like to remind all students that plagiarism is theft of someone else's work and it ruins the purpose of education. If you resort to copying due to pressure to meet assignment deadlines or insufficient understanding of the subject, or if you have difficulty in writing your paper and citing your sources properly, consult your instructor.

Submission of assignments, papers and theses electronically via UM's e-learning management system, namely UMMoodle, or another software system as prescribed by the University, is strongly advised across the entire University. With the integration of UMMoodle and the plagiarism prevention tool, Turnitin, made available to all UM teachers, instructors can now more easily evaluate the originality of students' works by comparing them with online sources and Turnitin-owned sources. For postgraduate theses, supervisors and examination committees at UM are strongly advised to check the submitted theses using the designated plagiarism detection software before proceeding with an examination even if the theses have not been submitted via UMMoodle. Should any student feel uncertain about how to submit assignments and theses via UMMoodle, please consult one of the UM staff members at the helpdesk of the Information and Communication Technology Office.

Effective from 1 January 2012, it is a university-wide requirement for students to submit a signed statement together with their theses (and other assignments as requested by individual teachers) to declare that they have not committed any type of academic dishonesty in their works and that they have included proper citations for all those materials extracted from other sources (see below a template for such a self-declaration). It is students' responsibility to ensure that they have not committed any type of academic dishonesty, instead of waiting for their instructors to check and 'police' them.

Self-declaration template:

I declare that the thesis/assignment here submitted is original except for the source materials explicitly acknowledged and that this thesis/assignment, or parts of this thesis/assignment have not been previously submitted for the same degree/course or for a different degree/course.

I also acknowledge that I am aware of the Rules on Handling Student Academic Dishonesty and the Regulations of the Student Discipline of the University of Macau.

III. Procedures for Handling Student Academic Dishonesty

1. If the instructor suspects a student of committing an act of academic dishonesty in any academic exercise submitted for assessment, he/she can meet with the student individually and impose sanction(s) as appropriate except those as prescribed by the relevant regulations, if he/she believes that the nature of such act is not serious.
2. If the instructor suspects that a student has committed an act of academic dishonesty in any academic exercise submitted for assessment and considers the case more serious or complicated to be handled by himself/herself:
 - a. The instructor should report the matter as soon as possible, together with any relevant evidence, to his/her Department Head concerned or Programme Coordinator concerned in the absence of a Department Head;
 - b. The Department Head/Programme Coordinator should attach his/her comments, if any, and forward the case to the Dean/Director for handling.
3. The Dean/Director or his/her delegate should meet with the student and any other relevant parties to investigate.
4. After the meeting with the student and any other relevant parties, if the Dean/Director or his/her delegate is satisfied that no act of academic dishonesty has been committed, no further action will be taken and the case will be closed. A written report of the case should be kept by the academic unit concerned for record purpose.
5. If the student is proven guilty of the alleged offence, the Dean/Director may impose the following sanction, according to Item 1 of Article 5 of the Regulations of the Student Discipline of the University of Macau, either singly or in combination as deemed appropriate, and the result will be reported in writing to the Student Disciplinary Committee for record:
 - a. Verbal or written warning;

-
- b. Reprimand;
 - c. Restitution or compensation, where applicable;
 - d. Suspension of any academic or other student rights, benefits, privileges and/or rights of using facilities for a specified period of time;
 - e. Recording a demerit.
 6. The Dean/Director should inform the student in writing of the judgment and the sanction(s) and send the notification to the student by registered mail. The Dean/Director should also inform the Department Head/Programme Coordinator concerned of the disciplinary decision in writing. The case will then be closed at the academic unit level.
 7. If more severe sanctions are deemed necessary, the case will be sent to the Student Disciplinary Committee via the Dean/Director in accordance with Item 2 of Article 5 of the Regulations of the Student Discipline of the University of Macau, for the Committee to decide on the appropriate sanction. The composition of such Committee shall be defined by Item 1 of Article 9 of the Regulations of the Student Discipline of the University of Macau.
 8. Under the following circumstances, the academic unit may consider bringing the case to the Student Disciplinary Committee for further investigation and decision:
 - a. The Dean/Director or his/her delegate believes that he/she is not able to make a decision based on the available evidence;
 - b. The case is too severe or complicated to be handled by the academic unit concerned;
 - c. The case involves persons who are not members of the university community.
 9. If the Student Disciplinary Committee finds the student not guilty after an investigation, the case will be closed. A written report of the case should be kept by the Student Disciplinary Committee and a copy shall be sent to academic unit concerned for information and record.
 10. If the Student Disciplinary Committee finds the student guilty of academic dishonesty after an investigation, it may impose, apart from the sanctions in 5 (b)-(e) above, the following sanction in accordance with Item 1 of Article 6 of the Regulations of the Student Discipline of the University of Macau, either singly or in combination as deemed appropriate:
 - a. Suspension from the University for a specified period of time;
 - b. Expulsion from the University.
 11. Under special circumstances and subject to approval by the relevant authority, the Rector may impose on students/graduates sanctions which are not stipulated in the internal regulations and rules of the University of Macau, including but not limited to:
 - a. An F grade for the course taken;
 - b. Removal of course credits;
 - c. Retraction of a qualification granted by the University.
 12. In deciding on the sanction, the nature and gravity of the offence should be taken into account (such as the amount of work plagiarized, whether the offence is premeditated, etc.). The number of previous offences also needs to be taken into account. More serious punishments should be imposed for repeated offences.
 13. The Student Disciplinary Committee should inform the student in writing of the judgment and the sanction(s) and send the notification to the student by registered mail. The Student Disciplinary Committee should also inform the Dean/Director concerned, the Registrar and the Dean of Students of the disciplinary decision in writing.
 14. Any sanction imposed on a student according to the Regulations of the Student Discipline of the University of Macau should be filed with the academic unit concerned and kept as part of the student's file.
 15. To denote that the student has committed an academic offence in the course, a notation of
-

- academic dishonesty can be included on the student's transcript, at the discretion of the Student Disciplinary Committee. At the discretion of the academic unit concerned or the Student Disciplinary Committee, the student may be informed that the notation will be removed at graduation if he does not commit more than one offence. However, if he commits two or more offences, during the same term or in different terms, the notation will appear on the official transcript permanently.
16. An appeal against any fact finding or any sanction imposed by the Dean/Director may be made within 10 working days to the Student Disciplinary Committee according to Item 1 of Article 10 of the Regulations of the Student Discipline of the University of Macau. Appeals must be in writing and the proceeding and final decision with respect to the appeal should follow the stipulations in Items 5 to 8 of Article 4 of the Regulations of the Student Affairs of the University of Macau.
 17. An appeal against any fact finding or any sanction imposed by the Student Disciplinary Committee may be made within 10 working days to the Rector according to Item 1 of Article 11 of the Regulations of the Student Discipline of the University of Macau. Appeals must be in writing and the composition of the appeal panel, the proceeding and final decision with respect to the appeal shall follow Items 3-5 of Article 11 of the Regulations of the Student Affairs of the University of Macau.

Undergraduate Curriculum Model & General Education Programme

Undergraduate Curriculum Model & General Education Programme

The following undergraduate curriculum model was implemented from academic year 2019/2020 onwards:

Course Types		No. of Credits
1.	Major (CM + RE)	40 – 66
2.	Community and Peer Education (CPE)	3
3.	Languages and Skills [^] (L&S)	3 – 15
4.	General Education (GE)	24 – 27
5.	Free Elective (FE)	9 – 50
Minimum Credit Requirement		120

[^] Students who test out of the Languages and Skills course(s) are required to make up the credits by taking additional Free Elective(s).

Community and Peer Education

The Community and Peer Education courses focus on experiential learning. They are run jointly by the Faculties and the Residential Colleges (RC).

Community and Peer Education Courses	No. of Credits	Suggested Year Level
CPED1000 - Residential College Experiential Learning	1	1
CPED1001/1002 - Physical Education I/II	0.5 each	1
CPED2001 - Residential College Community Team Project	1	2

Languages and Skills

Languages and Skills is one of the components in the undergraduate curriculum model. It includes 0-9 credits of English language courses, 0-3 credits of Chinese and Portuguese language courses, and 3 credits of Information Technology course. Students can test out of some of the language course(s) but will be required to make up the credits by taking additional Free Elective(s).

¹ Compulsory General Education course for all students.

Rules Governing General Education Programme

(Approved by the Rector on 10 February 2017)

1. The number of required GE Programme credits is 24 to 27 credits depending on the individual Faculty/Programme. The distribution of GE credits among the four GE areas can be designed by individual Faculty/Programme.
2. Students must complete four compulsory GE courses:
 - Macao and Chinese Civilization in area of Global Awareness (3 credits)
 - Chinese Language and Culture in area of Literature and Humanities (3 credits)
 - Quantitative Reasoning in area of Science and Technology (3 credits)
 - Ethics, Values, Law and Society in area of Society and Behaviour (3 credits)
3. In addition to the four compulsory courses, students are required to complete the remaining GE credits (12 to 15 credits) among the four areas.
4. GE course credits cannot be double counted to satisfy other University or Faculty/Programme credit requirement.
5. There are no GE substitution courses in this GE model.
6. Students registered in the old programmes (2016/2017 or before) will be allowed to take the new GE courses to fulfil the GE requirement if there is a mapping area for 2011/2012 model.
7. Students registered in this curriculum model will be allowed to take any additional GE courses to fulfil the free elective requirement.
8. Students must observe any additional rules on GE courses selection imposed by their Faculties/Programmes.

Course Description

Community and Peer Education

CPED1000 RESIDENTIAL COLLEGE EXPERIENTIAL LEARNING

This course is designed to enrich first-year students to collegial life, living and learning opportunities, and residential colleges learning goals at the University of Macau. It provides active learning opportunities which enable students to take responsibility for their transition to university and RC life. The course also serves the function of forming student learning communities, which, facilitated by RC faculty, encourage students to explore a wide range of experiential learning activities in RC competency areas (Citizenship with Global Perspective, Cultural Engagement, Healthy Living, Interpersonal Relations and Teamwork, Leadership and Service) while documenting and assessing their personal growth in an e-portfolio.

Pre-requisite: None

CPED1001/1002 PHYSICAL EDUCATION I/II

Physical Education consists of theory of fitness (Part I) and basic sport concepts, knowledge and skill practice in team sport and individual sport (Part II).

Part I covers sport relevant concepts including the function of sports in life, sports injury prevention & treatment and sport knowledge. Students will learn theory, principle and regulation in fitness and know how to do exercise and workout regularly.

Part II focuses on skill-based physical fitness which includes one team sport and one individual sport.

Students will be guided to apply the concept of fitness sport theory and game strategy with skill when they learn sports for participating in sport and sport practice continuously.

Pre-requisite: None

CPED2001 RESIDENTIAL COLLEGE COMMUNITY TEAM PROJECT

This course offers students practical experience in communication and leadership through experiential learning in a community team project. Students of different majors will complete a creative team project on an assigned topic to promote specific positive values pertaining to RC character education to an identified audience in the society under the supervision of RC academic staff and the support of community partner(s). They need to acquire related knowledge of the positive values and the targeted audience as active learners themselves during the process. The student teams need to document their project outcomes in electronic form and make physical or online presentations reflecting on the learning process of the team project.

Pre-requisite: None

Languages and Skills

English Language

EELC1011 UNIVERSITY ENGLISH I

This is a one-semester Academic English course for elementary English language level students. Students have six class hours, one tutorial hour and an e-learning requirement. This course introduces basic academic listening, speaking, reading and writing skills through students' active participation in diverse and intensive academic and discipline-related activities and assessments at an appropriate elementary level. Simple academic texts and discipline-related materials

enhance students' accurate use of basic grammar structures, enlarge their vocabulary and facilitate their development of language skills for a variety of academic contexts. The course provides a foundation for students to develop the academic English skills and abilities necessary for studying at the university level in English.

Pre-requisite: None

EELC1012 UNIVERSITY ENGLISH II

This is a one-semester Academic English course for low-intermediate English language level students. Students have six class hours, one tutorial hour and an e-learning requirement. This course improves and consolidates academic listening, speaking, reading and writing skills through students' active participation in diverse and intensive academic and discipline-related activities and assessments at an appropriate low-intermediate level. Short academic texts and discipline-related materials enhance students' accurate use of more complex grammar and text structures, enlarge their vocabulary and facilitate their development of language skills for a variety of academic contexts. The course provides practice for students to develop the academic English skills and abilities necessary for studying at the university level in English.

Pre-requisite: EELC1011 or a required score in a placement test

EELC1013 UNIVERSITY ENGLISH III

This is a one-semester Academic English course for intermediate English language level students. Students have three class hours. This course develops and reinforces academic listening, speaking, reading and writing skills through students' active participation in diverse and intensive academic and discipline-related activities and assessments at an appropriate intermediate level. Academic texts and discipline-related materials enhance students' confident use of appropriate grammar and text structures, enlarge their vocabulary and facilitate their development of language skills for a variety of academic contexts. The course provides students with the academic English skills and abilities necessary for studying at the university level in English.

Pre-requisite: EELC1012 or a required score in a placement test

EELC2008 ACADEMIC ENGLISH: SPEAKING

This is a one-semester Academic English course for students with an intermediate English language level. Students have three class hours every week. The course requires students to apply the skills they have learned in previous University English or Academic English course(s). Additionally, students will learn to use introductory academic speaking skills. These skills include: logical persuasion, information sharing, meeting facilitation, impromptu speaking, and responding to questions. Students are expected to analyze sample academic speeches/presentations for discipline-specific academic features in preparation for advanced academic speaking. Depending on students' disciplines, they will be introduced to different genres in academic speaking (e.g. oral reports, persuasive/informative speeches, poster presentations, discussions, and oral reflections, etc.).

Pre-requisite: EELC1013 or a required score in a placement test

EELC2009 ACADEMIC ENGLISH: WRITING

This is a one-semester Academic English course for students with an intermediate English language level. Students have three class hours every week. The course requires students to apply the skills they have learned in University English or Academic English course(s). Additionally, students will learn to use introductory academic writing skills. These skills include: writing summaries and responses, conducting secondary research, evaluating sources, documenting the research process, considering the rhetorical situation, making an argument, paraphrasing from sources, using academic language, and writing coherently. Students are expected to analyze sample academic text for discipline-specific academic features in preparation for advanced academic writing. Depending on students' disciplines, they will be introduced to different genres in academic writing (e.g. essays, reports, case studies, research proposals, book reviews, literature reviews, reflective writing, etc.).

Pre-requisite: EELC1013 or a required score in a placement test

EELC2010 ACADEMIC ENGLISH: PROJECT-BASED LEARNING

This is a one-semester Academic English course for students with an intermediate English language level. Students have three class hours every week. The course requires students to apply the skills they have learned in University English or Academic English course(s). In groups, students will learn to use introductory academic writing and speaking skills to design and implement their multigenre/multimodal projects. These skills include: primary/secondary research, critical thinking skills, problem-solving skills, writing/presentation skills, teamwork, etc. Through experiential learning, students will be guided to observe, collect information, persuade, and generate a writing/speaking product.

Pre-requisite: EELC1013 or a required score in a placement test

EELC2011 ENGLISH SPEAKING FOR ACADEMIC RESEARCH

This is a one-semester academic speaking course for students with an upper-intermediate English language level. Students have three class hours every week. The course also addresses the information literacy and higher-order thinking skills necessary for conducting extensive secondary research, constructing ideas, providing evidential support, and structuring ideas coherently in spoken academic settings. Students develop both verbal and non-verbal communication in small and large group academic settings. Students will critically evaluate their own and others' performances, and will learn how to utilize a variety of technology enhanced communication tools. Other skills addressed in this course include critical thinking and argumentation.

Pre-requisite: EELC2008, EELC2009, EELC2010 or a required score in a placement test

EELC2012 ENGLISH WRITING FOR ACADEMIC RESEARCH

This is a one-semester academic writing course for students with an upper-intermediate English language level. Students have three class hours every week. This course addresses the information literacy and higher-order thinking skills necessary for conducting extensive secondary research, providing evidential support, and structuring ideas in coherent written academic texts. Students spend time responding to multiple drafts of peer academic papers to improve precision and clarity in the writing process. Other specific skills addressed in this course are critical thinking and argumentation.

Pre-requisite: EELC2008, EELC2009, EELC2010 or a required score in a placement test

EELC2013 ENGLISH INTEGRATED SKILLS FOR ACADEMIC RESEARCH

This is a one-semester integrated academic language course for students with an upper-intermediate English language level. Students have three class hours every week. Students will engage in data gathering, analysis and interpretation skills and communicate research results effectively in academic presentation or report formats. Students will critically evaluate their own and others' performances, and will learn to utilize a variety of technology-enhanced tools to aid in preparing and communicating academic concepts and findings. Upon completion, students are expected to have acquired a basic understanding of primary academic research methods and have developed techniques to effectively communicate concepts and research results.

Pre-requisite: EELC2008, EELC2009, EELC2010 or a required score in a placement test

Chinese or Portuguese Language

CHLL1000 UNIVERSITY CHINESE

This course covers topics such as characteristics of Chinese language, its significance as one of the global languages, its relationship with Chinese cultures and communities, and its expression in Chinese literature and practical usage. The focus of the last topic may change in accordance with the expertise of individual instructors, possible areas including traditional Chinese poetry, traditional Chinese fiction and drama, modern Chinese literature, contemporary Chinese literature, and Chinese literature in the world. This is a discussion-oriented, student-centered course in which all students are expected to engage in class discussions and critical analysis of the reading

materials. Those reading materials will be focused on the different diversity courses techniques of those students from different majors. Presentation and communication techniques will also be gained.

Pre-requisite: None

PORT1000 PORTUGUESE LANGUAGE I - INTRODUCTORY PORTUGUESE

Principles of written and oral language. The comprehension and conversation through exercises in the class and language laboratory. The grammar fundamentals obtained through the use of simple pronunciation and reading materials.

Pre-requisite: None

Information Technology

CISC1000 INFORMATION TECHNOLOGY FUNDAMENTALS AND PRACTICES

This foundational course introduces and explores the impact of information technology (IT) in our modern society. The course is designed to provide the fundamentals and practices for an effective use of IT in our daily lives. The course is divided in three modules:

- Module I introduces the fundamentals of IT, the Internet and the Web, connectivity and mobility, and important issues in computer privacy, security and ethics.
- Module II focuses on application software for computers and mobile devices.
- Module III explores computer hardware and computer software, mobile devices and apps, communication and networking.

Pre-requisite: None

General Education Programme

Global Awareness

GEGA1000 MACAO AND CHINESE CIVILIZATION

This GE course will provide an introduction to the history of Macao, focusing on the global processes that impacted the city's development and how this in turn helped shape the course of Chinese history from the sixteenth century (1500s) to the present. The aim is for students to engage with the history of Macao from international and local perspectives to gain an introductory understanding of the role Macao has played in the intertwined histories of China and Eurasia. Through this, students should gain an appreciation for Macao's role in mediating China's relations with the wider world and how this has impacted China's transformation and development. This course should help students understand how Macao's unique political, economic, and social position affected China's national development as well as the evolution of the Greater Bay Area.

Pre-requisite: None

GEGA1001 LANGUAGE AND GLOBALISATION

This course will introduce students to the development of historical and contemporary world languages. The rise and decline of several historically significant world languages (e.g. Latin, Portuguese, English, etc.) will illustrate the historical forces that shape the forms and function of world languages. The course will consider both standard and non-standard varieties of world languages as well as the socio-cultural factors related to the development of a standard language.

Pre-requisite: None

GEGA1003 GLOBAL JUSTICE AND THE CREATIVE ECONOMY

Is there and can there be "global justice"? Can someone lie and say the truth, be guilty and

innocent, smile and glower, be happy and sad, or happy and poor as well as sad and rich at the same time? What defines and drives the “creative economy”? Is it money and profits, work or satisfaction, or physical or mental labour, efficiency or creativity, or competition or cooperation? And how are global justice and the creative economy intertwined? These are only a few selected questions that point to a deeper problem encountered in the 21st century, which was also referred to as the Age of Paradox (Handy, C., 1995). It is a problem that also connects the two concepts “global justice” and “creative economy”. Already each of the two concepts alone currently poses serious challenges to individuals, municipalities, regions, states as well as the world community as a whole. In combination, the complexity of their meaning rises drastically, often leading to a sentiment of confusion, paralysis, or disorientation. Thus, the challenges they pose are reflected in the many thousand decisions that we take on a daily basis, whether consciously or unconsciously, individually or collectively, as well as wisely or foolishly. The two concepts have in common their nature as, what has been called, “essentially oxymoronic concepts”, which are oxymora, contradictions in terms, or paradoxes. These essentially oxymoronic concepts all share that, by uniting apparently opposite statements or truths, their meaning contains some varying degree of contradictions, which pose a problem to a classical or binary logic of someone being either right or wrong, but not both at the same time.

In the case of ‘global justice’, the contradiction can be found in the presumption that “justice” is already difficult to establish within a single country or its legal system and even more so at the global level, with its multitude of different legal systems, cultures and languages. Similarly, the term ‘creative economy’ has evolved from the oxymoron ‘culture industry’, i.e. two terms representing cultural activity on the one hand and economic activity on the other, which in the past were widely regarded as not only separate but also incompatible. Together they give rise to many more such concepts, like “glocalisation”, “coopetition”, or the many “paradoxes of happiness”, which, in line with the unique features of a place like the Macao SAR, will be discussed in the course from a both Eastern and Western perspective.

Pre-requisite: None

GEGA1004 GLOBAL HISTORY OF MEDICINE

Health is a crucial issue in global history. As nobody escapes disease and death, healing traditions have developed in all parts of the world. This course is a fascinating exercise in which we will explore, on the one hand, the development of medical thought, concepts and ideas as well as shifting patterns of medical practices and therapeutic treatments in world history. On the other hand, we will focus on the transmissions, interactions and exchanges of healing traditions, pharmacopeia and related religious worldviews, and this over a space stretching from Europe across Asia, from China and India to West Asia and the Americas. We will reflect on the close relationships between medical thought and the prevailing political, social, economic and cultural conditions that unavoidably shape man’s living conditions. Moreover, we will uncover that there are all-encompassing and cross-cultural parallelisms showing that civilizations and cultures are not discrete and unalterable units, but have been subjected time and again to external influences and impacts. With a true interdisciplinary and comparative approach and with due attention paid to primary sources this course aims at promoting an awareness of the historical forces that have moulded, and continue to shape, medicine in the world and that help us to reach a deeper understanding of what defines modernity. This general education course is conceived to be an interactive forum in which for some of the individual sessions a selected number of international Eastern and Western specialists in the history of medicine and medical humanities will present their innovative perspectives.

Pre-requisite: None

GEGA1006 GREEN ENERGY FOR GLOBAL SOCIETY

The course will focus on the challenging issue that our human being is facing – The Energy. The course will talk the importance of energy to our future society, energies in old forms (such as oil and coal) and their detrimental effects, and the solutions to the challenge in the future. The contents will cover all of the green energies, including solar energy, wind energy, hydrogen energy, tidal energy, hydroelectricity, Biomass, Geothermal Power, and others (such as ocean, and hot hydrogen fusion), and energy storage. In addition, topics on air pollution and global warming will

be investigated.
Pre-requisite: None

GEQA1007 NUTRITION IN HEALTH AND DISEASE

This course aims to provide the understanding of how nutrition advances are made and a view of the relationship between diet, nutrition and disease in detail. It also introduces the role of nutrition in global health. There is now a large body of evidence demonstrating that the satisfaction of nutritional needs is mandatory to human life. This course includes the dietary causes of chronic diseases related to lifestyle, such as hypertension, coronary heart disease, diabetes, obesity, and cancer. The course covers the methodology used to determine dietary, nutritional and health status and how evidence is gathered to determine the links between diet, nutrition and health.

Pre-requisite: None

GEQA1008 POLITICS IN PORTUGUESE-SPEAKING COUNTRIES

This course has been designed to promote and encourage the Portuguese-speaking countries' (PSC's) scientific study, adopting both perspectives: International Relations and Political Science. The PSC will be organized in three groups (Portuguese-speaking small developing island states, African Portuguese-speaking countries and Ibero-American Portuguese-speaking countries), taking into consideration their intrinsic characteristics and regional location.

The study theoretical framework will be grounded in the post-colonial studies, regional development and globalization, and focus on the post-independence political, economic and social developments. Finally, this course also aims to encourage further post-graduate research on PSC in specific or thematic areas.

Pre-requisite: None

GEQA2001 GREATER CHINA AND THE GLOBAL ECONOMY

Greater China includes Mainland China, Hong Kong, Macao and Taiwan. This course introduces to students the background and features of each region within Greater China. It especially covers the social and economic changes of Mainland China in the pre- and post- reform periods, its economic structure, its 5-year plans, and their implications for Asia and the entire world. The reform & opening-up policy, foreign direct investment, and international trade have transformed Mainland China into a significant global trader. Its social and economic integration with Hong Kong, Macao, and Taiwan is being deepened through CEPA, ECFA, and other agreements. Renminbi as an emerging reserve currency, the One-Road-One-Belt strategy, the Asian Infrastructure Investment Bank, and the new four China Free Trade Zones are the latest events of development important for economies and society in the Asian and European continents. All these topics will be discussed in this course.

Pre-requisite: None

GEQA2002 EDUCATION AND GLOBALIZATION

Globalization has become a centerpiece in our times when increasing economic, cultural, and educational interconnections propel nations and citizens to think globally and act locally. Drawing on international scholarship, this course aims to help students make sense of this multi-faceted phenomenon of globalization and examine key themes, issues, and trends that affect education around the world. A variety of topics will be discussed and students will be given opportunities to reflect and analyze their own educational system in relation to these themes and issues. No prior course work on related topics is required.

Pre-requisite: None

GEQA2003 GLOBAL MEDIA

The course aims to provide students with a set of literacies specific to the cultural field of the global mass media. Most of the information and knowledge, and also the ideas, opinions and attitudes, which students have about the world are derived from (increasingly digitally linked) media outlets and sources. However, while students utilize the media intensively, they do so with a relatively undeveloped (often merely tacit) understanding of the field's logics, values, discourses,

genres and forms of address. Consequently students lack the ability to distinguish between different sources and levels of information, and have little idea how to critically evaluate the representations and presentations provided through the media. In this course students will learn about the mass media as a cultural field, and how to approach and utilize it as informed and literate users. This level of literacy will be demonstrated in a project that they will be required to complete at the end of the semester, and also in oral presentations that groups will give on selected case studies. The course will also have a strong visual literacy component, whereby students will learn how audio-visual texts utilize combinations of visual, spoken and written language and signs to produce meanings and narratives for, and to hold the attention and influence the ideas and practices of, media audiences. Part of the feedback from the oral presentations will be directed to the kinds of literacies and techniques that help produce effective audio-visual texts: in this way the course will help students to learn both analytical & practical oral, visual and written communication literacies.

Pre-requisite: None

GEGA2004 INTERCULTURAL COMMUNICATION

This course provides an introduction to how people communicate across cultures. It will look at examples of, and the reasons for, successful and unsuccessful cases of intercultural communication. This course aims to provide students with the tools they need to become competent and confident communicators across a range of intercultural communication contexts. There will also be a focus on how communication and culture shape each other, and how various socio-cultural factors and issues affect and are affected by communication.

Pre-requisite: None

GEGA2007 EMPIRES AND OVERSEAS EXPANSION

This course area is designed to provide a general understanding of some of the key problems facing the modern world. In an attempt to understand the rise of modern-day 'superpowers', this course will focus on the historic role of 'Empires' and 'Overseas Expansion' in affecting political, economic, social and cultural development throughout the world in the modern period. Through an exploration of this process we will explore how empires (European and Asian) did not simply carry or enable global processes but rather how they gave rise to new hybrid forms of economic activity, political practice and cultural expressions.

Pre-requisite: None

GEGA2008 HISTORY OF GLOBALIZATION

The contemporary issue that we will focus upon in this class is globalization. Globalization has long historical roots; some say reaching back 500 years and others even earlier, but no-one can deny that the current globalism is overwhelming in its impact upon the local. From the literature, we can see that globalization has numerous vectors, social, economic, environmental and political. Globalization also has its opponents as well. By taking a long duration approach - and with Macao as a ready example - this course seeks to reveal how many of the problems associated with globalization can only be understood with reference to the global past.

Pre-requisite: None

GEGA2010 MIGRATION AND MULTICULTURAL SOCIETY

Migration is a fundamental feature of our lives. In Macao, our ancestors and family may have left home, settled and created a migrant society together with other groups. In the era of globalization, technological development facilitates further mobility, but new control mechanisms and borders also increasingly regulate and limit our mobility. This course offers a holistic view of the migration process from multiple perspectives. We will introduce macro factors structuring migration patterns and volume; how problems and crisis such as refugees and human trafficking affect the global politics and international relations. We will discuss migration policies of different countries and how they condition the migrants' entry, exit, settlement and entitlement to citizenship, as well as societal views toward different migrant groups. Students will also learn to look at migrants' identities and social networks through their own migration experiences or their family's migration history.

Pre-requisite: None

GEGA3000 GLOBAL BUSINESS AND CULTURES

Businesses, especially multinational corporations, play prominent role in the increasingly globalized world.

This course will therefore analyze how the contemporary global business environment and the free market economy has been evolving since the first publication of Adam Smith's "The Wealth of Nations" in 1776 and the world's first stock exchange invented by the Dutch in 1602 (i.e., Amsterdam Stock Exchange). As the contemporary business environment is highly globalized, this course will also adopt a cultural perspective on how to deal with counterparts from different parts of the world. Specifically, how different nations' cultures and the organizational cultures interact and affect the behaviors of employees will be discussed. The aim is to equip students a thorough understanding of how the contemporary business environment has been evolving and the skills to adapt to the latest development of globalization with cultural sensitivity. In addition to exposing to these historical, cultural and managerial dimensions of global business environment, students will also learn what modern business corporations need to adapt in the global business environment and develop individual sensitivity and competence in the global work context.

Pre-requisite: None

GEGA3001 UNDERSTANDING INTERNATIONAL POLITICS

The field of world politics presents us with some of humanity's most difficult problems. Why do wars happen? Why are some countries rich and others poor? Why is it so hard to get countries to cooperate? Is change possible in world politics or is humanity doomed to repeat the same political drama over and over again? This course introduces students to the fundamentals of international relations theory and how to employ theory to analyze important topics in world politics, such as the development of international institutions, the causes of war, transnational norms, and the role of non-state actors.

Pre-requisite: None

GEGA4000 GLOBAL POLITICS AND WEALTH

This course examines the political process of international economy, and the interaction between state and market, and between power and wealth in international relations. The course will present:

1. the history of international political economy;
2. basic theories and different schools and approaches;
3. analysis of basic issues on trade, investment, development, globalization and regional integration; and
4. examination of the interactions between the rising China and the global economy.

Pre-requisite: None

Literature and Humanities

GELH1000 CHINESE LANGUAGE AND CULTURE

This is an introductory course to key features of Chinese language and culture, with a special focus on the interplay between language and thought. The course will present studies on how Chinese language influences Chinese ways of thinking, how it shapes our understanding of Chinese culture, and how it gives rise to debates regarding the comparison between Chinese and Western philosophy.

Pre-requisite: None

GELH1010 CHINESE LANGUAGE AND CULTURE (FOR INTERNATIONAL STUDENTS)

This is an introductory course to key features of Chinese language and culture, with a special focus on the interplay between language and thought. The course will present studies on how Chinese language influences Chinese ways of thinking, how it shapes our understanding of Chinese culture, and how it gives rise to debates regarding the comparison between Chinese and Western philosophy.

Pre-requisite: None

GELH1001 CHINESE LANGUAGES AND CHINESE COMMUNITIES

In this course the students expand their knowledge of Chinese languages and Chinese communities and understand language phenomena as an expression of culture and as a function of society. Through readings, discussions and mini-projects the students apply the sociolinguistics knowledge introduced to answer academic and practical questions. Global and local language situations are surveyed in a Chinese perspective and current issues in language matters are analyzed. Through problem-solving exercises, the students hone their skills of critical thinking, communication and collaboration.

Pre-requisite: None

GELH1002 POPULAR LITERATURE AND LIFE

Through classroom instruction for students to grasp the knowledge of Chinese Popular Literature such as: fiction, opera, folk song, etc. Topics such as the analysis and interpretation of texts, themes, psychology and sociological studies of selected masterpieces will be covered. Works discussed will focus on the connection with the life and experience of students, and include the different kinds of theme and genre of popular literature.

Pre-requisite: None

GELH1003 CONTEMPORARY ARTISTIC EXPRESSIONS IN THE PORTUGUESE-SPEAKING WORLD

In this course students will be introduced to the vibrant diversity of the artistic scene in the Portuguese-speaking countries, addressing the way they dialog with each other and establish multidirectional exchanges among them. The course will explore how the crosscurrents of artistic debate in the twentieth century have been particularly prolific in stressing the tension between tradition and innovation, center and periphery, convergence and divergence, especially in the aftermath to the postcolonial redefinition of these countries.

Pre-requisite: None

GELH1004 PORTUGUESE-SPEAKING COUNTRIES IN CONTEMPORARY WORLD

This course will explore the complex and diverse realities of the Portuguese-speaking world. Starting from an approach to the historical background of these countries and to the insertion of these communities in their specific regional contexts, students will be introduced to the multilayered relations between them, covering a range of dimensions such as the political, economic and cultural.

Pre-requisite: None

GELH1007 VISUAL AND PERFORMING ARTS - DANCE

In this course, students explore the current themes and issues in dance by participating in theoretical (lectures/tutorials), practical (studio/performance), and aesthetic (dance film appreciation/critique) classes. Students develop an awareness of the body through movement, dance improvisation, creative processes, choreography, interdisciplinary arts, language, and literature. Theoretical and aesthetic components help students develop analytical thinking skills while practical sections challenge them to think more deeply on dance and the role it plays in society. Classes focus on a range of activities that dancers and movement practitioners use to foster kinesthetic awareness, critical thinking, movement experimentation, play/outcome-based learning, and communication through body language.

Pre-requisite: None

GELH1008 TRADE, EMPIRE AND GLOBALIZATION

This course traces the historical origins of globalization, examining the long-distance trade and imperial expansion that increasingly linked regions of the world together from around the year 1500. The course follows these phenomena through the modern period and up to the present. It explores how the lives of people around the world have changed in response to the globalization of society, culture, politics, and the economy.

Pre-requisite: None

GELH1009 ATHENS AND JERUSALEM: PILLARS OF WESTERN CIVILISATION

This course introduces the Bible (Hebrew & Christian) and the Mythology of Greece and Rome – pillars of Western civilisation. Their somewhat different value systems are seen as a cause of tension between Athens and Jerusalem, a dynamic at the heart of Western culture. That relationship, and the mythologies arising from these dual systems will be examined in this semester-long course.

By looking at key stories from these dual mythologies, this course equips students to understand how Western values have been constructed and how even in the modern world its culture continues to draw on these foundational myths.

Students will study their use in art, music, language, architecture, philosophy and astronomy. While these stories are important in their own right, students will also learn to read art e.g., various depictions of the same story, and to understand the central role these myths continue to play in our world today.

Pre-requisite: None

GELH1011 PHILOSOPHY AND HUMOUR

This course offers an overview of humour in Western and Chinese philosophies. It looks at humour in philosophical works, as well as at philosophers' expressed attitudes to humour, and covers major contemporary philosophical theories and explanations of humour. Philosophy offers a great set of tools to help us understand humour, while, at the same time, humour is one of the most engaging ways to think on major philosophical questions.

Pre-requisite: None

GELH1012 ART APPRECIATION: A CLOSE READING OF MASTERPIECES

This is an introductory course concentrating on masterpieces of art to foster students' visual intelligence and artistic sensitivity. It engages students with artworks in various media, forms, and styles, guiding them to interpret art through viewing, reading, discussing, and writing. Focusing on media and styles, this course unfolds its content through the three sections of fine arts, including sculptures, ink paintings, and oil paintings. Appreciating art aesthetically and intellectually is an indispensable ability for students to better perceive and participate in our contemporary society where images play an increasingly significant role in mass communication and transcultural exchange worldwide. The goal of this course is to provide students with opportunities to develop an in-depth understanding of art and to cultivate an aesthetic appreciation and intellectual interpretation of the visually cultured world.

Pre-requisite: None

GELH2000 CREATIVITY AND WRITING: ENGLISH FOR A GLOBAL READERSHIP

In this course students learn to express themselves creatively through the medium of English. While the main emphasis is on story making, students experience a range of creative texts (including stories, poems, songs and films), as models for their own imaginative work.

Students will learn to write simple texts in key creative genres: for instance different types of poem, short story and life writing (biography and autobiography). Learning to tell and write stories, individually and in groups, students gain confidence in expressing themselves and in constructing a narrative from different points of view.

Working from lecture to discussion mode, class time is largely devoted to understanding how simple stories work and to practising basic techniques of storytelling. Group work, in-class performance and writing for a global audience are integral to the course. Reading and homework assignments set from week to week challenge the student to create engaging creative texts from memory and imagination. Assessment is by individual portfolio including an agreed combination of individual and group work in different genres.

Pre-requisite: None

GELH2001 SEX AND THE ARTS

Physical relationship presents itself one way or another in everyday life and discourse. This

course invites students to go beyond the biology and mechanics of human sexual behaviours and think about the aesthetics of eros as featured in the arts. Students will be introduced to an array of historical and contemporary representations, narratives and discussions of sex in visual arts (paintings, sculptures and films), music (from classical art songs and operas to hip hop lyrics and MVs) and literature. 'Sexuality in the Arts' considers how various forms of artistic creation reflect and shape perception and symbolism of sex in a range of historical and cultural domains. Material of discussion will be chosen from both Asian and Western contexts.

Pre-requisite: None

GELH2002 THE HOLOCAUST, GENOCIDE AND HUMAN RIGHTS

This course introduces students to the Holocaust, the systematic murder of the Jews of Europe by the Nazi regime between the years 1939 and 1945. In seeking to understand how the Holocaust happened, students will be introduced first to concepts like racial prejudice and other forms of discrimination, anti-Semitism, and the role of nationalism in creating concepts of the Other. The course will study the rise of the Nazi Party in Weimar Germany, its accession to power in 1933 and the systematic denigration of, and discrimination against, Jews from the years 1933 to 1939. The course will discuss the power of propaganda, the effects of discriminatory laws excluding Jews from all areas of public life and how these lead first to the mass murder of Jews in eastern Europe (Operation Barbarossa) and then the Final Solution, with the establishment of death camps, of which Auschwitz-Birkenau is but the most infamous. This course will also address the issue of genocide, how the Holocaust lead to the concept of genocide, first described as such by Raphael Lemkin in 1943 and subsequent international treaties seeking to prevent further genocides. The course will look at other genocides, including Armenia, Cambodia, Rwanda, and Darfur. Special attention will also be paid to the Japanese invasion of China, the Nanjing Massacre and Unit 731 in Manchuria.

Pre-requisite: None

GELH2003 VISUAL AND PERFORMING ARTS – DRAMA

This course consists of two major components: art introduction and drama. This course is designed to acquaint students with the vocabularies and concepts for critiquing and analyzing performing arts. It examines the functions of dramatic art from social and global perspectives, and it encourages students to develop judgment in analysis and criticism of drama as a performing art form. Students will gain an overview of the generic concepts and historical movements in different forms of drama across eras and cultures. In the drama component, students will be introduced to the form and function of dramatic literature in relationship to theatrical performance. Study of plays as texts will lead to rehearsal and performance of selected scenes/acts from plays.

Pre-requisite: None

GELH2004 VISUAL AND PERFORMING ARTS – MUSIC

This course aims to encourage students to explore an extensive array of music genres throughout the history of Western and non-Western cultures and nurture a positive attitude and appreciation toward music. The students will learn to comprehend the elements of music (i.e., pitch, melody, rhythm, harmony, and form) and commonly used terminologies illustrated in major compositions. The students will travel through different periods (i.e., from the Middle Ages to the Contemporary Era) and listen to distinguished musical features associated with major composers and their popular works. Finally, the students will connect this knowledge to the present context that music has become prevalent in our daily lives (i.e., music in movies or public places). The proportion of Western music is approximately 70%, whereas that of non-Western music (i.e., Chinese or other Asian cultures) is 30%.

Pre-requisite: None

GELH2005 VISUAL AND PERFORMING ARTS – VISUAL ART

Artworks of different genres have been delighting people from all ages and all places. We enjoy their beauty and their articulation, but we know nothing or very little about their creation process. The practice of aesthetic appreciation of art enables us not only to enjoy art through deeper understanding of the works, but also to recognize and realize our creative potential and capability,

as well as to cultivate and broaden our vision of artistic culture. The course will be taught in two parts: Firstly, Introduction to visual and performing arts, which includes common lectures on What is Art? Art and Culture, Understanding Art Genres, Approaches to Art Appreciation. Secondly, Introduction to Visual Arts – Form, Style & Culture, which includes lectures designed to equip the students with basic knowledge of the different visual art forms and teach them how to appreciate and interpret such artworks by illustrating the relationship between form/style and theme/culture. Masterpieces from different regions/places reveal not merely local colors, but also rich cultural contents, echoing profound problems of life for seeing and understanding the world.

Pre-requisite: None

GELH2006 DIALOGUE WITH THE PAST: HUMAN MEMORIES IN ARTS, LITERATURE, FILMS, AND MATERIAL CULTURES

This is a thematic course for GE program. It will trace and examine the way that human memories have been represented in arts, literature, films and all material cultures, which is different from the professional history writings yet also reflecting history, and which has been probably more effective and influential method of recording the human past. The course will choose one of the historical themes, such as colonialism, imperialism, industrialization, revolution, war, independent movement, communism, reform, globalization, migration, trade, women, etc., as the topic of the class and encourage students to have a dialogue with the people who lived in the past about the evolved issues. Through comparing the historical documents and tangible cultural materials with the stories told by arts, literature and films, students will learn about how to tell the imagination of the past from the historical reality, the rhythm and pace of change from the historical continuity, as well as what the humanity and human strength is all about.

Pre-requisite: None

GELH2007 HISTORY OF WESTERN CIVILIZATION

This course examines the evolution of western civilization from antiquity to the eighteenth century. Over the course of the semester, students will develop an understanding of how the concept of “western civilization” – that is taken to mean, the social and cultural norms, ethical values, traditional customs, religious beliefs and political systems of “the west” – were based historically on a series of cultural borrowings – artistic, literary, intellectual and political – between rivaling states and empires based mainly in Europe. With the rise of Christianity in the Late Roman Empire, students will examine how peoples in Europe gradually became aware of themselves and the lands they inhabited as being “western”, and of being part of a “western civilization” . Defining themselves first against other powerful civilizations, most notably Islamic civilizations in “the East”, this process quickly gathered speed in the sixteenth century as Europeans gradually moved to other parts of the world and began encountering other “non-western” peoples from Asia, Africa and the Americas.

Pre-requisite: None

GELH2008 ASIAN VALUES AND MORAL TRADITIONS

This course introduces students to major moral traditions (for example: Hinduism, Buddhism, Confucianism, Daoism, Shinto, or Bushido) in Asia. Close attention is given to basic values and ethical categories (for example: karma, samsara, moksha, dharma, ren, li, or dao) that have informed Asian moral discourse with special reference to the pivotal role of these values and categories in shaping social, economic, and political life in Asian societies.

Pre-requisite: None

GELH2009 CREATIVITY FOR THE 21ST CENTURY

This course introduces students to Creativity from a variety of perspectives. Instructors of the course take students through a challenging yet fun learning journey, which will nurture their creativity and help them see and hear differently.

This course is a combination of classroom teaching as well as online teaching. It is a SPOC (small, private online course) which includes materials designed for UM's MOOC Creativity (https://www.xuetangx.com/courses/course-v1:UMX+CRT101+2018_T4/about). Pedagogy

adopted in this course is blended learning through the use of various technologies (such as UMMoodle, Rain Classroom, mobile learning). Instructors will apply a range of teaching methods, including regular lectures and tutorials, discussion fora, practices and workshops.

Pre-requisite: None

GELH2010 PORTUGUESE LANGUAGE IN ASIA

This course offers an engaging exploration of Language Contact within the context of Portuguese varieties across Asia. It welcomes students from various backgrounds, as it provides an introductory insight into the fascinating global phenomenon of the new language varieties emerging from contacts and interactions between different communities, cultures, and languages. We achieve this through a curated selection of case studies, focusing on the development of Portuguese language varieties in Asia.

Our primary objective is to examine the pivotal role played by cultural, socio-political, socio-historical and economic factors in shaping the emergence of these new language varieties. This course will underscore the various modes of contact between Southeast Asian and East Asian nations and the European languages, particularly Portuguese. This exploration extends to Greater China, with a special emphasis on Macao.

Pre-requisite: None

Science and Technology

GEST1001 QUANTITATIVE REASONING FOR BUSINESS

This course aims at providing students a sound foundation in mathematics that is required for future courses in quantitative methods and economics, as well as for some business subjects. The course also discusses how to apply quantitative techniques in dealing with some business and economic problems. By exposing the students to various business and economic applications through a wide range of mathematical procedures, the students not only will get familiar with numerous business procedures that require the use of mathematics, but will also be able to use mathematics to solve some basic business problems.

Pre-requisite: None

GEST1002 QUANTITATIVE REASONING FOR SOCIAL SCIENCES

The goal of this course is to develop students' quantitative reasoning skills through the enhancement of their mathematical and statistical literacy. The content of this course includes managing your money, logic, probability and statistics and basics of mathematical modelling. Real-life applications will be emphasized.

Pre-requisite: None

GEST1003 QUANTITATIVE REASONING FOR HEALTH SCIENCES

The goal of this course is to develop students' quantitative reasoning skills through the enhancement of their mathematical and statistical literacy. The content of this course includes financial mathematics, logic, statistics, and linear programming and optimization. Application examples for health sciences will be emphasized.

Pre-requisite: None

GEST1004 QUANTITATIVE REASONING FOR SCIENCE AND TECHNOLOGY

This course aims at providing a solid foundation of one variable calculus for science and technology students. The topics include basic reasoning skills, limit and continuity, derivative and its applications, integral and its applications.

Pre-requisite: None

GEST1005 INTERNET, BUSINESS AND SOCIETY

The emergence of Internet has changed society significantly. One of the main reasons for the tremendous changes is the popularity of Internet services offered to Internet users who make use

of them in both business and personal life. This course will, therefore, introduce some popular and important Internet services to students and describe how they improve the operational efficiency in business and society. In addition, there is discussion of Internet security and privacy issues.

Pre-requisite: None

GEST1006 LOGIC AND REASONING FOR BUSINESS

This course is to introduce the basic concepts of logic, apply the knowledge in the context of daily applications and reasoning and to enhance student's generic analytical ability in the area of business operations and strategy. The course will make use of various business scenarios to provide the students with training in thinking methods, different ways in solving the same problem, not just only the knowledge of the techniques of logic. Topics include concepts of logic and reasoning, logic puzzles, propositional logic, syllogistic logic and predicate logic.

Pre-requisite: None

GEST1007 FUN IN HEALTH SCIENCE

This course introduces important topics related to health in daily-life including the effect of environment, nutrition, and genetics on health, healthy aging, and mental and physical well-being. Biotechnology innovations and lifestyle modifications that can impact human health will be introduced. The course will be taught from a biological, biomedical, and biotechnological perspective. Students will participate in regular fun educational activities related to health sciences that illustrate and enforce the concepts learned in class.

Pre-requisite: None

GEST1008 EXPLORING THE EARTH

An introduction to major principles of physical geology covering the structure of the Earth, plate tectonics, volcanism and mountain building processes, weathering, sedimentation and rock formation, metamorphism and rock cycle, mass movement, earthquake, surface and underground water process, water and climate change.

Pre-requisite: None

GEST1009 MULTIMEDIA TECHNOLOGY IN MODERN SOCIETY

The aim of this course is to introduce and explore the impact of multimedia technology in different aspects of modern society. The contents include visual communications, digital content in website, digital effects, moving image, new media possibilities and experience. The course is also designed to provide the fundamentals and practices for popular technologies and application software for 2D and 3D composition in our daily lives, such as Adobe Photoshop, Autodesk 3DS Max, etc. Lastly the course explores the creativity in interactive and tangible media, and possible research areas in multimedia.

Pre-requisite: None

GEST1010 CHEMISTRY AND MODERN SOCIETY

This course is designed for students that are non-chemistry majors and will be taught with a physical science basis. This course relates application of chemistry to the benefits of modern society. It provides an introduction to the study of the properties and changes in matter. Course emphasizes topics such as: sustainable future, global climates, energy usage followed by their applications in synthetic plastics, medical drugs, food nutrition, genetic engineering, and modern materials.

Pre-requisite: None

GEST1011 ENVIRONMENTAL SCIENCE

Throughout this course, students can better understand the unity and diversity of life interacting with the surrounding environments. Such major topics as population ecology, community interactions, ecosystems/biogeochemical cycles, biosphere and human impact on biosphere, and animal and social behavior will be covered. Students will also learn the unifying concepts in biology, the cellular basis and the ongoing flow of life, plant and animal systems and their control,

and ecology and behavior; and so that students will be able to explore physical and biogeochemical processes and appreciate the importance of the quality of environment.

Pre-requisite: None

GEST1012 ELECTRICITY AND LIFE

This course is about the study of physical science for non-engineering students with emphasis on basic electricity related topics. The focus of the course is not only the elementary physics of electricity; but also enlightening applications in Energy, Telecommunication, Health and Safety of electricity for the human life. Some demonstrations and hand-on experiments are also arranged to provide hand-one experiences and insights for the students on the relative topics.

Pre-requisite: None

GEST1013 MATHEMATICS IN MODERN SOCIETY

The aim of this course is to enhance students' mathematical literacy and interest. It emphasizes the relevance and practicality of mathematics in modern society. Through the study of different applications, students will see how mathematics comes into our daily lives. The mathematical techniques involved are taught via hands-on applications. The topics discussed may vary from year to year.

Pre-requisite: None

GEST1014 MYSTERIES OF THE UNIVERSE

In this course, we aim to explain the fundamental concepts including gravity, Einstein's relativity, cosmology, etc. Topics including the solar system, the climate of the earth, the life cycle of stars, gravitational lensing, cosmic microwave background radiation will also be discussed. No prior knowledge of astronomy is necessary.

Pre-requisite: None

GEST1015 PHYSICS AND MODERN SOCIETY

To enable students to know the use of physics in modern society and technology. Fundamental laws of nature are emphasized with examples of various applications in daily life. Moreover, selected topics of physics relevant to modern society are included. Topics are presented at an introductory level for the students with little or no background in physical science.

Pre-requisite: None

GEST1016 MYSTERY OF CHEMISTRY

This course will describe a series of interesting stories about the birth, evolution, and important discovery of chemistry. Students will learn fundamental chemistry knowledge from interesting chemistry stories, discovery of chemistry mysteries, and through in-class fancy chemistry demonstrations. The course will also bring students to the frontier of modern chemistry researches which are closely related to our daily life.

Pre-requisite: None

GEST1017 MODERN DRUG DISCOVERY: DRUGS AND HEALTH

How many drug pills and tablets do you take in your lifetime? What's the role of drugs in human society and today's health care system? What separate drugs from food and toxins? How long does it take to find a new drug and why some drugs are so expensive? If you have ever had one of these questions, then consider taking this GE course. The course aims to enhance understanding and appreciation of the important and multifaceted roles that drugs play in our daily life. No previous background in pharmaceutical or life sciences is required.

Pre-requisite: None

GEST1018 NUTRITION AND FOOD SAFETY

With the huge rise in diet-related illnesses such as obesity, type II diabetes and cardiovascular disease, and in food safety emergencies, this course aims to provide students with knowledge of the dynamic fields of human nutrition and food safety. It includes an overview of nutrition and human health, and various topics ranging from explanations of the fundamental nutrients (e.g.

carbohydrate, lipid, protein and minerals) to the numerous risks to our food and water supplies (e.g. bacterial contamination, agricultural pesticides, food additives, allergens, and industrial chemicals). It will also introduce students to the serious effects of diet-related diseases/disorders and provide them with the knowledge required to make good food choices. This GE course will be of great interest to all learners because the contents are relevant to daily life.

Pre-requisite: None

GEST1019 MICROELECTRONIC CHIP TECHNOLOGY IN DAILY LIFE

As enabled by powerful technology, microelectronics have become essential in our daily lives. They are also used in a wide range of fields such as healthcare, environmental monitoring, robotics or entertainment etc. This introductory course in microelectronics is tailored for non-engineering students and teaches how to use microelectronic chip components interacting with the environment through sensors and communicate wirelessly with other devices. It covers topics from evaluation and implementation of sensor interface, data conversion, signal processing and device communications. This customized course is bottom-up based, which starts from introducing basic components in information systems, such as 5G communication. Then, followed by system and architectural interface considerations. Finally, the students have a chance to complete a case study on one for Artificial Intelligence and Internet of Things (AloTs) related system.

Pre-requisite: None

GEST2000 ACTIVE LIFESTYLES, WELLNESS AND SPORTS SCIENCE

This course is designed to expose students to the relevant principles in sports science as related to health and fitness, and to discuss how students can apply the relevant sports science principles in one's daily life for making sustainable healthy life style choices to improve one's health and fitness. From the perspectives of sports science, topics relevant for health and fitness, such as health promotion, concepts and principles of exercise, self-evaluation and exercise prescription for health-related physical fitness, effective weight management and nutritional issues, building up healthy social relationships through fitness exercise and practice, sports injury prevention, first aid, etc., will be covered. The course emphasizes the relevance and application of the sports science principles for improving one's physical and mental health.

Pre-requisite: None

GEST2001 BIOLOGY IN OUR DAILY LIFE

In this course, students will be introduced to basic concepts and principles of human biology and health, and recent technological advances in biomedical science. This class aims to highlight on how biology affects human daily life, from simply understanding human bodies to nutrition, treatment of diseases such as cancer and infection, and the personalized medicine. This course will not only broaden the scope of students' understanding of the world from life science perspectives, but also increase overall awareness of the fact that life science has profound effects in everyday life.

Pre-requisite: None

GEST2002 PSYCHOLOGY AND HEALTH

How is stress linked to heart disease? Will the immune system change because of psychological stress? Can a sugar pill cure back pain? Do married people live longer? What influences healthy eating? What helps people to cope with illness? Are there ethnic variations in health? How can we change people's health behaviors to improve their health? This course tries to answer these questions, and provides an overview of Health Psychology — a young and exiting field of study that examines the bi-directional relationship between people's thoughts, feelings, behaviors, and their physical health.

Pre-requisite: None

GEST2003 EXPLORING CHINESE MEDICINE

Traditional Chinese medicine (TCM) has been practiced in China and other Asian nations for more than 2,000 years and has gained increasing attention and popularity all around the world including

Europe and North America. The main objectives of this course are 1) to provide a historical overview of the discoveries our ancestors made from natural products; 2) to discuss how modern technologies are used for mining the treasure and uncovering the healing power of Chinese medicine; 3) to introduce the cultures developed along with the therapeutic philosophy in Chinese medicine. Students will learn the basic principles of TCM, and acquire up-to-date information on the medicinal use and scientific research of TCM.

Pre-requisite: None

Society and Behaviour

GESB1000 - ETHICS, VALUES, LAW AND SOCIETY

- **GESB1001 APPLIED ETHICS**

This course component examines the role of ethics in building a just and fair society. Students will be introduced to typical ethical problems they will face in work and society, learn how to apply ethical principles to comprehend and analyse these problems, and make better decisions accordingly.

Pre-requisite: None

- **GESB1002 FOUNDATIONS OF MORAL VALUES**

How should we live? What is a right conduct and a good life? Why do moral values need foundations? The aim of this course is to help students to understand basic moral theories and ideas in philosophy and religion that shape values of our lives. The course will also provide students with the intellectual resources needed for thinking systematically and critically about some of moral and ethical issues in a contemporary context.

Pre-requisite: None

- **GESB1003 LAW AND SOCIETY**

This course component aims to introduce the basic knowledge of the Constitution of China and the Basic Law of Macao at both theoretical and practical levels. It is hoped that this course will help students to understand the basic concepts, theories, principles and spirit of the Constitution and the Basic Law, the basic system of the State and Macao, and the importance of the Constitution and the Basic Law to Macao SAR and the Macao residents.

Pre-requisite: None

GESB1004 DEVELOPMENT OF GAMES AND GAMBLING

This course introduces the history of gambling and games. Gambling is a major leisure activity performed by many individuals worldwide. It can take various forms including lottery, sports, horse racing, and casino. This course will introduce students the history of gambling and wagering games across different national cultures including Chinese, Americans and Europeans. Students will examine how gambling and wagering games have evolved over time. It is hopeful that through the lens of time, students can begin to understand the reasons why people take risks and gamble.

Pre-requisite: None

GESB1005 MACAO LAW AND ITS REAL-LIFE APPLICATIONS

This course will introduce Macao Law and its applications in real-life.

Due to a history of administration by Portugal, Portuguese Law was transplanted to Macao, which had been gradually localized, and eventually resulted in forming a distinctive Macao Legal System. Macao law is often described as the product of alien legal culture; citizens' perception and acceptance of Macao Law are very limited. However, citizens' perception and acceptance establishing public legal culture is the key to ensure the proper implementation of law.

Through introduction of Macao Law and its applications, this course aims to strengthen students' perception and acceptance of Macao Law, facilitate the establishment of public legal culture.

Pre-requisite: None

GESB1006 ECONOMICS OF EVERYDAY LIFE

This course provides an introduction to the basic ideas in economics. It will discuss how individuals and firms make their decisions and how to interact with each other. The operation of markets, including the competitive markets and monopolists markets, will also be discussed. The course will also explore the functioning of labor market, product market and other factor markets. The course will use real-world examples to illustrate the economic principles and their applications. Pre-requisite: None

GESB1007 UNDERSTANDING MACROECONOMIC POLICIES

This course will introduce students to the study of macroeconomic policies by the government and central bank. Concepts such as national income, gross domestic product (GDP), unemployment, money, inflation, and exchange rate will be discussed. Fiscal policy from the government and monetary policy from the central bank will be introduced and their effects on these macroeconomic variables will be studied. The roles of macroeconomic policies in dealing with real-life economic problems, for example, fighting unemployment, curbing inflation, and so on will be analyzed. Interactions among different markets will be introduced to help students understand how macroeconomic policies work. Pre-requisite: None

GESB1008 UNDERSTANDING GOVERNMENT

To understand the structures, responsibilities and importance of government(s) in contemporary time. How governments respond to public needs and people's interests while maintaining the fundamental principles of legality, justice, equality, rights and democracy etc. make up the core of the course. How public policies are made and how they facilitate social progress and development will be another important content. Lastly, how governments interact with the public, community, private sectors, NGOs, and also the external environment will be a third concern introducing students to the important role of government. Examples will be drawn from various places. Reference to current issues or events will complement lectures. Pre-requisite: None

GESB1009 PERSONAL GROWTH

Personal and social competence is key to self-discovery and self-knowledge with the aim of becoming involved and succeed in the innovative global economy of the 21st century. The purpose of this is to engage students with the psychological approaches to self-development, leadership, creativity, and interpersonal competence that would help them deal with the unfamiliar and unexpected nature of an ever-changing future. The course will focus on topics such as self-esteem, life goals and careers, personality, the various forms of intelligence, and persuasion and conflict management. Other topics relate to friendship and love, coping mechanisms for difficult life situations, and socio-cognitive processes evident in interpersonal relations in daily life, and students will also actively engage in research through participation in psychological studies and experiments. Pre-requisite: None

GESB1011 COURTSHIP, MARRIAGE AND FAMILY

This course focuses on issues of love and intimacy, relationship development, sexuality, cohabitation, and marriage. It provides an overview of choices of mates and dating preferences, examines the ways that cultural, social, and personal factors shape these choices, and identify factors that contribute to happy and enduring relationships. Other topics covered in the course include planning for children, family formation, and parenting practices. We will also discuss common challenges facing love and marital relationships, including gender role, power and control, violence and abuse, and work and money. Pre-requisite: None

GESB1012 CRITICAL PROBLEMS IN CONTEMPORARY SOCIETY

This course describes social problems in contemporary societies especially Macao and China, and identifies how these problems affect and is affected by social forces, institutions, and culture.

We will examine a series of long-standing and emergent social problems including gambling, aging, prostitution, substance abuse, violence, crime, inequality, racial and ethnic conflict, sex discrimination, health care, family issues, urban problems, population and food, environmental problems, and terrorism. We will try to identify the causes, distribution, and consequences of these problems. We will learn about theoretical perspectives that provide insights into social problems and empirical research that contributes evidence to the understanding of the problems. We will also assess social policies designed to mitigate the negative consequences of social problems. Pre-requisite: None

GESB1013 EVERYDAY STATISTICS

People nowadays are being connected globally in various ways, and statistics plays a role in giving basic international comparison. The first part of this course introduces some basic ideas in social and economic statistics for cross-national comparison. But, statistics is always considered as a hurdle for those not strong in mathematics. The second part introduces statistics which emphasizes intuitive thinking in daily life instead of technical mathematical jargon. This will equip students with minimal statistical literacy to cope with the data saturated society with confidence, and more advanced statistics courses in future studies. Emphasis is on statistical interpretation rather than analysis.

Pre-requisite: None

GESB1014 PSYCHOLOGY AND INTELLIGENT TECHNOLOGY

This course provides an overview of psychology and Intelligent Technology (IT), including how the human brain produces intelligent behaviour and more importantly how the understanding of human intelligence would help to create intelligent machines. To this end, we will introduce how human intelligence emerges from computations at neural circuit level in multiple systems, such as visual system for vision, motor system for movement control and limbic system for emotions, with rigor sufficient to reproduce similar intelligent behaviour in machines.

Pre-requisite: None

GESB1015 ADOLESCENCE: BEYOND STORM AND STRESS

This course will examine the biological, psychosocial, and contextual development and behaviours that characterize normal adolescent development. The course content will include:

- a) the developmental characteristics of adolescent physical, cognitive, and psychosocial development;
- b) the contextual influences (e.g., family, peers, teachers, community) on adolescent development;
- c) the epidemiology and etiology of adolescent problem behaviours across a variety of domains;
- d) the ways in which these behaviours relate to normal adolescent development in specific contexts;
- e) the specific ways parents and teachers can employ to prevent and, to a lesser extent, treat problem behaviours.

Pre-requisite: None

GESB1016 GOVERNANCE IN CHINA

This course is a general introduction of China's state and society. It will include topics such as ways of understanding regimes in the world, social and ideational bases of the traditional and modern Chinese regimes, ways of mass participation and government responsiveness, disappearing rural and urban division through urbanization/modernization, central-local relations, and the impact of foreign relations on China's progress. After finishing this course, students should have obtained the basic knowledge about China's past and present in the context of internal and external conditions.

GESB2000 PERSONAL FINANCE AND WEALTH MANAGEMENT

Financial literacy has become increasingly popular and important around the world. Every university students should know how to manage his or her wealth, pension, and insurance. This course teaches non-finance students the core concept of financial planning, including retirement

planning. Popular financial instruments will be introduced from the risk-return perspectives, including mortgage and car loans, bank deposits, stocks, bonds, mutual fund, and insurance products. Quantitative tools such as Microsoft Excel will be used to solve various problems in personal finance.

Pre-requisite: None

GESB2001 FOOD, EATING AND CULTURE

This course examines social theories of food, eating, etiquette and nutrition. It is divided into five broad components. The first examines relationships between scientific and folk concepts of nutrition. The second analyses theories of food preparation and meal structure in various international cultures. The third investigates how food and eating is governed by explicit and implicit rules of etiquette. The fourth part of the course investigates the role of public dining and the media in promoting particular images of food consumption. Finally, there will be a brief examination of the implication of current trends in food consumption for public health.

Pre-requisite: None

GESB2002 BUSINESS, SOCIETY AND ENTREPRENEURSHIP

This course is designed to investigate the broad spectrum of business and society as well as sustainability issues that individuals have to face today and will face in the future. It will also provide students with the broad functions and role of business in society, and knowledge in balancing economic, legal, ethical, and philanthropic responsibilities to the variety of stakeholder groups with which businesses interact with the society. This course will explain the nature of business, its purpose and contribution to society as well as management's role in business and the overlapping influence of business, economy, and society. It involves discussion on these issues and debate that pertain to these relationships. Within the context of business, the course focuses on entrepreneurial behaviors which include social and business entrepreneurship (i.e. new venture creation and management), creativity, and innovation. Within its relationship to society, it will consider citizenship behaviors through topics as stakeholder management and corporate social responsibility.

Pre-requisite: None

GESB2003 CREATIVITY AND MARKETING

Consumers, retailers and suppliers are demanding more creativity and innovation across every marketing activity, especially in such a highly globalized society with internet and mobile devices everywhere. In this course students will learn and experience how to combine creativity and marketing activities together. This course covers (a) the strategic basis for product development including sources and types of innovation, market entry timing, product market structure and competition, disruptive and entrepreneurial innovation, and the development of new services and service bundles; (b) latest and creative marketing practices including creative product design, creative promotion method, creative advertising example, creative business model; and (c) the management of the new product development and promotion process including collaboration and networks as well as strategies for launching and marketing new products and services.

Pre-requisite: None

GESB2004 PUBLIC SPEAKING

The course aims to provide students with an introduction to the skills and practices of public speaking: this will be contextualized across the different socio-cultural and work situations in which they are likely to be required to speak, and with regard to the different groups they will have to address. The emphasis will be on four main areas:

1. speaking as a form of communication
2. the techniques of public speaking
3. understanding & addressing different kinds of audiences
4. researching the material to be dealt with in the speech
5. organizing the talk
6. using A/V aids
7. dealing with questions.

Pre-requisite: None

GESB2005 ART AND SOCIETY

This course is to focus on the history of the use and function of art in global perspective. Images, with symbolic meanings and particular style, can be powerful visual language that speaks to the viewers directly. Art has been a meaningful endeavour that deals with basic human concerns from the dawn of civilization to the present day. In this course, art works are discussed in context with human survival, religion, politics, sexuality, technology, culture transmission and globalization. This course examines essential art ideas and makes them concrete using examples from around the world, and relates them to contemporary issues.

Pre-requisite: None

GESB2006 UNDERSTANDING POPULATION

This course provides an overview of how social factors can influence population characteristics and how the characteristics of population in turn affect society. We will focus on three primary demographic processes: mortality, fertility and migration. We will learn basic concepts, theories and measurements of each process from both historical and comparative approach. We will apply these basic demographic concepts to contemporary population issues such as concerns over the persistent low, below-replacement fertility level and the aging of the population in Macao, the consequences of the internal migration on urbanization in China or other developing countries. Population literacy is therefore an important part of an individual's knowledge to understand current social, economic and political debates. In addition, population literacy is essential for yourself as you think about planning your own life in terms of human capital investments, marriage, fertility, labor force participation, saving, migration and many related aspects. In understanding these issues, we will use the social science theories and concepts such as social stratification, social interaction, and continuity and change. We will bridge sociology, anthropology, history, political science, economics, and psychology, and will do a comparative analysis between Macao, China, and other societies.

Pre-requisite: None

GESB2009 SMART TOURISM AND LEISURE TRAVEL BEHAVIOUR

This course introduces concepts regarding people's travel decisions and behaviours through information technologies. In particular, the course is designed to allow students to gain a solid understanding about different aspects of travel activities, while utilizing technologies to make better travel decisions. The course is composed of four main modules: motivations and theories for leisure travel, special interest tourism and technology, information technology usage in tourism, and smart tourism case study. Through lectures, in-class discussions, case sharing, and homework assignments, students will learn how travel decisions and behaviors can be mediated through the usage of smart technologies. Student performance is evaluated through attendance, in-class participation, assignments, and the exam.

* Students will follow this study plan if they do not go Exchange/Study Abroad. For students who go to Exchange/Study Abroad, they will be required to enroll similar courses in exchange university.

** Research course

Students majoring in Portuguese Studies are required to complete the course, Portuguese Language and Culture I, to fulfill the Chinese/Portuguese language requirement in Languages and Skills.

Course Description

AHGC7000 COMPARATIVE LANGUAGE STUDIES FOR TRANSLATION

This course is concerned with the comparative description of the morpho-syntax of Chinese and Portuguese, Chinese and English, and Portuguese and English. For the English-Chinese Specialization, the course is designed to compare and contrast English and Chinese in major linguistic aspects. We survey the relevant literature and introduce several theoretical concepts and analytical frameworks, drawing implications for translation studies. The aim is to develop students' competence to conduct contrastive linguistic analysis and draw relevance to translation studies. Learning activities consist of workshops, in-class discussions, tasks and projects. For the Portuguese-Chinese and Portuguese-English Specializations, the course is concerned with the comparative description of Chinese and Portuguese / English and Portuguese in morpho-syntax, lexical semantics and text, with the aim of provide the students with the necessary methodological tools to perform a thorough analysis of the source text and produce an equivalent target text.

Pre-requisite: None

AHGC7001 THEORETICAL CONCEPTS OF TRANSLATION STUDIES

This course covers contemporary concepts and approaches to translation. It surveys different strategies and techniques in the translation theory and methodology literature, discusses the critical evaluation of translations, and introduces aspects of modern translation tools. It furnishes the student with a grounding in the principal theories of translation studies and practice essential to the practicing professional and basic to academic research in the discipline.

Pre-requisite: None

AHGC7002 TRANSLATION TECHNOLOGY

This course surveys computer-aided and computer-based methods and approaches used in the translation area. For the English-Chinese Specialization, the course is focusing on Computer Aided Translation (CAT). It aims to acquaint scholars of translation studies with prominent and cutting-edge technology for translation. The course will introduce both Machine Translation (MT) and Translation Memory (TM) systems in addition to the use of the Internet, Web-based translation aids and other applications that can aid translation. The course will also involve selected readings in the history and evolution of Machine Translation and current developments in in the field. For the Portuguese-Chinese and Portuguese-English Specializations, the course is designed to prepare the students for professional computer-aided and computer-based approaches that used in the translation area. The course aims to focus on introducing the students to the linguistic concepts and basic theories in computer, translation, and machine translation. Concentrating on the mainstream developments and providing some interaction with the technologies, such as thesaurus, dictionaries, translation memory system, translation software and cognition tools.

Pre-requisite: None

AHGC7003 RESEARCH DESIGN AND WRITING

For the English-Chinese Specialization, the course is a practical seminar designed to train students in the formulation of advanced research projects in the area of translation or interpreting. It is intended as a springboard for the development of a dissertation topic. The student will be required to identify relevant research questions and conduct systematic and creative research thereon from a theoretical and practical framework, presenting papers to the class on the development of their projects. For the Portuguese-Chinese and Portuguese-English Specializations, the course aims to familiarize students with essential methodological tools in the area of Humanities and specifically applied to translation studies, which will help students to prepare their dissertations; research reports and papers/articles.

Pre-requisite: None

AHGC7014 CHINESE – PORTUGUESE TRANSLATION

This course aims to familiarize students with the differences between Chinese and Portuguese

languages, to learn the nature, methods, standards and common translation techniques, to engage in extensive translation practice and learn how to translate different types of texts. Students will focus on how to determine the meaning of words from context, how to choose the most reasonable interpretation in the target language, and to deal flexibly with long sentences. Pre-requisite: None

AHGC7015 PORTUGUESE – CHINESE TRANSLATION

This course aims to familiarize students with the differences between Portuguese and Chinese languages, to learn the nature, methods, standards and common translation techniques, to engage in extensive translation practice and learn how to translate different types of texts. Students will focus on how to determine the meaning of words from context, how to choose the most reasonable interpretation in the target language, and to deal flexibly with long sentences. Pre-requisite: None

AHGC7016 INTERPRETING I CHINESE/PORTUGUESE

This course will concentrate on basic interpreting skills as a basis for more advanced interpreting training. It will cover skills such as note taking, memory span improvement, sight translation and the basics of consecutive interpreting. Students will undertake practical training in the language laboratory. Pre-requisite: None

AHGC7017 INTERPRETING II CHINESE/PORTUGUESE

This course will work further with sight interpreting and consecutive interpreting, while advancing to simultaneous interpreting. The student will be exposed to a wide range of topic areas, including business, socio-political topics, and advances in science and technology. Students will undertake practical training in the language laboratory. Pre-requisite: None

AHGC7040 A DISCOURSAL APPROACH TO TRANSLATION STUDIES

This course offers a translation study oriented examination of the use of language by English and Chinese communities. It takes the discourse approach to the study based on different theoretical perspectives: the social theory of language, known as systemic functional linguistics, speech act theory, pragmatic theory and the relevance theory. With both spoken interaction and written texts as objects of analysis, this course involves the study of both language form and function. It identifies linguistics features that characterize different genres as well as social and cultural factors that aid in the understanding and interpretation of different texts. Pre-requisite: None

AHGC7042 CULTURAL ISSUES IN TRANSLATION

For the English-Chinese Specialization, the course addresses the sociocultural dimension of translation. Cultural context and cross-cultural recontextualization are incorporated into and inseparable from the actual practice of translation. Special attention is given to cross-cultural communication in terms of information structure, cohesion, and pragmatics, as well as to the interpretation of power relations and the issue of reception. Students will be introduced to various aspects of cross-cultural and intercultural communication in order to explore their normative understanding of how cultural factors influence mediation and negotiation in dealing with potential cultural conflicts in translation. For the Portuguese-Chinese and Portuguese-English Specializations, the course considers the notion of a cultural transfer in text translation. Particular attention will be paid to cross-cultural matters of information structure, cohesion and pragmatics, and to questions of reception and power relations. The student will develop an advanced understanding of the notion of cultural transfer, and the ability to identify and mediate its conditioning influence in the process of translation. Pre-requisite: None

AHGC7043 GENDER IN TRANSLATION STUDIES

This course introduces students to a general understanding of the theories and practices of

feminism and issues related to gender, language and translation. It will examine questions of sexism in language, subjectivities and writing, text and representation, cultural identity and politics of transmission in the context of Chinese and English. Texts to be examined may include original and translated works of feminist theories, writing on gender issues and works of women writers. Pre-requisite: None

AHGC7044 HISTORY, CULTURE AND TRANSLATION

For the English-Chinese Specialization, the course is designed to brief students with a general idea of translation, history, and culture, aiming to help students to be able to situate translation in historical and cultural contexts. It is designed to meet two learning objectives: firstly, it introduces the basic concepts of translation, the cultural issues involved in translation, the history of translation in the West and that in China, and the Chinese and Western thinking on translation. Secondly, it discusses various translation projects situated in different historical and cultural contexts, aiming to provide students with a comprehensive knowledge of translation strategies and related research methodologies and how to work on their own translation projects. For the Portuguese-Chinese and Portuguese-English Specializations, this general introduction to the history of translation focuses on the long relationship between Chinese language and the Western European languages, and considers other translation traditions where relevant. The first part of the course examines the works, activities, and roles of important translators in history, with special reference to Macao's pivotal role in the history of translation. The second part of the course will look at the role of translation in the dissemination of knowledge, culture, law and trade.

Pre-requisite: None

AHGC7045 LITERARY TRANSLATION

This course will introduce students to approaches to literary translation. Students will learn to identify the linguistic, stylistic and cultural features of literary texts as well as to formulate strategies for translating those literary works. Students are trained to examine the particularities of different literary genres, such as fiction, prose and poetry, and the special strategies required for their translation. Seminars will be conducted for practice of translating various literary texts.

Pre-requisite: None

AHGC7046 LITERATURE, CULTURE AND TRANSLATION: LANGUAGE AND IDEOLOGY

This course will introduce the concept of translation and explore its implications for literature, culture, and ideology. Students will examine how translation can shape the meaning of a text, as well as how literature and culture are interrelated and how they can be used to convey certain ideas and ideologies. In addition, students will learn to recognize and analyze the different approaches used by writers of different cultural backgrounds. Through reading and discussing relevant works, students will explore how literature can be interpreted through the lens of ideology. They will analyze how different interpretations of a text can be used to communicate different messages and meanings. Examples of the questions which may be explored include gender, race, colonialism, post-colonialism, humanism and religion. These questions will be discussed on two levels: (i) comparison of different writers' approaches within the same broad cultural tradition, and (ii) comparison of approaches between different cultural traditions. Through these discussions, students will develop an understanding of some of the major concerns of writers in different cultural traditions. Texts of different genres and backgrounds will be selected for discussion.

Pre-requisite: None

AHGC7047 READING TRANSLATED WORKS

This course aims at learning from good examples that, nevertheless, can be treated critically. This course will cover a variety of texts and genres, and above all, it aims at learning from master translators and focuses on the study of translation classics from the Chinese and the Portuguese into English and vice versa.

This course will focus on the study of selected works of translation and study the various aspects of translation, from the linguistic and stylistic to the cultural and ideological. It will also discuss the various challenges of translating between Chinese and Portuguese. Throughout the course, students will have the opportunity to analyze and discuss a variety of texts and genres. In addition

to the study of good examples of translations, students will also be asked to take a critical approach to the translations they are studying. In addition, The course will also include theoretical discussions on translation and its challenges, as well as hands-on activities to put the theoretical knowledge into practice.

Pre-requisite: None

AHGC7048 SPECIAL TOPIC IN TRANSLATION I

This course is designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on the availability of specialized staff.

Pre-requisite: None

AHGC7049 SPECIAL TOPIC IN TRANSLATION II

This course is designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on the availability of specialized staff.

Pre-requisite: None

AHGC7050 SPECIAL TOPIC IN TRANSLATION III

This course is designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on the availability of specialized staff.

Pre-requisite: None

AHGC7051 SPECIAL TOPIC IN TRANSLATION IV

This course is designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on the availability of specialized staff.

Pre-requisite: None

AHGC7052 TRANSLATING CULTURES

For the English-Chinese Specialization, the course will explore the cultural, literary, and linguistic exchanges that have taken place between East and West as a result of translation. We will examine the effects of translation on the formation of new cultural identities, and explore how translation has helped to break down cultural barriers and create a new understanding of the world. Students are introduced to the critical treatment of selected translated texts, which requires in-depth and sophisticated analysis of the texts. This activity encourages students to think critically and to develop an understanding of the nature of translation that goes beyond the literal meaning. Students need to develop an understanding of how the translator has used their language to convey meaning and to convey the cultural context of the original text. In particular, students need to evaluate the translator's choices in terms of accuracy and acceptability in cultural terms. General problems in cultural representation will be discussed with particular reference to the systematically used cultural stereotypes such as 'the Orient' and 'the Occident'. For Portuguese-Chinese and Portuguese-English Specializations, the course aims to alert students to the issues that arise in the translation process, both from a cultural, theoretical and practical point of view.

Pre-requisite: None

AHGC7053 TRANSLATING FOR THE MEDIA

For English-Chinese Specialization, the course focuses on the translation of journalistic articles and advertisements in the print/electronic media. Translation strategies and methods applicable to English-Chinese translation of this genre will be reviewed with special attention to the linguistic, stylistic and cultural differences between media texts in Chinese and English. The course adopts a functionalist approach and discusses how they can inform decisions regarding loyalty and liberty in translation. Real-life translation projects will be simulated and students will be required to do group presentations on their translations.

For Portuguese-Chinese and Portuguese-English Specializations, students will learn in the

course the basic techniques for translating for the media, including newspapers, news magazines, and press releases. Students will study and compare the linguistic, stylistic, and cultural features of writing for the media in Portuguese and Chinese / Portuguese and English, then learn approaches for translating such texts between the two working languages. Attention will also be paid to the standard reference tools for this kind of translation.

Pre-requisite: None

AHGC7054 TRANSLATION AND COMPARATIVE LITERATURE

This course aims to assess the place and function of translation within the wider domain of comparative literature through the representative works of major scholars in translation and literature and thus to enable students to achieve a critical awareness of social, literary, and cultural issues crucial to translation and comparative studies. Students on the course will have the opportunities to compare and analyze commonalities and divergences, identities and discontinuities in the aesthetic transmission of texts between the Chinese / English / Portuguese literary traditions. Besides technical details, this course will also lay emphasis on helping students look into larger intercultural issues involved in a perception of translation and comparative literature.

Pre-requisite: None

AHGC7055 TRANSLATION OF LEGAL TEXTS

This course is concerned with the translation of legal documents within the context of Macao Law, covering a wide range of document types, including informational documents, common legal documents, and specialized and technical documents such as, for example, contracts, and legal forms. Particular attention will be paid to translation problems associated with the legal text, including legal equivalence, terminology, register, structural layout.

Pre-requisite: None

AHGC7057 TRANSLATION OF TEXTS IN POPULAR CULTURE

This is a translation course which focuses on popular culture in the English-, the Portuguese-and/or the Chinese-speaking worlds. Selected texts from areas such as cinema, popular music, popular novels, newspaper columns, magazines, advertisements, and TV programmes, and related criticism, will be used as materials for students to practise translation. Concepts and theories of the formation of different cultural phenomena and cultural representations will be introduced. Students will be encouraged to discuss how cultural elements work in the process of translating texts which might involve dialects, subcultures and local cultural interests of different societies. In order to reach these objectives, during the semester we will carry out the following activities: critical reading of Translation Studies (TS) articles and seminal texts; critical reading of bilingual texts (literary and non-literary texts); translation practices; and group discussions.

Pre-requisite: None

AHGC7058 TRANSLATION OF TEXTS IN THE ARTS

In this course the students will learn the basic terminology, vocabulary and techniques for translating texts in the arts, primarily in music, painting and films.

Students will be required to translate either (i) programme notes of recitals and concerts, and TV/Radio talks on music; or (ii) catalogues of exhibitions and museum collections of items of arts and antiques; or (iii) films.

Pre-requisite: None

AHGC7059 TRANSLATING TEXTS IN SOCIAL SCIENCES

This course will introduce students to the basic socio-political concepts used in different cultures. It aims to enable students to compare and reflect on these social issues and socio-cultural concepts when they are used in the contexts of both Chinese and Western societies. It will provide students with a historical background of when and how these concepts are introduced, in Chinese, English and/or Portuguese. Samples of writing in the social sciences, including economics, political science, sociology and anthropology, will be selected and students are required to work on their translation.

Pre-requisite: None

AHGC7060 TRANSLATION CRITICISM AND ASSESSMENT

Translation criticism is the practice of examining, evaluating, and analyzing translations of literary texts. The assessment of a translation can involve making judgments about a range of topics, such as the accuracy of the translation, its adherence to the original text, its readability, its clarity and fluency, its style, its cultural appropriateness, and its overall effectiveness. Translation criticism is ultimately concerned with the question of how faithfully a translator has managed to convey the original author's meaning and intent in the translated text. Translation criticism is ultimately concerned with the question of how accurately and reliably a translator has managed to convey the original author's meaning and intent in the translated text as well as the overall quality of translation.

Pre-requisite: None

AHGC7061 TRANSLATION PROJECT

The student will have to translate a substantial piece of text of a particular genre. The course involves close reading of some of the iconic translation works, as well as introducing students to translation concepts, procedures and methods. Discussion sessions will be conducted on how to solve translation problems and how strategic decisions are to be made. The instructor will give guidances and comments during the translation process and students will learn to evaluate their own translation and articulate their translation experience.

Pre-requisite: None

AHGC7062 TRANSLATION PEDAGOGY

This course examines theories of translation teaching, from a perspective which takes into account the needs of the didactics of translation and of interpreting. Detailed analysis of syllabuses will be presented to make students aware of recent trends in the teaching of translation. The use of new technologies for the teaching of translation skills will be emphasized.

Pre-requisite: None

AHGC7063 TRANSLATION FOR ADMINISTRATION AND COMMERCE

This course focuses on practical translation of various types of business and administrative texts – e.g., business correspondence, reports, marketing materials, accounting documents, contracts, and policy addresses. We also discuss some relevant research studies in relation to the translation for administration and commerce. We aim to (a) improve students' translation skills and (b) horn their ability to relate translation problems to relevant research of the field.

Pre-requisite: None

AHGC7064 AUDIO-VISUAL TRANSLATION

This is an introduction to audiovisual translation (AVT). It is concerned with the nature, characteristics, and translation principles and approaches pertaining to this particular type of translation in the service of dubbing as well as subtitling. Emphasis will be placed on seeking optimum effect through applying AVT-specific translation strategies and techniques in overcoming problems that stem from the conflict between the medium constraints and translatability of culture-bound elements in the context of required immediate comprehensibility of the translation consumer. Pre-requisite: None

AHGC7065 THEORIES AND PRACTICE OF INTERPRETING

This course aims to introduce both the emerging field of Interpreting Studies and the practice of Interpreting to post-graduate learners. Through selected readings, the course will explore fundamental differences between written translation and oral interpreting besides discussing current approaches to research in the field. The course itself will be conducted in training labs where learners will be drawn into the practice through assignments and interpreting of a variety of texts.

Pre-requisite: None

AHGC7066 CONSECUTIVE INTERPRETING

This course focuses on the consecutive mode of interpreting. Traditional and contemporary

translation/interpreting principles will be introduced. Practical targeted progressive exercises on essential skills will be conducted in laboratories. This course aims to help students acquire the essential skills for consecutive interpreting, become acquainted with the consecutive interpreting process, understand the role of the consecutive interpreter in the local and global contexts, understand the pros and cons of remote consecutive interpreting, explore how modern technologies will help improve performance, identify areas for progression and identify possible career paths. Students will be encouraged to look at existing theories and methods of training critically with the aim of developing more effective strategies. The course will also introduce students to topics and methods in interpreting studies with the aim of helping students acquire research methods, identify research topics and develop research projects in interpreting.

Pre-requisite: None

AHGC7067 SIMULTANEOUS INTERPRETING

This course focuses on the simultaneous mode of oral interpreting. Through introducing major trends of traditional and contemporary translation theories and principles, practical targeted progressive exercises conducted in laboratories and fieldwork, the course will help students acquire the essential knowledge and skills of simultaneous interpreting, understand the role of the interpreter in different contexts, as well as looking at the opportunities and challenges for the interpreter in the current world. Students will be encouraged to look at existing theories and methods of training critically with the aim of developing more effective strategies. The course will also introduce students to topics and methods in interpreting studies with the aim of helping students acquire research methods, identify research topics and develop research projects in interpreting.

Pre-requisite: None

AHGC7068 CONFERENCE INTERPRETING

This course is designed to provide students with training in conference interpreting, which includes both simultaneous interpreting and consecutive interpreting. Major trends of traditional and contemporary translation theories and principles will be introduced. Practical targeted progressive exercises on essential skills will be conducted in laboratories. Students will be introduced to internationally accepted codes of conduct for interpreters and conference management and gain hands on experience through guided in-house or external assignments, including field trips. Students will be encouraged to look at existing theories and methods of training critically with the aim of developing more effective strategies. The course will also introduce students to topics and methods in interpreting studies with the aim of helping students acquire research methods, identify research topics and develop research projects in interpreting.

Pre-requisite: None

AHGC7282 ENGLISH – PORTUGUESE TRANSLATION

This course aims to familiarize students with the differences between English and Portuguese languages, to learn the nature, methods, standards and common translation techniques, to engage in extensive translation practice and learn how to translate different types of texts. Students will focus on how to determine the meaning of words from context, how to choose the most reasonable interpretation in the target language, and to deal flexibly with long sentences.

Pre-requisite: None

AHGC7283 PORTUGUESE - ENGLISH TRANSLATION

This course aims to familiarize students with the differences between Portuguese and English languages, to learn the nature, methods, standards and common translation techniques, to engage in extensive translation practice and learn how to translate different types of texts. Students will focus on how to determine the meaning of words from context, how to choose the most reasonable interpretation in the target language, and to deal flexibly with long sentences.

Pre-requisite: None

AHGC7284 INTERPRETING I ENGLISH/PORTUGUESE

This course will concentrate on basic interpreting skills as a basis for more advanced interpreting

training. It will cover skills such as note taking, memory span improvement, sight translation and the basics of consecutive interpreting. Students will undertake practical training in the language laboratory.

Pre-requisite: None

AHGC7285 INTERPRETING II ENGLISH/PORTUGUESE

This course will work further with sight interpreting and consecutive interpreting, while advancing to simultaneous interpreting. The student will be exposed to a wide range of topic areas, including business, socio-political topics, and advances in science and technology. Students will undertake practical training in the language laboratory.

Pre-requisite: None

AHGC7302 SECOND LANGUAGE ACQUISITION

This course will examine current theories of second language acquisition, in relation to the acquisitional process, developmental stages, and external factors conditioning acquisition, including the effects of the first language, age of acquisition, motivation, instructional context and the nature of input. Topics discussed will include the critical period hypothesis, cross-linguistic influences, individual differences such as cognition, affect and language aptitude.

Pre-requisite: None

AHGC7303 EVALUATION AND ASSESSMENT OF LANGUAGE USE

This course is an introduction to the field of language assessment. Topics covered in the course include purpose and context of testing, assessing skills and components of language ability, content analysis of test instruments, and statistical analysis of test performance data, and fairness and justice in language assessment.

Pre-requisite: None

AHGC7304 ENGLISH PEDAGOGICAL GRAMMAR

This course focuses on a systematic review of the grammatical difficulties common to learners of English, particularly learners whose first language is Chinese. There is a focus on devising clear descriptions of grammatical patterns from a learner's perspective, diagnosing learners' grammatical errors, and devising linguistically informed and appropriate strategies to assist learners to understand and correct these errors.

Pre-requisite: None

AHGC7305 METHODOLOGY OF TEACHING ENGLISH AS A SECOND LANGUAGE

This course addresses the application of current methodologies in the teaching of English as a Second Language. Developments in linguistics, educational and psychological studies lead to constant new input to foreign language teaching methodology and practice. The course introduces the student to major current practices and how research-driven innovations are developed in current practice.

Pre-requisite: None

AHGC7306 RESEARCH METHODS IN APPLIED LINGUISTICS

The purpose of this course is to introduce the major components of theoretical and action research as carried out in language learning and teaching. Students read a variety of case studies on theoretical and action research with a focus on understanding and evaluating study design, procedures, analyses, as well as the use of electronic resources. They consider the process of literature review in the development of research questions and develop a proposal for their own research project.

Pre-requisite: None

AHGC7307 SUPERVISED TEACHING PLANNING AND PRACTICE IN ENGLISH AS A SECOND LANGUAGE

1) reviews and discussions of teaching methodologies/approaches and reflections on effective pedagogy in specific teaching and learning contexts;

2) classroom observations and teaching practice under the supervision of the course instructor and a mentor teacher (engaging in every aspect of classroom teaching, including lesson planning and execution of lessons, interaction and feedback, assessment and evaluation, among other things)

3) a potential action research based on your observation and analysis of potential issues in that particular educational and instructional context.

Pre-requisite: AHGC7305

AHGC7308 SPECIAL TOPICS IN APPLIED LINGUISTICS I

This course is designed to offer visiting scholars, existing or future staff, the opportunity to offer courses in their particular area of specialization. The topic and content of the courses will vary from year to year depending on the availability of expert staff. Examples of specialized topics that may be offered include: data-driven learning, computer-adaptive language testing, automated scoring, corpus-based EAP (English for academic purposes), etc.

Pre-requisite: None

AHGC7309 SPECIAL TOPICS IN APPLIED LINGUISTICS II

This course is designed to offer visiting scholars, or existing staff, the opportunity to offer postgraduate level students courses in their particular area of specialization. The topic and content of the courses will vary from year to year depending on the availability of expert staff. Examples of specialized topics that may be offered include: Second Language Reading; Intercultural Language Education; Teaching English for Academic Purposes; Teaching Business English; etc.

Pre-requisite: None

AHGC7310 IT & LANGUAGE TEACHING AND LEARNING

This course focuses on the application of IT, digital technology and new media in language education. The students are introduced to current software, mobile applications and classroom facilities (e.g. smartboards) and they explore the principles used in integrating new technology into teaching and learning inside and outside the classroom.

Pre-requisite: None

AHGC7311 LITERATURE AND ENGLISH LANGUAGE LEARNING

This course considers the role of literature in language learning from a theoretical and practical perspective. Topics covered may include the role of literature in the service of linguistic imperialism, the role of stylistics in grammar instruction, and the place of the literary text in communicative and intercultural language learning task design.

Pre-requisite: None

AHGC7312 TEACHING THE LANGUAGE SKILLS

This course focuses on the teaching and learning of specific language skills, broadly reading, writing, listening and speaking. There is also coverage of discrete subskills, such as pronunciation, or reading and listening for gist and detail, and discussion of process and product-oriented perspectives on writing and speaking. Students consider different approaches to the teaching of skills and evaluate and design tasks that promote skills development.

Pre-requisite: None

AHGC7313 TRANSLATION & APPLIED LINGUISTICS

This course looks at the historical, current and contested role of translation in the language classroom. The course covers theoretically-informed practice, from the unfashionable era of 'grammar translation' to the current re-evaluation of the role of translation practices in language learning and teaching.

Pre-requisite: None

AHGC7314 CLASSROOM INTERACTION

This course focuses on the nature of classroom discourse. Various models of discourse analysis

are introduced, and students apply them to different situations to analyze styles of learning and teaching. Classes studied range from traditional to progressive, and the language of learning may be English, Portuguese and/or Chinese.

Pre-requisite: None

AHGC7396 APPLIED THESIS

Under the supervision of an instructor, each individual student designs, carries out and writes up a substantial piece of action research based on classroom observation and/or teaching.

Pre-requisite: AHGC7306/PORT7000

AHGC7399 ACADEMIC THESIS

Under the supervision of an instructor, each individual student designs, carries out and writes up a substantial piece of theoretical research based on an in-depth study of a particular research area, a review of the research literature, the formulation of relevant research questions, and the development of a method of addressing these questions.

Pre-requisite: AHGC7306/PORT7000

AHGC7998 PROJECT REPORT

The students will need to produce a report (6000 to 9000 words) in which they discuss some important aspects/areas of a substantial translation project or interpreting project that they have completed. The students can describe their project with regards to its nature, background, major components, and relevant procedures and processes. They can elaborate on the project's characteristics and (special) requirements, and evaluate their own performance, particularly in relation to some difficulties or challenges, reflecting on their use of tactics, strategies and solutions. The Project Report can also address some technical, practical and ethical issues or topics.

Pre-requisite: AHGC7003 and an average minimum GPA of 2.7 in not less than two-thirds of the course requirement.

AHGC8000 RESEARCH ETHICS

The course Research Ethics will be conducted online. PhD students will be required to pass the web-based learning modules in the CITI Programme (Collaborative Institutional Training Initiative at the University of Miami). Human Subjects Research – Social-Behavioral-Educational (SBE) Modules that was picked for FAH PhD students, content includes history and ethical principles, defining research with human subjects, the federal regulations, assessing risk, informed consent, privacy and confidentiality, research with prisoners and with children, research in public elementary and secondary schools, international and internet-based research, unanticipated problems and reporting requirements in social and behavioural research.

Pre-requisite: None

ARTD7000 ART HISTORY

The fourteen seminars of this course are organized in chronological order, with each focusing on one historical period and its corresponding artistic themes, ranging from Neoclassicism, Romanticism, Realism, Impressionism, Post-Impressionism, Cubism, Fauvism, Constructivism, Dadaism, Surrealism, Abstract Expressionism, to Minimalism, and the list goes on. The seminar will examine the multiple-layered modernity and contemporariness of these art movements by contextualizing them in the sociocultural transformations, as well as their relationships with public audiences, urban cities, and global cultures. Through this course, students will not only enhance their understanding of the historical mode of Western modern and contemporary art, but they will also cultivate their keen insights into the humanistic thoughts related to the evolving art movements, such as humanism, modernism, and post-modernism.

Pre-requisite: None

ARTD7001 ART THEORY

This course aims to investigate art theory, aesthetics, and philosophy related to the formal and perceptual aspects of arts and creative media. It sheds light on how art communicates and what art expresses through different styles, genres and media. The goal is for students to develop a

holistic understanding of art, which serves as fundamental training for artists and art researchers.
Pre-requisite: None

ARTD7002 ACADEMIC WRITING FOR ARTS

This course focuses on the practice of writing. Considering writing as a creative practice, this course aims to guide students to articulate their artistic ideas and works clearly and eloquently. The specific content of this course centers on formulating and developing arguments, evaluating artistic works, stating the goals and process of artistic projects, expressing personal experimentation with art, analyzing different features of artistic media and forms, and explaining aesthetic and cultural characteristics of artworks.

Pre-requisite: None

ARTD7003 ART EXHIBITIONS

This course focuses on the study of the most important aspects of the modern art system: exhibitions. Through the organic composition of three sections: exhibition theory, exhibition techniques and exhibition practice, the course attempts to let students understand the mechanism of how modern art exhibitions operate, and guides students to participate in the planning and management of art exhibitions based on the analysis of famous exhibition cases, both domestic and international, so as to serve the needs of the Macao SAR Government's strategy of moderate cultural diversification.

Pre-requisite: None

ARTD7998 PROJECT REPORT

For creative practice students, the Project Report should consist of two elements: 1) a formal presentation of a visually coherent and conceptually unified body of professional quality work in art in the form of solo or group exhibitions or performances; and 2) a formally written academic report that focuses on the artist statement and a theoretical analysis of his/her own body of work in the thesis exhibition. The purpose of the written report is to help students clarify and express their artistic idea in a logical and written format which will in turn enhance the visual communication and expressive power of the creative work.

Pre-requisite: None

ARTD7004 PERSPECTIVE AND COMPOSITION

Linear perspective is one of the most basic techniques of Western painting, and it is also a key to understanding the revolutionary changes in Western art history from the Renaissance to the modern era. However, perspective is not limited to linear perspective. Given that all the ancient peoples of the East, including China, had their own methods of expressing depth, perspective is essentially nothing more than methods for creating spatial depth in graphic painting. This course adopts a teaching method that combines the principle of perspective in the classroom and the life drawing practice in the city, trying to allow students to sketch the urban landscape of Macao, run the perspective principles learned in the picture, and support and enrich students' urban sketches through the understanding and application of various perspective principles.

Pre-requisite: None

ARTD7005 SKETCHING FROM NATURE AND ARTISTIC CREATION

Taking sketching as a way of organizing visual experience and thoughts, this course intends to enhance students' abilities in life drawing with various media under the guidance of a faculty member. Students will learn how to observe nature and life by both the eye and the hand, and to explore various creative strategies through sketching exercises and explorations of different drawing media. Specifically, students will learn how to record and work out ideas for their individual projects by means of observing and sketching on location. Skills acquired in this course will lay a good foundation for student's future professional career.

Pre-requisite: None

ARTD7006 DIGITAL AND NEW MEDIA ART

This course consists of ten practice sections that are designed to allow students to develop the

technical and conceptual skills necessary to become professional digital media designers and artists. Students will receive hands-on guidance with electronics for making kinetic and interactive digital arts (sensors, motors, lights, microprocessors, and storage devices), and computer programming for the Internet, installations, and presentations. The five critique sections provide opportunities to present their works and to view and critique works by their fellow students.

Pre-requisite: None

ARTD7007 PROFESSIONAL PRACTICE IN ARTS

A strategic plan of one's career contributes a great deal to the success of an artist. This course helps students to gain insight into the business practices and marketing strategies in the field of arts and prepare them with necessary organizational and business skills to become professional artists. The course structure includes lectures, site visits, and invited speakers from successful professional artists.

Pre-requisite: None

ARTD7008 STUDIO AND PROFESSIONAL PRACTICE IN CHINESE PAINTING I

As a key component of the first year students majoring in Chinese painting, this course explores creative potentials in different genres of traditional Chinese painting such as landscape and figure painting. Traditional Chinese painting's materiality, making, viewership, and underlying philosophy constitute the major concerns of the course. Students will have the opportunities to copy and rework some exemplary Chinese painting works so as to build solid painting skills and to cultivate a deep understanding of the key features of Chinese art.

Pre-requisite: None

ARTD7009 STUDIO AND PROFESSIONAL PRACTICE IN CHINESE PAINTING II

As a key component of the second year students majoring in Chinese painting, this course explores creative potentials in modern and contemporary Chinese painting. Experiments embodied in modern and contemporary Chinese paintings such as those by the Lingnan School as well as the more recent new ink paintings are the focus of this course. Students will have the opportunities to experiment with possibilities of Chinese pictorial art different from those in the Western tradition, to sharpen creative painting skills, and to create a collection of artworks for their final painting project.

Pre-requisite: None

ARTD7010 STUDIO AND PROFESSIONAL PRACTICE IN CHINESE PAINTING III

As a key component of the third year MFA students majoring in Chinese painting, this course helps students develop their final painting projects under the supervision of their thesis committee. In addition, students work with faculty members on the development of their painting projects specifically for the group exhibition context. Students are expected to contribute to exhibition designs and collateral materials, while studying the most recent approaches to curating pictorial arts.

Pre-requisite: None

ARTD7011 STUDIO AND PROFESSIONAL PRACTICE IN WESTERN PAINTING I

As a key component of the first year students majoring in Western painting, this course explores a variety of methods and innovations as seen in some canonical paintings and pictorial practices in Western art history. It is organized around two major topics: on the one hand, analysis of traditional Western painting materials, techniques, processes, procedures as well as the creation of studio spaces and on the other, development of students' own painting style and individual studio practice by creative copying and re-working of works by canonical painters and by studying their working environments.

Pre-requisite: None

ARTD7012 STUDIO AND PROFESSIONAL PRACTICE IN WESTERN PAINTING II

As a key component of the second year students majoring in Western painting, this course explores a variety of methods and innovations as seen in some contemporary canonical paintings

and pictorial practices in the West. It is organized around two major aspects related to contemporary painting: first, a thorough thinking through the phenomenon of the so-called "the death of painting" and the innovative strategies used by contemporary leading artists to revive painting; second, an intensive engagement with these strategies via students' own pictorial practices.

Pre-requisite: None

ARTD7013 STUDIO AND PROFESSIONAL PRACTICE IN WESTERN PAINTING III

As a key component of the third year MFA students majoring in Western painting, this course helps students develop their final painting projects under the supervision of their thesis committee. In addition, students work with faculty members on development of their painting projects specifically for the group exhibition context. Students are expected to contribute to exhibition designs and collateral materials, while studying the most recent approaches to curating pictorial arts.

Pre-requisite: None

ARTD7014 STUDIO AND PROFESSIONAL PRACTICE IN DIGITAL AND NEW MEDIA I

This is an introductory postgraduate seminar designed to help students formulate a visually coherent and conceptually unified body of work in digital and new media art through studio practice and research under the guidance of their MFA advisors, as well as critical analysis of their works in progress in a group critique environment by the professor and peers in class. This in-depth analysis helps students understand and reflect upon each other's artistic approach, concepts, mediums, and strategies being used, as well as the uniqueness of his/her work in contemporary cultural context.

Pre-requisite: None

ARTD7015 STUDIO AND PROFESSIONAL PRACTICE IN DIGITAL AND NEW MEDIA II

This is an intermediate postgraduate seminar designed to help students foster the development of a visually coherent and conceptually unified body of work in digital and new media art through studio practice and research under the guidance of his/her MFA advisors, as well as a critical analysis of their works as they progress in an interdisciplinary group critique environment. In this course, students together with their professor and peers will discuss and critique their works in progress. These in-depth critical explorations help students clarify and articulate his/her artistic concept, spiritual expression, and strategies being employed, as well as the work's significance in contemporary cultural context.

Pre-requisite: None

ARTD7016 STUDIO AND PROFESSIONAL PRACTICE IN DIGITAL AND NEW MEDIA III

This is an advanced postgraduate seminar designed to help students strengthen a visually coherent and conceptually unified body of work in digital and new media art through studio practice and research under the guidance of his/her MFA advisors, as well as a critical analysis of their works as they progress in a cross-disciplinary group critique environment. In this course, students together with their advisors, peers and guest artists provide constructive criticism and in-depth examination of the students' works in progress, which will help students think outside the box, contextualize their practices in an international contemporary art world, and stimulate students' conceptual and artistic growth and maturity.

Pre-requisite: None

ARTD8000 ART CANON STUDIES I: WESTERN TRADITIONS

As the first course in the What is Greatness series of classes in DFA curriculum, it is not intended as an introduction to Western art history, but an attempt to show and tell the students what major artworks have constituted the changing "canons" in Western art tradition and for what reasons these artworks have been considered "great". The twelve case studies revolve around twenty artworks and related makers. Focusing on close looking and close reading, this course functions as a basis and a starting point for students' own creative process. Metaphorically speaking, artworks under discussion construct a "musée imaginaire" of the Pantheon kind, starting from

great Western artists and their works of the antiquity, ending with three prestigious East Asian artists actively participating in the contemporary reformulation of the Western art tradition in a postmodern and postcolonial world.

Pre-requisite: None

ARTD8001 ART CANON STUDIES II: CHINESE TRADITIONS

The goal of the course is two-fold. It rethinks the notions of “canon”, “master-pieces”, “greatness”, “quality”, and “good work”, in an attempt to construct, for practicing artists, an alternative canon of artworks made in both traditional and recent Chinese art. Meanwhile, the course explores an overdetermined approach to artistic creation by means of close looking, close reading, and “close living”, namely, by a practice of paying serious, deep, and open-minded attention to a single thing: one artwork, one image, one object, one site, along with its surrounding ecology.

Pre-requisite: ART CANON STUDIES I: WESTERN TRADITIONS

ARTD8002 TRANSCULTURAL ARTS STUDIES

Unlike the first two courses that treat artistic masterpieces in the West and China separately, “Transcultural Art Studies”, the third course in the What is Greatness series in DFA curriculum, is dedicated to break down the barriers between art traditions. Focusing on the artworks of four “Great Hybrid Periods”, namely, Han and Tang dynasties, Song and Yuan dynasties, Ming and Qing dynasties, and modern times in China, corresponding to the Late Antiquity, Middle Ages and Renaissance, Enlightenment, and Early Modern periods in the West, the course aims to reveal the profound mutual influence and interaction between traditions, such as contributions of the West to Chinese art and China’s contributions to the world art. It tells a transcultural art story from a global perspective, the beginning point of which is art in China (including Macau).

Pre-requisite: None

ARTD8003 AESTHETICS AND ART RESEARCH METHODS

This graduate seminar requires student participants to engage in some intensive reading and writing activities. The major topics for discussion include twelve groups of key concepts — eight related to modern/postmodern aesthetics (whenever possible in comparison with relevant traditional Chinese “aesthetic” concepts), while five to artistic methods. It is hoped that the course will help students not only have an in-depth comprehension of trends and changes in aesthetics and art research from the Enlightenment up to the present time, but also cultivate a certain degree of capacities to materialize theoretic conception in actual artistic practices.

Pre-requisite: None

ARTD8004 GREAT MOMENTS OF HUMANITIES AND SCIENCE

This course introduces Doctor of Fine Arts students to the most significant and inspiring moments of the humanities and sciences disciplines. The course is divided into 5 parts that cover the major disciplines in humanities and science, including History, Philosophy, Literature, Physical and Nature sciences, and Life and Social sciences. Excerpts from selected written works provide the course backbone and a cohesive narrative describing the journey humanity has made through each discipline. This will be supplemented with multi-media learning materials and in-class demonstrations.

Pre-requisite: None

ARTD8005 INTERDISCIPLINARY SEMINAR: WHAT IS CREATION?

This is the first course in the Creation series of classes in DFA curriculum. It intends to lay a solid foundation for art practice classes in the series and to inspire students’ desire to create. Adopting the form of team-teaching, it exposes students to multiple perspectives and knowledge on creation and creativity across several different domains. The course consists of several components, including lectures, studio projects, and creative art writing. Fundamental questions will be raised during the course of the semester, such as the complex relations between creation and human nature, the unique role artistic creation plays for humans in making sense of the world, the subtle equilibrium between creation and destruction, and the inventive tension between image making and writing.

Pre-requisite: None

ARTD8006 ARTISTIC EXPERIMENTS I: WESTERN MEDIA

This course explores a variety of innovations in painting practice. It is organized around three major topics: painting materials and techniques, painting processes and procedures, and the perception of painting; namely, painting's materiality, making, and viewership. Encouraging students to experiment with new possibilities of pictorial art, the course aims to help them build painting skills, cultivate a degree of ability in grappling with the unnoticed and the ignored in the human psyche, and ultimately, realize an inspiring self-discovery.

Pre-requisite: None

ARTD8007 ARTISTIC EXPERIMENTS II: CHINESE MEDIA

This course explores innovative potentials in traditional and new Chinese pictorial media. Chinese painting's materiality, making, viewership, and underlying philosophy constitute the major concerns of the course. Students will have the opportunities to experiment with possibilities of pictorial art different from those in the Western tradition, to build creative painting skills, and to cultivate a deep critical understanding of one of the key features of Chinese art: pursuing the Dao.

Pre-requisite: None

ARTD8008 ARTISTIC EXPERIMENTS III: DIGITAL MEDIA

This course is designed to help doctoral students articulate their digital art and new media art projects through studio practice and critical analysis of the works as they progress in preparation for their exhibition and thesis. Students are encouraged to pursue a focused personal vision and creative activities through a combination of studio practice and group critique of the students' works as well as their artist statement and artistic concept.

Pre-requisite: None

ARTD8009 ART EXHIBITION AND CULTURAL MANAGEMENT

Focusing on contemporary art ecology and cultural heritage resources in the Greater Bay Area, this course explores how varied art management systems and curatorial practices have been working. It is organized around three major themes: modern exhibition systems, classification and management practices of art institutions, and art curation and research. The goal of the course is to develop students' ability to understand current art institutional environments and research resources, and to correlate artistic creation and curatorial practices.

Pre-requisite: None

ARTD8999 DOCTORAL THESIS

In order to promote interdisciplinary approaches to artistic creation, we require the final doctoral thesis to be co-supervised and accessed by two faculty members of the University of Macau, a practicing artist and a theory-oriented faculty member in the programme; or alternatively, a practicing artist in the programme and a faculty member from any department at the university whose expertise is appropriately related to the thesis. The thesis consists of three parts: First, closely tutored by instructors, students create a visually coherent and conceptually unified body of artworks in media of their choice in reference to the "great art canon" they themselves have formulated in previous years of doctoral studies. Second, toward the end of year 4, students are required to curate a solo exhibition of these works. Third, to go with the exhibition, students should compose a series of essays, verbally commenting the works and the curatorial strategies.

Pre-requisite: None

CCHC7000 INTRODUCTION OF CHINESE HISTORY AND CULTURE

The course is the foundational course for the programme. It introduces students the existing literature on studying Chinese history and culture as well as the major theories and methodologies for the subject, allowing them to have the basic knowledge of the subject, which shall guide them to study the subject with a sound foundation and an appropriate approach and from an advanced starting point.

Pre-requisite: None

CCHC7001 SEMINAR ON CHINESE CLASSICS

The course, via carefully studying the existing Chinese classics including, e.g., "Four Books and Five Classics," "Twenty Four Histories," writings by Lao Zi and Zhuang Zi, "Yangming's Philosophy of Mind," etc., shall cultivate students' capability of reading and understanding Chinese classical writings, help them accurately grasp the core values of Chinese traditional culture, and guide them along with a critical and cautious thinking line and other related historical materials to analyze and decode the first hand historical texts, truly learning Chinese history and traditional culture by solid historical evidence and deconstructing texts.

Pre-requisite: None

CCHC7002 ANCIENT CHINESE INTELLECTUAL HISTORY

This course is to trace the development of Chinese thoughts and intellectual activities, from the ancient time to the premodern time with a focus on the periods of Tang, Song and Ming, and to show the evolving ideas and diverging theories of the core Chinese thoughts and philosophies along the change of social and political circumstance. It will try to find the lasting fundamental elements of traditional Chinese thoughts, no matter how their discourses and expressions on surface differed, as well as their advancement and continuity.

Pre-requisite: None

CCHC7003 THE INTANGIBLE AND SPIRITUAL CIVILIZATION OF TRADITIONAL CHINA

Focusing on the intangible civilization and spiritual civilization of traditional China, the course will help students learn about all kinds of traditional Chinese intangible arts and culture as well as artistic and cultural creativities, such as literature, music, dance, drama, painting, craftwork, folk custom, etc., to broadly and deeply grasp the spiritual and moral dimension and wisdom of China, various historical situations and delicate and emotional aspects of the complicated human experiences displayed and passed on by Chinese intangible civilization, which have been hardly expressed by official documents.

Pre-requisite: None

CCHC7004 THE MAJOR TRANSFORMATIONS IN CHINESE HISTORY

The course will choose the major topics in Chinese history, such as the First Emperor Qin who unified China, the restoration and decline of Ming and Qing, etc., to describe major changes in Chinese institutions, traditions, and society during the different historical phases, the main phenomena and features of Chinese history, and the historical legacies, so that the students could learn about the main issues and direction of Chinese history, the causes for revolutions and reforms, namely where China is from and where China is moving toward, as well as the historical mission of the Chinese people nowadays.

Pre-requisite: None

CCHC7005 CHINESE LITERATURE AND CULTURE IN MODERN TRANSITION

The course will portray the transition of Chinese literature and culture in modern time, and explain the causes to such a change. It will examine the profound impact of the literary and cultural transformation on China, with a focus on the major intellectual debates, advancement and divergence, to find their relationship with the political and social development.

Pre-requisite: None

CCHC7006 MACAO IN CHINESE HISTORY

The course will trace the activities of Western missionaries and businessmen in Macao and their impact on China via Macao since the sixteenth century. It will measure the historical implications and effects of Sino-Western interactions through Macao during the same period and investigate the role of Macao in modern Chinese history, especially during the wartimes and revolutionary times, as well as the influence the major historical events of the mainland brought to Macao.

Pre-requisite: None

CCHC7007 PEDAGOGICAL SEMINAR: CURRICULAR DESIGN ON TEACHING CHINESE HISTORY, CULTURE AND LANGUAGE

This is a pedagogical seminar, focusing on the curricular design and the method of teaching Chinese history, culture or language for the students of elementary and high schools. It will use class discussions and presentations to analyze and solve the most common problems in teaching the subject, technically, culturally and socially, and train and guide students to make curricular design for the course of "Chinese History," "Chinese Culture" or "Chinese language," and strengthen their teaching capability and skill through practice, making a well-designed, very practical and well-suited curricular design for the courses.

Pre-requisite: None

CCHC7008 TOPICS IN CHINESE LANGUAGE

The course will teach and train students to accurately and skillfully read classical Chinese language through practice, strengthen their writing capability with modern Chinese language, focusing on correcting typical errors that often occurred in using Chinese language, in terms of grammar, punctuation, writing styles, way of expression, etc. It will also introduce Xu Shen's study on Chinese characters and teach students about how to see the social and cultural and implications deeply contained in linguistic expressions, as well as the subtlety, depth, richness and the enormous power and effect of Chinese language as the carrier of a culture.

Pre-requisite: None

CCHC7009 CHINESE HISTORY REFLECTED BY ARTS AND LITERATURE

The course will use ancient and modern arts and literature to teach students Chinese history, training them to read historical messages and hidden truths from images, artifacts and unofficial writings and to see the emotional and delicate aspects of human experiences as well as the historical context of ancient Chinese arts and literature.

Pre-requisite: None

CCHC7991 PROJECT REPORT (for intake students after 2022/2023)

Students, guided and supervised by individual instructor on a person-to-person basis, are required to independently and individually complete a research project on Chinese history and culture as well as the pedagogy for teaching that subject with an in-depth report. They shall apply the knowledge and the research methods of Chinese history and culture they learned to enhancing and strengthening their capability of doing research project and writing academic report, as well as designing courses and pedagogy for teaching the subject. The main assignment and final product of this course is a project report on one of the learned subjects.

Pre-requisite: None

CHLL1000 大學語文 UNIVERSITY CHINESE

本科是一門基礎課，供全校各專業同學修讀。其內容包括古今中外有代表性的文學作品，包括詩歌、散文和小說。通過教學的多個環節，使同學增加對文學作品的興趣，提高閱讀和分析的能力，進而提高語文的表達能力。

先修科目：沒有

CHLL1001 現代漢語 MODERN CHINESE LANGUAGE

本課程是漢語言文學專業的必修基礎課。通過實例分析、小組討論報告等教與學的手段，使學生能夠系統掌握現代漢語的文字、語音、詞彙和語法等基本理論和基本知識，學會語音、詞彙和語法分析的基本技能，培養和提高學生分析、運用語音、詞彙和語法知識的能力。

先修科目：沒有

CHLL1002 漢語語言學概論
INTRODUCTION TO CHINESE LINGUISTICS

啟發學生觀察和討論各種語言、方言現象，將日常語言現象與語言的基本概念、性質、結構、演變規律，以及其他社會現象聯繫起來，培養學生對語言現象的敏感度，以及自覺將語言學理論運用在語言分析、語言運用、語言教學、語言規劃等方面。學生通過實例分析，掌握語言學的基本理論和知識，對日常語言現象具備正確、科學的態度。

先修科目: 沒有

CHLL1003 中國當代文學
CONTEMPORARY CHINESE LITERATURE

本課程主要探討二十世紀下半葉以來中國文學之歷史發展的規律與成就，並旁及其與古典文學、外國文學和現代文學之關係。課程的重點內容是對當代文學重要作家的代表作品進行歷史和美學的解讀，並對朦朧詩派、先鋒派等重要文學思潮和流派，對山藥蛋派、探求者、他們詩社等重要文學社團，將結合作品進行重點介紹，且以互動式、啟發式教育，激發同學的獨立思考與課堂討論，從而達到化課堂所學為自身學識的教學目的。

先修科目: 沒有

CHLL1004 中國現代文學
MODERN CHINESE LITERATURE

本課程主要探討二十世紀上半葉中國文學之歷史發展的規律與成就，並旁及其與古典文學、外國文學之關係。課程的重點內容是對現代文學重要作家的代表作品進行歷史和美學的解讀，並對新人文主義、新感覺派、九葉詩派等重要文學思潮和流派，對文學研究會、創造社、新月社等重要文學社團，將結合作品進行重點介紹，且以互動式、啟發式教育，激發同學的獨立思考與課堂討論，從而達到化課堂所學為自身學識的教學目的。

先修科目: 沒有

CHLL1005 粵語與粵文化
CANTONESE LANGUAGE AND CULTURE

本課程通過方言調查、實地考察、觀賞表演、分析討論等方式，引導學生探討粵語與粵文化各個方面的密切關係，諸如宗教信仰、社會風俗、戲曲藝術、飲食文化及中西語言文化的融合等。本課程旨在深化學生的地域語言文化修養，培養其收集、分析及運用地方文獻和口述資料的能力。

先修科目: 沒有

CHLL1006 中國古典詩歌
CLASSICAL CHINESE POETRY

本課程引導學生閱讀、分析、闡釋先秦至清代的詩、詞、曲作品，通過討論、報告、撰寫論文等方式，啟發學生分析詩歌的語言、意象、韻律、格調、風格、結構、詩體、主題、題材等，探討古代詩歌的發展演變歷程及其與社會歷史背景的關係，並練習創作舊體詩詞的格律和技巧。本課程旨在使學生熟悉古典詩歌的代表作家作品和發展歷程，並培養其獨立欣賞、分析、批評古典詩歌的能力。

先修科目: 沒有

CHLL1007 中國古典小說
CLASSICAL CHINESE FICTION

本課程引導學生閱讀、分析、闡釋中國古典小說代表作品，通過討論、報告、撰寫論文等方式，啟發學生分析小說的文本、語言風格、主題、題材類型、敘事結構、人物塑造等，探討古典小說的發展演變及其與社會歷史背景的關係。

先修科目: 沒有

CHLL1008 中國歷史文獻選讀
SELECTED READINGS IN CHINESE HISTORIOGRAPHY

本課程選讀歷代文獻篇章，從先秦《尚書》至近代《盛世危言》，學習當中主旨以及語言文辭運用，增進文史知識，提升人文素質，有利自身品格修養。

先修科目：沒有

CHLL1009 文學創作
CREATIVE WRITING

本課程旨在透過講課、習作、小組討論等，增強同學的文學創作能力。課程內容包括：1. 訓練同學掌握規範的白話文、減少病句和粵方言痕跡、應用文寫作、詞語搭配、標點符號、使用字典詞典等；2. 講解文學創作的要素，如觀察、構思、想像、表達等；3. 引導同學掌握小說、散文、詩等各類文體的寫作。

先修科目：沒有

CHLL1010 通俗文學與文化
POPULAR LITERATURE AND CULTURE

本課程以現當代民間文學和通俗文學文本為研究對象，運用多媒體教學、社會調查、課堂討論等手段，引導同學探究民間文學和通俗文學中的題材種類，表達藝術手法，共同特徵與差異，以及流行文化的思維表達，進而追蹤當代大眾文學的發展變遷、文化底蘊及其所體現的社會大眾意識。本課程將聯係中國現當代通俗文學與民間文學的實際，從民俗學乃至文化人類學的理論視野探討民俗文化當代發展的規律，並指導學生對澳門民間文學進行採集與研究。

先修科目：沒有

CHLL1011 實用中文
PRACTICAL CHINESE

本課程的目標是訓練同學有效地應用中文到日常生活和工作中去，培養和提高同學的中文應用能力和水平，無論將來從事什麼行業，都可運用中文為其溝通和發揮能力的工具。課程將採用講課、討論和練習的方式授課。講授的內容包括公函、通告與啟事、計劃書和私人書信等。

先修科目：沒有

CHLL1012 對外漢語教學 I
CHINESE FOR NON-NATIVE SPEAKERS I

In this course we learn Mandarin Chinese at a beginning level. It aims at students who have had no prior knowledge of the Chinese language. In the class, students work on massive oral exercises in order to build up and improve their Chinese pronunciation skills. The course helps students better understand Chinese by introducing them to fundamentals of Chinese syntax and morphology. The course also introduces various aspects of Chinese culture in order to reduce the cultural obstacles to Chinese language learning.

Pre-requisite: None

CHLL1013 對外漢語
CHINESE AS A SECOND LANGUAGE

This course is designed to develop oral skills and vocabulary knowledge in preparation for students to conduct day-to-day conversations with confidence. Situational dialogues, pronunciation drills, and comprehension exercises will strengthen students' competence on conversational skills. Chinese culture will also be introduced. Follow this course to gain access to the incredible opportunities available to Chinese speakers.

Pre-requisite: CHLL1012 or interviewed by the instructor.

CHLL2000 古代漢語 I
CLASSICAL CHINESE LANGUAGE I

本課程側重古代漢語知識通論，結合古代漢語各類材料，講授理論知識，分析語料實例。學生通

過研讀各種類型的古代漢語材料，了解古代漢語的語言面貌，重點掌握古代漢語文字、詞法與語法內容，在此基礎上系統掌握古代漢語領域相關知識。學生能將這些古漢語知識運用在實際的古文閱讀和理解上，對於古籍和歷史文獻有一定的閱讀和分析能力。

先修科目: 沒有

CHLL2001 中國古典文學：先秦至唐五代
CLASSICAL CHINESE LITERATURE: PRE-QIN TO TANG AND FIVE DYNASTIES

本課程引導學生閱讀、分析、闡釋先秦至唐五代的古典文學代表作品，通過討論、報告、撰寫論文等方式，啟發學生探討古典文學發展的重要時期和階段，各類文體風格，主要作家和流派，文學發展與政治、宗教、思想、文化的關係等。本課程旨在使學生瞭解中國古典文學的特質和發展歷程，並培養其獨立欣賞、分析、批評古典文學作品的的能力。

先修科目: 沒有

CHLL2002 古代漢語 II
CLASSICAL CHINESE LANGUAGE II

本課程側重古代漢語知識專論，結合古代漢語各類材料，講授理論知識，分析語料實例。學生通過研讀各種類型的古代漢語材料，了解古代漢語的語言面貌，重點掌握漢語音韻知識、音韻學術理念以及基本術語，並在此基礎上系聯古今音韻現象，了解音韻發展脈絡。學生能將這些古漢語知識運用在實際的古文閱讀和理解上，對於古籍和歷史文獻有進一步的閱讀和分析能力。

先修科目: CHLL2000

CHLL2003 中國古典文學：宋代至清代
CLASSICAL CHINESE LITERATURE: SONG TO QING DYNASTIES

本課程引導學生閱讀、分析、闡釋宋代至清代的古典文學代表作品，通過討論、報告、撰寫論文等方式，啟發學生探討古典文學發展的重要時期和階段，各類文體風格，主要作家和流派，文學發展與政治、宗教、思想、文化的關係等。本課程旨在使學生瞭解中國古典文學的特質和發展歷程，並培養其獨立欣賞、分析、批評古典文學作品的的能力。

先修科目: CHLL2001

CHLL2004 中國現當代作家專題
TOPICS IN MODERN AND CONTEMPORARY CHINESE WRITERS

在系統、深入地閱讀漢語新文學作品並瞭解中國現當代文學史的基礎上，對漢語新文學發展過程中的若干問題作較為深入、專業的分析、解讀，重點解剖在中國現當代歷史上產生過重大影響或出現過較明顯困擾的文學現象，並從文學、美學、社會學、文學心理學等多個角度對這些文學現象進行理論分析，以提高同學的文學批評和理論判斷能力，為進一步介入漢語新文學的研究作準備。此課程將讓學生分組自選課題進行學術討論練習，教師進行指導並對分組交流進行評分。

先修科目: CHLL1003或CHLL1004

CHLL2005 世界華文文學
WORLD CHINESE LITERATURE

世界各地的華人在各自不同的生活環境中，適應著不同時代和歷史的要求，創作了大量與祖國文學有著不同特色的文學作品。這些作品從不同角度，側面反映了不同地域華人的生活與人生追求，對這些文學創作的研究，有助於學生對各地華人社會的瞭解。通過對不同地域的華文文學的歷史與現狀描述，重要的作家作品研究，以及不同文學流派的介紹等，使學生對各地的華文文學有整體的瞭解。本課程還將引導學生自主地研究和討論華文文學的一些重要議題。

先修科目: CHLL1003或CHLL1004

CHLL2006 中國古典散文
CLASSICAL CHINESE PROSE

本課程引導學生閱讀、分析、闡釋先秦至清代的優秀散文作品，通過討論、報告、撰寫論文等方

式，啟發學生分析古典散文在體裁、題材、表現技巧、語言風格等方面的特點和發展演變，並詮釋其歷史文化背景。本課程旨在培養學生獨立欣賞、分析、批評古典散文的能力，並提高其寫作文章的水平。

先修科目：沒有

CHLL2007 先秦諸子閱讀
READINGS IN PRE-QIN CLASSICS

本課程選擇閱讀一至二部先秦諸子的經典著作，通過討論、報告、撰寫論文等方式，啟發學生分析經典著作的思想內涵和語言形式，探討其對中國思想文化傳統的形成和發展的影響，並介紹新近出土的先秦諸子資料和學術研究動態。本課程旨在使學生瞭解作為中國思想文化源頭和主流的先秦諸子著作和思想，深化對文學和文化傳統的認識，並培養其批評性思考和分析研究的能力。

先修科目：沒有

CHLL2008 現代漢語語法語用學
MODERN CHINESE GRAMMAR AND PRAGMATICS

本課程是漢語言文學專業的必修基礎課。通過實例分析、小組討論報告等教與學的手段，學生能系統地掌握現代漢語的語法學、語用學的基本理論和基本知識，學會語法、修辭、語用的基本技能，培養和提高學生分析語法和判斷語法錯誤以及修正語法錯誤的能力，增強語言的表達效果。

先修科目：CHLL1001或CHLL1002

CHLL2009 漢語詞彙學專題
SPECIAL TOPICS IN CHINESE LEXICON

該課程專門為漢語言文學專業或有志於系統學習漢語詞彙知識的本科生開設。通過該課程的學習，學生可了解漢語詞彙的基本概念和構詞原則，並運用這些知識分析漢語乃至其他語言的詞彙，進而在生活和學習中更加準確地運用漢語詞彙。

先修科目：CHLL1001 或 CHLL1002

CHLL2010 唐宋詩詞
POETRY OF TANG-SONG PERIOD

本課程引導學生閱讀、分析、闡釋唐宋詩詞的優秀作品和相關理論批評著作，通過討論、報告、撰寫論文等方式，啟發學生探討唐宋時期的主要詩詞作家、重要發展階段、詩詞體式的格律和表現特點等，並練習創作舊體詩詞的格律和技巧。本課程旨在使學生認識唐宋詩詞的傑出成就，熟悉優秀詩詞作家和作品，並提高欣賞、分析、批評、研究詩詞的能力。

先修科目：沒有

CHLL2011 現當代文學經典作品閱讀
READINGS IN MODERN AND CONTEMPORARY WORKS

中國現代文學發展的歷史雖然只有短短幾十年，但值得選讀的作品實在不少。這門課引導學生重點閱讀魯迅、郭沫若、李金發、戴望舒、錢鍾書、張愛玲、穆旦、廢名、汪曾祺、王小波、北島等人的富有經典意義的作品，並通過課堂上分析和討論這些有代表性的作品，培養和提高學生獨立思考和分析文學作品的 ability。本課程會聯係古今中外文學現象，發動學生討論經典的定義和意義。

先修科目：沒有

CHLL2012 港澳語言研究
LANGUAGES AND DIALECTS SPOKEN IN HONG KONG AND MACAO

課程旨在讓學生充分認識和瞭解港澳豐富多彩的語言現象及其產生的政治、經濟和文化的原因，並以語用學的理論從不同角度分析其現象及規律，引導學生對港澳語言研究的興趣，並提高學生在社會實踐中正確運用語言的能力。

先修科目：沒有

CHLL2013 圖書編輯基礎 **BOOK EDITING KNOWLEDGE AND SKILL**

該課程教學目的使學生較全面瞭解、掌握編輯學的基本原理和編輯技能，對現代編輯，尤其是港澳地區中文圖書編輯的功能和特點有基本的認識。通過教學逐步提高學生組織、整理文字和圖像資料的能力，初步學會運用知識產權的基本概念處理出版中的各種問題。

先修科目: 沒有

CHLL3000 語言比較 **LANGUAGE COMPARISON**

本課程介紹語言比較和分析的一般原則和常用方法，重點放在兩種漢語方言或者漢語跟其他語言的比較分析上，讓學生對自己的母語或某種外語從語言結構上有清晰的認識，並培養分析語言的能力，使學生對不同語言或者不同方言之間異同規律的專業敏感及對其對應規律的認識。學生將學會對粵語和普通話的比較和分析，同時認識粵語和普通話的相同點和不同點。 先修科目: 沒有

CHLL3001 文學理論及批評 **LITERARY THEORY AND CRITICISM**

介紹重要文學理論流派如形式主義、結構主義、符號學、後結構主義、女性主義、後殖民主義等，同時配套介紹中西方文學理論批評範圍內的重要論著和相關作品，演示分別運用或綜合運用傳記批評、印象批評、形式主義文評、新批評、結構主義與符號學、後結構主義、女性主義、後殖民主義等中西方文學批評的模式與方法分析具體作品，以提高同學將文學理論運用於批評實踐的能力，並在積極參與課堂討論的前提下，深化與細化對文學理論和批評方法的掌握。

先修科目: 沒有

CHLL3002 傳統語文學 **CHINESE PHILOLOGY**

本課程旨在讓學生進一步加強傳統語文學的基本理論與基礎知識。通過深化訓練，提高學生閱讀和研究古代文獻的興趣與能力。教學手段包括古文分析、傳統材料釋讀、小組研習等多種方法。

先修科目: CHLL2000或CHLL2002

CHLL3003 語言學名著選讀 **READINGS OF CHINESE LINGUISTICS WORK**

選擇有代表性的語言學名著，學生進行分組研讀、討論、報告，通過對一些有代表性的漢語方言和外語的分析文章的研讀，提高學生分析語言、分析方言的能力；同時了解和認識一些有代表性的語言理論和流派。

先修科目: CHLL1001 或 CHLL1002

CHLL3004 文獻學 **BIBLIOGRAPHY**

本課程介紹傳統和現代文獻學，包括傳統的目錄學、版本學、校勘學及現代的文獻分類和檢索技術，通過討論、報告和實際練習，使學生掌握傳統文獻的傳播、分類、收藏及整理等基礎知識，瞭解各學科的重要典籍，認識各種中文工具書的使用方法及各類電子資源的檢索利用。本課程旨在使學生掌握和利用文獻資訊資源，瞭解本專業和相關學科的發展動向，並培養學術研究的能力。

先修科目: 沒有

CHLL3005 華南文學與文化 **SOUTH CHINA LITERATURE AND CULTURE**

本課程通過閱讀分析、課堂討論及實地考察，使學生瞭解華南地區文學與歷史文化發展的關係，特別是華南文學文化在近現代時期的重要轉變，並探討其代表人物的成就和影響。本課程旨在深化學生的地域文學文化修養，培養其收集、分析及運用地方文獻和口述資料的能力。

先修科目: 沒有

CHLL3006 漢語社會語言學
CHINESE SOCIOLINGUISTICS

社會語言學是一門與多學科交叉的語言科學。本課程通過實例分析、小組討論報告等教與學手段，使學生對語言學有更廣泛的認識，從語言社團的角度認識和研究語言的發展和演變，特別是語言與社會的關係、語言與區域文化的關係，認識澳門社會對於澳門語言的影響，同時讓學生掌握社會語言學的基本研究方法。

先修科目：CHLL1001 或 CHLL1002

CHLL3007 漢語方言學
CHINESE DIALECTOLOGY

課程通過實例分析、小組討論報告(各人運用自己的方言)等教與學的手段，讓學生瞭解漢語各種方言的語音、詞匯及語法的特點，認識漢語各方言之間的異同以及形成異同的歷史的和區域社會的原因，學會方言調查和方言研究的基本方法，進而培養學生運用現代語言學理論分析和研究漢語方言事實的能力。

先修科目：沒有

CHLL3008 中國古典戲曲
CLASSICAL CHINESE DRAMA

本課程引導學生閱讀、分析、闡釋古典戲曲的代表作品，通過討論、報告、撰寫論文等方式，啟發學生探討古典戲曲的起源、形式與發展。本課程旨在使學生瞭解古典戲曲作品的特質、類別、表演形式和發展歷程，並培養學生獨立欣賞、分析、批評戲曲作品的的能力。

先修科目：沒有

CHLL3009 漢語訓詁學與語義學
CHINESE ETYMOLOGY AND SEMANTICS

課程旨在讓學生系統掌握傳統訓詁學和現代語義學的基礎知識，以期貫通古今，洋為中用。本課程還要培養學生閱讀和研究古代文獻的興趣，鍛煉學生運用現代語義學理論分析漢語古今字義、詞義和句義的能力。

先修科目：沒有

CHLL3010 當代實用文體
CONTEMPORARY PRACTICAL AND PRAGMATIC WRITING

本課程以實用的題材為具體的教學內容，指導同學掌握各類型應用文的寫作特點，講授基礎的寫作知識，透過講解及學習，培養同學的寫作興趣及提升寫作能力。講授的不僅是私人書信或求職自薦的書寫，也有喜慶宴會的柬帖及喪務用的訃聞、哀啓等，甚至業務的公函、公啓、意向書、會議錄、報告等，以及與生活息息相關的各類法律文件，如契約、章則、規程等等。

先修科目：沒有

CHLL3011 澳門文學與文化專題
SPECIAL TOPICS IN LITERATURE AND CULTURE OF MACAO

該課程以介紹、考察和分析澳門歷史與文學專題為主要內容。專題主要包括：澳門文學、澳門城市發展和歷史建築、澳門宗教與信仰、澳門社會風俗、澳門飲食文化等專題。在課堂教學中重點引導學生認識澳門中西文化併存、融合和發展的原因及其特色，並通過教學和實地考察，培養學生收集、分析文學、歷史文化資料的能力，加深對澳門文化、文學的認識。

先修科目：沒有

CHLL3012 中國文化與藝術專題
SPECIAL TOPICS IN CHINESE CULTURE AND FINE ARTS

藉著對中國傳統文化的生活文化、表層文化及經典的介紹作為理解中國傳統文化核心理念的主要教材。中國文化的食療與養生、中國古代科技成就概論及反思、禪與中國文化、中國詩樂等都是本課程探討的重要主題。本課程希望藉此鞏固同學對中國文化藝術的認識及興趣，更能體驗傳統

文化與現代生活的關係。

先修科目: 沒有

CHLL3013 文心雕龍
WEN XIN DIAO LONG

南北朝是中國文學批評及文學理論的一個重要發展朝代,《文心雕龍》的出現絕對不是偶然的,它既集合了文學理論與批評的大成之外,更是至今的文學批評準則的楷模。本課程以《文心雕龍》一書為研討對象,探討該書的理論體系,對中國文學批評思想的影響及其批評方法等,並評價其在文學史上的地位。

先修科目: 沒有

CHLL3014 古代文體專題
SPECIAL TOPICS IN CLASSICAL LITERARY GENRES

本課程以介紹、考察和分析中國古典文學文體專題為主要內容。專題包括古典詩詞、古文、辭賦、古典戲曲、文言小說、章回小說、史傳文學等,旨在讓學生認識和了解中國古典文學中的各種文體的分類、源流、體式和風格,以及代表性作品,從而掌握各種不同文體的特質。

先修科目: 沒有

CHLL4000 中國傳統文論
TRADITIONAL CHINESE LITERARY THEORY

本課程引導學生閱讀、分析、闡釋中國傳統文學理論和批評的代表性著作,通過討論、報告、撰寫論文等方式,啟發學生探討傳統文論的基本命題、範疇及其發展演變,並與現代文學理論和批評相比較。本課程旨在使學生熟悉歷代文論家和批評流派,掌握傳統文論的基本內容和批評方法並運用於文學批評,及培養學生獨立思考和分析批評的能力。

先修科目: 沒有

CHLL4001 畢業專題 I
GRADUATION PROJECT I

本課程指導學生從中國語言、文學、思想、文化等領域選擇研究課題,撰寫學士學位論文。本課程旨在使學生掌握創新性思考、擬定研究課題、瞭解研究背景、尋找選擇文獻資料、撰寫學術論文的完整過程,熟練運用注釋、參考書目等國際標準文章格式,並提升中文寫作能力。

先修科目: 沒有

CHLL4002 中外文學比較
COMPARISON BETWEEN CHINESE AND FOREIGN LITERATURES

介紹比較文學這一跨文化、跨藝術的文學研究學科的目的、意義和方法,介紹比較文學研究范式的形成與發展、比較文學在未來人類文化發展中的地位,重點介紹中國文學與英語世界的互動,中西比較文學研究對傳遞中華文化、增進中外中國文學研究者的交流和互補等方面所具有的重要意義,令同學在通過相關課程掌握了中國文學文化與西方文學文化的基本知識的基礎上,對中西方的文學與文化有一整體的認識,對比較文學學科在中西方文學對話中所能發揮的作用有一深刻的認識。同時程選取中外美學史和文藝理論史上若干最具典型性且有現實意義的概念、範疇與論題,結合中西方小說名著、經典電影等藝術文本進行梳理與分析,廓清其基本內涵,確定其理論邊界,發掘其學術意蘊,為同學提供多維的文藝學知識視野,令其加深對文學藝術形式特徵及人文內涵的認知,並提升跨學科綜合分析的能力和文藝理論修養。

先修科目: 沒有

CHLL4003 畢業專題 II
GRADUATION PROJECT II

本課程指導學生從中國語言、文學、思想、文化等領域選擇研究課題,撰寫學士學位論文。本課程旨在使學生掌握創新性思考、擬定研究課題、瞭解研究背景、尋找選擇文獻資料、撰寫學術論文的完整過程,熟練運用注釋、參考書目等國際標準文章格式,並提升中文寫作能力。

先修科目: CHLL4001

CHLL4004 語言分析與研究
LANGUAGE ANALYSIS AND RESEARCH

本課程通過學生選擇自己方言裡的一兩個語言特點，引導學生對語言事實進行調查，在語料和數據搜集整理的基礎上，嘗試從比較分析的角度入手，學會對語言特點的性質進行分析和確定，然後運用語言理論以及採用科學的研究方法詮釋該語言特點。通過對實例的分析和研究，讓學生親自實踐分析語言和研究語言的全過程，以提高學生分析問題和研究問題的能力。

先修科目: CHLL1001或CHLL1002

CHLL4005 漢語語言學專題 I
SPECIAL TOPICS IN CHINESE LINGUISTICS I

對漢語語言學的某一個或幾個領域作較為系統的專題學習，培養學生對語言學的專業興趣，擴大學術視野，拓寬語言研究的角度，掌握一定的研究方法，從而提高學生對語言分析和研究的能力。教學方法為實例分析、小組討論報告等手段。

先修科目: CHLL1001或CHLL1002

CHLL4006 中國古典文學專題
TOPICS IN CLASSICAL CHINESE LITERATURE

本課程以專題的形式對中國古典文學展開討論研究，專題的選擇範圍涉及先秦至清代文學發展演變的各個方面，包括重要時期和階段，各類文體風格，主要作家、作品及流派，及古代文學發展與政治、宗教、思想、文化發展的關係，教學方式包括閱讀、討論、報告、撰寫論文等。本課程旨在使學生深入瞭解中國古典文學的特質，掌握分析運用文學史料的方法，並培養其獨立研究古典文學的能力。

先修科目: CHLL2001或CHLL2003

CHLL4007 中國思想史
HISTORY OF CHINESE THOUGHT

本課程引導學生閱讀、分析、闡釋中國思想史上的代表性著作，通過討論、報告、撰寫論文等方式，啟發學生探討中國思想從古代至現代的發展演變，使學生熟悉主要的哲學家 and 思想家，瞭解儒、道、佛等諸家思想，認識中國哲學思想的歷史、現狀和發展趨勢，並培養其批評性、哲理性思維的能力。

先修科目: 沒有

CHLL4008 中國經典閱讀
READINGS IN CHINESE CLASSICS

本課程選擇一至二部中國傳統文學、思想、哲學、文化的經典著作，在精細閱讀分析原著的基礎上，通過討論、報告、撰寫論文等方式，啟發學生展開集中深入的探討，使學生深化對經典著作和文化傳統的認識，並培養其獨立思考、分析、批評、研究的能力。

先修科目: 沒有

CHLL4009 漢語語音學
CHINESE PHONETICS AND PHONOLOGY

課程通過對學生對自己的母語習得和普通話的學習經歷，讓學生學會分析語音學的基本發音規律，運用粵語、普通話的知識，學會漢語音韻學的基本理論，瞭解漢語語音系統從古至今的歷史演變過程及演變規律，引導學生將語音學知識運用到學術研究和語言實踐中。

先修科目: 沒有

CHLL4010 漢語語言學專題 II
SPECIAL TOPICS IN CHINESE LINGUISTICS II

對語言學的某一個或幾個領域作較為系統的專題講授，以進一步培養學生對語言學的專業興趣，

擴大學術視野，拓寬語言研究的角度，掌握一定的研究方法，從而提高學生對語言分析研究的能力。教學方法為實例分析、小組討論報告等手段。

先修科目: CHLL1001 或 CHLL1002

CHLL4011 文學批評專題
SPECIAL TOPICS IN LITERARY CRITICISM

介紹中西方文學批評範圍內有代表性人物的著述，演示分別運用或綜合運用傳記批評、印象批評、形式主義文評、新批評、結構主義與符號學、後結構主義、女性主義、後殖民主義等中西方文學批評的模式與方法分析具體作品，有助學員深化與細化對文學批評理論和方法的掌握。該課程為“文學批評”必修課的配套輔助課程。

先修科目: 沒有

CHLL4012 外國文學作品選讀
SELECTED READINGS IN WESTERN LITERATURE

介紹由古希臘直至現代的西方重要文學作品，包括戲劇、詩歌、散文和小說等各種體裁，包括古典主義、浪漫主義、象徵主義、現實主義、自然主義、現代主義、後現代主義等各流派的作品。重點介紹荷馬、古希臘三大悲劇家、但丁、歌德、荷爾德林、莎士比亞、雪萊、華茲華斯、陀斯妥也夫斯基、艾略特、普魯斯特、福克納、昆德拉、卡爾維納等西方文學名家。課程亦會對中西方文學作品進行比較分析，播放外國文學名著改編的電影錄影。

先修科目: 沒有

CHLL4013 文藝學專題
SPECIAL TOPICS IN LITERATURE AND ARTS

介紹文藝倫理學的目的、意義、範域和方法，令學員從人性與審美相互動的角度加深對文學藝術形式特徵及人文內涵的認知。對藝術性敘事與倫理意識與之間的互動關係，本課程將通過倫理學典籍的文學性解析、中西方小說名著章節分析、經典電影欣賞、商業化藝術敘事（如敘事型廣告）解讀等靈活的授課方式，重點加以探討，以期提高學員跨學科綜合分析的能力和文學、哲學修養。

先修科目: 沒有

CHLL7100 漢語語言學理論專題
TOPICS IN THEORIES OF CHINESE LINGUISTICS

本課程旨在提高學生的語言學理論素養，引導學生科學地借鑒和運用西方語言學理論，對漢語實際進行深入的觀察和分析。課程包括介紹當代語言學理論在漢語研究中的運用和所取得的重要成果，漢語語言學理論的最新進展，各種語言學理論在漢語研究中的展望等內容。

先修科目: 沒有

CHLL7101 漢語語言學研究方法
METHODS IN CHINESE LINGUISTICS

本課程旨在系統介紹語言學的研究思路、方法和一些重要的語言學理論，指導學生採用科學的工具和方法對漢語進行共時或歷時的系統研究。課程包括語言學研究的一般方法和特殊方法，語言學研究中經常使用的工具性概念，各個語言學流派所採用的分析技術，國內學者建立的語言學理論等內容。

先修科目: 沒有

CHLL7102 漢語社會語言學研究
STUDIES ON CHINESE SOCIOLINGUISTICS

本課程旨在引導學生深入瞭解語言與社會的關係，運用社會語言學的概念和方法觀察、分析漢語中的詞彙、語法、語音等現象。課程包括宏觀語言狀況的調查研究，語言政策的制定，語言變異與語言變體，漢語與華人社會，語言的接觸與競爭等內容。

先修科目: 沒有

CHLL7103 古代漢語研究
STUDIES ON CLASSICAL CHINESE

本課程旨在進一步提高學生古漢語素養，引導學生將語言研究古今貫通——嘗試運用現代漢語的理論和方法解決古代漢語的問題。內容包括古代漢語的音韻、文字、訓詁、詞彙、語法、方法論等幾大專題。

先修科目：沒有

CHLL7104 現代漢語研究
STUDIES ON MODERN CHINESE

指導學生掌握必要的現代漢語專業性知識，培養學生觀察、分析和描寫共時狀態下漢語語音、語法和辭彙中的一些現象以及運用中的一些問題。內容包括現代漢語總論、文字、語音、詞彙、語法和修辭等幾大專題。

先修科目：沒有

CHLL7105 漢語語言學專題 I
TOPICS IN CHINESE LINGUISTICS I

本課程旨在進一步提高學生的語言學素養，培養學生深入觀察、分析語言現象的能力。課程將就漢語語言學的一些本質問題進行深層次的探討，向學生介紹最新的語言學理論和方法、漢語研究中最前沿的一些問題，內容將涉及語言學的分支領域如語法學、詞彙學、語音學以及語言和文學之關係等。

先修科目：沒有

CHLL7106 漢語語言學專題 II
TOPICS IN CHINESE LINGUISTICS II

本課程旨在進一步提高學生的語言學素養，培養學生深入觀察、分析語言現象的能力。課程將就漢語語言學的一些本質問題進行深層次的探討，向學生介紹最新的語言學理論和方法、漢語研究中最前沿的一些問題，內容將涉及語言學各分支領域。

先修科目：沒有

CHLL7107 漢語語法研究
STUDIES ON CHINESE GRAMMAR

本課程將緊密結合漢語實際，介紹漢語語法研究中的一些熱點問題和主要的理論與方法，提升學生對漢語語法進行專題思考和學科探索的能力。課程包括當前國際上主要語法學派的研究狀況和思路，漢語語法的應用研究，漢語語法研究與中文資訊處理、對外語教學等相關學科的互補研究等內容。

先修科目：沒有

CHLL7108 漢語聲韻研究
STUDIES ON CHINESE PHONOLOGY

本課程旨在夯實學生的漢語音韻知識，引導學生在方言、隋朝和唐朝的反切系統的基礎上，探測古漢語的發音，以及古今發音的演變規律，為方言調查描寫及訓詁學、詞源學等相關學科的研究打下基礎。課程包括漢語音韻史，音韻研究方法，韻書概覽等專題。

先修科目：沒有

CHLL7110 漢語詞彙研究
STUDIES ON CHINESE LEXICON

本課程旨在夯實學生的詞彙學基本功。在此基礎上，引介詞彙學研究的前沿理論和方法，引導學生觀察、分析和描寫共時或歷時背景下漢語中一些具有規律性的詞彙現象，從而提高學生詞彙學研究的素養和水平。本課程的內容設置以詞彙學本體研究中的構詞法與詞彙化為側重點，兼顧它們與句法、漢語史、概念史、詞典學、語言接觸以及文獻學等學科領域的界面研究。

先修科目：沒有

CHLL7200 漢語作為第二語言教學法**METHODOLOGY OF TEACHING CHINESE AS A SECOND LANGUAGE**

This course addresses the application of current methodologies in the teaching of Chinese as a Second Language. Developments in linguistics, educational and psychological studies lead to constant new input to foreign language teaching methodology and practice. The course introduces the student to major current practices and how research-driven innovations are developed in current practice.

Pre-requisite: None

CHLL7201 漢語作為第二語言教學課程設計與實習**SUPERVISED TEACHING PLANNING AND PRACTICE IN CHINESE AS A SECOND LANGUAGE**

A course wherein the student is supervised in the planning and delivery of class teaching sessions in Chinese as a Second Language within the framework of specific curricula. Students will prepare and present class designs and procedures to the instructor and fellow students, and receive critical evaluations thereon.

Pre-requisite: CHLL7200

CHLL7202 漢語教學語法**CHINESE PEDAGOGICAL GRAMMAR**

本課程旨在闡述漢語語法研究的基本理論，使學生能够運用語法知識分析漢語教學中的問題，側重從案例分析、知識運用的角度切入，並通過教學實踐展示語法點的教學。

先修科目: 沒有

CHLL7400 中國古典文學專題**TOPICS IN TRADITIONAL CHINESE LITERATURE**

本課程以專題形式對中國古代文學進行深層的研討，專題的選擇範圍涉及先秦至清代文學發展演變的各個方面，包括重要時期和階段，各類文體風格，主要作家、作品及流派，古代文學發展與政治、宗教、思想、文化發展的關係等。本課程旨在使研究生深入瞭解中國古代文學的特質，掌握分析運用文學史料的方法，並培養其獨立研究古代文學的能力。

先修科目: 沒有

CHLL7401 中國現代文學專題**TOPICS IN MODERN CHINESE LITERATURE**

以中國現當代重要的文學現象為研究對象，劃分為若干專題進行高層次研討，以利於研究生初步把握對本學科的發展歷史及內部規律。本專題包括中國現當代文學學科發展與學科概念的學術反思，台港澳暨海外華文文學與中國新文學傳統的關係研究，現當代文學社團與文學流派的考察分析，現當代重要作家作品的重新解讀等內容。

先修科目: 沒有

CHLL7402 文學理論專題**TOPICS IN LITERARY THEORY**

本課程旨在系統地、全面地介紹和講解古今中外文學理論的重要命題，對中國古代文學理論，中國現代文學理論，外國各流派文學理論和在新的科技形勢衝擊下出現的對傳統文學理論提出挑戰的新的理論現象，兼及掌握文學流派與文學理論之間的關係，提高研究生的理論思維能力和理論表達能力，掌握進入較深層次文學理論語境的門鑰。

先修科目: 沒有

CHLL7403 古代文學研究方法**METHODS IN THE STUDY OF TRADITIONAL CHINESE LITERATURE**

本課程綜合介紹中國古代文學的研究方法和學術規範，包括傳統的考據方法和批評方式，現代以文學批評為主而融合諸多學科的多元化研究方法，西方和日本漢學研究概述，學術論文撰寫的國

際規範等。本課程旨在使研究生打開學術視野，以多角度、多方法研究古代文學，並訓練其按國際規範撰寫學術論文的能力。

先修科目：沒有

CHLL7404 現代文學研究方法

METHODS IN THE STUDY OF MODERN CHINESE LITERATURE

本課程以講授方法學之知識為主，在系統介紹中西文學研究方法的基礎上，對現當代文學選題、觀點提煉、材料開發和利用、論文操作等等重要環節進行理論解析，並輔之以相應的學術訓練，以利於研究生掌握學術研究規範和有效的學術研究方法，順利地進入學位論文的寫作。

先修科目：沒有

CHLL7405 中國文學專題 I

TOPICS IN CHINESE LITERATURE I

本課程旨在進一步提高學生對中國文學的認識，培養學生深入理解、分析中國文學的能力。課程內容主要由訪問學者或現教職人員在其特定專業領域而定。課程將就中國文學的一些本質問題進行深層次的探討，向學生介紹最新的文學理論和方法、中國文學研究中最前沿的一些問題，包括中國文學中的詩歌、散文、小說、戲劇等經典作品，以及中國文學與文化的關係。

先修科目：沒有

CHLL7406 中國文學專題 II

TOPICS IN CHINESE LITERATURE II

本課程旨在進一步提高學生對中國文學的認識，培養學生深入理解、分析中國文學的能力。課程內容主要由訪問學者或現教職人員在其特定專業領域而定。課程將就中國文學的一些本質問題進行深層次的探討，向學生介紹最新的文學理論和方法、中國文學研究中最前沿的一些問題，包括中國文學中的詩歌、散文、小說、戲劇等經典作品，以及中國文學與文化的關係。

先修科目：沒有

CHLL7407 中國古代文體專題

TOPICS IN TRADITIONAL CHINESE LITERARY GENRES

本課程以專題方式研討中國古代文體的發展演變，專題選擇範圍包括各種體類的韻文、散文、小說、戲劇等。通過閱讀相關的文體分類、批評著作，以及分析探討各類文體的發展階段和代表作家作品，使研究生瞭解不同文體的特質，掌握不同文體的研究方法。

先修科目：沒有

CHLL7408 中國現代文體專題

TOPICS IN MODERN CHINESE LITERARY GENRES

本課程旨在全面地介紹文學文體的知識系統，同時對中國現代文學和當代文學的文體特性，文體類型進行學理把握，並對各種文體理論有較深的涉歷，能夠進入不同文體的創作實踐之中進行文化體察。

先修科目：沒有

CHLL7990 論文

THESIS

學術論文是為攻讀哲學碩士學位（中國文學）課程和哲學碩士學位（漢語語言學）課程的研究生而設計的。學生將從中國文學和漢語語言學中選擇一個有價值的課題，包括中國古典文學、中國現代文學、中國古典語言學、現代漢語語言學，在導師的指導下對這些學術領域進行深入研究。為了滿足學術論文的要求，學生必須完成論文並通過答辯。

先修科目：沒有

CHLL8000 中文研究方法論高級研讀
RESEARCH METHODS FOR ADVANCED STUDIES IN CHINESE

本科目是研究方法論方面的高級科目。哲學博士學位（語言學－漢語）課程的學生能通過對當代語言學研究成果的介紹和分析，了解不同的語言研究所採用的方法以及這些方法所表示的語言學的理論價值。利用這些學術成果啟發學習者對漢語(包括方言和漢語各類變體)語音和句法規律的認識和即將進行的博士階段的研究。哲學博士學位（文學－中文）課程的學生能加深對漢語文學研究方法論的系統性、理論性理解，分別從漢語文學和文化研究的傳統方法，西方人文學術研究對漢語新文學研究的影響與衝擊，以及中國特色漢語新文學研究方法的學術建構等方面展開研習，並進行一定的學術實踐訓練。

先修科目: 沒有

CHLL8001 學術寫作
ACADEMIC WRITING

本課程旨在系統地、全面地介紹和論辯漢語人文學術特別是文學研究寫作的基本特性，基本規律和基本方法，從論文規範、選題策略，論文結構、語言要求等方面訓練研究生的操作技能。課程以寫作理論、文體理論與學術寫作實踐的訓練相結合，兼及論文書面發表和口頭發表的等問題進行討論。

先修科目: 沒有

CHLL8013 中國語言學專題高級研讀
ADVANCED TOPICS IN CHINESE LINGUISTICS

本課程是專門為漢語語言學專業博士生規劃的高級研討課程。任課教師將會在理論語言學、社會語言學、語法學、音系學、語用學、方言學等學術領域精心挑選一組前言課題，引導博士生展開深入探討。課程目標是通過對這些問題的研討，進一步提升博士生們獨立地分析問題和解決問題的能力，以及創造性地整合前人、規劃議題，開拓創新的能力。

先修科目: 沒有

CHLL8042 中國文學專題高級研讀
ADVANCED TOPICS IN CHINESE LITERATURE

系統地整合、討論中國現當代文學的學術體系，並對這一學科領域的重要學術課題展開討論。

先修科目: 沒有

CHLL8999 博士論文
DOCTORAL THESIS

學術論文是為攻讀哲學博士學位（文學－中文）和哲學博士學位（語言學－漢語）的學生設計的。學生將從中國文學和漢語語言中選擇一個有價值、有意義的課題，包括但不限於中國古代文學、中國古典文獻學、中國現當代文學、古代漢語、現代漢語、方言學、社會語言學、應用語言學，並在導師的指導下對這些學術領域進行深入研究。為了達到博士論文的要求，學生需要完成博士論文並通過口頭答辯。

先修科目: 沒有

EELC1004/1005 LISTENING AND SPEAKING IMPROVEMENT I / II

These courses will develop oral proficiency of spoken English and listening comprehension at an intermediate level. Listening will focus on note-taking and aural comprehension using thought-provoking material from texts, television, film and music. Speaking will focus on fluency, accuracy, and skills and strategies for effective communication and personal interaction. These courses will also place a large focus on vocabulary building and collocation for the purpose of improving spoken communication. A smaller focus on reading and writing will also be included in preparation for group presentations, role play and story telling. Group work involving discussion is an integral part of the course. In addition, the course will involve some contact assignments that will take place outside the classroom.

Prerequisite: None

Note: For the students admitted in AY 2016/2017 onwards who are placed in to EELC1001 or EELC1002

EELC1006/1007 READING SKILLS & STRATEGIES I / II

These one-semester 3-credit elective courses provide a foundation in reading comprehension, critical reading, and vocabulary development. Students will learn to locate main ideas and supporting details; make inferences, and understand common idioms and expressions. In addition, students will learn strategies which will help them to read faster and more effectively. Course activities include reading and vocabulary assignments, discussions, and presentations.

Pre-requisite: None

Note: for the students admitted in AY 2016/2017 onwards who are placed in to EELC1001 or EELC1002

EELC1008 GRAMMAR & WRITING IMPROVEMENT I

This is a one-semester course for elementary English language level students. Students have three class hours every week. This course uses the English sentence as a basic concept unit and builds upon the sentence toward academic paragraphs with topic, explanation, example, and link sentences. Students learn to recognize sentence-level errors such as subject-verb agreement and tense consistency; they identify paragraph-level errors such as cohesion and coherence. Basic academic vocabulary is also covered.

Global Skills Development in English Language Learning such as communication and collaboration, creativity and critical thinking, global citizenship, learner wellbeing, and digital literacies will be incorporated where appropriate.

Pre-requisite: None

Note: Only for the students who are placed in to E1a and IE1 (On ELC discretion)

EELC1009 GRAMMAR & WRITING IMPROVEMENT II

These one-semester three-credit courses will focus on basic sentence structure for simple and compound sentences, expanding to complex sentence structures as students become more proficient. Editing to recognize sentence- and paragraph-level errors such as subject-verb agreement, pronouns and plural forms, use of referents and transitions, and problems with sentence fragments will also be covered.

Pre-requisite: None

Note: for the students admitted in AY 2016/2017 onwards who are placed in to EELC1001 or EELC1002

EELC1011 UNIVERSITY ENGLISH I

This is a one-semester Academic English course for elementary English language level students. Students have six class hours, one tutorial hour and an e-learning requirement. This course introduces basic academic listening, speaking, reading and writing skills through students' active participation in diverse and intensive academic and discipline-related activities and assessments at an appropriate elementary level. Simple academic texts and discipline-related materials enhance students' accurate use of basic grammar structures, enlarge their vocabulary and facilitate their development of language skills for a variety of academic contexts. The course provides a foundation for students to develop the academic English skills and abilities necessary for studying at the university level in English.

Pre-requisite: None

EELC1012 UNIVERSITY ENGLISH II

This is a one-semester Academic English course for low-intermediate English language level students. Students have six class hours, one tutorial hour and an e-learning requirement. This course improves and consolidates academic listening, speaking, reading and writing skills through students' active participation in diverse and intensive academic and discipline-related activities and assessments at an appropriate low-intermediate level. Short academic texts and discipline-related materials enhance students' accurate use of more complex grammar and text structures, enlarge their vocabulary and facilitate their development of language skills for a variety of

academic contexts. The course provides practice for students to develop the academic English skills and abilities necessary for studying at the university level in English.

Pre-requisite: EELC1011 or a required score in a placement test

EELC1013 UNIVERSITY ENGLISH III

This is a one-semester Academic English course for intermediate English language level students. Students have three class hours. This course develops and reinforces academic listening, speaking, reading and writing skills through students' active participation in diverse and intensive academic and discipline-related activities and assessments at an appropriate intermediate level. Academic texts and discipline-related materials enhance students' confident use of appropriate grammar and text structures, enlarge their vocabulary and facilitate their development of language skills for a variety of academic contexts. The course provides students with the academic English skills and abilities necessary for studying at the university level in English.

Pre-requisite: EELC1012 or a required score in a placement test

EELC2000/2001 ENGLISH FOR BUSINESS AND PROFESSIONAL CONTEXTS I / II

Students will acquire skills and improve their ability in using English as an international language for business and professional communication. Using authentic texts as well as digital resources, the content of the course focuses on knowledge and skills required in various business management contexts including finance, human resources, marketing, production and services management. Emphasis is on listening and speaking skills for meetings, negotiations, presentations, and social situations. Up-to-date texts are used to develop reading and writing skills needed in business correspondence such as e-mails, minutes of meeting, business letters, and reports through the medium of English.

Pre-requisite: EELC1001/EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC2004/2005 INTRODUCTION TO ACADEMIC WRITING I / II

These two courses cover the basic skills students need for academic writing. Students will be taught writing techniques such as planning, drafting, and revising. In the second semester the main focus will be on the revision of papers using self- and peer-evaluation. Students will also be taught the basic skills of how to locate, evaluate, and document sources. Students are expected to learn these skills through analyzing sample papers, engaging in process writing, and responding to papers written by their peers. Upon completion of these courses, students are expected to have acquired the technical knowledge of how to write and organize a basic academic paper.

Pre-requisite: EELC1001/EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC2006 SPEAKING AND FLUENCY

These courses aim to help students improve their English language skills, especially in regard to fluency and accuracy in spoken English. Speaking and Fluency course topics include, but are not limited to, pronunciation, intonation, and word stress with students asked to practice English in a host of different language settings. Students will explore current theory and practice of how to be a more effective user of English when speaking for various purposes. In the Public Speaking course, a review of current theories and practices regarding effective presentation skills will lead to an application of those skills when speaking for various audiences and purposes. Students will be asked to engage in critical review of themselves and others with an aim toward setting and meeting individual goals as they work to improve their expressive and persuasive skills.

Pre-requisite: EELC1001/EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this

course.

EELC2007 SPEAKING IN ENGLISH: ORAL PRESENTATION SKILLS

This course will help students improve their English language skills, especially their fluency and accuracy in spoken English. The course topics include, but are not limited to, practicing pronunciation, intonation, and word stress in English in a host of different language settings. Students will explore current theory and practice of how to be a more effective user of English when speaking for various purposes. Students will be asked to engage in critical review of themselves and others, with a view to setting and meeting individual goals as they work to improve their expressive and persuasive skills.

Pre-requisite: EELC1001/EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course

EELC2008 ACADEMIC ENGLISH: SPEAKING

This is a one-semester Academic English course for students with an intermediate English language level. Students have three class hours every week. The course requires students to apply the skills they have learned in previous University English or Academic English course(s). Additionally, students will learn to use introductory academic speaking skills. These skills include: logical persuasion, information sharing, meeting facilitation, impromptu speaking, and responding to questions. Students are expected to analyze sample academic speeches/presentations for discipline-specific academic features in preparation for advanced academic speaking. Depending on students' disciplines, they will be introduced to different genres in academic speaking (e.g. oral reports, persuasive/informative speeches, poster presentations, discussions, and oral reflections, etc.).

Pre-requisite: EELC1013 or a required score in a placement test

EELC2009 ACADEMIC ENGLISH: WRITING

This is a one-semester Academic English course for students with an intermediate English language level. Students have three class hours every week. The course requires students to apply the skills they have learned in University English or Academic English course(s). Additionally, students will learn to use introductory academic writing skills. These skills include: writing summaries and responses, conducting secondary research, evaluating sources, documenting the research process, considering the rhetorical situation, making an argument, paraphrasing from sources, using academic language, and writing coherently. Students are expected to analyze sample academic text for discipline-specific academic features in preparation for advanced academic writing. Depending on students' disciplines, they will be introduced to different genres in academic writing (e.g. essays, reports, case studies, research proposals, book reviews, literature reviews, reflective writing, etc.).

Pre-requisite: EELC1013 or a required score in a placement test

EELC2010 ACADEMIC ENGLISH: PROJECT-BASED LEARNING

This is a one-semester Academic English course for students with an intermediate English language level. Students have three class hours every week. The course requires students to apply the skills they have learned in University English or Academic English course(s). In groups, students will learn to use introductory academic writing and speaking skills to design and implement their multigenre/multimodal projects. These skills include: primary/secondary research, critical thinking skills, problem-solving skills, writing/presentation skills, teamwork, etc. Through experiential learning, students will be guided to observe, collect information, persuade, and generate a writing/speaking product.

Pre-requisite: EELC1013 or a required score in a placement test

EELC2011 ENGLISH SPEAKING FOR ACADEMIC RESEARCH

This is a one-semester academic speaking course for students with an upper-intermediate English language level. Students have three class hours every week. The course also addresses the information literacy and higher-order thinking skills necessary for conducting extensive secondary

research, constructing ideas, providing evidential support, and structuring ideas coherently in spoken academic settings. Students develop both verbal and non-verbal communication in small and large group academic settings. Students will critically evaluate their own and others' performances, and will learn how to utilize a variety of technology-enhanced communication tools. Other skills addressed in this course include critical thinking and argumentation.

Pre-requisite: EELC2008, EELC2009, EELC2010 or a required score in a placement test

EELC2012 ENGLISH WRITING FOR ACADEMIC RESEARCH

This is a one-semester academic writing course for students with an upper-intermediate English language level. Students have three class hours every week. This course addresses the information literacy and higher-order thinking skills necessary for conducting extensive secondary research, providing evidential support, and structuring ideas in coherent written academic texts. Students spend time responding to multiple drafts of peer academic papers to improve precision and clarity in the writing process. Other specific skills addressed in this course are critical thinking and argumentation

Pre-requisite: EELC2008, EELC2009, EELC2010 or a required score in a placement test

EELC2013 ENGLISH INTEGRATED SKILLS FOR ACADEMIC RESEARCH

This is a one-semester integrated academic language course for students with an upper-intermediate English language level. Students have three class hours every week. Students will engage in data gathering, analysis and interpretation skills and communicate research results effectively in academic presentation or report formats. Students will critically evaluate their own and others' performances, and will learn to utilize a variety of technology-enhanced tools to aid in preparing and communicating academic concepts and findings. Upon completion, students are expected to have acquired a basic understanding of primary academic research methods and have developed techniques to effectively communicate concepts and research results.

Pre-requisite: EELC2008, EELC2009, EELC2010 or a required score in a placement test

EELC3004/3005 ADVANCED ACADEMIC WRITING I / II

These one-semester three-credit writing courses will enable students to express themselves coherently when engaged in written academic discourse. The courses offer intensive work and instruction in writing skills through the discussion and analysis of assigned readings. Students spend time responding to multiple drafts of peer academic papers to improve precision and clarity in the writing process. Other necessary skills addressed in these courses are identifying and making logical arguments as well as avoiding faulty reasoning. Upon completion of these courses, students are expected to have acquired the confidence and techniques to write academic papers in a professional writing style.

Pre-requisite: EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC3006/3007 ADVANCED SPEAKING I / II

These courses emphasize elements of both verbal and non-verbal communication in public settings. Students will engage in a variety of public speaking activities, will critically evaluate their own and others' performances, and will learn how to utilize presentation tools such as handouts and PowerPoint. Students should enhance their confidence in speaking and demonstrate effective oral presentation skills.

Pre-requisite: EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC3008/3009 ADVANCED INTEGRATED SKILLS I / II

These one-semester three-credit courses may use a content- or theme-based approach to engage students in critical thinking, logical analysis, persuasion/argumentation, and other high

level language skills required in academic English. Needs analysis will help determine which skills to emphasize each semester. Students will be expected to work independently and in groups. Topics may address current events as well as participants' major fields of study. Class materials will reflect the language level expected of high-intermediate to advanced level students whether they plan to enter the workforce or pursue graduate studies in English.

Pre-requisite: EELC1002/EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC3010 INTRODUCTION TO ENGLISH LANGUAGE TUTORING I

This 3-credit elective course offers students an opportunity to experience English language tutorials related to writing, speaking, and other language development and improvement skills. In a seminar format with the course instructor, students 1) learn about tutoring theories and one-on-one and/or small group tutoring strategies, 2) practice tutoring, and 3) critique each other's tutorials.

Students who are interested to continue accruing their tutoring experience may elect to take Introduction to English Language Tutoring II as an extension of Introduction to English Language Tutoring I. Introduction to English Language Tutoring I is not a prerequisite of Introduction to English Language Tutoring II, and students may enrol in one or both semesters of this course depending on the number of credits they wish to earn. Students are not required to take these two courses in sequence.

Pre-requisite: EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC3011 INTRODUCTION TO ENGLISH LANGUAGE TUTORING II

This 3-credit elective course offers students an opportunity to experience English language tutorials related to writing, speaking, and other language development and improvement skills. In a seminar format with the course instructor, students 1) learn about tutoring theories and one-on-one and/or small group tutoring strategies, 2) practice tutoring, and 3) critique each other's tutorials.

Students who are interested to continue accruing their tutoring experience may elect to take Introduction to English Language Tutoring II as an extension of Introduction to English Language Tutoring I. Introduction to English Language Tutoring I is not a prerequisite of Introduction to English Language Tutoring II, and students may enrol in one or both semesters of this course depending on the number of credits they wish to earn. Students are not required to take these two courses in sequence.

Pre-requisite: EELC1003 or permission of instructor

Note: Students who are placed into English Electives or approved for test-out of all English language courses based on the placement/admission assessments may enroll in this course.

EELC4004 ACADEMIC RESEARCH WRITING WORKSHOP

This is a 3-credit elective writing course for students who need writing help when completing an undergraduate or graduate thesis. The course emphasizes the recursive nature of the writing process and takes students through the different stages of planning, drafting, and revising. The course will introduce students to methods of supporting arguments, positions, and points of view within a thesis, including various forms of citation and documentation of references. Students receive instructor feedback that focuses on readability, including cohesion and coherence. They also critique each other's writing, with an emphasis on the development of self-revision. Students will examine the various genres within thesis writing and evaluate the effectiveness of these writing styles. In particular, students will need to demonstrate an understanding of academic writing as a series of expert practices that are situated within specific disciplines, and to develop the necessary skills for reading and writing within those disciplines.

Pre-requisite: None

Special Topic Electives (Meet 80 minutes/week for one semester)

EELC2002 SPECIAL TOPIC ENGLISH LEVEL II A

Pre-requisite: None

EELC3000 SPECIAL TOPIC ENGLISH LEVEL III A

Pre-requisite: None

EELC4000 SPECIAL TOPIC ENGLISH LEVEL IV A

Pre-requisite: None

Notes: Special Topic courses meet once a week (1.5 hours) and carry 1 credit. They are meant to encourage students to take an English class for enjoyment or self-improvement and to be intrinsically motivated to sign up for and attend the class. At level II, one special topics class will be announced at each level each semester and at levels III and IV, two special topics classes will be announced at each level each semester. However, a minimum number of students will be required by the end of drop-and-add for the class to actually be offered.

ENGL1000 INTRODUCTION TO LITERARY STUDIES I

The purpose of this course is to help students develop basic skills for understanding major literary genres and to increase their sensitivity to the language and devices used in literature. Students will be introduced to a basic critical vocabulary with which to examine a range of literary texts. The genres covered in this course include poetry, and short fiction.

Pre-requisite: None

ENGL1001 INTRODUCTION TO LITERARY STUDIES II

The purpose of this course is to further develop reading and analytic skills for understanding extended works of prose and dramatic fiction. The course will build on the basic critical vocabulary introduced in ENGL1000. The genres covered in this course include the novel and drama.

Pre-requisite: ENGL1000

ENGL1002 DESCRIBING THE SOUNDS OF ENGLISH

This course studies the theory and techniques of descriptive linguistics as applied to the pronunciation of contemporary English. It addresses the basic questions of: What are the sounds of English, how are they produced and perceived, and how are they described? The course will introduce students to the pronunciation of different varieties of English and increase their sensitivity to their own pronunciation of English.

Pre-requisite: None

ENGL1003 INTRODUCTION TO THE STUDY OF LANGUAGE

This course surveys the major areas in linguistics and attempts to answer two questions: What is language? How can language be studied scientifically? To address these issues the course will introduce basic concepts and analytic tools for describing and explaining the nature and structure of language. Major topics may include properties of language, human language and other communication systems, brain and language processing, spoken and sign language, writing systems, language families, etc. The course will also raise the students' awareness and understanding of language use.

Pre-requisite: None

ENGL1004/1005 INTRODUCTION TO FRENCH I/II

A course that focuses on the comprehension of spoken French and the ability to communicate orally in a variety of everyday situations. The reading and writing of simple texts will also be introduced.

Pre-requisite: None

ENGL1006 INTRODUCTION TO GERMAN I

The course will integrate all four language skills, speaking, listening, reading and writing, throughout class and home assignments and provide guidance and practice to develop essential study skills. The main focus will be on understanding and speaking German of moderate difficulty, and you will be introduced to the contemporary civilization and culture of the German peoples through the textbook and supplementary materials from the Internet, CDs, etc. You will also study some of the major grammatical and structural aspects of the language.

Pre-requisite: None

ENGL1007 INTRODUCTION TO GERMAN II

This course will integrate all four language skills in class and home assignments and provide guidance and practice to develop essential study skills. The aim will be to extend the number of typical everyday situations in which you are able to understand and speak German of moderate difficulty. In compliance with each chapter, you will receive information on the contemporary civilization and culture of the German peoples through the textbook and supplementary materials from the internet, cds, etc. You will also continue to study some of the major grammatical and structural aspects of the language.

Pre-requisite: ENGL1006

ENGL2000 SURVEY OF ENGLISH LITERATURE I

This course presents a chronological survey of works from major periods and genres of English literature. Literature from important periods will be studied in their historical context. The course will begin with an introduction to English literature in the Anglo-Saxon period and end with an introduction to the Renaissance, and will include the study of Chaucer and English Renaissance authors.

Pre-requisite: None

ENGL2001 SURVEY OF ENGLISH LITERATURE II

This course presents a chronological sampling of literature from major periods and genres of English literature, which will be studied in their historical context. The course will begin with the 18th century and continue to the end of the 19th century, covering topics that include Neo-classical satire, Romanticism, and writing in the Victorian period.

Pre-requisite: ENGL2000

ENGL2002 INTRODUCTION TO ENGLISH GRAMMAR

This course describes the syntax and morphology of modern Standard English. It introduces in an accessible way the necessary terminology and modes of analysis that students need in order to understand English structure, and it provides a firm foundation for further studies in linguistics.

Pre-requisite: None

ENGL2003 LANGUAGE AND SOCIETY

This course will introduce students to the study of language in a social context and to the various theories and methods of sociolinguistics. Topics that will be covered may include bilingualism and multilingualism, second language variation, language and identity, dialectology, stylistic variation and language change.

Pre-requisite: None

ENGL2004 LANGUAGE STUDIES FOR TRANSLATION

This course is designed to compare and contrast Chinese and English at various levels – lexical, phrasal, sentential and textual. Theoretical concepts are introduced in relation to translation problems. Upon completion of this course, students are expected to appreciate the major differences between Chinese and English, and be able to use essential linguistic tools to deal with translation problems.

Pre-requisite: None

ENGL2005 INTRODUCTION TO THE THEORY AND PRACTICE OF TRANSLATION

This course prepares students for more specialized translation courses in later semesters. While it attempts to familiarize students with fundamental theoretical concepts of and various approaches to translation, it is a practice-oriented course by nature. Particular attention is placed on strategies and methods of translation in relation to the functions of the text, and on various approaches to deal with translation problems.

Pre-requisite: None

ENGL2006 INTRODUCTION TO INTERPRETATION

This course strengthens students' foundational knowledge and communicative abilities required in consecutive interpretation (CI). It is designed to train the students in the skills concerned, including vocabulary building, memory retention, thought organization, sight translation and note-taking. Students will learn to use the techniques of CI progressively, starting from single sentences to longer segments. Classes are conducted in the language laboratory to give students practical experience.

Pre-requisite: None

ENGL2007 CONSECUTIVE INTERPRETATION

This course concentrates on the practice of consecutive interpretation (CI). Focusing on coping tactics of CI comprehension, reformulation and production, it involves intensive practice sessions with various simulation drills on a diverse range of subjects. It also aims at building up students' public speaking and dialogue abilities and professionalism in the process. Classes and tests are conducted in the language laboratory.

Pre-requisite: None

ENGL2009/2010 INTERMEDIATE FRENCH I/II

A course that expands and extends the skills developed in ENGL1004/1005. Students will receive intensive instruction and practice in speaking, reading and writing.

Pre-requisite: ENGL1004/1005

ENGL2011 GERMAN, ADVANCED BEGINNERS, LEVEL I

The course will integrate all four language skills throughout the class and home assignments. The objective will be to expand 1) the range of vocabulary through the coverage of new topics of general interest and relevance and 2) the range of grammatical and structural aspects. Listening and speaking will remain the focus of the course but there will be a stronger emphasis on reading and writing compared with the beginner courses to apply and strengthen the acquired skills and knowledge freely and comprehensively. In addition, background information on the contemporary civilization and culture of the German peoples will be provided.

Pre-requisite: ENGL1007

ENGL2012 GERMAN, ADVANCED BEGINNERS, LEVEL II

The course will be of the same nature as German for Advanced Beginners, Level I. All four language skills as well as grammar will be integrated in class and home assignments. The objective will be to apply and strengthen the acquired knowledge and skills and to expand on 1) the range of vocabulary through the coverage of new topics of general interest and relevance and 2) the range of grammatical and structural aspects. Students will be guided towards applying the existing knowledge freely and comprehensively in relevant tasks. The focus will be on communicative competence, which means students will have to use communication skills and the language appropriately depending on the given task context, with grammar as integral component necessary to varying extent. Background information on the contemporary civilization and culture of the German peoples will be provided.

Pre-requisite: ENGL2011

ENGL3000 LANGUAGE AND MEANING

This course is concerned with one of the fundamental issues in linguistics: meaning. It looks at meanings of individual words and the meanings they engender in combination (semantics), as

well as how language-users construct meaning in communication (pragmatics). Fundamental concepts and issues introduced may include sense and reference, semantic features, lexical relations, polysemy, non/literality, presupposition, inference, implicature, speech acts and politeness.

Pre-requisite: None

ENGL3001 20TH CENTURY AND CONTEMPORARY LITERATURE IN ENGLISH I

This course introduces students to a selection of major texts in poetry and fiction that illustrate important themes, concerns, and literary techniques of literature in English during the first half of the 20th century. The main emphasis will be on Modernism in Anglo-American writing.

Pre-requisite: None

ENGL3002 ANALYZING SPOKEN DISCOURSE

This course will introduce the major approaches to the analysis of spoken discourse, including conversation analysis, speech acts theory, ethnography of communication, and interactional sociolinguistics. It will equip the student with basic methodologies of data collection, transcription and analysis and establish those techniques essential for studying spoken discourse in various contexts.

Pre-requisite: None

ENGL3003 20TH CENTURY AND CONTEMPORARY LITERATURE IN ENGLISH II

This course introduces students to selected major texts that illustrate important themes, concerns, and literary techniques of literature in English during the 20th century. Topics to be covered may include key postwar texts in the Anglo-American tradition, the theatre of the absurd, feminist concerns, postmodernism, and English literature from outside the Anglo-American tradition.

Pre-requisite: ENGL3001

ENGL3004 BILINGUALISM

This course introduces students to the basic concepts and issues in the study of bilingualism by focusing on issues related to the social and cultural background of bilingual communities, more specifically, the systematic use of different languages, language maintenance and shift, language attitudes and the motivations and effects of code-switching. The course discusses how some key concepts have been applied in accounting for individual/societal bilingualism in Hong Kong, Singapore and Macao.

Pre-requisite: None

ENGL3008 LANGUAGE AND COGNITION

The course investigates the relationship between language, language use, and human cognition: how language is grounded in human perception and conceptualization at both the individual and sociocultural levels. The course will introduce students to the fundamental concepts and issues involved, including frames, attention, metaphor, metonymy, categorization, and mental spaces.

Pre-requisite: None

ENGL3009 SYNTAX

This course introduces students to the fundamental issues in the description and analysis of phrase and clause structures. Students will learn analytic skills in the survey of major syntactic phenomena, including phrase structure, constituency, the lexicon, agreement, movement, negation, clause types, and subordination.

Pre-requisite: None

ENGL3011 LANGUAGE ACQUISITION

This course provides a broad overview of theories and issues relevant to language acquisition. We will examine the process of language acquisition divided into discrete areas such as lexicon, syntax, and pragmatics as well as a unified process taking place in parent-child interaction. Through reading and discussion, we will consider how social as well as cognitive factors contribute to children's language acquisition and development. The coursework will involve

extensive reading and discussion as well as panel presentation.

Pre-requisite: None

ENGL3014 WORLD ENGLISHES

This course will introduce students to the study of contemporary and historical varieties of English worldwide. The pluralistic status of English varieties as well as the nature and effect of standards and standardizing varieties will be emphasized. The course may include historical approaches to varieties, geographical approaches or an approach that focuses on several recurring themes of how English is used internationally.

Pre-requisite: None

ENGL3016 ADVANCED ENGLISH STRUCTURE

The course is a more in-depth study of English grammar. It provides students with the argumentative techniques required in syntactic analyses. Particular attention will be given to the gradient nature of English categories and structures. The course will draw insights from different approaches where appropriate.

Pre-requisite: None

ENGL3018 MORPHOLOGY

This course introduces students to the basic issues of linguistic morphology, the study of the structure of words. It covers important areas such as wordhood, word-formation processes, inflection, derivation, compounds and allomorphy. The course also examines current research on the relations between morphology, phonology and syntax.

Pre-requisite: None

ENGL3020 NARRATIVE, DISCOURSE AND IDENTITY

Narrative-making is a basic human behavior which pervades all domains of human experience. In terms of form, narratives can range from the most complex saga to the simplest recount of mundane events. More fundamentally, however, narratives fulfill certain crucial functions in human life: in cognition, information structuring, identity construction and performance, intersubjectivity, and sociocultural ritual. This course examines the construct of 'narrative' — what it is, what its structure is, how it is constructed, how it has been theorized — and how its various functions manifest themselves linguistically in discourse.

Pre-requisite: None

ENGL3021 CHILDREN'S LITERATURE

This course is an introduction to British literature for children and historical attitudes towards childhood, play, and education, from the eighteenth century to the present day, and covering classic and contemporary texts from different genres. These may include nursery rhymes and nonsense, fairy tales and fantasy, picture books and comics, animals and anthropomorphization, school stories, and morality and didacticism. The course will typically include an examination of the idea of childhood and the origins of children's writing, as well as how children are taught to read.

Pre-requisite: None

ENGL3022 VICTORIAN LITERATURE

This course is an introduction to novelists, poets, dramatists, and prose writers whose work contributed to the diverse range of writing in the Victorian period. Students will study a range of texts in their social, religious, scientific, philosophical and aesthetic contexts, covering issues such as the Industrial Revolution, imperialism, faith and doubt, and the 'Woman Question'.

Pre-requisite: None

ENGL3023 ROMANTICISM

This course will focus on the Romantic Movement, beginning with its rise to prominence in the late 18th century to its later influence on Western writing. Key English Romantic poets will receive special attention. Certain classic texts of the Gothic genre may also be considered. The socio-

historical and cultural origins of Romanticism and its influence on near-contemporary Western writing may also be examined. A parallel aim of this course is the development of competence in the analysis of poetry, especially the lyric poem.

Pre-requisite: None

ENGL3024 DRAMA AND THEATRE

This course is designed to give the student a fuller understanding of the relationships between dramatic literature, performance, and society. This course will combine the academic study of dramatic literature with that of theatre history to demonstrate the inherently social character of drama-in-performance. A selection of plays and excerpts will be read and considered within cultural, social, and theatrical contexts.

Pre-requisite: None

ENGL3027 20th CENTURY AMERICAN LITERATURE

This course will focus on an area of interest in American society within the twentieth century. American writers writing in English in different genres will be studied in relation to core themes or movements.

Pre-requisite: None

ENGL3029 INTRODUCTION TO LITERARY CRITICISM

In this course students shall study key movements and figures representative of literary and cultural theory from the 20th-century to the present toward the goal of building a strong foundation and background in literary scholarship. The course will be both reflective (by encouraging students to think critically about literature and its intersections with philosophy, politics, ethics, psychology, and sociology, among others) and practical (by equipping students with a substantive critical vocabulary to productively participate in scholarly discourse within the broad field of literary and cultural studies). This course was designed to be both a historical introduction to the various schools of 20th-century criticism as well as an immersion in the theory and practice of literary and cultural criticism.

Pre-requisite: None

ENGL3030 SHAKESPEARE

This course is designed to give students an opportunity to explore a range of Shakespeare's plays through which they can learn to appreciate the thematic and linguistic richness of the playwright's works. Selected plays will be studied in connection with the theatrical and cultural backgrounds of Elizabethan England. Students will also be familiarized with schools of Shakespearean criticism in the 20th- and 21st-centuries. In addition, the class will read selected sonnets and narrative poems.

Pre-requisite: None

ENGL3031 CREATIVE WRITING I

This course uses examples of canonical or famous literature to develop critical reading skills and, more importantly, to support the production by students of their own imaginative work. The focus is on students' creative production, in both individual and in group work.

Pre-requisite: None

ENGL3033 THE ENGLISH RENAISSANCE

This course is designed to offer students an opportunity to broaden their understanding of the English Renaissance and to develop a critical appreciation of the work of major writers from the period. Areas of study will include texts from Elizabethan, Jacobean and Caroline periods. A number of key concepts will be introduced, such as 'Humanism', 'Metatheatre' and 'Metaphysics'. We will also explore popular themes and topics which include love, sex, music, religion and order.

Pre-requisite: None

ENGL3034 POSTCOLONIAL WRITING

This course is a general survey of the issues and concerns in the field that is broadly called

postcolonial studies. It aims to develop a critical awareness of the effects of British imperialism on the literary production of formerly colonized places. A selection of literary texts from outside the Anglo-American tradition will be read alongside critical texts dealing with concerns such as identity, representation, nationhood, and diasporas.

Pre-requisite: None

ENGL3035 WORLD LITERATURES IN ENGLISH

This course will examine the histories, development and concerns of literatures written in English outside the Anglo-American tradition defined in relation to specific geographical areas, national cultures or socio-political movements. The specific areas for study will depend on faculty availability and specialist interest.

Pre-requisite: None

ENGL3036 LIFE NARRATIVES

This course is designed to introduce students to the literary genre of life narratives and to familiarize them with the interrelationship between fact and fiction. Texts studied are chosen from different cultures and historical periods in order to provide a survey of different forms of life writing (auto/biography, memoir, diary), as well as different modes of discourses in relation to one's socio-cultural identity.

Pre-requisite: None

ENGL3038 MAJOR AUTHORS

This course is an intensive study of the life and the works of a significant author (or authors) with important contributions to the development of canonical or contemporary literature written in English. Author(s) studied may vary from year to year.

Pre-requisite: None

ENGL3039 SPECIAL TOPICS IN LITERATURE I

This course is a focused study of an area in literary studies.

Pre-requisite: None

ENGL3040 SPECIAL TOPICS IN LITERATURE II

This course is a focused study of an area in literary studies.

Pre-requisite: None

ENGL3041 SPECIAL TOPICS IN LINGUISTICS I

This course is an intensive study of an area in linguistics. The content will vary from year to year depending on the availability of staff.

Pre-requisite: None

ENGL3042 SPECIAL TOPICS IN LINGUISTICS II

This course is an intensive study of an area in linguistics. The content will vary from year to year depending on the availability of staff.

Pre-requisite: None

ENGL3043 LANGUAGE, CULTURES AND TRANSLATION

This course provides students with an awareness of cross-cultural differences and cognitive problems involved in inter-lingual translation. The first part of the course will discuss general problems in cultural representation and reception, with special reference to issues such as 'linguistic differences', 'religious differences' and 'conceptual differences'. The second part of the course will discuss translation strategies and methods of rendering cultural differences.

Pre-requisite: None

ENGL3044 TRANSLATION FOR THE MEDIA

This course is an introduction to translation for the media. Texts to be translated and adapted may include: news reports/releases, interviews, public notices and advertisements. Special attention

will be paid to the linguistic, stylistic and cultural features of writing for the media in both Chinese and English so that students will learn how to apply different strategies and methods to translating texts for different purposes.

Pre-requisite: None

ENGL3045 TRANSLATION OF BUSINESS AND LEGAL WRITINGS

This course introduces the characteristic features of business and legal writings and translation strategies and methods employed when by translating a variety of business and legal documents. Such documents may include minutes, annual reports, business correspondence, tender documents, and legal contracts. Particular attention will be paid to translation problems such as legal equivalence, terminology, register, and structural layout.

Pre-requisite: None

ENGL3046 CONFERENCE INTERPRETATION

This course will mainly focus on training students in simultaneous interpretation, though consecutive interpretation will also be discussed. Students will be introduced to note-taking, mnemonic devices, visualization and other techniques employed in interpretation. The course will include an overview of conference interpretation and introduce techniques employed in the practice through selected readings and workplace simulation.

Pre-requisite: None

ENGL3047 LITERARY TRANSLATION

This course offers a general introduction to the theory and practice of translation of literary writings. It introduces core theoretical concepts of literary translation along with analyses of selected literary translations as examples. It involves appreciation and understanding of different literary genres, emphasizing identification of linguistic, stylistic and cultural features of literary texts and application of translation strategies and methods specific to literary translation.

Pre-requisite: None

ENGL3048/3049 READING COMPREHENSION AND WRITING I/II

A continuation of ENGL2009/2010. A more advanced course in comprehension and writing skills.

Pre-requisite: ENGL2009/2010

ENGL3051 THE GOTHIC

This course is an introduction to classic Gothic literature and representations of the supernatural, with an emphasis on terror and horror, trauma and the body, and politics and history. Students will study classic literary texts and films covering topics such as ghosts and vampires, dreams and madness, the uncanny, and the haunted house. The course will typically analyze these materials from perspectives including historical contexts, gender and sexuality, race and ethnicity, science and medicine, environmentalism, and recent critical theory.

Pre-requisite: None

ENGL4000 RESERCH REPORT

Students selected for the Research Report class will work on a research topic of their choice over one semester. Thesis topics will be selected and developed under the supervision of a staff member with whom the student will meet regularly. The length of the report will usually be between five and eight thousand words.

Pre-requisite: None

ENGL4001 GRADUATION PROJECT

Students who elect to take the Graduation Project class will work on a research project that involves an element of outreach (e.g. involvement in workplace learning; school, community or residential college liaison; fieldwork; participation in a recognized competition, interviewing; etc.). Students will meet on a regular basis with the staff member acting as their project supervisor. The meetings will plan the project and organize the outreach element. The elective will be examined by a portfolio of assignments which may be both practical and reflective, and which in total will

usually amount to between five and eight thousand words.

Pre-requisite: None

ENGL4002 TRANSLATION WORKSHOP

In the translation workshop, students will be working in groups, and each group has to translate a long piece of text of a particular genre. During the course of translation, discussions will be conducted on how to solve translation problems and how strategic decisions are to be made. Presentations will be given by students on their translation experience and their final product. Good translations may be selected for publication.

Pre-requisite: None

ENGL4003 AUDIOVISUAL TRANSLATION

This course mainly introduces subtitling for film and television between English and Chinese, the primary form of audiovisual translation. The nature and characteristics, as well as translation principles and strategies pertaining to subtitling and other special topics such as dubbing and song translation will be reviewed and discussed. Emphasis is placed especially on subtitling practice and the translation techniques for overcoming the conflict between the medium constraints and comprehensibility of culture-bound utterances.

Pre-requisite: None

ENGL4004 TRANSLATION OF JOURNALISTIC WRITING

This course is designed for students who wish to further their interest in the translation of journalistic writings, which include news articles, editorials and commentaries across a wide spectrum of fields. It will involve an in-depth study of the characteristics of journalistic writing and the differences between journalistic writing in Chinese and English. Students will translate a wide variety of texts including reportage and reviews on politics, economics, culture, sports and entertainment. They will also be introduced to aids and tools employed in journalistic translation for web-based portals.

Pre-requisite: None

ENGL4005 SIMULTANEOUS INTERPRETATION

This course will involve intensive sessions of practice in listening, comprehension, shadowing, paraphrasing and finally simultaneous interpreting. Texts for interpretation will be selected from a variety of fields and genres to expand general knowledge and vocabulary of students. The course will also help students acquire a better understanding of the subject of interpreting in general and Simultaneous interpretation in particular.

Pre-requisite: None

ENGL4006 SPECIAL TOPICS IN TRANSLATION I

This course is designed to permit visiting scholars, or existing staff, to offer undergraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on the availability of specialized staff.

Pre-requisite: None

ENGL4007 SPECIAL TOPICS IN TRANSLATION II

This course is designed to permit visiting scholars, or existing staff, to offer undergraduate level courses in their particular areas of specialization.

Pre-requisite: None

ENGL4008/4009 FRENCH IN THE MODERN WORLD I/II

A course that introduces students to a range of authentic contemporary texts representative of modern French culture, both in France and in the wider French-speaking world.

Pre-requisite: ENGL3048/3049

ENGL7001 LINGUISTICS RESEARCH METHODS

The purpose of this course is to improve students' language awareness, academic communication

skills, and research abilities so they can perform competently as they complete an MA degree in English. Course content and activities are meant to develop skills in academic research and writing to include understanding research methods and thesis development processes as well as presenting research proposals orally and in writing.
Pre-requisite: None

ENGL7002 COMPARATIVE CHINESE - ENGLISH STRUCTURE

This course involves the comparative description and analysis of the respective sound structures, morphological structures, and syntactic structures of Chinese and English from the perspective of current linguistic theory. Topics addressed may include tone, stress, and rhythm in the languages, prosody, word formation, phrasal and clausal structure, interrogation, embedding, conjoining, comparison, focusing devices, the auxiliary, and temporal and aspectual representation.
Pre-requisite: None

ENGL7003 DESCRIPTIVE LINGUISTICS

This course covers three fundamental areas of language description: the analysis of morphology (word structure), syntax (sentence structure), and semantics (the structure of meaning). Examples will be drawn from English and other languages, including Chinese.
Pre-requisite: None

ENGL7004 PSYCHOLINGUISTICS

This course introduces students to the biological, neurological and cognitive bases for language, language development, multilingualism and second language acquisition, and language disorders. It will also deal with some aspects of natural language processing in relation to certain areas of linguistic analysis: phonology, the lexicon, morphology, syntax, semantics, and discourse.
Pre-requisite: None

ENGL7005 SOCIOLINGUISTICS

This course introduces key concepts and approaches to the sociolinguistics of bilingualism and multilingualism, with a particular focus on Chinese communities such as Macau, Hong Kong, Singapore, Taiwan and other Chinese cities. Topics covered include language use in bilingual/multilingual communities, language choice, language maintenance and shift, language attitudes and language ideologies, and language in globalization. Students are encouraged to reflect on their own bilingual or multilingual experience to apply the theories or models critically in their own social contexts. Not only classic papers but also current research articles will be discussed in the hope of providing the necessary background for students who consider writing their MA theses on topics of societal bilingualism or multilingualism.
Pre-requisite: None

ENGL7006 SYNTAX - THE STRUCTURE OF ENGLISH

This course will deal with the advanced description of syntactic structure from the perspective of the course is a more advanced study of English syntax assuming some basic knowledge of English grammar. It describes and analyses the structure of English from a current syntactic perspective. It deals with constituency, phrase structure of different kinds and clause structure. It applies theory to practical issues in English syntax and evaluate competing analyses.
Pre-requisite: None

ENGL7007 CINEMA STUDIES

This course considers the emergence of cinema in the twentieth century and looks at world cinema from various points of view. Students, with the aid of various readings from film theorists, will view and discuss a variety of classic and contemporary feature films.
Pre-requisite: None

ENGL7008 COLONIAL AND POSTCOLONIAL WRITING

This course will examine the interactive relationship between imperialism/colonialism and literature written in English. The role of imperial discourse in the shaping of 19th and early-20th

century English fiction and the reciprocating role of imaginative writing in the maintenance of British imperial authority will be an important focus of the course. Significant attention will also be devoted to writing as a counter-discursive reaction to imperialism and colonialism.

Pre-requisite: None

ENGL7009 DRAMA & THEATRE STUDIES

This course will address major works of dramatic literature spanning the sixteenth to twentieth centuries and will examine the development of realism and naturalism in the creation of modern and contemporary drama. In addition to textual analysis, students will look at various plays from the point of view of production, and the works of major directors will also be considered. The course aims to place dramatic works within the context of theatre studies.

Pre-requisite: None

ENGL7010 MODERNITY IN ENGLISH LITERATURE

This course examines the impact of modernity on English and American literature. The course will trace the emergence, development, and influence of modernism in Anglo-American writing. The first half of the 20th century, the period of High Modernism, will receive special attention. Also considered will be the legacy and surviving influence of modernism.

Pre-requisite: None

ENGL7011 ROMANTICISM

This course is an in-depth study of the impact of Romanticism on Anglophone writing. The course will begin with a consideration of the origin of romanticism, its development, and application as a conceptual model. Romantic poetry in the English tradition and its influence on near-contemporary and later writers will be a primary focus. Some major themes can include nature, time, love, and death.

Pre-requisite: None

ENGL7012 VICTORIAN NOVELS AND POETRY (1840 – 1870)

Covering the period of High Victorianism, the course looks at novelists like Dickens, Mrs. Gaskell, Disraeli, and the Brontës as social critics. The course also includes issues of British regionalism and provincialism in 19th-century fiction, focusing on such authors as Eliot and Hardy. Works by Tennyson, the Brownings, and other major poets of the period will be studied within their social and intellectual contexts.

Pre-requisite: None

ENGL7013 DISCOURSE ANALYSIS

This course covers the key concepts and methods of the linguistic approach to the analysis of spoken discourse and written discourse. Topics covered will include language beyond the sentence, global and local properties of speech and writing, narrative structures, new and old information, subjects and topics, foregrounding and backgrounding.

Pre-requisite: None

ENGL7014 HISTORY OF ENGLISH

This course surveys the development of English from the fifth century until the present, including the historical and cultural contexts of changes in the language. Old, Middle, and Early Modern English texts will be examined in terms of phonology, graphology, morphology, lexicon, syntax, and semantics. Topics such as the effects of cultural and technological developments, dialectal variation, and genetic affiliations may also be examined.

Pre-requisite: None

ENGL7015 SPECIAL TOPICS IN LINGUISTICS

This course is designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on the availability of specialized staff. Examples of specialized topics that may be offered include: Language and Gender, Second Language Reading and Writing,

Language Typology, Morphology and Lexicography, etc.

Pre-requisite: None

ENGL7016 GENRE STUDIES

This course will present the concept of literary kinds or types, including the problems of classification, the ways in which expectations of genre influence understanding, and the relationship between genre and ideology. Selected forms of imaginative literature, such as the novel, poetry, and drama, as well as non-imaginative types, such as journalistic essays and travel writing, will be studied.

Pre-requisite: None

ENGL7017 SHAKESPEARE

This course will offer an advanced analysis of selected plays showing the generic range of Shakespeare's work. Non-dramatic works may also be included. The course considers varying stage realizations of Shakespeare's drama and the centrality of Shakespeare in Western literature.

Pre-requisite: None

ENGL7018 SPECIAL TOPICS IN LITERATURE

This course is designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in their particular areas of specialization. The topic and content of the courses will vary from year to year depending on availability of specialized staff. Examples of specialized topics that may be offered include: detailed and close study of major works of literature e.g., Joyce's *Ulysses*, Shakespeare's *Hamlet*; Milton's *Paradise Lost*; particular genres, e.g., travel writing, satire, science fiction; or study of a particular writer.

Pre-requisite: None

ENGL7019 WORLD ENGLISHES

This course will undertake an examination of the nature of international languages, global communication, and the historical context that has led to the current use of English as an international language. In addition to the study of international varieties of English, this course will examine issues such as language policy, language education, literary canons, and language change within the context of the global use of English as an international medium of communication.

Pre-requisite: None

ENGL7020 BILINGUALISM

This course aims at introducing the study of language contact and ways to analyze code-switching in different social, cultural, communicative and generic contexts. It starts with a broad survey of various language contact phenomena, and then it will focus on the major ideas and frameworks that have been proposed to analyze code-switching. The last part of the course will be devoted to the currently very popular notion of translanguaging. The discussion will draw on research on Chinese/English contact, in the hope that students who are interested in the subject will find inspiration for their MA dissertation.

Pre-requisite: None

ENGL7021 COGNITIVE LINGUISTICS

The course introduces the student to Cognitive Linguistics, a field in linguistics which studies the relationship between language, language use, and human cognition: how language is grounded in human perception and conceptualization; from the most mundane linguistic expressions about time and space. The course covers fundamental concepts and issues, as well as the major theories of the field, including frames, attention, conceptual metaphor, metonymy, categorization, and mental spaces. Students will also learn to use various empirical methods, including corpus technologies and laboratory experiments, to carry out their own research projects.

Pre-requisite: None

ENGL7022 CORPUS LINGUISTICS

This course will introduce students to the methods and issues involved in corpus linguistics. It aims to demonstrate the practical use of online corpora to explore questions asked by scholars of language, and to address some of the central issues raised by corpus design and analysis. Students will familiarize themselves with the research use of online corpora and the construction and analysis of original corpora using freeware concordance tools. At the same time, the classes will consider various aspects of language analysis concerning lexis and grammar, and questions of language variation and change.

Pre-requisite: None

ENGL7023 MEDIA DISCOURSE

This course explores some of the more recent genres of broadcast talk in close detail, focusing on cases such as the celebrity interview, the talk show, news interviewing and some kinds of reality TV show. The course explores the way language has been adapted to the requirements of new media such as the internet and the cell phone. By the end of the course students should be familiar with key concepts for understanding mediated language drawn from sociology, linguistics and critical discourse analysis including notions of register, genre, the cooperative principle, implicature, face work, politeness, participation framework and social deixis. They should be also have gained competence in collecting, transcribing where necessary, and analyzing instances of broadcast talk or mediated language using concepts acquired in the course.

Pre-requisite: None

ENGL7024 CRITICAL READING

are interested in literary studies. 'Reading' refers to the skill of registering literary form, recognizing intertexts, and interpreting; it also refers to reading literary texts in the contexts within which they are produced and circulated, and, where it is enriching, with the help of concepts associated with literary theory. The course concerns, in brief, the reading of literature, context, and theory in the preparation of criticism of one's own. Toward that goal, this course will be an introduction to the theory and an immersion in the practice of literary scholarship. We shall collectively explore the philosophical foundations of the discipline of Literary (and by extension Cultural) Studies to understand the literary profession as well as the pursuit of advanced degrees in literatures in English. Also, the course aims to develop knowledge and skills in identifying, gathering and evaluating sources, defining/refining a research topic, and persuasively presenting your research.

Pre-requisite: None

ENGL7025 LANGUAGE AND POPULAR CULTURE

The study of Sociolinguistics has traditionally dismissed data from popular culture because it is neither spontaneous nor naturally occurring. More recent attention, however, has been given to the linguistic performance of identity within popular culture and the implications that various performances have within the expression of ethnolinguistic identity and language ideologies. This course will examine some of the important theoretical developments within the study of language and identity, including stylization, communities of practice approach, language crossings and the acts of identity approach.

Pre-requisite: None

ENGL7026 ADVANCED CINEMA STUDIES

This course focuses on global cinema or filmed literature. It specifically explores issues of industrial practices, authorial subjectivities, spectatorship, and social ideologies. Topics to be covered include but not limited to auteur studies, genre studies, star studies, and other critical approaches to film studies, including feminism, postmodernism, and queer theory.

Pre-requisite: None

ENGL7027 ASIAN DIASPORA LITERATURE IN ENGLISH

Asian Diaspora literature involves writing that concerns the global movement of Asian people. This literature records Asian experiences of diaspora while inscribing the cultural, social, and political forces bearing on authors and their communities. Consequently, it is a body of writing that

explores issues such as subjectivity, identity, home, alienation, displacement, belonging, community, memory, assimilation, discrimination, etcetera. In this course students will read literary texts in this category, along with relevant criticism and theory to explore a selection of those aforementioned issues. Also, students will develop their own idea about those works, and exercise research, presentation, and writing skills.

Pre-requisite: None

ENGL7028 REPRESENTING THE SHOAH: THE HOLOCAUST IN LITERATURE, MEMOIR AND FILM

This course looks at how the Shoah (Holocaust) is represented in various genres, including memoirs or testimony by survivors, in fiction and drama, and in film and other artistic media.

While this course does not aim to provide a study of the Holocaust as a whole, a subject more suited to history, politics and sociology, it will attempt, through the study of various literary and other artistic texts, to provide students with an overview of responses from those who endured and survived the horror as well as from those who have written about the Shoah from an historical distance.

Pre-requisite: None

ENGL7029 ECOLOGY AND APOCALYPSE

This course will consider the theme of environmental crisis in both its historical and contemporary aspects. As well as considering issues of environmental collapse, it will comprehend also the human and cultural dimensions of disease, depopulation and migration associated with climate change and natural disaster. The course will encourage students to extend ecocriticism beyond its customary preoccupation with historical Romanticism and contemporary wilderness by fostering an interest in the depiction of environmental crisis in popular culture.

Pre-requisite: None

ENGL7030 NINETEENTH CENTURY GOTHIC FICTION

This course investigates the literary, cultural, and architectural meanings of the Gothic in nineteenth-century English literature, society, and politics, as well as considering the continued influence of the Gothic on the literary and cultural imagination today. Areas covered include Gothic politics, Gothic architecture, science and medicine, Pre-Raphaelitism, medievalism, the female Gothic, vampires, ghosts, and the 'Uncanny'. Skills developed include the critical reading of texts, and the ability to conduct academic discussion both orally and as a sustained argument in essay form.

Pre-requisite: None

ENGL7504 COURSE DESIGN FOR LANGUAGE LEARNING

Approaches to course design and elements to consider when effectively planning English language learning courses will be demonstrated by an examination of the ways in which these components interact when designing, evaluating, and revising courses. Students will investigate course design processes and issues both firsthand and through discussions with practitioners and have opportunities via individual and group projects to apply course design principles to selected situations and settings.

Pre-requisite: None

ENGL7505 CURRENT TRENDS AND ISSUES IN LANGUAGE LEARNING

This course will examine the newest trends as well as current issues in language learning. An investigation of the most recent underlying theories and hypotheses regarding language acquisition will be combined with research reports and "current practices" in areas such as: multimedia (CALL, internet, etc.), co-operative learning, multiple intelligences, the arts (e.g. music, art, dance, drama, literature), use of authentic materials and video, content-based and theme-based instruction, projects, critical thinking, process writing, reflection and metacognition, alternative assessment, and action research.

Pre-requisite: None

ENGL7508 MATERIALS DESIGN AND EVALUATION

This course will provide an understanding of materials design principles, techniques, and issues while also examining the ways in which texts and materials can be used to guide, inform and enhance L2 learning. You are expected to become familiar with materials, sources and professional resources available while evaluating and designing materials for selected L2 learning situations and settings.

Pre-requisite: None

ENGL7509 PHONOLOGY

This course constitutes an overview of phonological theory and analysis. While data from a range of languages will be discussed, however, the focus will be on English. The topics covered will include phonological rules, representations, underlying forms, derivations, and justification of phonological analyses. Attention will also be given to the interaction of phonology with morphology and syntax, syllable structure and stress. The course will emphasize practical skills with problem sets.

Pre-requisite: None

ENGL7998 PROJECT REPORT

Under the supervision of an instructor, the student designs, executes, and reports on a substantial piece of research in the field of Literature OR Linguistics in English.

Pre-requisite: None

ENGL8013 SPECIAL TOPICS IN ENGLISH LINGUISTICS

This course intends to guide students to work intensively on specific topics related to Linguistics/Translation Studies. It introduces current issues and advanced topics in the related fields and gets students involved in discussing and analyzing the key issues. Students are expected to read books and papers designated by the instructors, to conduct in-depth research on their own, and to present their research findings both in class and in international conferences and seminars.

Prerequisite: None

ENGL8014 SPECIAL TOPICS IN ENGLISH LITERARY STUDIES

One or more courses may be offered as a Special Topic in English Literary Studies. These may include a continuation of the Practice of Scholarship course, focusing on the experience of submitting papers to an academic journal; a course on the history of the book and print culture that focuses on historical texts and the modes of their production; advanced topics on a specific area of English literary studies; or a special topic in Translation Studies.

Prerequisite: None

ENGL8016 ADVANCED RESEARCH WRITING

This doctoral seminar course is designed to introduce PHD students to the making and presentation of scholarly works through reading, analyzing, and critique of published academic texts. As an advanced research writing course, one key component of the course will be on the construction, deconstruction, and evaluation of academic genres of writing, and the construction, negotiation, and co-construction of academic discourse and scholarly identity in the publication process. The course will hence foreground the need for students to develop a principled and critical way of evaluating and developing research articles, as well as to empirically investigate into the sophisticated means of academic identity construction in ERPP writing practices. Meanwhile, it will also require students to reflect on how the understandings and skills they gain from this course can be deployed in their own research and writing. A working paper intended for publication in an English academic journal is expected at the end of the class.

Pre-requisite: None

ENGL8090 PRACTICE OF SCHOLARSHIP I

This course aims at helping PhD students to familiarise themselves with the academic practice in their early academic careers, with a focus on training on how to carry out research by way of

performing research tasks. It is designed to help students develop their ability in academic writing, covering aspects essential for writing a research paper and the dissertation. Specifically, the course will invite students to make connections between the course readings and their own research projects and to apply what has been studied to their own research. Students will also have opportunities to participate/organize academic activities.

Pre-requisite: None

ENGL8999 DOCTORAL THESIS

This is the course for PhD Dissertation. The objectives of this course are to promote good scholarship and to train students both intellectually and methodologically. Faculty working in the PhD program theoretically includes all academic staff of assistant professor and above, with research focuses on related areas. Supervisors are encouraged to contact and discuss regularly with their students.

Pre-requisite: None

HIST1000 HISTORY OF MACAO

This course introduces students to a wide range of topics shaping Macao's global history from its sixteenth-century foundation as a Portuguese trading post in Ming China to its handover to the People's Republic of China (PRC) at the end of the twentieth century. It examines political, social, economic, and cultural dimensions of Macao's historical development vis-à-vis China, Portugal and other Western powers, retracing the main forces shaping European and Chinese modernity in tandem with the port city's emergence and later conversion into a colonial setting before its return to the PRC.

Pre-requisite: None

HIST1001 HISTORY OF CHINA I

This survey course is designed to provide the student with an overview of Chinese history before modern times. It retraces the growth of Chinese civilization from its pre-historical genesis until the 17th century. Students will understand through readings, lectures, videos, and discussions the historical patterns of traditional China's evolution. This course will stress major events and the nature of the political, cultural, and social structures of ancient China.

Pre-requisite: None

HIST1002 HISTORY OF CHINA II

This is a survey course on modern China from the 17th century to the establishment and decline of the Republic in the early 20th century. It traces the social disorders and transformations of modern China, covering such topics as the Ming-Qing dynastic wars, internal rebellions and foreign wars, the fall of the Qing Dynasty, the political disintegration and reintegration under the Republic, the attempts at reforms and modernization, and the rise and victory of Chinese Communism in 1949. This course explores the issues of imperialism, nationalism, revolution, communism, totalitarianism, and modernization.

Pre-requisite: None

HIST1003 HISTORY OF CHINA III

This is a survey course on Communist China from its outset when the Chinese Communist Party (CCP) seized power and established the People's Republic of China in 1949 to the present. Emphasis will be on the current social, economic and cultural transformations brought about by the reforms since 1978. It investigates the political and economic policies of the CCP and its impacts during the Mao Era and the Post-Mao Era in general, and pays particular attention to the various social phenomena during the periods of the 1950s, the Cultural Revolution, and more recent reforms.

Pre-requisite: None

HIST1004 HISTORICAL THEORY AND PRACTICE

This course focuses on the methods of historical study, the sources for doing historical research, and the craft of writing history. It will introduce students to a wide variety of methods and

approaches to the study of the past, and to critically examine the issues of “doing” history. Classes will consist of lectures, discussions, as well as visits to libraries, museums, and occasional fieldtrips. On a more practical level, students will learn how to take class notes, prepare for examinations, compile bibliographies, and write short book reports and research papers.

Pre-requisite: None

HIST1005 HISTORY OF MODERN EAST ASIA

This is a survey course that traces the foundation and development of modern East Asia since the 19th century. Through examining the major historical events, the transformations of political and economic institutions, and the social and cultural trends of China, Korea, and Japan from the early nineteenth century to the present, the course provides interpretations for many intriguing historical phenomena, such as feudalism, imperialism, warlordism, militarism, nationalism, and communism. This course will also compare and contrast the processes and methods involved in modernizing China, Korea, and Japan.

Pre-requisite: None

HIST1006 HISTORY OF THE UNITED STATES

This is a survey of the American past from the post-Civil War era to the 1990s. Students will study about the growth and impact of industrialization and urbanization in the Gilded Age, the reform movements, such as progressivism, the New Deal, the Civil Rights movements, and the Great Society. This course traces America's path to global involvement in the 20th century, including America's entanglement in the two world wars and the wars in Korea and Vietnam. The course aims to help students acquire a firm knowledge of major themes and characteristics of the United States and its people, and a better understanding of the present with a new perspective derived from the study of the past.

Pre-requisite: None

HIST1007 ART HISTORY OF ANCIENT CHINA

The course is a historical survey of the visual arts in China from the pre-history period up to the Qing Dynasty. Students are introduced to a variety of artistic traditions and media, including ceramic, bronze, sculpture, and painting. Discussions cover significant issues of art history, with emphasis on the underlying philosophy, religion, history, and aesthetics of Chinese culture. The course is designed to meet two principal goals. The first is to develop skills of visual analysis and a critical vocabulary for discussing the media, technologies, styles, compositions and iconographies of Chinese art. The second is to foster an understanding of art--and visual culture in general--according to technological, social, economic, political, and religious contexts.

Pre-requisite: None

HIST1008 ART HISTORY OF MODERN CHINA

This course is a survey of major artists and their works, as well as artistic trends in China from the late Qing Dynasty to the present. We will explore the ways in which Chinese artists of the 20th century have defined modernity and their tradition against the complex background of China's history. A key issue for modern Chinese art is the degree to which Chinese artists have chosen to adopt Western conventions and the extent to which they have rejected them. Equally legitimate positions have been taken by artists whose work actively opposes the legacy of the past and by those who pursue innovations based upon their particular understandings of the Chinese tradition. Through examining art works in different media, including oil painting, graphic design, woodblock prints, traditional ink and color painting, and recent installation and video art, along with theoretical writing, bibliographical and institutional data, and other documentary materials, we will investigate the most compelling of the multiple realities that Chinese artists have constructed for themselves.

Pre-requisite: None

HIST1009 HISTORICAL SOURCES, ARCHIVES, AND BIBLIOGRAPHY

This course is designed to help students to become familiar with historical sources and bibliographies, especially archival materials, and to equip students with the knowledge and skills to manage, track down, and use all the sources relevant to historical materials. On a practical

level, the various printed and electronic aids to finding and accessing primary materials will be introduced, and students will be shown how to combine these to retrieve all the sources efficiently and comprehensively.

Pre-requisite: None

HIST1010 DIGITAL RESOURCES IN THE HUMANITIES

This course is designed to introduce students to a range of issues involved in the design, creation, management and use of electronic resources in the humanities. Topics include humanities resources on the digitized information, digital imaging, encoding and markup systems, text analysis, GIS, electronic dictionaries, scholarly electronic publishing in the humanities and interdisciplinary working.

Pre-requisite: None

HIST1011 CULTURAL HERITAGE STUDIES

This course is designed to introduce students practical and theoretical approaches to the key issues and working practices in the field of cultural heritage. It is aimed at both those who wish to study cultural heritage as an academic subject, and those who might wish to obtain employment in the broad professions. The topics include studies of monuments, historic houses, cultural landscapes, cultural routes, intangible cultural heritage, and so forth.

Pre-requisite: None

HIST1012 MUSEUM STUDIES

This course is designed to introduce students to the history of museums, the major types of museums, their collections, and historical and contemporary issues and ethical challenges shaping the scope and role of museums. Topics discussed include the definition of museums, the history of collecting practices, and the origins and development of the public museum. The role of material culture in museum history, museum operations, and diversity and community engagement are also considered. Students are encouraged to make field trips, visiting subject-appropriate museum sites and reporting back to the class. Students will also contribute to discussion sessions on assigned topics and research the origins and mission of museums.

Pre-requisite: None

HIST2001 WESTERN CIVILIZATIONS I

This course begins in ancient times, with the foundations of Western civilizations, crisis and recovery in the Middle Ages, and then follows the cultural, social and political progress of Europe through the Renaissance and Reformation, its overseas expansion in the early modern era, and the Age of Enlightenment. The course focuses on European thought and culture, as well as technological change and political competition that set the stage for the rise of the Western prominence in the modern world.

Pre-requisite: None

HIST2002 WESTERN CIVILIZATIONS II

This course explores the Enlightenment ideas that gave rise to the French Revolution, as well as the technological foundations that led to the Industrial Revolution. It follows the movement of Europeans throughout the world in the 19th century as well as the cultural and social progress of Western societies. It examines the age of catastrophe punctuated by two world wars that produced the division of Europe, and ends with the economic and political reintegration of the European continent.

Pre-requisite: HIST2001 or permission of the instructor

HIST2003 HISTORY OF PORTUGAL AND ITS MARITIME EXPANSION

This survey course introduces students to a wide range of historical issues about Portugal from world power in the Age of Discovery in the 15th and 16th centuries to the Portuguese Empire in the 19th century and up to the present. The course focuses on political, social, cultural, and economic developments, including the expansion and decline of the Portuguese Empire, the end of monarchy and the development of the Republic, and Portugal's integration into Europe and its

global involvement.
Pre-requisite: None

HIST2004 READINGS OF CHINESE CLASSICAL DOCUMENTS AND HISTORICAL MATERIALS

This course consists of two parts. The first part introduces students to the significance of historical source materials, the classification of ancient Chinese historical materials, and the means of examining and utilizing historical source materials. The second part teaches students how to read and find historical source materials. Through case studies, students will learn how to discover and understand historical source materials and develop their capability of examining, analyzing, and using historical source materials, while also enhancing their reading ability of Chinese classics.
Pre-requisite: None

HIST2006 MACAO IN WORLD HISTORY

This is an in-depth study of Macao and its role in World History. Topics to be discussed will include the arrival and establishment of the Portuguese and Spanish in Asia; the establishment of Macao as a hub for East-West interchanges; Jesuit activities and Macao as a trading entrepôt in late-Ming; conflicts between Catholics and Protestants in Asia and the changing nature of trading networks; Macao as the gateway to the China trade; the rise of a "coolie trade;" Macao under the umbrella of Hong Kong; Macao as a refuge in WWII; and the emergence of the Gaming Industry in the late 20th century. Special attention will be given to Macao's responses to the changing environment in East Asia and how it was able to redefine itself in the face of competition and adversity.
Pre-requisite: HIST1000 or the permission of the instructor

HIST2007 WORLDVIEWS AND MAPPING IN HISTORY

Starting from map analysis, students will explore the different worldviews of medieval, early modern, and modern times from different perspectives. The focus will be on the connections between continents and peoples, with a large part of the course devoted to the cultural exchanges between Europe and Asia, one of the history department's main areas of research. We will actively use maps to explore how peoples of the past understood or experienced the world and reflect on the connections between cartography and power relations, intercultural contact, modern historiography and contemporary society.
Pre-requisite: None

HIST2008 HISTORY OF SOUTHEAST ASIA

This course is a survey of Southeast Asian history from 1750 to the present. The course will highlight the development of a modern Southeast Asian civilization during a period of great difficulty and intensity, when Southeast Asians struggled to maintain independence in the face of increasing influence and pressure from outside. Topics to be examined will include colonialism, nationalism, the formation of new states and societies, efforts at regionalism, and ethnic and religious tensions.
Pre-requisite: One 1000-level History course or permission of the instructor

HIST2010 HISTORY OF ASIAN ARTS

This course is an introductory of major artistic and cultural trends in the histories of Asia, mainly India and Japan. By examining in depth a number of the most representative works of art from each tradition, we will not only discuss the important developments in style and aesthetics in each region, but also explore the mutual influences that motivated the creation of these works of art. Contextualization of the visual culture will be the primary methodological approach of this class. We will study the works of arts within the cultural contexts—the political, religious, social and economic spheres that helped define the direction of the visual arts in Asia.
Pre-requisite: None

HIST2011 HISTORY OF WESTERN ARTS

This course is an introductory survey of major artists and their works, as well as artistic trends in

the history of Western art. Students will explore works of painting, sculpture, and architecture in Europe and the Near East from the Stone Age, through medieval periods to the modern time. Lectures focus on the historical outlines of the major art movements. We will also focus on developing students' critical faculties – the ability to apprehend and comprehend a work of art.
Pre-requisite: None

HIST2012 CHINESE CULTURE HISTORY

This is an introductory course to history of Chinese culture. This course will explore Chinese customs, art, literature, festivals, folklore, religious activities, architecture, medicine, everyday life, and so forth. The course has three major goals. First, it provides students with a basic knowledge of Chinese cultural practices; second, it introduces students to some of the current scholarship of Chinese culture and consumption; and third, it offers a cultural background for students to have a better understanding of today's China, Chinese people, their thought, and their society.
Pre-requisite: None

HIST2013 HISTORY OF JAPAN

This course on Japan covers the Tokugawa to the postwar period. It examines the profound political, economic, and social transformation of Japan before and after Perry's Mission, the Meiji Restoration, the rise and fall of the Imperial Japan, and the development of postwar Japan. It focuses on the issues of modernization, imperialism, militarism, democracy, and economic success.
Pre-requisite: None

HIST2014 POLITICAL SYSTEM OF ANCIENT CHINA

The course is designed for students to understand the history of the political system in ancient China, its relationship with social development, and the rules of its origin, development, and transformation and get some basic historiographical training through lectures, historiographical reading instructions, class discussion and assignments. The course will expand students' visions and enable them reach conclusion about the gains and loss in the development of political civilization through a comparison study of the history of the political system in ancient China and the west in a global perspective. The course will help students master the basic requirement and cultivate their interest in academic research. It will build a solid foundation for students who aspire to get further education and training in ancient Chinese history research.
Pre-requisite: None

HIST2017 THE BRITISH EMPIRE AND THE WORLD

The world we inhabit today was, in no small sense, created by the British Empire. Starting in the eighteenth century Great Britain underwent a dramatic transformation, from small island kingdom to pre-eminent global power, formally ruling a quarter of the world's land and population and informally exercising a wider influence still. Yet after World War II, the British Empire experienced a rapid decline. How can these developments be explained? How were they experienced by the British themselves, and by the peoples who fell under their sway? Such questions are at the heart of this course.
Pre-requisite: None

HIST2018 MEDICAL IDENTITIES IN EAST AND WEST

This course is a fascinating exercise in which we will explore, on the one hand, the development of medical ideas, concepts and thought as well as shifting patterns of medical practices and therapeutic treatments in global history. On the other hand, we will focus on the transmissions, interactions and exchanges of healing traditions, medical theories, pharmaceutical knowledge and related religious worldviews, and this over a space stretching from Europe, Africa, the Americas, and across Asia, from China and India to Southeast and West Asia. Taking as a case study the construction of medical identities in East and West, we will reflect on the close relationship between medical thought and the prevailing political, social, economic and cultural manifolds that shaped the condition humane. Likewise, we will unfold the all-encompassing and cross-cultural parallelisms showing that civilizations are not discrete and unalterable units but

have been subjected time and again to external influences and impacts. Following this interdisciplinary and comparative theoretical framework, with due attention paid to primary sources in Eastern and Western languages, this course aims at promoting an awareness of the historical forces that have molded, and continue to shape, medicine in the world, thus helping us to reach a deeper understanding of the origin and developments that define the world's modernities.

Pre-requisite: None

HIST2024 HISTORY OF FOREIGN RELATIONSHIPS IN THE QING DYNASTY

The course aims to cover three main subjects: the traditional Chinese diplomatic systems and ideas, the collapse and transformation of traditional diplomacy and the establishment of modern diplomacy. This course will first investigate how traditional Chinese regime understood and dealt with foreign relations by setting Qing dynasty as an example. It will then come to a discussion of the collapse of traditional diplomacy and the establishment of modern diplomacy. Besides, it will also have a comprehensive observation of the frontier crisis such as Korea and Vietnam resulted from the western colonialization and Chinese domestic transformation.

Pre-requisite: None

HIST3000 ASIAN MARITIME HISTORY

Maritime history involves more than trade. This course explores the political, economic, social, and criminal (piracy and smuggling) interactions between China, Southeast Asia, and India from the 16th century to the present day. Students will study about pan-Asian trade and tribute interactions, and retrace the migrations of different ethnic groups as they interacted across maritime Asia. Special attention will be paid to the cultural diversities of each group and the reasons behind their migrations, exchanges, and encounters.

Pre-requisite: One 1000- or 2000-level History course or permission of the instructor

HIST3003 HISTORY OF CHINESE PAINTING

This is a survey of Chinese painting history from the pre-Han period to the Qing dynasty. This course examines the most important artists and their representative masterpieces of painting, and the major artistic movements of each dynastic period to study essences of Chinese art. We particularly stress important development in style and subject matter. As appropriate, issues in style and subject matter will be related to contemporary development in philosophy, religion, government, society, and culture.

Pre-requisite: None

HIST3004 CHINESE BUDDHIST ART

In this course we will explore the world of Buddhist art in China, from its transmission from India and the Central Asia to its transformation into an integrated part of Chinese culture in general. And by the end of this semester, we will also explore the indigenous temples in Macao. We will examine this multifaceted tradition as a profound expression of both artistic and religious values. We are dealing with images and architectures which, first of all, are intended to hold religious meaning and to serve Buddhist ritual, edification, salvation, and enlightenment. It is only by discerning the relationships between their "religious" and the "aesthetic functions"—how aesthetic practice is informed by and at the same gives form to religious practices—that we can begin to understand the spiritual efficacy and performative force of these creations.

The course is designed to meet two principal goals. The first is to develop skills of visual analysis and a critical vocabulary for discussing the iconographies and styles of Chinese Buddhist art. The second is to foster an understanding of Buddhist images according to their physical, social, and especially religious contexts.

Pre-requisite: None

HIST3009 MACAO MEMORY AND ARCHIVES

This course will focus on the subjects of Macao Archives, as well as Macao Memory. In particular, it consists of the topics on exploring of the Macao history and cultural development in relations with documentary heritages, and the sciences of management and integrating of documentary

resources in the new information and communication technologies, such as the worldwide project Memory Programme. Thus, the course will introduce the basic concept of documentation development, information management, professional ethics, government archives management, etc., with the theory and practical knowledge in the ever-changing environment of electronic and Internet world.

Pre-requisite: HSTB1000 History of Macao

HIST3010 MILITARY HISTORY OF MODERN CHINA

This course is to discuss the evolution of military force in China from the early Qing to the Korean War, including the Eight Banners, Green Standard, Militia, New Army, and People's Liberation Army. The course will introduce the major fights, battles, and wars, such as the Opium Wars, Taiping Rebellion, Sino-French War, Sino-Japanese War, War of Resistance against Japanese, and Civil War. The course will also analyze the military ideas, tactics, and strategies of major military leaders such as Li Xiucheng, Zeng Guofan, and Mao Zedong. The instructor will guide students to read some important works on the subject.

Pre-requisite: None

HIST3013 CHINESE SOCIO-ECONOMIC HISTORY

This course aims to provide a basic understanding of social and economic history of China from early times to the present. Topics include (but not confined with) social institutions such as clan, lineage, huiguan, and etc, trade, money, banking, imperial economic policies, and so on.

Pre-requisite: None

HIST3014 HISTORY OF CATHOLICISM IN CHINA

This course aims to provide a basic understanding of social and economic history of China from early times to the present. Topics include (but not confined with) social institutions such as clan, lineage, huiguan, and etc, trade, money, banking, imperial economic policies, and so on.

Pre-requisite: None

HIST3015 JESUITS IN MING-QING CHINA

This course aims to retrace the path of the Jesuit missionaries who sailed from Portugal to China, believing that they could convert China to Christianity. Besides describing the role of Jesuits as cultural emissaries, this course will examine how these priests, in the first concerted European effort to engage with Chinese language and thought, translated Roman Catholicism into the Chinese cultural frame until the proscription of Christianity in China in 1724. In the retelling, this course will take students across continents and centuries to reveal the deep political, cultural, scientific, linguistic, and religious complexities of a true early engagement between East and West.

Pre-requisite: None

HIST3021 SPECIAL TOPICS IN HISTORY

This course number is reserved for any new topic in the study of history which is meant to provide students further chance to encounter more updated development and more diverse aspects of the field.

Pre-requisite: None

HIST4001/4002 ADVANCED HISTORY WRITING I/II

These are capstone courses, to be taken in sequence, designed to help majors pursue an individual research project under the supervision of a faculty of the History Department. The purpose of course meetings is to give the students a chance to learn the mechanics and methods of senior research and to share with classmates the work process and experience, excitement and frustration in historical writing and research. The courses, which aim to enhance the seniors' critical thinking, oral skills and capability of examining and interpreting historic events, will explore the methods of collecting, sorting, and analyzing source materials and collectively deal with common problems rising from research. The end result of their research will be a 25-50-page essay based on primary sources and presented to the public. The seniors in the class will also need to prepare a Portfolio that summarizes their college experience as a History Major.

Pre-requisites: None

HIST4003 RESEARCH PROJECT

This Research Project allows the history senior to gain research experience in one of the areas of specialization of the department for one semester and under close supervision of one faculty member. At the completion of the research project, final assessment is earned by writing a research report. A research report is different from an academic thesis in that it does not require extensive literature review and theoretical framework, and it is shorter.

Pre-requisites: None

HIST7000 APPROACHES TO GLOBAL HISTORY

This seminar not only reviews many most recent literatures on global history, but also aims to introduce paradigms, themes/topics, periodization, methods, perspectives, challenges and problems, and cases studies in global history.

Pre-requisite: None

HIST7001 HISTORY OF MODERN CHINESE POLITICAL SYSTEM

The course will discuss the various elements of political change in China. The progress of political reform in modern China through a historical perspective will be explained.

Pre-requisite: None

HIST7002 INTRODUCTION TO STUDY ON MODERN CHINESE HISTORY

This course requires students to read different kinds of historical documents. Students will be divided into groups to complete the reading and report. After the report, all participants will discuss the documents. The method of analysis.

Pre-requisite: None

HIST7003 PERSPECTIVES IN MACAO HISTORY

This course aims to equip students with the key knowledge and concepts deployed in the writing of Macao history. It aims to ground students' knowledge of Macao as a research area by engaging them with wider historical themes and perspectives, including but not limited to colonial history, Chinese history, social history, cultural studies, global connections, postcolonial studies and heritage studies. Students will be familiarized with major theoretical perspectives and interdisciplinary approaches useful in the study and research of Macao history. They will achieve a critical reflection of Macao history as an area study linked to local develop.

Pre-requisite: None

HIST7004 INDEPENDENT STUDIES IN HISTORY

This course is designed for individual professor to meet specific needs of students for their own research projects. Topics are usually within the three pillar fields set up in the History Department, namely: Chinese history, Macao history, and history of East-West interactions.

Pre-requisite: None

HIST7750 MACAO, CHINA AND WORLD HERITAGE

This course will introduce students to the concepts of world heritage with an emphasis on the culture and history of Macao and China and their places in world heritage. In this course students will survey the definition, meaning, history and characteristics of world heritage sites in Macao and China and acquire new skills that contribute to a better understanding of the importance of both tangible (monuments, historical centers, natural reserves, etc.) and intangible heritage (traditional know-how, music, literature, etc.). As part of this course students will participate in regular field trips to museums and world heritage sites in Macao, where they will gain first-hand experience seeing and appreciating Macao's colorful history and culture.

Pre-requisite: None

HIST7751 CULTURAL HISTORY OF MACAO IN MING AND QING DYNASTIES

In this course students will explore the fascinating and intriguing phenomenon in cultural history

of Macao from the sixteenth century to the nineteenth century. Lectures and discussions will focus on the cases of cross-cultural exchanges between East and West in the making of a unique Macanese identity. Students will examine the multidimensional character and meanings of Macao's cultural, religious, culinary, gaming, and architectural heritage.
Pre-requisite: None

HIST7753 ARCHITECTURE AND HISTORY

Human experience is shaped by the built environment. This course introduces students to the interrelated fields of architecture, art history, and engineering and explores great architectural monuments from the ancient to the modern period, from India across the Mediterranean and Europe to the US. The focus will be on understanding these works in their structure and function, both as products of individual ingenuity and reflections of *Zeitgeist*. Questioning these monuments from a present-day perspective across the cultures will be an important ingredient, as will be podium discussions, guest lectures, excursions, and all kinds of visualizations, from digital walk-throughs to practical design exercises.
Pre-requisite: None

HIST7754 BUDDHIST SCULPTURES AND PAINTINGS

This course will offer interpretation of foundational Buddhist scriptures and paintings in their historical, literary, and philosophical contexts to trace the development of Indian Buddhism as well as its process of cultural accommodations in East Asia.
Pre-requisite: None

HIST7755 U.S. DIPLOMATIC HISTORY SINCE 1900

This course is to study U.S. diplomatic history for the past 100 years in general and to delve into a number of major or controversial issues in international relations in particular, including the issues of imperialism and nationalism, interventionism and non-interventionism, war and peace negotiation, politics of power and new international forces, globalization and terrorism, etc. It will examine the American perceptions of world issues and the evolution of the American strategic designs for national and international security within the global context as well as its impact on the world. It will also look at the influences of ideological, economical, and international settings and elements as well as domestic politics on the foreign policy makings of the US. The course is quite demanding since it will have quiz every week and requires your active participation in class discussion.
Pre-requisite: None

HIST7756 DIASPORAS IN SOUTH OF CHINA

This course examines the West-East interactions through tracing the historical activities and influences of Western Diasporas who came to South of China, including Macao and Hong Kong, to see how they dealt with migration, ethnicity, displacement, identity, mobility, community development, and cultural and mental challenges, as well as how they impacted the region and their homelands.
Pre-requisite: None

HIST7757 LATE IMPERIAL CHINA

This course covers the Ming and Qing Dynasties, roughly the fifteenth through nineteenth centuries. We will focus on the interplay between inner Asian "barbarians" and the Chinese, as well as on the economic and political flourishing of the 18th century before turning to the turmoil of the Opium War and Taiping Rebellion eras between 1839 and 1865. We will also examine the difficulties that China faced in reform and modernization in the face of Western and Japanese imperialism at the end of the 19th century. We end with the Boxer Uprising and 1911 Revolution, which brought an end to China's last imperial dynasty.
Pre-requisite: Three Chinese History courses or permission of instructor

HIST7758 PIRATES IN WORLD HISTORY

This course will explore the myths and realities of piracy across the globe and throughout history.

After first looking at a number of myths about pirates from movies, novels, and comics, we will then examine the nature and varying definitions of piracy, seeking to differentiate piracy from privateering and other forms of maritime violence. We will also discuss lifestyles and gender issues as they relate to pirates, as well as the impact of piracy on the economy and on state-building. Other themes include the comparison and contrast of piracy in different regional and temporal contexts.

Pre-requisite: None

HIST7759 CULTURAL HISTORY OF MACAO FROM THE EARLY REPUBLIC OF CHINA

This course will study cultural history of Macao within its nexus with mainland China that went through an enormous political and social transformation since the 1911 Revolution. It will explore certain cultural phenomenon of Macao in depth with a focus on the way that Macao tried to maintain its identity in response to the external impact. Students shall seek the cultural implications of Macao's historical development and the interactive movement between the tradition and the new, the foreign and the Macanese, as well as the cultural presentation and rebirth of a modern Macao.

Pre-requisite: None

HIST7762 LAW AND SOCIETY IN LATE IMPERIAL CHINA

This course is a survey of Chinese legal history that focuses on late imperial law and society in the Ming and Qing dynasties. The course will deal with the development of the Chinese legal tradition in the context of Confucian, Legalist and Taoist philosophy. Emphasis will be on the "Confucianization" of law. The Confucian legal tradition is at the core of the legal cultures not only of China, but also of Japan, Korea, and much of Southeast Asia. In this course we will examine the ways in which a legal system creates and reflects a society's structures and values in a mutually interactive process. Readings are drawn from Chinese codes, cases, and "detective novels."

Pre-requisite: None

HIST7763 SOCIAL AND CULTURAL HISTORY OF SOUTH CHINA

This course closely examines the social and cultural history of South China from ancient times to the 20th century, with an emphasis on Guangdong, Fujian, and Taiwan during the 16th through 19th centuries. Topics include class formation and changes over the past millennia; Confucianization of South China; demographic changes; village and lineage; growth of commercial and marketing networks; gender relations; bandits, pirates, and secret societies; popular movements, riots, and rebellions; and the impact of modern reforms on local society and culture.

Pre-requisite: Three Chinese History courses or permission of instructor

HIST7764 INDIAN, CHINESE AND JAPANESE RELIGIONS

This course will introduce students to the religious concepts and classic texts of Confucianism, Taoism, Buddhism, and Shinto in China and Japan as well as their relation to society and politics in history, including role models and paradigms for self-transformation; alchemy and meditation.

Pre-requisite: History of East Asia, History of Modern South East Asia, or permission of instructor

HIST7765 BUDDHIST ART: THEORY AND HISTORY

A detailed presentation of Buddhist theories and practice methodologies that resulted in the various schools of Buddhist art.

Pre-requisite: Art History of Ancient China, Art History of Modern China, Chinese Painting and Calligraphy or permission of instructor

HIST7766 ASIAN CULTURE

This is an upper level course on the selected topics related to the cultural features and developments of ancient Asia from the Classical period to early modern times. It will challenge students' established mindset by introducing them to the complexities of various teachings of Hinduism, Buddhism, Confucianism, Taoism, and Shinto, and exposing them to the "alien" values

and cultures of the Asian world as reflected in its religions, literature, films, and arts. The course will examine the main characteristics of selected Chinese and Japanese paintings and arts as well as the religious influences on them. It will help students appreciate the nuance of Asian literature and arts within a historical, social and cultural context, and to trace the intertwined flux of religious thoughts, individual sentiments, and artistic expressions.

Pre-requisite: Permission of instructor

HIST7767 FAMILY AND GENDER IN ASIAN HISTORY

This course will provide an overview of continuities and discontinuities of the family pattern and the gender role in Asian nations, mainly China and Japan, from the pre-modern time to the present, especially during the periods of great social transformation. It will, through analyzing historical events and personal and family stories as displayed in scholarly and fictional writings and films, trace the feminist movements and major developments of gender consciousness and relationships and the family structure in Asian history. It will fully explore the way in which class, society, and history create different life possibilities for women and in turn, how the changing gender relations and family pattern affected society, history, and individuals.

Pre-requisite: Modern Chinese History, Modern Japanese History, History of East Asia or permission of instructor

HIST7768 EAST-WEST INTERACTIONS AND EXCHANGES

This course examines the complex nature of the relationships and encounters between the imaginary and the real 'East' and 'West', in the present and recent past. It explores the interactions among cultural, social, economic and religious aspects of international affairs, particularly the changes at the cultural and religious levels which have subtly altered the international relationships of the East-West. It will also re-examine the concept of interactions and exchanges both within and beyond traditional theoretical mappings such as post colonialism and post-modernism. Its focus is primarily upon the interactions between 'East Asia' and 'the West' over the past three hundred years and the art and religious world with awareness of cultural fluidity.

Pre-requisite: Permission of instructor

HIST7769 SINO-INDIAN-SOUTHEAST ASIAN INTERACTIONS IN EARLY MODERN ASIA

This is an in-depth study of the political, economic, social, interactions between China, Southeast Asia, and India from the 16th century to the present. The course is purposely intended to bring out the pan-Asian encounters, which means Europeans and other westerners will be given only marginal coverage in the discussions. We will recount the many Chinese migrations to Southeast Asia, the trade and tribute interactions between the regions and the social, cultural, political and criminal exchanges and encounters that resulted. We will also try to retrace different ethnic groups as they migrate and interact between these regions inside Asia. Special attention will be paid to the cultural diversities of ethnic groups and reasons behind their migrations, exchanges and encounters.

Pre-requisite: Permission of instructor

HIST7771 SECRET SOCIETIES AND POPULAR MOVEMENTS IN MODERN CHINA

This course examines the social and cultural history of secret societies and popular movements in modern China, roughly from 1750 to 1949. The topics we will discuss include banditry, piracy, sworn brotherhoods, secret societies, and religious sects. Students are required to do weekly readings and make oral presentations, as well as write one book report, an annotated bibliography, and a research paper.

Pre-requisite: None

HIST7772 HISTORIOGRAPHY OF SOUTHEAST ASIA

This course is a graduate seminar on Southeast Asian history. Its aim is to survey a selection of major works published on selected topics in Southeast Asian history since approximately 1960, and in doing so, to assess the changing structure of the field. Topics to be examined will include but not limited to religion and belief systems, trade, the nature of polities, family and gender, and

colonialism and post-colonialism.

Pre-requisite: None

HIST7773 STUDIES IN IMPERIALISM I

This course provides students with an understanding of key developments that contributed to the rise of imperialism among European nations during the long nineteenth century. Students will be introduced to some of the most important thinkers and concepts in the writing of imperial history in order to explain how European imperialism stimulated economic growth and modernization in some colonies but severely hindered development in others. Throughout the course students will be encouraged to examine the work of contemporary theorists and scholars of Empire such as J.R. Seeley, J.A. Hobson and John Stuart Mill and how their writings have been interpreted and critiqued by modern-day imperial historians such as John Gallagher and Ronald Robinson, P.J. Cain and Anthony Hopkins and C.A. Bayly.

Pre-requisite: None

HIST7774 STUDIES IN IMPERIALISM II

This course provides students with an introduction to some the principal challenges and difficulties faced by European imperial powers during the 20th century. Students will have the opportunity to examine the impact of the First and Second World War as well as the rise of protest/nationalist movements on imperial structures in considering the factors leading to decolonization later in the century. In addition, students will be introduced to some of most significant twentieth-century writers on colonialism, anti-colonialism and postcolonial theory, including the works of Franz Fanon, Edward Said and Gayatri Charakravorty Spivak. Through an engagement with historical and literary texts, students will consider the degree to which many imperial structures survived formal processes of decolonization and continue to shape the world in which we live in today.

Pre-requisite: None

HIST7775 WESTERN DIASPORAS IN ASIA

This course examines the West-East interactions through tracing the historical activities and phenomena of Western Diasporas who came to Asia, to see how they dealt with migration, ethnicity, displacement, identity, mobility, community development, and cultural and mental challenges, as well as how they impacted the region and their homelands.

Pre-requisite: Permission of instructor

HIST7776 HISTORY AND ANTHROPOLOGY

Critical inquiry into historical representations of the "other" and ways in which historians have used notions of culture and other anthropological concepts to write and think about history. Students will learn about the uses and values of oral and ethnographic history through lectures, discussions, and fieldwork in Macao and China.

Pre-requisite: Permission of instructor

HIST7780 ADVANCED HISTORICAL THEORY AND PRACTICE

This course is required for all incoming M.A. students in History. It seeks to introduce students to the varieties of historical theories and research methods. Students will investigate theoretical models and intellectual traditions, which will be presented in terms of a series of debates between competing visions and interpretive perspectives. Guest speakers from within and without the University of Macao will be an important ongoing part of the course. Students will write several papers on scholarship, theoretical models, historiographical conventions, and so on. This course is designed to prepare graduate students for the more advanced Reading and Writing Seminars.

Pre-requisite: Historical Theory and Practice or the equivalent

HIST7781 ADVANCED READING SEMINAR

This is an advanced graduate-level course on a specific topic in the areas of Chinese, Asian, Western, or Comparative/World History. The course involves an in-depth analysis of primary sources and an evaluation of the secondary literature on the topic of the seminar. The focus of this course will be on the development of a bibliography and the reading and discussion of the

secondary literature on specific assigned topics.

Pre-requisite: Advanced Historical Theory and Practice or permission of the instructor

HIST7782 ADVANCED WRITING SEMINAR

This is an advanced graduate-level course that follows-up on the Reading Seminar. It will focus on a specific topic in Chinese, Asian, Western, or Comparative/World History. Students will have to write an extensive research paper based on primary sources. As a Pre-requisite students will have to have taken the corresponding Reading Seminar.

Pre-requisite: Advanced Reading Seminar or permission of the instructor

HIST7783 SPECIAL TOPICAL COURSES IN HISTORY I

There are special topical courses taught by visiting scholars or experimentally by FSS faculty.

Pre-requisite: None

HIST7784 SPECIAL TOPICAL COURSES IN HISTORY II

There are special topical courses taught by visiting scholars or experimentally by FSS faculty.

Pre-requisite: None

HIST7990 THESIS

This course is designed to train students for their thesis writing. Major schools, theories, and approaches in historical studies would be highlighted, style and format would be introduced, thesis proposals or research papers by students would be shared and discussed.

Pre-requisite: None

HIST8802 ADVANCED SPECIAL TOPICS IN HISTORY

The course seeks to involve doctoral students of history with a range of historical topics. Students will read important works done by influential historians, and engage in scholarly debates pertaining relevant topics in Chinese history. Students will also engage in scholarship of academic writing in history and in preparation of their dissertation writing.

Pre-requisite: None

HIST8803 INDEPENDENT STUDY ON ACADEMIC WRITING IN HISTORY

The course seeks to involve doctoral students of history with a range of historical topics. Students will read important works done by influential historians, and engage in scholarly debates pertaining relevant topics in Chinese history. Students will also engage in scholarship of academic writing in history and in preparation of their dissertation writing.

Pre-requisite: None

HIST8804 INDEPENDENT STUDY ON HISTORIOGRAPHY

This course provides advanced grounding in the methods and concerns of the modern historical discipline. Students are exposed to some of the major intellectual trends and traditions that have informed how the historians of today pursue their craft. The immediate purpose of this training is to help students begin to formulate and research their dissertation topic.

Pre-requisite: None

HIST8805 INDEPENDENT STUDY ON HISTORY

This course allows a PhD student to work on a topic of special interest, supervised by a professor in the department. The topic should be chosen in consultation with a particular professor and with the aim of providing necessary background for researching and writing the dissertation.

Pre-requisite: None

HIST8861 ADVANCED READING/HISTORIOGRAPHY SEMINAR

This is a joint course for PhD students, which allows MA students to enroll in as well but they will get substantially less course assignments and subject to much lower academic requirement in terms of volumes of readings and length and depth of their writing and analysis. All PhD students will have to take qualifying exam in the area this course covered in addition to passing this course.

In this course, students will learn about the historiography of the traditional and modern West, mainly Western historians' approaches to and methods in studying the human past, so that they would be equipped with the updated historiography and enabled to find a good topic and appropriate research method for their master and doctoral thesis, while well prepared for the sequent course for advanced writing in the next semester. Another objective of this course is to let students get familiar with the first-class research and the existing literature in the field of modern Chinese history, to see how the approach of a historian could fundamentally affect his/her research and writing.

Pre-requisite: None

HIST8999 DOCTORAL THESIS

The course constitutes the last stage of the Doctoral program. With the guide of supervisors, students are expected to define an under-research topic, collect and problematize all available sources to formalize a research question, design a solid empirical study and make a theoretically oriented conclusion, or provide seminal or essentially revised interpretations. A doctoral thesis is expected to make a significant contribution to the selected (sub) field, theme, or topic.

Pre-requisite: None

JAPN1000 PRACTICAL JAPANESE I

This course aims to develop Japanese language ability in daily conversation, reading and writing. At the same time, it also introduces Japanese Studies, including basic cultural ideas that are needed in the acquisition of the language. At the end of this course, students will be able to acquire very basic conversation skills of Japanese.

Co-requisite: JAPN1001 or permission of instructor

JAPN1001 JAPANESE GRAMMAR I

This course is designed for students who are majoring in Japanese language and have little or no knowledge of the Japanese language. It focuses on learning foundational grammar for simple sentence building. The objective of this course is to develop reading and writing skills for functional literacy at the elementary level.

Co-requisite: JAPN1000

JAPN1002 PRACTICAL JAPANESE II

This course is the continuation of Practical Japanese I and also aims at the development of Japanese language ability in daily conversation, reading and writing. At the same time, it also introduces Japanese Studies, including basic cultural ideas that are needed in the acquisition of the language. At the end of this course, students will be able to acquire basic conversation skills of Japanese.

Pre-requisite: JAPN1000 and JAPN1001 or with permission of instructor and confirmation of proficiency by test

JAPN1003 JAPANESE GRAMMAR II

This course is the continuation of JAPN1001 Japanese Grammar I. It focuses on learning foundational grammar for complex sentence building. The objective of this course is to develop reading and writing skills for functional literacy at the pre-intermediate level.

Pre-requisite: JAPN1001 or permission of instructor

JAPN1004 ELEMENTARY JAPANESE I (ELECTIVE COURSE)

This course will cover very basic Japanese language. This course also includes basic reading and writing. At the end of this course, students can conduct very basic daily conversation in Japanese.

Pre-requisite: None

JAPN1005 ELEMENTARY JAPANESE II (ELECTIVE COURSE)

This course is the continuation of Elementary Japanese I and includes basic reading and writing. At the end of this course, Students can function in daily conversations at the basic level.

Pre-requisite: JAPN1004 or permission of instructor

JAPN2000 PRACTICAL JAPANESE III

This course provides training in the comprehension and the use of conversational Japanese by emphasizing oral communication skills. Students will be provided different tasks focused on practical daily conversational communication in order to help build confidence in speaking Japanese. At the end of this course, students can acquire basic communication skills for everyday situations and campus life.

Pre-requisite: JAPN1002 and JAPN1003 or permission of instructor

JAPN2001 INTEGRATED JAPANESE I

This course is oriented to intermediate practical Japanese grammar. Students will learn intermediate level sentence patterns and grammar that serve as the foundation for learning the language. Students will put this knowledge into practical use in situations from actual Japanese daily life. At the end of this course, students can recognize and use intermediate Japanese grammar.

Pre-requisite: JAPN1003 or permission of instructor

JAPN2002 JAPANESE READING I

This is a reading course for students who have studied foundational Japanese grammar. The objective of this course is to train and develop reading skills through reading articles of different topics from various media and sources. This course focuses on practicing basic reading skills including skimming, scanning, guessing vocabulary from context, answering basic content questions about text and making inferences.

Pre-requisite: JAPN1003 or with permission of instructor and confirmation of proficiency by test

JAPN2003 JAPANESE COMPOSITION I

This course aims to provide instruction and intensive practice in Japanese writing skills. Students will be taught to write compositions, and then evaluate and revise their work. At the end of this course, students will be able to compose intermediate level Japanese sentences.

Pre-requisite: JAPN1003 or with permission of instructor and confirmation of proficiency by test

JAPN2004 PRACTICAL JAPANESE IV

This is the continuation of Practical Japanese III and provides training in the comprehension and the expression of conversational Japanese. The objective of this course is to improve Japanese communication skills in order to appropriately express one's thoughts through group discussions and presentations. At the end of this course, students can exchange opinions on a wide variety of topics.

Pre-requisite: JAPN2000 or permission of instructor

JAPN2005 INTEGRATED JAPANESE II

This is the continuation of Japanese Grammar III. This course is oriented to intermediate practical Japanese grammar. Students will learn intermediate level sentence patterns and grammar that serve as the foundation for learning the language. Students will put this knowledge into practical use in situations from actual Japanese daily life. At the end of this course, students will be able to recognize intermediate Japanese grammar.

Pre-requisite: JAPN2001 or permission of instructor

JAPN2006 JAPANESE READING II

This course is the continuation of JAPN2002 Japanese Reading I. The objective of this course is to improve reading skills through reading articles of different topics from various media and sources. This course focuses on developing reading skills to comprehend more complex texts and introducing academic reading skills.

Pre-requisite: JAPN2002 or permission of instructor

JAPN2007 JAPANESE COMPOSITION II

This course is a continuation of Japanese Composition I and also aims to provide instruction and intensive practice in Japanese writing skills. Students will be taught to write compositions and reports, and then evaluate and revise their work. At the end of this course, students can compose intermediate level Japanese sentences.

Pre-requisite: JAPN2003 or permission of instructor

JAPN2008 ELEMENTARY JAPANESE III (ELECTIVE COURSE)

This course is a continuation of Elementary Japanese II. It also includes reading and writing. At the end of this course, students will have a basic knowledge of Japanese and will be able to conduct daily conversation at the basic level with more advanced vocabulary and syntax.

Pre-requisite: JAPN1005 or permission of instructor

JAPN2009 ELEMENTARY JAPANESE IV (ELECTIVE COURSE)

This course is a continuation of Elementary Japanese III. It includes reading and writing skills. At the end of this course, student can converse basic to intermediate daily conversation in Japanese.

Pre-requisite: JAPN2008 or permission of instructor

JAPN3000 BUSINESS JAPANESE I

This is a business Japanese course for students who are majoring in Japanese language. In this course, students will learn a good balance between the Japanese etiquette necessary for effective communication, and practical business Japanese expressions. At the end of this course, student will be able to carry on business conversations at the intermediate level.

Pre-requisite: JAPN2004 or permission of instructor

JAPN3002 JAPANESE RESEARCH METHOD I

This course develops academic Japanese language skills through a series of lectures on basic research methodology and the analysis of research papers on topics relevant to contemporary Japanese society and culture. By the end of the course, students will be able to write research proposals and academic-level papers in Japanese.

Pre-requisite: JAPN2004 or permission of instructor

JAPN3003 SELECTED READINGS IN MODERN JAPANESE I

This course is designed to expose students to contemporary social topics in Japan through electronic and print media. Students will be updated with the ever-changing issues in the Japanese society, such as new words in the language, the change of Japanese political structure and society.

Pre-requisite: JAPN2006 or permission of instructor

JAPN3004 BUSINESS JAPANESE II

This course is the continuation of JAPN3000 Business Japanese I. In this course, Japanese conversation practice in actual business settings will be conducted to help students acquire communication strategies for better interaction with Japanese business people. This course also provides training in writing business emails in Japanese, which is necessary for formal communications in various business situations. At the end of this course, student will be able to carry on business conversations at the upper intermediate level.

Pre-requisite: JAPN3000 or permission of instructor

JAPN3005 JAPANESE RESEARCH METHOD II

This is the continuation of Japanese Research Method I. This course develops academic Japanese language skills through a series of lectures on basic research methodology and the analysis of research papers on topics relevant to contemporary Japanese society and culture. By the end of the course, students will be able to write research proposals and academic-level papers in Japanese.

Pre-requisite: JAPN3002 or permission of instructor

JAPN3006 SELECTED READINGS IN MODERN JAPANESE II

This course is the continuation of Selected Readings in Modern Japanese I and is designed to expose students to contemporary social topics in Japan through electronic and print media. Students will be updated with the ever-changing issues in the Japanese society, such as new words in the language, the change of Japanese political structure and society.

Pre-requisite: JAPN3003 or permission of instructor

JAPN3007 PRACTICAL JAPANESE V

This course focuses on listening comprehension and the use of conversational Japanese. The course emphasizes oral communication skills. Students will be provided different tasks focused on practical daily communication in order to help build confidence in speaking Japanese.

Pre-requisite: JAPN2004 or permission of instructor

JAPN3008 PRACTICAL JAPANESE VI

This course is the continuation of Practical Japanese V and focuses on listening comprehension and the use of conversational Japanese. The course emphasizes oral communication skills. Students will be provided different tasks focused on practical daily communication in order to help build confidence in speaking Japanese.

Pre-requisite: JAPN3007 or permission of instructor

JAPN3009 TRANSLATION AND INTERPRETATION I

This course introduces basic translation and interpretation skills on translating and interpreting Japanese into Chinese. Based on analyses of the syntactic and lexical similarities and differences between the two languages, students will practise multiple skills in this course. The objective of this course is to develop students' ability of translating literary works in various genres by employing the techniques learned, while improving the ability of interpretation.

Pre-requisite: JAPN2006 or permission of instructor

JAPN3010 TRANSLATION AND INTERPRETATION II

This course is the continuation of Translation and Interpretation I. By analysing the syntactic and lexical structure of the two languages, it introduces basic translation and interpretation skills on translating Chinese into Japanese. The objective of this course is to develop students' ability of translating and interpreting Chinese into Japanese by employing the techniques learned.

Pre-requisite: JAPN3009 or permission of instructor

JAPN3011/3012/3013/3014 SPECIAL TOPICS ON JAPAN I/II/III/IV

Special courses on various topics to be developed by current faculty and visiting scholars.

The course is designed to cover one topic from the areas concerning Japan, including Japanese language, literature, history, culture, philosophy, behavior, communication, journalism, economics, legal systems, political sciences, etc.

Pre-requisite: Permission of instructor

JAPN3015 INTERMEDIATE JAPANESE I (ELECTIVE COURSE)

This course is the intermediate Japanese language course. It covers reading and writing skills and also provides cultural information about Japan. At the end of this course, students can conduct daily conversation at the intermediate level.

Pre-requisite: JAPN2009 or permission of instructor

JAPN3016 INTERMEDIATE JAPANESE II (ELECTIVE COURSE)

This course is the continuation of Intermediate Japanese I. It also covers reading and writing skills and provides cultural information about Japan. At the end of this course, students can conduct daily conversation at intermediate level with more advanced vocabulary and syntax.

Pre-requisite: JAPN3015 or permission of instructor

JAPN4002 BUSINESS IN JAPAN I

This course introduces Japanese business management concepts and procedures. Students will

learn general concepts of Japanese business management and how they differ from western ideas of business management. At the end of this course students are familiar with basic Japanese ideas of Japanese management.

Pre-requisite: JAPN3004 or permission of instructor

JAPN4003 BUSINESS IN JAPAN II

This course is the continuation of Business in Japanese I. This course introduces Japanese business management concepts and procedures. Students will learn general concepts of Japanese business management and how they differ from western ideas of business management. At the end of this course, students are familiar with basic Japanese ideas of Japanese management.

Pre-requisite: JAPN4002 or permission of instructor

JAPN4004 SELECTED READINGS IN MODERN JAPANESE III

This course is the continuation of Selected Readings in Modern Japanese II and is designed to expose students to contemporary social topics in Japan through electronic and print media. Students will be updated with the ever-changing issues in the Japanese society, such as new words in the language, the change of Japanese political structure and society.

Pre-requisite: JAPN3006 or permission of instructor

JAPN4005 SELECTED READINGS IN MODERN JAPANESE IV

This course is the continuation of Selected Readings in Modern Japanese III and is designed to expose students to contemporary social topics in Japan through electronic and print media. Students will be updated with the ever-changing issues in the Japanese society, such as new words in the language, the change of Japanese political structure and society.

Pre-requisite: JAPN4004 or permission of instructor

JAPN4006 MODERN JAPAN

This course introduces various aspects of modern Japan including Japanese society, business, politics, and popular culture. At the end of this course students will be familiar with some of the major social, political, popular cultural themes of modern Japan.

Pre-requisite: JAPN3006 or permission of instructor

JAPN4010 ART OF JAPAN

This course introduces traditional and modern visual and performing arts in Japan. An overview of the development of visual and performing arts in Japan will be introduced. At the end of the course, students will be able to recognize various historical traditions in Japanese art and modern Japanese art.

Pre-requisite: JAPN3006 or permission of instructor

JAPN4015 JAPANESE LITERATURE I

This course introduces traditional Japanese literature, including poetry, novels and dramas, from the inception to 1868. At the end of the course, students will be familiar with selected Japanese writers and their works.

Pre-requisite: JAPN3006 or permission of instructor

JAPN4016 JAPANESE LITERATURE II

This is the continuation of Japanese Literature I. Modern and Contemporary Japanese literature will be introduced. At the end of the course, students will have read excerpts of some famous writings and be familiar with current themes in Japanese literature.

Pre-requisite: JAPN4015 or permission of instructor

JAPN4018/4019/4020/4021/4022/4023 SPECIAL TOPICS IN HUMANITIES I/II/III/IV/V/VI

Special courses on various topics to be developed by current faculty and visiting scholars. The course is designed to cover one topic from the areas of humanities taught in Japanese language, including literature, language studies and methodology, philosophy, behavior science,

communication, journalism, history, culture, law and political economy etc.

Pre-requisite: Permission of instructor

JAPN4024/4025/4026/4027/4028/4029 SPECIAL TOPICS IN SOCIAL SCIENCES I/II/III/IV/V/VI

Special courses on various topics to be developed by current faculty and visiting scholars. The course is designed to cover one topic from the areas of social sciences taught in Japanese language, such as history, politics and law, education, journalism, business administration, international relation, sociology, psychology, economics and management, political sciences etc.

Pre-requisite: Permission of instructor

JAPN4030 ADVANCED PRACTICAL JAPANESE I

This course emphasizes oral and written communication skills. Students will be provided different tasks focused on practical daily communication in order to help build confidence in speaking and writing Japanese.

Pre-requisite: None

JAPN4031 ADVANCED PRACTICAL JAPANESE II

This course is the continuation of Advanced Practical Japanese I and emphasizes oral and written communication skills. Students will be provided different tasks focused on practical daily communication in order to help build confidence in speaking and writing Japanese.

Pre-requisite: None

JAPN4032 JAPANESE SOCIETY AND CULTURE I

This course is to expose students to various areas of Japanese society. The content will be updated with the ever-changing issues in Japanese society and culture, such as new words in the language, new fashion, social events in daily life, the change of Japanese political structure, etc.

Pre-requisite: None

JAPN4033 JAPANESE SOCIETY AND CULTURE II

This course is the continuation of Japan Society and Culture I and is to expose students to various areas of Japanese society. The content will be updated with the ever-changing issues in Japanese society and culture, such as new words in the language, new fashion, social events in daily life, the change of Japanese political structure, etc.

Pre-requisite: None

PHIL1000 INTRODUCTION TO WESTERN PHILOSOPHY

This course attempts to provide an encompassing introduction to philosophy by looking at some of the fundamental problems philosophers discuss in a number of different areas of Western philosophy, such as general metaphysics, ontology, epistemology, philosophy of mind, philosophy of religion, and ethics. The classic materials are selected to provide a basis for understanding some of the central debates within each of these fields.

Pre-requisite: None

PHIL1001 INTRODUCTION TO ASIAN PHILOSOPHY

Asia is an area not only rich in culture, but serves as the cradle of various major civilizations of the world too. It takes thousands of years for them to shape up as we see it today. A study of Asian philosophy will reveal to us this crystallization process and will also inspire on us the way to shape our future. The course does not focus only on philosophy. Their associated origins, i.e., the corresponding beliefs, religious traditions, and the social functions of each tradition will also be discussed. It is interesting to learn through this course the differences in objectives and methodologies between different traditions, and how they interact or influence with one another, and in the end, the society. For better discussion, the course shall restrict the discussion on four major traditions: Shinto, Buddhism, Taoism, and Hinduism, since these are dominating philosophy in Asia for over thousands of years.

Pre-requisite: None

PHIL1002 CRITICAL THINKING

This course introduces students to logic. Topics include the concept of critical thinking, the nature and modes of reasoning, the structure of argument, premises and conclusions, validity, inference, fallacy, argumentation, deductive and inductive reasoning, and causal arguments.

Prerequisite: None

PHIL1003 ANCIENT AND MEDIEVAL WESTERN PHILOSOPHY

The course will focus on the major themes of Ancient Greek philosophy and on major philosophers of Medieval Christianity. The question with which the Ancient Greek philosophy starts—What does the universe consist of?—will be discussed in the context of pre-Socratic philosophy as well as Plato's, Aristotle's and Plotinus' as well as Epicurean thought. The question—What can we know?—will be discussed in the context of Plato's and Plotinus' theory of ideas and Aristotle's and Stoics' epistemological doctrines. The question—What is good (and evil)?—will be discussed in the context of Plato's, Aristotle, Stoic and Epicurean thought. The influence of Ancient Greek philosophy will be traced in the teaching of the two great Christian thinkers – St. Augustine and St. Thomas Aquinas. The difference in their approach to philosophy to that of Ancient Greek thinkers will be a separate topic of discussion.

Pre-requisite: None

PHIL1004 MODERN WESTERN PHILOSOPHY

Modern philosophy in Europe developed under the influence of the original masterpieces of Ancient Greek Philosophy (in particular, Plato) and of discoveries in natural sciences and mathematics. The topics to be discussed in this are: 1. What kind of substances are there in the world and how do they interact? 2. What is the scope and subject of human knowledge? 3. What is the nature of good conduct? 4. How to achieve a good and efficient government? The first and second question will be discussed in the context of works of Descartes, Locke, Berkeley, Hume, Kant and Hegel. The third question will be discussed in the context of the teachings of Hume, Kant, Mill and Hegel. The fourth question is the subject of discussion of Machiavelli, Hobbes, Locke, Kant and Hegel.

Pre-requisite: None

PHIL1005 CONTEMPORARY WESTERN PHILOSOPHY

In the twentieth century, in Europe and the USA philosophy developed in two separate directions. The analytic tradition was developed in the UK and USA primarily as a response to the 19th century idealism and to the development of mathematical logic. In this tradition, a systematic analysis of concepts, particularly in epistemology and semantics, dominates over any other approach to philosophy. From this tradition, the works of Russell, Wittgenstein, Austin as well the more recent works of Quine, Kripke and Davidson will be discussed. The non-analytic tradition built on the teachings of Kant and Hegel focuses on the questions of being and the possibility of transcendental knowledge. From this tradition, the works of Heidegger, Sartre, Lukacs and more recent works of Foucault and Habermas will be discussed.

Pre-requisite: None

PHIL1006 THE HISTORY OF CHINESE PHILOSOPHY

Philosophy provides a framework that teaches people how to think logically and critically. Through this framework, philosophy helps people to look for answers for questions like, "What is the origin and meaning of life?" and "How to build a happy world?" Even Chinese philosophy and Western philosophy share these common concerns, Chinese philosophy is still very different from the west, particularly in the way that it structures the cosmos, and the relation of the human and the universe. The course shall give an introduction to Chinese philosophy, alongside with its history of development. The historical approach to philosophical studies allows students to understand how different schools of philosophy in China are solidified out of the vast, vague, and sometimes appearing contradicting assumptions and hypotheses.

Pre-requisite: None

PHIL1007 BUDDHIST PHILOSOPHY

A study of Buddhist views of the human predicament and its solution, covering different teachings and forms of practice from India, Southeast Asia, Tibet, China, and Japan.

Pre-requisite: None

PHIL1008 COMPARATIVE ETHICS

What is the good life and how do human beings achieve it? What makes us distinct from other species and how do we best relate to our environment? How do our relationships to our own death and the death of others influence our conceptions of living well? This course provides a comparative introduction to Asian and Western responses to these questions. By interpreting and comparing conceptions of the self, action, and the good in Buddhism, Confucianism, and Daoism, on the one, and selected Western philosophers on the other hand, a nuanced account of the morally good and happy life will be developed.

Pre-requisite: None

PHIL1009 HUMAN RIGHTS AND CULTURAL VALUES

Does the claim to the universality of human rights offer a groundwork for cross-cultural human values or is it itself an integral part of "global capitalism" or "Western hegemony"? What is the place of human rights in a society shaped by a non-Western frame of mind, for instance, by Confucian principles? What has been the political impact of recent human rights campaigns on non-Western societies? In this course we will seek to address these timely questions by focusing on the contemporary clash of Western notions of human rights with the cultural orientations of Asian societies, especially China. Substantial issues to be covered throughout the course include: universalism and multiculturalism, justice and virtue, the core/periphery distinction and globalization, cultural identity and class differentiation, religion and modes of modernity.

Pre-requisite: None

PHIL1010 PHILOSOPHY OF RELIGION

This course examines the main issues and themes in the relations of philosophy and religion from a comparative perspective. Topics include the concept of 'religion', the relation between religion and philosophy, the nature of the sacred, the reality of God, belief and rationality, the problem of evil, theories of theodicy, afterlife, and the plurality of religious traditions. Particular attention will be given to the implications of God's existence or non-existence for moral judgment and action.

Pre-requisite: None

PHIL1011 PHILOSOPHY OF MIND

This course considers theories in contemporary philosophy of mind, which is concerned with fundamental questions about the nature of the mind, and its place in the natural and social worlds. It explores various theories of the mind, the relationship between mind and body, the self, the conception of consciousness, the human vs. non-human mind, introspection, and the knowledge of other minds.

Pre-requisite: None

PHIL1012 POLITICAL PHILOSOPHY

This course engages central topics in political philosophy including the nature of justice, forms of governance, the public-private distinction as well as conceptions of political power and legitimacy. These topics will be addressed by studying seminal texts written by classical and contemporary political philosophers. The goal is to better understand the ways different political philosophies have given expression to various forms of political institutions and shape the lives of those people affected by them.

Pre-requisite: None

PHIL1014 SPECIAL TOPICS IN PHILOSOPHY

Special courses on various philosophy topics

Pre-requisite: None

PHIL1015 DAOIST PHILOSOPHY

This course explores the ancient Chinese philosophy of Daoism. It focuses on the texts Laozi (Lao Tzu) and Zhuangzi (Chuang Tzu) in order to arrive at a general understanding of crucial issues, concepts, and notions of "classical" Daoism. The course will present a general overview of the history of philosophical Daoism and focus on analyses of core Daoist images and allegories. On the basis of these images and allegories, major issues of Daoist philosophy will be discussed. The course will also include comparative outlooks to contemporary Chinese and Western philosophy.

Pre-requisite: None

PHIL1016 MASS MEDIA PHILOSOPHY

This course introduces several theories on the Mass Media. The media theoreticians W. Benjamin, M. McLuhan, and N. Chomsky are introduced. The debate on the socio-political role of TV between H.-M. Enzensberger and his "postmodernist" critic J. Baudrillard will be discussed. The second half of the course will focus on N. Luhmann's description of the "Reality of the Mass Media".

Pre-requisite: None

PHIL1017 PHILOSOPHY OF LANGUAGE

This course is an introduction to contemporary philosophy of language. Philosophy of language is concerned with many topics, of syntactic, semantic, and pragmatic nature, such as: meaning, truth, reference, epistemology of language understanding and language learning, ontology of languages, mental and psychological basis of communication, indeterminacy of translation, speech acts, metaphors, indeterminacy of translation, and so on. The course will offer an overview of these topics, with a special focus on their pragmatic features and on implicit communication.

Pre-requisite: None

PHIL2000 CULTURAL VALUES AND GLOBAL JUSTICE

Does the claim to global justice offer a groundwork for transnational values or is it itself an integral part of "global capitalism" or "Western hegemony"? Is our moral vision a mere reflection of our cultural preferences and biases? If not, what may serve as the grounds on which the moral judgments of distinct civilizations can be rationally assessed, criticized or justified? In this course we will seek to address these timely questions by focusing on contemporary debates over globalization, global justice, and the "clash of civilizations."

Pre-requisite: None

PHIL2001 CAPITALISM AND MORALITY

This course investigates the relationship between capitalism and morality. After tracing the religious roots of capitalism, central features such as the free exchange of products, private property, ideology, and alienation will be systematically elaborated. Different forms such as corporate, free markets, and casino capitalism will be distinguished and related to questions of legitimation, justice and the good life. During the second half of the course we will analyze the impact of global capitalism on culture and politics. Finally, we will pursue the question whether it is still possible to conceive of reasonable alternatives to capitalist modes of production.

Pre-requisite: None

PHIL3000 PHILOSOPHY AND FILM

Since its emergence at the turn of the 20th century, film has made possible a new way of encountering the world. On the one hand, its ability to record, magnify, and reframe aspects of our world allows it to interrogate, narrate, and disclose the world – along with our modes of inhabiting it – in distinctive ways. On the other hand, being pledged to the plurality of individual lives in an intransigently material world, film holds out an irreducibly democratic promise. Understanding these large epistemic, aesthetic, and socio-political claims of the medium is the object of a philosophical analysis of film.

Pre-requisite: None

PHIL7000 PHILOSOPHICAL WRITING AND METHODOLOGY

This course covers the basics of academic writing in philosophy and provides an overview of the most important philosophical methodologies. The ability to express ideas clearly in an academic format is essential to philosophy and this course brings the development of this skill to the forefront while also focusing on the philosophical methodologies that frame investigation in this field of study.

Pre-requisite: None

PHIL7001 POLITICS, ETHICS AND SOCIETY

This course engages central topics in social and political philosophy and in ethics such as, for instance, the nature of justice, forms of governance, the emergence and changes of social structures, or conceptions of political power and legitimacy. Such topics will be addressed by studying seminal texts written by classical or contemporary social and political philosophers and ethicists from Western and/or Eastern philosophical traditions. The goal is to better understand how different social and political philosophies have given expression to various forms of institutions and shaped the lives of people affected by them throughout different periods of history.

Pre-requisite: None

PHIL7002 LOGIC AND CRITICAL THINKING

The course will present the students with the methods and principles used to distinguish correct from incorrect reasoning, it will cover skills essential to identifying fallacies in reasoning. Elementary formal techniques will be used to analyze natural language arguments.

Pre-requisite: None

PHIL7003 MIND AND WORLD

This course provides the students with an overview of the important basic concepts, arguments, and positions in epistemology and metaphysics, as these concern the fundamental structure of reality and our knowledge of it. The course will focus on topics and themes that have been important with recent philosophical debates.

Pre-requisite: None

PHIL7004 HISTORY OF WESTERN PHILOSOPHY

This course presents students with a selection of the main ideas and themes that have shaped Western philosophy from its origins in Ancient Greece up to the nineteenth century.

Pre-requisite: None

PHIL7005 HISTORY OF CHINESE PHILOSOPHY

This course presents students with a selection of the main philosophers, movements, ideas, and themes in Chinese philosophy. The course will scrutinize the claim that Chinese philosophy presents an alternative way of thinking, perceiving, or doing "things" than that found in other forms of thought.

Pre-requisite: None

PHIL7006 KEY FIGURES AND TEXTS IN ASIAN PHILOSOPHY

This course provides the opportunity for close reading of key texts and examination of the thought of important figures within Asian philosophy. Alternative interpretations of key texts and philosophical theories will be explored.

Pre-requisite: None

PHIL7007 KEY FIGURES AND TEXTS IN WESTERN PHILOSOPHY

The unfolding of Western philosophy has centred around the reception of key texts. For instance, foundational texts produced in Ancient Greece (e.g., by Plato and Aristotle) gave rise to important developments in Roman philosophy and a rich commentarial tradition in the Middle Ages. The Renaissance drew inspirations from these texts as did modern Western philosophy. In contemporary philosophy, both the Analytic and Continental traditions continue to refer to them. The present course will select one or more key texts from any period of the history of Western

philosophy and study them systematically and in the context of their impact and their role within intellectual history.

Pre-requisite: None

PHIL7008 PHILOSOPHY OF SCIENCE

Philosophy of science is an applied discipline that studies the normative structure of scientific reasoning and examines scientific practices from a critical perspective. This course will address some of the central problems regarding the nature of scientific theories, knowledge, and methodology by examining the major traditional issues and contemporary topics of discussion in the field.

Pre-requisite: None

PHIL7009 PRACTICAL PHILOSOPHY

What is the good life and how do human beings achieve it? What can philosophy contribute to resolving question about how to best relate to our environment? How can we deal with newly evolving technologies and the digitization of our lifeworld? How to be economically productive and yet content? How do our bodies and our mortality influence our conceptions of living well? This course introduces philosophical responses to such questions. It applies philosophical ideas to real-world problems and relates philosophical reasoning to practical problems of human existence in the contemporary world.

Pre-requisite: None

PHIL7010 COMPARATIVE PHILOSOPHY

Comparative philosophy engages selected philosophical topics and problems in dialogue from across cultural, linguistic, and religious streams. The aim of the course is to help students to understand important ideas, theories and issues of the life from a philosophical and comparative perspective.

Pre-requisite: None

PHIL7011 WORLD PHILOSOPHIES

Philosophy has a long history in many cultures and is found within all literate societies. In many parts of the world people have asked philosophical questions about reality, the self, and about what constitutes a good life and their answers have been shaped by their cultures and historical contexts. Philosophical reflection has also had a formative impact on social and cultural forms. This course provides an accessible introduction to a selection of the central streams of world philosophy, such as Japanese and Korean philosophy, Indian philosophy, and Islamic Philosophy.

Pre-requisite: None

PHIL7012 SPECIAL TOPICS IN PHILOSOPHY

The course focuses on a specific topic of current interest which may be drawn from one or more of several different philosophical fields. Students will be presented with an in-depth analysis of the selected topic, and of its philosophical significance within philosophy and across cognate disciplines.

Pre-requisite: None

PHIL7013 THE MEANING OF LIFE

Socrates, the father of philosophy in the West, said, "The unexamined life is not worth living." This course is designed to provide students with tools and questions so that they can profitably reflect on their own lives. It will connect the practice of philosophy from various cultural milieu to concerns that are central to the lives of people today. The quest for a meaningful life is a human universal, although the approaches to this search vary globally. By connecting philosophical inquiry to real life, this course will reveal the life transforming power of philosophical reflection.

Pre-requisite: None

PHIL7014 PHILOSOPHY OF THE METAVERSE

This course is a philosophical exploration of the potential impact of the future implementation of

the VR (Virtual Reality), AR (Augmented Reality), Mixed Reality (MR) technology in our daily lives. Starting from a philosophical analysis of the notion of the Metaverse as a simulation hypothesis, where the object of the simulation is our experience of 'being there' in a virtual world beyond and parallel to the physical world, the course will address a range of philosophical issues arising from the actual and potential impact of the Metaverse on human lives.

Pre-requisite: None

PHIL7998 PROJECT REPORT

The Project Report should consist of a formally written academic report that focuses on a philosophical position or concept and involves a theoretical analysis of a unique topic relevant to the student's research focus.

Pre-requisite: None

PHIL8004 SPECIAL TOPICS IN PHILOSOPHY AND RELIGION I

This is an advanced course for PhD students focusing on some specific topic of research depending on the interests and competence of the instructor. Contents may include such methodologies as critical theory, deconstructive hermeneutics, postcolonial theory, identity politics, comparative religions, philological versus philosophical textual analysis, or history of ideas.

Pre-requisite: None

PHIL8006 RESEARCH WRITING IN PHILOSOPHY AND RELIGIOUS STUDIES

This is an advanced course for PhD students focusing on the development of the students' critical understanding of primary and secondary source texts in Philosophy and Religious Studies. This course aims at enhancing the students' reading, oral, writing, research, and argumentation skills. Selection of specific topics and texts depends on the research field and area of expertise of the instructor.

Pre-requisite: None

PHIL8999 DOCTORAL THESIS

This is an advanced course for PhD students, focusing on original research and the completion of a doctoral thesis.

Pre-requisite: None

PORT1000 PORTUGUESE LANGUAGE I - INTRODUCTORY PORTUGUESE

Basic Portuguese. Principles of written and oral language. The comprehension and conversation through exercises in the class and language laboratory. The grammar fundamentals obtained through the use of simple pronunciation and reading materials.

Pre-requisite: None

PORT1001 PORTUGUESE LANGUAGE II

Development of the programme and principles introduced in Portuguese Language I, aimed at applied Portuguese. Simple problems and written materials.

Pre-requisite: None

PORT1002 ORAL COMPREHENSION AND PRODUCTION SKILLS I

This course is designed for practising listening skills to develop appropriate and clear pronunciation. Students will listen and produce short dialogues related to their interests and familiar situations.

Pre-requisite: None

PORT1003 WRITTEN COMPREHENSION AND PRODUCTION SKILLS I

The main aim of this course is to provide students with a good foundation of Portuguese language so they may use familiar everyday expressions, basic structures, and vocabulary to satisfy specific communication needs in their daily lives.

Pre-requisite: None

PORT1004 ORAL COMPREHENSION AND PRODUCTION SKILLS II

This course aims to develop oral skills in Portuguese through dialogues and other role play activities. The students should reach the elementary proficiency level at the end of the course.

Pre-requisite: PORT1002

PORT1005 WRITTEN COMPREHENSION AND PRODUCTION SKILLS II

This course aims to provide students with upper elementary Portuguese language written comprehension and production skills so that they will be able to interpret and produce short texts using simple and frequent vocabulary and expressions related to immediate priority areas, as well as to describe their background, surrounding environment, daily routine, present and past actions and matters related to immediate needs.

Pre-requisite: PORT1003

PORT1006 PORTUGUESE LANGUAGE AND CULTURE I

The main objective of this course is an introduction to a broader view of contemporary life and culture in Portuguese-speaking countries as well as Macao and the development of fluency in reading and oral comprehension and expression at a beginner level.

Pre-requisite: None

PORT1007 PORTUGUESE LANGUAGE AND CULTURE II

This course's main objective is to develop a broader view of contemporary life and culture in the Portuguese-speaking countries and Macao, as well as development of fluency in reading and oral comprehension and expression at the elementary proficiency level.

Pre-requisite: PORT1006

PORT1008 ELEMENTARY SPANISH I

This is a basic course to introduce the students into the Spanish pronunciation, and to recognize the basic Spanish grammar and usage. Readings and conversations are in the "Present Tense".

Pre-requisite: None

PORT1009 ELEMENTARY SPANISH II

To foster an interest to continue learning Spanish, allowing the students to express themselves and read and write present, past and future events.

Pre-requisite: PORT1008

PORT1010 INTERMEDIATE SPANISH I

To continue to learn how to speak, understand, read and write idiomatic Spanish in a way the student can feel confident to use Spanish as an instrument of communication.

Pre-requisite: PORT1009

PORT1011 INTERMEDIATE SPANISH II

This course builds on PORT1010 extends the students' knowledge of the spoken and written language, as well as exposing them to a greater range of cultural materials.

Pre-requisite: PORT1010

PORT1013 ADVANCED SPANISH FOR SPECIFIC PURPOSES I

This course aims to introduce students to the basic knowledge and study of specific selected topics and issues. The course will cover topics such as development and construction of Hispanic culture and civilization (history, geography, literature, art and other cultural manifestations), Spanish for specific purposes (job applications, resumes, interviews, business meetings, cross-cultural differences between Spanish speaking and Chinese business environments, commercial correspondence, Spanish for hotels and restaurants/hospitality, Spanish for law enforcement). Though a series of readings from magazines, newspapers, internet articles and audiovisual materials, students will be exposed to a new specialized business-oriented vocabulary which will help them to communicate effectively in their field and to practice new grammatical skills.

Pre-requisite: PORT1010

PORT1014 ADVANCED SPANISH FOR SPECIFIC PURPOSES II

This course is built on the subjects and skills covered in the previous course "Advanced Spanish for Specific Purposes I" but at a more advanced level. The main target is to provide students with the chance to apply their newly acquired knowledge in a wide variety of situations through realistic tasks, oral interaction in pairs and group work, role playing, presentations, etc. Authentic reading and audiovisual materials are also used throughout the course. In addition, students will analyze and practice advanced grammatical skills in order to develop a higher proficiency in speaking and writing. By the end of the course, students should be able to understand long articles related to cultural and business topics, to use Spanish effectively and precisely for social and professional purposes, and to develop an understanding of Hispanic culture, society, and business practices. Pre-requisite: PORT1010

PORT1015 SPECIAL TOPICS IN SPANISH STUDIES I

This course is designed to offer students the chance to explore a variety of topics related to the Spanish-speaking countries. The contents will vary from year to year. Pre-requisite: PORT1010

PORT1016 SPECIAL TOPICS IN SPANISH STUDIES II

This course is designed to offer students the chance to explore a variety of topics related to the Spanish-speaking countries. The contents will vary from year to year. Pre-requisite: PORT1010

PORT2000 PORTUGUESE III

Improvement of written comprehension and expression. The different levels of written and spoken Portuguese. Reading and interpretation of text from the press. Pre-requisite: PORT1001

PORT2001 PORTUGUESE LANGUAGE IV

Development of the programme and principles introduced in Portuguese Language I, aimed at perfecting the written and spoken Portuguese. Reading and interpretation of cultural and social texts from the press. Pre-requisite: PORT2000

PORT2006 ORAL COMPREHENSION AND PRODUCTION SKILLS III

The main objective of this course is the development of oral skills in Portuguese through listening and production tasks from the preceding elementary proficiency level to a lower intermediary level. Pre-requisite: PORT1004

PORT2007 WRITTEN COMPREHENSION AND PRODUCTION SKILLS III

This course serves as an introduction to the reading and composition of various forms of written texts. Students will be expected to utilise verbs in the correct tense and learn the subjunctive mood. Through exercises and activities emphasising contextualized use of structures, students will learn to produce different types of texts suitable for presentation and discussion. Pre-requisite: PORT1005

PORT2012 ORAL COMPREHENSION AND PRODUCTION SKILLS IV

The aim of this course is to further develop oral skills in Portuguese through listening and production tasks from the preceding lower intermediate proficiency level to an intermediary level. Pre-requisite: PORT2006

PORT2013 WRITTEN COMPREHENSION AND PRODUCTION SKILLS IV

This course will focus on a comprehensive review of structures previously taught in the last three semesters, and the introduction and reinforcement of new structures. Students will engage in essay writing on various topics and practice summarisation and abstract writing techniques. Pre-requisite: PORT2007

PORT3000 PORTUGUESE V

Reading interpretation of literary, scientific and technical texts. Writing of critical essays. Debates aimed at perfecting the oral expression and vocabulary.

Pre-requisite: None

PORT3002 PRACTICAL WRITING FOR PROFESSIONAL PURPOSES I

A practical course in which students are trained in writing texts for professional purposes: official and commercial correspondence, memoranda, declarations, summary reports, applications and advertisements.

Pre-requisite: PORT1007, PORT2013

PORT3004 TRANSLATION I (PORTUGUESE TO CHINESE)

This course deals with the basic written translation skills from Portuguese to Chinese, considering aspects of contrastive language structure, semantics, pragmatics and style. Based on the completion of the 2nd year of Portuguese studies, students will start translating the text of a varied nature in order to prepare them for future translation work in their professional careers.

Pre-requisite: PORT1007, PORT2012

PORT3005 INTRODUCTION TO LINGUISTICS

The course introduces basic concepts of the phonology, morphology, syntax, semantics and lexicon of Portuguese, with the purpose of developing the student's knowledge of the grammatical system of Portuguese and the ability to describe and analyse the language for learning and pedagogical applications.

Pre-requisite: PORT1007, PORT2012

PORT3006 INTRODUCTION TO THE STUDY OF THE LITERATURE OF THE PORTUGUESE-SPEAKING WORLD I

This course aims to help students develop skills for understanding representative texts of the literature of the Portuguese-speaking world, including short stories and plays. It is designed to help students learn foundational skills in literacy, critical reading, and writing. Students will be introduced to the basic terminology and analytical methods and write short essays in response to the readings.

Pre-requisite: PORT1007, PORT2012

PORT3007 MODERN AND CONTEMPORARY HISTORY OF THE PORTUGUESE-SPEAKING COUNTRIES I

This course provides an overview of the history of the Portuguese-speaking countries, with special emphasis on recent and contemporary issues, resorting to images, historical documents, and videos. From the Portuguese maritime expansion up to the present, the course focuses on the evolution of the Portuguese Colonial Empire's political, social, cultural, and economic aspects, the decolonisation, and the formation of the Portuguese-speaking countries and their global involvement.

Pre-requisite: PORT1007, PORT2012

PORT3008 SPECIAL TOPICS I

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: Portuguese Language and Culture in Cinema, Portuguese History, History of Macao, Portuguese Literature, Brazilian Literature, etc.

Pre-requisite: PORT1007, PORT2012

PORT3009 SPECIAL TOPICS II

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be

offered include: Portuguese Language and Culture in Cinema, Portuguese History, History of Macao, Portuguese Literature, Brazilian Literature, etc.

Pre-requisite: PORT1007, PORT2012

PORT3011 PRACTICAL WRITING FOR PROFESSIONAL PURPOSES II

A practical course in which students are trained in writing official, administrative and formal texts considering Macao socio-cultural context and the differences among the varieties of the Portuguese language concerning the linguistic and cultural diversity.

Pre-requisite: PORT3002

PORT3013 TRANSLATION II (CHINESE TO PORTUGUESE)

This course deals with the basic skills of written translation from Chinese to Portuguese, considering aspects of contrastive language structure, semantics, pragmatics and style. Based on advanced translation practice, students will have a more systematic study of translation between Chinese and Portuguese. They will begin to translate texts more complicated, of a more varied nature, in order to prepare them better for the future translation work in their professional career.

Pre-requisite: PORT3002, PORT3019

PORT3014 PORTUGUESE LINGUISTICS: GRAMMAR

This course provides a linguistic overview of the grammar of the Portuguese language and includes references to characteristics of the different varieties of the Portuguese language.

Pre-requisite: PORT3002, PORT3019

PORT3015 INTRODUCTION TO THE STUDY OF THE LITERATURE OF THE PORTUGUESE-SPEAKING WORLD II

This course is designed to help students understand the Portuguese-speaking world's contemporary texts and further develop skills in literacy, critical reading, and writing. Different genres will be covered (poetry, romances, short novels and dramas), and a further understanding of the various cultures, societies and works underlying literary texts will be attended. This course will thus provide students with appropriate skills for critically analysing major literary genres.

Pre-requisite: PORT3002, PORT3019

PORT3016 MODERN AND CONTEMPORARY HISTORY OF THE PORTUGUESE-SPEAKING COUNTRIES II

This course provides an overview of the history of the Portuguese-speaking countries, with special emphasis on recent and contemporary issues, resorting to images, historical documents, and videos. From the Portuguese maritime expansion up to the present, the course focuses on the evolution of the Portuguese Colonial Empire's political, social, cultural, and economic aspects, decolonisation, and the formation of the Portuguese-speaking countries and their global involvement.

Pre-requisite: PORT3002, PORT3019

PORT3017 SPECIAL TOPICS III

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: Portuguese Language and Culture in Cinema, Portuguese History, History of Macao, Portuguese Literature, Brazilian Literature, etc.

Pre-requisite: PORT3002, PORT3019

PORT3018 SPECIAL TOPICS IV

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: Portuguese Language and Culture in Cinema, Portuguese History, History of

Macao, Portuguese Literature, Brazilian Literature, etc.
Pre-requisite: PORT3002, PORT3019

PORT3019 ADVANCED ORAL COMPREHENSION AND PRODUCTION SKILLS I

The course is designed to develop comprehension of real-life audio and video texts in different varieties of Portuguese, focusing on areas of current affairs, diplomacy, legal language, and business. Students will interact about the content of audio and video texts.

Pre-requisite: PORT1007, PORT2012

PORT3020 ADVANCED ORAL COMPREHENSION AND PRODUCTION SKILLS II

The course is designed to develop further the aims of Advanced Oral Comprehension and Production Skill I. Use of real-life audio and video texts in different varieties of Portuguese, focusing on areas of current affairs, diplomacy, legal language, and business. Students will transcribe, comment on audio and video documents, and produce texts through simulation activities and task performance.

Pre-requisite: PORT3019

PORT4001 RESEARCH AND REPORT WRITING SKILLS

An advanced course in the writing of academic or administrative texts for professional purposes. The course provides training in the planning, structure and composition of texts of an academic nature.

Pre-requisite: PORT3011, PORT3020

PORT4002 ADVANCED TRANSLATION I (PORTUGUESE TO CHINESE)

This course trains the student in written translation from Portuguese to Chinese, with emphasis in the areas of business, legal writing, socio-political affairs, science and technology.

Pre-requisite: PORT3011, PORT3020

PORT4003 INTERPRETING I (PORTUGUESE TO CHINESE)

This course will concentrate on basic interpreting skills covering note-taking, memory span improvement, sight translation and the basics of consecutive and simultaneous interpreting. The student will work with a range of basic topics in the areas of business, socio-political affairs, and science and technology. Students will undertake practical training in the language laboratory.

Pre-requisite: PORT3011, PORT3020

PORT4004 TEACHING PORTUGUESE AS A FOREIGN LANGUAGE I

Introduction to the theories of second language acquisition and the methodologies of teaching of a foreign language, with emphasis on the teaching of Portuguese. The course focuses on current internationally recognised theories and methods.

Pre-requisite: PORT3011, PORT3020

PORT4006 SPECIAL TOPICS V

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: History of Culture of the Portuguese-speaking nations, Portuguese Language and Culture in Cinema, Portuguese History, Literary Translation, Business Translation, Legal Translation, Business Interpreting, Portuguese Literature, Brazilian Literature, etc.

Pre-requisite: PORT3011, PORT3020

PORT4007 SPECIAL TOPICS VI

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: History of Culture of the Portuguese-speaking nations, Portuguese Language and Culture in Cinema, Portuguese History, Literary Translation, Business Translation, Legal

Translation, Business Interpreting, Portuguese Literature, Brazilian Literature, etc.
Pre-requisite: PORT3011, PORT3020

PORT4008 GRADUATION PROJECT

This course is a practical seminar intended to provide training in the formulation of advanced research projects in the student's area of interest. Students will be required to identify and develop relevant research questions and conduct systematic and creative assignments from a theoretical and practical framework to a well-developed, cohesive and coherent short thesis. Students will need to understand and apply methods for drawing and developing arguments and to provide evidence for scientific statements. Attention will be also given to relevant aspects of academic writing conventions.

Pre-requisite: PORT4001

PORT4011 ADVANCED TRANSLATION II (CHINESE TO PORTUGUESE)

This course trains the student in written translation from Chinese to Portuguese, with emphasis in the areas of business, legal writing, socio-political affairs, science and technology.

Pre-requisite: PORT3011, PORT3020

PORT4012 INTERPRETING II (CHINESE TO PORTUGUESE)

This course will concentrate on basic interpreting skills covering note-taking, memory span improvement, sight translation and the basics of consecutive and simultaneous interpreting. The student will work with a range of basic topics in the areas of business, socio-political affairs, and science and technology. Students will undertake practical training in the language laboratory.

Pre-requisite: PORT3011, PORT3020

PORT4013 TEACHING PORTUGUESE AS A FOREIGN LANGUAGE II

Application of current methodologies and practices in the teaching of a foreign language, with emphasis on the teaching of Portuguese. The course emphasises the need for research-based approaches and stresses the importance of international best practices.

Pre-requisite: PORT3011, PORT3020

PORT4015 SPECIAL TOPICS VII

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: History of Culture of the Portuguese-speaking nations, Portuguese Language and Culture in Cinema, Portuguese History, Literary Translation, Business Translation, Legal Translation, Business Interpreting, Portuguese Literature, Brazilian Literature, etc.

Pre-requisite: PORT3011, PORT3020

PORT4016 SPECIAL TOPICS VIII

This course is designed to permit visiting scholars, or existing staff, to offer courses in their particular areas of specialisation. The topic and content of the courses will vary from year to year, depending on the availability of specialised staff. Examples of specialised topics that may be offered include: History of Culture of the Portuguese-speaking nations, Portuguese Language and Culture in Cinema, Portuguese History, Literary Translation, Business Translation, Legal Translation, Business Interpreting, Portuguese Literature, Brazilian Literature, etc.

Pre-requisite: PORT3011, PORT3020

PORT7000 LINGUISTICS METHOD I

A course covering the analytic linguistic description of the following key areas of Portuguese: morphology and lexicon and phonetics-phonology, with special application to the acquisition and teaching of Portuguese as a Foreign Language. Students will be introduced to data collection purposes and procedures.

Pre-requisite: None

PORT7001 LINGUISTICS METHOD II

A course covering the analytic linguistic description of the following key areas of Portuguese: syntax and semantics-pragmatics, with special application to the acquisition and teaching of Portuguese as a Foreign Language. Students will be introduced to data collection purposes and procedures.

Pre-requisite: PORT7000

PORT7002 PORTUGUESE FOR PROFESSIONAL PURPOSES I

A discipline that is designed to develop Advanced Specialized Professional Level Proficiency in foreign language speakers of Portuguese who have attained advanced general proficiency. The course is for persons who require a very high degree of linguistic accuracy for professional purposes. It is designed to develop an acute awareness of self-evaluation and critique in order to identify and resolve diverse types of performance inaccuracy in both the spoken and written languages.

Pre-requisite: None

PORT7003 PORTUGUESE FOR PROFESSIONAL PURPOSES II

A second and more advanced level discipline for the development and consolidation of Advanced Specialized Professional Level Proficiency in foreign language speakers of Portuguese who have attained advanced general proficiency. The course is for persons who require a very high degree of linguistic accuracy for professional purposes. It is designed to develop an acute awareness of self-evaluation and critique in order to identify and resolve diverse types of performance inaccuracy in both the spoken and written languages.

Pre-requisite: PORT7002

PORT7004 THE PROCESS OF LANGUAGE ACQUISITION (L1 AND L2)

This course covers current theories of language acquisition. The course will first outline current concerns in first language acquisition. Subsequently, it will concentrate on second language acquisition theories, attending to acquisition processes, phases in development, and external conditioning factors, including first language, age, motivation and instructional mode and context. At all times, specific attention will be addressed to acquisition involving Portuguese.

Pre-requisite: None

PORT7005 METHODOLOGY OF TEACHING PORTUGUESE AS A SECOND LANGUAGE

This course addresses the application of current methodologies in the teaching of Portuguese as a Second Language. Developments in linguistics, educational and psychological studies lead to constant new input to foreign language teaching methodology and practice. The course introduces the student to major current practices and how research-driven innovations are developed in current practice.

Pre-requisite: None

PORT7006 CURRICULUM PLANNING AND MATERIALS EVALUATION FOR PORTUGUESE AS A FOREIGN LANGUAGE

This is a course covering principles and procedures in the design of the Portuguese Foreign Language curriculum, and in the design of Portuguese foreign language materials. The student will develop a critical sense for the evaluation of both curricula and materials, while also developing skills with respect to the creation of new materials and resources.

Pre-requisite: None

PORT7007 DEVELOPING READING SKILLS IN PORTUGUESE AS A FOREIGN LANGUAGE

The course surveys critically current major concepts and approaches to the teaching and acquisition of reading in a foreign language. The course will give particular attention to the application of current approaches in the teaching of Portuguese as a Foreign Language, and the incorporation of these approaches in pedagogical practice.

Pre-requisite: None

PORT7008 SUPERVISED TEACHING PLANNING AND PRACTICE IN PORTUGUESE AS A SECOND LANGUAGE

In this course the student is supervised in the planning and delivery of class teaching sessions in Portuguese as a second Language within the framework of specific curricula. Students will prepare and present lesson plans, class activities and procedures to the instructor and fellow students, and receive critical evaluations of their performances.

Pre-requisite: None

PORT7009 PORTUGUESE SOCIOLINGUISTICS

The course covers the topic of language variation in Portuguese, introducing some of the major theories thereon, and descriptive analytic practices. The course is configured to address sociolinguistic topics of particular relevance to the future Portuguese language professional, giving special attention to social and regional linguistic variation, and registers. The course also addresses the application of sociolinguistic variation in the context of Portuguese Foreign Language instruction.

Pre-requisite: None

PORT7010 SPECIAL TOPIC IN PORTUGUESE APPLIED LINGUISTICS I

A course designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in particular areas of specialization that do not already figure in the programme. The topic and content of the course will vary from year to year depending on the availability of specialized staff. Examples of topics that might be offered include: Testing in Portuguese as a Foreign Language, Technology in the Portuguese Foreign Language Class, Interactional Sociolinguistics in Portuguese, Clinical Linguistics applications in Portuguese as a Foreign Language, Patuá – the Creole Portuguese Language of Macao, Computational Linguistics Applications, etc.

Pre-requisite: None

PORT7011 SPECIAL TOPIC IN PORTUGUESE APPLIED LINGUISTICS II

A course designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in particular areas of specialization that do not already figure in the programme. The topic and content of the course will vary from year to year depending on the availability of specialized staff. Examples of topics that might be offered include: Testing in Portuguese as a Foreign Language, Technology in the Portuguese Foreign Language Class, Interactional Sociolinguistics in Portuguese, Clinical Linguistics applications in Portuguese as a Foreign Language, Patuá – the Creole Portuguese Language of Macao, Computational Linguistics Applications, etc.

Pre-requisite: None

PORT7013 THESIS AND RESEARCH WRITING SEMINAR

This is a practical seminar designed to train students in the formulation of research projects, and is intended to serve as a platform for the formulation and development of the dissertation project. The student will be required to identify relevant research questions and conduct systematic research from theoretical and practical perspectives, presenting stage papers on the development of the dissertation project.

Pre-requisite: PORT7112

PORT7105 MODERN LUSOPHONE LITERATURE

The discipline surveys the literature of the modern Portuguese speaking nations, including Portugal, Brazil, the African Portuguese-speaking nations and Timor-Lorosa'e, touching upon the colonial period yet paying particular attention to the literature of the 20th and 21st centuries.

Pre-requisite: None

PORT7107 IMAGES OF THE EAST IN PORTUGUESE LANGUAGE LITERATURE

The discipline is dedicated principally to the study of the representation of the East in Portuguese

narratives in early and modern periods. It addresses travel literature, including that of Fernão Mendes Pinto, and the topics of the imaginary East and the specific representation of Macao.
Pre-requisite: None

PORT7108 MACAO LITERATURE IN PORTUGUESE

This course studies diverse literary texts produced in Portuguese in Macao which present interesting, very different and sometimes controversial insights and perspectives on life in Macao society. As Portugal administrated Macao for more than 450 years, in addition to the literary texts of Portuguese residents and of the local Luso-Asian community, there is a corpus of literary texts written by short time visitors. The authors were Portuguese civil servants, lawyers, military officers and teachers who served in the territory, as well as Portuguese writers invited by the Macao government.

Pre-requisite: None

PORT7111 LITERARY & CULTURAL STUDIES METHOD I

The course covers the basic issues in research methodology and theories relevant to literature and cultural studies in the Portuguese area. Basic issues of literary and cultural analyses will be covered. These will be approached specifically in relation to the study of the Portuguese presence in Asia.

Pre-requisite: None

PORT7112 LITERARY & CULTURAL STUDIES METHOD II

This course addresses the main questions related to the notions of literature and culture, as well as models of literary reading. It will survey the major schools of 20th and 21st century literary criticism and theory and continue to discuss theoretical notions through the reading and analysis of both critical essays and Portuguese literary texts. Emphasis will be on the continuity of key ideas in the history of criticism. We will also consider debates surrounding multiculturalism, feminism, political correctness, textual authority, and literary canon.

Selected literary texts include Patrícia Portela, Dias Úteis; José Maria Vieira Mendes, Padam, Padam; Maria Isabel Barreno, Maria Teresa Horta and Maria Velho da Costa, Novas Cartas Portuguesas; João Pedro Vale and Nuno Alexandre Ferreira, Aqueles que só fazem meia revolução apenas cavam a sua própria sepultura; Grada Kilomba, Memórias da Plantação and selected poems by Mário Cesariny and Herberto Helder.

The course aims to continue to provide a general overview of the main theoretical and methodological questions in the fields of literary and cultural studies and to develop students' critical analysis and written and oral skills. Addressed questions: to develop practical tools for reading and analyzing literature; what does theory tell us about the function and social value of literature in the postmodern world context.

Pre-requisite: PORT7111

PORT7113 SPECIAL TOPIC IN LITERARY AND CULTURAL STUDIES I

A course designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in particular areas of specialization relating to Literary and Cultural Studies, History or Creative Writing, that do not already figure in the programme. The topic and content of the course will vary from year to year depending on the availability of specialized staff. Examples of topics that might be offered include: Advanced theories of Research, Advanced Theories of Literary analysis, Children's Literature in the Portuguese language, the Modern History of a specific Portuguese speaking nation, Portuguese Creative writing for television and film, Macao Literature in Patuá (Macao Creole Portuguese), The Portuguese in the Indian Ocean, Relations between Macao and Siam, The Manila-Macao connection, the Luso-Asian Family, Luso-Asian writing, Travel writing in Portuguese colonial times, the Portuguese historical cultural view of Asian Societies.

Pre-requisite: None

PORT7114 SPECIAL TOPIC IN LITERARY AND CULTURAL STUDIES II

A course designed to permit visiting scholars, or existing staff, to offer postgraduate level courses in particular areas of specialization relating to Literary and Cultural Studies, History or Creative

Writing, that do not already figure in the programme. The topic and content of the course will vary from year to year depending on the availability of specialized staff. Examples of topics that might be offered include: Advanced theories of Research, Advanced Theories of Literary analysis, Children's Literature in the Portuguese language, the Modern History of a specific Portuguese speaking nation, Portuguese Creative writing for television and film, Macao Literature in Patuá (Macao Creole Portuguese), The Portuguese in the Indian Ocean, Relations between Macao and Siam, The Manila-Macao connection, the Luso-Asian Family, Luso-Asian writing, Travel writing in Portuguese colonial times, the Portuguese historical cultural view of Asian Societies.

Pre-requisite: None

PORT7115 INTERCULTURAL COMMUNICATION

Intercultural Communication addresses the situation of languages and cultures in the contemporary globalized world. It aims at understanding the frames of identity formation and co-existence and their influence in the modern cultural means of artistic expressions. The seminar includes an introduction to the diversity of the Portuguese language in the world, its cultural environment and particularities in order to clearly address the challenges of globalization and multicultural stereotypes in the age of post-colonialism.

Pre-requisite: None

PORT7116 GRAMMAR AND COMMUNICATION

Grammar and Communication for Foreign Language aims at providing a full description of the functions of language from the point of view of communicative grammar. Its goal is to study language as it is really used in social practice and everyday life.

Pre-requisite: None

PORT7117 LITERATURE AND OTHER ARTS

This course/seminar aims to consider the aesthetic debate on the relationship between literature and other forms of art in different historical periods, as well as to address diverse instances and variations of this relationship - from the "mutual illumination of the arts" to forms of direct transposition, transformation and even the emergence of relatively novel modes of expression - through the study of concrete examples. Special attention will be given to both the content and the physical, technological and material aspects of the artistic object(s). Discussion on the notion of Art in general will be central as well.

Pre-requisite: None

PORT7800 PORTUGAL IN THE ASIA-PACIFIC REGION

A discipline covering aspects of the history of the Portuguese in Asia and Southeast and East Asia, beginning in the 16th century and covering the establishment of the Estado da Índia, and the foundation of Macao and its development during four centuries.

Pre-requisite: None

PORT7803 RELATIONS BETWEEN CHINA AND THE PORTUGUESE-SPEAKING COUNTRIES

This discipline covers aspects of history of the relations between the modern Portuguese-speaking countries and China, attending to the historical origins of these links, covering pre-20th century links within the Portuguese colonies and the development and the nature of 20th century and current links.

Pre-requisite: None

PORT7990 THESIS

Under the supervision of a professor, each student designs, carries out and writes up a substantial piece of theoretical research based on an in-depth study of a particular research area, a review of the research literature, the formulation of relevant research questions, and the development of a method of addressing these questions.

The master programme is finished in the fourth semester with an academic thesis in which academic results from the student's own research are presented. The thesis is written in

Portuguese and should have between 17 000 and 30 000 words.

Pre-requisite: None

PORT8008 ADVANCED RESEARCH AND ACADEMIC WRITING IN PORTUGUESE STUDIES

The seminar aims to provide students with a toolkit of writing strategies in Portuguese and to enhance their research skills. To build critical thinking and to observe academic conventions in different kinds of textual practice (abstracts, conference papers, journal articles, essays, dissertations, project drafting) are main goals of this course, where students will also learn to access resources such as library websites and online databases. Students will be encouraged to present their own research projects and to engage in reflexive approaches to reading, planning, drafting, revising and reviewing activities, while perfecting their mastery of Portuguese for academic purposes.

Pre-requisite: None

PORT8009 CROSS-LANGUAGE TOPICS IN APPLIED LINGUISTICS

This seminar offers an advanced approach to general principles and practices in the field of applied linguistics, by covering its connections to other related disciplinary areas and addressing current debates in language acquisition, language pedagogy, pragmatics, sociolinguistics, multilingualism, and creolistics. A particular emphasis will be given to language transfer phenomena and interlinguistic issues in Portuguese language-based contexts.

Pre-requisite: None

PORT8010 NEW TRENDS IN PORTUGUESE LITERARY AND INTERCULTURAL STUDIES

This course aims at studying current developments in Portuguese Studies in light of recent postcolonial debates. By addressing the diversity of cultural and artistic production in Portuguese within different geocultural frames (Europe, South America, Africa and the East), the course will stress the symbolic capital of Portuguese as a world language in times of expanding globalization and multicultural complexity.

Pre-requisite: None

PORT8999 DOCTORAL THESIS

For the Applied Linguistics (Portuguese) major, the student is expected to write a final dissertation on a specific topic related to the central contents and aims of the programme, under the supervision of a senior professor of the Department. The thesis must contain an original, relevant contribution for the advancement of knowledge in its scientific area. The text must strictly follow all the norms of a high-quality scientific thesis, both in terms of form and content. It must reflect the mature result of deep knowledge and specialization, the candidate's critical abilities and their outstanding level of formal/academic style in Portuguese. The final document has to be ready for serious scientific debate by international experts. For the Literary and Intercultural Studies (Portuguese) major, the student is expected to write a final dissertation on a specific topic related to the central contents and aims of the programme, under the supervision of a senior professor of the Department. The thesis must contain an original, relevant contribution for the advancement of knowledge in its academic domain. The text must strictly follow all the norms of a high-quality scientific thesis, both in terms of form and content. It must reflect the mature result of deep knowledge and specialization, the candidate's critical abilities and their outstanding level of formal/academic style in Portuguese. The final document has to be ready for serious scientific debate by international experts.

Course Description

ACCT1000 PRINCIPLES OF FINANCIAL ACCOUNTING

This course introduces students financial accounting by covering accounting concepts and their applications. Course contents include double entry bookkeeping, transaction analysis, accounting cycle, preparation of financial statements including income statement, balance sheet and cash flow statement, analysis of special accounts such as cash, accounts receivable, inventories, property, plant and equipment, liabilities and shareholders' equity, and the applications of the International Financial Reporting Standards (IFRS) to financial reporting. It focuses on conceptualizing and critically assessing important accounting terminologies, rules, and standards. Students are expected to acquire the balanced accounting techniques and theoretical knowledge through this course. Real business practices will be introduced by guest lecturers from Big4 accounting firms.

Pre-requisite: None

ACCT2000 MANAGEMENT ACCOUNTING I

This is the first course in the Cost/Managerial sequence. It provides an introduction and detailed discussion of Cost Accounting topics such as: Cost terminology, normal costing, job order costing, cost assignment systems, master budgets and flexible budgets for planning and performance evaluation.

Pre-requisite: ACCT1000 Principles of Financial Accounting

ACCT2001 INTERMEDIATE ACCOUNTING I

This is the first course in a three course sequence on Financial Accounting for Accounting and Financial Controllorship students. This course provides a presentation and examination of topics introduced Principles of Financial Accounting. The emphasis is on the conceptual foundations of accounting principles and translating them into procedural treatments of financial information. Topics covered in this course will include coverage of the following: financial accounting standards, the conceptual framework, qualitative characteristics of accounting, the accounting cycle, and a detailed discussion of the preparation and use of financial statements. There will also be an in-depth analysis of specific accounts such as cash, accounts receivable, inventories, property, plant and equipment and intangibles.

Pre-requisite: ACCT1000 Principles of Financial Accounting

ACCT2003 BUSINESS LAW

This course aims to familiarize students with the fundamental concepts of the legal environment of business, so they can take legal dimensions into account when making business decisions. Topics to be covered include: Introduction to the legal and judicial systems of Macau; Sources of law; Overview of public and private law branches; Law of Persons; Law of Obligations including Contract Law and Civil Liability, Commercial Contracts, Company Law and Dispute Resolution.

Pre-requisite: MGMT1000 Principles of Business Management

ACCT2004 INTERMEDIATE ACCOUNTING

This course is a comprehensive financial accounting course that examines multiple issues in financial reporting from both preparer and user perspectives. The course emphasizes on the application of international financial reporting standards and makes reference to the US accounting standards where appropriate. After students have finished the course, they can have clearer perspective on the information available in financial reporting and students will appreciate the challenges, worth and limitations of accounting. It also helps them to evaluate critically and understand the financial accounting theory and practice. Finally, it prepares students for advanced study, professional examinations and the successful pursuit of the careers in accounting or business.

Pre-requisite: ACCT1000 Principles of Financial Accounting

ACCT3000 INTERMEDIATE ACCOUNTING II

This is the second course in a three course sequence on Financial Accounting for Accounting and Financial Controllership students. This course continues an examination of the liability and equity accounts. Topics will include current liabilities and contingencies, long-term liabilities and leases, stockholders' equity including coverage of the issuance and repurchase of shares, dividend policy, and the impact of dilutive securities on earnings per share. The effect of share conversions, warrants, stock options and compensation plans will also be discussed.

Pre-requisite: ACCT2001 Intermediate Accounting I

ACCT3001 INTERNATIONAL FINANCIAL REPORTING STANDARDS AND THE GLOBAL ENVIRONMENT

This course is to provide students the basic concepts of the development of IFRS that will receive broad consensus support, regulators have been active in developing further requirements concerning corporate governance. It also focuses on the international accounting scandals in the US or Europe and by shareholder activism fueled by the apparent lack of any relation between increases in directors' remuneration and company performance.

Pre-requisite: ACCT1000 Principles of Financial Accounting and ACCT2001 Intermediate Accounting I

ACCT3002 MANAGEMENT ACCOUNTING II

This is the second course in the Cost Managerial sequence for Accounting and Financial Controllership students. It addresses topics more closely associated with the use of accounting standards and the International financial accounting standards. Topics will include investments, accounting for derivative financial instruments, foreign currency issues, revenue recognition, accounting for deferred taxes, accounting changes and error analysis, statement of cash flows and basic financial statement analysis.

Pre-requisite: ACCT2000 Management Accounting I

ACCT3003 INTERMEDIATE ACCOUNTING III

This is the third course in a three course sequence on Financial Accounting for Accounting and Financial Controllership students. This course examines issues in financial reporting for both the perspectives of both the preparer and the user. The course makes reference to the US accounting standards and the International financial accounting standards. Topics will include investments, accounting for derivative financial instruments, foreign currency issues, revenue recognition, accounting for deferred taxes, accounting changes and error analysis, statement of cash flows and basic financial statement analysis.

Pre-requisite: ACCT3000 Intermediate Accounting II

ACCT3004 ADVANCED FINANCIAL ACCOUNTING

This course provides students with a comprehensive understanding of business combinations and inter-corporate ownership. In particular, it prepares students to critically evaluate the principles underlying the accounting of complex transactions relating to global business combinations and group reporting. It covers the preparation of consolidated financial statements, beginning with the basic consolidation process and continuing through a variety of inter-company transactions. Cases are used to illustrate the complexities of mergers and acquisitions within a real world context.

Pre-requisite: ACCT2001 Intermediate Accounting I or ACCT2004 Intermediate Accounting

ACCT3005 ACCOUNTING INFORMATION SYSTEMS

This course introduces students to accounting and business related technologies as well as trends and issues of technology development that are crucial in contemporary business world.

Contents include accounting information systems, enterprise resource planning systems, big data and business intelligence, blockchain technology, information system security and controls, e-commerce and m-commerce, and artificial intelligence. Concepts and methodologies for business process and data modeling along with documentation techniques are covered, which offers students the opportunity to analyze and synthesize business processes and data flows in an organization. Various system development tools (flowcharts, data flow diagrams, and structured

charts) are adopted in the analysis and design of business transaction cycles (Revenue cycle, Expenditure cycle, Production cycle, Human Resource Management and Payroll cycle). General ledger and reporting systems are integrated into the course so that students can apply accounting knowledge and skills acquired from other accounting courses into the development and management of accounting information systems that fit into the real-world business environment. Accounting software and enterprise resource planning (ERP) applications are also demonstrated. Pre-requisite: ACCT1000 Principles of Financial Accounting and ISOM1001 Contemporary Information Systems for Organizations or ACCT1000 Principles of Financial Accounting and any course from GE science and technology area

ACCT3006 INTERNSHIP FOR ACCOUNTING FUNCTION I

This 1.5-credit course is designed with internship components to prepare students who are majoring in the Professional Accountancy and Accounting and Information Systems. It aims at providing students a broad exposure to the operations of Accounting and knowledge of work procedures. Students are supervised directly by professionals in organizations who communicate directly with the course coordinator. While each learning experience will differ depending on the type of organization, situation, and duration, the course coordinator will guide and assist students through their profession-oriented learning process. At the end of the internship, each student shall be able to embark on a career with hands-on industry experience.

Pre-requisite: ACCT2001 Intermediate Accounting I or ACCT2004 Intermediate Accounting with a cumulative GPA of 3.0 or above and approval from the course coordinator

ACCT3007 INTERNSHIP FOR ACCOUNTING FUNCTION II

This 1.5-credit course is designed with internship components to prepare students who are majoring in the Professional Accountancy and Accounting and Information Systems. It aims at providing students a broad exposure to the operations of Accounting and knowledge of work procedures. Students are supervised directly by professionals in organizations who communicate directly with the course coordinator. While each learning experience will differ depending on the type of organization, situation, and duration, the course coordinator will guide and assist students through their profession-oriented learning process. At the end of the internship, each student shall be able to embark on a career with hands-on industry experience.

Pre-requisite: ACCT2001 Intermediate Accounting I or ACCT2004 Intermediate Accounting with a cumulative GPA of 3.0 or above and approval from the course coordinator

ACCT3008 PUBLIC SECTOR ACCOUNTING

This course will cover fundamental concepts of accounting principles and practices in government and not-for-profit organizations. Concepts of budgeting, fund accounting, encumbrances and value of money in the public sector will be important topics in this class.

Pre-requisite: ACCT1000 Principles of Financial Accounting

ACCT3009 FINANCIAL STATEMENT ANALYSIS

The course focuses on the most salient aspects of accounting, analysis, and valuation. Students are taught to analyse, critically assess and interpret financial statement data of real companies to make informed business decisions. The course makes financial statement analysis engaging, relevant to business world and contemporary to international accounting standards. To that end, it consistently incorporates real company data and international business cases throughout teaching to reinforce the specific knowledge and skills being developed in the course.

Pre-requisite: ACCT3004 Advanced Financial Accounting

ACCT4000 AUDITING I

This course will discuss Generally Accepted Auditing Standards (GAAS) and International Standards on Auditing (ISA). The student will learn about the role of the auditing in a modern corporate setting. This will include the demand for auditing services, ethical dimensions of the auditing function and the responsibilities and legal liabilities of auditors.

The student will also learn the importance and process of many audit functions including: planning audits, collection of audit evidence, assessing risk and internal controls, understanding audit

sampling and analytical procedures, constructing the audit report.

Pre-requisite: ACCT3000 Intermediate Accounting II AND ACCT3005 Accounting Information Systems or ACCT2004 Intermediate Accounting AND ACCT3005 Accounting Information Systems

ACCT4001 ACCOUNTING THEORY

This course will address current controversies in Accounting, Auditing and Tax Accounting. It will focus on issues of current interest to the profession and/or accounting research. This course will generally be available to year four Accounting and Financial Controllership students only. If the topic permits, the instructor may open the course to year three Accounting and Financial Controllership students also.

Pre-requisite: ACCT3000 Intermediate Accounting II or ACCT2004 Intermediate Accounting

ACCT4002 SPECIAL TOPICS IN ACCOUNTING

This course will address current controversies in Accounting, Auditing and Tax accounting. It will focus on issues of current interest to the profession and/or accounting research. This course will generally be available to year four Accounting and Financial Control students only. If the topic permits, the instructor may open the course to your three Accounting and Financial Control students also.

Pre-requisite: ACCT2000 Management Accounting I or ACCT3002 Management Accounting II

ACCT4004 FINANCIAL ACCOUNTING IN HOSPITALITY AND GAMING

Accounting, as the business language, can bring underlying economics to the attention of stakeholders for their decision making in the hospitality and gaming industries. This course aims to equip students with knowledge and skills to analyze and interpret accounting information in the hospitality and gaming industries for managers, stockholders, financial analysts, creditors and policy makers. Along the way, students will develop the technical skills necessary to analyze corporate financial statements and disclosures, and interpret how accounting standards and managerial incentives affect the financial reporting process and outcomes. Important issues for annual reports of companies in the hospitality and gaming industry are discussed in this course, including financial statements, corporate governance reporting, corporate social responsibility reporting, auditing, taxation, anti-money laundering and junket operation. The course draws on the findings of recent academic research to discuss a number of techniques that outsiders can use to detect potential bias or aggressiveness in financial reporting.

Pre-requisite: ACCT2000 Management Accounting I

ACCT4005 MANAGERIAL ACCOUNTING IN HOSPITALITY AND GAMING

The main purpose of the subject is to learn how to use accounting as a managerial tool to improve operational efficiency and profitability of gaming and hospitality firms through revenue enhancement and cost reduction.

Pre-requisite: ACCT2000 Management Accounting I or ACCT2002 Principles of Managerial Accounting

ACCT4006 AUDITING II

This is the second course in Auditing. The course covers knowledge and intellectual skills including: 1) the appropriate audit procedures for different audit cycles, 2) internal control structures and test of transactions, 3) tests of details of balances for each cycle, 4) audit of subsequent events and post balance sheet transactions, and 5) finalize audit reports for management review. International auditing standards and business cases are demonstrated throughout the course to enable students to acquire the specific knowledge and skills being developed in the course.

Pre-requisite: ACCT4000 Auditing I

ACCT4007 CORPORATE GOVERNANCE

This course introduces fundamental theory and practices of corporate governance. It aims to provide students with an understanding of the concepts, principles, rules, and applications of

corporate governance in different jurisdictions. Specifically, topics covered include key theoretical models in corporate governance, different combinations of ownership and control, the role of board of directors, institutional investors, shareholder activism, debtholders and gatekeepers in the corporate governance mechanism. Moreover, corporate social responsibility as well as contemporary corporate governance issues in the international context and emerging markets will be discussed. Students are expected to apply knowledge to critically evaluate the effectiveness of corporate governance and accountability to various stakeholders in public companies.

Pre-requisite: ACCT1000 Principles of Financial Accounting

ACCT4008 MANAGEMENT CONTROL SYSTEMS

This course covers knowledge in advanced management control systems and contemporary research in management accounting. It focuses on management accounting practices and research throughout the course. The course takes a broad approach to current issues and contemporary research in management accounting with extensive coverage of new management accounting practices being adopted by innovative international companies around the world, including activities based management, kaizen, target costing and balanced scorecard. International cases and critical analysis of management control systems are covered in the course. Cases require the balanced application of skills and knowledge of contemporary research in management accounting.

Pre-requisite: ACCT3002 Management Accounting II

ACCT4009 CHINA TAX

This course provides comprehensive coverage of the tax system in China. It introduces the context in which China's laws operate and the many significant issues that are required for business and investment activities on the mainland. The course covers specifically on the taxation laws of mainland China including Individual Income Tax, Enterprise Income Tax, Value-Added Tax, Business Tax, the various indirect taxes, tax reforms, tax treaties and so on.

Pre-requisite: None

ACCT4010 TAXATION IN MACAO AND HONG KONG

Since the legal systems in Macao (continental statute law) and Hong Kong (common law) are different, their tax laws also stem from different legal traditions. Furthermore, from an accounting point of view, taxation requires thorough understanding of the tax articles and ordinances and the ability to synthesize the conceptual knowledge into tax accounting applications. Therefore, the aim of this course is to provide a strong foundation for the understanding of the legal and tax systems of the two places so as to equip students with the conceptual and practical as well as computational skills applied to real life business cases.

Pre-requisite: ACCT2001 Intermediate Accounting I or ACCT2004 Intermediate Accounting

ACCT4011 INTERNATIONAL TAXATION

Tax laws of different countries and regions are based on their diverse legal traditions and systems in vigor. Two mainstream legal systems, namely the continental system and the common law system will be stressed in this course. The former system is largely exemplified through the introduction of Macao taxation while the latter by the Hong Kong tax regime. Therefore, the students can appreciate how a same income or expense will be treated under various legal requirements and will be able to make critical comparisons and to eventually advise tax information users from different regimes using various angles. Again, taxation requires firstly thorough assimilation of the legal justifications before they are applied to tax computations. Therefore, both conceptual and computational understandings are stressed. All court cases illustrated in the course are from international examples which will therefore touch on issues such as tax planning and transfer pricing as well as international tax treaties.

Pre-requisite: ACCT4010 Taxation in Macao and Hong Kong

ACCT7012 FUNDAMENTALS OF ACCOUNTING

This course examines issues in financial reporting from both preparer and user perspectives. The course aims to deliver concepts of accounting, International Financial Reporting Standards (IFRS),

and the application of accounting standards to the preparation of the financial statements. Real case studies are introduced throughout the course. Contents of the course include: Conceptual framework; Transaction analysis and accrual accounting; Financial statements and analysis; Cash and cash flow statement; Accounting information for decision making; Corporate governance; Accounting fraud and misappropriation of assets; Contemporary issues in Accounting, etc.

Pre-requisite: None

ACCT7013 FINANCIAL REPORTING

This course is a continuation of 'Fundamentals of Accounting' which is an intermediate level course providing substantial knowledge in financial accounting based on International Financial Reporting Standards (IFRS). Students are expected to acquire the balanced accounting techniques and theoretical knowledge through this course. Major topics include the Conceptual Framework, Property, Plant and Equipment, Intangible Assets, and Impairment of Assets, Leases, Financial Assets and Liabilities, Provisions, Contingent Liabilities and Contingent Assets, Revenue, Income Taxes, Accounting for Shareholders' Equity, and Financial Statement Disclosures.

Pre-requisite: ACCT7012 Fundamentals of Accounting

ACCT7014 BUSINESS LAW

This course introduces the legislative system and commercial law in Macao. Topics include liability of commercial contracts, product liability and compensation, forms and liability of agents, legislation concerning limited liability companies, share limited companies and group corporations, commercial instruments, carriage of goods and insurance and commercial arbitration.

Pre-requisite: None

ACCT7015 MANAGEMENT ACCOUNTING

This course is about the managerial use of accounting data to plan and control personnel and operations in the firm. The focus is on planning, decision-making and control by organizations, and on the accounting systems that managers have to assist them in their decisions about resource allocation and performance evaluation. Major topics included are product costing, costing approaches used in today's business environments, relevant costs for decision analysis, variance analysis, divisional performance evaluation and transfer pricing.

Pre-requisite: None

ACCT7017 FINANCIAL MANAGEMENT

This course offers students a more advanced understanding of important concepts and theories in the field of corporate finance. It covers basic topics including capital budgeting, alternative valuation methods, capital structure decisions, corporate payout policy, securities offering decisions, as well as more advance topics (optional) such as options, futures, and corporate risk management. The objective of this course is to provide students with essential tools to study more advanced courses in finance.

Pre-requisite: None

ACCT7018 ACCOUNTING FOR DECISION MAKING

This course examines issues in financial reporting from both preparer and user perspectives. The course aims to deliver concepts of accounting, International Financial Reporting Standards (IFRS), the application of accounting standards to the preparation of financial statements, and the analysis and interpretation of management accounts for decision makings. International real case studies are introduced throughout the course.

Pre-requisite: None

ACCT7050 ADVANCED FINANCIAL REPORTING

This is an advanced level financial accounting course. Topics covered will include business combinations and impairment of goodwill, the basic consolidation process with variety of intercompany transactions and associate reporting. Emphasis will be placed on the application

of International Financial Reporting Standards.
Pre-requisite: ACCT7013 Financial Reporting or equivalent

ACCT7051 CORPORATE GOVERNANCE AND SOCIAL RESPONSIBILITY

This course aims at introducing contemporary theories, models, issues and practices relating to business ethics and corporate governance and social responsibility and imparting an ethical mindset to the students in the conduct of business and the treatment of accounting information. Topics include the concept and theories of corporate governance; corporate governance principles, functions, structures and mechanisms; corporate governance models, standards, regulations and practices; the roles of different corporate stakeholders in corporate governance; current debates over corporate governance regulation and practice, causes and consequences of corporate governance failures; design and assessment of measures to improve corporate governance, corporate social responsibilities and socially responsible investing; and trends and emerging issues in corporate governance.

Pre-requisite: None

ACCT7052 PERFORMANCE MANAGEMENT AND CONTROL SYSTEMS

The course is an extension to management accounting in the area of business which develops the financial and non-financial information necessary to effectively manage the firm or organization.

Management accounting is in transition moving from a procedural focus on financial accounting reports to a strategic focus on the use of accounting to facilitate the business success of the enterprise. The concepts of management accounting are used in both manufacturing and service firms, and are increasingly applied to government and not-for-profit organizations, to help them succeed in their service missions, to be responsible to the citizens and funding agencies.

A principal motivation for the change in management accounting is the changes in business processes and organizations in response to increased competition, both global and domestic. These changes include a renewed focus on the customer, aggressive cost reduction, outsourcing, downsizing and reengineering, total quality management, advanced manufacturing technologies, and increased use of information technologies, among others. The management accountant is no longer a reporter and analyzer of financial facts only, but a business partner -developing the financial and non-financial information the organization needs to be successful.

As such, the management accountant plays a strategic role in the business, developing and presenting the information that is critical for the firm's success.

Pre-requisite: ACCT7015 Management Accounting or equivalent

ACCT7053 FINANCIAL RISK MANAGEMENT

This course provides students with the knowledge and intellectual skill in risk identification, measurement, control, and evaluation. It enables students to evaluate how a business can identify and measure its loss exposures, select appropriate tools for the management of risk exposures. It aims to prepare the students for necessary knowledge about independent risk analysis and decision-making in an effective risk management system. The topics covered include the nature of risks, rationale and framework for risk management, scientific risk measurement for financial risk, market risk management using derivatives, management of credit, liquidity, and operational risks, as well as stress tests and scenario analyses in crisis management. Students are expected to apply knowledge to the discussion of real-world issues in corporate risk management.

Pre-requisite: ACCT7017 Financial Management or equivalent

ACCT7055 AUDITING AND ASSURANCE

The course aims to deliver knowledge of international auditing standards, contemporary practices in auditing, rules, regulations and applications of auditing standards to audit work. The course emphasis on auditor's decision making process in a financial statement audit, as well as an integrated audit of both financial statements and internal control over financial reporting required for public companies. International case studies are introduced throughout the course.

Pre-requisite: None

ACCT7056 TAXATION

This course aims at introducing the various direct and indirect taxes currently in force in the Macao and Hong Kong Special Administrative Regions as representative examples of taxation from both continental and common law systems. The taxes will include those levied on goods, properties, personal income and corporate earnings. Some discussions on tax planning issues will also be covered.

Pre-requisite: None

ACCT7060 FINANCIAL STATEMENT ANALYSIS FOR DECISION MAKING

This course aims to demonstrate how financial statements can be reformulated, analyzed and interpreted for decision making. It first identifies information sources that analysts frequently employ in financial statement analysis and examines the steps of the financial statement analysis framework. It then discusses the objective of financial reporting and how financial reporting standards affect security analysis and valuation. The course will cover important tools and techniques used in financial analysis including activity, liquidity, solvency, profitability and valuation ratios, describe the relationships among those ratios and evaluate real life companies using ratio analysis. It also demonstrates the application of DuPont analysis of return on equity, and other ratios especially used in equity analysis and credit analysis. Finally, it provides a framework for considering potential analyst adjustments that are necessary when comparing companies that use different accounting methods or estimates.

Pre-requisite: ACCT7013 Financial Reporting

ACCT7300 FINANCIAL STATEMENT ANALYSIS

Financial analysis is an integral part of business analysis and strategy formulation of a firm. This course covers the basics of both qualitative and quantitative analysis of the firm's reports and looks further into risk analysis, forecasting and valuation techniques. The aim is to provide a working knowledge of the role of financial reports in the overall firm valuation, with emphasis on strategic analysis. This course adopts a practical approach where possible using data from real life cases. Students will gain an appreciation of the usefulness and importance of financial statement information and the tools used to evaluate such information.

Pre-requisite: None

ACCT7301 CORPORATE FINANCIAL STRATEGY

This course provides practical insights into corporate financial decisions from top management perspectives. Topics covered include corporate objectives and strategic analysis, investment decision making, financing choice, initial public offerings, capital structure, dividend policy, mergers and acquisitions strategies.

Pre-requisite: None

ACCT7350 CORPORATE GOVERNANCE AND SOCIAL RESPONSIBILITY

The course focuses on large business firms with publicly traded equity. It focuses on the interaction between corporate governance at the levels of firm and national system in US, Europe and Asia. Topics will include: role of corporate governance in strategic decision making, director legal duties and customary practices; board leadership structures; best practice codes and investor pressure; movements championing shareholder rights, increased representation of women on boards; governance in the family-controlled (but publicly traded) firm; corporate governance in the "stakeholder model," and in "state capitalism"; strategic corporate social responsibility and the proper scope of business firms' responsibilities to society.

Pre-requisite: None

ACCT7351 INTERNATIONAL FINANCIAL MANAGEMENT STRATEGY

Economic globalization over last decades has greatly increased foreign investments and international trade in goods and assets. For businesses and investors, access to international markets comes with opportunities in addition to risk, and the course examines the increased benefits of international diversification and examines the risks involved in operating and investing in such locations. Topics include the forward foreign exchange market, interest rate parity, portfolio

investment in international capital markets, foreign direct investment and financing decisions of multi-national corporations, political and country risks.

Pre-requisite: None

ACCT7991 PROJECT REPORT

Students are required to identify a real accounting issue faced by companies and provide a data driven solution in the Project Report. The issue can come from any business sector and industry, and can be local or international in scope, but the nature of the issue must be related to accounting.

ACCT8011 ACCOUNTING RESEARCH METHODS AND SEMINAR

This course is to provide the accounting Ph.D. students with the knowledge on the core methodologies for contemporary accounting research and other research-related skills such as reading and writing accounting academic papers. We will use the seminal top journal papers for this purpose. The topics will include (but not limited to) value relevance of accounting numbers, earnings quality, accounting conservatism, earnings management, cost of capital and valuation, mispricing, analyst forecast properties, auditing, CEO compensation and turnover, and corporate governance. After taking this course, the students are expected to know the representative methods to measure the variables and specify the regression models for each topic, and be able to apply these methodologies to do their own empirical works to do the accounting research.

Pre-requisite: ACCT7012 Financial Accounting and Theory &

ACCT7015 Management Accounting or equivalent (master level)

ACCT8012 CONTEMPORARY RESEARCH IN ACCOUNTING

This course is to provide the accounting Ph.D. students with a deepened knowledge, theories, topics, and methodologies of contemporary accounting research. By reviewing a selection of the recent literature in accounting and finance across various topics such as ESG, analyst forecasts, accounting conservatism, auditing, disclosure, CEO compensation, taxation, machine learning, and others, students are endowed with the knowledge and capabilities to conduct empirical research in a wide variety of accounting fields. Specifically, students will be guided to critically assess research papers, a process aimed at identifying research questions of current interest jointly with the appropriate methods for exploring them.

Pre-requisite: None

ACCT8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

BAGC7011 RESEARCH METHODS

The course provides postgraduate business students with the fundamental analytical skills that they need for their project report, as well as a good understanding of the overall research process. The course guides students through every step of a research project, from getting started to analyzing data and writing a mock project report. It provides enhanced coverage of quantitative methods available for a variety of business topics, and contains demonstrations of the use of statistical software in a wide range of business research.

Pre-requisite: ISOM7012 Statistical Analysis and Applications (for students of MBA Programme).

None [for students of Master of Science in Data Science (Marketing Analytics)]

BAGC7300 INNOVATION AND ENTREPRENEURSHIP

This course is about management of innovation with the focus on entrepreneurial firms that have relied on innovation. In addition to understanding innovation issues from the entrepreneur and manager's perspectives, students will also learn to identify and explore entrepreneurial opportunities and develop knowledge and skills necessary to successfully operate an entrepreneurial venture. Students will learn how growing and innovative companies should

identify the right vision and strategies, raise capital and formulate exit strategies from the entrepreneurial perspective.

Pre-requisite: None

BAGC7301 STUDY TRIP GROUP REPORT

Student will form a group themselves and choose a topic on their own or with the help of faculty members. The topic can be related to the city they are going to visit or a company in that city. Students are expected to make substantial preparations regarding the topic before the trip takes place and complete the project shortly after the trip.

Pre-requisite: None

BAGC7350 RISK AND CRISIS MANAGEMENT STRATEGY

Risk is an essential part of any business. Knowing what risk to take and how much to take is critical in creating value for shareholders. This course focuses on the identification, quantification and control of various aspects of risks and crisis facing companies, e.g., business risk, financial risk (e.g., interest rates and exchange rates, the cost of raw materials, etc.), operational risk, crises and disasters. It teaches participants how to deal with crisis events, e.g., natural disasters, social and political instability, system failures, technological breakdown, etc., that could cause major disruptions to companies.

Pre-requisite: None

BAGC7351 BUSINESS RESEARCH METHODS

This course introduces students to fundamental research and data analysis techniques. Students will be able to identify a research topic, design a study, collect data, analyze data, and draw conclusions based on the findings.

Pre-requisite: None

BAGC7498 PROJECT REPORT

Student will choose a research topic on his or her own or with the help of his or her supervisor and develop a research proposal before writing up the report. The nature of the research is mostly practical or applied, focusing on analyzing practical management issues and identifying implications for corporate and/or government policies. Students have six months to complete the research.

Pre-requisite: None

BAGC7991 PROJECT REPORT

This course intends to cultivate analytical and problem-solving skills among students through the design and implementation of a business project. Students are required to identify a real business issue faced by companies and provide a data driven solution in the project report. The issue, which can be local or international in scope, may come from any business area and industry sector.

Pre-requisite: None

BAGC8000 RESEARCH WRITING

Academic writing is a critical skill for academics. This course is thus developed to introduce the principles of good academic writing to business PhD students. The primary purpose is to educate student on the art and science of writing a PhD-level research proposal and dissertation. Specifically, students will learn basic issues to improve their micro and macro writing skills. In addition, this course will introduce students to the process of submitting and publishing in peer-reviewed journals and to academic conferences. Students will also learn more about ethical issues in academic writing, the art of paraphrasing, and how to avoid plagiarism.

Pre-requisite: None

BAGC8001 RESEARCH ETHICS

The course provides students with an understanding of the following issues:

- The need for research ethics and the responsibility of the researcher (the student)
- The most common types of academic dishonesty (such as fabrication and plagiarism)

-
- How to avoid committing acts of academic dishonesty (such as through using citations and references)
 - How the University deals with students who have been proven to have committed acts of academic dishonesty (The University's 'Rules on Handling Student Academic Dishonesty' will be outlined)

Pre-requisite: None

BAGC8300 RESEARCH METHOD FOR BUSINESS AND MANAGEMENT RESEARCH

Research competencies and skills are essential for the effective conduct and understanding of research and ultimately for evidence-based decision-making, whether in business, government or civil society. The development of research competencies is particularly relevant for junior academics whose career is increasingly dependent on their research output. When embarking on a DBA program, students also need to have a solid understanding of what constitutes good research, how to design and execute empirical studies and how to present and discuss research results in a convincing and effective manner.

Pre-requisite: None

BAGC8301 RESEARCH WRITING AND ETHICS

This course is the warm-up course for students to understand more about research writing and ethics before they choose their research topic and supervisor. Professors (also potential supervisors), and outstanding visiting scholars who know qualitative method (interview, case method), experimental method (ANOVA, MONOVA), and quantitative method (modelling, regression, SEM, multi-level modulation and algorithm, etc.) from different areas will teach in different sessions. Some guest speakers from industry will also share their viewpoints and insights about business operation and management. This is also a very critical and fundamental part of DBA learning and upcoming thesis writing.

Pre-requisite: None

BAGC8320 RESIDENTIAL WORKSHOP I

This is an orientation workshop to prepare students for studying DBA in Macau. It provides the students an overview of the research knowledge and analytical skills as required for their DBA studies. Social activities as well as lectures from UM professors and business executives in the Greater Bay Area would be arranged.

Pre-requisite: None

BAGC8322 RESIDENTIAL WORKSHOP II

Residential Workshop II would be held outside Macau. It consists of lectures from professors in leading universities, site visits to renowned companies, social events, and intensive discussion among students on one selected topic for the workshop.

Pre-requisite: None

BAGC8397 DOCTORAL THESIS

The course is the most significant learning experience of the programme. Students have the opportunity to apply theories learned in the taught courses and to conduct an independent research project examining an important issue. The systematic investigation process will confirm for the participants their ability to conduct independent research, demonstrate their expertise in a chosen area of interest and make an intellectual contribution to the practice of management.

Pre-requisite: None

BECO1000 PRINCIPLES OF MICROECONOMICS

The course enables students to understand the behaviour of different economic agents in the economy and their interactions in the market. It introduces to students the patterns of different market structures and their associated impacts, enabling students to understand the role of the government and the degree of efficiency in different market structures. The course also enables students to apply basic economic theories and models to explain real world economic phenomena. The course covers the concepts of the demand, supply, their elasticity and market equilibrium.

Consumer choices, production process, the costs of production and different market structures and their patterns will also be discussed in the classes.

Pre-requisite: None

BECO1001 PRINCIPLES OF MACROECONOMICS

The course enables students to understand how the economy operates as a whole. It introduces to students the basic economic indicators, the underlining economic forces and the roles of the public and private sectors, enabling students to apply basic economic theories and models to explain contemporary economic issues.

The course introduces to students the basic economic indicators such as gross domestic products, inflation, unemployment interest rate and their measurement. Concepts such as money supply and demand, the stock market, aggregate demand, fiscal and monetary policies and macroeconomic theories, including the Monetarism and New Classical theory will be discussed in the course.

Pre-requisite: None

BECO2000 INTERMEDIATE ECONOMICS

This course covers topics on both the Macro- and Micro-economics sides at the intermediate level. On the macroeconomics side, the Keynesian IS-LM model in the close and open economy, various exchange rate regimes and their implications to the economy will be discussed. In addition, the AD-AS model will be derived and employed to perform policy analyses. On the microeconomics side, quantitative models in relation to consumer's choice, budget constraints and utility maximization will be focused. The concepts of profit maximization, cost minimization, firm's and industry's supply as well as the market structures of perfect competition, oligopoly and monopoly will also be addressed in the course. After this course, student would have a stronger quantitative background in economics. Besides, students are expected to be able to apply more sophisticated macro- and micro- economic models to conduct empirical economic analyses.

Pre-requisites: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO2001 ECONOMETRICS I

This is an introductory course to econometrics. It introduces to students the basic concepts of econometrics with respect to regression modelling, estimation and inference. It enables students to understand basic regression analysis and to draw policy implications from the econometric results.

Pre-requisite: ISOM2002 Statistics and Data Analysis

BECO3000 ECONOMIC POLICY AND PLANNING

This course aims to introduce to students the political, social and economic considerations on the making of economic policies and planning. It delivers to students the analytical skills necessary in making policy suggestions to deal with the contemporary economic issues in Macao and the nearby regions.

In this course, topics such as the general principles of public policies, economic rationales for the state, market failure, the distributional and other goals of economic policies, fiscal and monetary policies and external shocks and domestic policy responses will be covered.

Pre-requisite: BECO3009 Intermediate Macroeconomics

BECO3001 PUBLIC ECONOMICS AND FINANCE

This course introduces to students the tools for analyzing the role of state (government) in the economy. It discusses the justification for government intervention in a market economy, analyzes the key area of government policy in public finance.

The topics covered in this course are Efficiency and market, Rationales for Government Intervention, Market Failure, Cost-Benefit Analysis, Equity and Rationale for Income Redistribution, Income Support for the Poor, Social Insurance and Tax Incidences.

Pre-requisite: BECO3008 Intermediate Microeconomics

BECO3002 THE CHINESE ECONOMY

The course aims to provide students with comprehensive coverage of various aspects of the contemporary Chinese economy. Students could learn how to employ different analytical approaches to understand the functioning of China's reform period, its economic transition and development.

In this course, topics such as the geographical setting, socialist economic background, economic reforms and transitions, various production factors, ownership structure, different production sectors, township and village enterprises, foreign trade and foreign investment, macroeconomics and fiscal system, financial development and financial system reform and the environmental quality of China will be discussed.

Pre-requisite: BECO3008 Intermediate Microeconomics AND BECO3009 Intermediate Macroeconomics

BECO3003 INTERNATIONAL TRADE AND COMMERCIAL POLICY

This course is to familiarize students with the basic theories and fundamental concepts used by economists/policy makers working in the field of international economics. It enables students to understand the nature, rationales, applications, implications and welfare distributions of different trade and commercial policies.

The topics covered in this course are foundations of modern trade theory, international equilibrium, trade model extensions and applications, economic growth and international trade, tariffs and non-tariff Barriers, trade regulations and industrial policies, trade policies for developing country, regional trading arrangements, international factor movements and multinational Enterprise.

Pre-requisite: BECO3008 Intermediate Microeconomics

BECO3004 ECONOMICS OF TOURISM

This course introduces to students the environmental, social, cultural and economic conditions, as well as public policy issues which are necessary to the success and sustainable growth in the tourism industry. The merits and defects of a tourism-based economy, and the current structure and prospects of tourism in Greater China and other East Asian countries will also be discussed. It enables students to understand both the demand- and supply-side factors in the tourism industry. The topics covered by this course are the dynamics and effects of tourism evolution, the concepts, definitions and global trend in tourism, the market for tourism, the composition of the domestic and international tourism industry, the structure and economic role of tourism in the East Asia, the development of tourism in China, the growing interaction and evolving interrelationship between gaming and tourism and the tourism in the Great Pearl River Delta and Macao.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO3005 ECONOMICS OF E-COMMERCE

The course introduces to students what is E-commerce and its importance in "New Economy". It gives students economic insights to understand e-commerce and make better decisions in e-commerce, enabling them to understand how products are sold electronically, and the digitalization of conventional business processes and their impacts.

Pre-requisite: BECO3008 Intermediate Microeconomics AND BECO3009 Intermediate Macroeconomics

BECO3006 MONEY AND BANKING

This course introduces to students the nature and functions of money and the principal institutions involved in the money or financial side of our macroeconomy. After this course, students would be able to gain skill and practice in the analysis of economic situations, events, and policies, particularly those directly involve in money, banking and financial market.

Pre-requisite: BECO1001 Principles of Macroeconomics

BECO3007 ASIAN FINANCIAL MARKET

The course aims to introduce to students the composition and institutional framework of the Asian Financial Market. It discusses the basic structure of the money and banking system and the capital

market of the major Asian and South-East Asian economies. It enables students to understand the causes and implications of the Asian Financial Turmoil.

Pre-requisite: None

BECO3008 INTERMEDIATE MICROECONOMICS

The course introduces to students the concepts and techniques of microeconomic analysis, with an objective of delivering students a rigorous knowledge on modern microeconomic theories, and to enable them to apply modern microeconomic theories to analyze individual's behaviour.

The course covers topics such as budget constraint, preferences, utility, choice, demand and consumer surplus, market demand and equilibrium, technology and profit maximization, cost minimization and cost curves, firm supply and industry supply, monopoly and oligopoly.

Pre-requisite: BECO1000 Principles of Microeconomics

BECO3009 INTERMEDIATE MACROECONOMICS

This course enables students to understand how the economy operates in a complex world, and how macroeconomic policies operate to affect the domestic and foreign economies. After this course, students could be able to utilize these models to analyze various economic issues in a systematic and scientific way.

Fundamental and essential macroeconomic models, such as the goods and financial markets, the IS-LM and AD-AS model, their theoretical background and applications in the closed and open economy, the labor market, exchange rate regimes and the unemployment issue will be discussed in this course.

Pre-requisite: BECO1001 Principles of Macroeconomics

BECO3010 GLOBAL ECONOMIC ISSUES AND BUSINESS IMPLICATIONS

This course is a combination of economics and real world. It applies various basic economic theories to analyze various contemporary global economic issues which enables students to better understand the relation between economic knowledge and the goal of mankind: achieving prosperity. The lecture topics include Economic Growth, Poverty, Financial Crisis, Resources, Environment, Climate Change, Trade and the emerging of China.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO3011 FINANCIAL ECONOMETRICS

This course introduces to students advanced econometric methodologies beyond the fundamental least squares regression analysis for financial data. It focuses on the appropriate econometric modelling, estimation and inference in analyzing data that are typically employed in examining financial issues.

Pre-requisites: BECO2001 Econometrics I AND FINC2000 Financial Management or FINC2003 Corporate Finance

BECO4000 ANALYSIS OF ECONOMIC INDICATORS

This course introduces to students the major economic indicators and their use in describing the state of an economy. It studies how economic indicators are measured, how they behave under different economic environments, what they tell and how different decision makers, including the government, business, investors, and consumers, make decisions based on economic indicators. Topics include: introduction; economic growth and business cycle; economic indicators in the areas of production, employment, consumption, investment, price and wage, money and interest rate, financial market, government, balance of payment, exchange rate; decision making and economic indicators; economic derivatives.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO4001 GAME THEORY AND ECONOMIC APPLICATION

This course introduces to students the basics of game theory relevant to economic analysis and their applications in various fields of business and economics.

Topics include: static games of complete information and Nash equilibrium; dynamic games of complete information and subgame-perfect Nash equilibrium; static games of incomplete information and Bayesian Nash equilibrium; dynamic games of incomplete information, perfect Bayesian equilibrium and its refinements; applications of game theory in business and economics. Pre-requisite: None

BECO4002 ECONOMETRICS II

This course is the extension of Econometrics I (ECIF310) with in-depth discussion of econometric modeling and its application in finance in academic and practice. It provides theoretical discussion of advance econometric models needed for financial economics research. Topics include error structure, panel data with non-spherical error, simultaneous equation and time-series modelling. This course required you to have Econometrics I and strong knowledge of economics, mathematics and statistics.

Pre-requisite: BECO2001 Econometrics I

BECO4003 INTRODUCTION TO ECONOMETRICS

The course aims to define and analyze variables and data set for particular statistical investigation, to familiarize students with the statistical estimation and inference in linear regression model and its application to problems in economics and the social sciences. In the course, students will learn how to carryout statistical estimation, and the methods in interpreting econometric results carried out and reported by others.

The course will cover topics such as the scope and limitations of econometrics, introduction to EViews and SAS, the nature of regression analysis, the foundation of different regression models, the normality assumption of the CLRM, interval estimation and hypothesis testing, multiple regression analysis and the problems associated in different estimation methods.

Pre-requisite: ISOM2002 Statistics and Data Analysis or FINC2002 Statistics for Finance or ISOM2004 Data Analysis and Modeling

BECO4004 APPLIED ECONOMETRICS

This is an advanced econometric course. It introduces econometric methods that build on the classical linear regression model at the introductory level. It focuses on econometric estimation, hypothesis testing and result interpretation in analyzing different types of data sets in the real world.

Pre-requisite: BECO4003 Introduction to Econometrics

BECO4005 APPLIED ECONOMICS FOR LEISURE INDUSTRIES

Broadly speaking, leisure include the provision of such services as recreation, tourism and gaming, etc. The course examines the similarities and differences between the leisure industries and the traditional industries. Factors determining demand, supply and market structure of the leisure industries would be investigated. In addition, global and regional issues associated with future growth and development of these industries will also be explored. Various practical cases will be discussed to enhance students' understanding of the economic foundation of the leisure industries, as well as to elevate their decision making skills for these service sectors.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO4006 THE ECONOMICS OF DEVELOPMENT

This course is to strengthen our ability to think analytically about the problems faced by developing economies. Students are encouraged to consider how barriers to development emerge and what policy can be designed to remove them.

This course is a research-oriented one, focusing on development problems faced by Macao, Hong Kong, Taiwan, and the rest of China. Students are required to undertake research projects on many real-world issues. They will see many new articles uploaded to the course-web, which go well beyond textbook discussions.

Pre-requisite: BECO3008 Intermediate Microeconomics AND BECO3009 Intermediate Macroeconomics

BECO4007 HISTORY OF ECONOMIC THOUGHT

This course introduces to students the philosophical principles of the history of economic thought, and discusses economists' changing ideologies in revealing the economic societies across the different eras.

Topics to be covered include the ancient and medieval thoughts about a society's material well-beings; the evolving thoughts from pre-classical and classical economics to marginalism and neoclassical economics; the standpoints of socialism, the significance of institutional economics and new classicism.

Pre-requisite: BECO3008 Intermediate Microeconomics AND BECO3009 Intermediate Macroeconomics

BECO4008 FINANCIAL ECONOMICS

This course enables students to develop analytical and quantitative skills in the Economics of Finance whose analysis is broader and deeper than that of Corporate Finance. After this course, students are expected to understand concepts such as Expected Utility, State Preference, Stochastic Dominance in Financial Economics.

Topics to be covered include a review of probability and statistics, expected utility theory, the capital asset pricing model (CAPM), consumption-based asset pricing theory, arbitrage pricing theory (APT), state preference theory, option pricing theory, market efficiency, the term structure of interest rates, forward contracts and futures contracts.

Pre-requisite: BECO3008 Intermediate Microeconomics AND BECO3009 Intermediate Macroeconomics AND ISOM2002 Statistics and Data Analysis

BECO4009 THE EUROPEAN ECONOMY

This course aims to introduce to students the theory of economic integration and the history, development, structure and objectives of the European Union (EU). Students are expected to understand the basic concepts of economic integration and the economic performance and prospects of the EU, its common policies, external and internal trade development and enlargement.

In this course, topics such as the fundamental concepts of economic integration, the history, institutions and economic issues of European integration, the Single European market, European Union's Common Policies, the Maastricht and the other treaties and the enlargement process of the EU will be discussed.

Pre-requisite: BECO3009 Intermediate Macroeconomics

BECO4010 ECONOMIC DEVELOPMENT IN ASIA PACIFIC

This course aims to enable students to understand the economic development process of the Asia-Pacific region. It entails to develop students' interest and knowledge on regional economic issues. It is expected to enhance students' independent learning ability in mastering the future regional development trend, as well as to relate the knowledge and learning to the regional business environment.

Applying fundamental economic theories, it focuses on comparing economies in the region from various dimensions, including basic economic strengths and weaknesses, growth dynamics, trade and investment patterns, financial system development, as well as economic cooperation initiatives.

Pre-requisite: None

BECO4011 INVESTMENT AND PROJECT ANALYSIS

This course studies basic issues in the evaluation of business and public projects and decisions. Topics include: evaluation of business projects and decisions-capital budgeting, cash flow, risk, strategic options, and valuation by ratio; cost and benefit analysis of public projects and decisions-investment/decision criteria, identification and measurement of costs and benefits, discount rate, risk, cost effectiveness analysis, and income distribution.

Pre-requisite: BECO3008 Intermediate Microeconomics AND FINC2000 Financial Management

BECO4012 CHINA'S FINANCIAL SYSTEM

This course introduces the changing features and structure of China's financial system since economic reforms. Topics include formation and characteristics of China's modern financial system in the first half of the twentieth century; its settings in the dawn of economic reforms; major changes in the 1980s and 1990s; interrelationship between industrial reforms and financial system reforms; changing roles and functions of the banking system in the domestic and world economy; issues associated with the progress of non-banking financial system and its outlooks. In addition, implications of China's WTO accession to its financial system would also be explored.

Pre-requisite: BECO3008 Intermediate Microeconomics AND BECO3009 Intermediate Macroeconomics

BECO4013 ECONOMICS OF GLOBALIZATION

This course aims to enable students to understand the process of globalization. It entails to develop students' interest and knowledge on global economic issues. It is expected to enhance students' independent learning ability in mastering the future development trend of the global economy, as well as to relate the knowledge and learning to the global business environment.

Applying fundamental economic theories, it investigates the global economy from various dimensions, including economic development, international trade, international finance and international capital flows. The role of international organizations in shaping the global economy is also addressed.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO4014 INTERNATIONAL BANKING

The course provides an overview of the theory and practice of banking. Key topics include the meaning of banking, different types of banks, diversification of banking activities, bank structure and regulation in developed and emerging economies, and financial crises. This course is to develop an understanding of the basic principles of international banking; an ability to successfully apply analytical decision making skills and solve problems; and an appreciation for the relevance of banking theory and its linkage with practice.

Pre-requisite: FINC2000 Financial Management

BECO4015 MANAGERIAL ECONOMICS FOR SMALL AND MEDIUM-SIZED RETAILING ENTERPRISES

The course provides comprehensive discussions and examinations of the economic and business aspects of retail SMEs. It discusses the factors leading to the success and failure of SMEs, introduces issues such as market behavior, business finance, and internal management, associated with SMEs in the global economy, and examines the SMEs in Macao, Hong Kong and the Pearl River Delta.

Pre-requisite: BECO3008 Intermediate Microeconomics

BECO4016 THE SERVICE SECTORS OF MACAO AND THE PAN PEARL RIVER DELTA

This course introduces to students the major aspects of the Macao economy, particularly the service sector, and its economic roles in the Pan Pearl River Delta. It focuses on the economic integration between Macao and the Pan Pearl River Delta, and studies the structural transition process of Macao toward a service-oriented economy and the implications. After this course, students are expected to be able to apply basic economic theories to analyze the development process of Macao and the Pan Pearl River Delta, particularly in the service industries.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO4017 INDUSTRIAL ORGANIZATION AND BUSINESS STRATEGY

This course studies different market structures of one or several identical or similar products in one or multi-periods; firm decision making and strategies, profitability and market efficiency under different market structures; and effects of firm behavior on market structure. Topics include: basic theory – firm and cost; different market structures – competition, monopoly, cooperative oligopoly,

non-cooperative oligopoly, and monopolistic competition; price discrimination; strategic behavior; vertical integration and vertical restrictions; information and advertising; durable good; research and development; government policies.

Pre-requisite: BECO3008 Intermediate Microeconomics

BECO4018 ECONOMIC ANALYSIS OF INVESTMENT PROJECTS

This course aims to introduce to students the basic concerns and techniques used in evaluating business and public projects. Concepts to be covered are capital budgeting, cash flow, risk, strategic options, valuation by ratios, costs and benefit analysis of public projects and decision criterions. The methods in costs and benefits identification and measurement, cost effectiveness analysis for business and public projects and the selection of discount rate are going to be addressed as well. Students are expected to be able to apply the analytical skills learned in this course to evaluate real world business and public projects.

Pre-requisite: BECO1000 Principles of Microeconomics AND BECO1001 Principles of Macroeconomics

BECO7010 STATISTICS AND FINANCIAL ECONOMETRICS

This course introduces the basic tools with the aid of data for decision making in finance. It covers introductory probability, decision analysis, basic statistics, regression, simulation, linear and nonlinear optimization, and discrete optimization. Computer Programming exercises, cases, and examples, deliver in SAS® (by the SAS Institute Inc.) are drawn from asset pricing, market microstructure, derivatives, and other functions.

Pre-requisite: None

BECO7011 ECONOMICS FOR BUSINESS

This course attempts to introduce postgraduate students to the core economic concepts and fundamental principles, with an emphasis on deriving practical implications for real-life managerial decisions. It covers the microeconomics theories of consumer and producer behaviours, market structures and corporate strategies, as well as the macroeconomic analyses on key indicators, government policies, and global issues. The objective is to equip students with a firm grip on economic reasoning, and an enhanced understanding on important contemporary economic topics.

Pre-requisite: None

BECO7350 REGIONAL ECONOMIES AND DEVELOPMENT STRATEGY

This course aims to provide students with a rigorous foundation for regional economic development in theory and practice, with special focuses placed on both the Greater Bay Area and the Belt & Road initiatives. In the course various theories of international trade and economic integrations will be discussed and the resultant redistribution of economic welfare will be analyzed. The course will also review the impacts of regional integration on trade and development, address possible difficulties in carrying out these economic activities, and recommend policy support needed from public institutions for overcoming these difficulties.

Pre-requisite: None

BECO8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

FINC2000 FINANCIAL MANAGEMENT

This course, designed for non-finance students, covers basic principles of financial management in business. It provides students with a scientific framework for evaluating assets and investment opportunities. The course is divided into three parts. The first part discusses about the institutional settings and the relationship among different players in the financial markets. The second part focuses on capital budgeting. Here, different types of investment evaluation

techniques will be discussed and compared. The last part discusses the determinants of the cost of capital – a key variable of capital budgeting.

Pre-requisite: ACCT1000 Principles of Financial Accounting

FINC2001 ADVANCED FINANCIAL MANAGEMENT

This course provides students with a working ability to make financing decisions. It begins with the discussion on dividend and debt policy and how they affect a firm's value. Then, financial statement analysis and financial planning will be presented. Given the importance of the latter, both long-term and short-term planning will be discussed in greater details. While short-term planning concerns with a firm's ability to pay its bills, working capital management focuses on the credit policy, inventory and cash management of a company. Finally, special topics including mergers and acquisitions, international financial management and options will be discussed.

Pre-requisite: FINC2000 Financial Management

FINC2002 STATISTICS FOR FINANCE

This course introduces statistic analysis tools to be used as a basis for developing finance theory. Various statistics models widely used in the financial industry for will be presented. Topics include probabilistic background, point and interval estimation, sample spaces, random variables, independence, discrete and continuous distributions, expectation, correlation, moment generating function, distributions of function of random variables, law of large numbers and limit theorems, sampling theory, order statistics, limiting distributions, point estimation, confidence intervals, hypothesis testing, non-parametric methods, data analysis and implementation of statistical tools in a statistical computational package.

Pre-requisite: ISOM1002 Business Mathematics or GEST1001 Quantitative Reasoning for Business

FINC2003 CORPORATE FINANCE

This course, designed for finance students, introduces basic principles of financial management in business. It provides students with a scientific framework for valuing assets, evaluating investment opportunities, and choosing proper financing methods. The course is divided into three parts. The first part focuses on capital budgeting. Here, different types of investment evaluation techniques will be discussed and compared. The second part discusses the determinants of the cost of capital – a key variable of capital budgeting. The last part overviews corporate financing decision including capital structure decision and dividend policy.

Pre-requisite: ACCT1000 Principles of Financial Accounting

FINC3000 DERIVATIVE SECURITIES

This course is designed for senior undergraduate students to understand and price the basic derivative instruments, with major emphasis on options and futures. The course will start by introducing basic operations of these markets. Students will then apply the knowledge of mathematics of finance to the pricing of derivatives such as options, futures, and swaps. Discussions will then be extended to concepts of risk management such as Value at Risk and the Greeks of derivatives. General topics covered are pricing models, investment strategies and risk management involving the derivatives.

Pre-requisite: FINC2001 Advanced Financial Management or FINC3002 Theory of Finance or FINC3004 Portfolio Management

FINC3001 FINANCIAL STATEMENT ANALYSIS AND VALUATION

This course details financial statement analysis and valuation framework that integrates corporate strategies, financial reporting and analysis, and valuation. Fundamental analysis techniques are also examined with particular emphasis on the application of these techniques in equity valuation. This course is designed primarily for students who expect to be frequent users of financial statements or be involved in equity valuation as part of their profession.

Pre-requisite: FINC3004 Portfolio Management or FINC3002 Theory of Finance

FINC3002 THEORY OF FINANCE

The course aims to provide students with solid theoretical frameworks in asset pricing, corporate finance and other areas in finance. The course will equip students with both conceptual and analytical skills necessary to advance to more specialized courses. For asset pricing, concepts of risk and return are analyzed in the context of formal pricing models such as the Capital Asset Pricing Model and the Arbitrage Pricing Theory. Aspects of efficient market theory and anomalies are considered. For corporate finance, business decisions such as capital budgeting and financing will be discussed.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC3003 FINANCIAL MARKETS AND INSTITUTIONS

This course covers the structure, functions, operations and regulations of financial markets and institutions. Topics include money market; bond market; stock market; foreign exchange market; commercial banks; mutual funds; pension funds; investment banks; insurance companies and venture capital firms. Upon completion of the course, student will have developed a comprehensive understanding of the fundamentals of various financial markets and financial institutions.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC3004 PORTFOLIO MANAGEMENT

This course focuses on the design and management of investment portfolios that meet the targeted investor's objectives. Both passive and active strategies are examined together with an in-depth review of pricing efficiency in securities markets and the implications for portfolio managers. Additional topics include strategies for managing security analysis and stock valuation, international diversification, and portfolio performance evaluation. The aim of this course is to help students:

- To develop an understanding of the basic principal of capital market theories.
- To develop an understanding of the nature and function of derivative instruments.
- To develop an ability to understand the linkage between the capital market theories and investment strategies.
- To develop an ability to apply the capital market theories and investment strategies in planning and administering investment portfolios.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC4000 INTERNATIONAL FINANCE

The objective of the course is to provide a conceptual framework within which the key financial decisions of multinational company can be analyzed. It builds on and extends the principles provided by domestic corporate finance. In addition to the traditional areas of financial management, other decision elements that are peculiar to multinational firm will be discussed. These elements include multiple currencies with frequent exchange rate changes, multiple money markets, economic exposure measurement and management, segmented capital markets, and country risk.

Pre-requisite: FINC2001 Advanced Financial Management

FINC4001 CASE STUDIES IN CORPORATE FINANCE

This is a case-method course in Corporate Finance. Students will learn to make investment and financing decisions in the financial manager perspective and focus on maximizing shareholders' value. This course provides an in-depth study of financial decision making and the process of value creation.

The course objectives are:

- To develop practical knowledge by applying corporate finance theory in setup of cases.
- To widen perspective through analyzing real-life monumental corporate finance cases.
- To learn effective usage of spreadsheet programmes in compiling data, generate statistical results, and produce concise reports.
- To develop essential skills to construct case study reports and to deliver effective presentations.

Pre-requisite: FINC2001 Advanced Financial Management or FINC2003 Corporate Finance

FINC4002 FINANCIAL MANAGEMENT SIMULATION

This is a capstone course in financial management. It is intended to provide an opportunity for students to demonstrate their understanding of the principles of financial management as well as accounting, economics, marketing and production management. The primary focus of the course is on a sophisticated online simulation programme FinGame Online: The Financial Management Decision Game. This interactive tool would enhance students' experiences in applying financial theories.

The course objectives are:

- To develop techniques to link financial theories with practices.
- To apply principles of financial management through active management of simulated companies.
- To understand and appreciate the interrelationships among various types of financial decisions as well as between finance, production and marketing decisions
- To experience the excitement and challenges of managing a simulated company.

Pre-requisite: FINC2001 Advanced Financial Management

FINC4003 RISK AND INSURANCE

This course provides an overview of the principles of risk management and insurance. The focus is on the management of risks by businesses and organizations. However, personal risks are also discussed. Topics on insurance covers the operation of insurance markets, insurance pricing, insurance regulations, insurance products, legal principles of insurance. An introduction of insurance industry in Macao and Hong Kong is covered.

In order to minimize the overlap with other finance courses, this course will not cover derivative instruments and there will be minimal coverage of exchange rate risk and interest rate risk.

Objectives:

- Provide students a conceptual framework for making risk management and insurance decisions to increase business value.
- Acquaint students with the essential details of insurance markets and insurance products.
- Enhance students' ability to apply risk management tools and techniques to solve risk management problems.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC4004 MERGERS AND ACQUISITIONS

This course examines various aspects of mergers and acquisitions (M&A) and corporate restructurings. It surveys the drivers of success and failure in the transactions. Issues regarding motive and strategy will be discussed, with economic implications the main focus of discussions. Students will also apply necessary skills and tools to evaluate and form an opinion about a proposed transaction, from both the acquirer's and the target's points of view. The course will be demanding and assume ability to understand financial statements, as well as familiarity with valuation analysis.

Pre-requisite: FINC2001 Advanced Financial Management or FINC2003 Corporate Finance

FINC4005 FIXED INCOME SECURITIES

This course provides an overview of the techniques available for valuing riskless and risky fixed income securities and their derivatives. Topics include fixed income mathematics, price sensitivity measures, securitization, and interest rate models. This course involves the use of a financial calculator and the development of Excel spreadsheets for solving complex problems.

Pre-requisite: FINC3002 Theory of Finance or FINC3004 Portfolio Management

FINC4006 REAL ESTATE INVESTMENT AND FINANCING

This course aims at enhancing knowledge on real estate investment and financing. Topics on real estate investments include investment and risk analysis, income property valuation and alternative real estate investment vehicles, such as real estate investment trust (REIT) and mortgage-backed securities. Topics on real estate finance include an introduction of mortgage markets, residential mortgage analysis (including Mortgage Pricing, Underwriting, Prepayments and Refinancing) and different types of home mortgage tools. An overview of the Macao Real

Estate Markets, with particular emphasis on its development, transaction costs and transaction procedure, will be presented.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC4007 BEHAVIORAL FINANCE

Behavioral finance is motivated by various financial anomalies that cannot be explained by traditional economic and finance theories. The course introduces extensive experimental evidence on psychological bias in peoples' belief and preferences. It also employs the theory of limits to arbitrage to analyze why irrationality lives. It further discusses the implication of behavioral biases on the financial market, including the aggregate stock market, cross-section of stock returns, individual investors, and corporate finance.

Pre-requisite: FINC3002 Theory of Finance or FINC3004 Portfolio Management

FINC4008 INTERNATIONAL FINANCE AND GLOBAL ISSUES

The objective of the course is to provide a conceptual framework within which the key financial decisions of multinational companies can be analyzed. Topics include exchange rates and currency markets, international money markets, international capital markets, foreign exchange exposure measurement and management, country risk, and other global issues.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC4009 FINANCIAL MODELING

This hands-on courses focus on how to use Microsoft Excel to implement the various financial models taught in the finance programme. Topics include financial statement analysis, leasing, efficient frontier estimation, beta estimation, bond pricing and duration, option pricing, Monte Carlo simulation, Risk models such as Value at Risk (VaR). Students will also learn how to use Macro and VBA in the course.

Pre-requisite: FINC3000 Derivative Securities AND FINC3004 Portfolio Management or FINC3002 Theory of Finance

FINC4010 BANK MANAGEMENT

This course focuses on the advanced techniques of commercial bank management. Topics include bank performance analysis, asset/liability management techniques, investments and liquidity management, deposits and liability management, business lending, consumer lending, loan pricing, bank regulation and capital adequacy requirements.

Pre-requisite: FINC2000 Financial Management or FINC2003 Corporate Finance

FINC4011 GRADUATION PROJECT ON APPLIED FINANCE

This is a capstone course for the 4th year BSc in Finance students. Students will work in groups on a topic of their choice, under the supervision of academic staff members in the department. The nature of the project can be theoretical, empirical or case studies on applied financial problems. The goal is to provide students with opportunities to develop independent thinking and problem solving skills to academic or practical financial problems.

Pre-requisite: BECO2001 Econometrics I AND FINC3004 Portfolio Management

FINC4012 FINANCIAL RISK MANAGEMENT

This course will focus on the identification, quantification and management of market risk, financial risks, credit risk and operational risk of financial institutions and other corporations. Besides covering Value at Risk (VaR) models, the course also deals with issues such as financial regulation and capital adequacy including Basel II. Topics include volatility models, value at risk for stocks, currencies, bonds and derivatives such as futures, forwards, swaps and options; expected and unexpected loss due to credit risks, and operational risk measures.

Pre-requisite: FINC3000 Derivative Securities AND FINC3004 Portfolio Management or FINC3002 Theory of Finance

FINC4013 ADVANCED FINANCIAL MATHEMATICS

This course aims to introduce important ideas in theory of probability and differential equations, and their applications to mathematical finance. Topics include: Finite Probability Spaces, Continuous probability theory, the Laplace transform, the Fourier transform, the diffusion equation, measure and integration, Brownian motion, Ito's Lemma, derivation of the Black-Scholes equation. Pre-requisite: ISOM3033 Advanced Calculus

FINC4014 EXOTIC OPTIONS AND STRUCTURED PRODUCTS

The first part of the course deals with non-standard options such as Asian options, asset or nothing options, binary options, barrier options, quantoes, cliquets, shout options, compound options, rainbow options. The 2nd part of the course deals with how to combine various derivatives with stocks and bonds to create structured products in order to meet the changing needs of customers.

Pre-requisite: FINC3000 Derivative Securities

FINC7010 CORPORATE FINANCE

This course offers students a more advanced understanding of important concepts in the field of corporate finance. It covers basic topics including capital budgeting, alternative valuation methods, capital structure decisions, corporate payout policy, securities offering decisions, as well as more advanced topics (optional) such as corporate governance, mergers and acquisitions, and corporate risk management. The objective of this course is to provide students with essential tools to study more advanced courses in finance.

Pre-requisite: None

FINC7011 MANAGERIAL FINANCE

Managerial Finance is one of the core courses in finance. Everyone cares about real business impact of corporate decision. All businesses have to allocate their resources timely and wisely, finding the right opportunity to invest, seeking the right mix of financing to fund these investments, and returning cash to shareholders if not enough good projects. The most fundamental objective of is to maximize firm value, no matter it is large, publicly listed companies or small, privately run businesses.

The purpose of this course is to introduce you to capital markets in which firms invest and to give you an understanding of important factors that can affect corporate valuation. All of corporate finance is built on three principals, the investment, financing and dividend decisions. Consequently, any decision (investment, financial, or dividend) that increases the value of a business is considered a good one, whereas one that reduces firm value is considered a poor one.

The material in this course will help to evaluate key decisions made by managers of the firm, covering cases in both emerging countries and developed economies. All students of this course should have an international orientation. Besides, we will also analyse firms across their life cycles, especially focus on the estimation of early stage. A startup is not a smaller version of a large company. The subsequent stages of valuation for those young firms can become more explicit since the entrepreneur will have to give up some shares in return for external funding. Topics include advanced capital budgeting and capital raising including venture capital and initial public offerings and mergers and acquisition will also be introduced as a foundation for linked more advanced future studies.

Pre-requisite: BECO7011 Economics for Business

FINC7024 INVESTMENTS AND PORTFOLIO MANAGEMENT

This course focuses on designing and managing investment portfolios for investors. It introduces students to investment media and techniques. It analyzes capital market theories, the pricing efficiency of security markets, investment strategies, and investment performance evaluation. Topics therefore include investor risk preferences, modern diversification theory, securities analysis, asset pricing models, derivative instruments (models and real world behavior), investment strategies. Investment strategies include both the passive and active strategies, technical trading strategies and trading strategies arose from market anomalies.

Pre-requisite: None

FINC7026 INTERNATIONAL BANKING AND BANK MANAGEMENT

This course is structured around the microeconomic problems of financial management of banking firms. It focuses on decision making and offers a unique approach to understanding commercial bank management. Topics to be covered include banking trends and competition, performance analysis, liquidity planning, interest rate risk management, credit risk analysis, cost of funds, and capital management. Both domestic and international banking activities will be examined. The objective of this course is to provide the student with the conceptual framework necessary to analyze and comprehend the current problems confronting managers of commercial.

Pre-requisite: None

FINC7035 FINANCIAL RISK MANAGEMENT

This course focuses on risk management techniques in multinational corporations and credit risk management. A strand of risk management topics would be covered such as foreign exchange, money market instruments, derivative products, risk exposure of corporations, measurement of exposure, and risk management in financial institutions. The credit risk will discuss various economic and financial factors that affect credit quality of corporations, evaluating corporation's debt servicing ability and their likelihood of default. Topics covered will include business and financial risk analysis, debt covenants, security structures, credit scoring and credit rating models.

Pre-requisite: None

FINC7041 ADVANCED TOPICS IN FINANCE

This course covers advanced topics in finance that may arise due to the advances in the areas of corporate finance, investment and banking. The topics will be timely and may arise through emerging theory, new model or empirical research in the finance world.

Pre-requisite: None

FINC7054 INTRODUCTION TO MODERN FINANCIAL TECHNOLOGY

The financial industry is undergoing profound changes in the past several years. With the arrival of new technologies, financial services firms are increasingly using these new technologies to increase their efficiency, develop new businesses and services, and revolutionize their marketing practices. The lines between financial services and technology firms have also blurred, as we are seeing more and more technology companies venturing into the finance industry, particularly in China.

This course aims to provide you with an overview of FinTech and its implications within the finance industry and beyond. We will review companies in the FinTech industry, their businesses, products, and technologies. We will also cover the basic technologies that power the FinTech revolution, such as Artificial Intelligence (AI), Blockchain (B), Cloud Computing (C), and Big Data (D). We will also discuss FinTech's current status and future trends. After this course, you will have a basic understanding of the FinTech landscape and be ready to explore more about it.

Pre-requisite: None

FINC7055 WEALTH MANAGEMENT

The objective of this course is to introduce the financial planning process and apply some of the tools to formulate investment plans for managing, preserving and growing wealth across the client segments the high net-worth individuals.

Pre-requisite: None

FINC7056 MACAO'S ECONOMY

It covers topics on the economic development and transition of Macau; the China-Portuguese speaking countries economic cooperation; integrated resorts, gaming, and hospitality industries in Macau; and banking and finance sectors of Macau. Special topics such as green development projects employed by the integrated resort operators, and Macau's economic collaboration within the Greater Bay Area are discussed. The objective is to provide a foundation of current economic and financial developments in Macau to evaluate gaps and find opportunities for future economic and financial developments.

Pre-requisite: None

FINC7057 FINANCIAL MARKETS AND INSTITUTIONS

This course covers the structure, functions, operations and regulations of financial markets and institutions. It covers the latest developments in the financial industry, such as financial leasing, RMB clearing centres. We examine markets such as bond markets, stock markets, foreign exchange markets including Renminbi market, derivative markets, and will also examine the role of financial institutions such as commercial banks and mutual funds. This course will be helpful to identify potential financial markets developments that are suitable for Macao under the public desires in developing its featured finance.

Pre-requisite: None

FINC7058 INTERNATIONAL FINANCE AND DERIVATIVES

This course is designed for MSc in Finance students to understand international finance and derivative securities. Students will apply the knowledge of mathematics of finance to the pricing and valuation of derivatives in general and currency derivatives in particular, e.g., forwards, futures, swaps, and options. Discussions will be extended to concepts of how to use derivatives to speculate, hedge and arbitrage. General topics covered are pricing models, trading strategies, and risk management using the derivatives.

Pre-requisite: None

FINC7991 PROJECT REPORT

Students are required to identify a real financial issue faced by companies and provide a data driven solution in the Project Report. The issue can come from any finance area, and can be local or international in scope.

Pre-requisite: None

FINC8011 RESEARCH METHODS IN FINANCE AND BUSINESS ECONOMICS

The seminar course provides an overview of various empirical methodologies commonly used in finance and economics research. Topics to be discussed include econometrics of hypothesis testing, regression analysis, endogeneity issues, etc. Research methodologies will be discussed in-depth with the application into specific research papers. Upon the completion of this course, students will be able to develop a critical awareness of research issues, collect data, design appropriate methodologies to analyze the data, interpret the empirical results, and disseminate research through oral presentation and written proposal.

Pre-requisite: None

FINC8012 ADVANCED TOPICS IN FINANCE AND BUSINESS ECONOMICS

The course is designed to introduce important topics in finance and economics with both theoretical and empirical focus.

In the finance section, we will provide students with solid financial theoretical frameworks in four areas, namely, corporate finance, asset pricing, derivatives and behavioral finance. The topics include valuation of stocks and bonds, WACC, capital structure, IPO, risk and return, the equilibrium asset pricing models (CAPM, multi-factor models, etc.), options and behavior finance. Besides theoretical frameworks, recent developments in empirical studies will also be covered. Selected topics from the four finance areas will be discussed intensively through lectures and journal paper discussions.

In the economics section, students will receive necessary basic training in microeconomics, macroeconomics, and econometrics at advanced levels. Such training is designed to get students prepared for theoretical or empirical study in their thesis work. Some specialized topics will be introduced to students for intuitive discussion. They will see how theoretical models are formulated for those topics and how empirical tests are performed to derive significant results. The topics to be presented include export taxation, secured loans, financial crises, global imbalances, financial opening, income inequality, housing bubbles, exchange rates, capital controls, tourism development etc.

Pre-requisite: None

FINC8350 CONTEMPORARY ISSUES IN INTERNATIONAL FINANCIAL MANAGEMENT

This subject exposes students to contemporary issues in financial reporting and corporate disclosures, with particular emphasis on cross-country comparisons of regulatory frameworks, the role of information intermediation, external monitoring by investors, and disclosure regulations. The primary objectives of the subject are to provide students with an indepth understanding of voluntary and mandatory financial reporting and corporate disclosures; and the link between disclosures and the capital markets, as well as with the institutional and legal environments of the economy.

Pre-requisite: None

FINC8351 PROJECT MANAGEMENT

This course guides students through fundamental project management concepts and behavioral skills needed to success-fully launch, lead, and realize benefits from projects in profit and nonprofit organizations. Successful project managers skillfully manage their resources, schedules, risks, and scope to produce a desired outcome. In this course, students explore project management with a practical, hands-on approach through case studies and class exercises.

Pre-requisite: None

FINC8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

IRTM1000 INTRODUCTION TO INTEGRATED RESORT MANAGEMENT

The objective of this course is to acquaint students with the basic structure of hospitality industry and integrated resorts. Topics to be covered include the history and the recent progress of the hospitality industry, fundamentals of tourism industry, principles of restaurant operations and food services, hotel and lodging operations, MICE etc. In addition, principles of leadership and hospitality management will be discussed. After completing this course, students will possess a solid foundation to further their studies in particular subjects of hospitality management.

Pre-requisite: None

IRTM2000 INTRODUCTION TO GAMING MANAGEMENT

This course aims to provide students with an overview of the composition and attributes of the gaming industry. Both demand-side and supply-side issues are to be tackled. In addition, public policy and managerial issues associated with the practice of the gaming and related industries are discussed with reference to the general and unique features of various societies. To enhance students understanding of the characteristics of gambling products, common forms of games offered by the casino are introduced whilst related managerial issues are reviewed. After completing this course, students are expected to possess the basic knowledge to pursue their junior and senior studies in other gaming-related subjects.

Pre-requisite: None

IRTM2001 PSYCHOLOGY OF GAMBLING

This course focuses on the application of psychological knowledge to gambling behaviors. Topics include motivations, decision-making strategies, cognitive heuristics and biases, group and social influences, and pathological addictive gambling behaviors.

Pre-requisite: None

IRTM3000 SOCIAL AND ECONOMIC IMPACTS OF GAMBLING

This course deals with the variety of issues surrounding gambling and commercial gaming in the area of public policy, social and economic impacts. Emphasis will be placed on the costs and benefits analysis of gambling in different domains: individual, household, community as well as macro economy. Special attention will be given to the relationship between gambling, political corruption, neighborhood crime and organized crime.

Pre-requisite: IRTM2000 Introduction to Gaming Management

IRTM3001 QUALITY SERVICE MANAGEMENT

Quality service has been seen as a key marketing tool, playing an increasing role in contributing to customer experiences, determining their current satisfaction level and the possibility of repeated visits. Based on the frameworks of service quality model in services marketing and quality management in general businesses, this course expands to the service management within the hospitality and entertaining businesses. It aims to raise students' awareness of the importance of quality services to the industry success and addresses issues concerning delivering, designing and managing quality service systems at all levels. The role of the customer in service delivery and how this impacts on the operation of a successful service in various organizations are also explored.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3002 CONVENTION AND EXHIBITION MANAGEMENT

The objective of this course is to provide students an opportunity to explore and understand convention and exhibition industry. This course will acquaint students with an overview of MICE industry. Topics to be covered include an overview of MICE industry, physical requirements, marketing, management and operation of convention and exhibition facilities. Emphasis is also placed on the planning and organization of conventions, meetings and exhibitions.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3003 CASINO MANAGEMENT

This course gives students an advanced introduction to the casino environment. At the end of this course, students are expected to demonstrate a strong working knowledge of casino operations and the interrelationship of the casino with other major departments. Casino Management is also designed to introduce students to the development of gaming, the internal and external environment of casinos, marketing strategies, and the social, cultural and economic issues of gaming. In addition, the course will cover such topics as game protection/cheating and scams.

Pre-requisite: IRTM2000 Introduction to Gaming Management

IRTM3004 THE MACAO GAMING AND HOSPITALITY INDUSTRIES

This course familiarizes students with the particular situation, the changing structure and performance of Macao's gaming and hospitality industries. On top of explicating the significance of casino gaming in the Macao economy and conditions to ensure its sustained growth and modern development, recent progress and prospects of the non-gaming hospitality industries and their interrelationship with casino gaming since 2002 will be explored. To accomplish these objectives, historical and cultural settings, institutions and institutional changes associated with the progress of the related industries will be examined extensively.

In addition, reasons and consequences from the in-depth adjustments of the gaming industry between 2014 and 2016 will be uncovered. Moreover, impacts from the recent pandemic to the industry, and potential changes in the industrial organization and performance following the regulatory revisions in 2022 will be explored. Finally, implications from the development of the Pearl River Delta region as a polycentric mega-city region (i.e., the Greater Bay Area project) to these industries will also be underlined.

Pre-requisite: None

IRTM3005 FESTIVAL AND EVENT MANAGEMENT

Festivals and events are seen as unique attractions and image-markers for many tourism destinations, and are playing an increasing role in attracting and retaining customers in the gaming and entertaining businesses. This course aims to enhance students' understanding of the roles and impacts of festivals and events on destinations, with particular reference to the gaming and entertaining industry; and equip them with the knowledge and skills in planning, managing, and marketing events, conventions and meetings, festivals and special events.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3006 HUMAN RECOURSE MANAGEMENT IN INTEGRATED RESORTS

Human resource management is an important field of study in recognition of its growing significance to the Integrated Resort (IR) industry. This course provides an opportunity for students to explore contemporary and emerging human resource management issues faced by various sectors of the industry. Special focus will be diverted to the related issues as presented in the gaming and hospitality sectors. In-class performance is extremely important as it is similar to daily work environment in the hospitality industry.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3007 TECHNOLOGY AND INNOVATION IN THE RESORT AND GAMING INDUSTRIES

This course is designed to introduce students to the strategic applications of information and communication technologies (ICT) innovations in the hospitality, casino, integrated resorts (IR), and tourism industry and to deliver the fundamental understanding of technological advancement in the IR industry. Through case studies and in-class discussions, students will learn how hospitality and IR companies can utilize ICT infrastructures and tools to achieve or maintain their comparative advantages in the market.

Pre-requisite: None

IRTM3008 TRAVEL AND TOURISM MANAGEMENT

This course offers student an introduction to the travel and tourism industries and aims to prepare students to plan and implement various tourism activities and manage different tourism products. Issues in master planning and managing tourism in various geographical and environmental settings will be addressed. Core topics include tourism destination planning, development of tourism products, and marketing strategy. It will also highlight the importance of sustainability and environmental awareness in tourism management.

Pre-requisite: None

IRTM3009 FOOD AND BEVERAGE MANAGEMENT

Food and drink are essential components of any hospitality and tourism industry, including integrated resorts. This course covers the key principles and skills required for the effective management of food and beverage operations. It seeks to develop students' understanding and application of the main strategic, managerial, and operational factors that characterize successful food and beverage management. Topics covered include menu planning, food purchasing, receiving, preparation, producing, serving, and marketing. Students will also learn about current trends, health and hygiene issues, legal requirements, and ethical obligations in the food and beverage industry.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3010 SELECTED TOPICS IN HUMAN RESOURCE MANAGEMENT

This course provides an opportunity for students to explore contemporary and emerging human resource management issues faced by various industries. Special focus will be diverted to the related issues as presented in the gaming and hospitality sectors. Possible topics include, but not limited to, conflict management and team management, cross-cultural human resource management, incentive systems, management education and training. The content of this course will be kept flexible between semesters as to best answer interests of the instructors and the students. In principle, prior approval from the program coordinator is needed for offering this course.

Pre-requisite: MGMT3005 Human Resources Management

IRTM3012 GAMING LAW

The purpose of this course is to familiarize students with various sets of legal rules that apply to the gaming industry in the Macao SAR, focusing especially on casino games of chance. The field is somewhat complex given that the legal regulation of gaming in Macao arises from various legal disciplines. Consequently, the course has an interdisciplinary nature and covers issues of constitutional law, administrative law, tax law, company law, contract law and criminal law.

Pre-requisite: None

IRTM3014 HOSPITALITY AND TOURISM LAW

This course aims to introduce significant laws and administrative regulations governing the hospitality and tourism industries in Macao SAR. The students will have the opportunity to learn legal and regulatory issues facing key activities, including providing travel services, operation of hotel establishments, licensing and running of restaurants and entertainment venues, and provision of various goods and services. The course will introduce the nature of the legal system of Macao SAR and the essential features of its constitutional, administrative, criminal, civil and commercial laws related to the industries. Specific legal topics of public and private law to be covered in the course include law and regulation of hotel operations, travel agencies, restaurants and entertainment services; the legal relation between innkeepers and guests; contracts and civil liability; protection of consumer rights; agency contract and the relation between agencies, tour guides and tourists; prohibition of illegal inn keeping and pensions; regulatory bodies and dispute resolution.

Pre-requisite: None

IRTM3015 REVENUE MANAGEMENT

This Subject of study introduces students to 'Revenue Management' which is a demand based pricing system employed in the hospitality and tourism industry. The use of Revenue Management is seen as a critical change in the setting of price in the hospitality and tourism industry and, coupled with information technology, especially the internet, is having long term strategic impacts on the industry. This unit also explores the role and function of the 'revenue manager' the key executive responsible for managing the pricing and supply policies in hotels and airlines within the hospitality and tourism industry.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3016 CASINO MARKETING

The course aims at giving students sufficient conceptual and theoretical as well as practical knowledge underpinning casino marketing in the context of the fast evolving sub-field of Services Marketing. Services in most developed economies like Macao, is the largest sector contributing to their respective GDP. Tourism and leisure activities (which include gaming and in particular casino) contributes a significant proportion of the value added in the services sub-sector. With projects and case analysis, the students are expected to become familiar with the marketing practices of firms in the industry both here and in the gaming entertainment centers in US, Europe, Australia and other places. The course will be delivered through lectures, case analysis and projects. Together the students are expected to gain an integrated knowledge of both theory and practice and impart in the students some capabilities for undertaking casino marketing planning, execution and evaluation.

Pre-requisite: IRTM2000 Introduction to Gaming Management

IRTM3017 ACCOMMODATION, FACILITIES AND SECURITY MANAGEMENT

The course Accommodation, Facilities and Security Management is broadly divided into three components. The first component embodies the management knowledge required to analyze and appreciate stakeholder needs in terms of hotel feasibility, hotel investment strategies, rate of return on investment, service provider contract negotiation, and necessary compliances in an era of 'asset light' industry expansion. The second component focuses on management procedures for the effective planning and maintenance of hotel services in terms of addressing asset preservation and achieving customer satisfaction. It includes an overview of key facilities management functions (engineering, maintenance, housekeeping, guest related accommodation services and external contracting of services – i.e. outsourcing) and places emphasis on evidence-based management analysis to achieve an appropriate balance between investment interests and customer needs. The final component of the course examines security issues, broadly defined to include asset management and preservation, insurances, and customer and employee security).

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM3018 CASINO MATHEMATICS

This course is designed for students who are interested in application of probabilities, statistics and other quantitative methods in issues that arise in legal commercial industries, especially, in casino industry. Students are expected to be able use the appropriate math tools learnt in the course to analyse the performance of casino games, casino promotions/comps, VIP programs, as well as to monitor and identify suspicious casino tables, etc. They are also expected to be able design a new casino game that is feasible and profitable in the casino floor.

Pre-requisite: IRTM2000 Introduction to Gaming Management and ISOM2002 Statistics and Data Analysis OR IRTM2000 Introduction to Gaming Management and ISOM2003 Probability and Statistics

IRTM4000 STRATEGIC MANAGEMENT FOR THE RESORT AND GAMING INDUSTRIES

This course discusses how corporations should analyse, formulate and implement strategy in gaming and hospitality businesses. Students will learn contemporary tools of strategic management, include analyzing industry attractiveness, determination of competitive advantages and positions, etc. this course provides economic and marketing underpinnings of some of these tools so that students can conduct critical and independent analyses in the gaming and hospitality context. The design of this course is a mixture of strategic tools and case applications.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management & IRTM2000 Introduction to Gaming Management

IRTM4001 RESORT MARKETING AND PROMOTION

The course is designed to provide students with an understanding of the fundamental role of marketing in the hospitality sector. While revisiting basic marketing concepts learned in previous marketing courses, the course will illustrate the application of marketing knowledge onto the hospitality sector. Upon completion of the course, students should be able to analyze the hospitality environment, devise, execute and evaluate marketing plans with reference to the hospitality sector.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM4002 GLOBAL ISSUES IN RESORT AND GAMING MANAGEMENT

This course provides an overview of development and proliferation of gaming and hospitality business in the U.S. and throughout the world over the past decade, as well as the management issues associated with the integration between these two sectors. Focus will be placed on the international aspects of gaming and hospitality development, interrelationship between these two industries, regional cooperation and competition in the tourist market, and public policies issues.

Pre-requisite: None

IRTM4003 PROFESSIONAL DEVELOPMENT IN CONVENTION AND HOSPITALITY INDUSTRY

Being a professional person in the convention and hospitality industry, students need to have strong interpersonal and problem solving skills in interacting with customers. The goals of this course are to equip students with relevant knowledge and to guide them to transform the knowledge into practice within the context of convention and hospitality. At the end of this course, students will be able to develop strong confidence in this professional.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM4004 GAMING MANAGEMENT INTERNSHIP

This course is designed to provide a broad exposure to the operations of gaming industry and knowledge of the structure, goals and work procedures of the agency by participating in guided observations and activities. This work-study programme is limited to Year 3 or Year 4 students who are enrolled in the Gaming Management Stream. Students in the Internship are supervised directly by professionals in the Agency, who communicate directly with the University Instructor. While each learning experience will differ depending on the type of agency, situation, and duration. Instructor will guide and assist the students through their professionally-oriented learning experience. At the end of their internship, students are able to enter their chosen profession with

confidence.

Pre-requisite: IRTM2000 Introduction to Gaming Management

IRTM4005 GRADUATION PROJECT ON GAMING MANAGEMENT

This course is designed to familiarize students with managing academic/business project in relation to the contemporary management issues of the gaming industry. This course is limited to Year-4 students who are enrolled in the Gaming Management Stream. Students are expected to productively take part in a cross-functional project team, conduct extensive studies on selected topics and provide suggestions to address related issues. Findings must be supported by using appropriate quantitative and/or qualitative methods.

Pre-requisite: IRTM2000 Introduction to Gaming Management

IRTM4006 CONVENTION AND HOSPITALITY MANAGEMENT INTERNSHIP

This course is designed to provide a broad exposure to the operations of hospitality industry (including the hotel and the Meetings, Incentives, Conferences & Exhibitions (MICE) industries) and knowledge of the structure, goals and work procedures of the agency by participating in guided observations and activities. This work-study program is limited to Year 3 or Year 4 students who are enrolled in the Convention and Hospitality Management Stream. Students in the Internship are supervised directly by professionals in the Agency, who communicate directly with the University Instructor. While each learning experience will differ depending on the type of agency, situation, and duration. Instructor will guide and assist the students through their professionally-oriented learning experience. At the end of their internship, students are able to enter their chosen profession with confidence.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM4007 GRADUATION PROJECT ON HOSPITALITY MANAGEMENT

This course is designed to familiarize students in managing academic/business project in relation to the contemporary management issues of the convention and hospitality industry. This course is limited to Year-4 students who are enrolled in the Convention and Hospitality Management Stream. Students are expected to productively take part in a cross-functional project team and conduct extensive studies on selected topics and provide suggestions to get around the issues. Findings must be supported by appropriate quantitative and/or qualitative methods.

Pre-requisite: IRTM1000 Introduction to Integrated Resort Management

IRTM4008 QUESTIONNAIRE DESIGN AND SURVEY DATA ANALYSIS

This course aims to teach students a systematic approach in addressing an business concern through effective questionnaire design, appropriate analysis and correct business interpretation. Particularly, in the design stage, students will learn to transform practical business concerns (e.g., poor customer loyalty) into analytical problems (e.g. what are the factors that affects customer loyalty?), decide on the possible variables to be included for study (through literature review, interviews with managers and customers, etc.), and then choose what types of questions to be included in the questionnaire (i.e., which questions had to be answered through analyzing a set of variables?). Students will also learn to select an appropriate analytical method for each problem, conduct the analysis in SPSS, and then interpret the SPSS output results to form useful recommendations for the industry.

Pre-requisite: ISOM2002 Statistics and Data Analysis

IRTM4009 SPECIAL TOPICS IN HOTEL AND RESORT MANAGEMENT

This course aims to familiarize students with the latest issues and topics in hotel and resort management. It allows students to develop skills related to unique aspects of hotel and resort that are not currently covered in other courses in the programme. Special topics may include one or more of the followings: big data in hotel and resort management, cross-cultural management issues, customer relationship management, environmental management, facility management, service quality management, leadership management, and/or other advance topics in hotel and resort management. This course will improve students' global perspectives of the hospitality industry and further enhance their communication skills.

Pre-requisite: None

IRTM7010 INTERNATIONAL INTEGRATED RESORTS MANAGEMENT

This course introduces students with the newest concepts of Integrated Resort (IR) management. It discusses the inner workings of the hotel, gaming, entertainment and resort industry. Aside from the organizational structure and functions of each department, students will gain an understanding of the interaction and the logistics involved in ensuring the constant and uninterrupted output of services across all functions to ensure complete guest satisfaction within an integrated resort setting. This fundamental understanding of operations and basic managerial responsibilities will provide for a deeper and broader appreciation of the complexities and challenges of managing the daily operations of an IR. After completing this course, students will be able to have a fundamental understanding of the integrated resorts from a local and global perspective. Learning outcomes of communication and logistic skills will also be emphasized in this course.

Pre-requisite: None

IRTM7011 INTERNATIONAL HOSPITALITY MARKETING MANAGEMENT

This course seeks to equip students with the key conceptual, analytical and problem solving skills to address marketing problems and decisions. Specifically, it introduces students to various marketing analyses (customer, competitor and company analysis) and marketing strategies. Tools and methods used in planning and implementing the four Ps (product, price, place and promotion) will be explored. Service marketing basics will be emphasized. This course integrates theory and practice within the context of organizations operating locally and globally. After completing this course, students will also be able to advance their research and analytical skills.

Pre-requisite: None

IRTM7012 MANAGING HUMAN RESOURCES AND PERSONNEL PSYCHOLOGY IN INTEGRATED RESORTS

This course aims to develop within students the capacity to understand the complexity of managing people. Participants of this course will carry out an in-depth investigation into such topics as recruitment, compensation, and training. This course will also examine the personnel psychology when managing human resources. It will introduce participants to current debates within human resource management. After completing this course, students will also be able to enhance their communication skills and should be able to formulate organizational strategies for integrated resorts.

Pre-requisite: None

IRTM7013 MANAGERIAL FINANCE IN INTEGRATED RESORTS

This course introduces the principles and practices of financial management. It describes financial decision making processes for firms where the desired outcome is the creation of wealth for shareholders. The first objective is to develop an appreciation for the relevance of financial theory and its empirical validation. The second objective is to provide a set of opportunities to productively link theory with practice. The third and last objective is to let the students understand the process of value creation and the principles of "value based" management. Topics in this course include the time value of money, financial analysis and planning, cost of capital, capital budgeting, capital structure, working capital management, long-term financing decisions, dividends policy, mergers and acquisitions and the international dimensions of finance especially in the integrated resorts and hospitality industry. Research and analytical skills will also be emphasized within the module.

Pre-requisite: None

IRTM7014 INTEGRATED RESORTS MANAGEMENT INTERNSHIP

The internship programme is designed for students who have no prior working experiences in the related hospitality fields. The aim of this programme is to allow these students to get familiar with the hospitality work settings so as to better prepare them to join the workforce after graduation. Students undergoing the internship will be based in a company whose focus is cognate with the gaming and hospitality industry. The nature of the internship will vary depending on the requirements of the company. Students are responsible for searching for their own placements. However, the overall structure and timing must be agreed with the programme director, the

employer and the student. Students will be expected to work full time with the company in the gaming and hospitality industry for a period of at least 560 hours. Students can take the internship programme in the day time. A report has to be submitted after the internship. Students who are working full time with at least 2 years supervisory or managerial experience at the time of application will be able to exempt from this internship course. Students who are working full time without 2 years of supervisory or managerial experience at the time of application will be able to waive from the internship course. All other exempt or waive cases will be subjected to special approval on case by case bases. After completing this internship, students will be able to advance their communicational skills and have a better understanding of the industry in order to formulate organizational strategies for the integrated resorts.

Pre-requisite: None

IRTM7030 MEETING, INCENTIVE, CONVENTION AND EXHIBITION MANAGEMENT

The objective of this course is to provide students an overview of the Meeting, Incentive, Convention, and Exhibition industry. It emphasizes on the advanced knowledge in planning, organizing, staging, marketing and management of conventions, meetings and exhibitions. Case studies and best practices will be emphasized in this course. Students will be able to advance their understanding of the importance of MICE in an integrated resort, formulating strategies in order to improve the MICE business after completing the module. In addition, analytical skills will also be emphasized in this course.

Pre-requisite: None

IRTM7031 EVENT AND ENTERTAINMENT MANAGEMENT

This course focuses on examining the unique characteristics of the event and entertainment industry. It gives advanced knowledge of how to research, organize, stage, manage and market different types of events and entertainment. This course examines the challenges that the industry faces and will cover topics such as basic event industry concepts, feasibility, venues and sites selection, legal compliance, risk management, marketing strategies, sponsorship and event bids. Students will be able to progress their communication, research and analytical skills.

Pre-requisite: None

IRTM7032 FOOD AND BEVERAGE MANAGEMENT

This course focuses on the overview of the management of the food and beverage operations. Topics for discussion include advanced knowledge in food and beverage trends, food and wine pairings, event caterings such as marketing, contract writing, food production, room arrangement, and personnel required for specific catered events and operation issues such as purchasing, service, and cost controls management. Emphasis will be placed on techniques and practices in the food and beverage operations. Case studies and best practices from the industry will be adopted. The importance of communication skills will be advanced in this course.

Pre-requisite: None

IRTM7033 LODGING MANAGEMENT

This course aims to provide students an overview of the lodging management. Students who successfully complete this course will have advanced knowledge of how the lodging industry operates. This course will equip students with the required knowledge and skills that are essential in the lodging industry. Emphasis will be placed on techniques and practices in the lodging operations. Students will also be able to develop an understanding of lodging management from an international perspective and advancing their analytical skills.

Pre-requisite: None

IRTM7034 HOTEL REVENUE MANAGEMENT

This course aims to provide students with concepts of revenue management in the hotel sector and discuss how managers can maximize hotel revenue by using forecast information in capacity management, discount allocation and duration control. Detail discussions will be on how revenue management decisions are affected by group room sales, transient room sales, food and beverage activities, local and are wide activities, special events and seasonality factors. Upon

course completion, students will have further developed their research and analytical skills, with a greater understanding of the strategic perspective in formulating organizational strategies in integrated resorts.

Pre-requisite: None

IRTM7035 GAMING AND CASINO OPERATION MANAGEMENT

This course aims to give students an advanced knowledge to the gaming industry development and management around the world. A central focus will be the rationale of gaming legalization and its economic impacts in different countries. In addition, this course also gives students an overview of the operations in casinos. An emphasis will be on current trends of the casino operations as well as the primary management and financial elements that are unique to operating a casino. Topics will also cover the game protection/cheating and scams, internal theft, and other table and non-table games that are important when managing a casino business. An outcome is that student will have a greater international perspective towards gaming and casino operations management. Communication skills will be advanced after completing this course.

Pre-requisite: None

IRTM7036 CROSS CULTURAL GAMBLING PSYCHOLOGY

This course focuses on the application of psychological knowledge to gambling behaviors. Topics include motivations, decision-making strategies, cognitive heuristics and biases, group and social influences, and pathological addictive gambling behaviors. Students will be able to better formulate organizational strategies for integrated resorts and enhancing both their communication and analytical skills.

Pre-requisite: None

IRTM7037 TRAVEL AND TOURISM MANAGEMENT

This course provides student an overview of the unique characteristics of the travel and tourism industry. It emphasizes on examining advanced knowledge in travel and tourism industry system and will cover issues related to the impact of tourism planning and development. This course is designed to use a practical and pragmatic approach to understand travel and tourism management. Case studies and best practices will be emphasized in this course with global insights and perspectives. Research and analytical skills will be further developed as an outcome of this course.

Pre-requisite: None

IRTM7038 RETAIL MANAGEMENT IN INTEGRATED RESORTS

This course discusses different activities and decisions that retailers face everyday. Students will learn major issues related to marketing and management in retailing. After taking this course, students should be equipped with advanced knowledge of understanding and solving the challenges faced by retail stores especially in integrated resorts, managing and marketing retail operations, as well as communicating effectively with customers. As a result, communication skills will be advanced after completing this course.

Pre-requisite: None

IRTM7039 SERVICE QUALITY MANAGEMENT IN INTEGRATED RESORTS

This course provides students an overview of service quality management in integrated resorts. This course will equip students with the essential knowledge and service quality skills that are required in the industry. Quality analysis and enhancement issues are emphasized. Students will further progress their research and analytical skills as a result of taking this module.

Pre-requisite: None

IRTM7040 SPECIAL TOPICS IN INTEGRATED RESORTS

This course aims to familiarize the students with the latest issues and topics in integrated resort. It allows students to develop skills related to a special aspect of integrated resort not presently covered in the other integrated resort related courses offered in the programme. Special topics may include one of the following: Global Issues in Integrated Resorts Management; Technological

Advances in Integrated Resorts; Cross Cultural Communication in Integrated Resorts Management; Service Quality Management in International Hospitality; Customer Relationship Management in Integrated Resorts; Crisis Management in Integrated Resorts; Leadership in Integrated Resorts; Facility Management in Integrated Resorts; Environmental Management in Integrated Resorts; or other advance topics in Integrated Resorts Management. These courses are designed to improve and progress global perspectives in integrated resort management, with communication skills being further developed.

Pre-requisite: None

IRTM7041 STRATEGIC MANAGEMENT IN HOSPITALITY INDUSTRY

This course provides students with the challenge of integrating different functional skills and applies them to actual business cases especially in the hospitality industry. Consequently, strategic management is a capstone course, where students will deepen their understanding of how competitive advantages, business strategy, corporate strategy, and international strategy impact the success or failure of companies. Research and analytical skills with ability to better formulate organizational strategies will be improved as outcomes for this module.

Pre-requisite: None

IRTM7042 DIRECT MARKETING AND CUSTOMER RELATIONSHIP MANAGEMENT IN INTEGRATED RESORTS

This courses aims to equip students with key knowledge and skills in direct marketing and customer relationship management. It will cover the core elements of customer relationship management and topics such as customer decision making, customer loyalty, strategic formation and key developmental processes of customer relationship management will be included. Advances and critical processes in direct marketing will also be emphasized. Students will be able to diagnose and establish customer relationship management strategies and direct marketing strategies that support integrated resort objectives. Case studies and best practices will be emphasized, with an enhanced ability in communication, research and analytical skills upon course completion.

Pre-requisite: None

IRTM7051 RESEARCH METHODS

This course aims to equip students with the knowledge and skills in conducting research for the hospitality industry. Students will be able to diagnose and identify research problems, collect relevant quantitative and qualitative data, propose alternatives and solutions, and report recommendation to business professionals in the hospitality industry. The ability for students to conduct research and analysis will be enhanced as an outcome from this module.

Pre-requisite: None

IRTM7052 INFORMATION TECHNOLOGY IN TOURISM AND HOSPITALITY INDUSTRIES

This course aims to provide the basic understanding of information technology used in hospitality, casino, integrated resorts, and tourism industry. Students can learn the fundamentals of information technology in hospitality and integrated resort industry. Based on in-class discussion and case studies, the course will facilitate students to have their own perspectives on technology developments and the way of utilizing technologies effectively. Communication and problem-solving skills will be advanced after completing this course.

Pre-requisite: None

IRTM7350 STRATEGIC PRACTICE IN INTEGRATED RESORT MANAGEMENT

This course features a current analysis and examination of the various IR developments within the Asia region, linking theoretical concepts within practical IR considerations. IRs are increasingly a part of tourism and economic rejuvenation and growth but within this are several crucial areas of consideration, foremost portraying a comfortable return on investment to operators and investors given the significant cost and resources needed to develop an IR, with authorities satisfied on the economic and social net benefits through the introduction or expansion of IRs.

Pre-requisite: None

IRTM7991 PROJECT REPORT

Students are required to identify a real business issue faced by companies and provide a data driven solution in the project report. The issue, which can be local or international in scope, may come from any business functional areas in an integrated resorts context.

Pre-requisite: None

IRTM8011 ADVANCED RESEARCH METHODS IN HOSPITALITY AND GAMING MANAGEMENT

This course will provide an overview on various research paradigms and research methods used in various business areas. It is designed to familiarize PhD students with the logic discipline, principles of good research design, and various research processes, methodology and strategies that researchers use to address research questions. Topics include the identification of research problems, development of research hypotheses, research designs, data collection and processing, statistical and/or econometric analyses, and interpretation of results.

Pre-requisite: IRTM7051 Research Methods or equivalent (master level)

IRTM8012 CONTEMPORARY RESEARCH IN HOSPITALITY AND GAMING MANAGEMENT

This core course provides PhD students with a topical foundation in hospitality and gaming management research. It introduces students to basic academic theories and concepts relating to hospitality and gaming management. Students will also learn more about current research in these areas. These knowledge will be critical for students to engage in future high-level hospitality and gaming research. They lay the foundation for the generation of more advanced knowledge in this field.

Pre-requisite: None

IRTM8350 CONTEMPORARY ISSUES IN INTERNATIONAL INTEGRATED RESORT MANAGEMENT

Macao is currently positioned itself as the World Centre of Tourism and Leisure as it develops into a quality international tourist destination. Macao takes leading position about tourism and leisure activities in Greater China area. International Integrated Resort Management (IIRM) is one of signature programmes in UM. The objective of this course is to acquaint students with advanced service strategy in IIRM. Topics to be covered include the world history and the recent progress of the hospitality industry, principles of restaurant operations and foodservices, hotel and lodging operations, transportation, etc.

Pre-requisite: None

IRTM8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

ISOM1001 CONTEMPORARY INFORMATION SYSTEMS FOR ORGANIZATIONS

This course provides a comprehensive introduction to the evolving field of information systems (IS) from an organizational perspective. A wide range of topics are covered beginning with the fundamentals of systems, information, organizations, the underlying information Technology (IT) as well as the ethical issues for IS/IT in today's enterprises. A contemporary perspective on IT is provided by emphasizing current topics (e.g. IT138 infrastructure and the Internet technology) before presenting the E-commerce and E-business developments which are radically transforming the traditional organizations and our lives. Throughout the course, we explore implications of this new IS/IT - digital firm - scenario for corporate management in today's global business environments.

Pre-requisite: None

ISOM1004 APPLIED CALCULUS

This subject is to provide students with basic skills of mathematical analysis, which is the core of many quantitative disciplines such as Optimization, Financial Mathematics, Statistics, and Econometrics. The syllabus emphasizes an approach to mathematics of a more abstract and conceptual kind. This emphasis is designed to help students cope with more advanced mathematics that they will meet in their senior years. Topics include: further techniques of differentiation and integration, improper integrals, Riemann integral, numerical integration, infinite sequences and series, and introduction to Ordinary Differential Equations.

Pre-requisite: ISOM1002 Business Mathematics or GEST1001 Quantitative Reasoning for Business or Equivalent course

ISOM1005 INTRODUCTION TO BUSINESS INTELLIGENCE AND INFORMATION

This is an introductory course which aims to provide students with a general understanding a business intelligence (BI) and the different career options and associated responsibilities of BI professionals. This course will introduce the procedures for the execution of a BI project, various layers of a BI architecture, and what career track one can choose to work on based on your areas of interest in a BI project. Real world exams of BI projects will be presented. Industry leading tools and technologies for BI projects will also be presented.

Pre-requisite: Any course from GE science and technology area

ISOM2002 STATISTICS AND DATA ANALYSIS

This course aims to provide an opportunity for business students to understand and appreciate the broad use of statistics and probability in business world. The objectives are to demonstrate how to summarize, present and analyze data using commonly available statistical computing tools and to introduce the principles and procedures of statistical theories, which are important for making business decisions. The emphasis here is on developing the ability to effectively communicate statistical data and the results of analysis.

Pre-requisite: ISOM1002 Business Mathematics or GEST1001 Quantitative Reasoning for Business or Equivalent course

ISOM2005 LINEAR ALGEBRA

This course equips students with basics of linear algebra. which has wide applications to diverse areas in natural science, engineering, business and social science. It covers linear equations, matrices, determinants, vector spaces, linear transformations, inner product and orthogonality, eigenvalues and eigenvectors, least squares problems and quadratic forms. The course emphasizes matrix and vector calculations, and its applications to finance and statistics.

Pre-requisite: ISOM1002 Business Mathematics or GEST1001 Quantitative Reasoning for Business or Equivalent course

ISOM2006 E-COMMERCE AND M-COMMERCE STRATEGIES

This course examines the linkage between organizational strategy and electronic methods of delivering products and services in the Web as well as mobile environment, and information technology strategies and technological solutions for enabling effective business processes. It presents the theoretical foundations necessary for understanding ecommerce and commerce, ranging from consumer behavior to economic theory of competition. Topics such as commerce types, e-strategy, e-commerce economics, m-commerce types, m-strategy, social networking, mobile marketing, social marketing, local and location-based marketing, collaborative commerce, and Webbased supply chain systems are presented from the theoretical point of view as well as from the application side.

Pre-requisite: Any course from GE science and technology area

ISOM2007 PROGRAMMING FOR BUSINESS ANALYTICS

This course introduces the foundation of programming for data analysis with Python. This course is meant for students to get acquainted with key programming and design techniques as well as various libraries of Python, allowing them to understand, analyze, and solve data analytical problems through programming. It involves both theoretical and practical components. Upon the

completion of this course, students are expected to have a solid foundation on the basic concepts of programming and technical skills required for scientific computing problems.

Pre-requisite: Any course from GE science and technology area

ISOM3000 DATABASE MANAGEMENT

Database management is the foundation of any information systems. In this course, students will have ample opportunity to learn the theoretical concept of relational database in the context of information systems. Database management systems are used to effectively store, access and manipulate data as well as provide data security, data sharing and data integrity. This course emphasizes on both theories and hands-on experiences and most of the concepts will be explained through practical examples. The course work includes a term project in which students are required to design and implement a relational database for business firms. Microsoft ACCESS and PHPMyAdmin will be used as the main software package for students to gain hands-on experience. In-depth tutorials on commercial database management systems including Oracle and SQL Server will be given as well.

Pre-requisite: Any course from GE information technology and knowledge society or any course from GE science and technology area

ISOM3002 ANALYSIS AND DESIGN OF INFORMATION SYSTEMS

The objective of this course is to provide students a theoretic foundation and technique of system analysis and design. To understand the importance of system analysis, information system concepts and techniques for data collection will be introduced prior to covering analysis and modelling tools. Discussion of process specifications and structured decisions, cost/benefits analysis and preparation of system proposal will be covered. Lastly, a variety of development tools will be introduced. Upon completion, students should be able to analyse and design different real systems.

Pre-requisite: Any course from GE information technology and knowledge society or any course from GE science and technology area

ISOM3011 MOBILE APPLICATION DEVELOPMENT

Nowadays, smartphones are very popular. One of the major reasons of its popularity is the availability of mobile apps that can be used for personal or business purposes. Mobile apps offer a convenient way to mobile users as they can use the apps anywhere in their smartphones. Currently, Android powers the majority of smartphones. The course is designed to teach students how to make a new Android app from scratch. The students are required to use the tools and technologies, including Java, XML and Android SDK, to create Android apps. At the end of this course, the students can learn all the basics of the platform and all the skills that an Android app developer needs to be successful.

Pre-requisites: ISOM3000 Database Management System and ISOM3013 Advanced Business Programming OR CISC3000 Introduction to Database Systems and CISC3008 Programming Language

ISOM3012 WEB SITE DESIGN AND INTERNET BUSINESS APPLICATIONS

This course provides students with the knowledge and skills needed to build and design web applications. Students will be exposed to best practices for analyzing, designing, developing, testing, and deploying web applications. Students will also be taught the skills required for developing seamless and integrated service for businesses in the internet.

Pre-requisite: ISOM3028 Advanced Computer Programming

ISOM3014 ADVANCED COMPUTER NETWORKING FOR BUSINESS

This course is an advanced networking course for business students. As computer networking is a one of the major components to support big data and business intelligence for business operation. In-depth knowledge for modern networking technologies is definite advantages for career development. Topics to be covered include basic enterprise network architectures, enterprise network construction; IP addressing; Internet Protocols; IP frame forwarding, filtering and routing; and different computer networking services.

Pre-requisite: ISOM3016 Computer Networking For Business

ISOM3015 BIG DATA MANAGEMENT

Traditional relational databases systems and data warehouse platforms are no more enough to manage big data. This course discusses concepts, management, analytics and impact of big data on nowadays environment. It introduces the core technologies for big data management, and architectures and ecosystems, and helps students gain knowledge in designing, managing and evaluating big data solutions. By working on lab exercises and group project, students will develop skills in solving big data management problems in real-world business contexts.

Pre-requisite: ISOM3000 Database Management

ISOM3016 COMPUTER NETWORKING FOR BUSINESS

This course covers topics on network applications, network administration, telecommunications and issues related to computer networking for business. Students will also have the opportunity to have a hands-on approach to build a computer network. As computer networks are essential in modern business transactions, this course is required for all business students.

Pre-requisite: None

ISOM3018 BUSINESS DATA MINING AND VISUALIZATION

This course provides a comprehensive discussion to data mining (DM) problems, and introduces DM tools to enhance business decision making in common business contexts – accounting, sales, marketing, customer relationship management, etc. Through this course, students will understand the process and concepts of data mining approach, be familiar with mainstream techniques and their potential pitfalls when delivering business intelligence solutions, and be able to adopt appropriate data visualization tools to create and study the visual presentation of data. Students will work extensively with commonly used business data mining software in analyzing realistic business datasets. Upon the completion of this course, student will gain data analytical skills for effective digital storytelling, business communication, and presentation.

Pre-requisite: None

ISOM3025 BUSINESS MODELING AND SIMULATION

The purpose of the course is to provide an understanding of the principles of simulation methods and their application to a variety of common management decision problems. On successful completion of the subject student will understand the principles of simulation techniques, appreciate the advantages and disadvantages of simulation methods, and be able to recognize business problem types that can or must be approached using simulation

Pre-requisite: FINC2002 Statistics for Finance or ISOM2002 Statistics and Data Analysis or ISOM2004 Data Analysis and Modelling

ISOM3028 ADVANCED COMPUTER PROGRAMMING

This is an advanced course in software development using the programming language C++ or Java. Students are to study algorithms design of programmes with a background of data and file structures and some advanced features of the objective-oriented programming language. At completion of this course, students should be able to use the tools and techniques introduced to develop well-structured and fully documented programmes to solve business problems of various types.

Pre-requisite: ISOM2007 Programming Business Analytics or ISOM3029 Computer Programming using C++

ISOM3029 COMPUTER PROGRAMMING USING C++

This course provides an introduction on business programming. It covers basic concepts of structured programming and programming languages, techniques of programme structure and algorithm design, the data/object types, the control structures, the functions and libraries, arrays and input/output and friendly user interface. One core issue of the course is to emphasize on the problem-solving skills and the structured programming techniques through some business examples, especially some finance examples. Upon completion of this course, students are

expected to have sufficient knowledge and skills to define cost effective algorithms for both business and system applications.

Pre-requisite: None

ISOM3030 QUANTITATIVE DECISION ANALYSIS

This course provides a survey of the quantitative techniques that are used by modern managers. Topic coverage will focus on model building, linear programming methods, network models, and regression models. Emphasis is placed on the use and limits of these quantitative methods. Model analysis will be done using EXCEL and related Add-ins.

Pre-requisite: FINC2002 Statistics for Finance or ISOM2002 Statistics and Data Analysis or ISOM2003 Probability and Statistics

ISOM3031 FORECASTING MODELS IN BUSINESS

This course provides students with an understanding of the theory and practice of business forecasting, as applied to real data and practical problems in forecasting. In particular, students will be taught the formal procedures of identifying and understanding characteristics of time series data in business and economics, and the basic skills for developing and analyzing models for forecasting time series data. At the end of the course, students should be able to use a standard computer package to carry out these analyses.

Pre-requisite: ISOM2002 Statistics and Data Analysis or ISOM2004 Data Analysis and Modeling

ISOM3033 ADVANCED CALCULUS

The course introduces concepts and skills of calculus of functions of several variables and the basic theory of differential equations, as well as Fourier analysis and calculus of variations that are useful to understand other mathematical techniques applied to modelling in the financial markets. The emphasis will be on the basic understanding of the concepts, techniques and applications.

Pre-requisite: ISOM1004 Applied Calculus

ISOM3035 OPERATIONS MANAGEMENT

This course is intended to be a survey of operating practices and models in both manufacturing and service oriented firms. It is intended to equip students with sufficient knowledge concerning the operations function and to better prepare them to make informed "total business decisions". It also introduces students to standard terms and concepts for communications with operations personnel. In such a course, it should be recognized that breadth of subject matter, not depth of topic, will be the goal. We will often use cases for classroom discussion. Operational issues to be discussed include designing, acquiring, operating, and maintaining the facilities and processes; purchasing raw materials; controlling and maintaining inventories; and providing the proper labor needed to produce a good or service so that customers' expectations are met.

Pre-requisite: FINC2002 Statistics for Finance or ISOM2002 Statistics and Data Analysis or ISOM2004 Data Analysis and Modeling

ISOM3036 CYBER SECURITY AND BLOCKCHAIN

This course aims to provide students with the knowledge and skills necessary to identify security threats and vulnerabilities that may arise in an Internet-based business environment as well as to evaluate and implement protective measures. Topics to be covered include cyber security threats; types of malware, attack vectors, and prevention; risk analysis and management; authentication with access control, passwords, two-factor authentication; symmetric and asymmetric cryptography; network security such as firewalls, virtual private networks, intrusion detection / prevention; and Blockchain concepts, benefits, issues, and real world application examples to support students in understanding how blockchain may improve data security in the cyber space.

Pre-requisite: Any course from GE science and technology area

ISOM3037 INTERNET OF THINGS AND CLOUD COMPUTING

The explosive proliferation of the Internet of Things (IoT) is digitalizing the world, increasing the volume of big data, and fueling the rapid development of business intelligence and data analytics.

At the same time cloud computing enables the achievement of coherence and economies of scale through sharing of resources. This course is designed with two parts which offers students with a comprehensive understanding from the technical view, while emphasizing the socio and economic impacts, of IoT and cloud computing. Part One overviews the current components of typical IoT devices, IoT design considerations, design trade-offs of hardware and software, and technological constraints and limitations; Part Two introduces the fundamental understanding of cloud computing, cloud segments, and cloud deployment models. Cloud services, cloud security, and economic impacts of cloud computing adoption will be provided. This course also discusses a variety of business application scenarios of IoT and cloud computing via case studies.

Pre-requisite: Any course from GE science and technology area

ISOM3038 FINANCIAL TECHNOLOGY

Financial technology (FinTech) is exerting tremendous impact on financial industries. This course offers students with empowering and practical knowledge on FinTech, helping them understand the disruptions happening now and will happen in the future in the financial services. Students will gain a broad understanding of cryptocurrencies, blockchain, smart contract, decentralized applications, P2P lending, crowdfunding, and machine learning. Students will also acquire practical skills to deliver prescriptive solutions to business and financial problems in the real-world.

Pre-requisite: CISC1000 (Information Technology Fundamentals and Practices)

ISOM4005 BUSINESS PROJECT MANAGEMENT

This course covers the principles, processes, and strategies of project management for businesses. Students learn the roles and responsibilities in a typical project management team throughout the project life cycle. The course emphasizes the 10 areas of Project Management Body of Knowledge (PMBOK®) — project integration management, project scope management, project time management, project cost management, project quality management, project resource management, project communications management, project stakeholder management, project risk management, and project procurement management. Quality standards and market trends affecting project management are introduced, such as International Organization for Standardization (ISO), Six Sigma, globalization, outsourcing, virtual teams, and agile project management.

Pre-requisite: Any course from GE information technology and knowledge society or any course from GE science and technology area

ISOM4006 PROJECT AND QUALITY MANAGEMENT

This course aims to familiarize students with the fundamental concepts of the environment and process of project management, so they will be able to productively take part in a cross-functional project team and potentially lead a real-world business project. Students will learn to understand the common practices and issues in project planning and control, and to effectively make use of project management techniques and tools to ensure that the project meets its deliverables and is completed on schedule and within budget. Topics to be covered include: the project life cycle; project planning and organizing; project scope and time management, resource considerations, project budget and control, leading project teams. Basic quality management concepts will also be introduced and applied to project planning and execution.

Pre-requisite: FINC2002 Statistics for Finance or ISOM2002 Statistics and Data Analysis or ISOM2004 Data Analysis and Modeling

ISOM4007 GRADUATION PROJECT

This course is the capstone of the Business Intelligence and Data Analytics (BIDA) programme. Students will group in teams to undertake a full end-to-end development of a solution to address a real-world data analytics problem. The project involves initial problem definition, conceptualization, data collection, data analytics, and solution delivery.

Pre-requisite: ISOM3018 Business Data Mining and Visualization and ISOM4008 Machine Learning for Business Intelligence

ISOM4008 MACHINE LEARNING FOR BUSINESS INTELLIGENCE

This course helps students make sense of business datasets using programming languages for machine learning and visualization. The course provides students with an understanding of a scientific procedure for systematic data analytics. It introduces the popular algorithmic solutions to big data exploration, supervised learning, unsupervised learning, and visualization. Upon the completion of this course, student will gain data analytical skills for common machine learning and visualization problems in business domain.

Pre-requisite: ISOM2007 Programming for Business Analytics

ISOM7010 BUSINESS TECHNOLOGY MANAGEMENT

This course introduces the application of business process and technology management in the workplace and equips students with the required knowledge and skills. Topics include concepts of the information systems (IS) and its strategy in the net-mediated and global economy, the elements of a business process, business process changes with IT, the establishment of process standards and tools, implementation issues, strategic technology management and emerging industries, benchmarking, knowledge management, as well as new business paradigms and models.

Pre-requisite: ISOM7001 Statistics

ISOM7012 STATISTICAL ANALYSIS AND APPLICATIONS

This course aims to introduce postgraduate students to basic statistical techniques for analyzing data in business world. The objective is to provide an opportunity for students to learn how to effectively choose the correct statistical techniques and communicate sample data and results of analysis. The emphasis is placed on how to run data analysis with the use of statistical softwares in order to achieve the above objective.

Pre-requisite: None

ISOM7013 INFORMATION MANAGEMENT AND DIGITAL INNOVATION

This course emphasizes the strategic and management issues associated with the effective use of information technology. Topics in this course include information systems (IS), databases, enterprise applications, technology trends, business models, network effects, disruptive technologies, big data, business intelligence, and digital innovations. The course will provide students with an understanding of how IS can affect an organization's processes and operations, and impact its strategic and competitive advantages. It will help students to (1) recognize the strategic role of IS in contemporary business organizations, (2) understand the key concepts and issues related to new business models, and (3) understand how emerging information technology influences business firms of the future.

Pre-requisite: None

ISOM7015 FUNDAMENTALS OF BUSINESS ANALYTICS

This fundamental course introduces basic concepts of big data, descriptive analytics, predictive analytics, and related tools. It elaborates on practical topics like data collection, data exploration, feature selection, data transformation, data visualization, data mining, model evaluation, and business insights deriving. The hands-on case studies mainly focus on using Python programming to implement data analysis processes in business contexts. Popular analysis tools, including NumPy, Pandas, seaborn, SciKit-Learn, etc. will be employed for tutorials and exercises. It will also discuss privacy concerns and responsibility issues related to data analysis. This course will set the foundation for other courses in this program.

Pre-requisite: None

ISOM7016 STATISTICS FOR BUSINESS ANALYTICS

The purpose of this course is to improve students' analytical skills by covering the fundamentals of data-driven decision making. It introduces students to modern data analysis using R, with an emphasis on business applications. Main topics to be covered include data wrangling, exploratory data analysis, statistical inferences, regression analysis, and time series analysis. Students will have the ability to apply these skills to real-world business issues.

Pre-requisite: None

ISOM7021 BUSINESS MODELING AND DECISION ANALYSIS

Business Analytics help optimize decisions for the design and management of operations systems and production processes. This course introduces concepts and tools for modelling and optimizing business decisions. Emphasis is on problem formulation, solution development, and managerial insights delivery. Decision on problems in various business scenarios, such as production, marketing, manufacturing, transportation and the like will be extensively discussed. R language will be used as the primary analytical tool.

Pre-requisite: None

ISOM7022 DATABASE AND BIG DATA MANAGEMENT

Analyzing structured data requires understanding the fundamentals of relational databases and practical skills in Structured Query Language (SQL). In addition, the rapid development in social media and smart devices resulted in an explosion of semi-structured or unstructured data available for analysis. New data management techniques hence need to be adopted to handle a large amount of data for analysis. This course emphasizes database concepts and practical skills to analyze structured data through SQL. This course also introduces network risk management, which helps organizations identify and mitigate potential cyber threats, maintain network stability, and ensure secure data process and analysis. In addition, the new trends of data management will be covered. Finally, techniques used to process big data such as Apache Spark and PySpark will be introduced.

Pre-requisite: None

ISOM7030 SERVICE OPERATIONS

This course provides an overview of supply chains and operations management. It also contains an analysis of policies, decisions and systems that produce goods and services and an examination of the role of comprehensive planning, materials management, resource scheduling, distribution systems, and system location in service operations. Quality analysis and enhancement issues and processes are also introduced.

Pre-requisite: None

ISOM7031 MACHINE LEARNING WITH BUSINESS APPLICATIONS

Machine learning is a key component of big data analytics, business intelligence, and fintech. This course introduces machine learning techniques and focuses on insights about structuring business problems and implementing machine learning-based solutions.

This course will introduce state-of-the-art machine learning techniques, including clustering, classification, ensemble methods, and neural networks, with a special focus on their applications. Students will learn in-depth knowledge of machine learning and apply the acquired skills to deliver effective solutions. This course will elaborate the hands-on use cases of machine learning solutions for customer retention, product recommendation, risk analysis, demand prediction, etc. in businesses. Python and the state-of-the-art machine learning packages will be used as the primary tools. The issues in responsible machine learning will also be discussed.

Pre-requisite: None

ISOM7032 SOCIAL NETWORK AND TEXTUAL ANALYSIS

Social media is a rich source of big data. Knowing the most effective ways to mine social media data can help firms acquire information and derive insightful business results. Social media is unstructured and dynamic, thus requiring new analytical tools and techniques for analysis. This course aims to provide hands-on experience for students to use various tools and techniques specifically geared to social media to understand customers' trends, and make predictions that can improve sales growth. Practical business cases in user segmentation, customer review analysis, community structure mining, influencer detection, etc., will be discussed. Python and the state-of-the-art machine learning packages will be used as the primary tools.

Pre-requisite: ISOM7031 Machine Learning with Business Applications

ISOM7033 TOURISM ANALYTICS

This course introduces data-driven approaches to deriving business insights for tourism. The

course first overviews the fundamentals and concepts associated with analytical approaches to tourism management decision-making. Then the key quantitative and analytical tools for tourism management are elaborated. This course also discusses the future development of smart tourism and tourism analytics. Students will gain hands-on experience by solving various practical problems using analytical programming.

Pre-requisite: ISOM7015 Fundamentals of Business Analytics

ISOM7041 ECONOMETRICS AND HIGH-DIMENSIONAL DATA ANALYSIS

This course introduces the principles and techniques for econometric modeling of real data in various business domains. The basic ideas and important techniques for causal inference will also be covered. This course will also elaborate on the modern analysis of high-dimensional business data. The primary topics include multiple testing, methods for causal inference, singular value decomposition, principal component analysis, factor analysis, penalized regression analysis, and classification analysis of high-dimensional data. This course includes hands-on analysis of real-world business cases from domains such as finance, marketing, supply chain management, and manufacturing to apply the econometric and high-dimensional analytical techniques. Students will use R to analyze complex data sets to solve predictive problems in various business functions.

Pre-requisite: ISOM7016 Statistics for Business Analytics

ISOM7098 PROJECT REPORT

This course is a practical project course in which students will ground on theoretical concepts and apply practical skills to address relevant business problems. The students, under the supervision of their supervisor, will identify a relevant analytical problem and offer a data-driven solution that adheres legal, ethical, and professional codes. The results will be summarized into a written report and explained in an oral presentation.

Pre-requisite: None

ISOM7300 PROJECT MANAGEMENT STRATEGY

This course offers insights into the frameworks, methods, techniques, and tools for coping with the 10 areas of Project Management Body of Knowledge (PMBOK). In addition, global project management challenges in terms of political, economic, infrastructure and logistics, cultural, and legal issues will be discussed. International case studies support students in bridging what they learn with real world practices. Group projects allow students to apply their knowledge to project management challenges and issues. Upon completing the course, students are expected to understand the critical issues and processes in project management.

Pre-requisite: None

ISOM7350 DIGITAL STRATEGY FOR BLOCKCHAIN AND FINTECH DEVELOPMENT

Technological innovations is playing an important role in creating and sustaining competitive advantage. This course will introduce the core concept of blockchain and its latest applications in the delivery of financial services from the strategic management perspective. Management issues related to the adoption and use of blockchain and fintech will be highlighted. The purpose of this course is to develop the capacity of students to analyze business problems and identify appropriate IT-based solutions to achieve business-IT alignment. Case studies and group projects are important features of this course.

Pre-requisite: None

ISOM7351 LOGISTICS AND SUPPLY CHAIN MANAGEMENT

Supply Chain Management is a core function in modern business, irrespective of industry or size. The purpose of this Logistics and Supply Chain Management course is to provide students with a solid understanding and insight into the fundamentals of supply chain management. Key areas covered by the course include, among others, supply chain strategies, planning and inventory management, procurement and logistics management. After completing this course, students are expected to understand the key concepts and techniques to manage and improve supply chain processes.

Pre-requisite: None

ISOM8011 QUANTITATIVE RESEARCH METHODS IN DECISION SCIENCES AND INFORMATION SYSTEMS

This course will provide an overview of various quantitative research paradigms and methods in decision science (DS) and information systems (IS). It is designed to familiarize PhD students with data analytical skills in DS/IS discipline, principles of good research design, and various research processes, methodologies, and strategies that researchers use to address research questions in DS/IS. This course aims to help students develop new research ideas by analyzing various topical issues in recent literature.

Pre-requisite: None

ISOM8012 ADVANCED TOPICS IN DECISION SCIENCES AND INFORMATION SYSTEMS

The course covers some advance topics in decision sciences and information systems including statistics analysis, game theory, stochastic models, supply chain management, data analysis and database management. The first half of the course will be in lecture format, with the second half devoted to letting students develop and present some topics relating decision science and write individual research reports.

Pre-requisite: None

ISOM8300 TECHNOLOGY ADVANCEMENT AND APPLICATION FOR BUSINESS MANAGEMENT

Technology in business is a growing necessity. As the years go by, the business world is leaning more and more toward it, making it almost impossible to separate the two from each other. Innovation breeds business, and since technology paves the way for it, it can be gathered here that business needs technology to be sustained. This course offers multiple independent sessions discussing how advanced technology is now applying in doing research, innovation and entrepreneurship, and influencing business administration and management in the modern world. Many state-of-art technology will be discussed.

Pre-requisite: None

ISOM8350 STATISTICAL ANALYSIS FOR BUSINESS AND MANAGEMENT RESEARCH

This course is designed for DBA participants who want to learn or to refresh their understanding of basic to more advanced statistical applications that are commonly used in management research (both academic and industrial). This course will be much more practical and "hands on" than theoretical. In that sense, it is much more about data analysis than statistics, per se. Emphasis will be on such matters as inputting data, transforming and manipulating data, formulating strategies for data analysis, strategies for analyzing a database, performing statistical techniques using common software packages, interpreting results and formulating the next steps.

Pre-requisite: None

ISOM8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

MGMT1000 PRINCIPLES OF BUSINESS MANAGEMENT

This is an introductory course regarding the nature and environment of business and its role in the society. It also provides an overview of the concepts related to basic functions of management.

Pre-requisite: None

MGMT2000 BUSINESS COMMUNICATIONS

This is an introductory course regarding practical and professional understanding of business communication skills and core competencies needed to deal effectively with internal and external audiences. Applications of communication theories will also be covered. Students will also learn

to effectively produce and present various data and information convincingly and professionally.
Pre-requisite: MGMT1000 Principles of Business Management

MGMT2001 ORGANIZATIONAL BEHAVIOR

Organizational Behavior (OB) is the study of human behavior within organizations. It looks into the many factors that have an impact on how people and groups act, think, feel and respond to work and organizations, and how organizations respond to their environments. The course focuses on the key concepts and theories from behavioral and social sciences that form the bases for understanding human interaction in the workplace. It covers a wide range of topics that include values, perception, personality, motivation, decision making, group processes, communication, leadership, and power and politics. After completing this course, students should be able to: understand the basic concepts and theories related to managers and employee behavior; apply the concepts and theories introduced to solve problems in an organizational context; and develop a better appreciation of their own values, ability and personality.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT3000 GLOBAL BUSINESS ENVIRONMENT

This course introduces students to the dimensions and complexity of global business environment. Students will learn what modern business corporations need to adapt in the global business environment and develop individual sensitivity and competence in the global work context.

Pre-requisite: MGMT1000 Principles of Business Management AND MKTG2000 Principles of Marketing

MGMT3001 INTERNATIONAL MANAGEMENT

This course is a study of international management issues with an aim to improve managerial effectiveness and organizational performance in a global environment. Several organizational and behavioral issues will be examined in an international context, which include ethics, management of international operations and control, motivation, leadership, communications and negotiation, and corporate culture. Theories of cross-cultural differences will also be discussed in depth.

Pre-requisite: MGMT3000 Global Business Environment or ISOM3026 E-Business and Global Business Environment or BECO3010 Global Economic Issues and Business Implications

MGMT3002 COMPETITIVE ADVANTAGE

This course intends to provide a fundamental analysis on how firms can gain competitive advantage in single and multiple businesses. It draws on recent contribution to the analysis of competitive advantage by focusing on the need to identify, develop and exploit firm resources and capabilities, and exploring the industry dynamics to offer insight into the sources of success and guidance in the formulation of competitive strategies.

Pre-requisite: MGMT3003 Strategic Management

MGMT3003 STRATEGIC MANAGEMENT

This course introduces students to the process of strategy formation, formulation, and implementation. Students learn to integrate functional knowledge in business and to apply strategic management tools in case studies.

Pre-requisite: MGMT1000 Principles of Business Management AND FINC2000 Financial Management or FINC2003 Corporate Finance AND ACCT1000 Principles of Financial Accounting

MGMT3004 RESEARCH METHODS

This course prepares students to understand the role and importance of research in business. It also enables students to plan methodologically sound research studies, to execute them, and to analyze research results. Knowledge and skills acquisition include: problem identification; literature review; theoretical framework development; hypotheses formulation; research design selection, data collection, data analyses, report writing, and differentiation between sound and unsound research. Students are required to conduct a research project as group.

Pre-requisite: MGMT1000 Principles of Business Management AND MKTG2000 Principles of Marketing AND ISOM2002 Statistics and Data Analysis

MGMT3005 HUMAN RESOURCES MANAGEMENT

The course provides students an overview of contemporary theory, analysis, and practice in the field of human resources management (HRM). It introduces students to the fundamental and strategic role of HRM in today's organizations. It aims to develop in the students a stronger capacity to grasp the complexity of managing people and the ability to form intelligent opinion about various challenges facing HR practitioners. Broad areas of concern include the main HR functions such as recruitment, selection and retention of human resources, training and development of people, employee assessment and compensation.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT3006 HUMAN RESOURCES PLANNING AND STAFFING

The course focuses on the crucial role of planning and staffing in the overall human resource strategy of the company. It aims to familiarize students with the knowledge and tools to assess the future supply and demand for human resources in organizations, and the methods to attract, select and retain qualified employees. Students will find many opportunities in both classroom discussions and field research to test the congruence of theory and practice. In the process, they should be able to enhance their analytical and problem-solving skills.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT3007 ORGANIZATIONAL CHANGE AND DEVELOPMENT

Organizational Behavior (OB) is the study of human behavior within organizations. It looks into the many factors that have an impact on how people and groups act, think, feel and respond to work and organizations, and how organizations respond to their environments. The course focuses on the key concepts and theories from behavioral and social sciences that form the bases for understanding human interaction in the workplace. It covers a wide range of topics that include values, perception, personality, motivation, decision making, group processes, communication, leadership, and power and politics. After completing this course, students should be able to: understand the basic concepts and theories related to managers and employee behavior; apply the concepts and theories introduced to solve problems in an organizational context; and develop a better appreciation of their own values, ability and personality.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT3008 QUALITY MANAGEMENT

This course introduces students to the core concepts and techniques of total quality management (TQM) and its implementation in organizations. Major topics include the evolution of the Quality Management concepts, quality control circles, quality enhancement tools, and the implementation of TQM. At the end of the course, students are expected to understand the underlying philosophy of TQM, evaluate the strengths and limitations of some quality systems such as ISO9000, and appreciate the challenges of sustaining an organization which is capable of delivering a quality product.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT3009 BUSINESS ETHICS AND CORPORATE SOCIAL RESPONSIBILITY

The aim of this course is to provide students with the knowledge, critical thinking skills and understanding to make ethically sound business judgments and decisions when faced with complex and difficult problems. In this course, students will have an opportunity to build a strong foundation for their own ethical development as a citizen, employee, manager or corporate leader.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT4000 GLOBAL STRATEGIC MANAGEMENT

The course takes a global perspective in the strategic management process and discusses how multinational corporations should formulate and implement strategy in various regions of the world. It covers contemporary tools of strategic management and their applications to multinational

corporations.

Pre-requisite: MGMT3003 Strategic Management

MGMT4001 GLOBAL HUMAN RESOURCES MANAGEMENT

This course examines key problems and issues regarding management of global human resources. These include how recruitment and selection, training and development, compensation, performance evaluation should be done for multinational corporations. Other topics include expatriate management and ethics and health and safety issues in global Human Resource.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT4002 ASIAN BUSINESS

This course provides an overview of the business landscape in major Asian countries, highlighting both similarities and differences across countries. Students will explore unique organizational structures in Asian countries, such as chaebol in Korea, keiretsu in Japan, and family businesses in China. The course will also provide a conceptual framework that emphasizes the impact of cross-country institutional and cultural settings on business practices in Asia.

Pre-requisite: MGMT3000 Global Business Environment OR ISOM3026 E-Business and Global Business Environment OR BECO3010 Global Economic Issues and Business Implications

MGMT4003 CROSS-CULTURAL COMMUNICATION IN BUSINESS

This course provides a framework for identifying and analyzing diverse cultural approaches to interpersonal and business communication. It aims to enhance students' awareness of their own cultural biases, and to provide students with the skills to successfully and sensitively interact in different cultural settings. Students will be introduced to various negotiation strategies and will learn how to adapt such strategies to prevailing cultural contexts.

Pre-requisite: MGMT3000 Global Business Environment OR ISOM3026 E-Business and Global Business Environment OR BECO3010 Global Economic Issues and Business Implications

MGMT4005 MANAGEMENT OF FOREIGN AFFILIATES

This course studies how multinational corporations manage the ownership and control of activities across international markets through various organizational forms or modes of foreign entry. These organizational forms of international cooperation include wholly owned subsidiaries, branches, and representative offices; and the new forms such as international joint ventures, alliances, management contracts, franchising, licensing and mergers.

Pre-requisite: MGMT3000 Global Business Environment or ISOM3026 E-Business and Global Business Environment or BECO3010 Global Economic Issues and Business Implications

MGMT4006 ENTREPRENEURSHIP MANAGEMENT

This course is about creation and management of new ventures. Key topics include the concept of entrepreneurship, identification and evaluation of entrepreneurial opportunities, financing of new ventures, government policies promoting innovation and new venture creation, and small business management. Students will also learn how to formulate business plans.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT4009 TRAINING AND DEVELOPMENT

Training and Development (T&D) builds on teaching and learning theories in providing students an overview of contemporary theory and practice in the field. They are exposed to the whole T&D process and are expected to demonstrate what they have learned through in-class training presentations. Moreover, students are also expected to research on current T&D practices in the region. Course topics include training and development theories, learning motivation, T&D needs assessment, design and delivery, transfer of training, T&D strategies, and the management and evaluation of T&D programmes.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT4010 PERFORMANCE AND COMPENSATION MANAGEMENT

As core components of human resource management system, performance and compensation management play important roles in achieving organizational strategic goals and promote companies' competitive advantages. This course provides students a comprehensive understanding of performance and compensation management from strategic and systematic perspectives, and knowledge of the relevant practices and skills. The course is designed to discuss the context of performance management and compensation practice, the criteria used to assess performance and compensate employees, and the design and implementation of performance and compensation management. It is important for students to understand the relationship between performance management and compensation management, as well as their connection with organizational strategic goals and other Human Resources Management practices.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT4011 EMPLOYEE RELATIONS, SAFETY & HEALTH

A well-designed pricing strategy is of critical importance to a company's success. This course is designed to enable students to understand key elements of a sound pricing strategy. Students will learn how different factors (such as costs, competition) influence a firm's pricing strategy and the importance of strategic pricing in achieving business profit and company growth. Upon completion of this course, students are expected to appreciate the complexities of making pricing decisions from a managerial perspective and to be able to conduct analysis of the pricing environments.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT4012 STRATEGIC HUMAN RESOURCES MANAGEMENT

The course provides students with a strategic approach to human resource management, clearly establishing the link between HRM and corporate strategies. It deals with the importance of "human capital" as a cornerstone of firms' competitive advantages. The course also enables the students to understand and apply processes, techniques, and activities of HRM in order to form and implement organizational strategies amid critical environmental influences.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT4014 CONTEMPORARY ISSUES IN HUMAN RESOURCES MANAGEMENT

The course gives students an opportunity to examine in some depth a variety of important current issues and trends in HRM. It explores current theory, analysis, and practice in selected areas of the field. The course introduces students to the theoretical and analytical issues shaping contemporary HRM thinking and practice. It also serves as a forum for students to exchange views on both the theoretical and practical aspects HRM as they might apply to the Macao context.

Pre-requisite: MGMT2001 Organizational Behavior

MGMT4015 LEADERSHIP

This course is designed to provide students with a broad perspective on the practice of managerial leadership and organizational life in the global arena. It enable students to develop the leadership skill, to inspire people to go from vision to action to results, to ensure organization to stay competitive in today's' global competition, global market, organizational turbulence, and a changing workforce marked by higher education and resultant higher expectations, as well as diversity.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT4016 INNOVATION MANAGEMENT

The course focuses on the processes and challenges involved in discovering, creating, and managing innovations for organizations. The course also explores how innovation strategies and entrepreneurial skills can create value in products, services, and business models. The module includes application of innovation-related frameworks to specific context and phases of innovation.

Pre-requisite: MGMT1000 Principles of Business Management

MGMT7010 ORGANIZATIONAL BEHAVIOR

The course presents frameworks for explaining human behavior in the workplace. Through these frameworks, students will be intellectually equipped with tools to manage employees, work teams, and organizations effectively. Topics include basic attributes of individuals, theories of motivation, job design and work arrangements, group development and processes, organizational structure and design, organizational culture and organizational change.

Pre-requisite: None

MGMT7011 STRATEGIC MANAGEMENT

This course provides students with the challenge of integrating different functional skills and applies them to actual business cases. Consequently, strategic management is a capstone course where students will deepen their understanding of how competitive advantages, business strategy, corporate strategy, and international strategy impact the success or failure of companies

Pre-requisite: MKTG7010 Marketing Management AND MGMT7010 Organizational Behavior

MGMT7012 ETHICS AND LEADERSHIP IN ORGANIZATIONS

This course is designed to provide students a roadmap for effective organization leadership. Through reviewing contemporary theories of leadership and classical theories of ethics, it encourages students to form their own perspectives on leadership and ethics. The course discusses crucial aspects of leadership, such as power, integrity, motivating employees, feedback, and coaching. It also develops students' leadership awareness to address the expectations of diverse organizational stakeholders. Special consideration will be given to the role of ethical leadership in ensuring that firms balance their diverse social responsibilities and maintain robust ethical safeguards, while resolving ethical problems and drawing appropriate lessons from them. The course will incorporate topics on sustainability and SDGs, by doing so, it prompts students to consider the importance of leadership in ensuring the long-term success of firms.

Pre-requisite: None

MGMT7013 ENTREPRENEURSHIP

This course helps students to understand the role and importance of entrepreneurship. It also enables students to recognize their entrepreneurial potential, have an appreciation for opportunity and creativity, ethical issues related to entrepreneurial activities, and develop business planning skills. Instruction will include lectures, class discussion, and workshops. Students will be assessed by tests, assignments, presentation, and formal written reports. Through the activities of this course, students are expected to develop their business plan and identify strategies for managing enterprise growth/exit.

Pre-requisite: None

MGMT7014 BUSINESS CONSULTANCY METHODS

Today's business environment is fast changing and challenging to managers. Business consultants play an important role in helping companies and organizations to understand the complexity of business situations and solve the problems they face. This course aims to introduce to students the business consultancy industry, approaches of diagnosing and analysing business situations, and ways to develop effective solutions to business problems.

Pre-requisite: None

MGMT7032 HUMAN RESOURCES MANAGEMENT

This course aims to develop within students the capacity to understand the complexity of managing people. Participants of this course will carry out an in-depth investigation into such topics as recruitment, compensation, and training. The course will also introduce participants to current debates within human resource management.

Pre-requisite: None

MGMT7036 ADVANCES IN MANAGEMENT STUDIES

This course is designed to students with an overview of contemporary theory and practice for developing innovation in organizations. The nature and characteristics of innovation, together with

the key issues that affect the process of change and implementation, will be discussed. Other themes to be covered in the course include organizational learning, knowledge management, learning organization, organizational change and development.

Pre-requisite: MGMT7010 Organizational Behavior

MGMT7037 GLOBAL BUSINESS

This course enables students to conduct analyses of the cultural, legal, political, financial, and economic factors affecting the global business environment. Substantial attention will be paid to integrated, multidisciplinary applications of knowledge. A case-based approach is used.

Pre-requisite: None

MGMT7300 MANAGEMENT OF ORGANIZATIONS AND CULTURE

This course provides a comprehensive analysis of how organizations can be managed effectively in a cross-cultural environment. It discusses the various critical elements for managing individuals and groups with diversified cultural background, including but not limited to job design, motivation and rewards, interpersonal trust building, group dynamics, power, politics, conflicts, and leadership. It helps students develop their management ability in leveraging cultural diversity to achieve organizational performance.

Pre-requisite: None

MGMT7301 STRATEGIC MANAGEMENT

This course identifies the key drivers of persistence of superior firm performance in different industry contexts and uses that understanding to lead formulation of strategy in modern corporations. In this course, students will learn to understand and apply tools for analyzing industry attractiveness, identifying firms' sustainable competitive advantage, developing business and corporate strategies in value chain and geographic dimensions, and implementing strategic plans.

Pre-requisite: None

MGMT7350 LEADERSHIP AND ORGANIZATIONAL CHANGE

This course helps students understand the role of leadership in managing change in the organization. The course will discuss the various challenges organizations face nowadays in the political, economic, technological and social dimensions. It evaluates the development of effective leadership, and explores how leaders can develop plans to initiate and implement major changes in the organizations under the dynamic environment.

Pre-requisite: None

MGMT7351 GLOBAL BUSINESS AND STRATEGY

Students will learn how multinational corporations formulate and implement strategies around the world – be it global, regional or multi-national to gain, sustain and protect their competitive advantages. While maintaining an international perspective, the course also emphasizes the use of management tools and techniques that companies use to meet their strategic objectives.

Pre-requisite: None

MGMT8011 ADVANCED RESEARCH METHODS IN MANAGEMENT AND MARKETING

This is a seminar course on behavioral research in business. This course provides basic concepts on social theories and scientific laws with respect to the philosophy of science. It covers various stages of behavioral research including research design, measurement scale and development, samples, data collection and statistical analyses such as significance tests, experimental design, multiple regression, mediation and moderating effects, multi-level analysis, confirmatory factor analysis, and structural equation modeling.

Pre-requisite: None

MGMT8013 DOCTORAL SEMINAR IN STRATEGIC MANAGEMENT

The seminar course provides an overview of various theoretical perspectives that define the landscape of strategy research. Upon the completion of this course, students will be able to

develop a pluralistic understanding about the conceptual development of strategy field and identify new directions and further areas of research. Major strands of theories to be discussed include industry-based view, institution theory, resource-based view, knowledge-based view and strategy process perspective.

Pre-requisite: None

MGMT8014 DOCTORAL SEMINAR IN ORGANIZATIONAL BEHAVIOR/HUMAN RESOURCE MANAGEMENT

This is a seminar course introducing the major theoretical perspectives pertaining to organizational behavior (OB) and human resource management (HRM) research. It covers the major topics in OB and HRM research and focuses on discussing the various theoretical perspectives employed by current OB and HRM studies. Through intensive in-class discussion, the students can have an understanding on the latest development of OB and HRM theories and generate their perspective on future research directions.

Pre-requisite: None

MGMT8300 LEADERSHIP AND ORGANIZATIONAL CHANGE

This course is designed to provide students with a broad perspective on the practice of managerial leadership and organizational life in the global arena. It enables students to further enhance the leadership skill in their business operation, Chinese family business models and conventional wisdom of Chinese culture and business. Besides, the course presents frameworks for explaining human behavior in the workplace. Through these frameworks, students will be intellectually equipped with tools to manage employees, work teams, and organizations effectively. Topics include basic attributes of individuals, theories of motivation, job design and work arrangements, group development and processes, organizational structure and design, organizational culture and organizational change.

Pre-requisite: None

MGMT8350 CROSS-CULTURAL BUSINESS STRATEGY

The purpose of this course is to provide a solid theoretical foundation that can enable CEOs and senior managers charged with the design and implementation of strategic initiatives to develop their critical thinking and analytical skills. It contains a detailed treatment of fundamental theoretical perspectives of strategy, including industrial organization economics, resource-based view, dynamic capability and knowledge management.

Pre-requisite: None

MGMT8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

MKTG2000 PRINCIPLES OF MARKETING

This is an introductory course providing students with key concepts and skills underlying the modern practice of marketing. The role of marketing in the organization and in society is also examined. Tools and methods used in planning and implementing the four Ps (product, price, place and promotion) will be explored.

Pre-requisite: None

MKTG3000 CONSUMER BEHAVIOR

This course is designed to provide students with a framework for analyzing consumer behavior by learning about relevant psychological and sociological theories. It focuses on the consumer decision process with emphasis on consumer decision making, satisfaction/dissatisfaction factors, perception, learning, group influences as well as marketing strategies implications.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG3001 BUSINESS-TO-BUSINESS MARKETING

This course focuses on the key issues and factors to consider when formulating and implementing marketing strategies targeting other businesses and nonprofit organizations. It includes relationship building, alliance and partnership, data interchange, power shifts in the channel, and the impact of changing technology.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG3002 MARKETING RESEARCH

Marketing managers are required to make enormous number of decisions that have direct impact on consumer experiences and ultimately purchase. This course is designed to equip students with the skills of collecting data, transforming these data into information and developing insights for making effective marketing decisions. Students will be introduced to various techniques and methodologies to plan and execute sound research studies, as well as updated analytical tools to analyse and interpret research results. They will also acquire practical experiences by working on a group research project.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4000 INTERNATIONAL MARKETING

This course enables students to develop an understanding of the dynamics of foreign markets and learn how to apply the marketing concepts in these environments. Students will be able to gain the necessary skills needed to evaluate and select foreign market opportunities, segment international markets, enter and effectively serve the foreign markets as well as develop and implement marketing strategies at the country, regional, and global level.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4001 INTEGRATED MARKETING COMMUNICATIONS

Students will be able to exhibit: a critical appreciation of key models and framework within the marketing communications area; critically appraise and develop integrated marketing communications campaigns; show a sound understanding of the advertising process ranging from creative strategy to media strategy; demonstrate an appreciation of the roles and relative contributions of public relations, sponsorship, sales promotion, direct marketing and the internet as communications tools; and understand the differing roles of advertising agency, specialist agency and creative consultancy.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4002 MARKETING STRATEGY

This is a capstone course in marketing to train students in consolidating all learnt principles and putting them into making marketing decisions relevant to the long-run performance of organizations. It will introduce students to strategic thinking and also other updated and pertinent issues in marketing strategy. Upon completion of the course, students should be able to recognize the key influencers of success of various marketing decisions and thereby improve their ability in making marketing decisions.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4003 SERVICES MARKETING

This course seeks to prepare students to function as effective marketers in a services economy, to raise awareness of the nature and characteristics of services as well as to provide more knowledge about service quality, the foundation of services marketing.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4005 RETAIL STRATEGY

This course discusses the various activities and decisions that retailers face everyday. It introduces and integrates business, consumer and social concepts to provide an effective framework for the study of retailing. After taking this course, students should be equipped with the knowledge of selecting a store location, managing the retail operation, developing a merchandise plan as well as communicating with customers. Pre-requisite: MKTG2000 Principles of Marketing

MKTG4011 PRICING STRATEGY

This course will draw on the concepts of economics and marketing to develop approaches useful for pricing decision making. Students are expected to develop a deep appreciation of the complexities of making pricing decisions from a managerial perspective and to be able to conduct detailed analysis of the pricing environments. The elements of a comprehensive conceptual model of the pricing decision will be demonstrated.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4012 CUSTOMER RELATIONSHIP MANAGEMENT

Nowadays, Customer Relationship Management (CRM) is a popular topic for discussion among marketing practitioners and academic researchers. CRM is gaining importance with the exploding customer data in company databases which may be beneficial to marketers' decision making. This course aims to introduce to students the fundamental CRM concepts and the CRM tools available for marketer's use. Upon completion of this course, students are expected to understand the conceptual background and techniques of CRM, and also be able to critically evaluate the tactical effectiveness of various CRM tools.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4013 DIGITAL MARKETING

Digital technologies have dramatically changed the way how marketers interact and communicate with customers. Therefore, it is essential that marketers should be well-acquainted with these tools and be able to integrate them into the marketing strategy of the firm. This course will provide students with the basic concepts, principles and theories associated with marketing in the digital environment. They will be familiarized with the various digital platforms including search engines, social media, mobile as well as other forms of new media. This course also prepares students in anticipation of future developments in the digital world.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4014 BRAND MANAGEMENT

This course will address the strategic importance of branding, provide theories and strategies for building, leveraging, and defending strong brands, and discuss current opportunities and challenges facing brand managers.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4017 SPECIAL TOPICS IN MARKETING

This course aims to familiarize the students with the latest issues and topics in marketing. It allows students to develop skills related to a special aspect of marketing not presently covered in the other marketing courses offered in the programme (e.g. Marketing for Non-profit Organizations, Marketing in the Asia-Pacific Region).

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4018 LEISURE AND LIFESTYLE MARKETING

This course is designed to provide students with an overall understanding of marketing developments in the fast-growing leisure and lifestyle industries (such as tourism, arts and entertainment, accommodation). Students will learn how marketing activities are conducted in leisure and lifestyle organizations and important marketing issues relating to the industries. Upon completion of this course, students should be equipped with the knowledge and skills to apply marketing principles as they pertain to the fast growing leisure industry.

Pre-requisite: MKTG2000 Principles of Marketing

MKTG4019 ANALYTICS FOR MARKETING DECISIONS

Marketers increasingly found that big data is becoming mainstream and the ability to collect, analyse and generating insights from these data becomes essential to the success of modern enterprises. This course seeks to introduce students to various sources of marketing data as well as a variety of statistical tools available to convert them into useful insights enabling profitable customer acquisitions, retention and growth. Using real world cases and statistics software, this

course will bring students through the process of acquiring useful data, choosing relevant analytical methods as well as converting results into meaning insights which can input into major marketing decisions. Data privacy issues will also be explored in this course.

Pre-requisite: MKTG2000 Principles of Marketing and MKTG3002 Marketing Research

MKTG7010 MARKETING MANAGEMENT

This course seeks to equip students with the key conceptual, analytical and problem solving skills to address marketing problems and decisions. Specifically, it introduces students to various marketing analyses (customer, competitor and company analysis) and marketing strategies. Tools and methods used in planning and implementing the four Ps (product, price, place and promotion) will be explored. This course integrates theory and practice within the context of organizations operating locally and globally.

Pre-requisite: None

MKTG7030 CONSUMER BEHAVIOR

The purpose of this course is to study the process of consumer decisionmaking and its determinants, and the resulting implications for marketing strategy. Concepts and theories covered in this course are essential for consumer analysis and the development of effective marketing strategies. A strategic orientation will permeate most facets of this course. At the same time, knowledge of consumer behavior requires an understanding of important theoretical concepts borrowed from fields such as social psychology, consumer psychology, and experimental psychology.

Pre-requisite: MKTG7010 Marketing Management

MKTG7032 ADVANCES IN MARKETING STUDIES

This course provides students with the opportunity to focus on a particular contemporary issue in marketing. Possible topics come from the fields of internet marketing, brand management, marketing in China and customer relationship management.

Pre-requisite: MKTG7010 Marketing Management

MKTG7033 MARKETING ANALYTICS

This course is designed to help students understand the development of marketing data in the big data era and the value of such data in marketing decision making. Students will be introduced the broad range of marketing data available to businesses, ways to gain insights from the data and convert insights into profitable customer acquisition, retention and growth efforts. Important marketing data usages (e.g., customer behavior prediction, customer value evaluation, social listening, etc.) are discussed using examples from different industries. Issues of data privacy and implementation challenges in big data marketing will also be explored.

Pre-requisite: Any marketing fundamental module at UG level or above (for students of Master of Science in Business Analytics Programme) / MKTG7010 Marketing Management [for students of MBA and MSc in Data Science (Marketing Analytics) Programme]

MKTG7300 INTERNATIONAL MARKETING STRATEGY

What are the roles of marketing in a dynamic global environment? What are the challenges or complexities for managing brand-marketing in the cross- cultural context? In addressing these issues, this course provides students an understanding of the development of marketing strategy in local and overseas market. It is concerned with creating an effective strategic plan through identifying marketing opportunities and assessing company capabilities. The module also endeavors to help students apply the learnt theories to practice through the critical analysis of relevant case studies.

Pre-requisite: None

MKTG8012 DOCTORAL SEMINAR IN MARKETING THEORIES

This course introduces Ph.D. students to recent topics and literature in the field of marketing. It aims to generate a discussion highlighting recent developments in marketing theories in the following areas:

- Marketing strategy
- Consumer behavior

Students are required to read and prepare written reviews on journal articles at home. They also need to share and discuss these reviews in the class. This approach enables students to appreciate marketing theories and concepts and their managerial implications. It also enables students to assess the strengths and weaknesses of various marketing investigations.

Pre-requisite: None

MKTG8350 INTERNATIONAL MARKETING

This is an executive course in marketing to train students in consolidating all learnt principles and putting them into making marketing decisions relevant to the long-run performance of organizations. It will introduce students to strategic thinking and also other updated and pertinent issues in marketing strategy. Lots of cases under various scenarios will be discussed. Upon completion of the course, students should be able to recognize the key influencers of success of various marketing decisions and thereby improve their ability in making complicated marketing decisions.

Pre-requisite: None

MKTG8999 DOCTORAL THESIS

The PhD thesis is the main output of a PhD. It is a concentrated piece of original research carried out by all PhD students in order to successfully earn their doctoral degree. The PhD thesis needs to contribute to the existing body of knowledge.

Pre-requisite: None

EDUC7161 Special Topics in Curriculum & Instruction	
B. For students with selected area of concentration:	
(I) For the concentration of Science Education	
Compulsory Course:	
EDUC7162 Theories of Science Teaching and Learning	3
Required Elective Courses (1 out of 3):	3
EDUC7163 Studies on Science Curriculum	
EDUC7164 The Evaluation of Science Teaching and Learning	
EDUC7165 Professional Development of Science Teachers	

(II) For the concentration of Information and Communication Technology in Education

Compulsory Course:

EDUC7169 Integrating Technology for Teaching and Learning 3

Required Elective Courses (1 out of 3): 3

EDUC7166 Issues in Distance Education

EDUC7167 Multimedia Design and Practice

EDUC7168 Trends & Issues in Instructional Technology

III) For the concentration of Chinese Language Education

Compulsory Course:

EDUC7170 Secondary School Chinese Language Curriculum Design and Teaching 3

Required Elective Courses (1 out of 3): 3

EDUC7171 Topic Studies in Chinese Writing

EDUC7172 Appreciation and Teaching of Chinese Literature

EDUC7182 Language Arts Topic Studies and Teaching

IV) For the concentration of Mathematics Education

Compulsory Course:

EDUC7175 Theories of Mathematics Teaching and Learning 3

Required Elective Courses (1 out of 3): 3

EDUC7174 Studies on Mathematics Curriculum

EDUC7176 The Evaluation of Mathematics Teaching and Learning

EDUC7177 Preparation and Professional Development of Mathematics Teachers

V) For the concentration of English Language Education

Compulsory Course:

EDUC7179 Curriculum Design and Materials Development for English Teachers 3

Required Elective Courses (1 out of 3): 3

EDUC7180 Pedagogical Grammar for English Language Teachers

EDUC7181 Teaching Second Language Writing

EDUC7183 Second Language Vocabulary Acquisition and Language Teaching

Year II**Credits**

EDUC7190 Thesis 12

Total Credits: 30

Course Description

APAC1000 ADVANCED MATHEMATICS I

The course aims at providing mathematical concepts and methods to students in the study of classical mechanics, electromagnetism, quantum mechanics as well as statistical mechanics. The topics will cover linear algebra, vector calculus, special functions, complex numbers and hyperbolic functions.

Pre-requisite: None

APAC1001 COLLEGE PHYSICS

In this part, mechanics included rotation, gravitation, elasticity, oscillation, waves, sound waves, fluid, gas theory and laws of thermodynamics will be introduced.

Pre-requisite: None

APAC1002 ELECTROMAGNETISM AND PHYSICAL OPTICS

In this part, Electromagnetism will be introduced in terms of forces, fields, potential, laws, current, circuits, induction, circuit components, electromagnetic waves, light, geometric optics, interference and diffraction.

Pre-requisite: None

APAC1003 INTRODUCTION TO COLLEGE CHEMISTRY

This course addresses the basic concepts of chemistry through lectures and laboratory experiments. Topics include: atoms and molecules, periodic table, electronic structure, chemical bonding, chemical reactions, electrochemistry, and organic chemistry.

Pre-requisite: None

APAC2000 ADVANCED MATHEMATICS II

The course is the extension of Advanced Mathematics I. The course aims at providing mathematical concepts and methods to students in the study of classical mechanics, electromagnetism, quantum mechanics as well as statistical mechanics. The topics will cover infinite series, Fourier series and transformation, ordinary differential equations, probability.

Pre-requisite: APAC1000

APAC2001 ANALYTICAL AND ENVIRONMENTAL CHEMISTRY

Introduction of analytical chemistry, including the concept of analytical chemistry, sample preparation, analysis methods, quality control, as well as analytic techniques for environmental science. Related experiments will also be arranged in this course.

Pre-requisite: APAC1003

APAC2003 INORGANIC CHEMISTRY

Introduction of inorganic chemistry, including general principles of chemistry, periodic properties of elements, acid-base theory, structure of compounds, s, p, d-block elements, etc. Some related experiments will be included.

Pre-requisite: APAC1003

APAC2004 QUANTUM PHYSICS

Introduction to quantum mechanics. It may cover the following topics: Wavefunction and Schrodinger equation, observables, eigenfunctions, One-dimensional steady state problem, Mechanical quantities expressed by operators and representation transformation, The evolution of mechanical quantities over time and symmetry, The Schrodinger equation in spherical coordinates, Spin and orbital angular momentum, Quantum transitions, The hydrogen atom and the addition of angular momenta.

Pre-requisite: APAC2000

APAC2005 EARTH AND UNIVERSE

In this course, we aim to explain the fundamental concepts including gravity, Einstein's relativity, cosmology, etc. Topics including the solar system, the climate of the earth, the life cycle of stars, gravitational lensing, cosmic microwave background radiation will also be discussed. No prior knowledge of astronomy is necessary.

Pre-requisite: None

APAC2006 ORGANIC CHEMISTRY: FOUNDATIONS OF CHEMICAL REACTIVITY AND SYNTHESIS

Introduction of the structures, properties, preparation, and reactions of a vast array of molecules that we call organic compounds. Introduction of concepts that structure determine properties leading to exploration of the subject in a systematic manner through understanding of classes and functionalities and reaction mechanism. Materials learnt in earlier chapter will serve as building blocks for the topics in the later chapter. Stereo- and regio-controlled chemical reaction types are introduced.

Pre-requisite: APAC1003

APAC3000 MATERIALS PHYSICS AND CHEMISTRY

The course will introduce the general synthesis methodologies in material science based on Physics and Chemistry principles. Exploration and applications of novel and functional materials, especially in modern technology, will also be covered in the course.

Pre-requisite: None

APAC3001 SOLID STATE PHYSICS

In this course, the behavior of atoms and shared electrons in solids will be described by classical physics and quantum mechanics. The discussion of solid with crystalline structure will be one of the emphases. Some properties of crystal such as defects, disorder and thermal vibration will be studied. Then, band theory and motion of electron will be investigated.

Pre-requisite: None

APAC3002 THERMODYNAMIC AND STATISTICAL PHYSICS

This course introduces the foundations of statistical mechanics to students with a strong mathematics and physics background, who are contemplating a major in Physics or interested in a rigorous treatment of physics. The main contents include the zeroth, first, second and third laws, thermodynamical potentials and Legendre transformation, phase coexistence and phase transition, thermodynamical stability, statistical distribution of almost independent systems, and others.

Pre-requisite: None

APAC3005 PHYSICAL CHEMISTRY

This course provides a theoretical and mathematical description of the physical behavior of chemical systems. Introduce and interpret observations on the physical and chemical properties of matter. Physical chemistry is also essential for developing and interpreting the modern techniques used to determine the structure and properties of matter, such as new synthetic materials. Related experiments will also be arranged in this course.

Pre-requisite: APAC1003

APAC3007 LOW-DIMENSIONAL PHYSICS

The course aims at an introduction to basic principles of nanophysics allowing working in research and development in nanotechnology. Students will learn basic principle of physics of nanometer-size systems with a focus on basic physical phenomena.

Pre-requisite: None

APAC3008 NANO CHEMISTRY

Introduction of nanomaterials and nanochemistry, including the concept of nanoscale, the band structure and the corresponding characters of nanomaterials, the fabrication, modification and

application of nanosystem.

Pre-requisite: None

APAC3009 POLYMER CHEMISTRY

Introduction of various classes of polymer compounds, emphasizing polymer chemical reactions and mechanisms of major functionalities and their importance in the area of chemistry. Topics covered include: structure and properties of polymer; condensation polymerization; free radical polymerization; copolymerization; polymerization methods; crystallization and crosslinking of polymer chains; characterization and application of polymer compounds. Related experiments will also be arranged in this course.

Pre-requisite: APAC1003

CPED1001/CPED1002 PHYSICAL EDUCATION I/ PHYSICAL EDUCATION II

Physical Education consists of theory of fitness (Part I) and basic sport concepts, knowledge and skill practice in team sport and individual sport (Part II). Part I covers sport relevant concepts including the function of sports in life, sports injury prevention & treatment and sport knowledge. Students will learn theory, principle and regulation in fitness. And know how to do exercise and workout regularly. Part II focuses on skill-based physical fitness which includes one team sport and one individual sport. Students will be guided to apply the concept of fitness, sport theory and game strategy with skill when they learn sports for participating in sport and sport practice continuously.

Pre-requisite: None

ECEN1008 PHYSICS I

This is a general physics course for engineering students. Firstly, kinematics will be introduced including straight line and plane motion. Then, the causes of motion will be elucidated and summarize into laws of force. Concepts of energy and work will be discussed with conservation law. Draw an analogy between translational and rotational motion. Laws of thermodynamics will also be studied.

Pre-requisite: None

EDUC1000 INTRODUCTION TO EDUCATION

This course aims to help students understand the general law of the human education system. From historical, theoretical and practical perspectives, the course explores (1) the fundamentals of education, (2) the relationship between education and social, political, economic and cultural developments, and (3) the relationship between education and human physical and mental developments (4) education purposes (teleology), and (5) the relationship between teachers and learners. It also discusses issues about education systems/structure, curriculum and instruction, moral education, educational management, etc.

Pre-requisite: None

EDUC1001 PHILOSOPHY OF EDUCATION

This course is designed to show the important influence of educational philosophy on different philosophical theories. All educators and educational investigators should be equipped with a knowledge base of Western and Chinese educational philosophies in order to seek a correct educational orientation. The course will cover topics such as the definition of philosophy and education, their relationships and their basic problems, with a systematic analysis, comparison and evaluation of various schools of educational philosophies, studying their advantages and disadvantages and their influences on teaching. Other topics include analysis of educational concepts, critique of educational philosophies, examination of classical educational doctrines, evaluation of modern educational problems and reflection on one's educational beliefs and aspirations.

Pre-requisite: None

EDUC1002 中國文學發展與教育 I
HISTORY OF CHINESE LITERATURE AND ITS TEACHING I

本科主要介紹先秦兩漢至隋唐這段歷史時期重要的文體（詩、散文、賦、樂府、駢文等）特點、文學流派、文論發展、名家作品等，說明文學與思想、政治、社會等關係，並教授學生如何蒐集相關的文、論材料，編寫教材，選用適當的教學法，以便將來能在中學教學實踐中靈活正確運用。
 先修科目：沒有

EDUC1003 中國文學發展與教育 II
HISTORY OF CHINESE LITERATURE AND ITS TEACHING II

本科主要介紹宋元明清這段歷史時期重要的文體（詞、曲、戲劇、小說、新民體）特點、文學流派、文論發展、各家作品等，並說明文學與思想、政治、社會等關係，並教授學生如何蒐集相關的文、論材料，編寫教材，選用適當的教學法，以便將來能在中學教學實踐中靈活正確運用。
 先修科目：沒有

EDUC1004 現代語文與教育
MODERN CHINESE LANGUAGE AND ITS TEACHING

本科旨在切合澳門現行中學語文教學的內容和要求。教學內容以中學課程教學需要為導向，即字、詞、句的講解，以及語法和修辭的分析。內容除通論現代漢語的基本知識外，並簡述邏輯與語文的關係，培養學生的語文思維能力，藉以提高學生在語文教學方面的能力。
 先修科目：沒有

EDUC1005 古今漢字的教與學 TEACHING AND LEARNING OF THE ANCIENT AND MODERN CHINESE CHARACTERS

漢字是漢語的基本單位，是形音義結合的符號體系，故本科將從歷史發展的角度，考察漢字字形、字音、字義的變遷，講授漢字的性質、特點和結構，以及漢字簡化等問題，以增進學生對漢字的理解。又文言以一字一詞為主，故本科亦將講授文言詞彙的基本知識，以配合中學古詩文教學的需要。
 先修科目：沒有

EDUC1006 LANGUAGE LEARNING THEORIES AND ENGLISH LANGUAGE TEACHING

This course provides an overview of the concepts, theories, and research in language acquisition with an emphasis on second language acquisition. Special attention is paid to the linking of theories with current practices in English language teaching.
 Pre-requisite: EDUC1023 and EDUC1024

EDUC1007 LIFE EDUCATION

Life education is to explore the fundamental life issues based on the content of life wisdom. Why do people live? How should people live? How can they live out the values of life? These three fundamental questions about life are the core issues of life education. This course guides students to explore important life values and moral topics through critical thinking and reflection in order to figure out the meaning of life. In addition to the sentiments of humanistic arts, gratitude and service, life education also includes areas like life philosophy, life and death, religious beliefs, moral thoughts, spiritual developments, etc. With systematic exploration and experiences for these important life issues under the framework of East and West cultural thoughts, this course aims to help students construct a world vision, a complete life philosophy and correct values.
 Pre-requisite: None

EDUC1008 EDUCATION AND SOCIETY IN MACAO

This course is designed to help students to reflect on the social and education systems of Macao since the foundation of New China in 1949. By applying sociological and political concepts and theories, the course will analyse the discourses and development experiences of Macao. The course materials will be based on the accumulated research findings and publications related to the said period. It is intended to assist students in having a broader and more penetrating

understanding of Macao society and its educational system.

Pre-requisite: None

EDUC1009 MULTIMEDIA COURSEWARE DESIGN AND DEVELOPMENT

This course deals with the basic principles and practice of design and development of multimedia courseware based on the latest development in Information Technology. Specifically, participants will identify, analyse instructional problems, design and develop learning environments and courseware aids. Participants are also encouraged to design, develop, implement and evaluate their courseware.

Pre-requisite: None

EDUC1010 PHOTOGRAPHY IN EDUCATION

In contemporary culture, the practice and use of photographs has been vital in everyday life and in education. This course will help students understand some photographic work from the early 19th century to the present day, each of which was taken with a unique approach and perspective. Students will undergo a series of workshops, taking snapshots of everyday life and exploring the role of photography in relation to education and aesthetics in the modern world.

Pre-requisite: None

EDUC1011 WESTERN CLASSICAL MUSIC HISTORY

This course aims at providing an advanced discussion of the styles, characteristics and historical development of the different eras from the 8th century to the 19th century in western classical music history. The focus of the course is on the aesthetic analysis of music literature, famous composers' masterworks and different compositional styles. Understanding the development of notation will provide students with a better idea of how musical concepts have influenced the development of characteristics identified in each era in history. By the close of the semester, students will have a solid understanding of the development of western classical music.

Pre-requisite: None

EDUC1012 INDUSTRY OF SPORT, LEISURE AND RECREATION - AN INTRODUCTION

Sports and its related development in leisure and recreation attract attention due to its intrinsic connection to personal growth, health improvement and social development. Bidding of mega sport events, building of sport tourism, planting of jogging and bicycle tracks in city, promotion of health related sport projects in community and planning of sport and recreational centres are examples of the contemporary development of sports. This course aims at bringing students basic understandings of sport, leisure and recreation as an industry, with an emphasis on the following strands: structure and organisation; activity types and international development; economic prospects, demand and supply, management, sport market and services; social change and customer behaviour; national, city and community planning; and careers and job nature in the industry of sport, leisure and recreation. The related theories, elements of developmental background and trends are the basic content of the study. Teaching will be conducted from an interactive perspective, with field trips, project works and visits as the major learning activities.

Pre-requisite: None

EDUC1013 EARLY CHILDHOOD DEVELOPMENT

This course will instill into teachers, who work with 0 to 8-year-old children, a thorough understanding of the developmental changes at this stage of life, the roles that genetics play in human development, as well as some common childhood disorders. Different theories of child development will be introduced to provide students with an all-rounded knowledge of children's united growth, which should lay the foundation for effective teaching and learning in early childhood education.

Pre-requisite: None

EDUC1015 PHYSICAL EDUCATION I - GAMES LEARNING AND FOUNDAMENTAL MOVEMENT EXERCISES FOR CHILDREN

The teaching of physical education contains the study of track and field, gymnastics, ball games,

dancing and swimming. Nevertheless, students at the age of 6 to 9 are too young to understand the sport rules, use of equipment and its competitive nature. For this purpose, the teaching of fundamental movement exercises and use of games approach become prevailed practice in helping young children to develop necessary movement skills. The main feature of this course is to help pre-service teachers or children workers to understand the principles of fundamental movement exercises and games teaching in children at junior primary age.

Pre-requisite: None

EDUC1016 APPRECIATION AND TEACHING OF CHILDREN'S LITERATURE

The purpose of this course is to discuss various forms of children literature such as fairy tales, stories and fables, and the connections between children literature and literature education. Students will learn how to write different forms of children literature and improve their writing skills. At the same time, student teachers will learn how to evaluate the qualities of literatures and become prepared to teach children literary appreciation or engage in creating children literature.

Pre-requisite: None

EDUC1017 THINKING AND LEARNING WITH IT

This course aims to help teacher trainees to create a classroom community in which learning dialogues take place through computers or other associated resources. To achieve this goal, teacher trainees are first expected to review critically the role of computers in enhancing thinking skills and facilitating students' learning. Evidence from a decade of research is drawn to show how children are engaged in talking and thinking together with computers.

Pre-requisite: None

EDUC1018 傳統文化與教學

TEACHING OF TRADITIONAL CHINESE CULTURE

中國是一個幅員遼闊、歷史悠久、文化發達的國家。傳統文化內容豐富，並充分融合於思想、風俗、生活習慣、思維模式各個領域之中。本課程旨在協助學員透徹了解中華傳統文化的特質與內容，目的在提升在語文課堂中涉及與傳統文化相關的眾多方面的知識時，學員能達致高水平的教學效果。

先修科目: 沒有

EDUC1019 國情教育的教與學

TEACHING AND LEARNING NATIONAL EDUCATION

本課程分兩部分，理論與實踐並重。一方面重點介紹現代中國歷史及社會概況，包括新中國成立經過，現今政治、社會、經濟情形，澳門特區基本法等；另一方面通過一些課程設計的例子，說明如何把有關材料運用在社會科教育上。

先修科目: 沒有

EDUC1020 WAYS OF SEEING: DRAWING AS INQUIRY

Through diverse drawing workshops both in-doors and out-doors, this course introduces students to the various modes and approaches of drawing, from the traditional techniques to some experimental practices. While getting acquainted with different material approaches in drawing, the students will also explore drawing as ways of seeing, building conceptual thinking and visual mapping.

Pre-requisite: None

EDUC1021 QUALITY PHYSICAL EDUCATION

Quality Physical Education (QPE) refers to the effective use of various components to achieve the educational prospects, health conditions and active lifestyle of pupils. The course aims at helping students to understand the nature of QPE, importance of current issues and strategies to enhance the introduction of QPE in school. Student will also have chances to study the theoretical background and develop analytical understanding on related issues such as gender and choice of physical activities, opportunities of learning and behavioral pattern in sport activities.

Demonstrations and experimental works in teaching are used as main methods in learning and assisted by cases studies to prepare students with abilities for quality teaching in physical education.

Pre-requisite: None

EDUC1022 THEORIES OF CURRICULUM AND INSTRUCTION (SECONDARY MATHEMATICS)

This course seeks to elucidate evolution of mathematics education in the 20th century and for the 21st century. Past influential mathematics education reforms affecting mathematics curriculum and instruction are highlighted. Course participants are expected to be conversant with basic theories and principles of mathematics education, and in particular understand the salient characteristics of Chinese learners. They are familiarized with the course rationale, course objectives, content standards, as well as teaching and evaluation recommendations in accordance with contemporary mathematics curriculum standards. Commonly used mathematics textbooks and resources used in Macao's secondary classrooms are also exemplified.

Pre-requisite: EDUC1000 and MATH1001

EDUC1023 INTRODUCTION TO APPLIED ENGLISH STUDIES

This course provides an overview of the basic concepts, scope, and methodology of the science of language in its historical and descriptive aspects. The course covers description of language and language use, essential areas of enquiry in applied linguistics, and language skills and assessment, with examples drawn mostly from English. Students will be helped to see how they can synthesize and apply the knowledge about language to the teaching of English.

Pre-requisite: None

EDUC1024 INTRODUCTION TO ENGLISH LANGUAGE TEACHING

This introductory course for English education majors aims to cover a wide range of concepts, issues, and debates relevant to language teaching and learning. It examines language learning conditions and processes and helps students see how language teaching is influenced by the ultimate goals of language learning, learner variables, and other contextual factors. Pedagogical implications link these topics to the teaching of English in Macao school contexts.

Pre-requisite: None

EDUC1047 THEORIES OF CURRICULUM & INSTRUCTION

Theories of Curriculum and Instruction provide students with basic principles of modern curriculum and instruction. It aims to improve their professionalism and teaching efficiency in all their working processes, put basic principles into creative practices, set clear objectives, select and organize contents, implement and evaluate curriculums under the guidance of ideal educational values and goals. It also helps to effect leadership in the teaching process, create an exciting learning situation and deeply involve the students in teacher-student interactions with the support of new instruction models, strategies and methods.

Pre-requisite: EDUC1000

EDUC1054 MUSICIANSHIP I

This course aims to develop fundamental knowledge in understanding basic music theory and in note reading, sight singing, and ear training accurately. Rhythmic and melodic dictation and training are also included in the course. Furthermore, piano training will be included, and students will be able to play easy songs with the primary level by the end of the semester.

Pre-requisite: None

EDUC1055 UNDERSTANDING VISUAL CULTURE

The course provides an introduction to visual culture. It is designed to equip students with the basic knowledge for understanding visual culture in the context of Chinese and Western art. Its content includes topics on concepts of perception, visual aesthetics, visual languages and theories, etc. Having acquired basic understanding of how art connects to the world, students are led to appropriate the knowledge to the appreciation and contextualization of the vibrant and

diverse visual culture of today.

Pre-requisite: EDUC1060 and EDUC2066

EDUC1060 VISUAL ART I: EXPLORATION AND DISCOVERY

Visual art as a major component of visual culture has the characteristics of inter-/cross disciplinary study which is one of the dominant trends in academic research. The course is designed to equip students with basic art skills as well as teach them ways of seeing and help develop their faculties of imagination and creativity so as to make them capable of discovering art's existence in life, aiming to provide students with a foundation for art learning. The course will not only lead students to understand different kinds of painting techniques, but also teach and let them use different materials, media and tools to experience art creation in their exploration of its "expressivity".

Pre-requisite: None

EDUC2000 MORAL EDUCATION

This course aims at introducing theories, principles, and examples of moral education. Topics include: the theoretical framework of moral education, moral education in classic works, character and moral education, citizenship and moral education, religion and moral education, moral education implemented in different educational settings, curriculum guideline of moral education, learning materials of moral education, moral education in various learning areas, and examples of moral education practice.

Pre-requisite: None

EDUC2001 SOCIOLOGY OF EDUCATION

This is an introductory course on the Sociology of Education. It provides a brief introduction to the basic sociological concepts and perspectives. By applying these concepts and perspectives, the course intends to let participants have a broad and profound understanding of Macao society and its educational system.

Pre-requisite: None

EDUC2002 EDUCATIONAL ASSESSMENT

This course is designed to give a fundamental understanding of the major aspects of assessment in the classroom, in education and in society. It sets the stage for educators to develop and conduct assessment in practice. Topics include purposes and principles of assessment, planning the assessment process, choosing and developing appropriate tools. This course covers, but is not limited to, the following basic concepts: formative versus summative assessment, norm versus criteria reference, high versus low stake tests, objective versus subjective items, standard setting, item analysis, difficulty and discrimination index, reliability and validity, etc. After completion of the course, participants are expected to take reasonable steps to ensure that their tests are of sufficient quality to give useful results and for making correct interpretations.

Pre-requisite: None

EDUC2003 EDUCATIONAL PSYCHOLOGY

This course aims to give a systematic introduction to the main concerns in educational psychology, including human development, students' learning, learning motivation, instruction and evaluation, and individual differences. Also, this course will emphasise the application of the related knowledge in educational settings.

Pre-requisite: None

EDUC2004 現代中文寫作與教學

MODERN CHINESE WRITING AND ITS TEACHING

本科旨在通過有目的的寫作訓練，有效地提高學生書面語言的表達能力；也在於培養學生審美情趣、發展健康個性、形成健全人格。本科教學內容包括：培養學生觀察與感受生活能力、閱讀能力、聯想能力和語言能力。此外，並指導學生就現代中文寫作，編寫教材，採用合適的教學法，以便日後在教學實踐中靈活正確運用。

先修科目：沒有

EDUC2005 中國古典散文與教育 I
CLASSICAL CHINESE PROSE AND ITS TEACHING I

本科旨在講述中國歷代散文（古文）的意義、特色與演變概況；揭示學習古文的目的與教育作用；從《昭明文選》、《古文觀止》等古文總集中，擷取自先秦至東漢各朝代的著名古文篇章，尤其是富有教育意義的為教材，引導學生在課堂講解、研讀與小組討論，以培養學生對古文的認知，養成閱讀古文的興趣，充實教授古文的能力。

先修科目：沒有

EDUC2006 中國古典散文與教育 II
CLASSICAL CHINESE PROSE AND ITS TEACHING II

本科旨在闡述中國歷代散文（古文）的朗讀技巧與研習方法；辨析古代散文與現代散文的區別；從《昭明文選》、《古文觀止》等古文總集中，擷取自魏晉六朝至明清各朝代的著名古文篇章，尤其是富有教育意義的為教材，引導學生在課堂施以範文講解、研讀與小組討論，以增進學生對古文的認知，提升研讀古文的興趣，增強教授古文的能力。

先修科目：沒有

EDUC2007 文言語法修辭教與學
TEACHING AND LEARNING OF THE GRAMMAR AND RHETORIC OF LITERARY CHINESE

本科旨在切合澳門現行中學文言教學的內容和要求。教學內容以中學課程教學需要為導向，講授文言語法和修辭的基本知識，並注重培養學生講授文言語法和修辭知識的能力。文言修辭與文字、音韻、詞彙、語法、訓詁相關聯，故本科有助學生提高學生閱讀和欣賞古詩文的能力。

先修科目：沒有

EDUC2008 GENDER AND EDUCATION

This course aims to provide students with an overview of topics, controversies, and positions on the role of gender in education and to examine with students issues, research, theory and policy on gender and education from a historical, political and contemporary perspective. With reference to their personal experiences and observations, students will examine intersections of gender with class and ethnicity in different social mechanisms through which the patterns of educational inequality are changed or reproduced. Students will also discuss implications for gender research in school achievement, peer interaction and socialisation, teacher-student interactions, hidden curriculum, knowledge production and distribution in higher education, divisions in schooling across cultures and teaching as work. More generally, gender effects in socialisation and schooling are analysed for their implications for individuals, society and culture.

Pre-requisite: None

EDUC2009 MEDIA LITERACY AND CITIZENSHIP EDUCATION

This course aims to develop the critical abilities that create literate media consumers. The increasing pervasiveness of Western popular culture via all forms of media around the world has had an immense impact on the ways in which we produce ourselves socially in relation to our own lived experiences and desires, together with how these identities may be perceived by others in relation to their own practices of consumption. In this context, this course will consider the wider pedagogical implications of popular culture in terms of the production and distribution of media texts and how we consume and respond to them.

Pre-requisite: None

EDUC2010 NURTURING TALENTED AND CREATIVE LEARNERS: KNOW-WHAT, KNOW-WHY AND KNOW-HOW

The course introduces structures, functions, power and plasticity of the human brain, emphasising the interplay between nature and nurture for the lifetime development of the human mind. Based on recent advances in biology, cognitive psychology, neuropsychology and anthropology, contemporary intelligence and creativity theories (e.g. theorists like Sternberg, Gardner, Csiksentmihalyi, amongst others) are then expounded. A century of assessment research on

intelligence and creativity will be elucidated, highlighting the major paradigm shifts therein. Participants are empowered to design environments and activities undertaken within cultural contexts for nurturing talented and creative learners in the 21st century.

Pre-requisite: None

EDUC2011 中國啟蒙教育

ENLIGHTENED EARLY CHILDHOOD EDUCATION IN CHINA

本科旨在講解中國歷代啟蒙教育（兒童教育）的意義與時代作用；揭示歷代啟蒙教育的發展概況，介紹歷代著名啟蒙教材，如《三字經》、《百家姓》、《千字文》、《千家詩》、《弟子規》、《聲律啟蒙》等，引導學生研讀與討論，從而探討啟蒙教育的教學目標、教學理論、教學方法，藉以古為今用，推陳出新；並養成學生對啟蒙教育的認知與興趣，充實教授啟蒙教育的能力。

先修科目：沒有

EDUC2012 HISTORY OF EDUCATION IN THE EAST AND THE WEST

This course aims to discuss the important events, educational thoughts and systems in the history of education in China and the West. The related political, social, economic and cultural contexts will be analysed for an interpretation of the background and development of each era and stage in history. This course will allow students to understand how educational activities evolved in history and to learn from the experiences and thoughts advocated by educators in the past.

Pre-requisite: None

EDUC2013 HEALTH CARE AND MASSAGE IN PE AND SPORTS

This course, which combines medical health care with exercise science, offers the basic knowledge as well as the skills essential for the prevention, evaluation and treatment of common injuries in the care of physically active individuals. Topics such as physical measures, medical supervision in sports, hygiene in youth and females, prevention and treatment of sports injuries, sports massage and medical sports will be introduced. This class also emphasises hands-on experiences and the need for students to develop their practical skills. Upon completion of this course, students should be able to become familiar with the concepts and basic medical knowledge relevant to sports, to know how to prevent and treat common sports injuries and to apply what they have learnt in physical fitness and ways of recovery from exercise fatigue.

Pre-requisite: None

EDUC2014 PSYCHOLOGY OF ADOLESCENTS

This course aims to help educators understand the characteristics of adolescents from psychological points of view. It covers the following topics: the emergence of adolescence, classic and contemporary theories, physiological and sexual development, intellectual and cognitive development, self-concept and identity formation, emotional adjustment, moral development, peer and friendship group, socialised anxiety, views on work, life, marriage and family, and adolescent problems related to parenting, schooling and social change. Lectures, group discussions, reading assignments and research projects are employed to equip pre- and in-service teachers with professional insights into the psychological well-being of teenagers (aged 10 to 18, senior primary to high school years).

Pre-requisite: None

EDUC2015 YOUTH CULTURE

This course aims to provide students with a variety of perspectives on youth culture so that students could have a better understanding of not only activities of the youth but also how the youth and their activities are represented and thus perceived by the general public. Students will be engaged in debates over how youth culture is interpreted. How far could it be seen as part of national culture, although it seems peculiar to a particular age group of a nation? How far could youth culture be seen as a subculture? And, if so, in what ways should youth culture be regarded as deviance, mass culture, resistance (or counter-culture), or a social movement? And how do capitalism and globalisation impact on youth culture? Relevant concepts and theories will provide

students with insights into examining youth culture in Macao and evaluating existing Macao youth policies.

Pre-requisite: None

EDUC2016 古籍導讀與教學

INTRODUCTION TO CLASSICAL WORKS AND ITS TEACHING

本科對四部（經、史、子、集）作綜合性的講述和介紹，選擇若干重要的古籍作進一步評析，增強學生閱讀古籍的基本知識，並教授學生如何把所學知識靈活運用在教學中，以便對將來教學實踐有幫助。

先修科目：沒有

EDUC2017 寫作教學與中華文化

TEACHING WRITING AND CHINESE CULTURE

本科旨在協助學生了解進行寫作教學的基本原則和方法，認識與寫作教學有關的中華文化內涵，通過教導寫作與中華文化之關係，使學生明瞭如何提升寫作技巧和內容，為日後在中學教授中文課程作出準備。

先修科目：沒有

EDUC2018 SUBJECT-BASED TEACHING METHODS I (ENGLISH)

It is so designed as to equip student teachers with the essentials of English language teaching and to develop their abilities to teach effectively at the secondary school level through reflecting upon theory and practice. It aims at familiarizing them with major ELT approaches, the techniques and strategies of integrated teaching and communicative skills, materials development and the use of multimedia aids and various resources to enrich, enliven and innovate teaching and learning.

Pre-requisite: EDUC1023 and EDUC1024

EDUC2019 SUBJECT-BASED TEACHING METHODS II (ENGLISH)

It is so designed as to equip student teachers with the essentials of English language teaching and to develop their abilities to teach effectively at the secondary school level through reflecting upon theory and practice. It aims at familiarizing them with major ELT approaches, the techniques and strategies of integrated teaching and communicative skills, materials development and the use of multimedia aids and various resources to enrich, enliven and innovate teaching and learning.

Pre-requisite: EDUC2018

EDUC2020 FOCUSED ENGLISH SKILLS FOR ELT TEACHERS: SPEAKING

This course is designed for FED students in the English stream and will cater to the needs of prospective English teachers in their professional lives, i.e. to read aloud teaching materials accurately and fluently, maintaining the interest of a second language learner audience and communicating meaning adequately in the process; to give lectures and produce spoken language with structures that are grammatical and generally adequate despite occasional errors; and to interact with peers in a group discussion, keeping the discussion focused and using conversational strategies effectively. There will be three focus areas in this course: (1) reading aloud English teaching materials including poems and prose passages; (2) giving short speeches or mini lectures such as recounting an experience or presenting arguments; and (3) engaging in professional interaction about content knowledge/subject matter knowledge. Students coming to this course will raise their awareness to the common English pronunciation problems of Cantonese speakers. They will also be given models of accurate pronunciation and ample practice opportunities to improve their English pronunciation, interaction strategies and oral communication skills.

Pre-requisite: EDUC2018 and EDUC2019

EDUC2021 ENGLISH LINGUISTICS AND LITERATURE AS RESOURCES FOR TEACHERS

This course is not a course on linguistics analysis; nor is it a course on criticism of literary studies. In other words, this course is not intended to teach students how to study literature – either from the stylistics or the literary critical viewpoint. Rather, this is a course for prospective teachers and aims to introduce to them the possibilities of using literary texts as a resource for stimulating language activities. The course will examine the justification for using literary texts in language classrooms and will provide samples of classroom materials which are designed for engaging students interactively with the given literary texts, with fellow students and/or with the teacher, in the performance of tasks involving these texts. While this course aims at enriching student teachers' knowledge in the use of literary materials in language classrooms, it will also provide them with hands-on experience in the design of tasks for language teaching and learning.

Pre-requisite: EDUC2018 and EDUC2019

EDUC2022 TEACHING READING AND WRITING

This course will examine the theoretical bases for reading and writing in the light of current perceptions of the processes and strategies involved in these skills and will explore recent developments and models of second language reading and writing as well as the pedagogical impact of these developments. The course will also integrate theory and practice and discuss how to teach English reading and writing lessons in Macao classrooms.

Pre-requisite: EDUC2018 and EDUC2019

EDUC2023 TEACHING LISTENING AND SPEAKING

This course will review the theories and approaches related to speaking and listening and analyses the different processes and strategies that speakers and hearers use as they speak or listen. The course will also examine the pedagogical approaches to teaching speaking and listening and the design and planning of speaking and listening lessons in Macao classrooms.

Pre-requisite: EDUC2018 and EDUC2019

EDUC2024 TEACHING GRAMMAR AND VOCABULARY

This course will examine relationships between grammar, meaning and context and the role of vocabulary knowledge in language learning. It will also identify issues and problems in teaching and learning English grammar and vocabulary and discuss how to plan and teach grammar and vocabulary effectively in Macao classrooms. In addition, strategies for helping learners gain control over systems of English grammar as well as learner strategies in acquiring English vocabulary will be explored.

Pre-requisite: EDUC2018 and EDUC2019

EDUC2025 TEACHING FUNDAMENTAL MOVEMENT SKILLS FOR YOUNG CHILDREN

The course introduces the theories about the development of physical and motor movement in early childhood, to know the foundations for teaching of movement for student teacher to develop child's movement skills and gross motor learning and to plan movement activities and lessons for fun. The primary purpose of the course is enable students to apply principles of child motor development and learning to plan Physical activities. It will prepare students to teach, organize and manage different activities, make groups, demonstrate skills (locomotors, gymnastics and rhythmic movement) and give feedback to young children to enhance their motor skill and movement experience.

Pre-requisite: CPED1001 and CPED1002

EDUC2026 幼稚園中文教學 TEACHING OF CHINESE IN KINDERGARTEN

本課程旨在讓學員認識語文學習對幼兒發展的重要性，掌握中文語文活動的教學原理、方法及發展趨勢，並學會根據幼兒不同發展階段的需要，提供不同的語言教育。期望學員能透過本課程學會如何引起幼兒對學習語文的興趣，以及全面提高幼兒聽、說、讀、寫的能力。此外，學員亦能學會評鑑幼兒語文教學之模式，及檢視如何利用不同的資源及方法鷹架幼兒語文能力的發展。

EDUC2027 YOUNG CHILDREN'S MATHEMATICAL ACTIVITIES

Mathematics has always been taken seriously by educational institutions as an important discipline. In fact, mathematical concepts exist in our everyday life. The aim of this course is to introduce teaching principles and strategies that facilitate 0 to 8-year-old children's mastery of some basic mathematical concepts. It also attempts to illustrate ways to make children understand the relationship amongst simple mathematical concepts and the connection of these concepts to their everyday experiences as well as ways to foster children's interest in mathematical thinking through integrating mathematics into an overall design in curriculum and instruction.

Pre-requisite: None

EDUC2028 INTEGRATED CREATIVE ACTIVITIES

This course will examine the theories of creative thinking, provide students with a deeper and broader view of creative activities and enable them to put theory into practice in their everyday life and teaching. The content will also cover the development of children's creativity, the essential elements in creative thinking, and applications of the principles of teaching for creative thinking, expression and experiences.

Pre-requisite: EDUC1000

EDUC2029 PLAYING AND LEARNING

Human beings were born with the ability to play, an instinctive competence which facilitates our learning. Children's play is often mistaken as time-wasting and indulgence and its role in learning have often been neglected. The aim of this course is to re-shape students' understanding of play, especially free-play, and to highlight the value of play in children's growth and its functions in learning. It will also explore different types of play and analyse their roles in children's learning and development from various perspectives, re-state teachers' role in children's play, as well as demonstrate the relationship among play, personality and the realisation of children's potentials.

Pre-requisite: None

EDUC2030 PARENTAL EDUCATION AND INVOLVEMENT

Family plays an important role in the child's upbringing. The course aims to explore how we, as teachers, can empower the parents to play a role in the positive development of the child. Emphasis is put on possibilities and strategies concerning the implementation of parent education and parental involvement in the local school context. Topics include: integrated approach to building staff-parent partnerships, family relationship and personal growth, disciplining methods and principles, parental ethics, development and implementation of parent education, and family-school collaboration.

Pre-requisite: None

EDUC2031 CREATIVE PHYSICAL ACTIVITIES AND EQUIPMENT FOR YOUNG CHILDREN

The course aims to introduce the tried-and-true guidelines for students to explore child body awareness and physical movement with four basic movement concepts (body, space, effort, relationship) and their elements. It will also help students to create and modify equipment for enriching the learning environment. Students will learn how to apply the methods of integrated learning in lesson planning and teaching/learning activities.

Pre-requisite: None

EDUC2032 MOVEMENT PROGRAMME FOR YOUNG CHILDREN

This course helps students to understand the importance of movement for the different aspects (physical, affective and cognitive) of child development. The course gives equal stress on theories and practice. It enables student to put knowledge into practice through engaging in group discussion, planning movement station lessons, and designing movement programmes.

Pre-requisite: EDUC2025

EDUC2033 PRIMARY MATHEMATICS TEACHING SKILLS AND PRINCIPLES

This course aims to develop basic skill and theory for primary mathematics education.

1. Mathematically speaking skill and Mathematical language training
2. Introduction Design in mathematics teaching
3. Writing skill and Design
4. Assessment skill: Error Analysis
5. The reasoning principle and application
6. The student-centered design principle and application
7. The principle and applications from concrete to abstract principles
8. The principle and Application of the step-by-step principle

Pre-requisite: None

EDUC2034 THE DEVELOPMENT OF MATHEMATICS INTEREST, CONCEPTS, AND KEY IDEAS FOR PRIMARY MATHEMATICS

This course aims to develop basic mathematics knowledge and basic ability in mathematics for primary teachers.

1. Interest cultivation of primary mathematics
2. The development and training of proper mathematics problem solving habits
3. The development and training of Mathematical Beauty
4. The development and training of calculation ability
5. The development and training of Problem Solving
6. The development and training of geometric thinking and spatial concepts
7. The development and training of data collection, collation and description
8. The development and training of Algebraic Thinking

Pre-requisite: None

EDUC2035 CHILD DEVELOPMENT

In individual's interpersonal relationship, thinking and learning abilities, as well as conceptions of the world of children in middle childhood (primary school children) are in many ways different from those in their early childhood. This course aims at enhancing in- and pre-service primary school teachers' understanding of this age group, in particular, their psychological changes. The contents will cover objective analyses of the different aspects illustrated with the research directions of this life period.

Pre-requisite: None

EDUC2036 PHYSICAL EDUCATION II - SPORT EDUCATION AND EXERCISES HABIT DEVELOPMENT FOR YOUNG ADOLESCENT

Students in upper level primary are more mature to handle different sport activities. This programme emphasizes the learning of how to teach athletic and ball games to upper primary school students. Modified sports activities and systematic learning are the major contents in teaching with purpose to assist the development of exercise habit in activities. In this course, the developmental sequences of athletic activities and ball skills are introduced. Relevant background knowledge, game complexity and transfer, games sense, curriculum arrangement, assessment format, rules and regulations and safety measures will be covered to assist the teaching and learning of different sport activities.

Pre-requisite: None

EDUC2037 INTEGRATED ACTIVITY TEACHING AND DESIGN FOR PRIMARY EDUCATION

The course aims to introduce participants the rationale of Integrated Activity Teaching and Design for Primary Education. At the end of the course, participants are able to plan and design integrated curriculum and activity according to the ability, interest and necessity of primary students. As there are differences in adapting the integrated concept in Chinese and English teaching and if there is an available of suitable colleagues, students will be divided in groups of Chinese and English in programme learning.

Pre-requisite: None

EDUC2038 ELEMENTARY MATHEMATICS TEACHING & RESEARCH

All over the world, students encounter persistent difficulties (both cognitive and affective) in their learning of some elementary mathematic topics (e.g. fractions, negative numbers, solving word problems, mathematical proofs). Course participants will be studying empirical research reports of relevant teaching experiments that aim to help students overcome these learning difficulties. Under the instructor's guidance, course participants are expected to devise or revise lesson plans in light of research findings and to engage in reflective action research so as to relate theory with practice.

Pre-requisite: EDUC1000

EDUC2040 DESIGN AND ANALYSIS OF LEARNING MATERIALS FOR ELEMENTARY SOCIAL STUDIES

The contents of elementary social studies involve broad knowledge areas, mainly including the simplified concepts and facts of different disciplines in social science. This course aims at introducing the scope and key ideas of elementary social studies, and helping learners to understand how to use some principles and techniques to design and analyze various kinds of learning materials for elementary social studies.

Pre-requisite: None

EDUC2041 ENGLISH GRAMMAR

The course aims to help students to understand how English grammar works. It also introduces the techniques they need to analyse English grammar. The course will simultaneously prepare students for further linguistic study.

Pre-requisite: None

EDUC2042 ENGLISH PHONOLOGY

The course examines descriptively the phonetics and phonology of contemporary English. The major accents described are the British one known as "Received Pronunciation" (RP) and General American (GA) while other accents will be compared where necessary.

Pre-requisite: None

EDUC2043 普通話教學研究**THE RESEARCH OF THE TEACHING CHINESE IN MANDARIN CHINESE**

本課程旨在探討幼兒與小學教育階段“普通話課程/教材”或“用普通話教授中文課”可能遇到的相關問題。教授學生掌握普通話語音、語法、詞彙和修辭等知識，培養學生運用普通話教學的能力，介紹普通話在幼兒與小學教育階段課程與教學上的運用，並分析普通話教學中常見的問題與解決之道。本課程適合想從事學前及小學教育工作的學生選修。

先修科：沒有

EDUC2044 GUIDED CHINESE READING AND WRITING

This course is designed to equip pre-service student teachers with the knowledge and skills of Chinese teaching. The contents include an overview of the development of reading and writing instruction theories, a variety of teaching strategies, and also the appreciation and creation of different texts. In addition, integrated reading and writing activities will also be arranged to facilitate teaching and learning. The main teaching strategies applied in this course are instruction, modeling, cooperative learning, investigative learning and problem based learning.

Pre-requisite: None

EDUC2045 TEACHING OF PHYSICAL EDUCATION

The course aims at helping students to understand the importance of teaching physical education in school and process in attaining the expected goal in education. Mosston's Teaching Spectrum and approaches in Games Learning will be introduced. Students will have chances to learn about various principles and methods in teaching, motives in learning, curriculum planning, evaluation and assessment, safety issue and development of health-related fitness in children. The principle of Discrete Trial Training (DTT) will be adopted. The purpose is to assist students' professional

build-up of knowledge in games teaching in children with simple but structured and connected trials.

Pre-requisite: EDUC1015 or EDUC2036

EDUC2046 TEACHING OF MUSIC: ELEMENTARY GENERAL MUSIC METHODS

The course is the continuation of Musicianship I and Musicianship II and aims at the development of students' knowledge in teaching music at primary school. It includes advanced music theory and sight reading training. Students are expected to familiar with the knowledge and apply in their music teaching. Besides, advanced piano accompaniment will also be included in the course. The teacher will introduce the textbooks and curriculum standards from several nations so that students will have global prospective of music teaching. Furthermore, the most leading music method, Orff Music Method, will also be introduced in the course. Students will be expected to familiar with the concepts of this method and apply it in their music teaching. At last the music assessment will be used in the course so that students can understand their own progress from teacher, peers and themselves. The evaluations can also be used as an effective assessment methods for their future music teaching.

Pre-requisite: EDUC2063

EDUC2047 詩文選讀與教學

GUIDED READING AND TEACHING OF CHINESE PROSE AND POETRY

本課程簡介詩詞、散文的特點、發展，選讀不同時代的一些重要詩文作品，以提高學生對中國文學作品的欣賞、理解、分析能力，並加強對中國文化的認同感，並教授學生如何蒐集相關的詩文材料，編寫教材，選用適當的教學法，以便將來能在教學實踐中靈活正確運用。

先修科目: 沒有

EDUC2049 SUBJECT BASED TEACHING METHODS (SECONDARY MATHEMATICS) I

This course focuses on empowering course participants to write teachable lesson plans and programme of study pertaining to three key domains of secondary mathematics curriculum: elementary expressions and functions depicting changes and relationships; and coordinates, synthetic and dynamic geometry; special topics of mathematical investigations. Due attention is paid on professional treatment of a number of issues that have a bearing on successful meaningful student learning: educational objectives in accordance with key stages of secondary education; mathematical literacy, competencies, and thinking underpinning various pedagogic and instructional models; history of development of mathematics in different cultures; psychology of mathematics learning, particularly for Chinese learners and different gender; use of calculators and ICT tools for mathematics education; and good balance of assessment of learning and assessment for learning.

Pre-requisite: EDUC1022

EDUC2050 ELEMENTARY MATHEMATICS TEACHING AND RESEARCH

Around the world, students encounter persistent difficulties (both cognitive and affective) in their learning of some elementary mathematics topics (e.g. fractions, negative numbers, solving word problems, mathematical proofs). Course participants are empowered to study empirical research reports of relevant teaching experiments that aim to overcome these learning difficulties. Under guidance, they are expected to devise or revise lesson plans in the light of research findings and engage in reflective action research so as to relate theory and practice underpinning the teaching experiments.

Pre-requisite: EDUC1000

EDUC2051 中國歷史課程與教學 I

CHINESE HISTORY CURRICULUM AND TEACHING I

本科旨在介紹中學中國歷史科課程，以及與課程有關之教學方法，而中國歷史發展過程，亦會涉及，使學生能應付日後在中學教授中國歷史課程之用。This course provides students with an overview of the curriculum and teaching of the secondary school Chinese history. Through a systematic introduction to historical events, they are expected to become competent history

teachers.

Pre-requisite: None

EDUC2052 中國歷史課程與教學 II

CHINESE HISTORY CURRICULUM AND TEACHING II

本科旨在介紹中學中國歷史科課程，以及與課程有關之教學方法，而中國歷史發展過程，亦會涉及，使學生能應付日後在中學教授中國歷史課程之用。This course provides students with an overview of the curriculum and teaching of the secondary school Chinese history. Through a systematic introduction to historical events, they are expected to become competent history teachers.

Pre-requisite: None

EDUC2063 MUSICIANSHIP II

This course is the continuation of Musicianship I. It aims to develop knowledge in understanding intermediate music theory, sight singing, and ear training accurately. Besides, in order to follow the international trends of music teaching, recorder training will also be included in the course. Students are expected to be able to play elementary recorder songs by end of the semester. Furthermore, piano training will continue to be included and students will be able to play songs with the intermediate level by end of the semester. At last, the teacher will analyze several different music text books from the great China regions, such as, Macao, Hong Kong, Taiwan and China in order to better prepare students a global perspectives and understanding in music teaching.

Pre-requisite: EDUC1054 or equivalent (by audition)

EDUC2064 TEACHING OF MUSIC I

This 1.5 credit hour course aims at equipping students with knowledge and skills of teaching music at pre-primary level in Macao background. Students will learn some basic concepts of music teaching including principle of preparing lesson plan, and techniques of designing and demonstrating music elements incorporated in activities.

Pre-requisite: EDUC1054

EDUC2065 TEACHING OF MUSIC II

Based on the prior 1.5 credit hour course experiences, students in this course will explore further on some popular music education theories. Students will have more chances to demonstrate teaching music creatively with proper musical language. These include selecting and editing good music literature as material, creating rhythmic movement and instruments for kids, and building their own music library for long-term teaching, etc.

Pre-requisite: EDUC2064

EDUC2066 VISUAL ART II: THEORY AND PRACTICE

Visual art as an articulate form of visual culture is capable of displaying the dynamic cultural relationships between/among different academic disciplines and life domains. Its products are not merely "decorations" to please the eyes; they respond to life's profound problems through expression of their creators' cultural, historical, and life concerns. The course aims not only to familiarize students with the languages of traditional and contemporary Chinese and Western visual arts, but also to help them explore the relationship between visual art and life through art practice, leading them to understand the beauty, style and culture of art through experimenting with different media and techniques.

Pre-requisite: EDUC1060

EDUC2067 TEACHING OF VISUAL ART

The course provides students with an opportunity to understand visual art education in both local and global contexts. While studying curriculum design and the diverse modes of teaching in visual art (interactive, integrative and interdisciplinary), students will also be led to examine the role of visual art in education and given an opportunity to design a curriculum in visual art education.

Pre-requisite: EDUC1060

EDUC3000 INTEGRATING IT INTO TEACHING AND LEARNING

The aim of this course is to equip the students with the latest theoretical knowledge in multimedia learning, practical skills on computer tools, and a critical understanding of the application and value of IT in teaching and learning so as to allow students to implement, integrate and manage IT in their actual classroom environment.

Pre-requisite: None

EDUC3001 EDUCATIONAL ADMINISTRATION

This course allows students to understand the basic concepts of educational administration. Students will study and discuss Macau educational acts and decrees. They will also learn the basic theories related to educational administration, such as theories with regard to motivation, leadership, communication and organizational decision-making. Attempts will be made to make this course related to the educational reality in Macau.

Pre-requisite: None

EDUC3002 EDUCATIONAL RESEARCH

The main aim of this course is to enable a qualified teacher to use, understand, analyze and evaluate research outcomes. The course includes: (1) the basics of educational research, (2) structure and procedures of education research, (3) research variables, (4) hypotheses and topics, (5) literature review, (6) on-line search, (7) sampling, (8) questionnaires, (9) correlation analyses, (10) interviews, (11) case studies, (12) evaluation of research reports, (13) educational research ethics, etc.

Pre-requisite: None

EDUC3003 INTRODUCTION TO SPECIAL EDUCATION

This course is designed to provide an introduction to the characteristics of children with special needs or disabilities. Emphasis will be put on several types of children with special education needs—learning disabilities, emotional and behavioural disorders, attention deficit and hyperactivity, autism, and mild intellectual disability. This course also provides some practical guidelines on how to teach in inclusive classrooms.

Pre-requisite: EDUC1000 and EDUC2003

EDUC3004 INTRODUCTION TO SPECIAL EDUCATION

This course helps students to understand more about children with special needs. It introduces the definitions, causes, characteristic and categories of the disabilities in early childhood. The content will also cover instructional theories, principles and tactics, assistance methods, IEP and programme planning, assessment for children with special needs, and positive attitude. Through this course, students will be able to help these children more effectively with early intervention or special education programmes to assist their potential developments. In addition, students will be taught how to make use of the pre-school and school-age special education measures and services in Macao in order to help those children and their families, and they will understand the effects and importance of parents' and professional teams' participation in the education of children who have special needs.

Pre-requisite: EDUC1000 and EDUC2003

EDUC3005 CLASSROOM MANAGEMENT (SECONDARY)

This course is designed to give students a broad overview of classroom management, including its base in theory, application in practice and implication. At the theoretical level, topics include different approaches to class management, establishing effective rules and procedures and classroom management systems. At the application level, topics include managing individual student behaviour, managing behaviour in a variety of instructional formats and examining the causes of and solutions to disruptive and noncompliant behaviour and classroom management problems that are within the control of the classroom teacher. The goal of the course is to help students develop their own approach to build an inclusive, productive and well-structured learning environment conducive to high levels of student support and accomplishment.

Pre-requisite: EDUC1000 and EDUC2003

EDUC3006 TEACHER ETHICS AND TEACHER PROFESSIONAL DEVELOPMENT

The aim of this course is to prepare students to develop teachers' professional morality. After that, they can give their students 'whole-person' education by integrating teachers' instruction, their model and their environment. The experience and the development of teacher's professional morality are fully represented in the different relationships in their work, including facing themselves, their colleagues, students, students' parents and society. The content of this course includes learning different principles of teachers' professional ethics, and how to use and develop these theories reasonably in their teaching lives.

Pre-requisite: None

EDUC3007 & EDUC3008 學科教學法 I (中文) 學科教學法 II (中文) SUBJECT-BASED TEACHING METHODS I (CHINESE) SUBJECT-BASED TEACHING METHODS II (CHINESE)

本課程旨在將理論與實踐結合，使學生增加和深化中文教學專業知識。掌握教學理論和方法，因應不同情況，採用適當方式，引導他人用心學習。

先修科目： EDUC1047 為 EDUC3007 的先修科目

EDUC3007 為 EDUC3008 的先修科目

EDUC3009 中國歷代詩詞曲賞析與教學 THE APPRECIATION AND TEACHING OF POETRY, LYRIC AND VERNACULAR SONGS

本科旨在講授中國古代韻文——詩、詞、曲——的意義、特點、形式與異同；以唐宋詩詞、元曲為主要教材；就作品的題材、意境、情韻、寫作技巧等詳加闡釋，引導學生賞析與研習；促使每個學生寫作詩、詞、曲各一首，並在課堂上演示，以收理論與實踐相結合之效，藉以培養學生教授詩、詞、曲的學養，以及日後擔任教師的教學能力。

先修科目：沒有

EDUC3010 中國思想史與教育 HISTORY OF CHINESE THOUGHTS AND EDUCATION

本科旨在使學員掌握中國思想的基本特質和義理及其與教育的關係。教學重點包括：先秦儒家思想、墨子思想、法家思想、老莊哲學、兩漢思想、隋唐佛學和宋明理學。本科並著重探討如何把傳統中國思想經過批判的繼承與創造的詮釋，使之能與教育思潮進行檢討與反省。

先修科目：沒有

EDUC3011 EDUCATIONAL POLICY AND PRACTICE IN MACAO

This course aims to broaden and deepen students' understanding of the Macao education system from a policy study perspective. Students are provided with analytical tools to comprehend and examine educational policies and their implementation from the political transition period to the post-1999 era. The course begins with a brief historical background of developments in Macao, and the empirical analysis of policies will commence with the 1991 Law 11/91/M and extend to the post-1999 Chief Executive Annual Policy Address.

Pre-requisite: None

EDUC3012 科舉與中國教育 CIVIL EXAMINATION AND TRADITIONAL EDUCATION IN CHINA

科舉制度是設立科目進行考試、用以選拔官吏的制度，實行共約一千三百年，對中國政治、經濟和社會各層面產生深刻的作用。到了清末，隨著西力東漸和國力不振的環境下，科舉制度終於被新式學堂所取代。學員在完成本課程後，對科舉與中國教育的緊密關係將能更全面地把握，並明瞭其對中國教育所造成的巨大影響。本課程亦就科舉制度與中國政治、社會流動、廢科舉興學堂的過程和影響予以深入探討，讓學員瞭解中國社會文化變遷的核心因素。

先修科目：沒有

EDUC3013 ASSESSMENT IN SCIENCE EDUCATION

Formative classroom assessment advances learning by providing feedback to teachers and students about learning attainment. The course focuses on how evidences of learning can be collected through classroom formative assessment and evaluated by teachers for instructional purposes. Students will explore new assessment approaches capable of collecting data on learning across STEM content areas and Bloom's cognitive levels. The class will explore new information infrastructures that support student learning and classroom assessment. The roles of teachers and learners in supporting assessment of this kind will be discussed.

Pre-requisite: None

EDUC3014 I MUSIC: MUSIC, ME, & THE SOCIETY

'I Music' means each participant (student) will make music. The course applies socio-cultural and psychological perspectives to present music as functional art as well as all-time media for connecting the self and the society. Students are encouraged to explore, identify, and analyze various forms of musical events that occur in their daily lives and their community. To enforce critical thinking on music's role in the students' personal and social lives, an interactive approach is used, including singing favorite songs or playing instruments, to introduce views of personality and culture, visiting local performing groups/musicians to nurture potential musicians, debating controversial views of music from research findings, and attending concerts. Afterward, each student conceptualizes the richness and power of music in human lives and in the globe.

Pre-requisite: None

**EDUC3015 中國古代歷史教育
ANCIENT HISTORY TEACHING IN CHINA**

本科以培養學員掌握中國古代傳授和傳播歷史知識和觀念的活動為重心。課程以中國歷史教育發展的興衰為主線，並就歷史教材與歷史讀物、門閥政治與歷史教育、科舉考試與歷史教育、蒙學教育與歷史教育等方面作出較深入的探索。在完成本課程後，學員將對歷史教育的價值與貢獻有更全面的認知。

先修科目：沒有

**EDUC3016 文史通論與閱讀教學
LITERATURE, HISTORY AND READING**

本科旨在協助學生了解文史基本範疇相關知識與閱讀教學之關係，使學生明瞭閱讀教學之要點，認識如何在文史基礎上配合閱讀教學，為日後在中學教授中文課程作出準備。

先修科目：沒有

**EDUC3017 中國現當代文學作品與教學
MODERN AND CONTEMPORARY CHINESE LITERATURE AND ITS TEACHING**

本科在於通過教學，使學生掌握中國現當代文學發展的過程；瞭解其間部分重要作家的創作概況，熟悉並掌握他們代表作的思想及藝術特色；要求學生通過分析評述，提高對現當代文學作品的評判和鑒賞能力，加深學生對中國優秀文化的認識和理解。本科主要教授中國現當代重要作家的著名作品。此外，並指導學生就該等作品，編寫教材，採用合適的教學法，以便日後在教學實踐中靈活正確運用。

先修科目：沒有

EDUC3018 SOCIO-CULTURAL ASPECTS OF ENGLISH LANGUAGE TEACHING

This course deals with the social, political, and cultural dimensions of English language teaching. It aims at developing among the students an understanding of the socio-cultural situatedness of ELT pedagogy and associated political dynamics, the international spreading of English and its impacts, and the role of intercultural competence in successful language learning. Topics to be covered include language identity, World English, globalisation and localisation related to ELT, and sociolinguistic relativity and causes of miscommunication.

Pre-requisite: EDUC2018 and EDUC2019

EDUC3019 CREATIVE IDEAS IN THE ENGLISH LANGUAGE CLASSROOM

This course will first review the different stages of an English language lesson and the steps and procedures for teaching the four skills, grammar and vocabulary. While building upon students' existing knowledge of language teaching and introducing to them categories and samples of creative activities that encourage ESL/EFL learners' fluency, flexibility, elaboration and originality, the course aims at cultivating in students the concept of creativity in language teaching and developing their competence in designing English lessons with creative ideas and fun but without sacrificing the important element of meaningful practice of target language items. The course will provide students with hands-on experience in planning and conducting creative English lessons through the development of teaching plans and micro-teaching.

Pre-requisite: EDUC2018 and EDUC2019

EDUC3020 SOCIAL AND CULTURAL ACTIVITIES

Based on the best practices in early childhood education, the course aims to help students understand the importance of the social domain in the kindergarten curriculum. Through this course, students will learn the designing of social and cultural activities, study the teaching and learning strategies in this area, and master the methods of helping young children develop social awareness and social competence in a democratic, culturally diverse and interdependent world.

Pre-requisite: EDUC2001 and EDUC2003

EDUC3021 HEALTH AND CARE FOR YOUNG CHILDREN

Childhood is the earliest, most vulnerable and difficult nursing stage and also the most important stage in our lives. This course will equip students with the knowledge and understanding of children's growth, health and care, the foundation of the pre-primary education field. It will introduce how to provide children with appropriate nutrition and how to handle their common diseases, injury and safety. Topics include principles of children's growth, their behavioural and emotional characteristics, analysis of the positive and negative factors and ways to provide a safe and healthy environment for growing children. Students can apply the theories and knowledge in kindergartens to promote health education and to work towards the goal of holistic health and care.

Pre-requisite: None

EDUC3023 EDUCATIONAL TECHNOLOGY IN EARLY CHILDHOOD EDUCATION

This course aims at enhancing teacher trainees' understanding of various applications of educational technology, so as to empower them to use technology effectively in kindergartens. It provides an overview of the latest development of technology for teaching and learning, with an emphasis on its use with appropriate instructional designs in the early childhood education (ECE). To achieve this end, this course will examine how to integrate instructional methodology with contemporary educational technology within ECE learning contexts and how to fulfil the objectives of the ECE curriculum based on instructional models. After completion of the course, teacher trainees will be able to integrate educational technology in supporting young learners' development in different disciplinary areas, resolve issues arising in this process and take up related challenges with confidence and efficacy.

Pre-requisite: None

EDUC3024 CURRICULUM AND INSTRUCTION IN EARLY CHILDHOOD EDUCATION

This course seeks to introduce course participants the principles of curriculum development and design, grounded on contemporary theories of learning and the ECE curriculum standards promulgated in Mainland, Taiwan, Hong Kong and selected western countries. Influential ECE curriculum models practiced in local and abroad will be introduced. With reference to the ECE teaching materials commonly used in Macao kindergartens, course objectives, contents, implementation and evaluation will be elucidated to help participants plan a course that is educationally appropriate to the pre-primary children. Course participants are taught to base on influential models of integrated thematic study to practice individually configured education.

Pre-requisite: EDUC1000 and EDUC1013

EDUC3025 ENGLISH LANGUAGE LEARNING IN EARLY CHILDHOOD

This course is intended to introduce practical strategies in teaching pre-primary pupils English as a second or foreign language through the use of various language activities such as games, songs, nursery rhymes, role plays, and story-telling. Course participants also have opportunities to learn how to design and adapt different teaching materials and resources in order to develop pre-primary pupils' learning interest and maximize their learning outcomes in the classroom. The course also helps participants to develop their own English phonological, grammatical and lexical competence.

Pre-requisite: None

EDUC3026 GUIDANCE IN EARLY CHILDHOOD

This course aims at equipping students of early childhood education with the knowledge of guidance and counselling so that they are able to take up the role of teacher-counsellors. This course will introduce classical and contemporary theories in guidance and counselling and include five components to facilitate the united growth of young children: basic concepts of guidance and counselling, personal growth, personal and social education, problem behaviours in early childhood, and counselling techniques. Various approaches of working with families in guiding children's behaviours are also covered.

Pre-requisite: EDUC2003

EDUC3027 ASSESSING YOUNG CHILDREN

To enable students a comprehensive understanding of young children's learning and development, this course provides an overview of educational assessment and introduces the principles and practices of authentic assessment which is highly valued in early childhood education. It explains why and how infants and young children should be assessed, discusses the contexts for authentic assessments, illustrates multiple strategies for collecting information on children's learning and development, and highlights the importance of conducting systematic observations and recording in the information collecting process. Through this course, students will understand how to utilize assessment information in improving the curriculum and teaching quality and facilitating parent-school partnership. Assessment practices will be linked to the local curriculum guideline which also underpins authentic assessment as the principal means of assessing young children. Ethical issues in this area will also be discussed.

Pre-requisite: EDUC1013 and educ3024

EDUC3028 INTEGRATED GENERAL STUDIES AND SCIENTIFIC ACTIVITIES

This course aims to introduce the content of general studies and scientific activities and the concept that young children's living activities are undertaken in the natural and social environment. The course will help students introduce to children the different operational methods such as observation, comparison, communication, measurement, inference and forecast. The design of scientific games in this course will encourage children to take an active role in constructing scientific concepts and cognition. The content of this course includes (1) objective, meaning, affective manner and value of scientific inquiry; (2) objects; (3) exercise and energy; (4) living things; (5) the earth; (6) living things and the environment and (7) life education.

Pre-requisite: None

EDUC3029 CHILDREN'S LANGUAGE AND LITERATURE

This course elucidates issues in language acquisition and children literature to teacher trainees. Course participants are empowered to enhance the literacy development of children through literature. Topics covered include: (1) major theories of language acquisition; (2) definition, typology, values and educational functions of children literature; (3) relationships between language and literature for children; (4) application of children literature in language teaching.

Pre-requisite: None

EDUC3031 EDUCATIONAL EVALUATION

This course seeks to introduce basic assessment notions and methodologies to students so that they can make use of the assessment feedback and interpretation professionally to improve

teaching and learning, to monitor children's all-round development and report their progress up to the age of late childhood (0-8 years). Guided by contemporary theories of learning and human development, course participants are empowered to design and administer assessment tools that tie in well with the course objectives and classroom processes of the early childhood education curriculum. At the end of the course, teachers should be conversant with the “know-what”, “know-how”, and “know-why” of formative curriculum-embedded assessment, and feel competent to apply the knowledge and skills acquired in authentic home and schooling contexts. Pre-requisite: EDUC1000

EDUC3032 DRAMA TEACHING IN EARLY CHILDHOOD

Drama helps preschoolers to learn through expressing themselves through movement, music, arts and language, and it is a good way to enhance creative learning. This course will guide and encourage students to help and lead children in exploring and improvising non-structured dramas. It will teach them how to choose books and themes, develop imagination and social skills of children, inspire their creative expressions, and organize and structure activities for their learning in the practical teaching environment. Pre-requisite: None

EDUC3033 EDUCATION PLANNING AND CREATION OF LEARNING ENVIRONMENT

This course aims to help students understand that a planned and diversified learning environment can allow children to choose their preferred environment according to curriculum, interests and abilities. Through specific and creative experiments, this course helps students understand how children learn and behave in different kinds of environments. From the planning of learning areas, placement and execution, students will be able to arrange appropriate learning environments for children, to have good interactions with them and to arouse their interest in learning. The content will also cover suggestions for different teaching activities and the link between curriculum planning and the design of learning environment. Pre-requisite: None

EDUC3035 DIGITAL RESOURCES APPLICATION IN KINDERGARTEN

In order to help teacher trainees in building digital portfolios and teaching resources, this course deals with the basic principles and practice of designing and developing multimedia and web-based resources based on the latest development in information technology. Pre-requisite: None

EDUC3036 ASSESSMENT AND IMPROVEMENT OF EFFECTIVE TEACHER - CHILD INTERACTIONS IN EARLY YEARS EDUCATION 0-8

This course is focused on theories and practices related to effective teaching in early childhood classrooms serving children birth through 8. Students will gain a deep knowledge and understanding of the types of moment-to moment teacher-child interactions that foster learning and development among young children. They will learn to identify specific teaching behaviors that support effective emotional, behavioral and instructional support interactions. Moreover, students will also be given ample opportunities to practice observational skills for identifying effective interaction behaviors as well as reflecting on their practice. Pre-requisite: None

EDUC3037 CURRICULUM & INSTRUCTION OF PRIMARY MATHEMATICS

This course aims to develop basic curriculum knowledge and teaching ability in mathematics for primary teachers.

1. Primary Mathematics Curriculum outline in Macao and others
2. The lesson design and example for mathematics concept development
3. Preparation of lesson plans, worksheets design, and example
4. Mathematics exercise design
5. Expanding the word problems --- design review & current design issues and solutions
6. Word Problem posing and design
7. The method of assessment and instructional design

8. Geometry Teaching Practice and example
 9. Examples and lesson design of Calculation topics
 10. The school observation
 11. Teaching Practice Sharing
- Pre-requisite: EDUC2033

EDUC3038 小學中文教學

TEACHING OF CHINESE IN PRIMARY SCHOOLS

本課程旨在引導學生學習拼音、識字、閱讀、寫作、說話/聆聽、書法等教學理論與方法，擴充其中國語文教學專業知能（語文知識、學習策略知識、語文技能、自我調整運用學習策略能力、鑑賞能力、教學方法、學習輔導能力，與課程綱要）。教師將結合討論教學、示範教學、問題導向學習、合作學習等教學策略，藉由精心設計的問題，引導學生分析教材、掌握小學生需求、選用適當的教學法、設計教學活動與評量活動。學生將從教師的教學設計與教學示範中親自感受學生中心的小學中文科教學活動，並且親身體驗多元評量的歷程。

先修科目: EDUC3040

EDUC3039 TEACHING OF SOCIAL STUDIES IN PRIMARY SCHOOLS

This course aims to equip student teachers with the knowledge of Macao society and skills of teaching so that they will become competent teachers. It includes the objectives of subject curriculum, content design, teaching procedures, teaching activities and assessment. Arrangements will focus on learning innovations, with emphasis on process and methods, encouraging independent thinking and cooperative learning and inquiry learning. Learning activities include visits, group discussions, interviews and investigations so that student teacher will develop the ability to design and arrange various extracurricular activities and optimize teaching and learning environment.

Pre-requisite: EDUC1000

EDUC3040 小學中文課程與教材

CHINESE CURRICULUM AND COURSE MATERIALS IN PRIMARY EDUCATION

本課程以促進學員對小學語文科的課程內容、傳統語文教學、本澳及鄰近地區的語文課程發展暨未來改革有全面瞭解，並就小學語文課程所涉及的教材與教學資料的編輯與選擇加以全面掌握，以提升學員對小學語文課程之認識及專業修養，並進一步提高其教學水平。

先修科目: EDUC1000

EDUC3043 TEACHING OF VISUAL ART

The course introduces the issues, concepts, philosophy and content of visual arts teaching to assist students in developing confidence, knowledge, and skills in the theory and practice of teaching visual arts. The emphasis of the course is on visual arts curriculum and lesson planning, motivational strategies, art classroom management, and alternative assessment in visual arts.

Students will participate in extensive field experiences exploring methods and materials appropriate to the teaching of visual arts in a primary school setting.

The course content includes topics on “principles of visual arts teaching,” “methods of visual arts teaching,” “visual arts teaching: planning and design,” “visual arts teaching: classroom organization and management,” “evaluation of visual arts teaching,” etc.

Pre-requisite: EDUC1060 and EDUC2066

EDUC3044 CLASSROOM MANAGEMENT

This course aims to introduce classroom communication and classroom management, so that primary teachers are able to effectively manage their classrooms and to facilitate their teaching and student's learning. Topics in classroom management are developing the relationship among teachers, students and parents, understanding the learning needs of students, increasing students' learning motivation, setting rules, discipline management, problem behaviors management, and helping individual student self-manage.

Pre-requisite: EDUC2001 and EDUC2003

EDUC3045 RESEARCH IN MATHEMATICS EDUCATION

Mathematics educators world-wide formulate research questions to solve perplexing problems and address salient issues in mathematics education to meet the needs of the students. For instance, lesson studies are conducted to help build up a learning organization and professional learning communities in schools. Course participants will be studying empirical research reports that address some of these contemporary issues. Under the guidance of their instructor, they are expected to write a review of an issue in mathematics education with implications for teaching and learning in everyday mathematics classrooms.

Pre-requisite: EDUC2038

EDUC3046 ADVANCED PIANO ACCOMPANIMENT FOR GENERAL MUSIC CLASSROOM

The course aims at further training and enhancing students' piano accompaniment skills in teaching elementary students in the music classroom. Topics will include helping students integrate musical elements articulately into the practical skills of piano accompaniment for the music class. Moreover, discussion and interpretation of sensitivity of piano practice to various forms of children music, such as nursery rhymes, marching, and general children music will also be included in the class. The course will require students to learn several pieces of children music and practically perform these pieces for their classmates and teachers.

Pre-requisite: EDUC1054 and EDUC2063

EDUC3047 TEACHING OF ENGLISH IN PRIMARY SCHOOLS I

The course aims to equip participants with knowledge of primary English language teaching curriculum and strategies to help primary students develop the skills necessary for effective reading and writing. It examines the important issues related to planning, delivering and evaluating English language instruction, explores recent developments in teaching reading and writing skills, and discusses pedagogical implications for the Macao context. Course participants will be helped to make connections between theory and practice and between international literature and local practice. They will be encouraged to engage in critical reflection, challenge accepted principles, and critique their own practice.

Pre-requisite: None

EDUC3048 TEACHING OF ENGLISH IN PRIMARY SCHOOLS II

The course helps students to develop practical skills for teaching grammar and vocabulary in primary English school classrooms in Macao. The course also helps students to further develop their own grammatical and lexical competence and awareness.

Pre-requisite: None

EDUC3049 TEACHING OF SCIENCE AND TECHNOLOGY

This course aims to train participants' skills and abilities in teaching science and technology in primary schools so as to make professional preparations for teaching primary science (natural studies). This course will help participants know the features and tendencies of contemporary primary science education, learn the concepts, theories, and methods of science and technology teaching, and recognize current situations and existing problems in primary science (natural studies) teaching in Macao. The content of this course includes the nature of science and technology, the curriculum of primary science, processes and methods of scientific inquiry, processes and methods of technological design, and teaching design and assessment of science and technology in primary science. Lectures and demonstration, group discussion, hands-on activities, technological design, and microteaching will be adopted as teaching methods in this course.

Pre-requisite: None

EDUC3050 SUBJECT BASED TEACHING METHODS (SECONDARY MATHEMATICS)II

This course focuses on empowering course participants to write teachable lesson plans and

programme of study pertaining to two key domains of secondary mathematics curriculum: numbers and algebra; and statistics and probabilities. Due attention is paid on professional treatment of a number of issues that have a bearing on successful meaningful student learning: educational objectives in accordance with key stages of secondary education; mathematical literacy, competencies, and thinking underpinning various pedagogic and instructional models; history of development of mathematics in different cultures; psychology of mathematics learning, particularly for Chinese learners and different gender; use of calculators and ICT tools for mathematics education; and good balance of assessment of learning and assessment for learning. Pre-requisite: EDUC2049

EDUC3051 LEARNING TECHNOLOGY FOR SECONDARY MATHEMATICS TEACHING

The use of dynamic mathematics software can not only help students develop a better understanding of abstract mathematics concepts, but also help students look into the essence of mathematics and develop a positive attitude towards mathematics learning. This course aims at enhancing student teachers' understanding of various applications of learning technologies, so as to empower them to use the contemporary technologies effectively in secondary mathematics teaching and learning. Specifically, the course provides an overview of the latest development of learning technologies, with emphases on its effective use with appropriate instructional designs. To achieve this end, this course will examine how to integrate contemporary learning technologies with recommended instructional methodologies within secondary mathematics learning contexts so as to fulfill the objectives of the mathematics curriculum standards. After completion of the course, student teachers will be able to integrate the acquired learning technologies to support students' development in mathematics education, and take up related challenges with confidence and efficacy.

Pre-requisite: EDUC3050

EDUC3052 中學歷史教學

METHODS OF TEACHING IN SECONDARY SCHOOL HISTORY

本科旨在培訓學生認識教授中學歷史科的過程和技巧，使他們成為合格教師。本課程的內容包括中學歷史科教學理論、課程目標、課程內容、教學技巧及評核方法。學生需按課程內的教學環節設計合適的教學情境。

先修科目：沒有

EDUC3053 世界歷史課程與教學

WORLD HISTORY CURRICULUM AND TEACHING

本科旨在介紹中學世界歷史科課程，以及與課程有關之教學方法，而世界歷史發展過程，亦會涉及，使學生能應付日後在中學教授有關世界歷史課程之用。

先修科目：沒有

EDUC3056 SCIENCE EDUCATION IN SECONDARY SCHOOLS

The objective of this course is to enable students to understand the ideas, concepts, principles, and issues involved in science teaching in secondary schools, and to help them acquire relevant strategies and methods of science curriculum development, science teaching in classrooms, and assessment of science teaching. The course content includes the nature of science, science curriculum development, materials for science teaching, instructional strategies in science, assessment in science teaching, and science teacher development. A distinctive feature of this course is the various opportunities provided for students to exercise, reflect, and evaluate these strategies and methods through microteaching, personal reflections, and group discussions.

Pre-requisite: APAC1001 and EDUC1000

EDUC3057 SCIENTIFIC INQUIRY AND PRACTICAL WORK IN SECONDARY SCHOOLS

The objective of this course is to help students learn the ideas and practice of scientific inquiry in the laboratory environment of secondary schools. The course content includes the concept of scientific inquiry, the roles and types of practical work, and instructional strategies of practical work. In this course, students are provided with various opportunities to enact the ideas of scientific

inquiry in classrooms, and most of the hours of this course are spent in the laboratory. Specifically, the experimental contents relevant to physics, chemistry, and biology are involved respectively.
Pre-requisite: EDUC3056

EDUC3058 ORFF AND KODALY MUSIC TEACHING METHODS

This course provides student teachers with advanced study of music teaching methodologies in the general music classroom, with the main focus on applications of the internationally well-known Orff Music Method and Kodaly Music Method. Moreover, the course will cover music learning theories combined with appropriate lesson planning for the music class. Students taking this course will have a concrete understanding of how to conduct and teach a music class at the elementary level. Furthermore, different music textbooks and materials will also be analyzed and discussed in this course.

Pre-requisite: EDUC1054 and EDUC2063

EDUC3059 EMERGING PEDAGOGIES OF STEM TEACHING

This course focuses on STEM implementation at the classroom level with the focus on learner centered instruction. Student will explore both traditional and emerging teaching approaches that support STEM inquiry-based learning. Developing appropriate STEM learning activities that aligning with learning objectives and the development of learning products will be emphasized. The use of assessments to facilitate learning will be emphasized. The roles of teachers and learners in supporting learning of this kind will be discussed. The class will also explore and use various technologies; digital media and STEM resources coordinated by FST's Centre for Science & Engineering Promotion that support STEM education and learning. For this course, in addition to vivid demonstrations and innovative hand-on experiences, students are required to intern with academic staff and graduate students in FST on a research/design project.

Pre-requisite: None

EDUC3060 EXTENSIVE READING AND LANGUAGE TEACHING

This is a course for pre-service secondary English teachers that aims to introduce the techniques of using literature and graded readers as extensive reading content for stimulating language learning tasks and activities. A well-balanced language course should provide students equal opportunities for meaning-focused input, meaning-focused output, language-focused learning, and fluency development. Extensive reading of literature and graded readers provides the conditions needed for meaning-focused input and fluency development. Guidelines for selecting texts that are well-suited for particular language learners will be provided and samples of classroom language learning tasks designed for engaging students interactively with the texts will be reviewed. This course will also cover the principles in designing an extensive reading component for secondary English classes including independent extensive reading, class readers, reading circles, class/institution libraries, vocabulary coverage, and making the most of technology for extensive reading. While this course aims at enriching pre-service teachers' knowledge to bring extensive reading into the secondary English classroom, it will also provide hands-on experience in the design of tasks for language teaching and learning.

Pre-requisite: EDUC2018 and EDUC2019

EDUC3061 TECHNOLOGY ENHANCED LANGUAGE LEARNING AND TEACHING

Using an authentic, practical, and hands-on approach, this course aims to inform pre-service secondary English language teachers about topics related to technology enhanced language learning and teaching. This course provides students a survey in language teaching related interactive technologies targeting listening, speaking, reading, writing, vocabulary, and grammar. Topics explored include: integrating technology into traditional language learning and teaching, enhancing language learning with digital technologies, web-based resources for language teaching, corpora and concordancers, multimedia, virtual worlds, digital game-based language learning, and the use of mobile technologies to assist and complement traditional language learning and teaching. Students in the course are expected to review and evaluate English language teaching and learning software and Web 2.0 tools for their usefulness in the secondary English language classroom. Students will also apply concepts to create and edit language

content for an authentic technology enhanced language learning and teaching experience.
Pre-requisite: None

EDUC3062 EDUCATIONAL PROBATION (INTERNSHIP)

The one-week course is designed for pre-service teachers (Primary Education Program) to observe how homeroom teachers manage classrooms and what and how subject-based instructional practices are implemented in grades 1 to 6 in the Greater Bay Area. Student teachers must follow the professional ethics of school teachers and the regulations of UM and the internship schools during the educational probation. In most cases, primary school teachers need to teach more than one subject when necessary. In order to expand student teachers' abilities in teaching different subjects, the subjects/classrooms will be randomly assigned to student teachers for teaching observation.

Note. Students' language proficiency will be considered. English stream students may be assigned to observe non-English teaching classrooms.

Pre-requisite: EDUC3000, EDUC3004, EDUC3037, EDUC3040 or EDUC3047

EDUC4000 SCHOOL COUNSELLING AND GUIDANCE

This course aims to introduce school counselling theories and classroom management techniques. It covers basic counselling knowledge and skills to facilitate the personal growth of teachers and their students. Furthermore, the course encourages teachers to practise their counselling skills within their school settings.

Pre-requisite: None

EDUC4001/EDUC4002/ EDUC4003/EDUC4004/ EDUC4022/EDUC4023 SUPERVISED TEACHING AND SCHOOL EXPERIENCE

Placing student teachers in the actual classrooms of various Macao secondary schools for teaching practice and hands-on experience is an important component of teacher training and teacher education as well as a necessary step for them to develop from student teachers to frontline classroom teachers. There is regular and close supervision from FED supervisors, who will see to it that TP students demonstrate competence and efficiency to meet the needs of their pupils by applying what they have learned over the years. Capable and experienced teachers in these schools are appointed to help as tutors/mentors and work in close collaboration with FED lecturers to provide guidance and pastoral care. Through regular meetings, detailed discussions and assessment during the process, student teachers are expected to make observable progress.

Pre-requisite: None

EDUC4006 中學中文章法教學

TEACHING OF ORGANIZATION OF WRITING IN SECONDARY SCHOOL

本科旨在揭示中文章法的意義與特色；闡釋章法學的地位與價值，介紹各類章法：「正襯類章法」、「因果類章法」、「知覺類章法」、「空間類章法」、「虛實類章法」、「凡目類章法」等；說明中學中文章法教學之道，引導學生對各類章法論述、研讀與探討，以養成學生對中學中文章法教學的認知與興趣，充實教授中學中文章法的能力。

先修科目：沒有

EDUC4007 論孟與教育

ANALECTS OF CONFUCIUS AND THE WORKS OF MENCIOUS

本科旨在使學員把握論語與孟子的基本研究方法和義理。教學重點包括：孔孟的思辨方法、教育思想、人文精神、人性本質、生命理想及德性實踐。課程著重從論語與孟子的文獻中，擷取重要篇章，加以詮釋，抉發其深義，以使學員對孔孟的儒學思想和教育精神有真實的理解與真切的體驗。

先修科目：沒有

EDUC4008 中國教育史專題
TOPICS IN HISTORY OF CHINESE EDUCATION

本科以培養學員掌握中國教育史各個主要領域的知識為主。課程以專題方式進行，主要包括儒家教育思想、官學制度、考試制度、書院與蒙學、西式教育的傳播及澳門教育史等專題的深入探討。在完成本課程後，學員當能較全面掌握中國教育發展的特徵和面貌。

先修科目：沒有

EDUC4009 文學評論與教學
CHINESE LITERARY CRITICISM AND ITS TEACHING

本科旨在介紹中國文學的傳統批評理論和文學批評的目的、意義、方法，揭示現代的批評理論，培養學生就作家、作品、文學創作和文學現象加以評論的能力。此外，並指導學生就文學評論等議題，編寫教材，採用合適的教學法，以便日後在教學實踐中靈活正確運用。

先修科目：沒有

EDUC4010 明清小說與教育
MING-QING FICTIONS AND ITS TEACHING

本科旨在讓學生通過閱讀、講解和分析，對明清小說的主要作品加深認識，為把小說作為教學材料運用做準備，相關的教學技巧的亦會講授，使學生能應付日後在中學教授中文課程之用。

先修科目：沒有

EDUC4011 PRACTICAL CLASSROOM ENGLISH

This course focuses on the choice of right words and phrases and the appropriate techniques for teachers when they use English to give instructions, ask questions, make comments, give disciplinary intervention in the classroom and encourage their learners to respond in English. The course also examines the English classroom as a communicative context with regular patterns of communication that are negotiated between teachers and students and helps teachers develop ways of promoting more effective patterns of discourse in the English classroom. In particular, issues related to the medium of instruction and the code-switching phenomenon in Macao classrooms will be discussed.

Pre-requisite: EDUC2022 and EDUC2023

EDUC4012 LANGUAGE TESTING

The main aims of this course are to consider the principles and practice of assessment for language learning and to enable course participants to apply essential understanding and techniques to construct and evaluate testing instruments for their particular teaching purposes. Upon completion of the course, course participants should be able to: determine how learning and testing may be integrated; follow standard procedures in constructing a testing instrument; use appropriate techniques to test learners' language skills; analyse and interpret test scores for students, teachers and parents; and judge the validity, reliability, practicality and impact of a test.

Pre-requisite: EDUC2018 and EDUC2019

EDUC4015 TEACHING IN INCLUSIVE SETTINGS

The course focuses on the teaching skills and methods to general educators who are teaching in inclusive settings where children with special needs receive their education with ordinary children. Classroom modifications in curriculum, assessment, behavior management, and instructional methods are examined. Methods of establishing supportive networks among families, schools, and agencies are introduced. Several programmes designed for inclusive settings at preschool and kindergarten level are examined.

Pre-requisite: EDUC3003 / EDUC3004

EDUC4017 PHYSICAL EDUCATION III

The course aims to help students to understand the functions of human body through the study of sport psychology, kinesiology and biomechanics. The course will focus on the relationship between complex human movement structure and sports training. The students are expected to

create training method in sports and physical education. Simple experiments will be conducted. It helps students to understand the importance of every human body movement to the developments of physical education and sports.

Pre-requisite: EDUC2036

EDUC4020 中國近現代史教學
TEACHING OF MODERN CHINESE HISTORY

本科旨在讓學生認識近現代中國在政治、經濟、社會等方面的重要歷史事件及變化，相關的課程及教學方法，亦會涉及，使學生能應付日後在中學教授歷史課程之用。

先修科目：沒有

EDUC4021 澳門史教學
TEACHING OF MACAO HISTORY

本科旨在讓學生認識自十六世紀以來的澳門歷史及相關的教學方法，以便學生日後能夠在中學講授澳門歷史科課程。課程內容包括澳門歷史大事，政府組織，經濟及社會發展等。

先修科目：沒有

EDUC6001 INTRODUCTION TO EDUCATION

This course aims to help students understand the general law of the human education system. From historical, theoretical and practical perspectives, the course explores (1) the fundamentals of education, (2) the relationship between education and social, political, economic and cultural developments, and (3) the relationship between education and human physical and mental developments (4) education purposes (teleology), and (5) the relationship between teachers and learners. It also discusses issues about education systems/structure, curriculums and instruction, moral education, educational management, etc.

Pre-requisite: None

EDUC6002 EDUCATIONAL PSYCHOLOGY

Educational Psychology includes both psychology and education. The course aims to introduce theories and practices of educational psychology, which includes (1) the fundamentals of educational psychology, (2) the relationship between psychology and education, and the (3) application of educational psychology.

Pre-requisite: None

EDPC6003 TEACHER ETHICS

The aim of this course is to prepare students to develop teachers' professional morality. The experience and the development of teacher's professional morality are fully represented in the different relationships in their work, including facing themselves, their colleagues, students, students' parents and society. The content of this course includes learning different principles of teachers' professional ethics, and how to use and develop these theories reasonably in their teaching lives.

Pre-requisite: None

EDUC6004 TEACHING PRACTICE

Though classroom observing, microteaching, listening to their supervisors' guidance on the design of teaching activities before their teaching practice, and discussing thoroughly their performance after teaching practice and how to improve it in the future, etc, the teacher-trainees' teaching professional standards can be improved continuously.

Pre-requisite: None

EDUC6011 CLASSROOM ASSESSMENT

This course focus on the necessary knowledge of classroom assessment ranging from, but not limited to, validity and reliability, functions, forms, instruments, design of various assessment tools. Both traditional assessment methods such as multiple choices, fill-in-blanks, cloze measures, essays, etc, and alternative assessment methods such as portfolio, journals, etc, will be included.

Important concepts such as formative Vs summative; high Vs low stake assessment will be covered. The importance of the coherence among instructional objectives, classroom teaching and assessment will be emphasized.

Pre-requisite: None

EDUC6012 INFORMATION TECHNOLOGY IN EDUCATION

This course, aiming to enhance students' understanding of using information technology in teaching and learning, provide an overview of contemporary technology, with emphasis on technology relating to education in schools. It examines the current methodologies and issues in integrating different technologies in teaching and learning contexts.

Pre-requisite: None

EDUC6101 COUNSELING AND GUIDANCE

This course aims to introduce school counseling theories and classroom management techniques. It covers basic counseling knowledge and skills to facilitate the personal growth of teachers and their students. Furthermore, the course encourages teachers to practise their counseling skills within their school settings.

Pre-requisite: None

EDUC6102 CURRICULUM AND PEDAGOGY (SUBJECT BASED)

It aims to provide in-service teachers at secondary level with basic concepts and principles of curriculum and instruction. Topics include curriculum development and implementation, teaching principles and strategies, teaching evaluation, and classroom conditions that influence teaching and learning. This course features subject based characteristics. Students will be led to discuss the issues and problems related with these topics in their subjects (such as Chinese, English, mathematics, and science).

Pre-requisite: None

EDUC6201 CURRICULUM AND PEDAGOGY

It aims to provide in-service teachers at primary level with basic concepts and principles of curriculum and instruction. Topics include curriculum development and implementation, teaching principles and strategies, teaching evaluation, and classroom conditions that influence teaching and learning. Students will be helped to link theories of curriculum and pedagogy with their teaching practice in setting objectives, selecting and organizing contents, and implementing and evaluating curriculum in various subjects they teach in primary schools.

Pre-requisite: None

EDUC6202 SCHOOL COUNSELING AND GUIDANCE

This course aims to introduce school counselling theories and classroom management techniques. It covers basic counselling knowledge and skills to facilitate the personal growth of teachers and their students. Furthermore, the course encourages teachers to practise their counselling skills within their school settings.

Pre-requisite: None

EDUC6301 HEALTH AND CARE IN EARLY CHILDHOOD

Childhood is the earliest, most vulnerable and difficult nursing stage and also the most important stage in our lives. This course will equip students with the knowledge and understanding of children's growth, health and care, the foundation of the pre-primary education field. It will introduce how to provide children with appropriate nutrition and how to handle their common diseases, injury and safety. Topics include principles of children's growth, their behavioural and emotional characteristics, analysis of the positive and negative factors and ways to provide a safe and healthy environment for growing children. Students can apply the theories and knowledge in kindergartens to promote health education and to work towards the goal of holistic health and care.

Pre-requisite: None

EDUC6302 EARLY CHILDHOOD DEVELOPMENT

The aim of this course is to instill into teachers, who work with 0 to 8-year-old children, a thorough understanding of the developmental changes at this stage of life, the role that genetics play in human development, as well as some common childhood disorders. Different theories of child development are introduced to provide students with an all-rounded knowledge of children's united growth which lays the foundation for effective teaching and learning.

Pre-requisite: None

EDUC6303 INTEGRATED LEARNING

This course will focus on the integrated learning approach to curriculum design and development for pre-schools and explore the meanings, functions, teaching processes, designs, practices and evaluations related to the integration education. Rather than stressing basic concepts and theoretical foundation, this course will emphasize the application of theories in practice, with the aim to train students to become effective teachers who can apply principles of integrated learning to lesson planning.

Pre-requisite: None

EDUC6501 EDUCATIONAL ADMINISTRATION

This course allows students to understand the basic concepts of educational administration. Students will study and discuss Macao educational acts and decrees. They will also learn the basic theories related to educational administration, such as theories with regard to motivation, leadership, communication and organizational decision-making. Attempts will be made to make this course related to the educational reality in Macao.

Pre-requisite: None

EDUC6502 INTRODUCTION TO SPECIAL EDUCATION

This course aims at providing students with knowledge, understanding and care of pupils with special needs so as to further their education professional knowledge and development. By means of different teaching activities, students will have better understanding of (1) definitions, characteristics and causes of pupils with various special needs; (2) educational emphases and needs of these pupils; (3) contemporary situations of special education in Macao, and skill-training and employment situations of teenagers; and (4) the latest trends in contemporary special education.

Pre-requisite: None

EDUC6503 EDUCATIONAL RESEARCH

The main aim of this course is to enable a qualified teacher to use, understand, analyze and evaluate research outcomes. The course includes: (1) the basics of educational research, (2) structure and procedures of education research, (3) research variables, (4) hypotheses and topics, (5) literature review, (6) on-line search, (7) sampling, (8) questionnaires, (9) correlation analyses, (10) interviews, (11) case studies, (12) evaluation of research reports, (13) educational research ethics, etc.

Pre-requisite: None

EDUC6504 SOCIOLOGY OF EDUCATION

This is an introductory course on the Sociology of Education. It provides a brief introduction to the basic sociological concepts and perspectives. By applying these concepts and perspectives, the course intends to let participants have a broad and profound understanding of Macao society and its educational system.

Pre-requisite: None

EDUC6505 EDUCATIONAL TECHNOLOGY IN EARLY CHILDHOOD SETTINGS

This course aims at enhancing teacher trainees' understanding of various applications of educational technology, so as to empower them to use technology effectively in kindergartens. It provides an overview of the latest development of technology for teaching and learning, with an emphasis on its use with appropriate instructional designs in the early childhood education (ECE).

To achieve this end, this course will examine how to integrate instructional methodology with contemporary educational technology within ECE learning contexts and how to fulfil the objectives of the ECE curriculum based on instructional models. After completion of the course, teacher trainees will be able to integrate educational technology in supporting young learners' development in different disciplinary areas, resolve issues arising in this process and take up related challenges with confidence and efficacy.

Pre-requisite: None

EDUC6506 ASSESSING YOUNG CHILDREN

To enable students a comprehensive understanding of young children's learning and development, this course provides an overview of educational assessment and introduces the principles and practices of authentic assessment which is highly valued in early childhood education. It explains why and how infants and young children should be assessed, discusses the contexts for authentic assessments, illustrates multiple strategies for collecting information on children's learning and development, and highlights the importance of conducting systematic observations and recording in the information collecting process. Through this course, students will understand how to utilize assessment information in improving the curriculum and teaching quality and facilitating parent-school partnership. Assessment practices will be linked to the local curriculum guideline which also underpins authentic assessment as the principal means of assessing young children. Ethical issues in this area will also be discussed.

Pre-requisite: None

EDUC6507 PARENTAL EDUCATION AND INVOLVEMENT

Family plays an important role in the child's upbringing. The course aims to explore how we, as teachers, can empower the parents to play a role in the positive development of the child. Emphasis is put on possibilities and strategies concerning the implementation of parent education and parental involvement in the local school context. Topics include: integrated approach to building staff-parent partnerships, family relationship and personal growth, disciplining methods and principles, parental ethics, development and implementation of parent education, and family-school collaboration.

Pre-requisite: None

EDUC6508 GUIDANCE AND COUNSELING IN EARLY CHILDHOOD

This course aims at equipping students of early childhood education with the knowledge of guidance and counselling so that they are able to take up the role of teacher-counsellors. This course will introduce classical and contemporary theories in guidance and counselling and include five components to facilitate the united growth of young children: basic concepts of guidance and counselling, personal growth, personal and social education, problem behaviours in early childhood, and counselling techniques. Various approaches of working with families in guiding children's behaviours are also covered.

Pre-requisite: None

EDUC6509 INCLUSIVE EDUCATION

This course aims at introducing students to the development, rationale and principles of inclusive education as a foundation of the field, and to the policy, general situation and resources with regard to inclusive education in Macao. The course provides guidelines on various elements of inclusive lessons and classes. The content includes child learning and classroom settings, programme and lesson planning, and assessment and classroom management of children with special needs or behavior problems. In addition, to guard students from workstress as future inclusive teachers, the course will help them develop observation and analysis skills to note differences among young children and to understand children with disabilities in the inclusive classroom. It will also provide students with opportunities to learn how to enrich learning environment with educational resources for special needs and how to work effectively with professional groups and parents.

Pre-requisite: None

EDUC7001 RESEARCH METHODS IN EDUCATION

This course aims at developing in students an understanding of quantitative and qualitative methods of collecting, analyzing, and interpreting data in educational research. Quantitative topics include application of statistical concepts / procedures, graphs, numerical summaries; normal distribution, correlation/regression analyses, probability, statistical inferences for one or two samples, hypothesis tests, chi-square tests, and factor analysis. Qualitative topics include data analyses in case studies, observations, and ethnography studies.

Pre-requisite: None

EDUC7051 QUALITATIVE RESEARCH IN EDUCATION

This is the intermediate master's level course on qualitative method. Students will learn two central issues in qualitative research: 1) design and implement a scientifically valid qualitative study; 2) Analyzing qualitative data. This course will expose students to different paradigms in qualitative research including but not limited to: ethnography, grounded theory, participatory action research, and case study. The purpose of this course is to provide working knowledge to students to conduct qualitative study using various qualitative methods, as well as helping students to understand their limitation.

Pre-requisite: Research method in education

EDUC7052 QUANTITATIVE RESEARCH IN EDUCATION

This is the intermediate master's level course on quantitative method. Students will have the opportunity to learn a variety of statistical methods. The primary methods to be introduced will include: multiple regression, factor analysis, principal component analysis, analysis of variance and covariance. Other advanced statistical technic such as multilevel models, structural equation models, and causal inference models will be introduced. The purpose of this course is to lay the foundation for quantitative analysis of education issues. Practical issues such as analyzing quantitate data with statistical tools will be covered to provide hands-on experience to students.

Pre-requisite: Research method in education

EDUC7053 ACTION RESEARCH

This course provides a foundation for educators to become active inquirers in the day-to-day experiences that occur in a classroom. It explores evidenced-based techniques and strategies that guide instructional decision-making and positively impacts educational practices.

Pre-requisite: None

EDUC7101 PRINCIPLES OF CURRICULUM AND INSTRUCTION

This course aims to provide an overview on the principles and theories of curriculum and instruction. The introduction of these theories and principles provides learners a broad perspective on the basic curriculum questions regarding the purposes, content, design, and structure of educational programmes as well as learning and teaching theories and the relationship between the two.

Pre-requisite: None

EDUC7102 CURRICULUM DESIGN AND IMPLEMENTATION

This course intends to equip learners with the theories and practical skills of designing curriculum and managing curriculum change. The present curriculum design and implementation process in schools/Macao will be discussed and analyzed. Curriculum theories, design, and implementation experiences from other countries/places and possible adaptation will also be explored.

Pre-requisite: None

EDUC7103 EVALUATION OF CURRICULUM, INSTRUCTION, AND STUDENT PERFORMANCE

This course seeks to equip learners with strategies and techniques used in the evaluation of curriculum programmes, instruction, and student performance. The assumptions, strengths, and weaknesses associated with various strategies will be critically analyzed. Learners work through evaluation problems related to particular curriculum programmes and instructional techniques;

and develop assessment tools appropriate to their teaching assignments. Special attention is given to authentic assessment, performance assessment, portfolios, self-evaluation, and cooperative assessment.

Pre-requisite: None

EDUC7151 SEMINARS ON CURRICULAR ISSUES (SUBJECT-BASED)

This weekly 3-hour seminar explores current global issues of curriculum, instruction and learning in the subject areas of Chinese, English and Mathematics. In addition, emergent issues of curriculum, instruction and learning in these three subject areas in Macao, China, Taiwan, and Hong Kong will also be discussed.

Pre-requisite: None

EDUC7152 MULTIMEDIA TECHNOLOGY IN INSTRUCTIONAL DESIGN

This course provides the learners with basic principles and practice in design, development, and production of multimedia instructional material through multimedia laboratory and computerized video editing studio.

Pre-requisite: None

EDUC7153 INTELLIGENCE AND CREATIVITY

This course covers contemporary theories of intelligence, intellectual development and creativity, and their implications for educational practices and psychological research.

Pre-requisite: None

EDUC7154 MATHEMATICS LEARNING & TEACHING

Based on Mathematics learning and teaching theories and research findings, the course aims to help student teachers study the basic knowledge of the subject, teaching and learning strategies, methods of assessment and the application of technology in Mathematics teaching and learning.

Pre-requisite: None

EDUC7155 CHINESE LANGUAGE LEARNING & TEACHING

Based on Chinese Language learning and teaching theories and research findings, the course aims to help student teachers study the basic knowledge of the subject, teaching and learning strategies, methods of assessment and the application of technology in Chinese teaching and learning.

Pre-requisite: None

EDUC7156 SECOND LANGUAGE LEARNING & TEACHING

Based on Second Language learning and teaching theories and research findings, the course aims to help student teachers study the basic knowledge of the subject, teaching and learning strategies, methods of assessment and the application of technology in Second Language teaching and learning.

Pre-requisite: None

EDUC7156 SECOND LANGUAGE LEARNING & TEACHING (TESOL)

This graduate level course is designed to provide students with a comprehensive understanding of second language learning and teaching. The course will cover the theoretical foundations of second language acquisition, as well as practical strategies for second language instruction. Topics will include the role of linguistic and cognitive factors in second language development, the impact of culture and context on second language learning, and the use of technology and authentic materials in second language classrooms. Through readings, discussions, and hands-on activities, students will gain knowledge and skills that will enable them to design and implement effective second language instruction in a variety of settings.

Pre-requisite: None

EDUC7157 SCIENCE LEARNING & TEACHING

Based on Science learning and teaching theories and research findings, the course aims to help

student teachers study the basic knowledge of the subject, teaching and learning strategies, methods of assessment and the application of technology in Science teaching and learning.

Pre-requisite: None

EDUC7158 SOCIAL STUDIES LEARNING & TEACHING

Based on Social Studies learning and teaching theories and research findings, the course aims to help student teachers study the basic knowledge of the subject, teaching and learning strategies, methods of assessment and the application of technology in Social Studies teaching and learning.

Pre-requisite: None

EDUC7159 MORAL DEVELOPMENT & TEACHING

Based on moral development and teaching theories and research findings, the course aims to equip student teachers with the basic knowledge of the subject, teaching and learning strategies, methods of assessment and the application of technology in moral education.

Pre-requisite: None

EDUC7160 CURRICULUM & INSTRUCTIONAL LEADERSHIP

Following the threads of major curriculum and instruction theories, this course explores curriculum and instructional leadership in practice and theory, schools as learning communities and the innovation of curriculum and school culture for purpose of improving teacher quality and learning effectiveness.

Pre-requisite: None

EDUC7161 SPECIAL TOPICS IN CURRICULUM & INSTRUCTION

This graduate level course covers the current and new topics, new trends, and new research findings, in the area of curriculum and instruction. The actual topics may differ as this course is offered at different times, to reflect the new developments and directions of this field. The graduate level course will expose the students to the new thoughts, new developments.

Pre-requisite: None

SCIENCE EDUCATION

EDUC7162 THEORIES OF SCIENCE TEACHING AND LEARNING

This course aims to provide students with concepts, theories and principles of science teaching and learning, which are necessary for their teaching practice and future studies. Topics of this course include nature of science, theories of science learning, conception changes in science learning, methods and strategies of science teaching, scientific inquiry, practical work in science teaching, ICT in science teaching. Studies on exemplary teaching practice will be emphasized in this course.

Pre-requisite: None

EDUC7163 STUDIES ON SCIENCE CURRICULUM

The course aims to provide students with these topics in the field of science curriculum development: historical perspectives of science curriculum, science curriculum in social contexts, principles and theories of science development, patterns of science curriculum development, and analysis of science curriculum. Special attention will be put on the practice of implementing the current science curricula and teaching materials in Macao and China. The current research tendency of science curriculum in international literatures will also be involved.

Pre-requisite: None

EDUC7164 THE EVALUATION OF SCIENCE TEACHING AND LEARNING

This course aims to equip students with the concepts, theories, and practical skills of conducting

evaluations on science teaching and learning. Topics include assessment and evaluation in science teaching, theoretical assumptions of evaluation in science teaching and learning, various evaluation techniques in science teaching and learning, science curriculum reform and evaluation, science teacher development and evaluation. Emphases will be put on authentic assessment and performance assessment in science teaching and learning. The large scale evaluation programmes, such as TIMSS, PISA, will be involved in this course.

Pre-requisite: None

EDUC7165 PROFESSIONAL DEVELOPMENT OF SCIENCE TEACHERS

This course is about the concepts, theories and practice of science teacher development with the purpose of laying a foundation for students' teaching practice and future studies. Topics include the learning of science teachers, science teachers' conception of teaching and learning, pedagogical content of knowledge in science teaching, school-based research and science teacher development, action research and science teacher development, science teachers' narratives, case studies of science teacher development, research tendency of science teacher development.

Pre-requisite: None

INFORMATION AND COMMUNICATION TECHNOLOGY IN EDUCATION

EDUC7166 ISSUES IN DISTANCE EDUCATION

The purpose of this course is to provide students with an overview of distance education theories in order to enhance students understanding of the communication tools and the different learning styles of distance education and develop students' understanding of the instructional design models used in developing distance learning courses. Students will be given an opportunity to learn various tools concentrating on different aspects of the technology: text, graphics, audio, animation, and video. Students will work in groups and take on different roles. The contexts for this course will be primarily interactive, collaborative, multi-disciplinary, and student-centered. A large portion of this course will be devoted to hands-on activities.

Pre-requisite: None

EDUC7167 MULTIMEDIA DESIGN AND PRACTICE

The course is primarily concerned with the effective use of multimedia technologies in an educational context. It will examine the challenges involved in current methodology, research and other issues in applying multimedia in education. The practical and theoretical aspects of integrating various applications will also be examined in the context of the curriculum.

Pre-requisite: None

EDUC7168 TRENDS & ISSUES IN INSTRUCTIONAL TECHNOLOGY

This course involves an examination of current issues in instructional technology. The issues include pedagogy, teaching and learning, historical development, policies, and research methodology in instructional technology etc. Learners are required participate actively in this course. Case studies, group discussion and seminar presentation will be used.

Pre-requisite: None

EDUC7169 INTEGRATING TECHNOLOGY FOR TEACHING AND LEARNING

The purpose of this course is to engage students in the theory, development and applications of learning technologies in teaching and learning context. An overview of theories in technology integrated teaching and learning will be discussed. Students are expected to form groups of learning communities that will involve in technology integration projects. They will be given opportunities to explore and learn new technology in supporting and transforming instruction and learning.

Pre-requisite: None

CHINESE LANGUAGE EDUCATION

EDUC7170 SECONDARY SCHOOL CHINESE LANGUAGE CURRICULUM DESIGN AND TEACHING

This course explicates the design and teaching of secondary school Chinese language curriculum, in order to enhance students' knowledge about Chinese language curriculum design and teaching, and to heighten ability for and research interest in Chinese language teaching. Topics include basic concepts, categories, theories and design of curriculum; significance, objectives and techniques of teaching; principles and preparation of teaching design; preparation of teaching media; curriculum evaluation and teaching assessment; professional behavior of teachers.

Pre-requisite: None

EDUC7171 TOPIC STUDIES IN CHINESE WRITING

This course explicates and analyses the functions, theories and techniques of Chinese communication, in order to deepen students' knowledge of, and ability to apply, Chinese writing for the sake of teaching. Topics include connection between characteristics of the Chinese language and Chinese writing, sociolinguistics theories and phenomena of Chinese writing, writing of various kinds of Chinese practical writing, similarities and differences between practical writings prevailing in Macao, Hong Kong, Taiwan and Mainland China.

Pre-requisite: None

EDUC7172 APPRECIATION AND TEACHING OF CHINESE LITERATURE

This course critically introduces and analyses Chinese literature, and cultivates the ability to appreciate and teach it on the part of students. Teaching materials are mainly classics from Pre-Qin Dynasty to the 20th Century. The teaching mode is to guide students to read, appreciate, and analyse genres such as poetry, prose, fiction and opera, and to sum up the teaching points concerned such as writing style, theme manifestation, story tension, characterization, and plot organization. Upon completion of this course, students are expected to be able to better appreciate and evaluate literature and to make use of literary works to design various kinds of teaching activities.

Pre-requisite: None

EDUC7182 LANGUAGE ARTS TOPIC STUDIES AND TEACHING

This course explicates significance, theories and skills of language arts, in order to strengthen students' understanding of language arts, to help them grasp techniques of language expression, to enhance their ability for language communication, and to heighten teaching effects. Topics include techniques of language expression, teaching language of teachers, topics, skills and manners of public speaking, public speaking teaching, topic assignment, forms and techniques of debate, and debate teaching.

Pre-requisite: None

MATHEMATICS EDUCATION

EDUC7174 STUDIES ON MATHEMATICS CURRICULUM

The course aims to provide students with a critical study of current issues, trends, and the design and evaluation of mathematics curriculum. Topics will include: historical development of mathematics curriculum, principles and theories of mathematics development, patterns of mathematics curriculum development, alignment of mathematics curricula with standards, and analyses and comparisons of mathematics curricula. Special attention will be put on the practice of implementing the current mathematics curricula and teaching materials in Macao and China for the teaching tracks. The current research tendency of mathematics curriculum in international literatures will also be involved, for example, some advanced mathematics topics and mathematics projects.

Pre-requisite: None

EDUC7175 THEORIES OF MATHEMATICS TEACHING AND LEARNING

This course aims to provide students with concepts, theories, and principles of mathematics teaching, which are necessary for their teaching practice and further studies. Attention will be paid to the key ideas in four mathematics content areas (i.e., number and operations, algebra, geometry, and data analysis and probability) at both elementary and secondary levels, effective teaching strategies for implementing student-centered, content-based and technology-enhanced instruction. Lesson studies and exemplary teaching designs will also be emphasized.

Pre-requisite: None

EDUC7176 THE EVALUATION OF MATHEMATICS TEACHING AND LEARNING

This course aims to equip students with the concepts, theories, and practical skills of conducting evaluations on mathematics teaching and learning. Topics will include: assessment and evaluation in mathematics teaching, theoretical assumptions of evaluation in mathematics teaching and learning, various evaluation techniques in mathematics teaching and learning, mathematics curriculum reform and evaluation, mathematics teacher development and evaluation. Emphases will be put on authentic assessment including discourse and performance assessment in mathematics classrooms. The large scale evaluation programmes, such as TIMSS, PISA, will be also covered.

Pre-requisite: None

EDUC7177 PREPARATION AND PROFESSIONAL DEVELOPMENT OF MATHEMATICS TEACHERS

This course is about the concepts, theories and practice of mathematics teacher development with the purpose of laying a foundation for students' teaching practice and further studies. Topics include: mathematics teachers' subject knowledge and pedagogical content knowledge, teachers' conceptions (or beliefs) of effective mathematics teaching and learning, school-based research and mathematics teachers' professional development, action research and mathematics teacher development, mathematics teachers' narratives, case studies of mathematics teacher development, research tendency of mathematics teacher development.

Pre-requisite: None

ENGLISH LANGUAGE EDUCATION

EDUC7179 CURRICULUM DESIGN AND MATERIALS DEVELOPMENT FOR ENGLISH TEACHERS

This course is designed to acquaint students with the strategies and principles of materials development for English language teaching. It aims to help students develop an understanding of the process of second language curriculum development in general, and of second language course design and materials preparation in particular. Theoretical discussions of different language learning models and instructional principles, and various approaches to curriculum design and materials development will provide a basis for analysis. Course participants will have opportunities to engage in critical reflection on both theoretical and practical issues in second language curriculum design and materials development, as well as develop practical experience in designing English language curriculum and materials relevant to specific student populations.

Pre-requisite: None

EDUC7180 PEDAGOGICAL GRAMMAR FOR ENGLISH LANGUAGE TEACHERS

This course provides opportunities for students to develop an understanding of the pedagogical grammar of the English language, and apply this knowledge in learning and teaching in a second language context. The course attempts to analyze grammar from an integrated perspective, drawing insights from both formalist and functional approaches. It also examines issues such as the extent to which ESL or EFL teachers should focus on rules or the regularities of language or they should focus more on vocabulary and how it affects grammaticality. Pedagogical implications link key grammatical phenomena to real communicative events in the context of school English classrooms.

Pre-requisite: None

EDUC7180 PEDAGOGICAL GRAMMAR FOR ENGLISH LANGUAGE TEACHERS (TESOL)

This graduate-level pedagogical grammar course provides opportunities for you to develop more profound grammatical knowledge of the English language, as well as pedagogical knowledge of innovative strategies and methodologies in teaching grammar in future ESL/EFL classrooms. Specific attention focuses on syntactical generative process of sentence structures, structures of clauses and phrases, grammar teaching approaches and techniques, evaluation of existing grammar resources and adaptation of these materials to better meet students' learning needs.

Pre-requisite: None

EDUC7181 TEACHING SECOND LANGUAGE WRITING

This course provides opportunities to explore various perspectives on theory, research, and pedagogical applications in second language writing. The course aims to equip students with strategies to help second language learners develop the skills necessary for effective writing. Topics include the nature of L2 writing, approaches to teaching L2 writing, L2 writing processes, features of L2 writers' texts, beliefs and attitudes of L2 writers, feedback on L2 writing, L2 writing assessment, contexts for L2 writing, and L2 writing teacher education. Course participants will be helped to make connections between theory and practice and understand key issues that underlie second language writing, and acquire skills and techniques for planning, teaching and assessing second language writing.

Pre-requisite: None

EDUC7183 SECOND LANGUAGE VOCABULARY ACQUISITION AND LANGUAGE TEACHING

This course provides opportunities to study about vocabulary in second language learning and teaching, including questions regarding how to select vocabulary for direct instruction, factors that influence incidental acquisition, strategies for deliberate learning and teaching, and assessment of vocabulary knowledge. A survey of pivotal published second language vocabulary acquisition research is provided for the purpose of evaluating the quality of the research and considering its practical implications for teaching.

Pre-requisite: None

EDUC7201 THEORIES OF EDUCATIONAL ADMINISTRATION

This course addresses concepts, theories and current developments in educational administration. Educational organizations and their leadership, motivation, communication and decision making, as well as their development and effectiveness are examined.

Pre-requisite: None

EDUC7202 EDUCATIONAL LAW AND POLICY ANALYSIS

This course addresses Educational laws, regulations and policies. The impacts of these laws, regulations and policies upon schools are analysed and examined. Students are encouraged to make suggestions about how to revise some Macao educational laws and policies.

Pre-requisite: None

EDUC7203 EDUCATION AND DEVELOPMENT

This course emphasizes on application of theories in Social Sciences to education and socio-economic development. Issues of discussion include: human capital theory, equality of opportunities, modernization, dependency theory, cultural imperialism, integration of the capitalist world system, and postmodernism.

Pre-requisite: None

EDUC7251 ORGANIZATIONAL CHANGE AND DEVELOPMENT IN SCHOOLS

This course is a critical analysis of theoretical and practical aspects of organizational change and development in education. Various perspectives and strategies innovated and used by educational institutions to cope with organizational change and enhance development will be introduced. In-depth case analysis will be provided to illustrate applications of strategies of school effectiveness, school-based management, and organizational innovation.

Pre-requisite: None

EDUC7252 SEMINAR OF SOCIAL CHANGE AND EDUCATIONAL REFORMS

This course looks at educational institutionalization and re-institutionalization through the lens of social change over time. First of all, it will trace the social origins and social constructions of modern educational systems since the Protestant Reformation came into effect in the 16th century Europe. Secondly, it will focus much more attention on the landmarks of educational expansions and ameliorations around and after World War II. And finally, special efforts will be directed to issues of education in a so-called individualized society of late-capitalism in early 21st century. Scholars with specialties in related topics of this course will be invited to give talks and interchange with the class.

Pre-requisite: None

EDUC7253 SCHOOL ADMINISTRATION & MANAGEMENT

The course covers the practical aspects of school administration and management, with emphasis on personnel, finance and other resources, in order to equip students with a system of strategies for school expansion, leadership, administration, public relations, professional development and parental participation.

Pre-requisite: None

EDUC7254 SOCIOLOGICAL ANALYSIS OF EDUCATIONAL POLICY

This course focuses on a sociological study of the formulation of educational policy, taking into account historical, political, economic, social, cultural and religious factors, and analyzes the process of educational policies being transformed into law and action plans.

Pre-requisite: None

EDUC7255 GROUP DYNAMICS

This course aims to help student teachers explore, from a socio-psychological aspect, the dynamics of teaching and learning in classrooms and schools as groups, norms and expectations, integration and disintegration, cooperation and conflicts, etc, and the possible ways to generate group dynamics through communication and coordination.

Pre-requisite: None

EDUC7256 COMPARATIVE EDUCATION

While many of the educational practices are considered embedded in local context, there is increasing volume of conversations on educational issues globally. This course will take students to examine a series of critical educational issues from an international and comparative lens. Students will join the discussion on topics such as: accountability movement in educational management, globalized educational standard, teacher professional development, global education development agenda such as Education For All, etc. The aim of this course is to connect students with educational development discourse globally. The instructor will help students to develop awareness and critical thoughts of on-going debate related to educational equality, efficiency, and excellence.

Pre-requisite: None

EDUC7257 SPECIAL TOPICS IN EDUCATIONAL ADMINISTRATION

This graduate level course covers the current and new topics, new trends, and new research findings, in the area of educational administration. The actual topics may differ as this course is offered at different times, to reflect the new developments and directions of this field. The graduate level course will expose the students to the new thoughts, new developments, more recent research and practice in the area of educational administration.

Pre-requisite: None

EDUC7301 THEORIES AND STUDIES OF CHILD DEVELOPMENT

Consolidates knowledge on human development and its ecological contexts by highlighting the developmental stages of human beings at different stages of the life-span. Introduces the recent theories on human development that extend the classic theories on human development, social movements and their effects on human development. Emphasizes special features during the

transitional periods from one stage to the next and the critical role that childhood plays in the later developmental stages. Discussions will also examine the ways in which different societies view human development and the issues pertaining to the culture and cognition of human development.
Pre-requisite: None

EDUC7302 COGNITION AND LEARNING IN THE EARLY YEARS

Provides students with an understanding of children's cognitive development and its implication on learning. Discusses theories on children's cognition such as those on children's memory system, what constitutes to children's conceptual changes, children's problem solving strategies and their sensory and perceptual system development. Overviews selected contemporary approaches such as topics on neuro-psychology, namely brain anatomy, brain development, the social brain and the effects of gender, culture, disorders, and life experiences on shaping a brain will be covered. Examines parents' influence and the roles of adult and child interactions on children's learning. This course will also link theory and practice by examining how young children learn and the role that early education plays in it.
Pre-requisite: None

EDUC7303 CHILD PLAY STUDIES

The benefits of play have been associated with improvements in, for example, exploration and creativity, parent child bonds and healthy child development. This course will cover a range of international perspectives of play including the diverse interpretations of play, philosophical rationales underpinning play, and practices of play. In particular, the contemporary approaches and research methods to understanding children's play, the arguments for and against play as curriculum and/or approach, the issues concerning play advocacy and policy-making, as well as the possibility of promoting context appropriate play practice cross-culturally will be provided.
Pre-requisite: None

EDUC7304 EARLY CHILDHOOD PROGRAMME QUALITY EVALUATION

Introduces indicators and procedures used in Macao, other Chinese regions and beyond, to assess the quality of provisions in kindergartens and nurseries. Highlights the importance that evaluation will not only be focused on the organization and personnel, curriculum and pedagogy, physical environment and resources, but also on the clients they serve, including parents, babies and young children. The aim of assessment is to build up synergy and capacity for the continual improvement of services rendered to its clients.
Pre-requisite: None

EDUC7353 CHILD LANGUAGE LITERACY DEVELOPMENT

This course provides an in-depth understanding of child language and literacy development from infancy through the adolescent years. Main focus will be endogenous linguistic and cognitive correlates of literacy acquisition, including letter-sound knowledge, phonology, morphology, grammar, fluency and vocabulary. Exogenous factors, including parenting, educational systems, and culture, will be also discussed. The course will also provide some exposure to the recent research on language and literacy disorders and bilingual literacy acquisition.
Pre-requisite: None

EDUC7354 CHILD AND FAMILY EDUCATION

This course is parent-oriented, children-oriented, community-oriented and school-oriented, and will have students explore what are effective parents, how to promote stable marriage relationship and understand its impacts on children's development, and why good ethics can promote better relationships among family members. It will also cover the methods of helping children understand their roles in a family, the use of the community-based resources and the importance of home-school relationship in early childhood education and family education.
Pre-requisite: None

EDUC7355 SPECIAL TOPICS IN EARLY CHILDHOOD EDUCATION AND CHILD DEVELOPMENT

This graduate level course covers the current and new topics, new trends, and new research findings, in the area of early childhood education and child development. The actual topics may differ as this course is offered at different times, to reflect the new developments and directions of this field. The graduate level course will expose the students to the new thoughts, new developments, more recent research and practice in the area of early childhood education and child development.

Pre-requisite: None

EDUC7356 STUDIES ON PRESCHOOL INCLUSION

Introduces latest research findings on serving children with special needs in inclusive early childhood settings. Highlights knowledge and skills to initiate and sustain quality inclusion programmes in Macao, other Chinese regions and beyond. By means of different activities such as synthesizing research findings and observing student-teacher interactions in inclusive classrooms, students will gain a deep understanding of philosophical, moral and legal foundations for early childhood inclusion. Moreover, student will identify and master effective strategies for building a high quality inclusion programmes such as making curriculum modifications and embedding learning opportunities in play and routine activities. Finally, student will prioritize targeted intervention services for individual child.

Pre-requisite: None

EDUC7401 EDUCATIONAL AND PSYCHOLOGICAL ASSESSMENT

This course introduces the concepts, principles, and methods in educational and psychological measurement to students. Topics include reliability, validity, item analysis, scores, and score reports. Emphasis is on construction, interpretation, use, and evaluation of assessments regarding achievement, aptitude, interests, attitudes, personality, and exceptionality. The integration of assessment data into a comprehensive psychological report including associated recommendations for intervention is an essential component of this course.

Pre-requisite: None

EDPS7402 PSYCHOLOGY OF LEARNING

This course introduces psychological theories pertinent to the learning of students, and current views of how people learn. Particular focus is placed on linking theories to classroom situations. Topics included are: behavioristic, information- processing, constructivistic, and humanistic theories of learning.

Pre-requisite: None

EDUC7403 ADVANCED DEVELOPMENTAL PSYCHOLOGY

This course focuses on an integrated study of human development across the life span with implications for educational psychology. It aims at familiarizing students with current state of knowledge and major theories of human development with particular emphasis on childhood and adolescence. The interrelationship among biological, social-psychological, and educational factors that influence human development will be examined. In particular the influence of Chinese culture and context on development during the childhood and adolescence will be discussed.

Pre-requisite: None

EDUC7451 MOTIVATION AND LEARNING

This course explores how motivational principles can be applied to promote learning and instruction. Motivation topics may include achievement motivation, extrinsic and intrinsic motivation, attribution, goals and needs, interests, beliefs and values.

Pre-requisite: None

EDUC7452 PSYCHOLOGY OF INSTRUCTION

This is a course in the application of theory and research in psychology to the analysis and design of teaching and learning. Instructional theories and models are introduced to meet the learning of

diverse topics by different learners. Technology integration in the design and development of instruction is also explored.

Pre-requisite: None

EDUC7453 LEARNING DIFFICULTIES AND GUIDANCE

This course focuses on studying the characteristics and the causes of learning difficulties. The content includes a study of psychological characteristics of learning difficulties, diagnostic methods and tools, how to design individual educational programmes and provide psychological and learning guidance to students with learning difficulties.

Pre-requisite: None

EDUC7454 EDUCATIONAL DIAGNOSIS AND INTERVENTIONS

This course provides an overview of theories, research, and practice on educational diagnosis and intervention, with an emphasis on individuals from early childhood to adolescence. The goal of this course is for students to understand the theories, implement the educational diagnosis, and give consultation to teachers for preventing academic, emotional, behavioral, and social problems among the students in primary and secondary schools.

Pre-requisite: Educational & Psychological Assessment

EDUC7455 BEHAVIORAL AND SOCIAL PROBLEMS AND GUIDANCE

This course provides an introduction on the characteristics of children/adolescents with emotional, behavioral, and social problems. The content will focus on how to implement intervention programmes for those children and adolescents in school settings.

Pre-requisite: None

EDUC7456 TEACHING STUDENTS WITH ATTENTION DEFICIT AND HYPERACTIVITY DISORDER

This course is designed to help educators work with students with ADHD in their inclusive classroom. The course will further define the symptoms, characteristics and treatment of ADHD, and offer strategies to use within the classroom and with parents.

Pre-requisite: None

EDUC7457 SPECIAL TOPICS IN EDUCATIONAL PSYCHOLOGY

This graduate level course covers the current and new topics, new trends, and new research findings, in the area of educational psychology. The actual topics may differ as this course is offered at different times, to reflect the new developments and directions of this field. The graduate level course will expose the students to the new thoughts, new developments, more recent research and practice in the area of educational psychology.

Pre-requisite: None

EDUC7501 ADVANCED EXERCISE PSYCHOLOGY

This programme aims to introduce methods of the application of sport psychology in sport studies and the teaching of physical education. Students will have chances to familiarize with a range of techniques in learning. They will be invited to evaluate critically the sport chosen by different theoretical principles and research support for these procedures. Coaches and physical educators will find useful in this study as it covers the theoretical aspects of sport behavior and the establishment of a knowledge base for sport participation and performance development.

Pre-requisite: None

EDUC7502 CURRICULUM AND TEACHING OF PHYSICAL EDUCATION

This programme aims to provide participants with an opportunity to explore the socially constructed nature of schooling, curriculum, teaching and learning in the field of physical education and sport studies. Current issues on teachers' work will be investigated. Recent research and theory that examines the roles of teachers in facilitating students' learning will be reviewed and critiqued. The programme covers a series of core sessions in curriculum planning, assessment, school-based curriculum development, learning and effectiveness in teaching.

Depending on the professional interests of participants, remaining sessions will be negotiated to ensure that current curriculum in physical education is examined.

Pre-requisite: None

EDUC7503 ADVANCED EXERCISE PHYSIOLOGY

The programme introduces the nature of human body and examines its biological nature to the teaching and learning of physical education. Students will have chances to focus on human anatomy, exercise physiology and its biomechanics principles to development of movement exercises. The programme also aims to promote an understanding of the variety of laboratory and field skills used in the biomechanical assessment of the exercising human. The purpose is to enhance human performance growth in physical education and sport through the knowledge of body science.

Pre-requisite: None

EDUC7551 COMPARATIVE PHYSICAL EDUCATION AND SPORT

This programme explores current programmes of physical education and sport development in various countries of the world and the reasons for their development, similarities and differences as well. Discussions will be concerned with the political, economic and philosophical ramifications affecting the development of physical education and sport programmes. Topics such as amateurism, apartheid, violence and Olympic movement will be included.

Pre-requisite: None

EDUC7552 SPORTS, RECREATION AND LEISURE STUDIES

The programme provides a thorough review of the impact of sport, recreation and leisure to community and its educational processes to an individual's leisure lifestyle development. Different social and recreational theories will be examined. The aim is to enhance the growth of a health society through various physical and sport activities. The programme will also focus on the role and impact of different group dynamic approaches and the awareness of these approaches to professional development in sports, recreation and leisure studies.

Pre-requisite: None

EDUC7553 EFFECTIVE LEARNING AND LEARNING IN PHYSICAL EDUCATION

This programme examines ways in which current understanding of cognitive processes related in knowing and thinking are contributors to the process of learning. Consideration will be given to constructivist and generative approaches in learning and how schema theory facilitates the development of knowledge and problem-solving skill under the perspectives in physical education. Emphasis will also be placed on connections between such knowledge to the learning of physical activities in school. Issues of transfer of learning, creativity and facilitation of self-regulation in the learner will be examined.

Pre-requisite: None

EDUC7554 EXERCISE AND NUTRITION

The course introduces the basic knowledge of nutrition and discusses the interactions between nutrition and exercise. Subject contents relating to diet, energy intake, expenditure, weight control and nutrient supplements for leisure, entertainment or competitions are also addressed. After the course, students will be able to apply related knowledge to serve different people in sports.

Pre-requisite: None

EDUC7555 SPORTS SOCIOLOGY

Sociology and philosophy are the fundamental platform for study of physical education and sport. This programme aims at equipping students with a philosophical mind and serves as tool for the critical examination of the subject. This programme initiates participants into considering current and possible future practice in the teaching of physical education in schools and promotion of sport in society by three sub-disciplines: philosophy, sociology and history in physical education and sport. Apart from a global perspective, the social and historical contexts of mainland China,

Macao and Hong Kong will also be investigated.

Pre-requisite: None

EDUC7556 PHYSICAL ACTIVITY AND HEALTH

This course covers identifying the role of lifestyle behaviors to reach optimal health and well-being. Base on a holistic understanding of health, the principles and the latest research findings will be used to examine human behaviors and factors that affect involvement in regular physical activities.

Pre-requisite: None

EDUC7557 SPECIAL TOPICS IN PHYSICAL EDUCATION & SPORT STUDIES

This course covers the current and new topics, new trends, and new research findings, in the area of physical education and sport studies. The actual topics may differ as this course is offered at different times, to reflect the new developments and directions of this field. In this graduate level course, students will engage in more recent research and practice in the area of physical education and sport studies.

Pre-requisite: None

EDUC7601 THEORIES IN COUNSELING PROFESSION

This course provides an overview of classical and contemporary theories in counseling to consolidate a foundation on which various counseling techniques and services are built. Ethical issues in the counseling profession are also addressed.

Pre-requisite: None

EDUC7602 EDUCATIONAL & PSYCHOLOGICAL ASSESSMENT

This course introduces to students the concepts, principles, and methods in educational/psychological measurement. Topics include reliability, validity, item analysis, scores, score reports (for example grades). Emphasis is on construction, interpretation, use, and evaluation of assessments regarding achievement, aptitude, interests, attitudes, personality, and exceptionality. The integration of assessment data into a comprehensive psychological report including associated recommendations for intervention is an essential component of this course.

Pre-requisite: None

EDUC7603 ADVANCED COUNSELING SKILLS

This course attempts to reinforce students' counseling skills by role-play and demonstrations in a class setting. These micro-counseling sessions will be recorded with the use of audio-visual equipment for later discussions, reflective thinking, critical evaluation by peers and the respective instructor. Students will be closely supervised to advance in confidence, competence, and counseling techniques. The course will also focus on the development and maintenance of the counseling relationship.

Pre-requisite: None

EDUC7651 CAREER COUNSELING

This course introduces students to a variety of career counseling strategies needed to provide guidance for prospective graduates and human resources in the work force within the current context of economic shift, high unemployment and change in job nature. The course also gives an overview of issues in the pursuit of a career such as gender and socio-economic status.

Pre-requisite: None

EDUC7652 GROUP COUNSELING

This course examines both the theory and practice of group counseling. It is a combination of didactic and experiential activities. Uses of groups for growth, prevention, and therapy are explored. Students will learn a basic understanding of group leadership roles, therapeutic factors of group counseling, and stages of group process. They will observe and participate in the dynamics of group interaction.

Pre-requisite: None

EDUC7653 FAMILY COUNSELING

This course examines the various factors constituting to familial problems such as dissatisfactory marriage, family violence, divorce, and child-abuse. Theories and assessments of different interventions as well as solution-focused and emotion-focused approaches to relationship therapy will be practised through role-play of family interviewing. The course will also overview the shift in the value system within the local context.

Pre-requisite: None

EDUC7654 ABNORMAL PSYCHOLOGY IN ADOLESCENCE

This course will focus on the current issues in adolescent psychopathology. Students will learn to explore how biological, psychological, and sociocultural factors contribute to the development of adolescent psychopathology. It will also discuss the impact of psychopathology on the individual, the family and the community. The examination of etiology, treatment and prevention approaches for adolescence will be included.

Pre-requisite: None

EDUC7655 SPECIAL TOPICS IN SCHOOL COUNSELING

This graduate level course covers the current and new topics, new trends, and new research findings, in the area of school counseling. The actual topics may differ as this course is offered at different times, to reflect the new developments and directions of this field. The graduate level course will expose the students to the new thoughts, new developments, more recent research and practice in the area of school counseling.

Pre-requisite: None

EDUC7656 COUNSELING PRACTICUM I

This course provides students who are training to become school counselors with the opportunity to incorporate the knowledge and skills grown in prior and concurrent learning experiences and apply them in practical settings. Students are expected to complete a minimum of 100 hours of in-direct and direct service with clients under close supervision of an experienced psychologist/counselor. Target clients can be from educational settings or the local community. Individual and group debriefing sessions will be scheduled on a regular basis.

Pre-requisite: None

EDUC7657 COUNSELING PRACTICUM II

This course requires counselors-in-training to participate in advanced individual and group clinical practice with intensive guidance on counseling skills, problem-solving, and interpersonal relationships. Students are expected to further complete a minimum of 100 hours of direct service with clients under close supervision of an experienced psychologist/counselor. Target clients can be from families, educational settings or the local community. Individual and group debriefing sessions will be scheduled on a regular basis.

Pre-requisite: EDUC7656

EDUC7701 TEACHER DEVELOPMENT IN TESOL

In this course, participants will develop a comprehensive and situated understanding about various aspects of language teachers' professional lives, learn about important and updated approaches and strategies about language teacher education, as well as explore how to promote and sustain their professional development as language teachers. Through critical reading and discussion based on assigned materials, video clips and critical cases, and by reflecting on their previous/ongoing learning and teaching experiences, participants will examine their professional values, beliefs and identities and develop professional knowledge and competence to seek and sustain their continuing development in school environments.

Pre-requisite: None

EDUC7702 TEACHING READING AND WRITING

This course provides opportunities to explore various perspectives on theory, research, and pedagogical applications in second language reading and writing. The course aims to equip

students with strategies to help second language learners develop the skills necessary for effective reading and writing. Topics include the nature of L2 reading and writing, approaches to teaching L2 reading and writing, L2 reading and writing processes, features of L2 writers' texts, beliefs and attitudes of L2 readers and writers, feedback on L2 writing, collaborative writing, and assessing reading and writing skills. Course participants will be helped to make connections between theory and practice and understand key issues that underlie second language reading and writing, and acquire skills and techniques for planning, teaching and assessing second language reading and writing.

Pre-requisite: None

EDUC7703 LANGUAGE TESTING AND ASSESSMENT

This course has been designed to suit the needs of MA students in English education to develop a comprehensive and situated understanding of the principles and practices of language testing and assessment. The aims of this course are to highlight key issues in language testing and assessment, review the characteristics of good language tests and provide guidance for constructing valid and reliable language tests and developing appropriate classroom assessment strategies. Both large-scale tests and classroom-based assessment are addressed in this course, covering topics such as teaching and testing, kinds of tests and testing, reliability, validity, washback effect, formative assessment, assessment of/for/as learning, and so forth.

Pre-requisite: None

EDUC7704 TEACHING LISTENING AND SPEAKING

This course examines the construct of listening and speaking by considering theories about spoken English and its learning and use in second language contexts. Through a critical reading of research and scholarly discussions, participants will learn about listening and speaking development from cognitive, social, and discourse perspectives. This knowledge will be applied in evaluating and improving current practices in the teaching and assessment of listening and speaking competence in second language classrooms as well as in understanding the role of listening and speaking in learning at home and in school.

Pre-requisite: None

EDUC7705 LANGUAGE AND LINGUISTICS

This course introduces key concepts and approaches to the study of language and linguistics. It provides an overview, with basic terminology, of the major subfields of linguistics, investigating the nature, history, and structure of language, and how language relates to the mind, society, and education. It provides the basis of investigation in subsequent courses. Students are encouraged to reflect on their own language experience and apply the theories covered in the course to their own linguistic context.

Pre-requisite: None

EDUC7751 UNDERSTANDING SECOND LANGUAGE ACQUISITION

The purpose of this course is to provide an overview of the field of second language acquisition to help students understand how second or foreign languages are acquired or learned. Students will read about major theories of SLA and learn the individual, social, and cognitive factors and processes that affect the acquisition, development, and use of a second or additional language. Students will also learn to carry out interlanguage data collection and engage in different types of data analysis to inform pedagogy and make connections between abstract knowledge of SLA and practical applications of such knowledge in second/foreign language classrooms.

Pre-requisite: None

EDUC7752 SPECIAL TOPICS IN TESOL

This course is designed to offer visiting scholars, or existing staff, the opportunity to offer postgraduate level students courses in their particular area of specialization. The topic and content of the courses will vary from year to year depending on the availability of expert staff. Examples of specialized topics that may be offered include teaching and assessing specific language skills, teaching English for academic or specific purposes, technology-supported

language teaching and learning, among other relevant topics.

Pre-requisite: None

EDUC7753 SOCIAL PERSPECTIVES ON LANGUAGE USE AND BILINGUAL EDUCATION

This course examines the sociolinguistic, social psychological and sociological aspects of language use and bi/multilingual education. The course studies the ways in which groups of people use language, and looks into the close link between languages and the social context in which they are used. Topics such as aspects of language variation and dialects, language and power, language policy and language planning are covered. Bi/multilingualism and bi/multilingual education in different contexts are discussed, drawing implications for the teaching of English as a foreign language in Macao and the Greater Bay Area, and similar EFL contexts.

Pre-requisite: None

EDUC7754 LEARNING AND TEACHING OF ENGLISH PHONETICS AND PHONICS

This course examines the sound systems of the major varieties of English and reviews methods used in teaching and improving pronunciation. Attention to the difficulties in English pronunciation encountered by learners of English in Macao and the Chinese context is given along with a review of targeted instructional techniques for helping students overcome these difficulties. Specifically, the course helps students to define achievable objectives for pronunciation teaching, diagnose learners' pronunciation problems and develop a range of techniques to increase students' awareness of, and concern for, the intelligibility of their spoken English.

Pre-requisite: None

EDUC7755 WRITTEN AND SPOKEN DISCOURSE FOR ENGLISH LANGUAGE TEACHING

This course aims to help students to develop an understanding of the relationship between linguistic structures and functional purposes of language use in classroom contexts. It focuses on analysing discourse features in English as second or foreign language classroom contexts. Through analysing the linguistic and functional characteristics of teacher-learner classroom talk and its sequential structures, students will explore the dynamics and potential of classroom interactions, and their impacts on pedagogical effectiveness in a diversity of classroom contexts relevant to students with different learning needs and backgrounds.

Pre-requisite: None

EDUC7798 PROJECT REPORT

Students are provided with an opportunity to build on interests developed in TESOL through undertaking an individual project normally of 8,000 words by independent study. Examples of possible projects are a critical literature review of an issue or topic of significance in TESOL, a small-scale research project, a relevant professional development activity, a reflection on language curriculum and materials development in a particular instructional context, a teaching practicum report, or any other project related to English language teaching practice. Each student will be assigned an academic supervisor that supports their independent study. For participants who might be aspiring to transition into a doctoral career, they can choose to conduct a TESOL research project and write a longer project report under the supervision of the programme instructors.

Pre-requisite: None

EDUC8001 QUALITATIVE RESEARCH METHODS

This course intends to provide graduate students with systematic training about qualitative research methodology in education. Course participants will learn about different approaches to qualitative research and their epistemological underpinnings, the social theoretical paradigms informing different approaches, ethical considerations and issues of reflexivity/positionality/legitimacy, and the methodological nuts-and-bolts in conducting qualitative inquiry.

Pre-requisite(s): Introducing Qualitative Research, or equivalent; or based on instructor's consent.

EDUC8002 APPLICATIONS OF ADVANCED QUANTITATIVE METHODS

This course provides coverage of some widely-used advanced quantitative methods in education and other social and behavioral sciences. It provides the analytical foundation for doctoral students in using these more advanced analytical approaches in evidencebased empirical research.

Pre-requisite(s): Introducing Quantitative Research, or equivalent; or based on instructor's consent.

EDUC8003 RESEARCH ETHICS

This course is intended to provide a foundation for PhD students to think critically about what it means to be an ethical researcher. During this course students will critically analyse research ethics topics and case studies, and learn how to conduct a research project from an ethical standpoint. By understanding and reflecting upon research ethics-specific issues, students will assimilate the importance of scientific integrity while acquiring key reasoning skills that will significantly increase the scientific quality and impact of their future research.

Pre-requisite: None

EDUC8004 RESEARCH WRITING

This course aims at introducing to PhD students an overall view of understanding and conducting educational research in a scholarly way. Critical issues are discussed in this module, including conceptualization, operationalization, measurement and others in order to lay a solid foundation for junior researchers in developing their research career.

Pre-requisite: None

EDUC8005 INTRODUCTION TO EDUCATIONAL RESEARCH

This course aims at establishing a pragmatic foundation for doctoral students by seeing the strengths and weaknesses of various methods. It is designed for first-year doctoral students who pursue social science research.

Pre-requisite: None

EDUC8006 INTRODUCING QUALITATIVE RESEARCH

This course is designed for students with little or no prior experience with qualitative research methods. The aim of the course is to familiarize students with various aspects of qualitative research strategies, as practiced by educational researchers. The course, conducted in the form of a seminar, covers a wide range of issues to help students to design, conduct, evaluate, and reflect upon qualitative research work. This introductory course can serve as a prerequisite, but not necessary if students already have prior knowledge in the subject matter, to the "Qualitative Research Methods" course.

Pre-requisite: None

EDUC8007 INTRODUCING QUANTITATIVE RESEARCH

This course is designed for students with little or no prior experience with quantitative research methods. This course provides an introduction to quantitative methods used in educational research, particularly descriptive statistics and elementary inferential statistics. Topics include formulating research questions, research design, sampling, descriptive analysis, bivariate relationships, regression, analysis of variance etc. This course is required for all students enrolled in the doctoral programme of FED.

Pre-requisite: None

EDUC8008 QUALITATIVE RESEARCH DESIGN

This course will present qualitative research objectives, qualitative research characteristics, and commonly used qualitative research strategies for Year-1 PhD students. This course aims to promote PhD students' ability to understand, interpret and apply qualitative approaches in authentic research contexts and prepare them for learning advanced qualitative research at a later stage.

Pre-requisite: None

EDUC8009 DESCRIPTIVE AND INFERENTIAL STATISTICS

This is an introductory course in descriptive and inferential statistics. The focus of the course is on basic quantitative research design as well as the use and interpretation of statistical procedures used with quantitative methods of research and evaluation. Topics covered include types of research design in quantitative research, descriptive statistics, measures of variability, procedures for evaluating the reliability and validity of tests and surveys, and correlation. This course does not rely heavily on mathematical skills. The statistical analysis software (e.g., SPSS) will be used in this course.

Pre-requisite: None

EDUC8100 EDUCATIONAL LEADERSHIP AND POLICY ANALYSIS

The making and analysis of education policy has become more complex in the 21st Century as a result of political, economic and cultural changes to education. Thus, the goals of this course are to provide participants a critical awareness of issues, challenges and global transnational policies facing leaders in education in the regional and internationally during times of fervent change. The course design is structured to respond to the needs of future/potential/current leaders from all sectors and across all levels of education. This course will enable participants to examine concerned education issues and policy through the lens of educational leadership. Additionally, this course also examines the theoretical and methodological approaches to be considered in studying policy in a regional as well as a global context. Topics will include social justice and equity issues, for instance, gender; standards and accountability; models of governance, and the legal and the institutional framework of governance across the three educational levels.

Pre-requisite: None

EDUC8101 ORGANIZATION AND LEADERSHIP: FROM THEORIES TO PRACTICES

This course is designed to promote reflective skills of educational professionals in the application of theoretical knowledge to address complex problems and make informed decisions. By familiarizing current and aspiring educational leaders with theoretical assumptions, limitations and practical implications of different organization and leadership models, learners should be able to apply their knowledge to develop creative strategic approaches to problem-solving and decision-making in applied settings. It is the objective of this course to help contemporary school leaders develop as effective and reflective leaders.

Pre-requisite: None

EDUC8102 RESEARCH METHODS IN EDUCATION

The purpose of this course is to provide an introduction to a variety of research approaches and procedures common in the field of education. Conceptual, procedural and analytical issues from a wide variety of areas will be covered. Students will develop a good awareness of the range of methods that may be applied to different types of research and the guidelines to be used in selecting a set of appropriate research methods. This course will become a primary mechanism by which students develop a broad sense of the field of education and the use such knowledge to identify possible research topics.

Pre-requisite: None

EDUC8103 ORAGANIZING FOR LEARNING

Changes in educational technology and neuroscience are dramatically affecting the way students learn and the way schools are organized. The first part of this course is designed for K–12 educational leaders who want to initiate and implement technological change at the district and regional levels. The second part of this course will integrate research from neuroscience to transform the school into a learning organization. By integrating the latest technologies and instructional design principles, students can prepare to develop and lead technology-supported solutions to learning issues in the K–12 classroom, and leadership challenges in K-12 school settings.

Pre-requisite: None

EDUC8104 DATA AND DECISION

Decision-making in schools involves the systematic collection and analysis of data of different forms on the design, implementation, and the effectiveness of programmes or projects. This course will provide an overview of various perspectives and approaches to educational evaluation. Major theories and analytical tools will be discussed. Students will be given the opportunity to critically examine these different approaches to answer questions about classroom projects, educational policy and programmes. Students have the chance to apply the theories covered in the course through case study analyses. Students gain an understanding of theories, applications, and approaches within the context of formal programme evaluation.

Pre-requisite: None

EDUC8105 COMPARATIVE AND INTERNATIONAL EDUCATION

The comparative perspective has been an important lens through which educators understand our own education practices. This course aims to analyze different education systems around the world and introduce students to new education reforms and innovation in different countries. Students will be introduced to the new thinking of school organization and reflect upon existing practices. In the course, students will discuss diverse issues such as equity, achievement, marketization, cultural influence with cross-country comparisons of regulatory frameworks, and the role of culture.

Pre-requisite: None

EDUC8106 RESEARCH WRITING AND ETHICS

This course has been designed to suit the needs of doctoral students conducting educational research. The course aims to develop and sharpen doctoral students' academic and professional writing skills and strategies in Chinese and English, and build their proficiency and confidence as academic writers. Students will be equipped with the genre structure of research writing (e.g., introduction, literature review and discussion) and learn how to report empirical research in research articles and theses/dissertations.

Pre-requisite: None

EDUC8107 SPECIAL TOPICS SEMINAR

This seminar is a mixture of various topics that are relevant to school leaders. Each topic will be made up of a two-day workshop with experts from different fields inside and outside UM. Students will be divided into groups to discuss, evaluate, and present their group work as the assessment. Example topics include, but are not limited to: resource management in K-12, school case study, crisis management and law in education, change and development for educational institutions, values and ethics for school leaders, school governance and inter-systems relations, etc. Each student will attend at least four such seminars and produce a group report.

Pre-requisite: None

EDUC8108 PRACTICE IN ACTION

This course is the first of practicum series that aims to provide field experience to students to understand the world of educational practitioners. Students will inquire and discover issues by interviewing, observing, engaging in field research, or other appropriate means. Students will meet with and eventually embed themselves into organizations with key educational leaders from and throughout China. Alternatively, for students who already work in a leadership position, FED faculty members will follow and observe their work during the field experience. Each student will produce a report as an assessment.

Pre-requisite: None

EDUC8109 INDEPENDENT STUDY

This course is the second of practicum series that aims to provide field experience to students with an aim to understand the world of educational practitioners. The aim of the course is to guide students to disseminate their research and observation results through presentation, policy briefs, and/or practitioner journal publications to making a meaningful contribution to practice and/or policy issues. Student will work with a supervisor on a research topic of choice. This course

provides meaningful pre-thesis research experience that would prepare the student for more sophisticated research.

Pre-requisite: None

EDUC8199 DOCTORAL THESIS

This is the most significant learning experience of the programme. It is designed for EdD students to apply theories and experience learned in the courses and to independently conduct an applied research project examining an educational issue. Students will demonstrate their expertise in on a chosen topic and provides an intellectual contribution to the practice and educational leadership and management.

EDUC8999 DOCTORAL THESIS (Ph.D.)

This course deals with both the theoretical and practical aspects of designing dissertation research and successfully defending the design in a proposal hearing. The purpose of the course is to assist students through the doctoral proposal and dissertation writing processes.

Prerequisite: None

HSCI1002 INTRODUCTION TO BIOLOGICAL SCIENCES

Biology is the study of life. With the objective of introducing students to the fields of biological and biomedical sciences, this course covers the following fundamental aspects or principles of biological sciences: basic units of life, genetic basis of life, evolution and biodiversity, development and function, and ecology and environment. Although all three domains or five kingdoms of life will be covered, the course will focus more on animals and humans.

Pre-requisite: None

HSCI1003 GENERAL AND CLINICAL BIOCHEMISTRY

This course introduces the molecular basis of biological processes through the logic of chemistry. Topics covered include the structure and function of biomolecules, biochemistry techniques, basic metabolic pathways, and a brief introduction to the biochemical bases of relevant disease states.

Pre-requisite: None

HSCI2000 CELL AND MOLECULAR BIOLOGY

This course aims to provide an introduction to the principles of modern cell and molecular biology, and build a foundation for students to initiate and develop the process of inquiry-based learning and discovery in biology and medical sciences. The course will discuss fundamental molecular biology of the cell, current molecular genetic techniques, cell structure and function, and signal transduction pathways.

Pre-requisite: HSCI1002

HSCI2002 GENERAL AND CLINICAL MICROBIOLOGY

This course provides students with a broad-based foundation in the basic concepts of general and clinical microbiology. Topics covered include an overview of microbiology with basic information on bacteria, fungi, protozoa and viruses, a discussion of microbial physiology and genetics, and an introduction to microbial pathogenesis and the host response, providing a conceptual basis for understanding pathogenic microorganisms and the mechanisms by which they cause diseases in the human body. Successful completion of this course will prepare students for more advanced courses in related fields.

Pre-requisites: HSCI1002 and HSCI1003

HSCI2004 GENETICS AND EPIGENETICS

This course introduces the basic principles of classical and molecular genetics and epigenetics, focusing on how biological information is stored, expressed, changed, and transmitted. Topics covered include inheritance, gene structure, expression and regulation, molecular genetic techniques, population and evolutionary genetics, followed by a discussion of the role of epigenetics in biological phenomena.

Pre-requisites: HSCI1000 and HSCI1002

HSCI2005 BIOLOGY OF DEVELOPMENT AND AGING

This lecture discusses animal development with focus on initiation and construction of an organism and the underlying molecular and genetic basis. Topics covered include an overview of developmental biology, the molecular mechanisms of development, cell commitment and early embryonic development, and the vertebrate development process. A final section will be devoted to a discussion of the aging process, including the evolutionary, biochemical, genetic and cellular mechanisms of aging, as well as age-related diseases.

Pre-requisites: HSCI1002 and HSCI2000

HSCI2006 PHYSIOLOGY AND PATHOPHYSIOLOGY

This course provides an introduction to the structure and function of the major physiological organ systems of the human body, how various body processes are integrated and regulated, and how perturbations in physiological regulatory mechanisms and anatomy result in pathophysiology. Common diseases and disorders of each system are covered, and emphasis is given on cardiovascular, pulmonary, hepatic, renal and reproductive systems.

Pre-requisites: HSCI1003 and HSCI2000

MATH1001 LINEAR ALGEBRA I

Systems of Linear Equations and matrices. Gaussian elimination. Determinants. Cramer's rule. Euclidean Spaces. Addition and scalar multiplication of vectors. Linear transformations. Vector Spaces. Linear independence and linear dependence.

Pre-requisites: None

MATH1002 LINEAR ALGEBRA II

Vector Spaces. Basis and dimension. Matrices, row spaces, column spaces and null spaces. Rank and nullity. Inner product spaces. Inner products and orthonormal bases. Gram-Schmidt process. Least square problems and orthogonal matrices. Eigenvalues and eigenvectors. Diagonalization, orthogonal diagonalization. Linear transformations. Kernel and range. Inverse linear transformations. Similarity. Additional topics include quadratic forms, unitary, normal, Hermitian matrices, and canonical forms.

Pre-requisites: MATH1001

MATH1003 INTERMEDIATE CALCULUS

Definite integrals. Fundamental theorem of calculus. Applications of definite integrals. Approximations of definite integrals. Sequence and series. Power series and Taylor series.

Pre-requisite: GEST1004

MATH1004 GEOMETRY

Euclidean geometry, Euclidean space, inner product, distance, and angle. Isometries. Vectors in planes and spaces. Lines and planes and surfaces in 3-dimensional space. Linear transformations, projections, orientations and determinants, isomorphisms, and general linear groups. Symmetries and regular polyhedrons. Affine geometry. Affine spaces and affine transformations. Brief discussion on the development of various geometries such as Euclidean and non-Euclidean ones.

Pre-requisite: None

MATH2002 MULTIVARIABLE CALCULUS

Vectors and analytic space geometry. Norms, convergence of vector sequences, open and closed sets, compact sets. Curves, Frenet frames, surfaces. Functions of several variables. Partial derivatives and their applications, linear approximation, differential, Taylor's formula. Method of Lagrange multiplier. Inverse function theorem, implicit function theorem. Multiple integrals. Green's Theorem. Line and surface integrals. Gauss and Stokes' Theorems.

Pre-requisite: GEST1004

MATH2003 MATHEMATICAL ANALYSIS I

The axioms for the real number system. Countable and uncountable sets. Sequence of real

numbers. Nested intervals theorem. Bolzano-Weierstrass theorem, Cauchy criterion and Heine-Borel Theorem. Limits and continuity of functions. Properties of continuous functions.
Pre-requisite: GEST1004

MATH2004 MATHEMATICAL ANALYSIS II

Differentiation. Mean value Theorem. L'Hopital's Rule. Inverse function theorem. Integration. Upper and lower integrals. Riemann integrals. Fundamental theorem of calculus. Elementary functions. Series of numbers. Tests for convergence. Series of functions. Uniform convergence. Power series and Taylor series.
Pre-requisite: MATH2003

MATH2005 PROBABILITY

Sample space, random events, and probability. Discrete and continuous random variables. Distributions, densities, joint distribution, and marginal distributions. Conditional probability and independence, Moments, mean, variance, covariance, Chebyshev's inequality, and moment-generation functions. Special probability distributions, densities, and their applications.
Pre-requisite: GEST1004

MATH2006 APPLIED STATISTICS

Sampling distributions: Chi-square distribution, t-distribution, and F-distribution. Laws of large number and Central limit theorems. Estimation: theory and application. Hypotheses testing: theory and application. Linear regressions, correlation analysis, linear statistical model. The analysis of variance: theory and application. Introduction of statistical computing software.
Pre-requisite: MATH2005

MATH3000 ORDINARY DIFFERENTIAL EQUATIONS

First-order differential equations. Second-order linear differential equations. Higher order linear differential equations. Systems of differential equations. Power series solutions of linear differential equations, Sturm-Liouville problems. Laplace transforms. Existence and uniqueness theorem of first-order differential equations. Simple modeling problems.
Pre-requisite: MATH1003

MATH3001 COMPLEX ANALYSIS

Complex numbers. Polar coordinates. Functions of a complex variable. Limits. Derivatives of complex functions. Cauchy-Riemann equations. Harmonic functions, harmonic conjugates. Elementary complex functions, Mobius transformations. Contour integrals. Cauchy-Goursat Theorem. Cauchy integral formula. Liouville's theorem. Maximum moduli of functions. Taylor series. Laurent series. Residue theorems. Evaluation of improper integrals. Rouché's theorem.
Pre-requisite: MATH1003

MATH3003 ABSTRACT ALGEBRA

Groups. Cyclic groups and permutation groups. Cosets and Lagrange theorem. Homomorphisms. Normal subgroups and factor groups. Group action and counting. Rings. Integral domains. Ring homomorphisms. Ideals and quotient rings. Field of quotients. Rings of polynomials. Introduction to Fields.
Pre-requisite: MATH1001

MATH3004 PARTIAL DIFFERENTIAL EQUATIONS

Characteristics, classification of PDE, separation of variables, Fourier transform, and Laplace transform. Well-posedness of the wave and the heat equations. Boundary value problems for the Laplace and Poisson equations. Separation of variables.
Pre-requisites: MATH2002 and MATH3000

MATH3007 HISTORY OF MATHEMATICS

We will explore some major themes in mathematics-calculation, number, geometry, algebra, infinity, formalism--and their historical development in various civilizations, ranging from the

antiquity of Babylonia and Egypt through classical Greece, the Middle and Far East, and on to modern Europe. We will see how the earlier civilizations influenced or failed to influence later ones and how the concepts evolved in these various civilizations.

Pre-requisite: None

MATH3013 MATHEMATICAL MODELING

Modeling techniques for analysis or decision-making. The detailed content in this course can vary from extending students' training and understanding in applied mathematical knowledge to further study in specific areas in applied mathematics.

Pre-requisite: MATH1003

MATH4000 ELEMENTARY NUMBER THEORY

Divisibility theory of the integers, primes, unique factorization, congruence. Fermat's little theorem, Diophantine equations. Quadratic residues and quadratic reciprocity laws, primitive roots. Pell's equations and continued fractions.

Pre-requisite: None

Course Description

DOCTORAL DEGREE PROGRAMME

HSCI8003 RESEARCH ETHICS

This course provides students with an understanding of the need for research ethics and the responsibility of the researcher (the student); the most common types of academic dishonesty (such as fabrication and plagiarism); how to avoid committing acts of academic dishonesty (such as through using citations and references); and how the University deals with students who have been proven to have committed acts of academic dishonesty (The University's 'Rules on Handling Student Academic Dishonesty' will be outlined).

Pre-requisite: None

HSCI8004 METHODOLOGIES IN BIOMEDICAL SCIENCES

This course aims to equip students with basic knowledge and general techniques commonly used in Biomedical Science research. Students will learn the scientific jargon, basic biology, and theories associated with each technique so that students can perform and understand common research methods. This course aims to help them with their research, project design, Qualifying Examination and graduate with PhD in "Biomedical Sciences".

Pre-requisite: None

HSCI8005 CRITICAL SCIENTIFIC READING, WRITING AND ANALYSIS

This course aims to provide training and instruction in the methods and practice of critically reading, writing, and analysing scientific text. Students will learn reading strategies, annotation methods, and techniques in outlining and summarizing a text. Students will also learn essential structure and writing techniques for manuscripts and proposals. The course is activity based and students will participate in reading, analysing, and writing exercises.

Pre-requisite: None

HSCI8006 ADVNACED MOLECULAR CELL BIOLOGY

This course aims to provide a comprehensive coverage at advanced level on topics in molecular and cell biology, such as DNA and Gene Editing, Gene Expression, Cytoskeleton and Intracellular Mobility, Mitochondria and Bioenergetics, ER-Golgi and Protein Sorting, Proteasome and Protein Degradation, Lysosome and Autophagy, cell signalling, cell cycle, cell death, etc. This course is taught by professors from FHS with the relevant background. The model of teaching includes both lecture and paper discussion. The students are assessed via closed-book essay questions.

Pre-requisite: None

HSCI8118 ADVANCED GENETICS AND BIOINFORMATICS

The course aims to provide advanced knowledge in genetics and bioinformatics, new progress in both theoretical and methodological aspects, and future perspectives in the field. It combines the lecture and literature analysis, with student presentation and discussion on specific topics.

Pre-requisite: None

HSCI8119 ADVANCED BIOMEDICAL AND CHEMICAL ENGINEERING

This course aims to provide the students the underlying principles of biomedical imaging X-ray CT, SPECT, PET, optical imaging, and MRI; emphasize emerging nanotechnologies and biomedical applications including nanomaterials, nanoengineering, nanotechnology-based drug delivery systems, nano-based imaging and theranostic systems, nanotoxicology, and translating nanomedicines into clinical investigation; and explore the process of drug development, from target identification to final drug registration, involving target selection, lead discovery using computer-based methods, combinatorial chemistry/highthroughput screening, safety evaluation, bioavailability, clinical trials, and the essentials of patent law.

Pre-requisite: None

HSCI8200 ADVANCED EPIDEMIOLOGY

This course shall build upon the basic foundations of epidemiological principles and provide students with advanced knowledge and skills in epidemiology, enabling them to have internationally leading expertise that can be applied in public health epidemiology. Areas this course shall cover include setting up epidemiological research using cohort study, matched case-controlled study and self-controlled case study (SCCS) designs, advanced issues on informing causality including reverse causality and estimating risks of residual confounding and issues in survival studies. The course is prepared to allow students to use this advanced expertise to evaluate epidemiology and design and conduct international quality epidemiology research important to current issues within public health.

Pre-requisite: None

HSCI8201 ADVANCED BIOSTATISTICS

This advanced statistics course covers advanced topics in statistical inference and modeling. Students will learn advanced statistical techniques and methodologies, including maximum likelihood estimation, Bayesian inference, and linear mixed models. The course also focuses on the application of these methods in the context of biological data, such as gene expression data, sequence data, and proteomics data. Students will gain practical experience through hands-on programming exercises and projects and will develop the skills needed to analyze and interpret complex biological data using advanced statistical methods.

Pre-requisite: None

HSCI8202 PRINCIPLES OF PUBLIC HEALTH

This course explores the historical context of the public health field, reviews the public health infrastructure and workforce, and examines evidence-based practices to address current public health issues. Students will gain an understanding of key principles in public health, including wider social and environmental influences on health and illness, approaches to prevention, population health research findings, and economic and ethical aspects of healthcare. The course will examine health disparities, quality, and accessibility, and will focus on strategies to promote health equity and healthy lifestyles. Students will be able to apply them to their specialized areas of study.

Pre-requisite: None

HSCI8203 ENVIRONMENTAL HEALTH SCIENCES

This course equips students' knowledge on the complex relationship between environmental factors and public health, covering topics such as toxicology, air and water quality, soil contamination, food safety, and radiation. Students gain understanding about the health impacts of climate change, the built environment, and risks to occupational exposures, as well as the principles of environmental justice and health equity. The course emphasizes risk assessment, management, and communication, and provides an overview of key environmental health policies and regulations. Students will use real-world cases applications to practically understand the implications of environmental health in public health.

Pre-requisite: None

HSCI8204 PUBLIC HEALTH POLICY AND ASSESSMENT

This course delves into the development, implementation, and evaluation of public health policies, focusing on evidence-based decision making and assessing impact upon public health and consequences of health policy implementation. Students explore various frameworks and methods used in policy analysis, considering key factors such as social determinants of health, equity, as well as health economic sciences such as cost-effectiveness. The course emphasizes the importance of collaboration with stakeholders, interdisciplinary approaches, and effective planning and communication strategies in shaping public health policies. Through real-world examples, students learn to critically appraise policy options, assess their potential health impacts, and contribute to the development of equitable and sustainable public health interventions.

Pre-requisite: None

HSCI8205 HEALTH INFORMATICS

This course introduces the principles and applications of health informatics in public health practice, focusing on data acquisition, management, analysis, and visualization. Students will learn how to harness information technology and digital tools to improve health outcomes, enhance decision-making, and facilitate interdisciplinary collaboration. The course covers topics such as electronic health records, telemedicine, mobile health, big data analytics, health economics and artificial intelligence. Emphasis is also placed on ethical considerations, data privacy, and security challenges in the context of public health informatics. Through practical assignments and case studies, students develop the skills needed to integrate informatics effectively into public health research, building public health policies and interventions.

Pre-requisite: None

HSCI8206 HEALTH CARE MANAGEMENT

The course explores the planning, operations, and regulations of health care facilities such as hospitals, clinics, and nursing homes. Students also learn about the doctor-patient relationship and how it impacts the delivery of healthcare services. The course emphasizes the development of students' long-term vision, organizational capabilities, and business planning skills within medical institutions. Additionally, students learn how to collaborate with government decision-makers and other medical institutions to achieve optimal healthcare outcomes. The course well-equips the students with the capability to manage healthcare facilities and lead healthcare teams effectively.

Pre-requisite: None

HSCI8207 CURRENT ISSUES IN PUBLIC HEALTH

The course provides an overview of priority concerns such as COVID-19, Substance Dependence, Social Media Misinformation/Disinformation Campaigns, Health Equity, Food Insecurity and Food Deserts, Mental Health / Social Isolation, Data Modernization and Privacy, and Environmental Impact on Health. Students apply their knowledge in public health, epidemiology, sociology, and economics to evaluate the social and environmental factors affecting these health issues. Through analyzing the effectiveness of current public policies and more, students develop recommendations for policy and programme development to improve outcomes for contemporary health issues. These topics are explored in national and international contexts.

Pre-requisite: None

HSCI8208 CURRENT ISSUES IN HOSPITAL MANAGEMENT

This course aims to provide comprehensive hospital management theories and methods, empowering students to master human, financial, material, information, time, and other resources at the hospital. By doing so, they can achieve optimal benefits from management activities. Hospital management is an excellent career choice for individuals who aspire to handle administrative and managerial roles in healthcare institutes. Furthermore, Hospital Management prepares students to manage various hospital-related tasks, such as ensuring that all departments function smoothly, assigning the right people to the appropriate jobs and ensuring that they perform their duties diligently, optimizing resource utilization to achieve common goals in healthcare system. There are two key aspects in this course: (1) to equip students with the knowledge and skills required to effectively manage healthcare organizations; (2) to provide students with a comprehensive understanding of the healthcare industry and the role of hospitals in the healthcare system.

Pre-requisite: None

HSCI8299 DOCTORAL THESIS

The Doctoral Thesis provides students with the opportunity to plan and conduct significant research, investigation, or development project under academic supervision. Students apply the techniques learned throughout the programme to address a real global problem in public health. This includes collecting and processing real data, designing and implementing analytical methods and tools, and applying, evaluating, and critically assessing data analysis, visualization, and prediction techniques. The project requires high-level coordinated academic and practical work,

culminating in the production of a written thesis that demonstrates the student's expertise and contribution to the field of public health.

Pre-requisite: None

HSCI8999 DOCTORAL THESIS

During the study period, students are required to perform independent research work under the supervision of the thesis supervisor. After successfully completing the qualifying examination and proposal assessment, a written thesis and an oral defence presenting the research findings with intellectual analysis are necessary for the assessment of the eligibility of graduation by the end of the study.

Pre-requisite: None

MASTER'S DEGREE PROGRAMME

HSCI7001 ARTIFICIAL INTELLIGENCE IN MEDICINE

This course introduces the concept of artificial intelligence (AI) in medicine, the associated big data analysis, and analytic programming. Medical AI is the use of algorithms and software to approximate human cognition in the analysis of complex medical data including those in global public health. AI is currently transforming healthcare delivery and is augmenting doctors' roles in medicine. This course covers analytic programming (predominately in R), big data analysis, and application for AI in medicine and global public health. The goal of this course is to develop students' understanding and to confer hands-on analytical skills for AI in medicine on them. It is also covers topics in global public health.

Pre-requisite: None

HSCI7002 BIOMEDICAL SCIENCES

This course introduces the essential biological knowledge to students with non-biology background in order for them to understand, explain and evaluate the basic concepts of precision medicine. It uses cancer as a model disease to illustrate how precision medicine can provide better, individually tailored healthcare solutions to patients. The course introduces the methods of discovering the causes of cancer, the techniques to perform accurate diagnoses, the mechanisms of cancer therapies, and the different strategies for cancer treatment. In addition, basic knowledge on immunology, microbiology and infectious diseases will be introduced in this course, topics such as "Viruses", "Bacteria", "Immune System", "DNA analysis" will be added to the existing topics.

Pre-requisite: None

HSCI7003 DIGITAL BIOMEDICINE

This course introduces the knowledge in digital medicine, technologies, and the associated big data and analysis to students with non-biology background, focusing on the public health issues with the global insights. Digital medicine is the convergence of digital technologies (including genomic technologies) with medicine, living, and society to enhance the efficiency of medicine delivery and make medicines more personalized and precise. This course covers high-throughput (HT) genotyping, HT phenotyping, artificial intelligence, big data analysis, public database, proteomics and other omics. The goal of this course is to develop students' understanding of digital medicine and required analytical skills for the exciting possibilities towards creating a new paradigm of precision medicine.

Pre-requisites: CMED7018 Bio-Statistics (for MSH-GPH)

CISC7204 Data Science and Data Visualization (for MSD-DTS-PMD)

HSCI7004 HEALTHCARE ANALYTICS

Healthcare analytics is one of the fastest growing industries in our economy. Healthcare analytics allows for the examination of patterns in various healthcare data in order to determine how clinical care can be improved. This course introduces the essential elements of healthcare analytics to students with nonhealthcare background, and provides them with an overview of population

health informatics, clinical informatics, imaging informatics, mobile healthcare and their contributions to precision medicine. The goal of this course is to develop students' understanding of healthcare analytics and analytical skills to comprehend healthcare data.

Pre-requisite: None

HSCI7005 TOXICOLOGY AND ENVIRONMENTAL HEALTH

The course covers basic concepts, knowledge and methods in toxicology, including the disposition of toxic substances by the body, how toxic substances react with biomolecules and lead to target organ toxicity / non-organ directed toxicity, knowledge about toxic substances, as well as applications of toxicology in environmental health and other application areas.

Pre-requisite: None

HSCI7006 EPIDEMIOLOGY

The course covers basic principles in epidemiology and risk management, including the tools of epidemiology, methods involved in measuring disease frequency, causes, morbidity, and mortality of diseases. Additionally, the course is designed to help students to apply the epidemiological knowledge to the real case studies and to find solution for the disease control and public policy. Finally, the course will prepare students to critically evaluate published epidemiological studies and communicate the scientific findings with science community, government policymakers, and general population in community.

Pre-requisite: None

HSCI7007 ADVANCED NUTRITION AND FOOD SAFETY

The course provides students with the advanced knowledge on human nutrition and food safety with the huge rise in diet-related health problem and in food safety emergencies. It focuses on nutrition and human health, and food safety problem (e.g. microbes, pesticides, food additives, allergens, industrial chemicals, and hazardous substances during cooking), as well as food risk assessment and management. It also introduces students to the serious effects of diet-related diseases/disorders and provides them with the knowledge of food risk assessment and management. This course is of great interest to students because its contents are relevant to our daily life.

Pre-requisite: None

HSCI7008 HEALTH SYSTEMS AND POLICY

This course aims to introduce how global health systems function, how health policy is shaped and implemented, and the role of health system research for evidence-based policy-making and implementation. There are two key aspects to this course: (1) knowledge and understanding; and (2) skills and abilities. To help students build their knowledge background in global health systems and policy, major theories and frameworks for health systems and policies and how they are applied in different national contexts are introduced. A systematic approach in learning the interrelationship of context, content, process and actions during health policy development are covered. An integration of such knowledge into the analysis of health systems and policy implications, and the formulation of skillset required to participate in health systems research and development work are also emphasized.

Pre-requisite: None

HSCI7009 CASE ANALYSIS OF GLOBAL HEALTH CRISIS: MANAGING EPIDEMICS

Public health emergencies take a terrible toll, both on human life and global economy. This course introduces strategies for managing epidemics, using COVID-19, SARS, AIDS (HIV), pandemic influenza, Ebola virus disease, yellow fever, Zika, cholera, and plague as examples. It covers the pathophysiology of different diseases, the principles of testing, tracing and isolation (TTI), the expert guidance from World Health Organization (WHO) for effective epidemic responses, and lessons learned from success and failure in managing epidemics.

Pre-requisite: None

HSCI7898 PROJECT REPORT

An individual project provides the opportunity to plan and execute a significant project of research, investigation or development, and to integrate learning and put the techniques learnt throughout the master programme into practice under an academic supervision. Students carry out high-level coordinated academic and practical work with an aim to solve a real global problem in public health, including collecting and processing real data, designing and implementing analytical methods and tools, and applying, evaluating and critically assessing data analysis, visualization and prediction techniques.

Pre-requisite: None

BACHELOR'S DEGREE PROGRAMME

HSCI1000 GENERAL CHEMISTRY

This course introduces the fundamental principles and concepts of chemistry to lay a foundation for future learning for students majoring in health sciences. The major areas covered in this course include atomic and molecular structure, chemical reactions and stoichiometry, energy and thermochemistry, chemical bonding, gases, chemical kinetics, chemical equilibrium, and introductory organic chemistry.

Pre-requisite: None

HSCI1001 GENERAL CHEMISTRY LAB

This laboratory course supplements the lecture course General Chemistry and provides students with hands on learning experience on qualitative and quantitative experimental techniques for investigating the properties and reactions of chemical substances.

Pre-requisite: HSCI1000 General Chemistry (or concurrent enrolment)

HSCI1002 INTRODUCTION TO BIOLOGICAL SCIENCES

This course covers the fundamental aspects or principles of biological and biomedical sciences, and topics include: basic units of life, genetic basis of life, evolution and biodiversity, development and function, and ecology and environment. Although all three domains or five kingdoms of life will be covered, the course will focus more on animals and humans.

Pre-requisite: None

HSCI1003 GENERAL AND CLINICAL BIOCHEMISTRY

This course introduces the molecular basis of biological processes through the logic of chemistry. Topics covered include the structure and function of biomolecules, biochemistry techniques, basic metabolic pathways, and a brief introduction to the biochemical bases of relevant disease states.

Pre-requisite: None

HSCI1004 BIOCHEMISTRY LAB

This course aims to provide a hands-on opportunity for students to learn the basic experimental methods and instruments used in a biochemistry laboratory, and develop analytical and problem solving skills that will be required for the pursuit of their career in the health science area. Major topics covered include protein expression, concentration determination and gel electrophoresis, western blotting, chromatography, and enzyme kinetics. Students will also practice literature search and data presentation through the semester.

Pre-requisite: HSCI1003 General and Clinical Biochemistry (or concurrent enrolment)

HSCI1005 ORGANIC CHEMISTRY

This course aims to provide students with an understanding of the basic principles of organic chemistry. Topics covered include nomenclature, structure, properties, stereochemistry, synthesis, and reactions of the major classes of organic compounds including hydrocarbons, alkyl halides, alcohols, ethers, aldehydes, ketones, carboxylic acids and their derivatives, aromatic

compounds, amines, carbohydrates, amino acids, and nucleic acids. Further topics cover spectroscopic analysis of organic compounds.

Pre-requisite: HSC11000 General Chemistry

HSC11006 ORGANIC CHEMISTRY LAB

This laboratory course supplements the lecture course Organic Chemistry and provides students learning experience in hands on experimental techniques. The course covers basic experimental skills in organic chemistry, including the synthesis of common organic compounds, the selection of synthetic route, and the characterization of organic compounds. Students observe and record experimental phenomena, identify problems, analyse problems, and develop problem-solving skills.

Pre-requisites: HSC11000 General Chemistry

HSC11001 General Chemistry Lab

HSC11005 Organic Chemistry (or concurrent enrolment)

HSC12000 CELL AND MOLECULAR BIOLOGY

This course aims to provide an introduction to the principles of modern cell and molecular biology, and build a foundation for students to initiate and develop the process of inquiry-based learning and discovery in biology and medical sciences. The course discusses fundamental molecular biology of the cell, current molecular genetic techniques, cell structure and function, and signal transduction pathways.

Pre-requisite: HSC11002 Introduction to Biological Sciences

HSC12001 CELL AND MOLECULAR BIOLOGY LAB

This laboratory course applies concepts learned in Cell and Molecular Biology lecture to a molecular biology research project, with an aim to introduce students to in vitro techniques utilized in a modern biological research lab. While it is not possible to cover all the methods and technologies in a single semester, the fundamental skills taught in this course will provide a basis for understanding many more complex approaches. Topics covered include ribose nucleic acid (RNA) isolation, agarose gel electrophoresis, polymerase chain reaction, restriction enzyme digestion, deoxyribose nucleic acid (DNA) cloning, bacterial transformation, plasmid deoxyribose nucleic acid (DNA) isolation, mammalian cell culture, deoxyribose nucleic acid (DNA) transfection, fluorescence microscopy, and subcellular fractionation.

Pre-requisites: HSC11002 Introduction to Biological Sciences

HSC12000 Cell and Molecular Biology (or concurrent enrolment)

HSC12002 GENERAL AND CLINICAL MICROBIOLOGY

This course provides students with a broad-based foundation in the basic concepts of general and clinical microbiology. Topics covered include an overview of microbiology with basic information on bacteria, fungi, protozoa and viruses, a discussion of microbial physiology and genetics, and an introduction to microbial pathogenesis and the host response, providing a conceptual basis for understanding pathogenic microorganisms and the mechanisms by which they cause diseases in the human body. Successful completion of this course will prepare students for more advanced courses in related fields.

Pre-requisites: HSC11002 Introduction to Biological Sciences

HSC11003 General and Clinical Biochemistry (except FED-INS programme)

HSC12003 MICROBIOLOGY LAB

This course provides an opportunity for students to gain hands-on experience on basic microbiology methods and techniques. Topics covered include basic microscopy, aseptic technique, media preparation, bacterial growth and culture, staining methods, biochemical tests of microbes, effects of physical and chemical agents on bacteria, and eukaryotic organisms and viruses.

Pre-requisite: HSC12002 General and Clinical Microbiology (or concurrent enrolment)

HSCI2004 GENETICS AND EPIGENETICS

This course introduces the basic principles of classical genetics, molecular genetics and epigenetics and explains how biological information is stored and expressed. Students will understand how changes in genetic information (e.g. deoxyribose nucleic acid (DNA)) will affect gene function and may lead to diseases and learn about what information can be obtained from deoxyribose nucleic acid (DNA) sequencing. Topics covered include inheritance, gene structure, expression and regulation, molecular genetic techniques, population and evolutionary genetics, followed by a discussion of the role of epigenetics in biological phenomena.

Pre-requisite: None

HSCI2005 BIOLOGY OF DEVELOPMENT AND AGING

This course discusses animal development with focus on initiation and construction of an organism and the underlying molecular and genetic basis. Topics covered include an overview of developmental biology, the molecular mechanisms of development, cell commitment and early embryonic development, and the vertebrate development process. A final section is devoted to a discussion of the aging process, including the evolutionary, biochemical, genetic and cellular mechanisms of aging, as well as age-related diseases.

Pre-requisites: HSCI1002 Introduction to Biological Sciences

HSCI2000 Cell and Molecular Biology

HSCI2006 PHYSIOLOGY AND PATHOPHYSIOLOGY

This course provides an introduction to the structure and function of the major physiological organ systems of the human body, how various body processes are integrated and regulated, and how perturbations in physiological regulatory mechanisms and anatomy result in pathophysiology. Common diseases and disorders of each system are covered, and emphasis is given on cardiovascular, pulmonary, hepatic, renal and reproductive systems.

Pre-requisites: HSCI1003 General and Clinical Biochemistry

HSCI2000 Cell and Molecular Biology

HSCI2007 PHYSIOLOGY LAB

This course aims to provide an opportunity for students to learn the basic experimental skills of physiology and to develop analytical and problem solving skills for studying human physiology and the whole biomedical sciences. Major experiments to be covered include experiments on endocrine system, cardiovascular system, respiratory system, digestive system and urinary-reproductive system. In some experiments, lab animals are used.

Pre-requisite: HSCI2006 Physiology and Pathophysiology (or concurrent enrolment)

HSCI2008 HUMAN ANATOMY

This course introduces human anatomy and histology, the concept of primary tissues, the basic embryology of the nervous, cardio-vascular, gastrointestinal and musculoskeletal systems. Clinical relevance of the anatomy is also emphasized.

Pre-requisite: HSCI1002 Introduction to Biological Sciences

HSCI2009 PHARMACOLOGY

This course provides the introductory overview of the pivotal role played by pharmacology in drug development and the multidisciplinary nature of drug discovery. Major areas covered include molecular mechanisms as well as systematic effects of drugs. Appropriate methods and analysis for investigating and evaluation of the pharmacological effects in drug development are discussed with examples of commonly used medical drugs and new medicines development.

Pre-requisite: HSCI1002 Introduction to Biological Sciences

HSCI2010 PHARMACOLOGY LAB

This course provides laboratory practice experience to students, and allows them to involve in the basic drug-discovery pipeline in person. It focuses on the evaluation of mechanisms of drug action, drug-receptor interaction, receptor target distribution, and systematic metabolism, and toxicity.

Students learn the practical skills of how to evaluate pharmacological effects of medicine, and get up-to-date information on drugs used in the clinics.

Pre-requisite: HSCI2009 Pharmacology (or concurrent enrolment)

HSCI2011 ANALYTICAL CHEMISTRY

This course introduces the basic theory, principle and knowledge of chemical analysis and instrumental analysis, which include titrimetric analysis, gravimetric analysis, electrochemical analysis, spectroscopic analysis and chromatographic analysis. Sampling, error and statistical analysis applied to analytical chemistry are also included.

Pre-requisite: HSCI1000 General Chemistry

HSCI2012 ANALYTICAL CHEMISTRY LAB

This course introduces the experimental methods, instruments and data analysis used in analytical chemistry to the students, and assists the students in developing analytical and problem solving skills that are required for the pursuit of their career in the area of pharmaceutical science. Major topics covered include titrimetric analysis, gravimetric analysis, electrochemical analysis, spectroscopic analysis and chromatographic analysis. Students are required to perform literature search and data presentation during the semester.

Pre-requisites: HSCI1001 General Chemistry Lab
HSCI2011 Analytical Chemistry (or concurrent enrolment)

HSCI2013 MEDICINAL CHEMISTRY

This course covers the chemical principles of drug design and drug action and provides an introduction to research in areas of bioorganic chemistry, bioinorganic chemistry, medicinal chemistry, pharmaceutical chemistry, and biotechnology.

Pre-requisite: HSCI1005 Organic Chemistry

HSCI3000 NEUROSCIENCE AND NEURODEGENERATIVE DISEASES

This course aims to provide a systematic introduction to the mammalian nervous system. Topics covered include basic neuroanatomy, the electrophysiological properties of neural cells, sensory and motor systems, the structural and functional organization of the human brain, and an introduction to neural degenerative diseases.

Pre-requisite: HSCI2006 Physiology and Pathophysiology

HSCI3001 ENDOCRINOLOGY AND METABOLIC DISEASES

The course introduces the roles of hormones, the pathophysiologic process by which hormonal secretion is abnormal, and characteristics and treatments of various endocrine disorders to students. A number of metabolic diseases that pertain to defects in hormone production or signaling are covered in the course. Main topics in the course include principles and practice of endocrinology, adrenal disorders, metabolic diseases, thyroid hormones and disorders, calcium homeostasis and metabolic bone disease, pituitary hormones and pituitary gland disorders, sex hormone disorders, and endocrine emergencies.

Pre-requisite: HSCI2006 Physiology and Pathophysiology

HSCI3002 IMMUNOLOGY AND INFECTIOUS DISEASES

This course provides a basic knowledge of the immune response and its involvement in health and disease, as well as an introduction to infectious disease, including the pathophysiology, clinical presentation and therapeutic management of common infectious diseases. Knowledge from this course enables students to gain a broad foundation base and prepares them for advanced courses in the health care or medical research field.

Pre-requisite: HSCI2002 General and Clinical Microbiology

HSCI3003 BIOSTATISTICS AND EXPERIMENTAL DESIGN

The course provides students with an understanding of basic concepts of data analysis and statistical inference in the medical and health sciences, with an emphasis on the application of statistical methods to the design and interpretation of biological experiments and comparative

data. Specific topics include tools for describing central tendency and variability in data, methods for performing inference on population means and proportions via sample data, statistical hypothesis testing and its application to group comparisons, issues of power and sample size in study designs, and random sample and other study types.

Pre-requisite: None

HSCI3004 GENOMICS AND BIOINFORMATICS

This course introduces fundamental concepts and tools in genomics and bioinformatics to provide students with a foundation for doing innovative research. The course emphasizes on various types of functional genomic data available and current computational methods for interpreting and integrating the data to make inferences about cellular function. Topics covered include an introduction to genomics and bioinformatics, genomic sequencing, assembly and annotation, transcriptomics, proteomics, and application of genomic approaches.

Pre-requisite: HSCI2000 Cell and Molecular Biology

HSCI3005 GENETICS, GENOMICS AND BIOINFORMATICS LAB

This laboratory course aims to provide students a hands-on experience through a series of laboratory experiments, designed to examine various genetics phenomenon in order to better understand fundamental genetics principles. In addition, students carry out experiments and data analysis related to the fields of genetics, genomics and bioinformatics, such as deoxyribose nucleic acid (DNA) and protein sequence analysis, data mining from different types of research databases, basic Bioinformatics analysis of next generation sequencing data, etc. This course equips students with the basic knowledge to solve biological questions using a genetics, genomics and bioinformatics approach.

Pre-requisites: HSCI2004 Genetics and Epigenetics

HSCI3004 Genomics and Bioinformatics (or concurrent enrolment)

HSCI3006 ADVANCED BIOINFORMATICS

This course provides both theory and practice of commonly used methods in the analysis of bioinformatics data. These methods include analysis of ribose nucleic acid (RNA), deoxyribose nucleic acid (DNA), and protein sequence data, structure and function analysis, statistical methods, and techniques used in detection of disease associated genes and mutation loci. Analysis demos, practical work, and individual projects are conducted in web and UNIX/LINUX environments.

Pre-requisite: HSCI2000 Cell and Molecular Biology

HSCI3004 Genomics and Bioinformatics

HSCI3007 BIOMEDICAL MATERIALS

This course focuses on the science of medical implants, scaffolds and devices that are playing a significant role in the globally aging population. It comprises key concepts in the design and applications of natural and synthetic biomaterials in various forms for bone, dental, skin, vascular, liver, lung and neural tissue regeneration and relevant applications. This course integrates the fundamental pharmaceutical and biomedical sciences with the cutting-edge medical applications in the real world and prepares the students for broad career opportunities across academic, medical and industrial fields.

Pre-requisites: HSCI1000 General Chemistry

HSCI1002 Introduction to Biological Sciences

HSCI3008 BIOPHARMACEUTICS AND PHARMACOKINETICS

This course introduces the basic principles of pharmacokinetics involved in the onset, duration and termination of drug action. The essential factors governing drug disposition (absorption, distribution, metabolism and excretion) are elaborated. The mathematical basis on the model fitting process of the concentration-time data and the calculation of main pharmacokinetic parameters is introduced with hands-on practice. Drug-drug interactions-caused safety concerns are addressed in the context of the increasing trend in the prevalence of polypharmacy. Moreover,

the metabolic function of gut microbiota and the role in drug disposition are updated. Finally, the relationship between pharmacokinetics and pharmacodynamics is explored to help understand clinical variability to drug response.

Pre-requisites: HSCI1003 General and Clinical Biochemistry
HSCI2006 Physiology and Pathophysiology
HSCI2011 Analytical Chemistry

HSCI3009 CHINESE MEDICINE

This course focuses on the introduction of the basic theory of Chinese Medicine, and its application in clinic. It is divided into two parts, and in the first part, the essential theories of Chinese Medicine, including philosophical basis, fundamental concepts in Chinese Medicine and diagnostic methods are discussed. In the second part, the clinical applications of Chinese Medicine and scientific basis underlying the efficacy of Chinese Medicine are covered. Chinese Medicine has a systemic and complete theory and long-standing history. It is an exceptional branch of traditional medicine seen throughout the world, and is a treasure of Chinese traditional culture. With its unique and comprehensive theoretical system and remarkable therapeutic effects on different types of diseases and conditions, Chinese Medicine represents a major modality of medical care and prevention of disease by using alone or combined with biomedicine.

Pre-requisite: None

HSCI3010 PHARMACEUTICS

This course introduces the preparation theory, formulation design, production technology, quality evaluation and other contents of pharmaceutical products for clinical applications. It assists the students in understanding the various dosage forms and drug delivery systems, and how medicinal and pharmaceutical substances are incorporated into them. Moreover, the applications of pharmaceutical technology on research and development of the Chinese medicine and healthcare product are introduced.

Pre-requisites: APAC3005 Physical Chemistry
HSCI2009 Pharmacology

HSCI3011 PHARMACEUTICS LAB

This course provides laboratory practice for the students in pharmaceutical development that helps students understand the knowledge of dosage form design and development, quality evaluation which have learned in Pharmaceutics.

Pre-requisite: HSCI3010 Pharmaceutics (or concurrent enrolment)

HSCI3012 PHARMACEUTICAL ANALYSIS

The course provides a comprehensive introduction to analytical chemistry relevant for chemical quality control of pharmaceutical raw materials and final drug products. It explains the process of experimental results elaboration for determining the appropriateness of the analytical method used in quality control, demonstrates how to use the pharmacopoeia for the analysis of pharmaceutical active ingredients and impurities (identification, quantitative analysis), and familiarizes students with performing various analytical methods in pharmaceutical analysis and quality control.

Pre-requisites: HSCI1005 Organic Chemistry
HSCI2011 Analytical Chemistry

HSCI3013 PHARMACEUTICAL ANALYSIS LAB

This course focuses on the basic aspects of pharmaceutical dosage forms and pharmaceutical analytical skills. Each laboratory experiment is designed to provide students with hands-on experience in executing elementary analytical skills and quality control tests for various dosage forms, which helps students understand how to perform experiment design and possible troubleshooting. Students can be familiar with the analytical technicalities and experimental design used for the qualitative and quantitative analysis and quality control of various active ingredients and pharmaceutical products.

Pre-requisites: HSCI2011 Analytical Chemistry
HSCI3012 Pharmaceutical Analysis (or concurrent enrolment)

HSCI3014 PHARMACY ADMINISTRATION

This course introduces the pharmacy management which is an interdisciplinary field of pharmacy and social sciences. The principles and methods of social science are applied on the activities and management of modern pharmacy. In this course, students can understand the basic law of pharmaceutical activities, be familiar with the pharmaceutical management system and organization, master the basic content and method, master Chinese and international main laws and regulations, have the ability with drug development, manufacture, distribution, use and other aspects of management and supervision. The students apply the theory and knowledge of pharmacy management to guide the practice work.

Pre-requisite: None

HSCI3015 PHYTOCHEMISTRY

This course provides how natural products are normally classified according to their biosynthetic origins and chemical properties. A systematic study of natural products of medicinal and pharmaceutical importance to their identification, isolation, separation techniques are discussed. This course consists of lectures and lab experiments.

Pre-requisite: HSCI1005 Organic Chemistry

HSCI3016 EVOLUTIONARY BIOLOGY

This course introduces the concepts in evolutionary biology, which serve as the foundation to understand biology and medicine, and to test hypotheses in scientific research. All life on Earth shares a last universal common ancestor that lived approximately 3.5 to 3.8 billion years ago, and has been shaped by repeated formations of new species, changes within species and loss of species throughout the evolutionary history of life on Earth. The course provides the opportunity for students to learn the history of life, evolutionary processes, the concepts of microevolution and macroevolution and speciation.

Pre-requisite: HSCI2000 Cell and Molecular Biology

HSCI3017 MEDICAL GENETICS

This course introduces the concept of medical genetics which uses genetics principles for medical care of diagnosis, management, and counselling people with genetic disorders through using genomics, bioinformatics, gene therapy, personalized and predictive medicine. It covers topics in the principle of genetics, the use of genomics data and the controversial concerns of applying medical genetics in real life.

Pre-requisites: HSCI2000 Cell and Molecular Biology
HSCI2004 Genetics and Epigenetics

HSCI4000 GRADUATION PROJECT I

The final year project is an essential part of the degree. In this course, students work independently on a research project under the supervision of an academic faculty member, culminating in a written research proposal at the end of the first semester. The project supervisor guides the student through the process and provides support and advice on all aspects of the project work.

Pre-requisite: None

HSCI4001 CANCER BIOLOGY AND THERAPY

Cancer has a profound impact on our society and has been the driving force behind major research advances in medical sciences. This course provides a comprehensive overview of the biology, pathology and treatment of cancer. Specific topics covered include an overview of the field, molecular and genetic basis of cancer, cancer pathology, carcinogens, and current cancer therapies.

Pre-requisites: HSCI2000 Cell and Molecular Biology
HSCI2004 Genetics and Epigenetics

HSCI4002 STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

This course covers a broad range of topics relevant to stem cell biology. This fast-moving field brings together many aspects of basic and applied biology and medicine, including development, regeneration/repair, and cancer. The course covers the following concepts and themes: pluripotency and reprogramming, pluripotent cell types, organ systems, stem cells and cancer, therapeutics and ethics. The lecture/discussion format gives students both a broad background and the opportunity to apply critical thinking skills to recent data in the field.

Pre-requisite: None

HSCI4004 DRUG DISCOVERY AND DEVELOPMENT

This course aims to provide students with an overview of the drug discovery and development process from the identification of novel drug targets to the introduction of new drugs into clinical practice. Topics covered include approaches to new drug discovery, drug design and synthesis, pharmacodynamics, pharmacokinetics, drug interaction, drug transportation, prodrug design and application, the drug development process, and drug design case studies.

Pre-requisites: HSCI1003 General and Clinical Biochemistry

HSCI4003 Pharmacology and Chemical Biology (or concurrent enrolment)

HSCI4005 GRADUATION PROJECT II

The final year project is an essential part of the degree. In this course, students work independently on a research project under the supervision of an academic faculty member, culminating in a final project report and an oral presentation at the end of the second semester. The project supervisor guides the student through the process and provides support and advice on all aspects of the project work.

Pre-requisite: HSCI4000 Graduation Project I

HSCI4006 PUBLIC HEALTH

This course intends to survey the broad field of public health and serves as an introduction to the major issues of health and health care in general as well as in local community. The course defines and describes public health issues, and identifies potential problems and their solutions.

Pre-requisite: None

HSCI4007 TRANSLATIONAL MEDICINE

The aim of translational medicine is to translate knowledge, mechanisms and techniques discovered by basic scientific research into new approaches for diagnosis and treatment of diseases. This course focuses on the principles and practices of translational medicine as they apply to the development of a new drug (small molecules and/or biologics), device, or diagnostic. Topics covered include a historical perspective of translational medicine, emerging concepts in biomarker discovery, innovative drug development, cell therapies, translational bioinformatics, IRB & ethical considerations in human subject research, and human clinical trials.

Pre-requisite: HSCI2000 Cell and Molecular Biology

HSCI4009 TOXICOLOGY

The course covers basic concepts, knowledge and methods in toxicology, including the disposition of toxic substances by the body, how toxic substances react with biomolecules and lead to target organ toxicity / non-organ directed toxicity, knowledge about toxic substances, as well as applications of toxicology including environmental, occupational, regulatory, food toxicology, and natural toxins.

Pre-requisite: None

HSCI4010 PHARMACEUTICAL ECONOMICS AND POLICY

This course aims to study pharmaceutical industry based on industry economics and health policy theory. The pharmaceutical industry and policy are presented and analyzed by combining industry evolution and global view in this course. Key management topics of pharma, including strategic management (business model), R&D (pharmaceutical innovation), and marketing, etc., are introduced. Pharmacoeconomic evaluation of drugs are also studied in this course. Related

academic work in the leading journals are studied and discussed in this course to improve students' understanding the frontier researches in pharmaceutical economics and policy.

Pre-requisite: None

HSCI4011 PHARMACoinFORMATICS

This course introduces computationally algorithmic methods in collection, transformation, storage, organization, distribution, retrieval, visualization, and analysis of pharmaceutical and healthcare information. It provides a unique opportunity for students to learn essential computational chemistry, bioinformatics, artificial intelligence, physiologically-based pharmacokinetic modelling and simulation, computer science and their applications in pharmacy and medicine.

Pre-requisites: HSCI1000 General Chemistry

HSCI1002 Introduction to Biological Sciences

HSCI4012 BIOINFORMATCS IN ACTION

This course introduces the applications in bioinformatics and computational biology, covering the analyses of genomics, transcriptome, epigenome and multi-omics. It provides exposure and training in data analysis of bioinformatics and computational biology.

Pre-requisites: CISC1004 Introduction to Computer Science

HSCI3003 Biostatistics and Experimental Design

Faculty of Law

Doctoral Degree Programmes

AREAS of STUDY

- Jurisprudence and Legal History
- Constitutional Law, Basic Law and Administrative Law
- Civil, Procedural and Commercial Law
- Criminal and Procedural Law
- International Law
- Comparative Law
- European Union Law
- International Business Law and Dispute Resolution
- Law on Technology and Medicine

		Credits
<u>Compulsory Courses</u>		
LAWS8001	Legal Research and Writing	3

** Internship Course

Course Description

DOCTOR OF PHILOSOPHY IN LAW

LAWS8001 LEGAL RESEARCH AND WRITING

This course is designed to teach PhD students advanced legal research and writing skills. It is taught by a group of PhD supervisors mainly from the FLL. Depending on availability, high caliber legal academics from other law schools may also be invited to join the teaching team on a case by case basis. The course covers a wide range of topics of legal research and writing, such as jurisprudence, legal research methodologies, use of library resources, legal reasoning, preparation and writing of law journal articles, preparation and writing of PhD thesis, use of references, formality for legal writing, and critical legal thinking.

Pre-requisite: None

LAWS8002 RESEARCH ETHICS

This course will be conducted online starting from Academic Year 2016/2017. For PhD students who were admitted in or before Academic Year 2015/2016 and have not taken or have not passed Research Ethics, students will take the online Research Ethics course offered in or after Academic Year 2016/2017. One credit will be assigned to their online Research Ethics course for the aforementioned students to fulfill the credit requirements for graduation.

Pre-requisite: None

LAWS8003 COMPARATIVE LEGAL SYSTEM

This course purports to offer advanced knowledge of comparative legal studies to PhD students. The FLL is strong in comparative law studies, which is also one of special strengths the FLL will further improve as part of FLL's strategic development plan. The course is taught in the mode of group teaching. Experts of different legal systems will share their knowledge with students in a number of essential areas of legal studies, such as constitutional law, civil law, commercial law, criminal law, procedural law, tort law, administrative law and private international law. The specific legal systems to be presented may vary slightly depending on availability of experts in any given time, and the general legal systems to be covered in many countries.

Pre-requisite: None

LAWS8004 COMPARATIVE JUDICIAL SYSTEM

This seminar is designed to give the students deep understanding of judicial systems in different legal traditions of the world. The course will especially focus on Mainland China, Taiwan, and Japan as representing the civil law tradition and Canada, Australia, and the U.S as representing the common law tradition. The students can learn the similarity and difference between these two legal traditions through examinations of historical background, constitutional system, judicial review, judicial system, legal profession, interpretation and judicial process and civil and criminal procedure.

Pre-requisite: None

LAWS8999 DOCTORAL THESIS

The PhD candidate must present a doctoral dissertation on a topic related to his or her area of specialization that demonstrates the results of original research and shows evidence of legal scholarship. According to the current regulations, the doctoral dissertation must be approved by the supervisor and PhD advisory committee. PhD dissertation must be submitted to the faculty in conformity with the requirement of thesis format. PhD oral defence examination should strictly follow the guidelines of the Graduate School and Faculty of Law.

Pre-requisite: None

MASTER OF LAW (CHINESE LANGUAGE)

LAWS7101 CONSTITUTIONAL LAW

Theories and current status of contemporary theories of constitutional law; development of basic principles, content and of the functions of constitutional law; comparative studies on the principles, forms, characteristics, content and functions of political systems of the states; comparative studies on the principles, content, procedures and methods of the systems of election; comparative studies on the content, characteristics and development of the systems of human rights; comparative studies on the organization, formation, functions and powers (legislative power and supervisory power) of the system of legislation and the procedure of legislation; comparative studies on the organization, formation, functions and powers (efficiency and legitimacy), principles of operation of the administrative system and the development of political power; comparative studies on the organization, characteristics, independence and functions of the judicial system; comparative studies on the constitutional safeguards, constitutional construction and examination of violation of the constitution.

Pre-requisite: None

Pre-requisite: None

LAWS7291 PROJECT REPORT

The Project Report serves the purpose of demonstrating the ability to identify, discuss and summarize any legal topic, ideally of present practical relevance, as well as to evidence basic writing skills and in-depth knowledge in the selected legal field. To successfully complete the Project Report, a Faculty member competent in the selected legal field tutors the progress and finally approves the report.

Pre-requisite: None

MASTER OF LAW IN EUROPEAN UNION LAW, INTERNATIONAL LAW AND COMPARATIVE LAW (ENGLISH LANGUAGE)

LAWS7301 TREATY REFORMS IN THE EU

The European Union is based on the rule of law. Thus every action taken by the EU is founded on treaties that have been approved voluntarily and democratically by all EU member States. The course guides students towards a critical understanding of the founding treaties (Treaty of Paris, 1951, and Treaties of Rome, 1957), and the reforms in the Merger Treaty (1965), the budget treaties (1970, 1975), the Single European Act (1987), the Treaty of Maastricht (1992), the Treaty of Amsterdam (1997), the Treaty of Nice (2001), as well as the Constitutional Treaty (2004) and the Lisbon Treaty (2007).

Pre-requisite: None

LAWS7302 CONTEMPORARY ISSUES IN INTERNATIONAL LAW

Contemporary legal issues arising in distinct fields of international law will be critically examined.

Relevant norms and principles in a select set of topics will be introduced before contemporary issues are addressed. Possible topics include traditional and modern sources and subjects, treaties, sovereignty, immunities and privileges, statehood and territorial disputes, asylum and extradition, state responsibility, collective security and unilateral use of force, armed conflict and criminal jurisdiction, terrorism and human rights, dispute resolution and role of general principles in *lex specialis* like WTO law and environmental law. The contemporary issues will be examined in the light of recent judicial and arbitral decisions, regional developments and emerging state practices.

Pre-requisite: None

LAWS7303 COMPARATIVE LEGAL SYSTEMS

This course includes aspects of both macro and micro-comparison, and introduction to the method of comparative law, based on its constituent elements and practical examples. It also yields an overview over the major contemporary legal systems, "legal traditions" or "legal families" throughout the world, including, for instance, the Roman-Germanic or Civil Law Systems, Common Law Systems and non-occidental Law Systems, with reference to the Far-East – Chinese and Japanese Law – as well as for the Religious Legal Systems – Islamic and Hindu Law. These will be presented with a special focus on their main features, essential historical elements and study of some of their most significant legal institutions and concepts.

Pre-requisite: None

LLGC7000 RESEARCH METHODOLOGY AND LEGAL WRITING

This course is designed to assist students with their project report or academic thesis by introducing them to advanced legal research and writing skills. It is taught by law professors competent in the area in accordance with the researched topics. The course covers a wide range of topics of legal research and writing, such as jurisprudence, legal research methodologies, use of library resources, legal reasoning, preparation and writing of law journal articles, preparation and writing of an academic thesis, project report or academic articles, use of references, formality for legal writing, and critical legal thinking.

Pre-requisite: None

LAWS7305 INSTITUTIONAL LAW OF THE EUROPEAN UNION

The European Union, the European Communities and their legal system. The objectives. The institutions and bodies and their powers. The judicial system. The sources and scope of Community law. The interpretation and application of Community law, including the application of Community law by the Members States. The relationship between Community domestic law of the Members States.

Pre-requisite: None

LAWS7306 ECONOMIC LAW OF THE EUROPEAN UNION

The course aims to equip students with the specialist knowledge in the field of EU law related to the economy: fundamental freedoms, customs union, internal market, economic union, monetary integration, competition, trade restrictions, antitrust, state aid, public undertakings and services of general interest. The course also delves on the main vectors of European Union trade law: theoretical foundations, the rationale underpinning free trade; the need for Union regulation; the forms of regulation, focusing in particular on arguments concerning regulatory competition. It subsequently addresses the construction and evolution of EU's internal market, looking in particular at the four freedoms in light of the evolution of the European Court of Justice's case law.

Pre-requisite: None

LAWS7307 INTERNATIONAL ECONOMIC LAW

This course aims to critically examine contemporary legal issues in international economic relations. Specific topics related to the international economic order including the actors, principles, legal sources and economic organizations will be explored. International trade law will be addressed in detail and norms governing international monetary, banking and financial relations

will be introduced. GATT and WTO regimes governing trade in goods, services, TRIPS, competition policy and dispute settlement will be studied along with its emerging jurisprudence. International monetary law and role of IMF will be briefly examined to analyze specific challenges. The international financial architecture will be introduced towards the end mainly focusing on relevant institutions like the World Bank, sovereign debts, and international regulations on banking and financial markets.

Pre-requisite: None

LAWS7308 LAW OF INTERNATIONAL ORGANIZATIONS

The course aims to offer a deep understanding of the law related to international organisations. Since the substantive law differs from organisation to organization, the course first introduces some core concepts and principles which are common to international organisations, such as theory of international organisations, legal personality and the principle of functionality. The course will subsequently look into the specific legal systems of some representative global organisations, such as the UN and the WTO, and some selected regional organization, like the EU and ASEAN or co-operation alliances like the BRICS, G7/G8 and G20 to examine how the principles and theoretical concepts are applied in practice. Finally, the course will discuss inter-relations between inter-governmental organisations and the role of non-governmental organisations.

Pre-requisite: None

LAWS7309 COMMON LAW

This course will provide a comprehensive introduction to substantive common law and equity as developed in England and subsequently adopted in other jurisdictions like USA, Australia and Hong Kong. Common law and equitable remedies in specific fields like laws of trusts, contracts and torts and unique procedural elements like the writs and jury systems will be studied. Students will be trained in the judicial process using case studies and techniques of identifying ratio and obiter in binding precedents. The contemporary features of common law will be studied in a comparative perspective with the intent of training students from civil law jurisdictions to be able to interact with major common law systems in the world.

Pre-requisite: None

LAWS7310 COMPARATIVE CONTRACT LAW

This course will offer a comparative study of contract law of major legal systems and some specific jurisdictions. The issues studied in a comparative perspective includes general principles of contract, formation, vitiating factors, exemption clauses, performance, discharge, breach, remedies and unification measures. Key differences between the common and civil law legal systems in governing contracts will be discussed. Specific jurisdictions will be chosen and the characteristics of the contract law will be examined and compared. It will also study major international efforts in harmonization of contractual principles and how far Asian jurisdictions have been responsive. A specific focus will be made on contract laws of Macao and Hong Kong SARs and relevant cases.

Pre-requisite: None

LAWS7391 PROJECT REPORT

The Project Report serves the purpose of demonstrating the ability to identify, discuss and summarize any legal topic, ideally of present practical relevance, as well as to evidence basic writing skills and in-depth knowledge in the selected legal field. To successfully complete the Project Report, a Faculty member competent in the selected legal field tutors the progress and finally approves the report.

Pre-requisite: None

LAWS7322 EXTERNAL LAW AND POLICY OF THE EUROPEAN UNION

Introduction to the different policies of the European Union. General concept of common policies. Agricultural, commercial, industrial, social, transport, education and vocational training policy. The fiscal harmonization. Cultural policy. Policy for research and technological development. The

economic and social co-operation. The development co-operation. The new areas: energy, civil protection and tourism. Historical development of the EU external policy before the Lisbon Treaty. The EU external policy, legal setting, institutional organisation and actions after the Lisbon Treaty. Pre-requisite: None

LAWS7311 EU COMPETITION LAW

Basic concepts: market competition, economic activity, undertaking. Anti-competitive agreements: Article 101 TFEU, horizontal and vertical agreements, block exemptions. Abuse of dominant position: Article 102 TFEU, exclusionary and exploitative abuses. Merger control: EU Merger Regulation, substantive assessment, efficiency defense, merger remedies. Enforcement system: Regulation 1/2003, judicial control, public and private enforcement. Public undertakings and state aid measures.

Pre-requisite: None

LAWS7312 EU ENVIRONMENTAL LAW

This course is about the main issues related to EU Environmental law, covering the following topics: history and evolution of EU Environmental Law; Environmental Law in EU Treaties; EU Environmental law principles; and some of the most important areas of EU Environmental Law, such as environmental impact assessment; assessment of the effects of certain plans and programmes on the environment; integrated pollution prevention and control; EU emissions allowance trading system for greenhouse gas; Community eco-management and audit scheme (EMAS).

Pre-requisite: None

LAWS7313 EU NATURAL RESOURCES AND ENERGY LAW

The Treaty on the European Union (TEU) calls on the union to “help develop international measures to preserve and improve the quality of the environment and the sustainable management of global natural resources, in order to ensure sustainable development”. This course thus presents the legal rules relating to the management of natural resources and the security of energy supply against the backdrop of a high degree of environmental protection from a European perspective. It not only covers various natural resources, such as land, air, water, oil and gas but also explores new policies to exploit alternative or renewable sources of energy.

Pre-requisite: None

LAWS7314 FOREIGN INVESTMENT LAW

This course aims at equipping students with the requisite knowledge to deal intricate legal issues facing foreign investments. The concept as manifested in the form of portfolio and direct investment will be introduced along with relevant investment risks. The governing norms and principles in domestic laws (home and host state), bilateral treaties (BITs), multilateral (including WTO TRIMS) and regional instruments will be studied. The course will mainly focus on Investment arbitration including jurisdiction and applicable law issues in investment contracts and BITs, breach of treatment standards, actions constituting taking of foreign property, defenses and compensation. Investor-state investment disputes and institutional arbitration involving landmark cases will be examined specifically.

Pre-requisite: None

LAWS7315 INTERNATIONAL CRIMINAL AND HUMANITARIAN LAW

Core substantive and procedural rules of international criminal law and basic concepts, principles and rules of international humanitarian law (IHL) will be introduced. The Rome Statute of the International Criminal Court (ICC), on the definition of substantive crimes, jurisdiction and the admissibility of cases, and principles of international criminal law will be studied. Students will get an overview of different actors in the ICC and its criminal procedure. Concerning IHL, the course will first discuss the history and aims of IHL, its sources, and the notion of armed conflict. Secondly, it will set out the cardinal principles of IHL, with special emphasis on the principle of distinction. Finally, it will discuss the relation between IHL and international human rights law and international

criminal law.
Pre-requisite: None

LAWS7316 HUMAN RIGHTS AND REFUGEE LAW

This course aims to address the interaction between national, regional and international human rights protection and the protection of refugees. It will examine the framework on human rights protection, including the historical development of human rights, the sources and the different categories of human rights. Contemporary challenges facing international mechanism for protection of human rights will be examined. Human rights laws and institutions in selected jurisdictions, including Asia will be studied in a comparative perspective in order to examine national implementation of international norms. The jurisprudence in major landmark human rights cases and its implementation will be critically examined. Finally, the course identifies the legal issues and challenges concerning refugees and migration primarily across borders.

Pre-requisite: None

LAWS7317 LEGAL CULTURE AND LEGAL PLURALISM

This course assesses the formation and development of law based on the history of European and Chinese legal cultures. Specific focus is made on continental legal systems. Topics include European ancient law (Hebrew law, Greek law, Roman law, etc.), European medieval law (Canonic law, Germanic law, Feudal law, Mercantile law, the revival of Roman law and the formation of common European law), modern European law after the Renaissance and the legal evolution of Western Europe after the French Revolution, namely the sources of contemporary European law. The course also examines the ancient and contemporary legal philosophy of China, legal history and culture in China. The course will also draw examples of unique legal cultures and legal pluralism from other jurisdictions like Japan and India.

Pre-requisite: None

LAWS7318 MARITIME AND SHIPPING LAW

The objective of this course is to foster a critical appraisal of private law issues arising in maritime transportation. Topics covered include carriage of goods by sea, maritime safety and liability and marine insurance. International legal instruments governing relevant issues and specific national legislation and cases will be comparatively examined. The issues covered includes international sales and incoterms, carriage contracts and bill of lading, cargo claims, liability of carriers, security and limitation of liability, charter parties, maritime safety and navigation, salvage, towage and general average, multimodal transportation and marine insurance. The role of admiralty courts and maritime arbitration mechanism and relevant enforcement issues will be briefly introduced.

Pre-requisite: None

LAWS7319 E-COMMERCE AND INFORMATION TECHNOLOGY LAW

Critical legal issues relating to information technology and its application in B2B and B2C business transactions will be addressed mainly in a trans-national context and in the light of the challenges arising in the borderless nature of the cyberspace. Issues covered includes jurisdiction and applicable law for online transactions, electronic contracts and agents, click-wrap agreements, intellectual property rights, electronic authentication and transactional security, virtual enterprises and domain names, online privacy and data protection, electronic payment systems and taxation, liability of online intermediaries, online consumer protection, cyber-crime and online dispute resolution. Due to the diversity and relative infancy of legal developments in the field, specific national laws and cases will be studied using comparative methods.

Pre-requisite: None

LAWS7406 INTRODUCTION TO MACAO LAW

This course covers key topics and features of the legal system of the Macao SAR. The themes may vary but normally should include discussions of the Basic Law and the autonomy of the Macao SAR, the political system, the protection of fundamental rights, and international law issues relevant for Macao. The discussions are contextual and take comparative law into account.

Pre-requisite: None

LAWS7407 MACAU AND COMPARATIVE GAMING LAW

This course focuses especially on the commercial operation of casino games of chance (table games and slot machines) as regulated in the Macao SAR, the world's largest gaming jurisdiction. The course has an interdisciplinary nature and covers especially the history of gaming in Macao and various issues of administrative and tax law, contract law and criminal law. The course includes a detailed study of the regulation of gaming concessions and of gaming promoters. It also features a comparative element, by which the Macao system will be contrasted with the regulation of gaming in the two main jurisdictions in gaming other than Macao, which are Nevada and Singapore.

Pre-requisite: None

LAWS7408 ADVANCED ISSUES OF INTERNATIONAL TRADE LAW

This course builds on the course on WTO and Regional Trade Law and proposes the discussion of selected, more advanced issues of contemporary relevance in the international trading community. It will thus strongly rely on the discussion of case law, i.e. particularly ongoing disputes of global and regional relevance, and will be based on the assignment of pertinent reading materials. Active class participation in the form of raising questions or partake in group discussions as well as class presentations will be equally given an important role.

Pre-requisite: None

LAWS7409 ASIAN BUSINESS LAW

This course undertakes a comparative approach to the regulation of business in Asia. It first tries to assess possible particularities in the legal and business culture in Asia and focuses inter alia on the areas of commercial law, corporate law and business transactions, securities, intellectual property, and labor law issues. To this end, selected jurisdictions, such as those of the PRC, Japan and Korea but also others will be presented and discussed from a comparative and both public-private law perspective. The analysis includes the evaluation of national legal systems in the context of regional economic integration projects based on various bi-, tri- or plurilateral agreements.

Pre-requisite: None

LAWS7410 COMPANY LAW

Based on the regulation of companies in Macao, focusing on private companies and public companies, this course discusses major trends of in company law and corporate governance. All major issues of company law will be covered, including fundamental concepts (types of companies; limited liability; capital maintenance), the creation of companies, the capital, the shares, the organs of companies, the rights and obligations of shareholders, and the dissolution and liquidation of companies.

Pre-requisite: None

LAWS7411 LAW AND SOCIETY

Taking a multidisciplinary approach, this course deals with a wide set of contact points between law and society. These include first a retrospective look at the significance of various factors or causal elements fuelling the changes underlying the development of societies, such as the invention of new technologies amidst an evolving relationship between politics and economics. It then asks how these numerous changes will influence the processes underlying legal thinking and reasoning as well as the adoption, application, and enforcement of laws in the future. To this end, the discussion will also present new theoretical approaches in law, such as the "law and economics" movement or a political economic, as well as novel concepts, such as "global governance" or "global administrative law", to try to identify new trends in the field of legal science.

Pre-requisite: None

LAWS7404 INTELLECTUAL PROPERTY LAW IN THE CREATIVE ECONOMY

This course discusses the principal role and main characteristics of intellectual property

rights in the context of the regulation of international trade in an emerging global creative economy. Taking into account the rise of a knowledge-based economy, which was accompanied by a rise in creativity, culture and technology, it covers the history and present status quo of the main intellectual property rights, such as copyright, trademarks, patents, geographical indications, and designs. The key international treaties, such as the Berne and Paris Conventions and notably the TRIPS Agreement adopted under the aegis of the World Trade Organization (WTO) will also be analyzed.

Pre-requisite: None

LAWS7412 MONEY LAUNDERING AND ANTI-CORRUPTION LAW

This course discusses international trends and legal initiatives for the prevention and repression of corruption, money laundering and the financing of terrorism through the financial system. The discussion covers the international treaties relevant in the field, detailed substantive criminal law issues and the preventive measures required from financial institutions.

Pre-requisite: None

LAWS7413 PRIVATE INTERNATIONAL LAW

This course focuses on Private International Law-provisions that are applicable in cross-border cases. These provisions may be set out in international treaty law, regional laws and domestic Private International Law. The first part deals with questions of jurisdiction, recognition and enforcement of civil and commercial matters, the second with the conflict rules that answer the question which will be the applicable law. The students will be accustomed with i.a. international conventions of which Macao is a contracting party, other regulations on Private International Law, and examples of domestic rules on Private International Law. Basic knowledge of private law (especially contracts & torts) and procedural law (jurisdiction, recognition and enforcement) are desirable.

Pre-requisite: None

LAWS7414 CONSUMER PROTECTION LAW

This course enquires into the role of consumer protection law in the legal systems of contemporary societies. The inquiry includes a presentation of the laws and organizations at both the national and international level that are entrusted with the protection of the rights of consumers in their commercial transactions. Further issues discussed include the legal concept and definition of the consumer, contractual issues trying to ensure the protection of the weaker party through special contractual clauses, and the relationship and contact points with other legal areas, such as competition law, intellectual property law (e.g. trademarks), and product safety law.

Pre-requisite: None

LAWS7415 COMMERCIAL CONTRACTS

This is a specialized contract law course covering various legal mechanisms to distribute goods and services, including the ICC Incoterms, the contract of carriage of goods by sea and the various payment mechanisms in international trade. The regulation of international trade agreements by the UN Convention on the International Sale of Goods will be addressed, along with the contracts used for the marketing of goods. The course will cover also various financial instruments and agreements involving banks, namely the term loan, the negative pledge, syndicated lending.

Pre-requisite: None

LAWS7320 MOOTING

The mooting course is aimed at developing drafting and advocacy skills for students. The course will train the students in adversarial process to enable them to examine legal disputes, conduct legal research, and develop drafting, argumentative and rebuttal skills. The course is open to all students but the enrolment is subjected to a selection process. Selected students will be required to prepare and participate in mooting competitions like the Jessup International Law Moot Competition or other competitions. Students will analyze the moot problem, conduct legal research and draft written memorials according to the rules of the competition. The students will be trained for oral rounds and partake in regular practice moots.

Pre-requisite: None

LAWS7321 SEMINAR SERIES

This course will consist of a minimum number of 10 seminars offered by the Faculty of Law throughout the academic year featuring notably eminent visiting professors, practitioners or distinguished experts from a great variety of legal and professional backgrounds. Moreover, their active participation is encouraged and will be included in the final evaluation.

Pre-requisite: None

MASTER OF LAW IN INTERNATIONAL BUSINESS LAW (ENGLISH LANGUAGE)

LAWS7401 TRANSNATIONAL LAW

The course offers a close look at the history of the *lex mercatoria*, its current status as well as the formation of various subcategories, such as a *lex petrolea* (oil law), a *lex maritima* (maritime law), *lex sportiva* (sports law), *lex electronica*, *lex digitalis* or a *lex informatica* (law governing information and communications technologies (ICT)). It will also discuss the related problems of economic sanctions and the practice of mixed public-private tribunals.

Pre-requisite: None

LAWS7402 WTO AND REGIONAL TRADE LAW

This course addresses the regulation of international trade law in the wider context of general public international law. It focuses in particular on the multilateral trade agreements established under the World Trade Organization (WTO) as the successor of the 1947 General Agreement on Tariffs and Trade (GATT). Against the backdrop of the dynamics underlying economic integration at the global level, the course also includes a closer look at the increasing practice of Member states all around the world to negotiate regional trade agreements (RTAs), such as the North American Free Trade Agreement (NAFTA), the European Union (EU), the Asia Pacific Economic Cooperation (APEC), the Association of Southeast Asian Nations (ASEAN) or the Mainland and Macao Closer Economic Partnership Arrangement (CEPA).

Pre-requisite: None

LAWS7403 DISPUTE RESOLUTION

This course deals with the characteristics of alternative dispute resolution (ADR) on the one hand and with arbitration on the other. The specific pros and cons of each instrument to settle disputes will be discussed. More specifically, different aspects of International Commercial Arbitration (ICA) will be highlighted, such as: The characteristics of ICA in practice, the arbitration agreement and the applicable Law, arbitrators and arbitration proceedings, and finally the effects and limits of arbitral awards. The students will be accustomed i.a. with the Brussels I-Regulation, the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958), the European Convention on Commercial Arbitration (1961) and other sources.

Pre-requisite: None

LAWS7404 INTELLECTUAL PROPERTY LAW IN THE CREATIVE ECONOMY

This course discusses the principal role and main characteristics of intellectual property rights in the context of the regulation of international trade in an emerging global creative economy. Taking into account the rise of a knowledge-based economy, which was accompanied by a rise in creativity, culture and technology, it covers the history and present status quo of the main intellectual property rights, such as copyright, trademarks, patents, geographical indications, and designs. The key international treaties, such as the Berne and Paris Conventions and notably the TRIPS Agreement adopted under the aegis of the World Trade Organization (WTO) will also be analyzed.

Pre-requisite: None

LLGC7000 RESEARCH METHODOLOGY AND LEGAL WRITING

This course is designed to assist students with their project report or academic thesis by introducing them to advanced legal research and writing skills. It is taught by law professors competent in the area in accordance with the researched topics. The course covers a wide range of topics of legal research and writing, such as jurisprudence, legal research methodologies, use of library resources, legal reasoning, preparation and writing of law journal articles, preparation and writing of an academic thesis, project report or academic articles, use of references, formality for legal writing, and critical legal thinking.

Pre-requisite: None

LAWS7491 PROJECT REPORT

The Project Report serves the purpose of demonstrating the ability to identify, discuss and summarize any legal topic, ideally of present practical relevance, as well as to evidence basic writing skills and in-depth knowledge in the selected legal field. To successfully complete the Project Report, a Faculty member competent in the selected legal field tutors the progress and finally approves the report.

Pre-requisite: None

LAWS7311 EU COMPETITION LAW

Basic concepts: market competition, economic activity, undertaking. Anti-competitive agreements: Article 101 TFEU, horizontal and vertical agreements, block exemptions. Abuse of dominant position: Article 102 TFEU, exclusionary and exploitative abuses. Merger control: EU Merger Regulation, substantive assessment, efficiency defense, merger remedies. Enforcement system: Regulation 1/2003, judicial control, public and private enforcement. Public undertakings and state aid measures.

Pre-requisite: None

LAWS7312 EU ENVIRONMENTAL LAW

This course is about the main issues related to EU Environmental law, covering the following topics: history and evolution of EU Environmental Law; Environmental Law in EU Treaties; EU Environmental law principles; and some of the most important areas of EU Environmental Law, such as environmental impact assessment; assessment of the effects of certain plans and programmes on the environment; integrated pollution prevention and control; EU emissions allowance trading system for greenhouse gas; Community eco-management and audit scheme (EMAS).

Pre-requisite: None

LAWS7313 EU NATURAL RESOURCES AND ENERGY LAW

The Treaty on the European Union (TEU) calls on the union to “help develop international measures to preserve and improve the quality of the environment and the sustainable management of global natural resources, in order to ensure sustainable development”. This course thus presents the legal rules relating to the management of natural resources and the security of energy supply against the backdrop of a high degree of environmental protection from a European perspective. It not only covers various natural resources, such as land, air, water, oil and gas but also explores new policies to exploit alternative or renewable sources of energy.

Pre-requisite: None

LAWS7301 TREATY REFORMS IN THE EU

The European Union is based on the rule of law. Thus every action taken by the EU is founded on treaties that have been approved voluntarily and democratically by all EU member States. The course guides students towards a critical understanding of the founding treaties (Treaty of Paris, 1951, and Treaties of Rome, 1957), and the reforms in the Merger Treaty (1965), the budget

treaties (1970, 1975), the Single European Act (1987), the Treaty of Maastricht (1992), the Treaty of Amsterdam (1997), the Treaty of Nice (2001), as well as the Constitutional Treaty (2004) and the Lisbon Treaty (2007).

Pre-requisite: None

LAWS7314 FOREIGN INVESTMENT LAW

This course aims at equipping students with the requisite knowledge to deal intricate legal issues facing foreign investments. The concept as manifested in the form of portfolio and direct investment will be introduced along with relevant investment risks. The governing norms and principles in domestic laws (home and host state), bilateral treaties (BITs), multilateral (including WTO TRIMS) and regional instruments will be studied. The course will mainly focus on Investment arbitration including jurisdiction and applicable law issues in investment contracts and BITs, breach of treatment standards, actions constituting taking of foreign property, defenses and compensation. Investor-state investment disputes and institutional arbitration involving landmark cases will be examined specifically.

Pre-requisite: None

LAWS7315 INTERNATIONAL CRIMINAL AND HUMANITARIAN LAW

Core substantive and procedural rules of international criminal law and basic concepts, principles and rules of international humanitarian law (IHL) will be introduced. The Rome Statute of the International Criminal Court (ICC), on the definition of substantive crimes, jurisdiction and the admissibility of cases, and principles of international criminal law will be studied. Students will get an overview of different actors in the ICC and its criminal procedure. Concerning IHL, the course will first discuss the history and aims of IHL, its sources, and the notion of armed conflict. Secondly, it will set out the cardinal principles of IHL, with special emphasis on the principle of distinction. Finally, it will discuss the relation between IHL and international human rights law and international criminal law.

Pre-requisite: None

LAWS7316 HUMAN RIGHTS AND REFUGEE LAW

This course aims to address the interaction between national, regional and international human rights protection and the protection of refugees. It will examine the framework on human rights protection, including the historical development of human rights, the sources and the different categories of human rights. Contemporary challenges facing international mechanism for protection of human rights will be examined. Human rights laws and institutions in selected jurisdictions, including Asia will be studied in a comparative perspective in order to examine national implementation of international norms. The jurisprudence in major landmark human rights cases and its implementation will be critically examined. Finally, the course identifies the legal issues and challenges concerning refugees and migration primarily across borders.

Pre-requisite: None

LAWS7308 LAW OF INTERNATIONAL ORGANIZATIONS

The course aims to offer a deep understanding of the law related to international organisations. Since the substantive law differs from organisation to organization, the course first introduces some core concepts and principles which are common to international organisations, such as theory of international organisations, legal personality and the principle of functionality. The course will subsequently look into the specific legal systems of some representative global organisations, such as the UN and the WTO, and some selected regional organization, like the EU and ASEAN or co-operation alliances like the BRICS, G7/G8 and G20 to examine how the principles and theoretical concepts are applied in practice. Finally, the course will discuss inter-relations between inter-governmental organisations and the role of non-governmental organisations.

Pre-requisite: None

LAWS7317 LEGAL CULTURE AND LEGAL PLURALISM

This course assesses the formation and development of law based on the history of European and Chinese legal cultures. Specific focus is made on continental legal systems. Topics include European ancient law (Hebrew law, Greek law, Roman law, etc.), European medieval law (Canonic law, Germanic law, Feudal law, Mercantile law, the revival of Roman law and the formation of common European law), modern European law after the Renaissance and the legal evolution of Western Europe after the French Revolution, namely the sources of contemporary European law. The course also examines the ancient and contemporary legal philosophy of China, legal history and culture in China. The course will also draw examples of unique legal cultures and legal pluralism from other jurisdictions like Japan and India.

Pre-requisite: None

LAWS7309 COMMON LAW

This course will provide a comprehensive introduction to substantive common law and equity as developed in England and subsequently adopted in other jurisdictions like USA, Australia and Hong Kong. Common law and equitable remedies in specific fields like laws of trusts, contracts and torts and unique procedural elements like the writs and jury systems will be studied. Students will be trained in the judicial process using case studies and techniques of identifying ratio and obiter in binding precedents. The contemporary features of common law will be studied in a comparative perspective with the intent of training students from civil law jurisdictions to be able to interact with major common law systems in the world.

Pre-requisite: None

LAWS7318 MARITIME AND SHIPPING LAW

The objective of this course is to foster a critical appraisal of private law issues arising in maritime transportation. Topics covered include carriage of goods by sea, maritime safety and liability and marine insurance. International legal instruments governing relevant issues and specific national legislation and cases will be comparatively examined. The issues covered includes international sales and incoterms, carriage contracts and bill of lading, cargo claims, liability of carriers, security and limitation of liability, charter parties, maritime safety and navigation, salvage, towage and general average, multimodal transportation and marine insurance. The role of admiralty courts and maritime arbitration mechanism and relevant enforcement issues will be briefly introduced.

Pre-requisite: None

LAWS7319 E-COMMERCE AND INFORMATION TECHNOLOGY LAW

Critical legal issues relating to information technology and its application in B2B and B2C business transactions will be addressed mainly in a trans-national context and in the light of the challenges arising in the borderless nature of the cyberspace. Issues covered includes jurisdiction and applicable law for online transactions, electronic contracts and agents, click-wrap agreements, intellectual property rights, electronic authentication and transactional security, virtual enterprises and domain names, online privacy and data protection, electronic payment systems and taxation, liability of online intermediaries, online consumer protection, cyber-crime and online dispute resolution. Due to the diversity and relative infancy of legal developments in the field, specific national laws and cases will be studied using comparative methods.

Pre-requisite: None

LAWS7406 INTRODUCTION TO MACAU LAW

This course covers key topics and features of the legal system of the Macao SAR. The themes may vary but normally should include discussions of the Basic Law and the autonomy of the Macao SAR, the political system, the protection of fundamental rights, and international law issues relevant for Macao. The discussions are contextual and take comparative law into account.

Pre-requisite: None

LAWS7407 MACAU AND COMPARATIVE GAMING LAW

This course focuses especially on the commercial operation of casino games of chance (table games and slot machines) as regulated in the Macao SAR, the world's largest gaming jurisdiction.

The course has an interdisciplinary nature and covers especially the history of gaming in Macao and various issues of administrative and tax law, contract law and criminal law. The course includes a detailed study of the regulation of gaming concessions and of gaming promoters. It also features a comparative element, by which the Macao system will be contrasted with the regulation of gaming in the two main jurisdictions in gaming other than Macao, which are Nevada and Singapore.

Pre-requisite: None

LAWS7408 ADVANCED ISSUES OF INTERNATIONAL TRADE LAW

This course builds on the course on WTO and Regional Trade Law and proposes the discussion of selected, more advanced issues of contemporary relevance in the international trading community. It will thus strongly rely on the discussion of case law, i.e. particularly ongoing disputes of global and regional relevance, and will be based on the assignment of pertinent reading materials. Active class participation in the form of raising questions or partake in group discussions as well as class presentations will be equally given an important role.

Pre-requisite: None

LAWS7409 ASIAN BUSINESS LAW

This course undertakes a comparative approach to the regulation of business in Asia. It first tries to assess possible particularities in the legal and business culture in Asia and focuses inter alia on the areas of commercial law, corporate law and business transactions, securities, intellectual property, and labor law issues. To this end, selected jurisdictions, such as those of the PRC, Japan and Korea but also others will be presented and discussed from a comparative and both public-private law perspective. The analysis includes the evaluation of national legal systems in the context of regional economic integration projects based on various bi-, tri- or plurilateral agreements.

Pre-requisite: None

LAWS7410 COMPANY LAW

Based on the regulation of companies in Macao, focusing on private companies and public companies, this course discusses major trends of in company law and corporate governance. All major issues of company law will be covered, including fundamental concepts (types of companies; limited liability; capital maintenance), the creation of companies, the capital, the shares, the organs of companies, the rights and obligations of shareholders, and the dissolution and liquidation of companies.

Pre-requisite: None

LAWS7411 LAW AND SOCIETY

Taking a multidisciplinary approach, this course deals with a wide set of contact points between law and society. These include first a retrospective look at the significance of various factors or causal elements fuelling the changes underlying the development of societies, such as the invention of new technologies amidst an evolving relationship between politics and economics. It then asks how these numerous changes will influence the processes underlying legal thinking and reasoning as well as the adoption, application, and enforcement of laws in the future. To this end, the discussion will also present new theoretical approaches in law, such as the “law and economics” movement or a political economic, as well as novel concepts, such as “global governance” or “global administrative law”, to try to identify new trends in the field of legal science.

Pre-requisite: None

LAWS7412 MONEY LAUNDERING AND ANTI-CORRUPTION LAW

This course discusses international trends and legal initiatives for the prevention and repression of corruption, money laundering and the financing of terrorism through the financial system. The discussion covers the international treaties relevant in the field, detailed substantive criminal law issues and the preventive measures required from financial institutions.

Pre-requisite: None

LAWS7413 PRIVATE INTERNATIONAL LAW

This course focuses on Private International Law-provisions that are applicable in cross-border cases. These provisions may be set out in international treaty law, regional laws and domestic Private International Law. The first part deals with questions of jurisdiction, recognition and enforcement of civil and commercial matters, the second with the conflict rules that answer the question which will be the applicable law. The students will be accustomed with i.a. international conventions of which Macao is a contracting party, other regulations on Private International Law, and examples of domestic rules on Private International Law. Basic knowledge of private law (especially contracts & torts) and procedural law (jurisdiction, recognition and enforcement) are desirable.

Pre-requisite: None

LAWS7414 CONSUMER PROTECTION LAW

This course enquires into the role of consumer protection law in the legal systems of contemporary societies. The inquiry includes a presentation of the laws and organizations at both the national and international level that are entrusted with the protection of the rights of consumers in their commercial transactions. Further issues discussed include the legal concept and definition of the consumer, contractual issues trying to ensure the protection of the weaker party through special contractual clauses, and the relationship and contact points with other legal areas, such as competition law, intellectual property law (e.g. trademarks), and product safety law.

Pre-requisite: None

LAWS7415 COMMERCIAL CONTRACTS

This is a specialized contract law course covering various legal mechanisms to distribute goods and services, including the ICC Incoterms, the contract of carriage of goods by sea and the various payment mechanisms in international trade. The regulation of international trade agreements by the UN Convention on the International Sale of Goods will be addressed, along with the contracts used for the marketing of goods. The course will cover also various financial instruments and agreements involving banks, namely the term loan, the negative pledge, syndicated lending, securitisation and derivatives.

Pre-requisite: None

LAWS7320 MOOTING

The mooting course is aimed at developing drafting and advocacy skills for students. The course will train the students in adversarial process to enable them to examine legal disputes, conduct legal research, and develop drafting, argumentative and rebuttal skills. The course is open to all students but the enrolment is subjected to a selection process. Selected students will be required to prepare and participate in mooting competitions like the Jessup International Law Moot Competition or other competitions. Students will analyze the moot problem, conduct legal research and draft written memorials according to the rules of the competition. The students will be trained for oral rounds and partake in regular practice moots.

Pre-requisite: None

LAWS7321 SEMINAR SERIES

This course will consist of a minimum number of 10 seminars offered by the Faculty of Law throughout the academic year featuring notably eminent visiting professors, practitioners or distinguished experts from a great variety of legal and professional backgrounds. Moreover, their active participation is encouraged and will be included in the final evaluation. Pre-requisite: None

MASTER OF LAW IN MACAU LAW AND PRACTICE

Pre-requisite: LAWS1002, LAWS1005 and LAWS1006

LAWS1030 LEGAL PHILOSOPHY

Many philosophical issues arise in connection with how we solve legal questions. This course introduces students to these issues and encourages critical thinking about them. Several questions are explored. 1)What is law and legal system? What are the types of law? 2) What is obligation or right? 3) What is the relationship between law, morality, authority, and politics? 4) How to interpret law? 5) What is, and how to realize, the rule of law? 6) Is there an obligation to obey the law? How can law give us reasons? 7)Is there an essential difference between legal reasoning and reasoning about politics, policies, or justice? 8) What is justice? 9) What is the role of judges? 10) What justifies criminalizing various acts and administering punishment?

Throughout the course, special attention will be paid to the answers given to the above questions by major figures in the field of philosophy and law, such as Confucius, Mencius, Han Fei, Plato, Aristotle, Aquinas, Hobbes, Rousseau, Hume, Bentham, Austin, Hart, Dworkin, etc. on the one hand, and to the connections between philosophy and legal practice, especially statute and case law.

Pre-requisite: None

LAWS2000/LAWS2001 GENERAL THEORY OF CIVIL LAW I

Title I. Introduction. 1. General concepts of civil law. 2. Preliminaries.

Title II. General theory of the civil juridical order. Chapter I. Sources of civil law. Chapter II. Fundamental principles of civil law.

Title III – General theory of the civil juridical relationship. Chapter I. General theory of the individuals of the juridical relationship. 1. General concepts. 2. Natural persons. 3. Legal persons. Chapter II. General theory of the object of the juridical relationship. 1. General concepts. 2. Things and patrimony.

Pre-requisite: LAWS1000 and LAWS1001

LAWS2002/LAWS2003 GENERAL THEORY OF CIVIL LAW II

Title I. General theory of the civil juridical relationship (cont.). Chapter I. General theory of the juridical fact. 1. About juridical facts in general: concepts and classifications; acquisition, modification and extinction of juridical relationships; juridical transaction and simple juridical act. 2. Activity bound by the law and discretionary activity: the administrative discretionary activity. 4. Sources of administrative law: in special, the administrative Regulations.

Pre-requisite: LAWS1000 and LAWS1001, LAWS1005 and LAWS1006

LAWS2006/LAWS2007 ADMINISTRATIVE LAW II

I. The Administrative Activity. 1. General notions: legal facts in administrative law; in special the administrative illicit 2. Administrative activity.

II. The regulatory power. 1. Notion, function and grounds for the administrative regulations 2. The administrative regulations and the law: admissibility of the independent regulations. 3. The regulatory procedure.

III. Administrative act 1. Notion and meaning 2. Typology 3. Instrumental acts. 4. The administrative procedure. 5. Effectiveness and legal strength of the administrative act: the possibility of execution by Administration of its own acts. 6. The structure of the administrative act: the subject, the object and the declaration. 7. The defects of the administrative act. Types of invalidity.

IV. The administrative contract 1. General notions: the public administration, consensus and authority. 2. Legal regime: formation, content and principles relating to the "life" of the administrative contracts. Invalidity of administrative contracts.

Pre-requisite: LAWS2004 and LAWS2005

LAWS2012 ECONOMICS

1. Offer and demand. 2. Consumers and Producers decisions. 3. The structure of the Market. 4. The National Income Accounting and the determination of the national income theory. 5. Financial and Monetary Policies. 6. Inflation and Unemployment. 7. Economic System and Development of Regional Economy.

Pre-requisite: LAWS1000 and LAWS1001

LAWS3000/LAWS3001 OBLIGATION LAW I

Chapter I. Introduction. 2. Obligation law and the importance of its study. 2. Reference to Comparative Law. 3. Guiding principles of Civil Law and Obligation Law. 4. General notions. Obligation *stricto sensu*. Performance of the obligation. The problem of non-autonomous obligations. Complex "obligational" relation. Function of the obligation and the interests of the creditor. 5. Credit rights and property rights. The external effect of obligations. 6. Guiding Principles of Obligation Law. Principle of individual autonomy and contractual freedom. Principle of good faith. Principle of the unjust enrichment.

Chapter II. Sources of obligations. 1. Contracts. Contractual relations. 2.1. Promissory contract. 2.2. Preference pact. 2.3. Exception of non-performance. Termination of the contract. 3. Unilateral transactions. 4. Management of alien affairs. 5. Unjust enrichment. 6. Civil Liability. 6.1. Contractual and non contractual liability. 6.2. Liability for unlawful actions. Requirements and regime of the obligation on compensation. The function of civil liability. 6.3. Objective Liability. Liability of the committer. Liability of public legal persons by acts of private management. Liability for damages caused by animals. Liability for damages caused by terrestrial circulation vehicles. Liability for damages caused by electrical energy or gas installations. 6.4. Liability for legal actions. 6.5. Mandatory civil liability insurance. 6.6. Mandatory automobile civil liability insurance. 6.7.

Limitations to the liability and the right to compensation.

Pre-requisite: LAWS1000 and LAWS1001, LAWS1005 and LAWS1006

LAWS3002/LAWS3003 OBLIGATION LAW II

Chapter I. Modalities of obligations. 1. Obligations in relation to their binding: the natural and civil obligations. 2. Obligations in relation to the individuals: conjoint and jointly liable obligations. 3. Obligations in relation to the object. Pecuniary, interest and compensation obligations.

Chapter II Transfer of obligations. 1. Transfer of credit. Sub-rogation. 2. Individual transfer of debts. 3. Cession of the contractual position.

Chapter III General security of obligations. 1. Scope. 2. Protection of patrimonial guarantees. Void contracts. Sub-rogation of the creditor to the debtor. *Actio pauliana*. Seizure of assets.

Chapter IV. Special security of obligations. 1. Personal and real securities. 2. Bail. 3. Real securities. 4. Bond.

Chapter V. Performance and non performance of obligations. 1. Performance. Performance and principle of good faith. Timeliness of obligations. Who can perform and to whom can the obligation be performed. Place and deadline of the performance. Allocation and evidence of performance. 2. Non performance. Impossibility and delay not imputable to the debtor. Impossibility and delay imputable to the debtor. 3. Defective performance. 4. Contractual regulation of the rights of the creditor. Penalty clause. 5. Forced execution of the credit. Action to enforce the performance, specific performance, performance by equivalent. 6. Cession of assets to the creditors. 7. Delay of the creditor.

Chapter VI. Causes of extinction of obligations besides the performance.

Chapter VII. Special contracts. 1. Contracts regulated and not regulated in the law. 2. Mixed contracts and contracts related. 3. Contracts regulated in the Civil Code. 4. Gaming and betting. General and special features of gaming and betting.

Pre-requisite: LAWS2000 and LAWS2001, LAWS3000 and LAWS3001

LAWS3004/LAWS3005 LABOUR LAW

Title I. Labour Law: concept, object and importance. Chapter I. Historical evolution of Labour Law.

Chapter II. Sources of Labour Law.

Title II. The labour contract. Chapter I. Concept, elements and legal characteristics of the labour contract.

Title III. The formation of the labour contract. Chapter I. Parts of the labour contract. 1. Employee. 2. Employer. 3. Rights and duties. Chapter II. Types of employment contracts. 1. Indefinite duration period. 2. Fixed term and non-fixed term. Chapter III. Probationary period. Chapter IV. Employment of minors.

Title IV. Working time. Chapter I. Normal working hours. 1. Exemption for the working time schedule. 2. Overtime work. 3. Night work. 4. Shift work. Chapter II. Periods of rest. 1. Weekly rest. 2. Holidays. 3. Annual leave. 4. Absences. 5. Maternity leave.

Title V. Salary. Chapter I. Types of salary. 1. Basic remuneration. 2. Variable remuneration. 3. Calculation of the retribution. 4. Compensation and deductions on salary.

Title VI. Termination of the labour relation. Chapter I. Forms of termination. 1. Revocation. 2. Resolution. 3. Rescission. 4. Expiry.

Title VII. Labour relations with non-residents workers. Title VIII. Social Security.

Pre-requisite: LAWS1000 and LAWS1001, LAWS1005 and LAWS1006

LAWS3006/LAWS3007 COMMERCIAL LAW I

Title I. The exercise of commercial entrepreneurs in general. Chapter I. 1. Introduction to Commercial Law. 2. The commercial law as the law "around" the business. Chapter II. Commercial enterprise and Commercial entrepreneurs. 1. Commercial entrepreneurs and acts of commerce. Chapter III. Commercial entrepreneurs. 1. Commercial capacity, Impediments and incompatibilities. 2. Legitimacy. 3. Obligations of commercial entrepreneurs. 3.1. Firm. 3.2. Commercial bookkeeping. 3.3. Commercial register. 3.4. Render accounts. Chapter IV. Representation in the performance of an enterprise. 1. Managers. 2. Assistants of an entrepreneur. Chapter V. Liability for the exercise of an commercial enterprise. 1. Liability for debts contracted in the exercise of an enterprise. 2. Liability for defective products. Chapter VI. A commercial

enterprise as an object of business. 1. The right over the enterprise and the rights on the assets of the enterprise. 2. The commercial enterprise as object of contracts. 2.1. The transfer of the commercial enterprise. 2.2. Lease of commercial enterprise. 3. Usufruct of commercial enterprise. 4. Pledge of commercial enterprise. Chapter VII. Trade distinctive signs. 1. Firm (remission). 2. Name and emblem. 3. Trademark. Chapter VIII. Competition legal discipline. 1. Competition in general. 2. Unfair competition.

Title II. Negotiable instruments. Chapter I. Negotiable instrument in general. Chapter II. Bill of exchange. 1. Typical notes of the obligation incorporated in a negotiable instrument. 2. Requisites of the bill of exchange. 2.1. Essential requisites. 2.2. Non essential requisites. 3. Legal institutes of the Bill of Exchange. 3.1. Drawing. 3.2. Endorsement. 3.3. Acceptance. 3.4. "Aval". 3.5. Types of maturity. 3.6. Recourse.

Pre-requisite: LAWS2002 and LAWS2003

LAWS3008/LAWS3009 COMMERCIAL LAW II

Title I. Commercial companies in general. Chapter I. Notion of commercial company and related figures. Chapter II. Brief historical reference. Chapter III. Types of commercial companies.

Title II. Constitution and functioning of commercial companies. Chapter I. Constitution of commercial companies. Chapter II. Legal personality and capacity of commercial companies. Chapter III. On the shares. Chapter IV. Capital and legal capital, profits and losses. Chapter V. Company organs. 1. Administration. 2. General Meeting. 2.1. Company resolutions. 2.2. Ineffectiveness of company resolutions. 2.2.1. Resolutions ineffective. 2.2.2. Void resolutions. 2.2.3. Voidable resolutions. 2.2.4. Nonexistent resolutions? 3. Supervisory Board and single supervisor. 4. The company secretary. 5. The liability of members of company organs.

Title III. Amendment of the articles of association. Chapter I. Amendments to the articles of association. 1. Generalities. 2. Increase or reduction of the company capital. 3. Modification of the company object. Chapter II. Mergers and divisions of companies. Chapter III. Transformation of companies.

Title IV. Extinction of commercial companies. Chapter I. Winding up of commercial companies. Chapter II. Liquidation of commercial companies.

Pre-requisite: LAWS3006 and LAWS3007

LAWS3010/LAWS3011 CRIMINAL LAW I

Title I. General Considerations. Chap. I. Criminal Law in a formal perspective. 1. Concept. Chap. II. The whole Criminal Law Science. Chap. III. Criminal Law main principles. Chap. IV. The role of the Criminal Law in the legal system – the question of the material concept of crime. 1. The criminal legal property. Chap. V. The aim of the penalties and the security measures. Chap. Commission contract and forwarding contract. Chapter V. Distribution contracts. 1. Agency contract. 2. Commercial concession contract. 3. Franchising. 4. Brokerage contract. Chapter VI. Advertising contracts. 1. Contract Advertising. 2. Advertising diffusion contract. 3. Advertising creation contract. 4. Advertising sponsorship contract. Chapter VII. Carriage contract. Chapter VIII. Deposit in general warehouses. Chapter IX. Lodging contract. Chapter X. Current account contract. Chapter XI. Securities lending contract (reporte). Chapter XII. Banking contracts. 1. Bank deposit. 2. Rental of safe deposit boxes. 3. Opening credit. 4. Bank advance. 5. Current Bank account. 6. Bank discount. 7. Factoring contract. 8. Leasing. Chapter XIII. Guarantee contracts. 1. Commercial pledge. 2. Fiduciary transfer guarantee. 3. Floating charge. 4. Independent guarantee. Chapter

XIV. Insurance contract.

Pre-requisite: LAWS3008 and LAWS3009

LAWS4006/LAWS4007 PRIVATE INTERNATIONAL LAW

Title I. 1. Introduction. 2. Method. 3. General principles and regulation values. 4. Function of the conflict rule. 5. Structure of the conflict rule. 6. Classification 7. Renvoi (remission/transmission). 8. Vested rights. 9. General clause of public policy ("ordre public"). 10. The "fraus legis".

Title II. 1. Personal law. 2. Natural persons. 3. Juridical persons. 4. Law on foreigners. 5. Legal business. 6. Obligations. 7. Real property rights. 8. Family. 9. Succession.

Pre-requisite: LAWS2002 and LAWS2003, LAWS4002 and LAWS4003

LAWS4008/LAWS4009 CRIMINAL PROCEDURAL LAW

I. General Notions. 1. Function and meaning of the criminal law procedure. 2. Criminal law procedure within the legal system. 3. The juristic and constitutional compliance of the criminal procedure and its structure. 4. The application of the criminal procedure law.

II. General Principles of Criminal Procedure Law. 1. Principles relating to the initial stage of the procedure. 2. Principles relating to the continuation of the procedure. 3. Principles relating to evidence. 4. Principles relating to the form of the procedure.

III. The Agents of the Criminal Procedure. 1. Court. 2. Public prosecutor and criminal police bodies. 3. The defendant and the defendant's lawyer. 4. The victim and injured party.

IV. Procedural measures 1. Means to obtain evidence. 2. Safeguard and Police measures. 3. Coercive Measures 4. Measures of patrimonial guarantee.

V. Stages of the Criminal Procedure. 1. The forms of criminal procedure and their respective procedure. 2. Appeals.

Pre-requisite: LAWS3012 and LAWS3013

LAWS4010 POLITICAL SCIENCE

Chapter I - Object, method, scope and objectives of political science. Chapter II - Review of politics over centuries. Chapter III - The forms and systems of modern governments. Chapter IV - Systems of some particular governments. Chapter V - Forms and system of Macao government.

Pre-requisite: LAWS1000 and LAWS1001, LAWS1005 and LAWS1006

LAWS4011/LAWS4012 CIVIL PROCEDURAL LAW II

Title I. Theory of pleadings. One. Concept of pleading. 2nd. Form. 3rd. Time. 4th. Place. 5th. Subjects. 6th. Purposes. 7th. Pathology of pleadings.

Title II. Dynamics of procedural relationship. One. Start the instance and its development. 2nd. Modifications of the instance. 3rd. Suspension and termination of proceedings. 4th. No need to adjudicate. 5th. The incidents of the proceedings.

Title III. Formalism of ordinary declarative process and its phases. Chapter I. Articulated. One. Initial petition. 2nd. Order injunction. 3rd. Quote. 4th. Challenge: challenge for defense and for defense exception. 5th. Counterclaim. 6th. Reply and rejoinder. 7th. Articulated supervening. Chapter II. Sanitation and preparation process. One. Pre-Order exonerating. 2nd. Selection of the facts. 3rd. Curative act. Chapter III. Instruction process. One. The evidence in general. 2nd. Right evidential material and formal evidentiary law. 3rd. The burden of proof and rules. 4th. Principles that govern the production of evidence in court. 5th. Evidence. Chapter IV. Discussion and judgment. One. The final hearing. 2nd. The final sentence. 3rd. Effects of sentence. 3.1. The res judicata and its species. 3.2. Subjective and objective limits of res judicata. 3.3. Other effects of final judgment.

Title IV. Formalism of common abstract declarative process. One. Differences regime regarding how common ordinary. 2nd. Deadlines.

Title V. Process particular concerning small claims. One. Competence. 2nd. Specialties of conduct.

Pre-requisite: LAWS2002 and LAWS2003, LAWS3002 and LAWS3003, LAWS4002 and LAWS4003, LAWS3018 and LAWS3019

LAWS4013/LAWS4014 CIVIL PROCEDURAL LAW III

Title I. General theory of executive action. One. Concept and objectives. 2nd. Rate cool.

Title II. Inadmissibility of executive action. One. Specific assumptions. 1.1. Assumption formal and substantive requirements. 1.2. The enforceable legal nature and historical evolution. 1.3. Rating enforceable. 1.4. Consequences of lack of enforcement or its unenforceability. 1.5. Sure, liquidity and enforceability of the obligation. 2nd. General inadmissibility of executive action. 2.1. The jurisdiction of the court. 2.2. The formal legitimacy. 2.3. The mandatory legal representation.

Title III. Forms of executive process. One. Common process and special processes. 2nd. Legal Regime of different species and forms of execution.

Title IV. Process executive for payment of a certain amount and its phases. Chapter I. Ordinary form. One. Articulated. 1.1. Initial application. 1.2. Order injunction. 1.3. Quote of the run. 1.4. The attached opposition's run. 2nd. The attachment. 2.1. Definition and purpose. 2.2. Opposition to attachment. 3rd. Contest creditors. 3.1. Complaint and checking credits. 3.2. Processing. 4th. Payment and its modalities. 5th. Right of redemption. 6th. Term of the executive process. 7th. Renewal of execution extinct. Chapter II. Summary form of the implementation process for the payment of a certain amount.

Title V. Implementation process to deliver right thing. One. Forms common and ordinary common summary. 2nd. Conduct.

Title VI. Implementation process to provide that. One. The fact that positive and negative. 2nd. Forms common and ordinary common summary.

Pre-requisite: LAWS4011 and LAWS4012

LAWS4016 RESEARCH AND INTERNSHIP

This course can help students to understand the basic elements of learning and applying to the law: standardization; sociality; logicity; definability; finality; sense of justice. Pre-requisite: None

BACHELOR OF LAW IN CHINESE LAW AND GLOBAL LEGAL STUDIES (IN ENGLISH LANGUAGE)

LAWS1055 CHINESE LEGAL HISTORY

This course aims at introducing to students China's long legal tradition, and exploring the developments of laws and legal institutions in China's long history in a chronological order. It will start with the Zhou Dynasty and end with the Republic of China. Fundamental legal principles, concepts, and interesting arrangements in major legal areas in each major dynasty will be covered. Pre-requisite: None

LAWS1056 CONSTITUTIONAL LAW

Constitutional Law is the fundamental Law of a country, which sets out the ground rules and values of the country, allocating and limiting state powers, and enshrining fundamental rights. A decent understanding of constitutional law of a country is the precondition for understanding its whole legal system. This course provides an account and analysis of the text and practice of Chinese constitutional law against the background of China's political system, history and culture. It aims to prepare students for correct and deep understanding and analysing the constitutional, political, and public phenomena and questions that China is facing. Pre-requisite: None

LAWS1057 MACAO AND HONG KONG BASIC LAW

The Basic Law of Macao/Hong Kong is a national law of China that serves as the de facto constitution of the Macao SAR/Hong Kong SAR. This course aims to provide an understanding of the legal, political, and social values underlying the Basic Law, to explain the legal position of Macao/Hong Kong vis-à-vis the Central Government and the Constitution of the People's Republic of China, and to analyze the basic principles underlying the concept of "one country, two systems" and its practical significance. Pre-requisite: None

LAWS1058 JURISPRUDENCE

Jurisprudence is two-fold. First, it is the enterprise of thinking abstractly, generally, deeply, critically, and creatively, about law as it is and law as it ought to be. Secondly, it refers to the body of knowledge produced by this enterprise of thinking. The aim of this course is to teach students how to think philosophically about law, and to inform students the body of knowledge normally called jurisprudence or legal philosophy, which will cover such major fields as the nature of law, the values of law, the major general themes or topics of law, and the philosophy of major legal areas. Pre-requisite: None

LAWS1059 LEGAL LANGUAGE

This course introduces the vocabulary and expression of legal English to improve students' listening, speaking, reading, and writing ability in legal English. At the same time, this course will provide materials to help students understand British and American legal culture, learn the legal profession of common law countries, and terminology used in various laws, such as constitution law, criminal law, contract law, and torts, etc. By using case studies and group discussions, this course will introduce the legal practice of common law countries, such as legal aid and application of the law, etc. Pre-requisite: None

LAWS1060 LAW, ECONOMICS AND SOCIETY

China has been endeavouring to develop its legal system and build a rule-of-law country with Chinese characteristics. Chinese law is deeply rooted in and shaped by China's economy and society. It is impossible to understand Chinese law without understanding its economic and social background. This course will introduce students to the economic and social context of Chinese law, and help them to understand the economic and social causes or forces behind the development or evolution of China's legal system. Pre-requisite: None

LAWS1061 INTERNATIONAL LAW

The course aims at introducing the normative characteristics of public international law and demonstrating its significance in a globalized legal practice. Tracing the evolution and transformation of the international legal order, course will identify the unique characteristics of international norms and distinguish with domestic legal systems. The emergence of nation states, its powers, duties, privileges, responsibilities and immunities will be systematically introduced with a contemporary emphasis. It will examine the prohibition of use of force and the role of pacific settlement of international disputes. The course will end with assessing the illustration of specific state practice of international law.

Pre-requisite: None

LAWS1062 CRIMINAL LAW I

Criminal law is one of the important fundamental laws in the legal system. This course consists of the definitions, principles, and important legal provisions of criminal law. This course mainly focuses on the legal norms of crimes, criminal liabilities, and penalties. This course will enable students to learn the basic concepts and theories of criminal law comprehensively and systematically, be familiar with the legal provisions.

Pre-requisite: None

LAWS1063 CIVIL LAW I: GENERAL PRINCIPLES

As an introductory course to civil law, this course covers topics from basic theories of civil law to issues of practical relevance, and offers an overview of the General Provisions of the Civil Law of the PRC. The course focuses on the basic principles, party to the civil legal relation, legal relations, legal acts, statute of limitations and other theoretical priorities and difficulties, with the aim of giving students a more comprehensive understanding of the general topics of civil law, while laying a good foundation for their study of civil law and other sectoral laws.

Pre-requisite: None

LAWS2015 CIVIL LAW II: CONTRACT AND TORT

This course is based on the Contract Law and Tort Law in Civil Code of the PRC, aiming to enable students to study the Chinese law of obligations from a perspective of comparative law, master and flexibly apply the relevant norms of Chinese contract law, and form a rigorous and scientific approach to jurisprudence. At the same time, the course aims to help students understand the basic principles and knowledge of tort law, improve the ability to prevent risks and independently deal with tort issues.

Pre-requisite: None

LAWS2016 CRIMINAL LAW II: SPECIAL PRINCIPLES

This course will enable students to understand the basic content of the specific provisions of the criminal law. The specific provisions of the criminal law include the constitution of specific crimes and the specific penalties, which are the important contents of the criminal law. There are more than 400 specific crimes in Chinese criminal law, and this course focuses on more common and typical crimes in practice, especially the definition of each crime and the differences of the crimes which are easily confused. This course will make students use the knowledge they have learned to analyse cases concerning conviction and sentencing based on the facts and law of each individual case.

Pre-requisite: None

LAWS2017 ADMINISTRATIVE LAW AND PROCEDURE I

This course will explain comprehensively and systematically the basic concepts, basic principles, and basic theories of administrative law, and familiarize students with the laws (i.e. currently legally valid norms) and the practice of administrative law in China. It will demonstrate to students how to use these norms and principles to solve administrative issues or disputes by means of analysis of real-life cases.

Pre-requisite: None

LAWS2018 WORLD TRADE ORGANIZATION (WTO) AND REGIONAL TRADE LAW

This course offers a comprehensive introduction to the law governing global and regional trade relations under the aegis of the World Trade Organization (WTO) as a part of the wider field of international economic law. The course covers in particular the milestones in the history of the multilateral trading regime from the past to the present, the principal objectives underlying the regulation of international trade, the main trade agreements and trade policies covered as well as an outline of the system for the settlement of disputes of the WTO as exemplified by various important cases decided by the WTO.

This course is aimed at introducing common law and equity to students of civil law jurisdictions. The course will trace the evolution and characteristics of English common law and equity and introduce other features like system of writs, trial by jury and determination of ratio decidendi and obiter dictum in judicial precedent. English law of obligations relating to contracts and torts, common law and equitable remedies, equity and its manifestation in law of trusts will be introduced. It will compare key common law jurisdictions and explore examples of legal transplants and harmonization between common law and civil law legal systems.

Pre-requisite: None

LAWS2023 ADMINISTRATIVE LAW AND PROCEDURE II

This course will focus on the law and the practice of administrative litigation in China, and help students to understand administrative law through the lens of judicial review. It aims to answer four big questions in a comprehensive and systematic way. First, what types of administrative cases Chinese courts can adjudicate? Second, what are the criteria that Chinese courts use to evaluate the legality and reasonableness of administrative actions? Third, what are the remedies

that Chinese courts can offer the parties litigant? Fourth, what are the steps that the parties litigant have to follow in an administrative lawsuit? This course will combine interpretation of administrative statutes and analysis of real-life cases.

Pre-requisite: None

LAWS2024 GLOBAL BUSINESS LAW

The course specializes on the study of the rights and obligations between merchants, including legal entities, arising from international (cross-border) commercial transactions. The course covers the basic concepts of company law, international commercial contracts, international transport as well as international commercial dispute resolution. The course will address legal problems and issues in the context of international commercial transactions by summarizing the relevant international and domestic legal theories and precedents.

Pre-requisite: None

LAWS3034 CIVIL LAW III: PROPERTY LAW

This course takes the Property Law in Civil Code of the PRC as the basic content, which requires students to further master the knowledge of property law based on the general theory of civil law. The course is mainly divided into six parts, including introduction, general theory of property rights, possession, ownership and security interests. Besides the Chinese mainland legal system, contents of this course also include local real rights in Macao from which students will be able to understand the differences between these two real rights systems.

Pre-requisite: None

LAWS3035 FAMILY LAW AND SUCCESSION LAW

Family Law and Succession Law course enable a student to understand the nature and scope of family law and the function of family law in society. The course is based on the current Chinese laws, regulations and judicial interpretations, absorbing the latest research results of family law and succession law, combining judicial practice, and systematically elaborates the basic knowledge, basic theories and basic systems of family law and succession law in China.

Pre-requisite: None

LAWS3036 MOOTING, MOCK TRIALS AND ADVOCACY SKILLS

Aimed at developing essential lawyering skills for students, this course explores fundamental traits vital for various forms of adversarial legal process. Focusing on mooting, mock trials and arbitration, the course provides practical orientation on advocacy skills needed at various stages. Dividing into written and oral stages, the course covers reviewing moot problems, assessment of claims and defences, identification of potential legal submissions, conducting legal research, drafting of written memorials, structuring oral arguments, responding to bench interventions, mastering persuasion, rebuttal and sur-rebuttal. It covers skills for advocacy in arbitration, effective examination and cross-examination in mock trials and preparation for moot competitions.

Pre-requisite: None

LAWS3037 INTERNATIONAL INVESTMENT LAW

This course introduces the normative framework protecting foreign investments and the investor-state dispute settlement mechanism. The course will trace the foundations of international legal protection including the customary international law and other general principles governing foreign investments. Contractual and domestic law protection of foreign investments will be examined, before typical legal standards in bilateral investment treaties are systematically studied. The role of multilateral instruments, especially related to contemporary trends in investor-state dispute settlement, investment guarantee and mega free trade agreements would be assessed. Foreign investment related treaty law and practice of specific states would be focus in the end.

Pre-requisite: None

LAWS3038 LAW OF EVIDENCE

This course introduces students to the basic principles and rules of the law of evidence, and also to the types of evidence and their distinctive features. Legal rules of evidence are analysed in light

of the trial structure and procedure of law. Both civil and criminal evidence issues are considered. Students will also be taught how to apply the law of evidence in practice.

Pre-requisite: None

LAWS3039 LAW, LANGUAGE AND LOGIC

Law is closely related to both language and logic. First, language is one of law's primary means of communication and logic serves law in the processes of legal reasoning and the interpretation of legal texts. For these reasons, both concepts are of great relevance to the theory and practice of law as it is captured by the relevant concepts of legal semiotics, semantics and forensic linguistics, which will be explained using different case studies. This course highlights the multiple mutual links between law, language and logic for a better understanding of law in a rapidly changing context of a global information society.

Pre-requisite: None

LAWS3040 PRIVATE INTERNATIONAL LAW

This course is devoted to providing a detailed and in-depth analysis of the current conflict rules in China concerning jurisdiction, choice of law and foreign judgments and awards in civil and commercial related disputes, and to carrying out updated case analysis that could discover the judicial practice in the Chinese People's Courts.

Pre-requisite: None

LAWS3041 LAW, SCIENCE AND TECHNOLOGY

With the fast development of information technology and biotechnology, legal and ethical discussion on science and technology is highly appreciated. This course aims to explore how science and technology affect law and how to use laws and regulations to manage and promote the sound development of science and technology. The legal norms on science and technology, as well as the legal issues associated with the research and application of emerging science and technology will be introduced and discussed in class. Meanwhile, the course will explore software and digital tools that are used for carrying out legal research and services.

Pre-requisite: None

LAWS3042 INTELLECTUAL PROPERTY LAW

Intellectual property (IP) rights have been considered an important way to promote and protect innovations. This course will explore the content and characteristics of IP law from China and global perspectives. Important regimes such as copyright, patent, trademark, anti-unfair competition, and relevant international conventions will be covered in this class. It will also use case studies and group discussions to help students understand how to manage and protect IP rights. Moreover, this course will explore and discuss new issues in IP research and practice, e.g., the gene patent and the copyright of artificial intelligence work, etc.

Pre-requisite: None

LAWS3043 LEGAL RESEARCH AND DRAFTING

Today's information and communication technologies have a serious impact on legal work and the legal professions. A higher frequency of legal amendments plus an ever growing amount of laws of national, regional and global origins require lawyers to avail of outstanding legal research skills in both analogue and digital formats. At the same time, legal drafting skills are also needed to process the data collected through research and to be able to present them in a concise but clear legal writing style.

Pre-requisite: None

LAWS3044 COMPARATIVE LAW

This course introduces students to a scholarly comparison of elements of their own and other jurisdictions. It enables them to compare the operation of law in two or more systems and thereby increase their overall understanding of those legal systems and how the law operates in different cultural, economic, political, social, and linguistic backgrounds.

Pre-requisite: None

LAWS3045 LEGAL PRACTICE AND PROFESSIONAL INTERNSHIP

This course can help students to understand the basic elements of learning and applying to the law: standardization; sociality; logicity; definability; finality; the sense of justice. This course introduces students to the basic skills of public speaking and debate. It examines the functions, elements, types and roles of public speaking. Through lectures and practices, students learn essential skills in writing, speaking and debating that engage a public audience. In addition to the coursework, students have to choose to look for a relevant workplace to perform 100 hours of internship or to attend 10 court trials and prepare a report for any 5 out of the 10 court trials attended to fulfil the internship requirement.

Pre-requisite: None

LAWS4040 MARITIME AND SHIPPING LAW

This course aims to convey to the student the primary knowledge of maritime law and the practice of China. Following the structure of Chinese Maritime law, it covers a wide range of maritime law issues including carriage of good by sea contracts and bill of lading, cargo claims, the liability of carriers, security and limitation of liability, charter parties, maritime safety and navigation, salvage, towage, and general average, multimodal transportation and marine insurance. International legal instruments governing relevant issues and specific national legislation and cases will be comparatively examined. The role of admiralty courts and maritime arbitration mechanisms and relevant enforcement issues will also be briefly introduced.

Pre-requisite: None

LAWS4041 FISCAL AND TAXATION LAW

The purpose of this course is to enable students know the basic concepts and principles of the fiscal and taxation laws, and understand the basic theory system, content, and the latest development of the fiscal and taxation laws, and finally use the knowledge to the corresponding legal practices.

Pre-requisite: None

LAWS4042 INTERNATIONAL ADJUDICATION AND ALTERNATIVE DISPUTE RESOLUTION

This course is designed to combine the study of dispute resolution through adjudication and alternative dispute resolution in an international context. The course will examine legal issues arising in adjudication of international disputes through international, regional and domestic courts and tribunals. The course will specifically explore the role of international arbitration, arbitral institutions, enforcement of international awards and specialized arbitration. The international law governing mediation or conciliation and enforcement of settlement awards will receive a special focus. Finally, the course will assess emerging issues including online dispute resolution, specific international obligations of states and domestic law harmonization governing international disputes.

Pre-requisite: None

LAWS4043 COMPANY LAW

The course addresses the establishment, organization and operations of companies In China. It provides students with basic notions and fundamental principles and general rules of corporate entities, delivers the ideas how the law seeks to strike a balance between the interests of various stakeholders and the interests within and outside the company including directors, managers, shareholders, creditors, and the society.

Pre-requisite: None

LAWS4044 PERSONALITY RIGHTS AND CYBERSPACE

The course will discuss personality rights in two ways. First, personality rights in the traditional civil law: we will discuss Part IV of China's Civil Code "Personality Rights". Second, the personality rights in Cyberspace. The development of internet has radically changed the circumstances of personality rights. In the digital age, the most serious violations of personality rights take place in

Cyberspace. This course therefore will discuss the special challenges to personality rights posed by the new information and networking technologies.

Pre-requisite: None

LAWS4045 LEGAL ETHICS

Legal ethics refers to the ethical norms governing legal professions. This course will introduce students to the body of legal and moral norms and doctrines regulating legal practice in different settings. Its aim is to clearly and vibrantly explain the key topics of professional ethics and issues facing those who are doing legal work, so that they know how to be a good legal professional.

Pre-requisite: None

LAWS4046 LABOUR LAW AND SOCIAL SECURITY

This course is mainly composed of Chinese labour Law and Chinese social security. The Labour Law lecture follows the logic line from the contracting consultation of labour contracts, the conclusion of labour contracts, the fulfilment of labour contracts, the termination of labour contracts to the sequence after the end of labour contracts. The teaching of Social Security Law centres on insurances of pension, medical care, maternity, work injury and unemployment issues.

Pre-requisite: None

LAWS4047 LAW OF THE ENVIRONMENT AND NATURAL RESOURCES

The objectives of this course are to help students comprehend the interdisciplinary nature of environmental law; identify environmental law issues and disputes in major legal disciplines; understand the roles of the State, people and the industries in environmental protection and their power, rights and obligations. This course covers a wide variety of legal topics ranging across traditional areas of environmental law, policy and regulation, as well as planning and land-use law, heritage protection, international environmental law, marine environmental law, and natural resources law.

Pre-requisite: None

LAWS4048 BELT AND ROAD, BRICS COOPERATION AND DEVELOPMENT LAW

Aiming to explore key legal issues facing Belt and Road (B&R) initiative of China and BRICS cooperation, the course takes a developmental law perspective. First, it assesses how China's trade and investment policy contributes to international developmental goals and BRICS cooperation. It introduces relevant legal standards in BRICS member states and potential implications for the cooperation. To determine the legal environment governing the B&R initiative, the course delineates its scope and the role of relevant investment and free trade agreements. It ends with exploring related legal issues in concession contracts and projects, dispute resolution and involvement of Greater Bay Area.

Pre-requisite: None

LAWS4049 MAJOR LEGAL ISSUES OF THE GREATER BAY AREA

This course undertakes a comparative approach to the regulation of business in the Greater Bay Area (GBA) and its unique features, including 'One Country, Two Systems', three customs territories and three jurisdictions, resulting in contradiction among legal systems. It first tries to assess possible particularities in the legal and business culture in the GBA and focuses inter alia on the areas of commercial law, corporate law and business transactions, financial services, infrastructure intellectual property, and dispute resolution. The difference among the legal systems is a major source of the long-term obstruction against the full cooperation across the GBA. To this end, the legal systems will be presented and discussed from a comparative perspective. The analysis includes the evaluation of the level of the rule of law in the GBA and its strategic importance in the context of the Belt and Road Initiative and as a platform to boost the trade and investment development in China.

Pre-requisite: None

ELECTIVE COURSES:

LAWS2025 LAW OF THE EUROPEAN UNION

This course focuses on the institutional, substantive and procedural dimensions of EU law. This course provides an overview of the treaty reforms, judicial architecture and political structures of the EU, the major fields of EU law, law-making processes, and the relevant case law on free movement, fundamental rights, and Internal Market while focusing on current issues of the EU integration process. The course attaches specific attention to vertical (EU institutions) and horizontal (Member States) dimensions of the EU law.

Pre-requisite: None

LAWS2026 GLOBAL HEALTH GOVERNANCE AND LAW

Global health influences human life, economic development, and international relations. The role of law in global health governance has gained increasingly attention in recent years. This course will introduce domestic and international public health-related laws and international instruments, and relevant judicial practice. From a global perspective, this course will focus on the exploration of the role of legislation and regulations in promoting the development of global health industry. This course combines public health management and law, aiming to develop students' legal understanding of global disease prevention and control, community health, and health management.

Pre-requisite: None

LAWS2027 GLOBAL IMMIGRATION AND LAW

This course, focused on global immigration, provides the opportunity to study the key legal issues facing immigration to a foreign territory and international legal protection of rights of migrants. A comparative introduction to immigration law and policy of specific jurisdictions and its regulation of non-immigrant visas is provided. Key legal and procedural issues relating to admission, entry, removal and remedies against removal are covered. Requirements for seeking temporary or permanent residency, citizenship and nationality in selective states are compared. Finally, the course ends with an examination of criminal law issues, consequences of criminality on global immigration and contemporary legal developments.

Pre-requisite: None

LAWS2028 ADVANCED LEGAL PHILOSOPHY

This course aims to educate students to become legal philosophers by means of developing their ability of engaging with great legal philosophers and their ability of using legal philosophy to solve real and important legal problems. It will have three parts. The first part is to read and discuss great books in modern and contemporary legal philosophy. The second is to discuss major and influential theoretical debates in contemporary legal and moral philosophy, and to discuss the philosophy of different legal areas. The third is to apply legal philosophy to important or new cutting-edge problems facing China and the world.

Pre-requisite: None

LAWS2029 TRANSNATIONAL LAW AND THE LAW MERCHANT

The first part of the course examines transnational private law issues, such as conflicts of laws taking into account the rising role of private actors in creating and implementing legal standards. These actors include multinational corporations, industry associations, non-governmental organisations and adjudicative bodies created by non-state actors. The second part of the course focuses on the body of customary rules and principles related to merchants and commercial transactions constituting *lex mercatoria*.

Pre-requisite: None

LAWS2030 COMPARATIVE COMMERCIAL CONTRACTS

The course focuses on the contract law using a comparative approach by studying EU, American, Asian and African countries' legislation, court jurisprudence and doctrine. The course also covers the general part of the contract law, including conclusion of contract, interpretation, performance, and remedies for breach. The course also aims to enhance students' proficiency in handling the multitude of concepts, doctrines, normative requirements and customary practices in this diversified field of law.

Pre-requisite: None

LAWS2031 CROSS BORDER INSOLVENCY LAW

Insolvency law has been traditionally conceived as a last resort mechanism intended to distribute economic loss and avoid further insolvencies. This legal field started to draw renewed attention with the approval of the 1997 Model Law on Cross-Border Insolvency by UNCITRAL. Later, this UN agency has cooperated with the World Bank to develop the Insolvency and Creditor Rights Standard which works in combination with the World Bank Principles for Effective Insolvency and Creditor/Debtor Regimes, and the 2004 UNCITRAL Legislative Guide on Insolvency Law.

The course will pay attention to the evolution of Cross-Border Insolvency Regimes by examining the history, objectives, policies, and principles behind modern insolvency law.

Pre-requisite: None

LAWS2032 INTERNATIONAL AIR AND SPACE LAW

This course aims to bring together the study of legal regimes governing air and outer spaces. Firstly, international air law will be introduced including its sources, international organizations, the jurisdiction and legal control of different air spaces. Freedoms of the air, air traffic rights, safety and security norms, and liability in air transportation will be examined specifically. Secondly, the course will study the law governing outer space activities including space launches, space tourism, liability for damages and the contemporary legal issues. Finally, the course will introduce the air law and legal issues facing the outer space activities of specific states.

Pre-requisite: None

LAWS2033 INTERNATIONAL TAXATION AND ANTI-MONEY LAUNDERING LAW

This course studies international taxation and anti-money laundering law. The first part examines legal rules determining tax residency, tax liability, taxing rights and jurisdiction. It explores the principles of international taxation, regulation of transfer pricing, emergence of tax havens, inclusive framework on base erosion and profit shifting (BEPS) and standards of double taxation treaties. The second part explores the nexus between tax crimes and money laundering by studying the principles and standards of anti-money laundering regimes and the role of Financial Action Task Force. It ends by analysing contemporary developments in both fields and its manifestation in domestic context.

Pre-requisite: None

LAWS2034 GLOBAL RISK MANAGEMENT AND INSURANCE LAW

This course is an introduction to fundamental global risk management and insurance law principles as essential components of global business operations and personal risk management. Topics include risk identification, risk analysis, global risk exposures, insurance legal principles, loss prevention, and safety concepts, and the social and economic relevance of risk management and insurance law.

Pre-requisite: None

LAWS2035 COMPARATIVE COMPANY LAW

The course is based on earlier acquired knowledge and competencies concerning company law, and introduces differences and similarities between various company law systems. It discusses corporate governance solutions developed by different jurisdictions and legal traditions, and explain instances of divergence or convergence of the legal rules that can be observed. The course identifies general trends and trajectories in development of corporate governance by examining advanced cases on a comparative and interdisciplinary basis.

Pre-requisite: None

LAWS2036 LAW OF SECURITIES AND NEGOTIABLE INSTRUMENTS

The main purpose of this course is to make students understand the basic concepts, theoretical knowledge and legal provisions involved in the securities law and provide students with clear clues to the issuance and trading process of securities and help them understand the institutions involved.

Pre-requisite: None

LAWS2037 COMPETITION LAW (CONSUMER PROTECTION AND INNOVATION)

The course focuses on the fundamental principles and general rules of competition law in China, with extensive use of the case studies. It covers unilateral and collusive anti-competitive practices and acts of unfair competition. The course also includes closely related issues of consumer protection and innovation. The study of competition law will also involve other subjects, such as civil liability law and economics of industrial organization.

Pre-requisite: None

LAWS2038 TRUST LAW

This course will focus on the theories of trust law, aiming at enabling students to understand the whole process of trusts from establishment to termination. The course mainly includes the following topics: Establishment of Trust; Property of Trusts; Parties to the Trust and Public trust.

Pre-requisite: None

LAWS2039 LEGAL CLINIC

In this course, the students will through handling hypothetic cases under the supervision of the course coordinator develop lawyering skills such as interviewing, negotiation, communication, facts investigation, legal research and analysis, applying the legal theories and principles to the real client case or situation, legal writing and drafting, as well as professional ethics and responsibilities.

Pre-requisite: None

LAWS2040 E-COMMERCE AND INFORMATION TECHNOLOGY LAW

With the growing scale of global e-commerce, relevant legislation has been developed to regulate e-business and deal with legal disputes on e-commerce and information technology. This course will introduce fundamental theories of e-commerce and information technology law, explore distinct norms in different jurisdictions, and exam how to protect the rights of different subjects in e-commerce activities, etc. The course includes case studies and discussions on emerging legal issues associated with the use of new information technology.

Pre-requisite: None

LAWS2041 LAW OF LEGISLATION

This course will discuss the China's system of legislation, the allocation of legislative powers, the procedure of law-making, and the hierarchy of validity of different legal norms, etc. Its chief aim is to teach students how to find applicable laws for different cases and situations, and how to correctly apply laws to different cases and situations.

Master of Science

• Electrical and Computer Engineering

	Credits
Compulsory Courses:	
ECEN7002 Advanced Mathematics	3
ECEN7998 Project Report	6
Required Electives:	
7 Required Electives chosen from the List of Required Electives	21
Grand Total:	30
OR	
Compulsory Courses:	
ECEN7002 Advanced Mathematics	3
ECEN7997 Internship and Report*	3
Required Electives:	
8 Required Electives chosen from the List of Required Electives	24
Grand Total:	30

**The number of hours for Internship is 720.

List of Required Electives for MSc in Electrical and Computer Engineering

ECEN7003	Microelectronic Circuit Design	3
ECEN7004	Digital Signal Processing	3
ECEN7005	Active Network Theory	3
ECEN7006	Advanced Topics in Control Systems	3
ECEN7007	Advanced Topics in Simulation	3
ECEN7008	Expert Systems	3
ECEN7009	Microelectronics for Telecommunication and Signal Processing	3
ECEN7010	Laser and Semiconductor Physics	3
ECEN7011	Advanced Topics in Telecommunications	3
ECEN7018	Flexible Alternative Current Transmission System	3
ECEN7019	Embedded System	3
ECEN7020	Advanced Topics in Analog and Mixed-Signal Integrated Circuits	3
ECEN7021	Biomedical Transducers and Instruments	3
ECEN7022	Electrochemical Energy Conversion and Storage	3
ECEN7023	Special Topics in Biomedical Engineering	3
ECEN7024	Medical Imaging Systems	3
ECEN7025	Modeling and Theoretical Analysis for Communication Systems	3

CISC7002	Computer Communications and Networks	3
CISC7102	Computer Networks and Internet	3
CISC7109	Internet Security and Cryptography	3
CISC7110	Electronic Payment Systems	3
CISC7111	Smart Card Technology & Applications	3

Remarks:

In order to obtain a total of 30 credits to complete the programme, students must take:

- 1 compulsory course from Table 1 to obtain 3 credits, 7 required electives from Table 2 to obtain 21 credits, and "Project Report" from Table 3 to obtain 6 credits, OR
- 1 compulsory course from Table 1 to obtain 3 credits, 8 required elective from Table 2 to obtain 24 credits, and "Internship and Report" from Table 3 to obtain 3 credits.

3 Required Electives 9

2 Free Electives 6

Total Credits: 27

Grand Total: 129

List of Required Electives*

Stream A: Data Science and Artificial Intelligence

CISC3005	Advanced Database Systems	3
CISC3012	Artificial Intelligence	3
CISC3014	Information Retrieval and Web Search	3
CISC3018	Cloud Computing and Big Data Systems	3
CISC3023	Machine Learning	3
CISC3024	Pattern Recognition	3
CISC3025	Natural Language Processing	3

Stream B: Multimedia Computing

CISC3009	Computer Graphics	3
CISC3011	Digital Image Processing	3
CISC3016	Multimedia Computing	3
CISC3021	Multimedia Forensics and Security	3
CISC3024	Pattern Recognition	3
CISC3029	Computer Vision	3

Stream C: Software Engineering

CISC2007	Human-Computer Interaction	3
CISC2008	Object-Oriented Analysis and Design Patterns	3
CISC3010	Distributed Computer Systems	3
CISC3020	Formal Software Specification	3
CISC3022	Software Testing	3
CISC4002	Software Project Management	3

Other Electives:

CISC2004	Compiler Construction	3
CISC3006	Computer Based Simulation	3
CISC3007	Formal Languages and Automata	3
CISC3015	Data and Information Visualization	3
CISC3017	Bioinformatics	3
CISC3019	Competition Programming and Problem Solving	3
CISC3027	Special Topics in Computer and Information Science	3
CISC3028	Entrepreneurship in Computer Science	3
CISC4003	Information Security	3

Remarks:

- * Students are required to take 4 courses from one of the Stream A, B or C, and 3 courses from outside that Stream or from Other Electives in the List of Required Electives.

Bachelor's Degree Programmes

Bachelor of Science

• Electrical and Computer Engineering

Year I		Credits
ECEN1001	Introduction to Electrical and Computer Engineering	1
ECEN1003	Information Technology Revolution and Electronics	1
ECEN1004	Embedded Systems	3
ECEN1005	Circuit Analysis	4
ECEN1011	Digital Systems	3

1 course from area of Literature and Humanities		3
1 course from area of Society and Behaviour		3
Total Credits:		34

	Credits
Grand Total:	141

List of Required Electives^

Group A: Biomedical Engineering

ECEN2009	Biology	3
ECEN3003	Introduction to Biomedical Engineering	3
ECEN3004	Fundamental Bio-Electricity	3
ECEN3005	Biomedical Electronics	3
ECEN3006	Introduction to Biomedical Signal Analysis	3
ECEN4004	Biomedical Measurement and Instrumentation	3
ECEN4005	Introduction to Biomedical Imaging	3

Group B: Electric Power Engineering and its Automation

ECEN3007	Power Electronics	3
ECEN3009	Power Quality and Energy Saving	3
ECEN3010	Power Electronics Design and Implementation	3
ECEN3011	Electric Drive	3
ECEN4006	Renewable Energy Conversion	3

ECEN4007	Power System Design and Implementation	3
----------	--	---

Group C: Microelectronics Discipline

ECEN3017	Analog Integrated Circuit Design	3
ECEN3018	Introduction to Data Converters	3
ECEN3019	Introduction to Radio-Frequency Circuits and Systems	3
ECEN3020	Advanced Topics in Analog and Mixed-Signal Integrated Circuit Design	3
ECEN3022	Advanced Integrated Circuit Design for Internet of Things Systems	3

Group D: Wireless Technology Discipline

ECEN3012	Principles of Communication Systems	3
ECEN3013	Radio Frequency and Microwave Techniques for Wireless Systems	3
ECEN3014	Antenna Theory and Applications in Wireless Communications	3
ECEN3015	Cellular Communication Network Design and Optimization	3
ECEN3016	Introduction to Wireless Technology for Digital Game	3
ECEN4008	Introduction to Wireless Sensing Network	3
ECEN4009	Microwave and Millimeter Wave System Design	3

Group E: Internet of Thing Engineering and Intelligent Control

ECEN3023	Intelligent Methods for Electrical and Computer Engineering	3
ECEN3024	Fundamentals of Internet of Things	3
ECEN3025	Internet of Things Workshop	3
ECEN3026	Data Analytics for Electrical and Computer Engineering	3

Group F: General and Mathematics

ECEN1006	Engineering and Society	3
ECEN2006	Numerical Method and Computation	3
ECEN2010	Semiconductor Device Physics	3
ECEN2011	Introduction to Electro-Robot Design	3
ECEN3021	Multimedia Technology	3
ECEN4002	Digital Control	3
ECEN4003	Special Topic in Electrical and Computer Engineering	3

Remarks:

^ Students are required to select 10 courses in the above Required Elective Course Groups with the following rubrics:

- 1 course from each of Group A-F 18
- 1 more course from one of the Discipline Group A-E 3
- 3 more courses freely selected from any of the Groups A-F 9

Total: 30

List of Required Electives^

Stream A – Building Services

EMEN3008	Air Conditioning and Refrigeration	3
EMEN3012	Electrical Services - Wiring and Installations	3
EMEN3018	Intelligent Buildings	3
EMEN3025	Fire Protection Engineering	3
EMEN3030	Special Topics in Electromechanical Engineering I	3
EMEN3036	Extra-low-voltage Electrical Systems in Buildings	3
EMEN3037	Facility Management	3
EMEN3038	Lighting Technology	3

Stream B – Energy, Engineering Design & Control

EMEN3009	Applications of Vibration and Noise Control	3
EMEN3010	Computer Technology in Engineering	3
EMEN3013	Electromechanical Energy Conversion	3
EMEN3014	Electronics and Instrumentation	3

EMEN3015	Finite Element Techniques in Engineering	3
EMEN3016	Fundamentals of Automotive Engineering	3
EMEN3019	Internal Combustion Engines	3
EMEN3023	Computational Fluid Dynamics	3
EMEN3026	Robotics	3
EMEN3028	Optimization Techniques and Their Applications in Engineering	3
EMEN3031	Special Topics in Electromechanical Engineering II	3
EMEN3033	Theory of Mechanisms	3
EMEN3035	Electric Vehicles	3
EMEN3040	Nonlinear Dynamics and Chaos	3
EMEN3041	Selection of Materials for Engineering Design	3
EMEN3042	Sensors and Actuators	3
EMEN3045	Thermal Energy Transportation in Porous Media	3

Stream C – Materials, Manufacturing & Engineering Management

EMEN3006	Advanced Manufacturing	3
EMEN3007	Advanced Materials for Engineering	3
EMEN3011	Corrosion, Wear and Degradation of Materials	3
EMEN3017	Industrial Data Management	3
EMEN3024	Engineering Management	3
EMEN3027	Mechanical Behaviour of Engineering Materials and Basic Failure Analysis	3
EMEN3029	Production Systems, Planning and Control	3
EMEN3032	Special Topics in Electromechanical Engineering III	3
EMEN3034	Creative Industry	3
EMEN3039	Mechanical Processing of Materials	3
EMEN3043	Statistics and Probability for Engineering	3
EMEN3044	Surface Engineering and Coating Technology	3

Remarks:

- ^ Students are required to select at least one Required Elective from each stream and the rest can be from Stream A, B or C.

Course Description

DOCTORAL DEGREE PROGRAMMES

CIVL8001 ADVANCED TOPICS IN CIVIL ENGINEERING

Any specialized topics in Civil Engineering chosen by staff members who have experience in that particular field, but the topics are not covered by other postgraduate courses.

Pre-requisite: None

CIVL8999 DOCTORAL THESIS

An independent investigation under the supervision of a faculty staff member.

Pre-requisite: None

CISC8001 ADVANCED TOPICS IN COMPUTER SCIENCE

Any specialized topic in Computer Science chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses.

Pre-requisite: None

CISC8999 DOCTORAL THESIS

An independent investigation under the supervision of a faculty staff member.

Pre-requisite: None

ECEN8001 ADVANCED TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING

Any specialized topic in Electrical and Computer Engineering chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses.

Pre-requisite: None

ECEN8999 DOCTORAL THESIS

An independent investigation under the supervision of a faculty staff member.

Pre-requisite: None

EMEN8001 ADVANCED TOPICS IN ELECTROMECHANICAL ENGINEERING

Any specialized topic in Electromechanical Engineering chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses.

Pre-requisite: None

EMEN8999 DOCTORAL THESIS

An independent investigation under the supervision of a faculty staff member.

Pre-requisite: None

MATH8001 ADVANCED TOPICS IN MATHEMATICS

Any specialized topic in Mathematics chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses.

Pre-requisite: None

MATH8999 DOCTORAL THESIS

An independent investigation under the supervision of a faculty staff member.

Pre-requisite: None

STGC8002 RESEARCH WRITING

The course focuses on helping students to make academic presentations whether verbally (as in a conference) or in writing (as in a paper). Topics include:

- How to structure a presentation (on paper and in power point)
- Tenses used in various parts of a paper presentation
- How to structure clear logical paragraphs
- How to be concise

- How to avoid ambiguity and different writing styles (for example, conventions for use of numbers, abbreviations, etc.)

Pre-requisite: None

STGC8003 RESEARCH METHODS AND ETHICS

This course aims to provide PhD students with research skills that are essential to become a successful researcher. The need for research ethics and the responsibility of the researcher (the student) and to avoid committing acts of academic dishonesty (such as through using citations and references). The topics of this course will include research methodology, professional ethics and academic integrity, and oral presentation and paper writing techniques. Students will be required to perform a literature survey, to construct a research proposal, and to write a paper summary in the style of formal scientific paper, in one of their familiar research topics.

Pre-requisite: None

MASTER'S DEGREE PROGRAMMES

CIVL7001 ADVANCED MATHEMATICS

This course introduces the methods for numerical analysis in science and engineering. It includes the mathematical modeling and error analysis, methods for the solutions of linear and nonlinear algebraic equations, optimization, numerical differential derivation and integration, curve fitting, numerical solutions of ordinary and partial differential equations.

Pre-requisite: None

CIVL7002 THEORY OF ELASTICITY AND PLASTICITY

This course intends to provide students a comprehensive knowledge on the theory of elasticity and plasticity. The course focuses on the following topics: continuous medium, Cartesian tensors, deformation, displacement and strain tensors, compatibility conditions, external and internal forces, equilibrium, stress tensors, principal stresses, invariants and stress deviators, Mohr's circle, constitutive law, plasticity theory, yield and failure criteria, stability postulates, laws of mechanics, Navier's equations, plane stress and plane strain problems, variational principles, general theory of plane strain for perfectly plastic materials.

Pre-requisite: None

CIVL7003 FINITE ELEMENT METHOD

Basic concepts. Virtual work and energy methods. Weighted residual methods. Rayleigh-Ritz and Galerkin methods. Finite element displacement method. Interpolation functions. Plate stretching and plane strain. Triangular elements. Isoparametric elements. Three dimensional stress analysis. Plate bending. Field problems. Vibrations. Stability. Nonlinear behaviour. Hybrid elements.

Pre-requisite: None

CIVL7004 ADVANCED SOIL MECHANICS

The emphasis of this course is on the practical knowledge of soil behavior required by civil engineers for design and construction of geotechnical projects. Two most important topics of soil mechanics, consolidation and shear strength of soils, will be discussed in detail.

Pre-requisite: None

CIVL7005 SUBSURFACE INVESTIGATION AND SOIL TESTING

The aim of this course is designed to provide postgraduate civil engineering students an advanced knowledge of geotechnical site investigation and soil testing. It includes site investigation procedures, planning and reporting, methods of subsurface investigation; ground or soil exploration includes boring, sampling soils and rocks; description and classification of soils and rocks, determination of stratigraphy and engineering properties by different types of field tests and laboratory tests; estimation of soil properties for foundation design and geophysical methods for site investigation.

Pre-requisite: None

CIVL7006 ADVANCED FOUNDATION ENGINEERING

Shallow foundations. Bearing capacity of foundations on homogeneous soils and layered soils. Estimation of settlements. Measures to minimize damage. Analysis of combined footings and rafts. Pile foundations. Piles subjected to lateral loads. Displacement of pile group under axial and lateral loads. Foundation design for fills. Foundations for transmission towers.

Pre-requisite: None

CIVL7007 SOIL DYNAMICS

Dynamics of elastic systems. Single and multi-degree of freedom systems. Wave propagation in soil. Deformation and elastic properties of soils. Types of machine foundations. Mass-spring-dashpot model and elastic half space theory. Foundations for reciprocating machines and hammer foundations. Construction aspects of machine foundations. Foundations for miscellaneous machines. Vibration isolation and dampers.

Pre-requisite: None

CIVL7008 STRUCTURAL DESIGN OF FOUNDATIONS

Conventional structural design of continuous footings, individual footings, combined footings and rafts of various types subjected to vertical loads, lateral loads and moments. Design of circular rafts. Soil-structure interaction and design of foundation using flexibility approach. Structural design of piles and pile caps, under-reamed piles piers and caissons. Structural design of retaining structures.

Pre-requisite: None

CIVL7009 SPECIAL TOPICS IN GEOTECHNICAL ENGINEERING

This is a course for postgraduate students to understand the principles of geotechnical earthquake engineering. The basic concepts of seismology will be covered. Basic principles of wave propagation and ground response analysis will be presented. Advanced topics including liquefaction and seismic slope stability will also be covered.

Pre-requisite: None

CIVL7010 STRUCTURAL VIBRATIONS

This course introduces fundamental concepts of structural dynamics. It serves as an introductory course for graduate students in civil and mechanical engineering. This course starts from fundamental concepts and formulation of structural dynamic problems. Then, analysis in time-domain and frequency-domain will be introduced. Numerical methods will be delivered with consideration in accuracy, efficiency and stability.

Pre-requisite: None

CIVL7011 PLATES AND SHELLS

Basic concept of plates and shells will be introduced such as small deflection theory of elastic thin plates, rectangular plates, circular plates, plates on elastic foundation, in plane forces, buckling of plates, large deflections of plates, membrane theory of shells, bending theory of shells, shallow shells, cylindrical shells, buckling of shells.

Pre-requisite: None

CIVL7012 STRUCTURAL ANALYSIS AND FINITE ELEMENTS

This course focuses on the following topics: finite element modeling for analysis of tall buildings, frame structure, shear wall structure, wall-frame structure, space structure, core structure, and core wall structure, tube structure, outrigger-braced structure, giant structure, stability and dynamics of structures, the analysis and behavior of various structures.

Pre-requisite: None

CIVL7013 SPECIAL TOPICS IN STRUCTURAL ENGINEERING

Members of the staff will arrange special courses on advanced topics for properly qualified graduate students.

Pre-requisite: None

CIVL7014 NUMERICAL MODELING IN GEOMECHANICS

This course introduces constitutive models of soils and numerical modeling in geotechnical engineering. Soil constitutive models, such as Linear Elastic, Elasto-Plastic, Nonlinear and Cam-Clay models are discussed. Basic background of the finite element (FE) technique is briefly introduced with emphasis on geotechnical applications. A finite element commercial program (PLAXIS or SIGMA/W) is introduced to students to analyze geotechnical problems. The course aims to provide students essential knowledge on soil behavior, numerical modeling, and their applications in geotechnical engineering.

Pre-requisite: None

CIVL7015 RANDOM VIBRATIONS OF STRUCTURES

This course focuses on the following topics: random variable; random process; correlation function; power spectral density function; properties of linear systems; response of linear SDOF systems to random excitation; responses of linear MDOF systems to random excitation; probability density responses of linear systems; reliability analysis of linear systems; introduction to nonlinear random vibrations.

Pre-requisite: None

CIVL7016 BEHAVIOR AND DESIGN OF STEEL MEMBERS

This course is designed to introduce the behaviour and design of steel structural members according to the limit states design concept. The behaviour and design of the following topics will be discussed: (1) Steelmaking, Steel Properties, Design Philosophy, (2) Torsion of beam (St. Venant torsion, warping torsion of W-shapes, solution of torsion problem), (3) Beam (Beam classifications - Bending moment and shear capacity. Lateral torsional buckling), (4) Plate Girders (Local buckling, plastic action and moment redistribution, lateral buckling under uniform moment and special loading cases, inelastic effects, elastic and inelastic shear behaviour of plate girder), (5) Axially Loaded Members (Elastic and inelastic buckling theories, effect of residual stresses and initial curvature, local buckling), (6) Beam-Columns (In-plane behaviour, ultimate strength, out-of-plane behaviour, elastic and inelastic stability, local buckling). Students are expected to obtain advance knowledge about the design and failure mode of steel structural members after finished this course.

Pre-requisite: None

CIVL7017 GROUND IMPROVEMENT TECHNIQUES

Soil densification, Compaction Control Tests, Preloading and use of vertical sand drains, In-situ reinforcement- stone columns, soil nailing, micropiles, ground anchors, rock bolts, Flexible Geosynthetic sheet reinforcement.

Pre-requisite: None

CIVL7018 LANDSLIDES MECHANISMS, MITIGATION AND RISK ASSESSMENT

Under the influence of climate change and urban development, landslides are becoming one of the most common natural hazards in China and around the world. In this course, landslide (debris flow) disasters will be the major focus. Mechanisms, process, mitigation measures and risk assessment will be discussed. The course will arise the students' awareness and prepare necessary background knowledge for them to manage coastal safety targeting landslide disasters.

Pre-requisite: None

CIVL7019 SPECIAL TOPICS IN GEOTECHNICAL ENGINEERING I

This course explores current special topics in geotechnical engineering, such as site characterization, instrumentation, ground improvement and remediation. Topics vary with each offering and are disseminated before registration.

Pre-requisite: None

CIVL7020 SPECIAL TOPICS IN STRUCTURAL ENGINEERING I

Members of the staff will arrange special courses on advanced topics for properly qualified graduate students.

Pre-requisite: None

CIVL7021 SPECIAL TOPICS IN STRUCTURAL ENGINEERING II

Members of the staff will arrange special courses on advanced topics for properly qualified graduate students.

Pre-requisite: None

CIVL7022 ADVANCED COMPUTATIONAL METHODS: PRINCIPLES AND APPLICATIONS

This is an introductory course on advanced computational methods for civil and coastal dynamical system analysis. The methods are potentially applied to coastal city vulnerability and resilience analysis, system modeling and updating, dynamical system identification, structural reliability and control, statistical analysis and uncertainty quantification, and more. Students will learn foundational knowledge and principles of advanced computational methods. Also, the students will be equipped with exploring state-of-the-art computational tools and methods to enter the corresponding research fields.

Pre-requisite: None

CIVL7023 ECONOMIC ANALYSIS AND FINANCIAL MANAGEMENT IN ENGINEERING

The course is to cover the fundamental principles needed by construction managers to successfully manage the finances of construction companies. These principles include accounting for financial resources, managing costs and profits, managing cash flows and analyzing financial alternatives.

Pre-requisite: None

CIVL7024 FRACTURE MECHANICS AND FATIGUE

Linear elastic fracture mechanics, Concept of Stress intensity factor, Correction factors of stress intensity factor, Numerical methods for stress intensity factor determination, Introduction to the elastic plastic fracture mechanics. Assessment of residual life of structural members.

Pre-requisite: None

CIVL7025 RELIABILITY ANALYSIS IN CIVIL ENGINEERING

This course focuses on the following topics: development of design code in civil engineering, randomness in civil engineering, limit state design and performance function, reliability analysis, reliability-based design criteria and factors in design codes, system reliability, further development and research topics on reliability analysis in civil engineering.

Pre-requisite: None

CIVL7026 INSTRUMENTATION SYSTEMS IN CIVIL ENGINEERING

This course is designed to introduce the concept and application of instrumentation system in Civil Engineering. The following topics will be discussed in the class: (1) Instrumentation systems, Signals and Errors, (2) Characteristics of instruments – Transducers, Noise and Nonlinearity, Static characteristics, Dynamic characteristics, (3) Signal conditioning – Introduction, Operating amplifier, Applications of Op-amps, filtering, (4) Data acquisition – Analog devices, Digital Devices, Sampling Theorem, Nyquist frequency, Quantization error, (5) Noise Reduction – Interference, Shielding, Grounding, Noise mode, Noise elimination or reduction, (6) Instruments and Sensors – Strain gauge, LVDT, Pressure transducer, Load cell (7) Signal Processing – Sampling Theorem, Laplace-transform and Z-transform. Students are expected to obtain knowledge about the background theory and application of different type of instruments used in Civil Engineering.

Pre-requisite: None

CIVL7027 CONSTITUTIVE MODELING IN SOIL MECHANICS

Constitutive modelling is an important subject in continuum mechanics. This course focuses on the physical and mathematical principles of constitutive modelling with emphasis on soil mechanics. Elasticity and plasticity frameworks for isotropic and anisotropic soil modelling are discussed. Critical state hardening models such as the original Cam clay and modified Cam clay are elaborated in details. The concept of bounding surface and more advanced state-dependent

dilatancy models are introduced. The course aims at providing students a fundamental understanding of the constitutive modelling techniques in soil mechanics.

Pre-requisite: None

CIVL7028 ANALYSIS AND DESIGN OF REINFORCED CONCRETE MEMBERS

This course intends to provide students the knowledge on both analytical and design aspects of reinforced concrete and prestressed concrete members. The course focuses on the following topics: the analysis and design of both statically determinate and indeterminate prestressed concrete members, the analysis and design of prestressed concrete composite sections, the limit analysis of reinforced concrete slabs, and the strut-and-tie method.

Pre-requisite: None

CIVL7029 HYDRODYNAMICS AND FLOODS

In the context of coastal environment and urban safety, this course introduces the fundamentals and topics of fluid mechanics. In addition, analytical and numerical methods for predicting flood hazards will be introduced.

Pre-requisite: None

CIVL7030 COASTAL FLUID MECHANICS AND STORM SURGE

This course provides understanding on the physical processes in the coastal regions, where between the continental slope of marginal sea and land. The course starts with basic principle of the current and mass transport, then towards their applications in coastal marine system, which including the features of estuary circulation, shelf Ekman current, tide, geostrophic effect and the underlying forcing mechanisms. The formation of storm surge and the disaster prevention in the coastal regions will be introduced.

Pre-requisite: None

CIVL7031 SEDIMENT TRANSPORT AND EROSION

This course aims to introduce fundamental mechanics of sediment transport in oceans, coastal areas, and rivers, and practical tools for sediment-related problems. It talks about sediment dynamics and coastal sediment-related problems, especially coastal erosions. Edge-cutting studies on related topics and tools for solving sediment problems are introduced.

Pre-requisite: None

CIVL7032 MUNICIPAL SOLID WASTE MANAGEMENT

Integrated Solid Waste Management: Throughout this course, the management of our society's waste will be covered in a manner that meets public health and environmental concerns and the public's desire to reduce, reuse, and recycle waste materials. The engineering principles, the data, the engineering and scientific formulas, and examples of the day-to-day issues associated with the management of municipal solid waste (MSW) will be discussed. Starting from the introductory materials in integrated MSW, materials recovery, processing, and waste transformation, and integrated MSW policy issues will also be covered. Eventually the reflective and logical way of thinking regarding the problems and solutions in solid waste engineering will be nourished.

Pre-requisite: None

CIVL7033 ENVIRONMENTAL CHEMISTRY

Many aspects of environmental engineering involve the treatment of water for human consumption and the treatment of wastes prior to their release into the environment. In addition, an understanding of the chemical fate of pollutants in the environment is important. Water chemistry and chemical reactions are therefore important in both engineered treatment processes and in natural systems in which wastes may be attenuated.

Pre-requisite: None

CIVL7034 COASTAL WATER TREATMENT PRINCIPLES AND PROCESSES

This course focuses on the fundamental principles in the design and operation of key technologies in coastal water and wastewater treatment. The principles of physics, chemistry, and biology are

covered, as well as the processes of treatment and the issues that arise from their application. Moreover, through the case study, the current state of this field, as well as relevant research topics, will be introduced.

Pre-requisite: None

CIVL7035 WATER POLLUTION CONTROL: PHYSICAL AND CHEMICAL MODELING

Carbonate buffering systems of natural waters: acid and base equilibrium; Inorganic species in natural waters: solid dissolution and precipitation equilibrium; Metal behavior in natural waters: metal-ligand complex formation; Redox reactions in natural waters: equilibrium and kinetics; Particulate matters in natural waters: aqueous surface chemistry.

Pre-requisite: None

CIVL7036 ENVIRONMENTAL ASSESSMENT AND PLANNING: COMPUTER MODELING

General methods for environmental assessment and planning: pollution monitoring, pollution source and pathways, impacts on environment, pollution control; Linear and non-linear multi-objectives programming; Regional planning of air and water pollution control; Urban development vs. environmental planning.

Pre-requisite: None

CIVL7037 AIR POLLUTION CONTROL

Air quality and meteorological conditions; Air pollution index and indicators; Air pollution control: strategies and technologies; Aerosols; Vehicular emission pollution; Toxic organic air pollution; Global environmental issues: acid rain; global warming; ozone depletion.

Pre-requisite: None

CIVL7038 SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING

(Subtitle: Biological Wastewater Treatment)

Principles of microbiological, biochemical, and biophysical processes used in environmental waste treatment and remediation processes, with particular emphasis on water quality control processes.

Pre-requisite: None

CIVL7039 AIR POLLUTION METEOROLOGY AND CHEMISTRY

It is designed to provide a rigorous, comprehensive treatment of the chemistry of air pollutants in the ambient air, the meteorology of air pollution, and the transport, diffusion and removal of the pollution species in the atmosphere. In this course, students will learn the methods and models, which would allow to predict the concentration profile that would result from any specified set of pollution emissions for any specific meteorological conditions at any location for any period.

Pre-requisite: None

CIVL7040 SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING I

(Subtitle: Remediation of Contaminated Soil and Groundwater)

This course will nourish students with their capabilities of selecting and/or developing remediation technologies appropriate for the causes and characteristics of contamination of the subsurface environment, soil and groundwater. This course will especially be focused on studying the causes of contamination of soil and groundwater, the characteristics and behaviors of contaminants, and the physical / chemical / biological / thermal remediation technologies.

Pre-requisite: None

CIVL7041 SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING II

(Subtitle: Physical and Chemical Water Treatment)

Physical-chemical treatment processes for the treatment of water, including sedimentation, flotation, filtration, coagulation, oxidation, disinfection, precipitation, adsorption, and membrane treatment processes. Current issues in drinking water quality and treatment are discussed.

Pre-requisite: None

CIVL7042 SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING III

(Subtitle: Environmental Biotechnology)

This course reflects the most current and exciting fields of environmental science engineering, as a combination of ET (Environmental Technology) and BT (Bio-Technology) and would enable students first to connect two different facets of environmental biotechnology, principles of environmental microbiology and environmental engineering. They can develop the basic concepts and quantitative tools in the principles part and then can apply those in the applications part. They will be able to, in the long run, exploit microbiological processes to improve environmental quality, such as preventing the discharge of pollutants into the environment, cleaning up contaminated environments, and recovering valuable resources for human society. For students not already having a solid background in environmental microbiology, this course will also provide fundamentals in taxonomy, metabolism, genetics, and microbial ecology, by addressing the microbiology concepts that are most essential for understanding the principles and applications of environmental biotechnology.

Pre-requisite: None

CIVL7043 QUANTITATIVE METHODS FOR CONSTRUCTION DECISION MAKING

This course aims to provide sound and comprehensive coverage of the concepts of quantitative methods for construction decision making. Major topics include: (1) analytic hierarchy process (AHP), (2) decision tree analysis, (3) inventory analysis, (4) simulation techniques, (5) linear, mixed-integer and goal programming, (6) dynamic programming.

Pre-requisite: None

CIVL7044 QUALITY AND SAFETY MANAGEMENT IN CONSTRUCTION

This course aims to provide sound and comprehensive coverage of the concepts of quality management and safety management for the construction industry of Macau, as compared to their international practices. Major topics include: (1) quality management system based on ISO9000, (2) QA/QC in construction, (3) quality indicators and quality costs, (4) safety management systems, (5) construction accidents, (6) safety schemes.

Pre-requisite: None

CIVL7101 INTRODUCTION TO OCEANOGRAPHY

This course is designed to introduce students to important concepts and fundamental principles in the study of the oceans and basic oceanographic research. Topics cover chemical, geological, physical and biological oceanography, as well as basic concepts in marine resource and marine environmental management.

Pre-requisite: None

CIVL7102 MARINE ECOLOGY

This course presents the fundamental principles and advanced topics on the ecology of marine biodiversity and ecosystems. It focuses on processes and patterns that are specific to the marine environment, including the dynamics of estuarine and coastal ecosystem, the drivers of primary and secondary productivity, dynamics of coral reef ecosystem.

Pre-requisite: None

CIVL7103 AQUATIC CHEMISTRY

Many aspects of coastal environmental process involve in-depth understanding of aquatic chemistry principles. In addition, aquatic chemistry knowledge is of vital importance to pollution control and remediation in coastal areas. Water chemistry and chemical reactions are therefore important in both engineered treatment processes and in natural systems in which wastes may be attenuated.

Pre-requisite: None

CIVL7104 ATMOSPHERIC CHEMISTRY

This course is designed to provide some fundamentals of meteorological phenomena and chemical processes that affect urban air quality and global climate, with a focus on coastal

environment where anthropogenic emissions and marine air masses interact substantially. It deals with the horizontal and vertical dynamics of air in a global to regional scale, as well as the chemistry occurring during transport of air pollutants. Specifically, the basics of atmospheric radiation and subsequent dynamics for air motion in general and in typical coastal regions will be introduced, as related to air pollution dispersion and the air pollution issues in recent decades.

Pre-requisite: None

CIVL7105 COASTAL POLLUTION: SOURCES, FATE AND EFFECTS OF POLLUTANTS

This course discusses the current state of coastal pollution, focusing on the impact of major pollutants (nutrients, microplastics, and antibiotics, etc.). Meanwhile, it also presents the removal strategies of the major pollutants found in seawater. The objective of this course is to equip graduate students with an understanding of the fundamental concepts and solutions relating to coastal pollution to lay a solid scientific foundation for their future research and work.

Pre-requisite: None

CIVL7106 SPECIAL TOPICS IN HAZARD ALLEVIATION

Members of the staff will arrange special courses on advanced topics on hazard prevention and mitigation in coastal cities to introduce principles and techniques of hazard alleviation to improve urban safety for properly qualified graduate students.

Pre-requisite: None

CIVL7107 SPECIAL TOPICS IN COASTAL ENVIRONMENT

Members of the staff will arrange special courses on advanced topics on coastal environment to introduce research and development in coastal environmental protection and remediation for properly qualified graduate students. It allows students to integrate multiple disciplinary knowledge to analyse scientific and technological problems related to coastal environmental protection and remediation.

Pre-requisite: None

CIVL7197 INTERNSHIP AND REPORT

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor.

Pre-requisite: None

CIVL7198 PROJECT REPORT

Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will learn systematic problem-solving process skills, professional research and development practices, and project management skills. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

CIVL7201 CONSTRUCTION PROJECT MANAGEMENT THEORY AND PRACTICE

The aim of this course is to provide students with an overview of the theoretical and practical tools needed to successfully manage construction projects through feasibility study, design management, tendering, contract administration, time management, cost management, quality management, health and safety management, material and plant management, as well as customer relationship management.

Pre-requisite: None

CIVL7202 CONTRACT MANAGEMENT

This course will introduce to students the knowledge that is required to effectively utilize the contract as a tool to manage a construction project. The focus of the course will be understanding key contract terms and how to apply them when managing an active construction project.

Pre-requisite: None

CIVL7203 ADVANCED CONSTRUCTION PLANNING AND SCHEDULING

This course will introduce to students the principles, methods and tools required for the development and implementation of scheduling in the construction industry. This course will also introduce to students various programming and scheduling techniques suitable for planning of long, medium and short-term projects. Coursework is integrated with hands-on utilization of scheduling software commonly used in the industry and students will develop skills to create a schedule of tasks and activities related to the construction of a building or other structures, to allocate appropriate resources to such construction activities, and to develop schedules of construction activities within the most optimum time and cost. Guest lecturers may be featured for certain topics.

Pre-requisite: None

CIVL7204 BUILDING INFORMATION MODELING (BIM): DEVELOPMENT AND APPLICATION

This course covers topics about the development and application of Building Information Modeling (BIM) in building and construction management. The detailed contents may change depending on current developments and teacher specialization.

Pre-requisite: None

CIVL7205 CONSTRUCTION COST MANAGEMENT

This course covers the study of managing construction project cost in both the pre-contract and post-contract stages. It also covers key tools and techniques used such as value management, risk management and life cycle costing. It provides an introduction to construction cost information and databases; construction cost practices; and total cost control practices for construction projects.

Pre-requisite: None

CIVL7206 INNOVATIVE METHODS AND APPLICATIONS OF INFORMATION TECHNOLOGY IN CONSTRUCTION

This course introduces innovative technologies in the construction industry. It covers the advanced developments in construction management strategies, commercial software and digital tools, industrialization techniques, infrastructural systems and facilities, and novel construction methods and materials.

This course also covers the applications of information technology for construction management. Topics include introduction to both well-established information technology solutions and emerging trends. The course employs a combination of lecture and outside reading, and it depends on demonstrations of various software products in each category.

Moreover, speakers from various construction companies are invited to discuss the latest implementations in representative construction projects.

Pre-requisite: None

CIVL7207 SUSTAINABILITY IN CONSTRUCTION

This course covers the concepts of sustainable development and introduces the sustainable practices used in construction operations. It also covers environmental impact assessment and life-cycle environmental cost analysis when making sustainability decisions. It also covers sustainable construction materials and equipment, traditional and alternative construction processes.

Pre-requisite: None

CIVL7208 SPECIAL TOPICS IN CONSTRUCTION PROJECT MANAGEMENT

Members of the staff will arrange special courses on advanced topics on construction project management to introduce principles, tools and techniques applicable to the management of an active construction project at various phases.

Pre-requisite: None

CIVL7297 INTERNSHIP AND REPORT

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor.

Pre-requisite: None

CIVL7298 PROJECT REPORT

Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will learn systematic problem-solving process skills, professional research and development practices, and project management skills. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

CIVL7996 APPLIED THESIS

An independent project under the supervision of a faculty staff member. The goal of this thesis work is to facilitate the integration of practice with existing academic research or advanced technologies. The project must relate to the subject matter and be agreed by the department.

Pre-requisite: None

CIVL7998 PROJECT REPORT

An independent project carried out under the supervision of a faculty staff member.

Pre-requisite: None

CIVL7997 INTERNSHIP AND REPORT

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor.

Pre-requisite: None

CIVL7999 ACADEMIC THESIS

An independent and original research study under the supervision of a faculty staff member. The topic of research must be in line with the stream taken by the student. In general, the study could result in a technical publication or a presentation at a professional meeting.

Pre-requisite: None

CISC7001 FUNDAMENTALS OF SOFTWARE ENGINEERING

The course discusses the theories, methods and tools of software engineering for developing large and complex software systems. The main contents are requirement, specification, system analysis and modeling, software design, architectural design, object-oriented design, functional-oriented design, verification and validation. Unified Development Process based on Modeling Language (UML) as well as its CASE tool are used to software system analysis and design combining with the course projects.

Pre-requisite: None

CISC7002 COMPUTER COMMUNICATIONS AND NETWORKS

Introduction to computer network high level protocols, internetworking techniques, client server architecture, API for Networking programming, High speed networks and ATM technology, Network management, Mobile and Wireless communication technology. The Important protocols for Internet in TCP/IP suit protocols will be discussed in detail.

Pre-requisite: None

CISC7004 CURRENT DEVELOPMENT IN DATABASE

The course introduces Distributed DBMS architecture, distributed database design, semantic data control, distributed query processing, distributed transaction management, distributed concurrency control, distributed DBMS reliability, database interoperability, e-commerce application development and deployment with HTML, Web server, Java applet, CORBA, JavaBean, and DB server technologies.

Pre-requisite: None

CISC7005 COMPUTER SCIENCE SEMINAR

Under the supervision of academic staff, students will search the literature for a topic in computing that is of interest to them, and give a presentation on the state of the art technology. Visiting researchers and staff members may also present their research work.

Pre-requisite: None

CISC7006 COMPILER CONSTRUCTION

Design of compilers for block-structured general-purpose programming languages. Automatic generation of lexical analyzers and parsers. Error detection and correction. Code optimization.

Pre-requisite: None

CISC7007 DESIGN AND ANALYSIS OF ALGORITHMS

Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, data structure selection. Correctness and analysis of algorithms. Examples drawn from problems in sorting, searching, set manipulation, pattern matching, graphs, matrices, polynomials, and integers.

Pre-requisite: None

CISC7008 COMPLEXITY THEORY

Models of computation, such as Turing machines and random access machines; nondeterminism and alternation. Computable and noncomputable functions. Time and space complexity, complexity hierarchies, NP-completeness, and provably difficult problems. Proof techniques, such as simulation, diagonalization, and reducibility.

Pre-requisite: None

CISC7009 FORMAL METHODS IN SOFTWARE ENGINEERING

Formal models and methods and their application in all phases of software engineering process; operational, algebraic, model-based and property-based specification methods; verification of consistency and completeness of specifications; verification of properties of software; specification construction and verification using method-based tools.

Pre-requisite: None

CISC7010 DISCRETE SYSTEM SIMULATION

Principles of simulation of discrete, event-oriented systems. Model construction, simulation and validation; relationship to other techniques for system analysis and design.

Pre-requisite: None

CISC7011 COMPUTER SYSTEM PERFORMANCE MODELING

Use of queuing network models as tools to evaluate the performance of centralized and distributed computer systems.

Pre-requisite: None

CISC7012 COMPUTER GRAPHICS - PRINCIPLES AND SYSTEMS

This course introduces the generation of graphics by computers with or without human interaction. The contents include hardware and software of computer graphics, graphics modeling, graphical transformations, realistic image synthesis and illumination techniques, interactive methods and user interface, graphics programming languages and systems.

Pre-requisite: None

CISC7013 PRINCIPLES OF ARTIFICIAL INTELLIGENCE

Overview of Artificial Intelligence Application Areas, Languages and Programming Techniques for Artificial Intelligence, Problem Solving, Knowledge-based Systems, Knowledge Representation, Planning, Machine Learning, Natural Language Processing, Genetic Algorithms.

Pre-requisite: None

CISC7014 ADVANCED TOPICS IN COMPUTER SCIENCE

This course introduces students to advanced topics in Computer Science. The detailed contents may change from year to year depending on current developments and teacher specialization.

Pre-requisite: None

CISC7015 ADVANCED TOPICS IN COMPUTER SCIENCE I

To introduce the most advanced technologies in the field of Computer Science.

Pre-requisite: None

CISC7016 ADVANCED TOPICS IN COMPUTER SCIENCE II

To introduce the most advanced technologies in the field of Computer Science.

Pre-requisite: None

CISC7017 PRINCIPLES AND APPLICATIONS OF CONCURRENT PROGRAMMING

The aim of the course is to introduce the principles of concurrency and concurrent programming languages. The main contents are processes, concurrency, synchronous and asynchronous communication, non-determinism, shared variables and resources, deadlock, safety and liveness, event-driven multithreads, real-time distributed and concurrent systems, concurrent programming languages (Java, CSP).

Pre-requisite: None

CISC7018 COMPUTER VISION AND PATTERN RECOGNITION

This course introduces the fundamentals and advanced topics of computer vision and pattern recognition for postgraduate students. It emphasizes both theory and applications of pattern recognition. Topics include overviews of general computer vision and pattern recognition techniques, statistical decision theory, linear discriminant functions, multilayer neural and deep networks, supervised learning, unsupervised learning and clustering, and applications of computer vision and pattern recognition.

Pre-requisite: None

CISC7019 WEB MINING

The course will cover the fundamental concepts, principles and algorithms in the area of Web Mining. It will firstly give an introduction to the concepts of the traditional information retrieval systems and the principles of web search engines, then, the course will extensively discuss techniques and algorithms of web mining, including Link-Base analysis, web page classifications, web advertisement, recommendation algorithms, web information extractions, web image indexing. The course also requires each student to complete a related course project

Pre-requisite: None

CISC7021 APPLIED NATURAL LANGUAGE PROCESSING

This course covers both the fundamental and advanced topics in Natural Language Processing (NLP), which deals with the application of computational models to text data. In this course, the core tasks in natural language processing will be examined, including minimum edit distance, language modelling, Naive Bayes, Maximum Entropy, text classification, sequence labelling, POS tagging, syntax parsing and computational lexical semantics. Modern NLP applications will be explored such as information retrieval, and statistical machine translation. Students will learn how to formulate and investigate research questions on related topics

Pre-requisite: None

CISC7022 BIG DATA PROCESSING AND ANALYSIS

This course introduces the latest development of data engineering techniques, including data query processing (e.g., multi-dimensional data, sequence data, and spatial-temporal data) in cloud computing and HPC environments. Students will learn study and learn how to formulate and investigate the state-of-the-art problems and solutions on related topics.

Pre-requisite: None

CISC7023 INTRODUCTION TO BUSINESS PROCESS MANAGEMENT

The course introduces students to the principles and methods of business process management. Topics include business process modeling foundation, process orchestrations, managing process flows, and process discovery techniques.

Pre-requisite: None

CISC7996 APPLIED THESIS

An independent project under the supervision of a faculty staff member. An applied thesis focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or industrial project. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

CISC7999 ACADEMIC THESIS

An independent and original research study under the supervision of a faculty staff member. An academic thesis is a scholarly written document of a piece of original research on a particular topic in consistent with every detail of research methodology. In general, the study could result in a technical publication or a presentation at a professional meeting.

Pre-requisite: None

CISC7201 INTRODUCTION TO DATA SCIENCE PROGRAMMING

This course is designed for students who are new to the world of data science. After the introduction of some basic arithmetic, variables, and data structures in Python, students will start to learn how to collect and extract data from real datasets. Some data analytical skills using the control flows and Python packages (e.g., NumPy, SciPy, Pandas, etc.) will be introduced. To address the needs of big data processing, some distributed computing frameworks (e.g., Spark) and visualization tools with Python will be discussed. Students may apply some basic learning algorithms with Python packages (e.g., scikit-learn) to extract knowledge from data.

Pre-requisite: None

CISC7202 TOOLS FOR MACHINE LEARNING

The course will start from the very beginning of the ML basis. First, the basic concepts such as linear algebra; probability and information theory, and numerical methods will be introduced. Next machine learning overview, inductive learning, and representation learning will be introduced. Basic deep learning processes are designed as artificial neural network; Bayesian Networks and learning; Deep learning and deep neural networks; convolution neural network. Throughout the course, practical methodology of using tools such as Tensorflow or Karas etc. will be emphasized.

Pre-requisite: CISC7201

CISC7203 DATABASE AND DATA MINING TECHNOLOGIES

This course is designed to enable students to learn the database and data mining concepts and techniques for big data analytics and development in different domains. The course concentrates on the practical issues of database and data mining for solving big data problems. The content includes data modeling in database and data warehouse, SQL, Python programming for database, Python programming and R programming for data mining applications. Students will learn the skills of database modeling, querying, and programming, as well as the programming techniques for data mining.

Pre-requisite: None

CISC7204 DATA SCIENCE AND DATA VISUALIZATION

This course is designed to enable students to learn the significance of data visualization in data science and big data analytics, and develop knowledge and skills to present quantitative data using data visualization tools. This course emphasizes on the practical aspects of data science with a focus on using R or Python programming language to process data, produce visualizations, and interpret these visualizations. Students will learn the practice of data cleaning, reshaping of data, basic tabulations, aggregations and visual representation in order to increase the

understanding of complex data and models.

Pre-requisite: None

Specialization A: Artificial Intelligence Applications

CISC7013 PRINCIPLES OF ARTIFICIAL INTELLIGENCE

Overview of Artificial Intelligence Application Areas, Languages and Programming Techniques for Artificial Intelligence, Problem Solving, Knowledge-based Systems, Knowledge Representation, Planning, Machine Learning, Natural Language Processing, Genetic Algorithms.

Pre-requisite: None

CISC7018 COMPUTER VISION AND PATTERN RECOGNITION

This course introduces the fundamentals and advanced topics of computer vision and pattern recognition for postgraduate students. It emphasizes both theory and applications of pattern recognition. Topics include overviews of general computer vision and pattern recognition techniques, statistical decision theory, linear discriminant functions, multilayer neural and deep networks, supervised learning, unsupervised learning and clustering, and applications of computer vision and pattern recognition.

Pre-requisite: None

CISC7019 WEB MINING

The course will cover the fundamental concepts, principles and algorithms in the area of Web Mining. It will firstly give an introduction to the concepts of the traditional information retrieval systems and the principles of web search engines, then, the course will extensively discuss techniques and algorithms of web mining, including Link-Base analysis, web page classifications, web advertisement, recommendation algorithms, web information extractions, web image indexing. The course also requires each student to complete a related course project.

Pre-requisite: None

CISC7021 APPLIED NATURAL LANGUAGE PROCESSING

This course covers both the fundamental and advanced topics in Natural Language Processing (NLP), which deals with the application of computational models to text data. In this course, the core tasks in natural language processing will be examined, including minimum edit distance, language modelling, Naive Bayes, Maximum Entropy, text classification, sequence labelling, POS tagging, syntax parsing and computational lexical semantics. Modern NLP applications will be explored such as information retrieval, and statistical machine translation. Students will learn how to formulate and investigate research questions on related topics.

Pre-requisite: None

CISC7022 BIG DATA PROCESSING AND ANALYSIS

This course introduces the latest development of data engineering techniques, including data query processing (e.g., multi-dimensional data, sequence data, and spatial-temporal data) in cloud computing and HPC environments. Students will learn study and learn how to formulate and investigate the state-of-the-art problems and solutions on related topics.

Pre-requisite: None

CISC7998 PROJECT REPORT

An independent project under the supervision of a faculty staff member. A Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or industrial project. The goal of this Project Report is to facilitate the integration of practice with academic research.

Pre-requisite: None

CISC7301 INTRODUCTION TO FINANCIAL TECHNOLOGIES

The world of global tourism and entertainment, banking and financial services, as well as logistics

and supply chain are changing rapidly with the emergence of start-up financial technologies, commonly referred to as FinTech, that are not only empowering or disrupting the status quo, but are shaping almost all the services industries. This course will discuss the scope of FinTech that defined by WeBank (ABCD) or by AntFinance (BASIC) as well as how they changed the way people live, how companies operate, and how government regulate. This course will provide students with the latest empowering and practical knowledge on FinTech enabling them to understand some FinTech changes taking place currently and the trends that will impact different industries in the future.

Pre-requisite: None

CISC7302 ALGO TRADING AND HIGH FREQUENCY TRADING

Program trading and high frequency trading (HFT) have become important to the financial industry that it generated over sixty percent of trading volume at Nasdaq and NYSE. There are wide range of activities that AI and big data can support in such trading process, which include opportunities identification, cost/friction estimation, market impact estimation, trading strategies selection, trade scheduling, capital and liquidity management, as well as risk management. In this course, we will discuss both traditional financial engineering models and modern AI, especially the machine learning and deep learning, that can be used in supporting Algo Trading. Modern topics like RoboAdvisor, AlphaGo Zero, and social media based market sentiment analysis will also be discussed.

Pre-requisite: None

CISC7303 CLOUD COMPUTING

This course will introduce Cloud Computing and relevant technologies in designing and implementing large-scale and composite business web applications on Cloud Computing platform. Topics covered include Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS), Infrastructure-as-a-Service (IaaS), Data-as-a-Service (DaaS), and Cloud Computing Ecosystem. This course will cover scalable computing services in a pay-as-you-go model and Cloud Computing approaches for development and deployment of web services and information systems. This course will also introduce computer network high level protocols, internetworking techniques, client server architecture, API for Networking programming, High speed networks and ATM technology, Network management, Mobile and Wireless communication technology. The Important protocols for Internet in TCP/IP suit protocols will be discussed in detail. Students will study state-of-the-art solutions for cloud computing developed by Google, Amazon, Microsoft, Tencent Cloud, and Aliyun (Ali Cloud), etc.

Pre-requisite: None

CISC7998 PROJECT REPORT

Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will learn systematic problem-solving process skills, professional research and development practices, and project management skills. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

CISC7401 ADVANCED MACHINE LEARNING

This course introduces advanced Machine Learning theories, methodologies, algorithms, application tools, and programming tools.

Pre-requisite: None

CISC7402 MATHEMATICS FOR ARTIFICIAL INTELLIGENCE

This course gives an introduction of mathematical background related to Artificial Intelligence to the students. The detailed contents may change from year to year depending on current developments and teacher specialization.

Pre-requisite: None

CISC7403 CLOUD AND DISTRIBUTED SYSTEMS

This graduate-level course introduces distributed systems and cloud computing areas focusing on system design and performance analysis. This course will also introduce state-of-the-art cloud solutions implemented in real systems.

Pre-requisite: None

CISC7404 SPECIAL TOPICS IN ARTIFICIAL INTELLIGENCE

This course introduces special topics and advanced technologies in Artificial Intelligence. The detailed contents may change from year to year depending on current developments and teacher specialization.

Pre-requisite: None

CISC7498 PROJECT REPORT

Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will learn systematic problem-solving process skills, professional research and development practices, and project management skills. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

ECEN7001 INTRODUCTION TO RESEARCH

This is one of the fundamental courses in the Electrical and Electronics Engineering Master of Science Programme and is intended that it will provide the student with the basic knowledge about what is the research of one specific topic in the specialized areas of Power, Control or Electronics leading the student to make a survey on that topic and afterwards to write a report about it. This report will serve as an important basis for the future Thesis research work (that is the reason why it is mandatory). The responsibility of supervising this course is given to the student's Supervisor.

Pre-requisite: None

ECEN7002 ADVANCED MATHEMATICS

Laplace Transform. Transforms of Derivatives and Integrals. s-Shifting, t-Shifting, Unit Step Function, Dirac's Delta Function, Differentiation and Integration of Transforms, Convolution, The Heaviside Expansion Theorem, Periodic Functions. Fourier Series, Half-Range Expansion, Complex Fourier Series. Fourier Integrals. Fourier Transform. Series Solution of Differential Equations, Legendre Polynomial, Bessel Functions. Sturm-Liouville Problem, Eigenfunction Expansions. Partial Differential Equations. Separation Variables, Use of Fourier-Bessel Series, Use of Fourier-Legendre Series. Solution by Laplace Transforms, solution by Fourier Transforms.

Pre-requisite: None

ECEN7003 MICROELECTRONIC CIRCUIT DESIGN

The primary goal of this course is to introduce basic electronic principles needed by the integrated circuit designer and to discuss engineering tradeoffs and practical considerations that are necessary for the student to make the transition from the classroom to industry as an integrated circuit designer. After the introduction of these principles, some basic circuits either digital or analog are presented together with one real advanced VLSI CMOS process. The evaluation is composed by several assignment works of simulation and layout design of basic circuits in the beginning of the semester and after mid-term the students will make a real IC design that will be implemented in a Multi-Project Chip.

Pre-requisite: None

ECEN7004 DIGITAL SIGNAL PROCESSING

Orthogonal expansions, z-transformation and its properties. Band limited signals and sampling theorem. Discrete-time systems. The design and realisation of digital filters. Non-recursive and recursive digital filtering. Multi-rate sampling. Auto-correlation and cross-correlation techniques. Matching filtering. Power frequency spectrum. Adaptive signal processing - random gradient method. The concept of Parametric Model and its applications for random signal power spectrum modern estimation, extraction and pattern recognition. Multi-channel signal processing by using

Singular Value Decomposition (SVD). The introduction of Artificial Neural Networks.

Pre-requisite: None

ECEN7005 ACTIVE NETWORK THEORY

Network Theory investigates the universal laws and the calculations of networks. Its contents, methods and style are always changed by the influence of era. Network analysis and synthesis has been transformed drastically, due to the emergence of digital computer and optimum method. And there are close and deep connections between network theory and system theory. Therefore, the basic achievements of the latter were introduced into the former, such as states, state equations and matrix algebra descriptions.

Pre-requisite: None

ECEN7006 ADVANCED TOPICS IN CONTROL SYSTEMS

The course introduces the digital control system and intelligent control system. The topics discussed include modern design techniques for digital control system and fuzzy logic and control.

Pre-requisite: None

ECEN7007 ADVANCED TOPICS IN SIMULATION

Simulation of electronic circuits with SPICE has replaced bread boarding as a powerful means of analyzing the performance of complex circuits (including IC circuits) and systems. Because of the huge number of devices contained in today's electronic circuits and systems, device model level has to be raised to a higher level, macro model in simulation. So macro modeling is a very powerful tool in simulation.

Pre-requisite: None

ECEN7008 EXPERT SYSTEMS

In the past ten years research in the field of artificial intelligence has many important successes. One of the most significant has been the development of powerful expert or knowledge-based systems. In many world famous universities, the subject has already been treated as one of their core courses. We should of course attach importance to the subject in the making of our master training programme.

Artificial intelligence background (including intelligent supports of decision making, CIM and CA technologies). Problem analysis and selection. Knowledge acquisition. Knowledge representation. Reasoning under uncertainty. Selecting a development tool. Constructing the knowledge base. Knowledge-based technology. Verification, validation, and integration. Implementation and management strategies. Survey of electromechanical engineering and manufacturing applications. Case studies: samples of expert system development.

Pre-requisite: None

ECEN7009 MICROELECTRONICS FOR TELECOMMUNICATION AND SIGNAL PROCESSING

The primary goal of this course is to present the most important functions that can be encountered in most of the applications in Telecommunications and Signal Processing. These functions that include, namely: Sampling, Discrete-Time and Digital Filtering and A/D and D/A Conversion, are presented both in theory and practice. The theory includes the basic fundamentals associated with each function and the practice comprises the presentation of different architectures for implementation, using for example Switched-Capacitor and Digital Techniques. The evaluation is composed by 4 laboratory works of simulation and electronic testing that will include the design of filters, A/D and D/A converters. The Software used for simulation includes the SWITCAP II programme (for functional SC-simulation) and the HSPICE programme (for electronic simulation at the transistor level). The Hardware used for electronic design and testing includes the MF10 (Integrated Switched-Capacitor Filter) and the Digital Signal Processor - Texas TMS 320C25.

Pre-requisite: None

ECEN7010 LASER AND SEMICONDUCTOR PHYSICS

The course includes two parts. Part one introduces concepts and characteristics of laser principles,

theories, operations and optic fiber. Other technologies for laser cavity and laser beam are covered. For part two, the objective is for engineering students to understand and to apply the knowledge of quantum physics to the semiconductor applications. Student learns elementary properties of semiconductor, energy bands structure, carrier properties, devices properties and various semiconductor fabrication techniques.

Pre-requisite: None

ECEN7011 ADVANCED TOPICS IN TELECOMMUNICATIONS

This course is designed to introduce the key techniques in digital communications systems and wireless networks including source coding, channel coding, modulation, communication channels, performance evaluation, wireless cellular networks, WiFi, and IoT networks; Channel coding schemes including block codes and convolutional codes, basic modulation schemes including PSK, ASK, FSK, QAM and TCM, advanced communication techniques including MIMO, OFDM and edge computing are particularly introduced.

Pre-requisite: None

ECEN7018 FLEXIBLE ALTERNATIVE CURRENT TRANSMISSION SYSTEM

The Flexible Alternative Current Transmission System and Distribution Flexible AC Transmission System (FACTS/DFACTS) are a new converging technology based on the Power Electronics, Control Theory and Power System for revolution of ever more efficient control and better utilization of power and energy in the existing systems. The FACTS offers an opportunity to enhance controllability, stability and power transfer capability of AC transmission systems with fastest control speed. DFACTS is the extended modern technique of FACTS to focus on the Custom issues or power line conditioning in the distribution site as well as the Information Technology's Electricity Issues. During the last decade, a number of control devices under the term FACTS/DFACTS technology have been proposed and implemented. This course provides a comprehensive guide to FACTS, covering all the major aspects in research and development of FACTS technologies. Various applications are also included to demonstrate the issues and benefits of applying FACTS. This course involved in the operation and control of modern power systems by FACTS technology.

Pre-requisite: None

ECEN7019 EMBEDDED SYSTEM

This is a project oriented course of Embedded System for postgraduate students. It emphasizes general concepts and design techniques of embedded system. Topics include overview of embedded system, real-time system, hardware and software co-design, and components selection.

Pre-requisite: None

ECEN7020 ADVANCED TOPICS IN ANALOG AND MIXED-SIGNAL INTEGRATED CIRCUITS

This course will provide a detailed discussion to the various types of analog and mixed-signal integrated circuits, e.g. data conversion and RF communication ICs, which are the key components in electronic systems. The performance characterization of data converters and RF circuits will be presented, and various types of data converters (including analog-to-digital and digital-to-analog) and RF building block (low-noise amplifier and mixer) will be discussed. The students are expected to complete several design and simulation projects with the implementation of the whole data converters and RF building blocks and the projects are expected to lead to chip fabrications for experimental verification.

Pre-requisite: None

ECEN7021 BIOMEDICAL TRANSDUCERS AND INSTRUMENTS

This essentially interdisciplinary course aims to introduce students the basic principles & techniques for biomedical transducers and instrumentations. This course covers sensing and measurement for qualitative description and quantitative analysis in biomedical engineering field mainly on noninvasive techniques.

Pre-requisite: None

ECE7022 ELECTROCHEMICAL ENERGY CONVERSION AND STORAGE

This course introduces principles, mathematical models and implementation of electrochemical energy conversion and storage. The principle of electrochemistry is introduced, including components of an electrolytic cell, Nernst's equation, thermodynamics and electrokinetics. The basic of power conversion is also introduced, including power electronics switches, converters and their control. The applications to batteries, solar cells, fuel cells and other emerging energy generation technologies are explored.

Pre-requisite: None

ECE7023 SPECIAL TOPICS IN BIOMEDICAL ENGINEERING

The course will introduce a selected special topic in the Biomedical Engineering (BME) area, includes any specialized topic in BME chosen by the staff member who has experienced in that particular field, but the topic is not covered by other postgraduate courses. Students may register for this course multiple times as long as the topic is different.

Pre-requisite: None

ECE7024 MEDICAL IMAGING SYSTEMS

The course aims to introduce the physics and principles of operation behind the major medical imaging systems including X-ray radiography, computed tomography (CT), magnetic resonance imaging (MRI), ultrasound (US) and nuclear medicine imaging (SPECT and PET). Image quality such as impulse response, signal-to-noise, resolution and its tradeoffs with system design for different imaging modalities will also be discussed.

Pre-requisite: None

ECE7025 MODELLING AND THEORETICAL ANALYSIS FOR COMMUNICATION SYSTEMS

This course is designed to introduce fundamental knowledge on the several theoretic methods and how to use them to model and analyze different issues in communication systems such as resource allocation in mobile computing, routing in the networking, and protocol design in wireless communication systems. For instance, the strategic making decision can be used to analyze the task and resource allocation in mobile computing. The VCG auction can be used to analyze the shortest path routing problem in communication networks. Reverse auction can be used to design incentive mechanism in the mobile intelligent sensing network. Coalitional activity can be used to analyze the cooperative relay networks. By learning this course, students should have deep understanding on these theoretic analysis methods and have the capability of using these methods to mathematically model and analyze various interactive problems in communication systems. All of these are assessed in assignments, presentations and projects.

Pre-requisite: None

ECE7101 INTRODUCTION TO INTERNET OF THINGS

This course introduces students to advanced topics in Internet of Things. The detailed contents may change from year to year depending on current developments and teacher specialization

Pre-requisite: None

ECE7102 ADVANCED TOPICS IN APPLIED PROBABILITY AND STATISTICS

This course prepares students with the fundamental principles and methods in probabilities and statistics for machine learning and data sciences. It covers from first a review of basic concepts such as common distributions, conditional and joint distributions, covariance and correlation, central limit theorem, sampling, to classical theory in estimation, hypothesis testing and Bayesian inference, and some advanced topics for regression, clustering, classification and learning.

Pre-requisite: None

ECE7103 RFID PRINCIPLE AND APPLICATIONS

This course provides students about radio frequency identification (RFID) information systems from hardware architecture, communication protocols to applications. Students will learn various types of RFID (e.g. HF, UHF RFID) technologies and different types of tags (i.e., active, passive,

antenna polarizations, etc.), and their operating principles in hardware. The communication protocol for anti-collision and security enhancement will also be introduced. This course brings out various examples of both prevalent and emerging applications, to allow the students to obtain an idea of the potential applications in IoT such as item tracking and tracing, inventory monitoring and control, asset monitoring and management, anti-theft, electronic payment, access control, anti-counterfeit, smart tags.

Pre-requisite: None

ECEN7104 ADVANCED INTEGRATED CIRCUIT DESIGN FOR INTERNET OF THINGS

This course targets to provide an overview of the enabling integrated circuit design techniques for the development of energy constrained Internet of Things (IoT) systems. The fundamental building blocks in an IoT system will be systematically introduced, including the analog interface, power management circuits, energy harvesting modules, analog-to-digital converters, short-range radios, digital architecture, non-volatile memory, hardware security and battery/packaging. Advanced circuit design techniques targeting for ultra-low power consumption to fulfill the application level requirements will also be introduced.

Pre-requisite: None

ECEN7105 EMBEDDED SYSTEMS FOR INTERNET OF THINGS APPLICATIONS

This is a project oriented course for IoT related smart applications, especially the sensors for collecting data/information. It emphasizes the multi-tasking and time-driven programming for real-time applications. Topics include overview of embedded systems, time-driven multi-tasking programming, hardware and software co-design, and sensors interfaces.

Pre-requisite: None

ECEN7106 CONVEX OPTIMIZATION FOR INTERNET OF THINGS APPLICATIONS

This course focuses on convex optimization with applications to wireless communication systems, information theory, signal processing, control systems and machine learning. The first part will be on the theory of convex optimization—recognizing convex sets, convex functions, convex optimization problems and duality. The second part of the course will be on algorithms for solving convex optimization problems. This course is crucial to students and researchers in the above fields of engineering.

Pre-requisite: None

ECEN7107 DATA ANALYSIS FOR INTERNET OF THINGS

This course is an introductory course on data analytics and its application in IoT. It covers three major topics: 1) Primary data analytics theory including classification, regression, principal component analysis, etc.; 2) Hands on data analytics experiences with NumPy, Pandas, Matplotlib, & Scikit-learn packages; and 3) Applications in IOT (with a special example on buildings energy systems), in which comprehensive experiments with real data will be included.

In this course, students will learn systematic knowledge on data analytics and Python. They will also gain solid hands-on experiences in using Python to analyze IOT data.

Pre-requisite: None

ECEN7108 ADVANCED TOPICS IN INTERNET OF THINGS

This course introduces students to advanced topics in Internet of Things. The detailed contents may change from year to year depending on current developments and teacher specialization.

Pre-requisite: None

ECEN7197 INTERNSHIP AND REPORT

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor.

Pre-requisite: None

ECEN7198 PROJECT REPORT

Project Report is distinguished from the Academic Thesis by its focus on combining existing

academic theories or advanced technologies with an evaluation of a case study or academic project. Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

ECEN7996 APPLIED THESIS

An independent project under the supervision of a faculty staff member. An applied thesis focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or industrial project. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

ECEN7998 PROJECT REPORT

Project Report is distinguished from the Academic Thesis by its focus on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

ECEN7997 INTERNSHIP AND REPORT

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor

Pre-requisite: None

EMEN7002 PHYSICS OF MATERIALS

Atomic Theory: Hydrogen atom, Angular momentum and Pauli Exclusion Principle, Energy levels of atom, Energy bands, Fermi energy. Defects of materials. Dislocation: Edge dislocation, Screw dislocation, Burgers vector, Dislocation density, Elastic property of dislocation, Force on dislocation, Stress field and strain energy of dislocation, Dislocation motion and interaction, Dislocations in real crystal, Dislocations observation. Atomic structures and properties of some new materials.

Pre-requisite: None

EMEN7003 VARIATIONAL PRINCIPLES AND THE APPLICATION

Principle of minimum potential energy; Principle of minimum complementary energy; Ritz method; Galerkin method; Kantonowitch method; Treffiz method; Hellinger-Reissner principle; Hu-washizu principle; Lagrange multiplier; High order Lagrange multiplier; Variational principle of non-linear elasticity; Methods for establishing generalized variational principle; Variational principle and the relating theorems in limit analysis; Applications for FEM, for limit analysis, for to find solutions and for to derive formulas; Developments in research work.

Pre-requisite: None

EMEN7006 MECHATRONICS

Mechanical system interfacing; Combinational digital logic; Synchronous sequential logic; Asynchronous sequential logic; Register transfer logic; Embedded control computers; Analog digital conversion; Position and velocity measurement; Operational amplifiers for analog signal processing; Power amplifiers.

Pre-requisite: None

EMEN7007 PROCESS HEAT TRANSFER

Application of fundamental principles of single- and two-phase fluid dynamics and heat transfer to the design and analysis of different types of heat exchangers, such as double pipe heat exchangers, shell and tube heat exchangers, fin-plate heat exchangers, cross flow heat exchangers.

Pre-requisite: None

EMEN7008 CONVECTIVE HEAT TRANSFER

Convective heat transfer occurs in almost all branches of engineering applications. This course will cover the followings. The equation of convective heat transfer, the differential equation for the boundary layer, the integral equation of the boundary layer, momentum and heat transfer for the laminar internal and external flow, the momentum and heat transfer for the turbulent internal and external flow, natural and mixed convections.

Pre-requisite: None

EMEN7009 COMPUTATIONAL METHOD FOR THERMO-FLUID SYSTEM

The purpose of this course is to use computational method to investigate heat transfer and fluid flow and other related processes that occur in engineering equipment. This course will cover: Discretization method. Explicit and implicit methods for heat conduction. Upwind, exponential, hybrid and power-law schemes for convection. Calculation of flow field use various algorithms.

Pre-requisite: None

EMEN7010 ENERGY CONVERSION AND UTILIZATION

Renewable energy resources. Solar energy, wind power, wave and tidal power, geothermal energy, hydroelectric power. Environmental assessment of alternative energy resources.

Conventional energy resources, fossil fuel in solids, liquid and gaseous states. Nuclear energy. Energy analysis, energy economics, energy and society. Energy and the third world, energy conservation and energy policies.

Pre-requisite: None

EMEN7011 ADVANCED ROBOTICS AND CONTROL

Analyzes kinematic characteristics of planar and spatial manipulators. Differential kinematics and statics. Dynamics. Trajectory planning. Introduction to feedback control of physical system behavior. State-space and functional descriptions of linear and nonlinear systems. Feedback, stability, and robustness. Design of PID controllers and compensators. Interaction control. Actuators and sensors. Robot control architecture.

Pre-requisite: None

EMEN7014 FLUID POWER ENGINEERING

Basics of fluid flow and hydro-mechanics. Advanced pneumatic power systems. Advanced hydraulic power systems. Fluidics. Fluid logic control circuits. Modelling of fluid power systems. Fluid power system control. Dynamic analysis and simulation of fluid power systems. Fluid power plumbing and maintenance.

Pre-requisite: None

EMEN7017 SPECIAL TOPICS IN MANUFACTURING I

Laser physics, types of lasers and laser radiation for material processing, laser hazards & safety, laser optics and beam delivery systems, laser beam interaction with materials, laser materials processing: laser surface engineering, laser cutting, laser welding, laser drilling, laser marking, laser selective sintering.

Pre-requisite: None

EMEN7018 SPECIAL TOPICS IN MANUFACTURING II

In industry, material degradation of components and equipment arises from one or more of the three modes: wear, corrosion and fracture. The lifetime of the component is determined by the interaction among materials properties, component design, and the application conditions. This course intends to give a comprehensive knowledge on materials degradation and preventive methods by surface engineering. In addition, the fabrication of microelectronic devices will also be introduced in this course. This course focuses on the following topics: Surfaces: Their Nature, Roughness & Characterization; Corrosion; Tribology; Friction, Wear & Lubrication; Surface Treatment & Coating Technology.

Pre-requisite: None

EMEN7019 SPECIAL TOPICS IN THERMAL ENGINEERING I

To introduce the most advanced technologies in the field of thermal engineering according to recent literatures/ publications in indoor air quality, ventilation and energy saving and advanced HVAC systems.

Pre-requisite: None

EMEN7020 SPECIAL TOPICS IN THERMAL ENGINEERING II

To introduce the most advanced technologies in the field of thermal engineering according to recent literatures/ publications in single and multi-phase heat transfer and its applications.

Pre-requisite: None

EMEN7021 AUTOMOTIVE ENGINEERING

Introduction to road vehicles. Modern internal combustion (IC) engine construction. Fuels and combustion. Thermodynamic analysis of IC engines. Advances in IC engines. Electronic fuel injection. Variable valve actuation. Turbocharging and supercharging. Advanced electronic control technology. Emission control. Engine characteristics and performance measurement. Engine trouble-diagnosis. Advanced automotive drive trains, braking, steering and suspension systems. Safety devices. Racing technology. Vehicle aerodynamics. Chassis engineering. Automobile mechanics.

Pre-requisite: None

EMEN7022 FAILURE ANALYSIS IN MECHANICAL ENGINEERING

This course presents theories for preventing/mitigating the failure modes that are most frequently encountered in mechanical engineering. These include fatigue, stress concentration, fracture, creep, impact, buckling, wear, residual stresses, etc. This course shall cover such important design tools as: linear fracture mechanics, the various widely-used rules for predicting fatigue strength, models for predicting crack growth, the most important criteria for yield failure, and so forth. Case studies (such as the effects of residual stresses on the failure of railway rails) that involved the various failure modes shall be discussed, with an eye to reinforcing the students' ability in applying the various theories.

Pre-requisite: None

EMEN7023 ADVANCED ELECTRICAL SERVICES

- To introduce the most advanced technologies in the field of electrical services engineering according to recent literatures and publications.
- To introduce the fundamentals in design of vertical transportation, security, lighting and energy storage systems.
- To enable students to understand the major design features, operating characteristics and functions of facilities used in electrical building services.

Pre-requisite: None

EMEN7024 ADVANCED ELECTROMECHANICAL ENERGY CONVERSION

- To provide students understanding of various advanced electromechanical energy conversion systems, including the operating principles, performance characteristics and applications.
- To provide students knowledge in the selection, operation and control of electric machines.
- To ensure the students to develop an understanding of various variable speed drive systems and their applications

Pre-requisite: None

EMEN7025 HUMAN FACTORS ENGINEERING

Students will gain an understanding of the basic theoretical concepts, principles and techniques of ergonomics as well as an introduction to fundamental ergonomic measurement tools for assessment of physical workload, posture, occupational exposure, and stress. The topics include systems design and task analysis, muscle use and anthropometry, workspace design, activity-related soft tissue disorders, back injuries, shiftwork, organizational and psychosocial aspects of

work, skilled work and mental activity and regulations in ergonomics. The professional software such as "HumanCAD" is introduced for supporting ergonomic systems design and task analysis. The students are required to complete a related course project.

Pre-requisite: None

EMEN7027 ENGINEERING ACOUSTICS

This course is to develop students' understanding of fundamentals of acoustics and its applications. Through this course students should be capable of modeling and analyzing engineering acoustics problems. Topics include: Fundamentals of vibrations. Vibration of continuous bodies (string, bar, plate). Acoustics wave equation. Acoustics impedance, power, and intensity. Spectral descriptions of acoustics. Transmission and reflection of sound. Acoustic radiation. Room acoustics. Introduction of acoustics and vibration measurements. Introduction of boundary element method.

Pre-requisite: None

EMEN7028 ADVANCED ELECTRIC VEHICLES

This course will introduce the electrical and mechanical aspects of EVs, including the fundamentals, design, control, modeling, battery and other energy storage, electric propulsion systems. It will cover vehicle dynamics, energy sources, electric propulsion systems, regenerative braking, parallel and series hybrid electric vehicle (HEV) design, EV charging and infrastructure, impacts to environment and economy, and practical design considerations.

Pre-requisite: None

EMEN7029 SPECIAL TOPIC IN ELECTROMECHANICAL ENGINEERING I

Any specialized topic in Electromechanical Engineering chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses in the MSc. programme.

Pre-requisite: None

EMEN7030 SPECIAL TOPIC IN ELECTROMECHANICAL ENGINEERING II

Any specialized topic in Electromechanical Engineering chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses in the MSc. programme.

Pre-requisite: None

EMEN7031 MICROMECHATRONICS AND APPLICATIONS

Micro/nanotechnology has become very important in creating innovative technologies in the fields of ultrahigh precision mechatronics, bio-medical engineering and energy/environmental technology. This course introduces fundamental aspects of micromechatronics. It involves scaling laws at the micro/nano-scales, electrostatics, piezoelectrics, electromagnetism, measurement tools, materials and fabrication methods, diverse micromechatronic systems and their applications.

Pre-requisite: None

EMEN7032 INTELLIGENT THEORY AND ENGINEERING APPLICATIONS

This course introduces the fundamentals of intelligent system technologies and their engineering applications. It will present the principles of knowledge-based systems, fuzzy logic and artificial neural networks and explore how manufacturing and automation could benefit from application of these technologies. It will also discuss the representation of knowledge, knowledge acquisition, decision making mechanism, learning and machine learning, as well as its applications in various engineering domains.

Pre-requisite: None

EMEN7033 INDUSTRIAL ENGINEERING AND ENGINEERING MANAGEMENT

This course is intended to introduce to the concepts of supervision and management in an engineering environment. Design of Work Systems, Facilities design and planning, Operation

Management, Knowledge Management, Supply Chain Management, Materials and Inventory Management, Logistical Management, Enterprise Resource Planning, and Decision Making System are studied as part of the course. Skills on analytical problem solving, statistical thinking and creativity are essential. The course project is required to apply Industrial Engineering (IE) and Engineering Management (EM) technology in solving the critical problems for the industries.

Pre-requisite: None

EMEN7034 THEORIES AND PRACTICE OF CAD/CAM/CAE

This course studies modern design and manufacturing techniques in the computer-based environment. It is designed to address the key issues in product development with the goal of providing the future engineers with a thorough understanding of the concepts and technologies in CAD/CAM/CAE. The major focus of the course will be computer graphics, geometric modeling, design reuse, feature recognition, process planning, NC path planning, rapid prototyping, engineering optimization, and computer integrated manufacturing.

Pre-requisite: None

EMEN7035 PRODUCT DESIGN AND MANAGEMENT

Innovation management and new product development are critical for improving the competitiveness of economies and firms. This course presents and utilizes multi-disciplinary approaches to cover different aspects of product design innovation and development management. The topics include innovation management, product design and optimization, design principle and process (design for manufacturability/environment/usability/X, axiomatic design, robust design, etc), product portfolio management, product life cycle management and design collaboration, etc.

Pre-requisite: None

EMEN7036 MODELING AND ANALYSIS OF PRODUCTION SYSTEMS

The complexity of the design and control problems encountered in the modern production system is increasing. This course introduces modeling and analysis methods for linking decision and performance throughout the production system. The methods could be used to support analysis of alternative manufacturing material/service strategies. The fundamental production operation issues will be discussed, ranging from serial systems, mass customization, quality control, group technology, cellular manufacturing, facility management, layout planning and material handling systems, etc.

Pre-requisite: None

EMEN7037 ADVANCED MATHEMATICS FOR ELECTROMECHANICAL ENGINEERING

First-order Ordinary Differential Equation; Second-order Ordinary Differential Equation; Fourier Series, Integrals, and Transforms; Analytical Solution of Partial Differential Equations: Heat Equation, Wave Equation, Circular Membrane, Laplace's Equation, Poisson's Equation; Complex Analytic Functions; Complex Integration; Power Series; Taylor Series; Laurent Series; Residue Integration Method; Numerical methods in Linear algebra with Matlab; Numerical Methods for Differential Equations with Matlab.

Pre-requisite: None

EMEN7038 MECHANICAL PROCESSING OF MATERIALS

Mechanical processing technologies are amongst the eldest manufacturing processes used by mankind. These processes are multi-discipline activities that require knowledge from different engineering areas. The methods for analysing these processes seek to integrate this multi-disciplinary aspect to obtain analytical or numerical solutions for the distribution of main field variables in the interior of the parts and the tool-part contact surfaces, resulting in a group of essential elements for design, project and optimization of parts and tools, aiding future engineers to cultivate a critical spirit on analysing the results and purpose alternative manufacturing solutions.

Pre-requisite: None

EMEN7039 PROGNOSTICS AND HEALTH MANAGEMENT OF ENGINEERING SYSTEMS

This course provides the concepts and methods of prognostics and health management (PHM) of engineering system, which describes PHM techniques and their applications in engineering systems. A variety of tools and techniques for developing health management and monitoring of components and systems will be discussed. Topics related to sensor signal acquisition, data pre-processing techniques, various signals processing methods for feature extraction, machine learning methods and data driven prognostics models. After successfully completing this course, students will have a good understanding of system health monitoring, optimum sensor placement for health assessment, and current challenges and opportunities in the PHM field.

Pre-requisite: None

EMEN7101 INTRODUCTION TO MOBILE ROBOTICS

This course aims at teaching students basic knowledges and more recent advances on mobile robotics, such as robot sensing, localization, mapping, and motion planning.

Pre-requisite: None

EMEN7102 INTRODUCTION TO SENSORS AND ACTUATORS

Introduction to sensors and actuators, especially flexible devices. These sensors and actuators have wide applications in wearable electronics, Internet of Things, robotics, and mobile health, etc. This course prepares students to work professionally in academic researching or companies focusing on advanced technology.

Pre-requisite: None

EMEN7103 AERIAL ROBOTICS

This course aims to introduce students to the fundamental concepts involved in the design and operation of aerial robots, visiting the topics of rotorcraft modelling, navigation guidance and control, as well as motion planning. In particular we will derive dynamic models of robotic quadrotors, discuss the available sensors to be installed onboard and sensor fusion techniques rooted on the concepts of Kalman Filtering for linear and nonlinear systems, present methods for aerial robot control with stability analysis, and basic algorithms for efficient robot motion in unstructured environments. Finally, some applications are presented and future uses of aerial robots are discussed.

Pre-requisite: None

EMEN7104 SPECIAL TOPICS IN ROBOTICS

Any specialized topic in Robotics chosen by staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses in the MSc. programme.

Pre-requisite: None

EMEN7105 SPECIAL TOPICS IN AUTONOMOUS SYSTEMS

This course will give students an in-depth perspective on the most advanced techniques and algorithms currently used in wheeled mobile, aerial, space, and ocean autonomous robots, working in unstructured environments. These techniques will include recent results from machine vision, robotic image and video processing, sensor-based control for autonomous robots, sensor fusion for robot pose estimation, advanced nonlinear motion estimation and control, simultaneous localization and mapping, learning and deep neural networks, perception and compliance of human behaviour, and advanced robotic trajectory tracking and path planning. Case studies of successful algorithms employed in single and multiple autonomous robots will be presented and discussed.

Pre-requisite: None

EMEN7198 PROJECT REPORT

Project Report is a task of the capstone project focusing on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will be asked to select a topic, or an engineering problem that arouses their interests, conduct literature review and research on the topic, design the experimental or testing methodology,

acquire a portfolio of findings or results, create a final product or a written report demonstrating their learning acquisition or conclusions and finally give an oral presentation on the capstone project to a panel who collectively evaluate the quality of the task.

Pre-requisite: None

EMEN7997 INTERNSHIP AND REPORT

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor.

Pre-requisite: None

EMEN7998 PROJECT REPORT

Project Report is distinguished from the Academic Thesis by its focus on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

MATH7001 FUNCTIONAL ANALYSIS

The first level of abstract analysis is about operators and, in particular, functionals, in linear normed and Banach spaces, and in Hilbert spaces. Besides the basic concepts the course will finally rest on the three corner stone theorems, viz., the Hohn-Banach theorem of Extension of bounded linear functional in linear normed spaces, the resonance theorem (Banach-Steinhaus Theorem) and the open mapping theorems (the closed range theorem).

Pre-requisite: None

MATH7002 REAL ANALYSIS

Based on the concept completeness of the real number system this course systematically extends the length concept for intervals to general measurable sets. Based on the concept measurable sets and their measures the course introduces measurable functions and its subclass integrable functions and their integration. In such way completeness of Lebesgue integrable functions extending Riemann integration is established. This develop analysis is indispensable.

Pre-requisite: None

MATH7003 ADVANCED NUMERICAL LINEAR ALGEBRA

Direct methods for solving linear systems. Iterative methods for solving linear systems. Sparse matrix computations. Eigenvalue problems. Least squares problems. Toeplitz solvers.

Pre-requisite: None

MATH7004 ADVANCED PROBABILITY AND STATISTICS

This course studies advanced theory such as law of large number, central limit theorem and Poisson limit theorem with their applications in Statistics.

Pre-requisite: None

MATH7005 CLIFFORD ANALYSIS

Clifford algebras, spinors, elementary geometric algebra, Dirac differential operators, monogenic (Clifford analytic) functions, Taylor and Laurent series for monogenic functions, CK extensions of real analytic functions, Cauchy integrals, generalized exponential functions and Hardy spaces, singular Cauchy integrals and Plemelj formulas.

Pre-requisite: None

MATH7006 GEOMETRY AND ITS APPLICATIONS

This is a research oriented course related to one of the following 3 areas in geometry: algebraic geometry, differential geometry, or even computational geometry. The topics can be different from year to year, depending on the instructors' interest. The instructor can also discuss the materials from some current topics, or some topics in his or her research area. The instructor can develop

the theory toward the geometric application as well.

Pre-requisite: None

MATH7007 MATHEMATICAL THEORY OF COMPUTATIONAL INTELLIGENCE

Mathematical model of neurons and neural networks, learning of ANN, optimization methods for error function, Backpropagation learning methods, Approximation theory of ANN and applications. Evolutionary algorithms and their convergence theorem.

Pre-requisite: None

MATH7008 MATRIX ANALYSIS

Similarities and canonical forms of matrices. Normal, Hermitian and positive definite matrices. Matrix norms. Inequalities of eigenvalues and singular values.

Pre-requisite: None

MATH7009 NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS

In this course, we focus on the numerical methods for solving the ordinary and partial differential equations. The main contents include single and multi-step methods for ordinary differential equations; finite difference method, finite element method, spectral method for partial differential equations; the related numerical analysis; quality programming for the numerical algorithm.

Pre-requisite: None

MATH7010 PARTIAL DIFFERENTIAL EQUATIONS

This course provides some knowledge on partial differential equations. It includes the study of Fourier transformation and translation invariant operators. Characteristic theory of linear equations will be given. Various boundary value problems for homogeneous wave equations, Laplace equations and parabolic equations will also be studied.

Pre-requisite: None

MATH7011 READING COURSE I

For individual students or a group of students. Self-study of specific topics under the guidance of a supervisor.

Pre-requisite: None

MATH7012 READING COURSE II

For individual students or a group of students. Self-study of specific topics under the guidance of a supervisor.

Pre-requisite: None

MATH7013 STOCHASTIC DIFFERENTIAL EQUATIONS

This course starts from reviewing the basic probability theory and stochastic processes such as Markov chains, Poisson processes and so on, and then studies Brownian motions, Ito formula, Ornstein-Uhlenbeck process, growth models, Black-Scholes equations and some applications of stochastic differential equations in Finance and biology.

Pre-requisite: None

MATH7014 STOCHASTIC PROCESSES

Gaussian processes, stationary processes, Markov chain and Markov processes. Stochastic processes with independent increments, Brownian motions, martingales and semi-martingales.

Pre-requisite: None

MATH7015 TIME SERIES ANALYSIS

This module introduces methods for analyzing the time series data. Topics include: Stationary random processes, Autocovariance and autocorrelation functions, Discrete parameter models, Purely random processes, Autoregressive processes (first order, second order, general orders), Moving average processes, ARMA processes, General linear processes, Harmonic processes, Stochastic limiting operations and standard continuous parameter models, etc. This module is

targeted at students who are interested in time series and are able to meet the prerequisite.

Pre-requisite: None

MATH7016 TOPICS IN ANALYSIS

Selected topics in analysis. The content may vary from year to year.

Pre-requisite: None

MATH7017 TOPICS IN GEOMETRY

Selected topics in geometry. The content may vary from year to year.

Pre-requisite: None

MATH7018 TOPICS IN MATRIX ANALYSIS

Selected topics in matrix analysis. The content may vary from year to year.

Pre-requisite: None

MATH7019 TOPICS IN PARTIAL DIFFERENTIAL EQUATIONS

Selected topics in partial differential equations. The content may vary from year to year.

Pre-requisite: None

MATH7020 TOPICS IN PROBABILITY AND STATISTICS

Selected topics in probability and statistics. The content may vary from year to year.

Pre-requisite: None

MATH7021 FINANCIAL MATHEMATICS

Introduction to option pricing and the Black-Scholes model. Introduction to martingale theory and stochastic calculus, the Cox-Ross-Rubinstein model, and the martingale method in option pricing. Backward stochastic differential equations and option pricing. Consumption-investment strategies, and maximization problems of utilities in financial markets. Other updated topics in financial mathematics.

Pre-requisite: None

MATH7998 PROJECT REPORT

An independent project under the supervision of a faculty staff member. A Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or industrial project. The goal of Project Report is to facilitate the integration of practice with academic theory.

Pre-requisite: None

OCES7001 OCEAN REMOTE SENSING

This course is designed to introduce students to important concepts and fundamental principles in remote sensing and applications in oceans and coastal environments. Topics cover sensors, microwaves, image analysis and applications of remote sensing in oceans and coastal area.

Pre-requisite: None

OCES7002 Physical Oceanography

This course will introduce the physical oceanographic objectives, concepts, and processes in the ocean to students with a broad background in mathematics and physics. It starts from learning properties of seawater and the basic oceanographic phenomena, then developing the basic equations which describe the principles upon which physical oceanography is based. The principles will help to understand the waves, tides, effect of earth rotation, Ekman dynamics and the large-scale circulation. The student will learn the fundamental concepts for describing and modelling currents, waves, and understand their role in the climate system.

Pre-requisite: None

OCES7003 Ocean Acoustics

This course is designed to introduce students to important concepts and fundamental principles

in oceans acoustics. Topics cover acoustic wave propagation, reflection and transmission in fluid media, ray tracing and normal modes methods for solving wave equation, central basic methods and problems relevant for the use of sound in marine environments, as well as the principle of designing underwater acoustic systems.

Pre-requisite: None

OCES7004 Ocean Sensors

This course is designed to introduce students to functional principle of different types of sensors, mathematical-scientific and informatics-based measuring methods as well as data acquisition systems and models. Topics cover introduction to ocean sensors, fundamental principles of sensor operation, design and construction of ocean sensors and application in ocean environments, challenges and innovations.

Pre-requisite: None

OCES7005 Marine Robotics and Application

This course introduces the broad spectrum of marine vehicles and their application in oceans, the fundamental principles of maritime robotics such as autonomous underwater and surface vehicle, as well as theoretical and practical design of robotics.

Pre-requisite: None

OCES7006 Special Topics in Ocean Observation and Modeling

This course is designed to introduce students to tools, technologies, and data that covers all major aspects of measurements of physical, chemical and biological parameters in oceans, as well as ocean models.

Pre-requisite: None

OCES7007 Special Topics in Underwater Communication and Networks

This course is designed to introduce students to communication technologies of underwater wireless communication, such as acoustic communication, optical communication, and magneto-inductive communication. Topics cover basics fundamentals, advantages and disadvantages, and applications of underwater communication technologies.

Pre-requisite: None

OCES7008 Machine Learning and Applications in Ocean Science

This course covers the fundamental tools and techniques for machine learning and their applications in ocean science. Students will learn how to analyze large amounts of data to identify patterns and trends, and understand the implications of these findings in ocean science.

Pre-requisite: None

OCES7197 Internship and Report

An independent project in cooperation with industry carried out under the supervision of a faculty staff member and co-supervised by an industrial supervisor.

Pre-requisite: None

OCES7198 Project Report

Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will learn systematic problem-solving process skills, professional research and development practices, and project management skills. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

BACHELOR'S DEGREE PROGRAMMES

APAC1000 ADVANCED MATHEMATICS I

The course aims at providing mathematical concepts and methods to students in the study of classical mechanics, electromagnetism, quantum mechanics as well as statistical mechanics. The topics will cover linear algebra, vector calculus, special functions, complex numbers and hyperbolic functions.

Pre-requisite: None

APAC1001 COLLEGE PHYSICS

In this part, mechanics included rotation, gravitation, elasticity, oscillation, waves, sound waves, fluid, gas theory and laws of thermodynamics will be introduced.

Pre-requisite: None

APAC1002 ELECTROMAGNETISM AND PHYSICAL OPTICS

In this part, Electromagnetism will be introduced in terms of forces, fields, potential, laws, current, circuits, induction, circuit components, electromagnetic waves, light, geometric optics, interference and diffraction.

Pre-requisite: None

APAC1003 INTRODUCTION TO COLLEGE CHEMISTRY

This course addresses the basic concepts of chemistry through lectures and laboratory experiments. Topics include: atoms and molecules, periodic table, electronic structure, chemical bonding, chemical reactions, electrochemistry, and organic chemistry.

Pre-requisite: None

APAC2000 ADVANCED MATHEMATICS II

The course is the extension of Advanced Mathematics I. The course aims at providing mathematical concepts and methods to students in the study of classical mechanics, electromagnetism, quantum mechanics as well as statistical mechanics. The topics will cover infinite series, Fourier series and transformation, ordinary differential equations, probability.

Pre-requisite: APAC1000

APAC2001 ANALYTICAL AND ENVIRONMENTAL CHEMISTRY

Introduction of analytical chemistry, including the concept of analytical chemistry, sample preparation, analysis methods, quality control, as well as analytic techniques for environmental science. Related experiments will also be arranged in this course.

Pre-requisite: APAC1003

APAC2002 MODERN PHYSICS

This course is intended to develop basic theoretical tools needed to understand fundamental atomic processes. It will introduce you to modern quantum physics starting with the special theory of relativity and the foundations of quantum mechanics. Then it presents the basic concepts and principles of atomic physics. Topics may include the hydrogen and helium atoms, spin-orbit coupling schemes, hyperfine interaction, Lamb shift, atoms in magnetic fields, multi-electron atoms, Pauli exclusion principle, Hund's rules, diatomic molecules, Born-Oppenheimer approximation, electronic, vibrational, rotational and rotational-vibrational spectra.

Pre-requisite: None

APAC2003 INORGANIC CHEMISTRY

Introduction of inorganic chemistry, including general principles of chemistry, periodic properties of elements, acid-base theory, structure of compounds, s, p, d-block elements, etc. Some related experiments will be included.

Pre-requisite: APAC1003

APAC2004 QUANTUM PHYSICS

Introduction to quantum mechanics. It may cover the following topics: Wavefunction and Schrodinger equation, observables, eigenfunctions, one-dimensional steady state problem, Mechanical quantities expressed by operators and representation transformation, the evolution of mechanical quantities over time and symmetry, the Schrodinger equation in spherical coordinates, spin and orbital angular momentum, Quantum transitions, hydrogen atom and addition of angular momenta.

Pre-requisite: APAC2000

APAC2006 ORGANIC CHEMISTRY: FOUNDATIONS OF CHEMICAL REACTIVITY AND SYNTHESIS

Introduction of the structures, properties, preparation, and reactions of a vast array of molecules that we call organic compounds. Introduction of concepts that structure determines properties leading to exploration of the subject in a systematic manner through understanding of classes and functionalities and reaction mechanism. Materials learnt in earlier chapter will serve as building blocks for the topics in the later chapter. Stereo- and regio-controlled chemical reaction types are introduced.

Pre-requisite: APAC1003

APAC3000 MATERIALS PHYSICS AND CHEMISTRY

The course will introduce the general synthesis methodologies in material science based on Physics and Chemistry principles. Exploration and applications of novel and functional materials, especially in modern technology, will also be covered in the course.

Pre-requisite: None

APAC3001 SOLID STATE PHYSICS

In this course, the behavior of atoms and shared electrons in solids will be described by classical physics and quantum mechanics. The discussion of solid with crystalline structure will be one of the emphases. Some properties of crystal such as defects, disorder and thermal vibration will be studied. Then, band theory and motion of electron will be investigated.

Pre-requisite: None

APAC3002 THERMODYNAMIC AND STATISTICAL PHYSICS

This course introduces the foundations of statistical mechanics to students with a strong mathematics and physics background, who are contemplating a major in Physics or interested in a rigorous treatment of physics. The main contents include the zeroth, first, second and third laws, thermodynamical potentials and Legendre transformation, phase coexistence and phase transition, thermodynamical stability, statistical distribution of almost independent systems, and others.

Pre-requisite: None

APAC3003 MATERIALS CHARACTERIZATION

Introduction of commonly used materials characterization methods (XPS, SEM, AFM, XRD, Raman, XPS), including their theory of operation and hands-on experience. Includes a discussion of the measurement process and instrumental analysis of samples.

Pre-requisite: None

APAC3004 OPTOELECTRONICS

This course covers the fundamental principles of wave and geometric optics, photonics and optoelectronics, with an emphasis on applications. Topics may include light propagation and basic properties, polarization, waveguide and optical fibre, optical properties of crystals and semiconductors, semiconductor light emitting diodes, lasers, photodetectors, photovoltaic devices and displays. The course also includes substantial laboratory and project work.

Pre-requisite: None

APAC3005 PHYSICAL CHEMISTRY

This course provides a theoretical and mathematical description of the physical behavior of chemical systems. Introduce and interpret observations on the physical and chemical properties of matter. Physical chemistry is also essential for developing and interpreting the modern techniques used to determine the structure and properties of matter, such as new synthetic materials. Related experiments will also be arranged in this course.

Pre-requisite: APAC1003 or HSC11000

APAC3006 SEMICONDUCTOR PHYSICS

Brief introduction of solid-state physics and crystallography, followed by a major focus on the knowledge of semiconductor physics with topics including electronic states in semiconductors, defects in semiconductors, the carrier transportation in semiconductors, unbalanced carriers in semiconductors and semiconductor junctions, via both classroom teaching and lab exercises.

Pre-requisite: None

APAC3007 LOW-DIMENSIONAL PHYSICS

The course aims at an introduction to basic principles of nanophysics allowing working in research and development in nanotechnology. Students will learn basic principle of physics of nanometer-size systems with a focus on basic physical phenomena.

Pre-requisite: None

APAC3008 NANO CHEMISTRY

Introduction of nanomaterials and nanochemistry, including the concept of nanoscale, the band structure and the corresponding characters of nanomaterials, the fabrication, modification and application of nanosystem.

Pre-requisite: None

APAC3009 POLYMER CHEMISTRY

Introduction of various classes of organic and polymer compounds, emphasizing organic and polymer chemical reactions and mechanisms of major functionalities and their importance in the area of chemistry. Topics covered include: structure and bonding; regio-, geometric, and stereoisomerism; substitution and elimination reactions; synthesis and reactions of alcohols and epoxides; structure and properties of polymer; free radical polymerization; condensation polymerization; crystallization and crosslinking of polymer chains; characterization and application of organic and polymer compounds. Related experiments will also be arranged in this course.

Pre-requisite: APAC1003

APAC3010 THIN FILM PHYSICS

Thin films are used in many aspects in modern technologies. This course mainly focuses on introducing the working principles of various thin film fabrication techniques, such as, thermal evaporation, sputtering, chemical vapor depositions. Physics in obtaining vacuum and/or plasma conditions as well as the applications of thin films in modern society are also going to be covered.

Pre-requisite: None

APAC4000 RESEARCH PROJECT

The course is designed for the students to carry out projects at year 4. The projects should be focused on the scope of Applied Physics and Chemistry.

Pre-requisite: None

APAC4001 ELECTROCHEMISTRY

Introduction to fundamental principles of electrochemistry and electrochemical methods of analysis. The course will cover topics in physical as well as electroanalytical chemistry including thermodynamics, electrode potentials, galvanic and electrolytic cells, electrode kinetics, dynamic electrochemistry, mass transport by migration, diffusion and convection, diffusion layers, and electrochemical instrumentation and techniques. The student will learn about the theoretical and practical aspects of electrochemical measurements whether they be used for determining some

physical property a system. Using a combination of problem-based learning approaches and traditional lectures, the student will develop critical thinking skills in the areas of electrochemical method and data interpretation.

Pre-requisite: None

APAC4002 ELECTRODYNAMICS

Electrodynamics is aimed at exploring the properties of electromagnetic fields, law of motion, and its interaction with charged matter. The main focus of this course is to explain the theory of macroscopic electromagnetic field.

Pre-requisite: None

APAC4003 MAGNETIC PROPERTIES OF MATERIALS

Introduction of electric and magnetic properties of materials, including interesting macroscopic phenomena such as superconductor, multiferroics, frustration, etc., and related macroscopic origins, based on frontier researches and emerging new materials.

Pre-requisite: None

APAC4004 MATHEMATICAL METHODS IN PHYSICS

The course focuses on the partial differential equations in physics, their mathematical structures, as well as related numerical methods. The main topics will cover the introduction of elliptic, parabolic, and hyperbolic equations, their key theoretical results, and numerical methods for solving these equations.

Pre-requisite: GEST1004

APAC4005 MICRO-/NANO-SYSTEMS

This course provides an overall introduction to miniaturization and microelectromechanical systems (MEMS) with basic theoretical principles of the scaling in micro/nano-devices. Key fabrication methodology, material, and structural design of MEMS will be introduced. The state-of-the-art applications of MEMS in interdisciplinary fields will also be covered.

Pre-requisite: None

APAC4007 SEMICONDUCTOR MATERIALS AND DEVICES

Introduction of semiconductor and device physics. Brief introduction of semiconductor growth and the device fabrication processes, including crystal growth, floating zone refining, defects control, doping and lithography. Main focus will be on the properties of semiconductor devices, such as p-n junction, metal-semiconductor contact, MIS and transistor. Also, applications of semiconductor devices will be introduced.

Pre-requisite: APAC3006 or APAC3001

APAC4008 SUPRAMOLECULAR CHEMISTRY

Supramolecular chemistry is “chemistry beyond the molecule”. It is an interdisciplinary field that covers the physical, chemical and biological properties of complex chemical species held together mainly by non-covalent interactions. This course provides an introduction to the field, and discusses the intermolecular forces that dictate the formation of supermolecules and supramolecular assemblies and their properties. Main topics include basics of molecular recognition, host-guest chemistry, self-assembly, supramolecular materials and function, as well as supramolecular medicine.

Pre-requisite: None

APAC4009 THEORY AND MODELING OF MATERIALS PROPERTIES

This course uses the theory and application of atomistic computer simulations to model, understand, and predict the properties of real materials.

Pre-requisite: None

APAC4010 TOPICS IN EMERGING MATERIALS

Materials are fundamental to economic, social and industrial development. They form the basis

for the functionality of the built environment, products and technologies that are vital to modern society. This course will discuss the recent discovery of emerging materials that they can be the key innovative trigger in the development of many new products and technologies.

Pre-requisite: None

CIVL1000 COMPUTER SCIENCE

This course introduces computer science with basic logic and fundamental programming techniques. Fundamental of programming include primitive data types, expressions, control statements, functions, and arrays. Both theoretical concepts and practical skills are involved; students can experience problem solving by formulating programmatic solutions for real problems and translate them into programs with the programming languages: C++ and Fortran.

Pre-requisite: None

CIVL1001 INTRODUCTION TO CIVIL AND ENVIRONMENTAL ENGINEERING

Introduction to the study and practice of civil engineering; subfields in the discipline, such as structural, geotechnical, environmental, water resources, ocean & coastal, transportation, and construction engineering; professionalism and professional registration; engineering ethics and safety. Independent study on various topics will be assigned to students.

Pre-requisite: None

CIVL1002 CIVIL ENGINEERING DRAWING

This course is designed to provide civil engineering undergraduates with basic understanding of the theory and practice of engineering drawings and computer-aided design for civil engineering applications. Students will learn to read and construct blueprints and working drawings by means of lectures, discussion of drawing examples related to existing buildings or projects, CAD practice. Topics will include basic fundamentals of graphics and drafting principles, Auto-Cad fundamentals, architectural drawings, structural floor plan of building, detailing for typical reinforced concrete structural and steel members.

Pre-requisite: None

CIVL1003 STATICS

It is a beginning level course for the preparation of other intermediate courses in solid and fluid mechanics. It introduces the basic concepts, tools and methods for rigid bodies, such as forces, moments, free body diagram, equilibrium, supports, reactions, internal forces and moments, truss, frame, shear force and bending moment diagram, etc.

Pre-requisite: None

CIVL1004 ENGINEERING GEOLOGY

The first part includes the major principles of physical geology covering the structure of the Earth, plate tectonics, volcanism and other mountain building processes, the surface erosion process, and the formation and properties of minerals and rocks. The second part concerns with the application of geological knowledge to civil engineering problems such as landslide, subsidence and earthquake etc. The third part includes the engineering classification of soils.

Pre-requisite: None

CIVL2000 KINEMATICS AND DYNAMICS

This course covers the following topics: kinematics of particles, kinetics of particles; Newton's second law and energy and momentum methods, systems of particles, kinematics of rigid bodies, plane motion of rigid bodies: forces and accelerations and energy and momentum methods, kinetics of rigid bodies in three dimensions, mechanical vibrations.

Pre-requisite: ECEN1008; CIVL1003

CIVL2001 MECHANICS OF MATERIALS

This course introduces fundamental concepts of deformable bodies. It serves as a bridge between mechanics of rigid bodies and structural analysis. It introduces the behavior of structural members, both qualitatively and quantitatively, under different types of external loadings.

Pre-requisite: CIVL1003

CIVL2002 SURVEYING

This course covers the following topics: distance measurement, leveling, angle measurement, surveying errors and adjustments, field operations, traverse, construction surveying, curve measurement, measurement of area and volume, topography.

Pre-requisite: None

CIVL2003 FLUID MECHANICS

Properties of fluids; Fluid statics; Fluid in motion and the conservation of mass; Pressure variation in flows; Momentum and energy principles; Dimensional analysis and similitude; Application in civil engineering: pipe flow, pipe networks, and open channel analysis.

Pre-requisite: GEST1004 and ECEN1008

CIVL2004 MATHEMATICS FOR CIVIL ENGINEERING

There are two parts of this course:

1. linear algebra;
2. probability.

It aims at providing civil engineering students necessary mathematics tools in their study of core courses. Examples will be designed with civil engineering-related problems.

Pre-requisite: MATH1003

CIVL2005 CONSTRUCTION MATERIALS

This course is designed to provide undergraduate civil engineering students fundamental principles of the behavior, physical and engineering properties of various common civil engineering materials, including natural stones, sands, aggregates, cement, concrete, steel, timber and bituminous materials. Selection and design of materials based on their intended use in design and construction are emphasized. The laboratory sessions are designed to provide students a hand-on experience on various material testing concepts and procedures. Written reports and oral presentation of experimental results will be required.

Pre-requisite: None

CIVL2006 STRUCTURAL ANALYSIS

This first course in structures introduces structural design concept and process, analysis of statically determinate structures, analysis of indeterminate structures by flexibility method and stiffness method.

Pre-requisite: CIVL2001

CIVL2007 SOIL MECHANICS

This course covers the following topics: the index properties, plasticity and structure of soil, engineering classification of soil, soil compaction, permeability, seepage, effective stress, stresses in a soil mass, consolidation behavior and strength of soils. The first part of the course introduces fundamental engineering properties and the second part covers the concept of time dependent deformation behavior and the strength of soil.

Pre-requisite: CIVL1003

CIVL3000 STEEL DESIGN

This course covers the following topics: This course is designed to introduce the behaviour and design of steel structural members according to the limit states design concept. The behaviour and design of tension members, compression members, laterally restrained and unrestrained beams, beam-columns and design of connections will be discussed. Students are expected to obtain basic knowledge about the design and failure mode of steel structural members after finishing this course.

Pre-requisite: CIVL2006

CIVL3001 CONSTRUCTION MANAGEMENT AND PRACTICE

This course addresses various aspects of managing construction projects. Topics include: Organizational structure of construction companies; Project delivery systems: traditional, construction management, design-build, BOT; Project estimating and tendering; Project scheduling and tracking; Construction services during design and site administration; Safety considerations and quality control.

Pre-requisite: None

CIVL3002 ENVIRONMENTAL ENGINEERING I

This course is organized with the following chapters: introduction of environmental engineering; chemistry; biology; ecosystems; materials and energy balances; risk perception, assessment and management; hydrology; water characteristics involving physical, chemical and biological aspects; water quality analysis including principles and methods involved in natural water quality process; physical and chemical modelling for water environmental processes involving chemical equilibrium, reaction kinetics, and reactor principles.

Pre-requisite: STGC1001

CIVL3003 ENVIRONMENTAL ENGINEERING II

This course is organized with the following chapters: water quality control in rivers; water and wastewater treatments: physical, chemical and biological processes; design principles for water and wastewater treatment facilities; water treatment processes and unit operations including coagulation and flocculation, sedimentation and flotation, filtration and clarification; reactor principles and wastewater treatments including bio-chemical treatments, secondary sedimentation operation, activated sludge treatment process, bio-film treatment process.

Pre-requisite: CIVL3002

CIVL3004 REINFORCED CONCRETE DESIGN

This course covers the following topics: reinforced concrete material properties; limit state design concepts; introduction to European design standards (i.e. Eurocodes 1 and 2); analysis of frames and shear wall structures; analysis of sections in bending and/or axial loads; yield line and strip methods for slabs; behavior and design of reinforced concrete beams, one-way slabs and two-way slabs considering flexure, shear, anchorage, curtailment and serviceability requirements; behavior and design of short and slender columns under combined bending and axial loads.

Pre-requisite: CIVL2006

CIVL3005 FOUNDATION ENGINEERING

The course introduces civil engineering students the fundamental concepts of foundation analysis and design. This course covers the following topics: Review of Soil Mechanics; Subsurface Exploration; Shallow Foundations; Pile Foundations, and selected topics of foundation engineering.

Pre-requisite: CIVL2007

CIVL3006 CIVIL ENGINEERING HYDRAULICS

Application of the basic laws of fluid mechanics to hydraulic problems. Analysis of simple and multiple steady pipe flows: branching pipes, pipes in series and parallel, and pipe network; flow measurement in pipe. Unsteady flow in pressure conduits: establishment of steady flow and water hammer. Analysis of pumps and turbines. Pump and system characteristics. Steady open channel flow: energy and momentum principles; critical and uniform flow development and their computation; best hydraulic section; gradually varied flow and its profile computation; flow measurement in open channel. Introduction to Hydrology.

Pre-requisite: CIVL2003

CIVL3007 ADVANCED TOPICS IN SOIL MECHANICS

This course is focused on the practical knowledge of soil behavior required by civil engineers for design and construction of geotechnical projects. Two most important topics of soil mechanics, consolidation and shear strength of soils, will be discussed in detail. In addition, other practical

topics including soil compaction, slope stability will be covered.

Pre-requisite: None

CIVL3008 ENVIRONMENTAL MODELING

This course is organized with the following chapters: Key Tool Skills; Mass Balance and Kinetics; Atmospheric Process; Carbon Dioxide Equilibria; Pesticides, Mercury, and Lead; Fates of Organic Compounds; PCBs, Dioxins, and Flame Retardants.

Pre-requisite: None

CIVL4000 GRADUATION PROJECT I

The graduation project (GP) for Civil Engineering Programme is a one-year independent study under the supervision of faculty member(s), which includes either analytical, experimental, computational, or case-study type work. A final report must be submitted near the end of the second semester accompanied with an A3 size poster. The GP will be assessed through continuous work, report writing and oral presentation. The mark will be given as a single unit for both the courses 'CIVL4000 GRADUATION PROJECT I' and 'CIVL4001 GRADUATION PROJECT II', with a total of 6 credits.

Pre-requisite: Final year level

CIVL4001 GRADUATION PROJECT II

The graduation project (GP) for Civil Engineering Programme is a one-year independent study under the supervision of faculty member(s), which includes either analytical, experimental, computational, or case-study type work. A final report must be submitted near the end of the second semester accompanied with an A3 size poster. The GP will be assessed through continuous work, report writing and oral presentation. The mark will be given as a single unit for both the courses 'CIVL4000 GRADUATION PROJECT I' and 'CIVL4001 GRADUATION PROJECT II', with a total of 6 credits.

Pre-requisite: CIVL4000

CIVL4002 INTEGRATED PROJECT DESIGN

The course focuses to provide design skills required to carry out real case projects from inception, feasibility, engineering, procurement, and implementation. Emphases will be placed on presentation of design project in the form of technical descriptive writings, verbal communications, calculations, and drawings. Professional ethic training will be provided by experienced engineer/professor. Before the end of this course, students need to finish and pass the assessment of engineering safety training which is provided either by the Macau Direcção dos Serviços para os Assuntos Laborais 澳門勞工事務局 (for local students) or by the department (for non-local students).

Pre-requisite: None

CIVL4004 ADVANCED MECHANICS OF MATERIALS

This course covers the following topics: plastic deformation of axially loaded member, plastic bending of beams, bending of beams with asymmetric cross sections, shear stress and shear center of thin-walled cross section, strain energy and energy method, calculation of beam deflection with moment diagram.

Pre-requisite: CIVL2001

CIVL4005 ADVANCED STRUCTURAL ANALYSIS

This course is the second course in structural analysis and covers the general stiffness method, the matrix stiffness method, influence lines for determinate and indeterminate structures, virtual work method, plastic analysis of beams and frames.

Pre-requisite: CIVL2006

CIVL4006 STRUCTURAL VIBRATIONS

This course introduces dynamic behaviour of structures and methods to obtain structural response under dynamic load and base excitation.

Pre-requisite: CIVL2006

CIVL4007 ADVANCED REINFORCED CONCRETE DESIGN

This course covers the following topics: Introduction to Macao codes for loadings (including vertical loads, wind loads, and seismic loads) on structures and the reinforced concrete structural design; behavior and design of flat slabs and stair slabs; behavior and design of structural walls, foundations and earth retaining structures; prestressed concrete.

Pre-requisite: CIVL3004

CIVL4008 STRUCTURAL SYSTEMS AND ANALYSIS

This course covers the following topics: structures and the behavior of various types of buildings; structures and the behavior of various forms of bridges; structures and the behavior of catenary cable systems; suitability of a structural type under given conditions.

Pre-requisite: CIVL2006

CIVL4009 SELECTED TOPICS IN GEOTECHNICAL ENGINEERING

Any specialized topic in Geotechnical Engineering chosen by the staff member who has experience in that particular field. The topic will include new theories, design concepts and procedures.

Pre-requisite: CIVL2007

CIVL4010 EARTH RETAINING SYSTEMS

Earth retaining systems form an important component of many civil engineering projects. In particular, it is a necessary element for deep excavations, which are commonly performed in modern cities to obtain underground space. This course will provide extensive discussions for the design and analysis of retaining systems including gravity walls, sheet-pile walls, and diaphragm walls. Students will learn to use computer software to analyze a retaining wall for deep excavation. The course will cover the following topics: lateral earth pressure, retaining wall types, analysis of backfilled walls and in-situ walls, stability of wall and base, settlements due to excavation, strut and anchor systems, diaphragm walls: slurry control, concrete technology, instrumentation for deep excavation.

Pre-requisite: CIVL2007

CIVL4011 APPLICATION OF NUMERICAL METHODS IN GEOTECHNICAL ENGINEERING

This course introduces students the application of numerical methods in geotechnical engineering. Basic background of the finite element (FE) and finite difference (FD) methods are briefly introduced with emphasis on geotechnical applications. A finite element commercial programme (GeoStudio) is introduced to students to analyze geotechnical problems, especially using Sigma/W for stress and displacement modeling and Seep/W for seepage analysis. The course includes the following topics: Geotechnical analysis; Finite Element Theory for Linear Materials; Modeling of Shallow Foundations; Geotechnical Considerations; Finite Difference Method, Modeling of Construction and Excavations; Modeling of Seepage.

Pre-requisite: CIVL2007

CIVL4012 INTRODUCTION TO SOIL IMPROVEMENT

This is the introductory course of ground improvement techniques for marginal and problematic soil. The content includes the basics of laboratory and in situ tests for geotechnical projects. Then, surface compaction, admixture stabilization and deep densification are covered. Ground modification by consolidation and vertical drains are then covered. Various types of in situ reinforcement techniques such as stone columns, soil soils are introduced.

Pre-requisite: CIVL2007

CIVL4013 ENGINEERING ECONOMICS AND ETHICS

This course aims to provide sound and comprehensive coverage of the concepts of engineering economics and ethics. Topics include: role of engineers in business, time value of money, major analysis methods, codes of ethics, rights and responsibilities of engineers and ethical issues in engineering practice.

Pre-requisite: None

CIVL4014 CONSTRUCTION PLANNING, SCHEDULING AND CONTROL

This course applies modern management methods to planning and scheduling for construction projects. Topics include: presentation of planning information, developing a network model, precedence/arrow diagrams, critical path method, time-cost trade-offs, resource allocation and leveling, PERT & Monte Carlo techniques, project monitoring, control and update, linear scheduling and computer scheduling.

Pre-requisite: None

CIVL4015 CONSTRUCTION METHODS, PROCEDURE AND EQUIPMENT

This course addresses various aspects of contemporary construction methods and equipment. Topics include: equipment economics, engineering fundamentals of moving earth, excavating, loading & hauling equipment, foundation and basement construction, concrete construction practices and formwork design.

Pre-requisite: None

CIVL4016 ENVIRONMENTAL ENGINEERING III

This course is organized with the following chapters: Conservation Laws and Continua; Low-Concentration Particle Suspensions and Flows; Interactions of Small Charged Particles; Adsorption, Partitioning, and Interfaces; Diffusive Mass Transport; Filtration and Mass Transport in Porous Media; Reaction Kinetics.

Pre-requisite: CIVL3003

CIVL4017 ESSENTIALS TO ENVIRONMENTAL BIOTECHNOLOGY

This course reflects the most current and exciting fields of environmental science engineering, as a combination of ET (Environmental Technology) and BT (Bio-Technology).

Pre-requisite: None

CIVL4018 WASTEWATER TREATMENT ENGINEERING

This course nourishes students with engineering knowledge of the comprehensive management for the collection and transport, and the treatment and disposal of sewage/wastewater.

Pre-requisite: None

CIVL4019 TRAFFIC ENGINEERING

This course deals with fundamental introduction of traffic engineering, such as human factor design, geometric design and section design, traffic flow theory analysis, capacity analysis, traffic count methods, signalized intersection analysis; introduction of ITS

Pre-requisite: None

CIVL4020 TRANSPORTATION PLANNING AND PUBLIC TRANSPORT SYSTEM

In the first part of the course, it deals with introduction of urban transportation planning system such as data collection, trip generation, trip distribution, mode choice and trip assignment. In the second part, it familiarizes the students with important issues of public transport system such as system, technology and quality of service. Various kinds of public transportation system like bus, bus rapid transit, light rapid transit, railway rapid transit will be discussed.

Pre-requisite: CIVL4019

CIVL4021 SPECIAL TOPICS IN CIVIL ENGINEERING

Members of the staff will arrange special courses on updated topics for properly qualified students.

Pre-requisite: None

CISC1001 PROGRAMMING SCIENCE

This course introduces the notion of algorithms and teaches principles of problem solving. It also introduces fundamental concepts of programming, such as scalar data types, variables, functions, choice, iteration, recursion, arrays, strings, enumerations, record types, and file processing. These concepts are introduced through the C programming language.

Pre-requisite: None

CISC1002 DISCRETE STRUCTURES

This course introduces the fundamental ideas of discrete mathematics used in many basic computer-related concepts. These include Set Theory, Logic, Counting, Relations, and Graph Theory. Throughout the course, students will also be trained in developing skills in mathematics, such as Modeling, Abstraction and Proof Methods.

Pre-requisite: None

CISC1006 PROBABILITY AND STATISTICS

Sample space and events, axioms of probability; Conditional probability, independence and the Bayes Rule; Random variables, discrete probability distribution, continuous probability distribution, joint probability distribution; Mean, variance, covariance and correlation; Some discrete probability distributions: uniform, binomial, hyper geometric, geometric, negative binomial and Poisson; Some continuous probability distributions: normal, exponential, gamma, chi-Squared, lognormal and Weibull; Sampling distributions; Confidence intervals; Hypotheses Testing; Regression and correlation analysis.

Pre-requisite: GEST004

CISC1000 INFORMATION TECHNOLOGY FUNDAMENTALS AND PRACTICES

This foundational course introduces and explores the impact of information technology (IT) in our modern society. The course is designed to provide the fundamentals and practices for an effective use of IT in our daily lives. The course is divided in three modules:

- Module I introduces the fundamentals of IT, the Internet and the Web, connectivity and mobility, and important issues in computer privacy, security and ethics.
- Module II focuses on application software for computers and mobile devices.
- Module III explores computer hardware and computer software, mobile devices and apps, communication and networking.

Pre-requisite: None

CISC1004 INTRODUCTION TO COMPUTER SCIENCE

This is an introductory course on Computer Science (CS) for first year students. The course is designed to give an overview of CS, and its use in various applications, such that students will be more aware and engaged in their major. Details pertaining to the theoretical aspects of CS will be covered in other classes. This course is first divided into topics covering the fundamentals of CS, before shifting to its applications in the real world. Upon completion of this course, students will have a better understand of CS, and be more motivated to study its other aspects.

Pre-requisite: None

CISC2001 COMPUTER ORGANIZATION

Introduction is given to the architecture and organization of a computer system, with a contemporary chip as a sample for introducing machine language, assembly language and Central Processing Unit (CPU). The contents include various parts of computers: CPU, Memory, Input/Output. The primary features and working principles in each part will be introduced in detail, including interrupts, direct memory access, virtual memory and memory management, algorithms and hardware implementation of integer and floating-point number operations.

Pre-requisite: None

CISC2002 NUMERICAL METHODS AND COMPUTATION

Introduction to data representations and computer arithmetic; Basic techniques in MATLAB programming; Numerical solution of nonlinear algebraic equations; Approximating functions; Numerical differentiation and integration; Numerical solution of ordinary differential equations.

Pre-requisite: GEST004

CISC2003 OBJECT ORIENTED PROGRAMMING AND DATA STRUCTURES

This course aims to introduce basic features of objected oriented programming and data structures.

Pre-requisite: CISC1001

CISC2004 COMPILER CONSTRUCTION

Modern compiler design, use of automatic tools, compilation techniques and programme intermediate representations; scanner, recursive descent parser, bottom-up parser, code generation and optimization; semantic analysis and attribute grammars, transformational attribute grammars.

Pre-requisite: CISC1002

CISC3000 INTRODUCTION TO DATABASE SYSTEMS

The course provides an overview of database management, database system architecture, and an in-depth study of relational database systems, including both the theoretical aspects of the relational model as related to relational data objects, relational data integrity, and relational data manipulation (using the relational algebra and relational calculus); and the practical aspects of relational implementations, using the SQL language and views. The course also includes a study of a commercially available database system and database application programming.

Pre-requisite: None

CISC2005 PRINCIPLES OF OPERATING SYSTEMS

This course is devoted to the study of the design principles and implementation issues of contemporary computer operating systems. The main topics include a detailed analysis of processes, multithreading, concurrency, memory, input/output, and file management.

Pre-requisite: CISC2001

CISC2006 ALGORITHM DESIGN AND ANALYSIS

This course aims to introduce basic features of objected oriented programming and data structures.

Pre-requisite: CISC1002, CISC2003

CISC2007 HUMAN-COMPUTER INTERACTION

This course provides an introductory level of human-computer interaction (HCI). The success in the development of highly usable interactive computing systems lies in the understanding of human factors in the process of design. To this aim, this course covers three different perspectives: human – the cognitive aspects, human perceptions and limitations, errors; computer – the current technology for presenting interactive information; and the interaction – from user requirement analysis, interface design, to interface evaluation. This course illustrates the fundamental concepts of human-computer interaction and user-centered design thinking. Specifically, the user-centered design process will be introduced in the lectures and practiced by students through a term-based group project. In addition, trendy HCI research topics will be assigned to individuals to read, research, and share in the class through formal presentations.

Pre-requisite: None

CISC2008 OBJECT- ORIENTED ANALYSIS AND DESIGN PATTERNS

The course discusses object-oriented analysis and design using Unified Modeling Language (UML). The main contents are using case diagram, class diagram, sequence diagram, state diagram, activity diagram, and component diagram of UML. And several design patterns are also introduced. UML and its CASE tool are used to analyze and design the course project systems.

Pre-requisite: None

CISC3001 COMPUTER NETWORKS

This course covers data communication techniques, data transmission, switching techniques, layered network architectures, data link layer protocols, medium access control sublayer and local area networks.

Pre-requisite: CISC2005

CISC3002 MOBILE APPLICATION PROGRAMMING

The growth of mobile devices especially smart phones has led to the high demand of mobile programmers. This course will introduce mobile programming by hands-on experience on mobile

application development for Android based mobile devices. Topics will include Android application development environment, user interface design, intents and services, data persistence, networking and messaging, sensors, and graphics. Students are expected to master basic knowledge to develop a working application on Android platform and demonstrate the capability to analysis, evaluate, and utilize different Android APIs to finish the task at hand.

Pre-requisite: CISC1001

CISC3003 WEB PROGRAMMING

This course teaches students the skills necessary for creating web applications, including programming for both the client and the server side. Given the fast pace of change in this highly dynamic field, the specific technologies taught will change over time. At present this will include popular technologies such as HTML5, CSS, JavaScript, several popular JavaScript libraries and frameworks, as well as server-side technologies such as PHP and Node.js. The course will focus heavily on developing standards-compliant, accessible web sites using cross-platform open technology.

Pre-requisite: CISC1001

CISC3005 ADVANCED DATABASE SYSTEMS

This course provides an in-depth study of: query optimization; transaction management; concurrency control; database recovery; database integrity; database security; distributed database systems and data normalization. In which, information retrieval and web search engines are also briefly introduced and discussed.

Pre-requisite: CISC3000

CISC3006 COMPUTER BASED SIMULATION

Application of modeling techniques to understanding the operation and design of complex systems such as manufacturing systems, data processing systems, transportation systems, and organizational systems. Coverage includes problem definition, system identification, and performance evaluation. Traditional discrete events simulation is essential to study the transient phenomena, through suitable analysis and prediction models. Software modeling of selected systems in terms of specific knowledge and action models should serve as the course project to be collaborated by students working in self-directed work teams. Pedagogy: project-based learning with students cooperatively working in professional research groups, whose group-based and individual profiles, should track the results for evaluation purpose.

Pre-requisite: None

CISC3007 FORMAL LANGUAGES AND AUTOMATA

This course introduces the fundamental concepts of formal languages and automata. It emphasizes the general principles of formal languages, grammars and automata theory. Topics include finite automata, regular expressions, regular languages and their properties, context-free grammars, languages and their properties, pushdown automata, Turing machines and undecidability.

Pre-requisite: CISC1002

CISC3009 COMPUTER GRAPHICS

This course is designed to provide students with a comprehensive introduction to 2D and 3D computer graphics techniques. Topics covered include graphics systems, input and interactive techniques, modeling and representation, shading and illumination, rendering and texturing. To be more practical, the knowledge will be learnt by using an industrial standard in computer graphics, called OpenGL.

Pre-requisite: MATH1003

CISC3010 DISTRIBUTED COMPUTER SYSTEMS

This course is a senior-level elective course on Distributed Systems for Computer and Information Science. The key principles about distributed systems include: architecture, processes, communication, naming, consistency and replication, and security.

Pre-requisite: CISC3001

CISC3011 DIGITAL IMAGE PROCESSING

This course introduces the fundamentals of digital image processing for senior undergraduate students. It emphasizes the general principles and techniques of image processing. Topics include digital image fundamentals, intensity transformations and spatial filtering, filtering in the frequency domain, image restoration, color image processing, image compression, morphological image processing, image segmentation.

Pre-requisite: MATH1001

CISC3012 ARTIFICIAL INTELLIGENCE

Introduction to AI, definition of AI, disciplines of AI; the concept of agent in AI; problem solving agent, building search tree, local search; logical agent, knowledge base representation, logical reasoning. Application programming in PROLOG.

Pre-requisite: CISC2006

CISC3014 INFORMATION RETRIEVAL AND WEB SEARCH

This course covers basic and advanced techniques for text-based information systems: efficient text indexing, Boolean and vector space retrieval models, evaluation, web search techniques (crawling, link-based algorithms, web document clustering/classification, text mining, and recommendation).

Pre-requisite: None

CISC3015 DATA AND INFORMATION VISUALIZATION

This course is to provide students with a comprehensive introduction to data visualization techniques. These techniques are taught in theoretical and technical learning. At the same time the students are learning the algorithms and methods, they have to make practice to learn how to visualize various kinds of data types, by using available software tools and/or programming.

Pre-requisite: None

CISC3016 MULTIMEDIA COMPUTING

This course will introduce general principles and techniques in multimedia programming. The main topics will cover multimedia data fundamentals and representation, digital image and drawing creation and modification, audio manipulation and modern music synthesis, animation and video processing. The programming language used in this course will be Java. The goal is to improve the students' insight in multimedia technology and skills on the multimedia programming, which will enable students to develop new and creative ways of using multimedia in the future.

Pre-requisite: CISC1001

CISC3017 BIOINFORMATICS

Bioinformatics is the study of biological information through computer modeling or analysis. Its goal is to reveal relationships between sequences, structures, and functions of molecules. In this course, we intend to give an in-depth introduction of the algorithmic techniques used in bioinformatics. Topics which will be covered include sequence similarity analysis, suffix tree, genome analysis, biological database search, phylogenetic analysis, protein structure manipulation and modeling. This course is designed for undergraduate CS students and assumes no prior knowledge of molecular biology beyond the high school level. Basic concepts of molecular biology will be given in the first lecture, as well as in subsequent lectures before the computational problems are defined. The ultimate goal of this course is to prepare students with the knowledge and skills to conduct research in the area of bioinformatics.

Pre-requisite: CISC2006

CISC3018 CLOUD COMPUTING AND BIG DATA SYSTEMS

This course aims at providing students with a solid foundation of cloud computing technologies. The topics include cloud computing applications, cloud services, cloud computing platforms, and big data processing engines.

Pre-requisite: None

CISC3019 COMPETITION PROGRAMMING AND PROBLEM SOLVING

This course aims at providing students with creative problem solving and competitive programming skills. International programming competition-type problems will be used to motivate the study of algorithms, programming, and other topics in computer science. Enrollment in the course requires approval of the course instructor.

Pre-requisite: CISC2003

CISC3020 FORMAL SOFTWARE SPECIFICATION

This course aims to introduce formal software specification. The main contents include formal specification language, requirements specification, pre and post conditions, formal software design modeling, formal verification and model checking tools with some practical case studies.

Pre-requisite: None

CISC3021 MULTIMEDIA FORENSICS AND SECURITY

The digital revolution has made a profound impact on our society and has changed the way we work and live. An increasing amount of information can now be acquired, processed, archived, and shared in electronic forms. A major hurdle holding back the wider deployment of services to make multimedia information broadly available to everyone in our society is the lack of security and forensic technologies to assure that content is used for its intended purpose and by its intended recipients. This graduate advanced-topic course focuses on the research and development on the forensic and security technologies for multimedia information.

Pre-requisite: CISC3011

CISC3022 SOFTWARE TESTING

This course aims to introduce software testing concepts and techniques, including software errors, failure, requirements specification, test case design, black box testing, white box testing, unit testing, integrated testing, system testing, automated testing, regression testing, and testing tools. Students will apply their learned testing concepts and techniques to testing some software case studies.

Pre-requisite: None

CISC3023 MACHINE LEARNING

This course introduces key machine learning techniques and their applications. The topics include overview of supervised learning, linear models, kernel methods, decision trees, neural networks, nearest neighbours, ensemble models, and unsupervised learning. Upon completion of this course, students should be able to apply various machine learning techniques in develop intelligent data analysis systems.

Pre-requisite: None

CISC3024 PATTERN RECOGNITION

This course introduces the fundamentals of pattern recognition for senior undergraduate students. It emphasizes the general principles and techniques of pattern recognition. Topics include classifiers based on Bayes decision theory, linear classifiers, nonlinear classifiers, feature selection, feature generation, unsupervised learning and clustering algorithms.

Prerequisite: CISC1006

CISC3025 NATURAL LANGUAGE PROCESSING

This course introduces fundamental concepts and skills associated with the design and implementation of different natural language processing systems covered from morphology, syntax and semantics. The main topics include regular expressions, (weighted) minimum edit distance, language modelling, N vie Bayes (generative model), maximum entropy (discriminative model), text classification, sequence labelling, POS tagging, syntax parsing and computational lexical semantics. The course also includes an overview of practical natural language processing applications.

Pre-requisite: None

CISC3026 SOFTWARE ENGINEERING PRINCIPLES

The course discusses the theories, methods and tools of software engineering for developing large and complex software systems. The main contents are requirement specification, system modeling, architectural design, object-oriented analysis and design, verification and validation. The Unified Modeling Language (UML) and its CASE tool are used to analyze and design the course project systems.

Pre-requisite: None

CISC3027 SPECIAL TOPICS IN COMPUTER AND INFORMATION SCIENCE

Aim to introduce different advanced topics in computer science", the topic may change from year to year.

Pre-requisite: None

CISC3028 ENTREPRENEURSHIP IN COMPUTER SCIENCE

The course aims to provide entrepreneurship skills to our computer science students. The course contrasts entrepreneurs with managers, contrasts the different kinds of entrepreneurship and discusses the several steps of the entrepreneurial process including starting, growing, managing, leading and exiting.

Pre-requisite: None

CISC3029 COMPUTER VISION

This course introduces to students the basic concepts, fundamental principles and algorithms, and major applications in practice in computer vision area. It covers Digital Image Representation, Binary Image Analysis, Gray Level Image Segmentation, Edge detection Techniques, Digital Morphology, Color Image Processing Fundamentals, and Motion estimation, etc.

Pre-requisite: None

CISC4000 GRADUATION PROJECT

An independent study under the supervision of a faculty member.

Pre-requisite: None

CISC4001 PROFESSIONALISM AND ETHICS IN COMPUTER SCIENCE

This course aims to introduce professionalism and ethics for computer science. The common issues encountered by computer scientists and IT professionals are discussed, including intellectual property, privacy, reliability and security in IT, health and safety in IT, the major normative ethical theories that are applicable to computer science. The code of conduct in computer science including case studies is addressed.

Pre-requisite: None

CISC4002 SOFTWARE PROJECT MANAGEMENT

This course introduces project management as it relates to the software life cycle. Different software life cycle models, and the project management activities in each phase of the life cycle, are examined. Project planning activities are introduced, including activity planning, resource estimation and the use of software metrics, risk analysis, resource allocation and project scheduling. This course concludes with a study of project monitoring and control, and project team organization.

Pre-requisite: None

CISC4003 INFORMATION SECURITY

The course introduces students to the fundamental issues concerning information security and applied cryptography. The areas covered are protecting information using symmetric and public key cryptography, cryptographic hash functions and standards, key exchange, authentication, digital signatures, digital certificates, secure electronic transactions, non-malicious programme errors, viruses and other malicious code, and firewalls.

Pre-requisite: CISC3000, CISC2005 and CISC3001

ECEEN1001 INTRODUCTION TO ELECTRICAL AND COMPUTER ENGINEERING

Overview of Electrical and Computer Engineering; Basic concepts of ECE; Introduction to situation of ECE around the area; Basic knowledge used in the laboratory.

Pre-requisite: None

ECEEN1003 INFORMATION TECHNOLOGY REVOLUTION AND ELECTRONICS

The main objective of this course is to provide students with a broad vision about the evolution of technology, in the modern age, since its early beginnings, by describing the significance of the 3 Industrial Revolutions throughout time, since the 1st initiated with the Steam Engine (James Watt-1763), followed by the 2nd started with the inventions of Electrical Power Generation (Michael Faraday-1831) and the Combustion Engine (Siegfried Marcus-1864), until the 3rd kicked-off with the discovery of the Transistor (John Bardeen, Walter Brattain and William Shockley-1947) that really marked the commencement of what is now known as the Information Technology Revolution, led by continuous and fast developments in Electronics, Computing and Telecommunications. Current state-of-the-art and well-known information technology platforms and gadgets will be briefly introduced at the system-level related with their human interfaces, in particular the internet, the mobile phone, the computer, the video game console, the media player, the global positioning system (GPS), and as a motivation for showing what is underlying inside such systems in terms of Electronics. Then, an evolution of silicon semiconductors from the original transistor until the present microchips and fiber-optics networks will be described with projections into the future in terms of unlimited circuit integration (processing capability related with the number of transistors on a chip) and bandwidth availability (speed of communications).

Pre-requisite: None

ECEEN1004 EMBEDDED SYSTEMS

The goal of this course is to develop a comprehensive understanding of the technologies behind the embedded systems, particularly, those using computing elements (such as processor, DSP, or FPGA) and the supported software technology (OS, data structure, multi-tasking, etc.). The students develop an application of the technology capabilities and limitations of the hardware and software components for building embedded systems, and methods to evaluate design tradeoffs between different technology choices. Students are required to finish a design project.

Pre-requisite: ECEEN1000

ECEEN1005 CIRCUIT ANALYSIS

Elementary Resistive Circuit Theorems and Analysis Techniques: KCL, KVL, Nodal & Mesh Analysis and their Matrix formulation, Superposition, Source Transformation, Thevenin & Norton Equivalents, Maximum Power Transfer. Ideal OP AMP Model and its Circuit Analysis Methods. Energy Storage Elements, 1st- and 2nd-Order Circuit Analysis: Natural, Forced and Completed Response. Sinusoidal Steady-State Analysis: Phasor, Impedance and Admittance. AC Steady-State Power: Instantaneous and Average Power, Power Factor and RMS Values. Practice includes problem solving, PSPICE and Laboratory Works. Pre-requisite: GEST1004

ECEEN1006 ENGINEERING AND SOCIETY

This course aims to provide comprehensive coverage of the societal responsibilities and challenges for engineers. This course discusses the ethical codes for engineering profession. The influences of technology on society and global development and their interrelationships are explored. Topics including intellectual property rights, legal and business issues will also be discussed.

Pre-requisite: None

ECEEN1011 DIGITAL SYSTEMS

The objective is to provide the students with basic principles of Digital Logic Design. In this course, we study the Algebra of Logical Variables, Logical Functions, Basic Combinational Circuits, Flip-flops, Registers, Counters, Arithmetics Operations, the Memory Architecture, Sequential Circuits, Controllers, Elementary and more sophisticated Computer Architectures, and certain aspects of the I/O Operations. HDL with FPGA implementation will be included in Laboratory works.

Pre-requisite: None

ECEN1012 COMPUTER PROGRAMMING AND NETWORK FUNDAMENTALS

This course introduces the fundamental concepts and terminologies of computer programming, and covers the skills in developing and writing computer programs to achieve different functions and network protocols. This course also introduces basic knowledge and fundamental architecture of data and computer networks, the principles of protocol design and the analysis of network performance. The topics cover C programming language, arithmetic and logic statements, data types, control structure, socket programming, the layer architecture and protocols of computer networks, packet switching, network layer routing, physical technologies, etc.

Pre-requisite: None

ECEN1013 PHYSICS FOR ELECTRICAL AND COMPUTER ENGINEERING

This is a calculus-based general physics course for ECE students with a laboratory covering classical mechanics and its applications, fluids, oscillations, waves, fundamental optics and its applications.

Pre-requisite: None

ECEN2001 MEASUREMENT AND INSTRUMENTATION

The course commences with a brief review of some basic terminology, systems of units, measurement standards, probability and statistical analysis, traceability and types of error in measurement. The course then covers different electronic and digital measuring instruments, e.g. oscilloscopes, signal generators, signal analysis instruments, etc. Transducers and signal conditioning circuit design are included.

Pre-requisite: GEST1004

ECEN2002 ELECTRIC MACHINES

This course provides fundamental knowledge on electric machines. It includes three phase circuit analysis, principles and static models of transformers and different machines, and relay control.

Pre-requisite: ECEN1005

ECEN2003 FUNDAMENTAL ELECTRONICS

This course mainly introduces basic electronic devices namely operational amplifiers (Op-Amps), diodes, bipolar junction transistors (BJTs) and field effect junction transistors (FETs). In each device, the DC and AC analysis are firstly presented elucidating fundamental parameters of analogue electronic circuitry model like gain, input impedance, output impedance and so forth. An introductory PSpice simulation of these devices and some of their application circuits is included. The experimental validation of the elementary analogue circuitry using analogue and digital testers is also given. The course objective allows the students to acquire the basic engineering technique and ability to design and analyze the circuits of Op-Amps, diodes, BJTs and FETs using modern computing tools as well as measurement and test facilities.

Pre-requisite: ECEN1005

ECEN2005 ELECTROMAGNETISM

The basic relations for static electric fields in free space and material media, Coulomb's law, Gauss' Law; The steady electric current and static magnetic field, Ohm's Law, Joule Law, Kirchhoff's Law, Biot-Savart Law, Ampere's Law; The static magnetic field of ferromagnetic materials; Magnetic materials and hysteresis; comparison of electric and magnetic relations involving polarization and magnetization; Bounded fields and Laplace's equation; Time changing electric and magnetic fields; Faraday's Law. Maxwell's displacement current; Boundary relations for electric and magnetic fields; The relation between field and circuit

Pre-requisite: None

ECEN2006 NUMERICAL METHOD AND COMPUTATION

Introduction to data representations and computer arithmetic; Basic techniques in MATLAB programming; Numerical solution of nonlinear algebraic equations; Approximating functions;

Numerical differentiation and integration; Numerical solution of ordinary differential equations
Pre-requisite: GEST1004

ECEN2009 BIOLOGY

Basic principles of plant and animal biology, including cell biology, biochemistry, energetics, genetics, evolution, and ecology. Appreciation of scientific method in general and biological methodology. Lab component will emphasize the use of methodologies typical of biological studies.

Pre-requisite: None

ECEN2010 SEMICONDUCTOR DEVICE PHYSICS

The main goal is to provide the students with an understanding of the relation between physical structure and circuit behavior of semiconductor active devices. The emphasis is on simple models of the semiconductor, the discussion of the properties of potential barriers and field effect, with the MOSFET as the centerpiece of the course. Simple one-device circuits are used to introduce non-linear behavior, and make the connection to the device physics. The students will learn the relation between external circuit parameters (as used in SPICE) and the device internal structure. At the end of the course the students will know the basic mechanism of rectification, amplification and switching and their implementation with various types of semiconductor devices.

Pre-requisite: None

ECEN2011 INTRODUCTION TO ELECTRO-ROBOT DESIGN

The course introduces the fundamental knowledge on the design, implementation and evaluation of a robot and its sub-systems. It covers the basic principles of analog and digital circuits as well as robot sensing and control mechanisms. Students have to apply the knowledge and principles learned to design and build a functional robot by the end of the course.

Pre-requisite: None

ECEN2015 APPLIED ELECTRONICS

This course is devoted to the design and analysis of the advanced analogue application circuits with the emphasis on differential and multistage amplifiers, feedback circuits, filters, oscillators and power amplifiers. Throughout the course, the basic parameters of application circuits of audio and video consumer electronic systems; for example frequency response, bandwidth, power conversion efficiency and so forth are studied. Using circuit theory based CAD, both the time- and frequency-domain simulations are also given. In addition, the experimental verification of these application circuitries using time- and frequency-domain testers is offered. The course objective allows the students to acquire the adequate engineering technique and ability to design and analyze the transistor circuits of audio and video applications using modern computing tools as wells as advanced measurement and test facilities.

Pre-requisite: ECEN2003

ECEN2017 SIGNALS AND SYSTEMS

Basic Continuous-Time Signals and its Transformations. Basic System Properties. Linear Time-Invariant System Analysis: Properties, Convolution Sum and Convolution Integral, Impulse and Step Responses. C-T Fourier Analysis: Fourier Series and Fourier Transform. Time and Frequency Characterization of C-T Signals and Systems: Frequency Response, 1st- and 2nd-Order Systems, Bode Plots, Zero-State System Response. Introduction to Filtering, Modulation and Sampling. Laplace Analysis: Bi- and Uni-lateral Laplace Transform, Pole-Zero Plot and Stability, Transfer Function, Application in Circuit Analysis. Practice includes problem solving, MATLAB and Laboratory Works

Pre-requisite: ECEN1005

ECEN2018 LINEAR ALGEBRA, PROBABILITY AND STATICS FOR ELECTRICAL AND COMPUTER ENGINEERING

The first part of this course gives an introductory treatment of linear algebra that is suitable for a first undergraduate course on the topic. Its aim is to present the fundamentals of linear algebra in

the clearest possible way. Sound pedagogy is the main consideration. The course will focus on Systems of linear equations and matrices, Determinants, Vectors in 2-space and 3-space, Euclidean vector spaces, General vector spaces, Eigenvalues and eigenvectors, and Linear transformations. An introduction to probability theory and statistics, with an emphasis on solving problems in engineering. The second part of the course will focus on Probability and statistics. Topics in probability include discrete and continuous random variables, probability distributions, sums and functions of random variables, the law of large numbers, and the central limit theorem. Topics in statistics include sample mean and variance. Exercises and problems presented in the classes are tailored to help students to understand the key topics and their application to practical engineering problems.

Pre-requisite: None

ECEN2019 POWER SYSTEM ENGINEERING AND PROTECTION

This course introduces the fundamentals of power system engineering and protection including basic principle of transformer and transmission line, protective devices, fault, protective relay and control, as well as protection for distribution circuits and transmission lines. It emphasizes on the basic understanding of protection concept in power system. Topics include introduction to power system components, protective devices, over-current protection and co-ordination, differential protection, distance protection. Protection for low voltage power distribution network.

Pre-requisite: None

ECEN3000 CONTROL SYSTEMS

This course deals with the fundamental principles for analysis and design of control systems. Topics include dynamic modeling, dynamic response, basic properties of feedback, root-locus design method, frequency-response design method, and state-space design.

Pre-requisite: ECEN2000

ECEN3001 DIGITAL SIGNAL PROCESSING

Discrete-time Signals and Systems; Sampling Theorem and Reconstruction; Transform Analysis for LTI Discrete-Time Signals and Systems: Discrete-Time Fourier Transform (DTFT), z-Transform, Discrete Fourier Transform (DFT), Fast Fourier transform (FFT); Fundamental Digital Filter Design Techniques: Infinite Impulse Response (IIR) and Finite Impulse Response (FIR) Filters; Introduction to the Applications of Digital Signal Processing; Practice includes problem solving, MATLAB based Project Works.

Pre-requisite: ECEN2000 and MATH2000

ECEN3002 ELECTRICAL AND COMPUTER ENGINEERING SEMINARS

Students are required to participate in ECE related seminars and conferences so they may have the chances to contact the progress of ECE in different disciplines.

Pre-requisite: None

ECEN3003 INTRODUCTION TO BIOMEDICAL ENGINEERING

This is an introductory course to the fundamentals of Biomedical Engineering from the view point of Electrical and Electronics Engineering for senior undergraduate students. It emphasizes general concepts and techniques of biomedical engineering. Topics include overview of human body, biomedical electrodes, sensors and transducers, biomedical signals and its measurement techniques, biomedical electronics, electrical safety, and embedded system in biomedical equipment.

Pre-requisite: None

ECEN3004 FUNDAMENTAL BIO-ELECTRICITY

This course is designed to prepare senior undergraduate students with fundamental knowledge of the bioelectric phenomena. Topics include general principles of the electric and magnetic fields in the biological environments, and application of these principles to disease diagnosis.

Pre-requisite: ECEN2009 and ECEN3003

ECEN3005 BIOMEDICAL ELECTRONICS

Introduction to biomedical signals; basic circuit analysis for biomedical signals; design of bioamplifier circuits; characteristics of linear and nonlinear circuit elements; design of basic electronic circuits, principles and practice of bioelectronic measurements.

Pre-requisite: ECEN2003 and ECEN3003

ECEN3006 INTRODUCTION TO BIOMEDICAL SIGNAL ANALYSIS

Introduction to stochastic signal analysis methods used in biomedical signal processing and analysis. Fundamental techniques to analyze and process signals that originate from biological sources: ECGs, EMGs, EEGs, blood pressure signals, etc. Analog and digital filtering.

Pre-requisite: ECEN2007 and ECEN3001

ECEN3007 POWER ELECTRONICS

The course includes operating characteristics of power semiconductor devices, such as Bipolar Junction Transistors, IGBTs, MOSFETs and Thyristors, and fundamentals of power converter circuits including dc/dc converters, ac/dc rectifiers, dc/ac inverters and ac/ac converters.

Pre-requisite: ECEN1005

ECEN3008 POWER SYSTEMS ANALYSIS

This course provides fundamental knowledge on power system. It includes calculation on line parameters, line models, admittance matrix calculation, load flow calculation, symmetrical networks, machine model for short circuit calculation, symmetrical and asymmetrical short circuit calculation and state estimation

Pre-requisite: ECEN1005

ECEN3009 POWER QUALITY AND ENERGY SAVING

This course is designed to prepare senior undergraduate students with knowledge and manipulative skills for employment in the electrical industry. It emphasizes the theory and practice of the power quality and energy saving skills. Topics include power quality standards, Power Quality Monitoring, HV/MV/LV Power Quality Compensators, Energy Efficient Standards, Energy Measure and Energy Saving Equipment.

Pre-requisite: None

ECEN3010 POWER ELECTRONICS DESIGN AND IMPLEMENTATION

Fundamentals of power electronics drivers, components and controller are included and reviewed. Design considerations of power electronic rectification, controlled rectification, DC chopper power modulators, and DC-to-AC inverters are discussed. Fourier series analysis of inverter waveforms, power filter design and feedback control of a power electronics system are examined. Design and implementation of a power electronics system is performed.

Pre-requisite: ECEN3007

ECEN3011 ELECTRIC DRIVE

This course will describe the structure of Electric Drive Systems and their role in various applications such as flexible production systems, energy conservation, renewable energy, transportation etc. This course will cover the basic principles of power electronics in drives using switch-mode converters and pulse width modulation to synthesize the voltages in dc and ac motor drives, the operation of dc motor drives to satisfy four-quadrant operation to meet mechanical load requirements, design torque, speed and position controller of motor drives, space vectors control, speed control of induction motor drives in an energy efficient manner using power electronics, the power quality issues in powering electric drives.

Pre-requisite: None

ECEN3012 PRINCIPLES OF COMMUNICATION SYSTEMS

This course is the basic discipline of telecommunication theory and relevant techniques. In addition to an information theory introduction, it includes the study of signal and architecture of communication systems, amplitude and angle modulation, modulation and demodulation

techniques and so forth. The important concepts like noise, interference, channel distortion, intersymbol interference and entropy are also elucidated with the help of system simulator. Example transmitter and receiver of broadcasting communication systems and cellular communication systems are also highlighted. The course objective allows the students to acquire the basic engineering understanding to the modern communication systems and; the relevant theory and technique.

Pre-requisite: ECEN2000

ECEN3013 RADIO FREQUENCY AND MICROWAVE TECHNIQUES FOR WIRELESS SYSTEMS

This course deals with the basic RF and microwave circuit design techniques for receivers and transmitters used in modern wireless analog and digital communication systems. The distributed circuitry theory is studied including transmission line, impedance transformation, impedance matching, smith chart, S-parameters, filters, couplers, mixers, oscillators, low noise amplifiers and so forth. The study also includes linear and nonlinear microwave circuitry simulation together with the elementary RF/microwave measurement techniques using scalar and vector network analyzers. The course objective allows the students to acquire the basic engineering technique and ability to design and; analyze the RF and microwave circuits using modern high frequency simulation softwares as well as advanced RF and microwave testers.

Pre-requisite: ECEN2005

ECEN3014 ANTENNA THEORY AND APPLICATIONS IN WIRELESS COMMUNICATIONS

This course is devoted to the antenna fundamentals and its wireless applications. The study includes basic concepts of antennas, dipole, arrays, microstrip patch antennas, adaptive antennas, full wave analysis and optimized antenna design by full wave electromagnetic solvers like MoM. Narrowband and wideband antennas for practical wireless communication systems - GSM, WCDMA, WLAN, RFID and UWB are also studied. Throughout the course, the students acquire the basic engineering technique and ability to design and; analyze the antennas together with the relevant simulation and measurement techniques.

Pre-requisite: ECEN2005

ECEN3015 CELLULAR COMMUNICATION NETWORK DESIGN AND OPTIMIZATION

This course brings students fully up to date with the myriad of system developments in latest cellular communication networks namely GSM, WCDMA and so forth. Topics include basic network architecture and design issues, evolution of the wireless industry, characterization of radio propagation, modeling and simulation of narrowband signal characteristics and radio channel characteristics, fading, diversity, spread-spectrum technique, standards of GSM, GPRS, EDGE and WCDMA and so forth. The basic network optimization technique for 2G and 3G cellular networks is also studied. Throughout the course, the students acquire the basic engineering understanding to modern cellular network design issues and optimization.

Pre-requisite: ECEN3012

ECEN3016 INTRODUCTION TO WIRELESS TECHNOLOGY FOR DIGITAL GAME

This course brings students a straightforward introduction of the use of computer interactive game for entertainment, teaching and learning. The new paradigm of integration of wireless technology and motion, vision, acoustic sensors for interactive game is studied. Coverage includes introductory theory of modern digital game, the game characteristics, rationale for digital game in learning and entertainment, technologies for digital games, case studies, operating system platform, short range communication technologies; sensor design, signal conditioning circuits, user interface, application software and so forth. Throughout the course, the students acquire the introductory engineering understanding to emerging multimedia game application using wireless technology.

Pre-requisite: ECEN2015 and ECEN3012

ECEN3017 ANALOG INTEGRATED CIRCUIT DESIGN

This course is designed to introduce analog IC design fundamentals including single/multiple-

transistor amplifiers, current mirrors, current/voltage reference, output stages, frequency response, feedback, stability, and the operational amplifier design. Students will gain the basic understanding of analog IC design and become familiar with circuit analysis, layout designs and simulation tool flow.

Pre-requisite: None

ECEN3018 INTRODUCTION TO DATA CONVERTERS

This course will provide an introduction to the various types of Data Conversion System, which is of the most key components in the electronics system. The performance characterization of Data Converters will be presented, and various types of data converters (including Analog-to-Digital and Digital-to-Analog) will be discussed. This course can be served as the beginning course in the field of Data Conversion and Signal Processing System in the area of Analog IC Design.

Pre-requisite: None

ECEN3019 INTRODUCTION TO RADIO-FREQUENCY CIRCUITS AND SYSTEMS

This course covers the circuit and system design of modern wireless receivers and transmitters. The system performance metrics, circuit performance metrics and figure-of-merits are introduced. Design examples from practical applications such as GSM, WCDMA, WLAN, GPS are included. The course includes design and simulation projects based on Matlab and Cadence with CMOS technologies.

Pre-requisite: None

ECEN3020 ADVANCED TOPICS IN ANALOG AND MIXED-SIGNAL INTEGRATED CIRCUIT DESIGN

The purpose of this course is to investigate advanced analog circuit integrated circuit design. The student will be exposed to analog design at the system level, and learn how design specifications are achieved and design tradeoffs are made in modern analog and mixed-signal integrated circuits.

Pre-requisite: ECEN3017

ECEN3021 MULTIMEDIA TECHNOLOGY

This course aims at providing students with understanding of multimedia technology from both the theoretical and practice perspective. The course covers the multimedia data types such as image, video, audio, and also introduces emerging multimedia applications such as virtual reality and augmented reality. Programming languages and computer tools for multimedia technology will be introduced to the students.

Pre-requisite: ECEN1006 and ECEN3001

ECEN3022 ADVANCED INTEGRATED CIRCUIT DESIGN FOR INTERNET OF THINGS SYSTEMS

This course targets to provide an overview of the enabling integrated circuit design techniques for the development of energy constrained Internet of Things (IoT) systems. The fundamental building blocks in an IoT system will be systematically introduced, including the analog interface, power management circuits, energy harvesting modules, analog-to-digital converters, short-range radios, digital architecture, non-volatile memory, hardware security and battery/packaging. Advanced circuit design techniques targeting for ultra-low power consumption to fulfill the application level requirements will also be introduced.

Pre-requisite: None

ECEN3023 INTELLIGENT METHODS FOR ELECTRICAL AND COMPUTER ENGINEERING

This is an introductory course in machine learning and computational intelligence tailored for ECE students. It covers topics from statistical learning including linear regression and classification, clustering, Bayesian learning, to more recent techniques such as evolutionary computing, support vector machines, convolutional neural network and deep learning, with special attention to hardware aspects and ECE applications. The course aims to offer students a set of modern

intelligent solutions as well as the basic ideas and intuition behind, with more emphasis on hands-on experience through practical examples such as intelligent hardware system implementation and case studies with MATLAB and Python.

Pre-requisite: ECEN2007

ECEN3024 FUNDAMENTALS OF INTERNET OF THINGS

This course introduces the fundamentals of real time embedded systems. It covers the basic ingredients of complete IoT systems in terms of real time software development based on a practical embedded system utilizing a real time operating system. Embedded hardware systems (e.g. Raspberry Pi, Beagle Bone, TI Sensor Tag etc.) together with in-depth case studies on intelligent sensor based embedded systems will also be introduced. Students will also have the chance to work on lab/tutorials essential for the development of practical real-world IoT systems.

Pre-requisite: None

ECEN3025 INTERNET OF THINGS WORKSHOP

This course introduces the application and essential peripherals (e.g. sensors, actuators, displays etc.) for real time embedded systems. Students should apply their knowledge in IoT systems to design a practical real world IoT implementation using commercial embedded hardware systems (e.g. Raspberry Pi, Beagle Bone, TI Sensor Tag etc.). Students will also attend lab/tutorials, and develop their own practical real-world IoT projects.

Pre-requisite: None

ECEN3026 DATA ANALYTICS FOR ELECTRICAL AND COMPUTER ENGINEERING

This course is an introductory course on data analytics and its application in smart energy systems. It covers three major topics: 1) Primary data analytics theory including classification, regression, principal component analysis, etc.; 2) Hands on data analytics experiences with NumPy, Pandas, Matplotlib, & Scikit-learn packages; and 3) Applications in smart energy systems (with a focus on buildings energy systems), in which comprehensive experiments with real building energy data will be included.

In this course, students will learn systematic knowledge on data analytics and Python. They will also gain solid hands-on experiences in using Python to analyze smart meter data in energy systems.

Pre-requisite: None

ECEN4000/ ECEN4001 GRADUATION PROJECT I AND II

This course aims to give the students experience in solving real engineering problems and the opportunity to apply the knowledge they have gained during their study. Through the project the students will gain experience in project planning, in teamwork and in communication with management and support staff. The project will also develop their design and research skills.

Pre-requisite: Final Year Student

ECEN4002 DIGITAL CONTROL

Digital control systems; open-loop discrete-time systems; closed-loop systems; system time response characteristics; stability analysis techniques; PID controller design; and the control system simulations

Pre-requisite: ECEN3000

ECEN4003 SPECIAL TOPIC IN ELECTRICAL AND COMPUTER ENGINEERING

The course will introduce a selected special topic in the ECE area.

Pre-requisite: Final Year Student

ECEN4004 BIOMEDICAL MEASUREMENT AND INSTRUMENTATION

Design of measurement systems and biomedical instrumentation; architecture of electronic instruments used to measure physiological parameters, analysis of major process functions integrated in these instruments

Pre-requisite: ECEN3003

ECEN4005 INTRODUCTION TO BIOMEDICAL IMAGING

This course is an introduction to the current methods and applications of biomedical imaging. We focus on major imaging techniques, including Magnetic Resonance, Ultra Sound and Computed Tomography. For each technique, we will study the image acquisition (how images are created), the corresponding image processing (how images are analyzed), and their usage in major biomedical applications (what the image analysis says about cancer, brain, heart, or cells).

Pre-requisite: None

ECEN4006 RENEWABLE ENERGY CONVERSION

This course introduces the engineering and technical aspects of renewable energy conversion systems utilizing biomass, solar, wind, hydro power and others. It emphasizes basic generation and power conversion technologies of renewable energy generation systems. Topics include different available sources of sustainable energy and power, their applications, their limitations, energy conversion, integration circuits and storage for renewable technologies.

Pre-requisite: ECEN3007

ECEN4007 POWER SYSTEM DESIGN AND IMPLEMENTATION

This course is designed to prepare senior undergraduate students with knowledge and manipulative skills for employment in the electrical industry. It emphasizes the theory and practice of the basic electrical installation and maintenance skills. Topics include introduction to HV/MV/LV equipments, power consumption in Macau, installation and maintenance of transformer, MV/LV distribution and Un-interruptible Power Supply, batteries & chargers.

Pre-requisite: ECEN1005

ECEN4008 INTRODUCTION TO WIRELESS SENSING NETWORK

This course is about the study of contemporary issues in wireless sensing networks. Coverage includes short range communications namely WLAN, RFID, Bluetooth, Zigbee and; sensor design, signal conditioning circuits, detection, energy minimization, connectivity, security, storage management in wireless sensor networks, middleware, applications and so forth. Design examples for RFID and WLAN are also provided. Throughout the course, the students acquire the advanced engineering technique and ability to emerging wireless sensing network design issues and applications.

Pre-requisite: ECEN3012

ECEN4009 MICROWAVE AND MILLIMETER WAVE SYSTEM DESIGN

This course is devoted to the microwave and millimeter wave integrated circuit design from wireless system perspective with focus on broadband applications. Coverage includes OEM system integration, high frequency simulation tools, design of microwave and millimeter wave wireless frontend circuits including low noise amplifier, mixer, oscillator, filter, power amplifier, antenna, characterization and implementation of microwave and millimeter wave integrated systems in CMOS technologies. Throughout the course, the students acquire the advanced engineering technique and ability to emerging broadband systems and applications.

Pre-requisite: ECEN3013

STGC3000 WORK-INTERGRATED EDUCATION

Work-Integrated Education allows students to gain experience in areas relevant to their fields of study. The student will be encouraged to attend internship training first. If the students cannot attend the internship training due to any reasons, the student should engage in a research project under the supervision of a faculty member assigned by his/her home department.

Pre-requisite: None

EMEN1001 ENGINEERING DRAWING I

This course aims at preparing undergraduate engineering students to be able to understand and create technical drawings as a basic technique in engineering and scientific communication. The course seeks to develop the students' effective utilization of computer-aided drafting software package for producing engineering drawings according to the international conventions and

drawing standards.
Pre-requisite: None

EMEN1002 ENGINEERING DRAWING II

Introduction to auxiliary views, mechanical working drawing, gears, cams, intersection and developments, building services drawings and floor plan design.

Pre-requisite: EMEN1001

EMEN1003 ENGINEERING MATERIALS

Interatomic bonding and crystalline structures, imperfections and diffusion in solids, mechanical properties, strengthening mechanisms, failure of materials, phase diagrams and phase transformations, heat treatment of ferrous and non-ferrous alloys, types of engineering materials: metallic, ceramic, polymeric and composite materials.

Pre-requisite: None

EMEN1004 STATICS

Force systems and equilibrium conditions with emphasis on engineering problems. Statics of particles and rigid bodies. Equivalent system of forces. Centroids and centers of gravity, Analysis of structures. Forces in beams and cables. Friction. Moments of inertia. Method of virtual work.

Pre-requisite: None

EMEN2000 STRENGTH OF MATERIALS

Fundamental concepts of mechanics of deformable solids (static equilibrium, compatibility of deformation, and material constitutive behavior etc.) Stress and strain, uniaxial tension test, statically indeterminate structures, temperature effects and thermal stress, torsion of circular shafts, simple bending of beams, shear stresses in beams of different cross-sectional shapes, shear centre, combined stresses due to bending, torsion, shear and axial loads, transformation of stresses, failure criteria and stability and buckling.

Prerequisite: EMEN1004

EMEN2001 THERMODYNAMICS

Fundamental principles of thermodynamics, foundation in fundamental thermodynamic phenomena including the first and second laws of thermodynamics, thermodynamic properties, equations of state in real and ideal gases. Analysis of engineering systems, such as: gas turbine, compressor, propulsion systems, vapor and gas power cycle, refrigeration cycle, and automobile engines.

Prerequisite: None

EMEN2002 MANUFACTURING TECHNOLOGY

Introduction to manufacturing industry. Manufacturing system, basic machine tool elements, metal cutting, turning, drilling, boring, milling, grinding, welding, hot and cold working, pressworking, thread and gear working, and nontraditional processes.

Prerequisite: None

EMEN2003 ELECTRICAL ENGINEERING

Introduction to electrical engineering. Fundamentals of electric circuits. Analysis of electric networks. Computer-aided circuit analysis. AC power. Residential wiring and distribution of AC power. Introduction to electromechanics. Introduction to electric machines.

Pre-requisite: None

EMEN2004 DYNAMICS

This course will introduce to students the fundamentals and principles of kinematics and kinetics of particles and rigid bodies. The topics covered include kinematics of particles and rigid bodies, kinetics of particles and rigid bodies, energy and momentum methods, systems of particles, plane motion of rigid bodies, and basics of mechanical vibrations.

Pre-requisite: None

EMEN2005 COMPUTER-AIDED DESIGN

Introduction to the fundamentals of computational and numerical geometry for product design. Topics to be covered include design specification, representation and manipulation of curves and surfaces, solid modeling, geometric transformations, graphical visualization, tolerance analysis, and standards for data exchange. The lab practice with prevailing CAD packages enables students to intelligently use them for solving engineering design problems.

Pre-requisite: None

EMEN2006 MACHINE ELEMENTS

Introduction to machine elements. Screws, fasteners and the design of nonpermanent joints. Welding and the design of permanent joints. Mechanical springs. Rolling-contact bearings. Lubrication and journal bearings. Gears. Clutches, brakes and couplings. Shaft design. Flexible mechanical elements. Mechanical design and assembly.

Pre-requisite: None

EMEN2007 MECHATRONICS

Introduction to the knowledge of mechatronics, control and automation in industrial applications. Sensors and transducers. Signal conditioning. Digital signals. Switches, relays and power-control semiconductors. Motors and motor control. Microprocessor-based control. Programmable logic controllers.

Pre-requisite: None

EMEN3000 PRODUCTION MANAGEMENT

Basic management principles. Production and operation management. Production planning. Production control. Project management. Basic quality management and control. Facility planning. Job design. Business angle for product design and TQM concept.

Pre-requisite: None

EMEN3001 FLUID MECHANICS

Introduction to basic fluid laws and their applications, fluid statics, conservation equations, continuity and linear momentum equations for control volumes, dimensional analysis, dynamic similarity, flow of incompressible fluids in pipes; boundary-layer concepts, effects of friction, measurement techniques.

Pre-requisite: EMEN1004

EMEN3002 CONTROL ENGINEERING

Introduction to control system. Dynamic models and dynamic response. Models of industrial control devices and systems. Feedback control, Routh stability. Root locus plots. The Nyquist stability criterion. Matlab simulation for control systems.

Pre-requisite: EMEN2003

EMEN3003 HEAT TRANSFER

Fundamental of heat transfer, including one and two dimensional steady state heat conduction, transient heat conduction, numerical solutions for heat conduction problem, basic convective heat transfer and thermal radiation. Applications of heat transfer in engineering system.

Pre-requisite: EMEN2001

EMEN3004 COMPUTER ENGINEERING

Computer organization, memory systems, input and output systems, buses, interfacing, communication mechanisms, interrupt mechanisms, computer networks, distributed systems, communication in distributed systems, D-A conversion, A-D conversion, computer process controls, building automation systems & controls.

Pre-requisite: None

EMEN3005 SOCIETY AND THE ENGINEER

Industrial health and safety, Washington Accord and the qualification and criteria of professional

engineers, professional ethics, bribery and corruption, social responsibilities of engineers. Technical writing skills.
Pre-requisite: None

EMEN3006 ADVANCED MANUFACTURING

Introduction to the fundamental concepts of manufacturing systems, computer-aided process planning, CNC programming, group technology, facility layout, flexible manufacturing system, concurrent engineering, rapid prototyping, and automation, etc. Using of computer-aided manufacturing software and advanced machine tools.

Prerequisite: EMEN1002 and EMEN2005

EMEN3007 ADVANCED MATERIALS FOR ENGINEERING

Specialisation of materials used in industry such as lightweight materials, corrosion and thermal resistance materials, shape memory alloys, conductors, semiconductors and dielectric, magnetic materials, liquid crystals, superconductors, optical fibers, biomaterials, and nano-materials. Electrical, thermal, magnetic, optical and corrosion properties, and case studies.

Pre-requisite: EMEN1003

EMEN3008 AIR CONDITIONING AND REFRIGERATION

Fundamentals of air conditioning and refrigeration. Psychometrics, cooling and heat load calculations, air conditioning systems, duct design, vapor compression and absorption systems, and the principles of cooling towers.

Pre-requisite: EMEN3003 and EMEN3001

EMEN3009 APPLICATIONS OF VIBRATION AND NOISE CONTROL

Introduction to the guidance in the practice of vibration and noise control. Fundamentals of mechanical vibration and sound waves. Industrial noise and vibration control, interaction between sound wave and solid structures, and statistical energy analysis in noise and vibration. Measurements and signal analysis of noise and vibration.

Pre-requisite: None

EMEN3010 COMPUTER TECHNOLOGY IN ENGINEERING

The purpose and role of variables, constants, and procedures in application programming, control programme execution with decision control and looping structures. Concepts of object-oriented programming (OOP).

Prerequisite: None

EMEN3011 CORROSION, WEAR AND DEGRADATION AND MATERIALS

Costs of corrosion and wear, forms of corrosion, electrochemistry, corrosion thermodynamics and kinetics, high temperature oxidation, metallurgical and environmental factors, corrosion protection, coatings and inhibitors, degradation of polymers, friction and lubricants, wear mechanisms, measurement and testing, analysis and correction of corrosion and wear failures, materials selection and safety.

Pre-requisite: EMEN1003

EMEN3012 ELECTRICAL SERVICES- WIRING AND INSTALLATIONS

Overview of electrical services in building, introduction to wiring regulations, fundamental principles and design applications of electrical wiring installations, electricity distribution in buildings, interconnection facilities, protective devices, protection against direct & indirect contacts, cable management, lightning protection, metering, earthing, bonding and reliability of electricity supply.

Pre-requisite: EMEN2003

EMEN3013 ELECTROMECHANICAL ENERGY CONVERSION

AC power, magnetic circuits, principles of electro-magnetism and electro-mechanics, principles of motors and generators, dc machines, synchronous machines, induction machines, dc-dc

converters, dc-ac inverters, electric drive systems, variable voltage variable frequency drive systems.

Pre-requisite: EMEN2003

EMEN3014 ELECTRONICS AND INSTRUMENTATION

Basic principles of electronics components and operations of measuring instruments, transducers and signal conditioning techniques. Voltmeter, ammeter, ohmmeters, multi-meters, oscilloscopes, probes, bridges, diodes, bipolar junction transistors (BJT), operational amplifiers (Op Amp), transducers, noise, and filters.

Pre-requisite: EMEN2003

EMEN3015 FINITE ELEMENT TECHNIQUES IN ENGINEERING

Basics of formulating problems in statics, dynamics and heat transfer into finite-element (FE) models. Data pre-processing and post-processing. Use of commercial FE software (ANSYS). Various types of elements: spring element, bar element, Bernoulli and Timoshenko beam elements, truss element, frame element, 3-noded and 6-noded triangular elements, 4-noded quadrilateral element, axisymmetric element and plate element. Isoparametric transformation. Strengths and weaknesses of the various elements. Derivations of elements will be based on different methods, such as the direct stiffness method and the principle of potential energy. Pre-requisite: EMEN2000 and EMEN2004

EMEN3016 FUNDAMENTALS OF AUTOMOTIVE ENGINEERING

Fundamentals of internal combustion engines. Emission control. Ancillaries. Electronic control units. Transmissions and driveline. Steering systems. Suspensions. Brakes and tires. Engine and vehicle performance tests. Fundamentals of motor vehicle diagnosis and service. Introduction to electric/hybrid vehicles, alternative fuels and fuel-cell technology.

Pre-requisite: None

EMEN3017 INDUSTRIAL DATA MANAGEMENT

Introduction to data management in the modern industry. Designing and specifying information systems, including data modeling techniques and entity-relationship diagrams; Relational database design using the theory of normalization; Building and manipulating databases, including relational algebra, SQL, and graphical user interfaced database manipulations; World wide web based data systems, including an introduction to HTML, web applications, and MySQL.

Pre-requisite: None

EMEN3018 INTELLIGENT BUILDINGS

Principles of sensors, controllers and actuators, building electronics, signal conditioning, networks and communication systems, instrument communication and telemetry, microprocessor based controllers and digital controls; overall systems planning and integration; sustainability and economics; energy conversion technologies, energy use in domestic/non-domestic buildings, design guides, energy management and energy auditing.

Pre-requisite: EMEN2003

EMEN3019 INTERNAL COMBUSTION ENGINES

Engine classification. Engine components. Operating characteristics. Engine cycles. Fuels. Air and fuel induction. Combustion. Modelling of engines. Exhaust flow. Engine cooling. Friction and lubrication. Emissions and air pollution. Engine management systems.

Pre-requisite: EMEN2001

EMEN3023 COMPUTATIONAL FLUID DYNAMICS

Introduction to Computational Fluid Dynamics. Introduction of finite difference method, finite element method, and Lattice Boltzmann method. Macroscopic, microscopic and mesoscopic length scales. Isothermal and Non-Isothermal incompressible fluid flows. Multi-phase and multi-component flows. Computational fluid dynamics for porous media.

Pre-requisite: None

EMEN3024 ENGINEERING MANAGEMENT

Overview of the techniques of applying management principles to professional positions held by engineers and engineering technologists. Management functions of planning, organizing, leading, and controlling and their roles in managing technology.

Pre-requisite: None

EMEN3025 FIRE PROTECTION ENGINEERING

Fire Engineering is concerned with the applications of scientific and technical principles to the growth, mitigation, and suppression of fire. This includes the effects of fire on people, on structures, on commodities, and on operations. The identification of fire hazards and their risk, relative to the cost of protection, is an important aspect of fire safety design. The fire engineering course mainly covers the fundamental knowledge of fire dynamics and fire modeling. Moreover, the modern fire protection technology such as fire sprinkler and alarm systems, exit and smoke control systems, and the active and passive protection systems is also included in the course. Besides, the plumbing services for fire suppression systems and buildings are also introduced.

Pre-requisite: None

EMEN3026 ROBOTICS

Introduction. Robot terminology. Spatial descriptions and transformations. Manipulator kinematics. Jacobians and static forces. Trajectory generation. Linear and nonlinear control of manipulators. Application of various robots.

Pre-requisite: None

EMEN3027 MECHANICAL BEHAVIOUR OF ENGINEERING MATERIALS AND BASIC FAILURE ANALYSIS

Introduction to the most important mechanical properties of materials (principally metals). Stress and strain, elastic and plastic behaviours, hardening behaviour, ductility and fracture, creep, fatigue, residual stress, etc. Interactions among different failure-inducing mechanisms (e.g., between corrosion and fatigue) will also be covered. Real case studies of failures in engineering will be used to consolidate the theories introduced in this course.

Pre-requisite: EMEN1003

EMEN3028 OPTIMIZATION TECHNIQUES AND THEIR APPLICATIONS IN ENGINEERING

Modelling of engineering problems and introduction of algorithms/methods for obtaining their optimal solutions. The topics include constrained and unconstrained objective functions, simplex method for linear programming, duality analysis, integer programming, mixed programming, linear and non-linear programming, sensitivity analysis, steepest decent method, conjugate gradient method, conjugate direction method, newton's method, and Lagrange multiplier method. The use of computer software programmes (e.g., LINDO and MathCAD) for solving optimisation problems will be covered in this course also.

Pre-requisite: None

EMEN3029 PRODUCTION SYSTEMS, PLANNING AND CONTROL

Elements of production systems. Different types of production systems; Principles and concepts in the design and control of production systems, including organization, production, and advanced quality control, work methods and measurement; Mathematical and computer models for planning and control of facilities, human resources, projects, materials, and information in production systems.

Pre-requisite: None

EMEN3030 SPECIAL TOPICS IN ELECTROMECHANICAL ENGINEERING I

Any specialized topic in Electromechanical Engineering chosen by the staff member who has experienced in that particular field, but the topic is not covered by other undergraduate courses in the Electromechanical Engineering Programme.

Pre-requisite: None

EMEN3031 SPECIAL TOPICS IN ELECTROMECHANICAL ENGINEERING II

Any specialized topic in Electromechanical Engineering chosen by the staff member who has experienced in that particular field, but the topic is not covered by other undergraduate courses in the Electromechanical Engineering Programme.

Pre-requisite: None

EMEN3032 SPECIAL TOPICS IN ELECTROMECHANICAL ENGINEERING III

Any specialized topic in Electromechanical Engineering chosen by the staff member who has experienced in that particular field, but the topic is not covered by other undergraduate courses in the Electromechanical Engineering Programme.

Pre-requisite: None

EMEN3033 THEORY OF MECHANISMS

Synthesis of linkage-type mechanisms using graphical and computer methods. Introduction to mechanisms and simple machines. More on machines and mechanisms. Planar and spatial mechanisms. Kinematics and dynamics of mechanisms. Links. Frames and kinematic chains. Skeleton outline. Pairs. Higher pairs. Lower pairs and linkages. Kinematic analysis and synthesis. Basic kinematics of constrained rigid bodies. Planar linkages. Cams. Gears. Other mechanisms.

Pre-requisite: None

EMEN3034 CREATIVE INDUSTRY

The course focuses on creative professional identity, creative career development and entrepreneurship, creative ideation and innovation, project development and management, industry partnerships and networking, and interdisciplinary creative work. Students will explore the advantages and challenges of interdisciplinary study and begin to develop strategies for benefitting the most from their creative industries studies.

Pre-requisite: None

EMEN3035 ELECTRIC VEHICLES

Electric vehicle (EV) is a collective term for battery-powered EV, hybrid EV, plug-in hybrid EV and fuel-cell EV. At present, almost all automobile manufacturers and many electric power utilities have their individual EVs or development programs on EVs. Therefore, the demand for well-trained engineers serving this EV sector has already been significant. With the increasing acceptance of EVs in Macau, this demand will be greatly increased in the coming years. The purposes of the course are:

- To provide students with up-to-date and comprehensive knowledge on various EV technologies
- Provide the necessary skills for students to serve the accelerating EV industry and a good foundation for further research on these technologies
- Understanding the concept of system considerations, system level design and optimization.

Pre-requisite: EMEN2003

EMEN3036 EXTRA-LOW-VOLTAGE ELECTRICAL SYSTEMS IN BUILDINGS

This course focuses on typical extra-low-voltage electrical systems, their applications in buildings and applications in property management.

Pre-requisite: EMEN2003

EMEN3037 FACILITY MANAGEMENT

Facilities management blends the technical demands of building services with managerial responsibilities. The course will build up core competencies that make up the facility management profession, including planning, design, maintenance and sustainability. It ensures the efficient functioning of buildings through integrating people, space, processes and technology. Facility management covers facility location and layout design, intelligent maintenance management, Sustainable facilities management, Service management, quality assessment, and information technology. The students will be trained to gain an understanding of the diverse technologies and decision-making processes in facility management.

Pre-requisite: None

EMEN3038 LIGHTING TECHNOLOGY

This course covers a wide range of lighting systems and their applications in illuminating buildings indoors and outdoors. The subject aims at enabling students to identify, analyze and evaluate basic components and features in lighting systems; and then to apply these components appropriately in building lighting design.

Pre-requisite: EMEN2003

EMEN3039 MECHANICAL PROCESSING OF MATERIALS

The course focuses on the fundamentals and analytical analysis methods for mechanical processing of materials. Its application on bulk and sheet metal forming, shearing and metal cutting are also covered.

Pre-requisite: EMEN2002

EMEN3040 NONLINEAR DYNAMICS AND CHAOS

Introduction to nonlinear dynamics and chaos. Strange attractors; Discrete and continuous chaotic systems; Bifurcation theory and universality; Sensitivity on initial conditions; Stability analysis of nonlinear systems; Lyapunov exponents; Poincaré maps; Fractal dimensions; Phase space reconstruction; Control and synchronization.

Pre-requisite: MATH2001

EMEN3041 SELECTION OF MATERIALS FOR ENGINEERING DESIGN

To make products components that are safe, economical and technically-sound, engineers have to be aware of the importance of materials selection in the design process. Also, to make improvements to and to make failure investigation of existing products, engineers must possess a deep understanding of the material selection process.

This course provides a general overview of the functions/constraints/objectives of the material selection processes (metals, polymers, ceramics, and composites) in design. How processing/manufacturing routes affect material properties and how property/function-based methods are utilised to systematically choose materials for engineering design will also be covered.

Pre-requisite: EMEN1002

EMEN3042 SENSORS AND ACTUATORS

The integration of sensing and actuation is one of the key issues in the implementation of mechatronic systems. Sensing enables the measurement of environmental conditions and actuation affects the surrounding environment through a controlled response. In this course, advanced concepts in sensing and actuation for mechatronic systems are introduced, including both traditional sensors and actuators and advanced topics in micro electromechanical system (MEMS) and smart material sensors and actuators.

Pre-requisite: EMEN2007 and EMEN3002

EMEN3043 STATICS AND PROBABILITY FOR ENGINEERING

An introduction to probability theory and statistics, with an emphasis on solving problems in engineering. Topics in probability include discrete and continuous random variables, probability distributions, sums and functions of random variables, the law of large numbers, and the central limit theorem. Topics in statistics include sample mean and variance, estimating distributions, correlation, regression, and hypothesis testing and engineering applications.

Pre-requisite: None

EMEN3044 SURFACE ENGINEERING AND COATING TECHNOLOGY

Engineers face with a wide variety of choices when selecting a surface treatment for a specific corrosion or wear application. This course provides practical information for the selection of the best possible surface treatment. It focuses on the topics including materials degradation, various surface treatments and their comparison; characterization of coatings, application of control techniques.

Pre-requisite: EMEN1003

EMEN3045 THERMAL ENERGY TRANSPORTATION IN POROUS MEDIA

Thermal energy transportation in porous media is of interest in a number of engineering applications such as water purification and energy storage systems. As an introduction course to the topic of fluid flow and heat transfer in porous media, this course will introduce modeling approaches for heat and fluid flow in porous media. These models are applicable to a wide variety of media, including sand, soil, tube bundle heat exchangers, and open cell metal foams, which have gained attention in recent years as potentially excellent candidates for meeting the high thermal energy dissipation demands in energy storage and electronics industry.

Pre-requisite: EMEN3001 and EMEN3003

EMEN4000 GRADUATION PROJECT

An independent study under the supervision of one or more faculty members. Professional ethics, health, safety and environmental considerations in the engineering project.

Pre-requisite: Final year level

STGC3000 WORK-INTERGRATED EDUCATION

Work-Integrated Education allows students to gain experience in areas relevant to their fields of study. The student will be encouraged to attend internship training first. If the students cannot attend the internship training due to any reasons, the student should engage in a research project under the supervision of a faculty member assigned by his/her home department.

Pre-requisite: None

MATH0001 PRE-CALCULUS

This is an elementary mathematics course for science & engineering students. The goal of this course is to reinforce students' knowledge in elementary mathematics which is needed in calculus. Offered students with their mathematic subject score below a specific score decided by the Faculty are required to take and complete this course in the Summer Term before admission. If a student cannot pass the test, he/she can redo the test during the first semester after admission.

Pre-requisite: None

MATH1000 DISCRETE MATHEMATICS

This course aims at providing students with a solid foundation of basic techniques in discrete mathematics. The topics include elementary set theory, functions, elementary number theory and methods of proof, recursion, counting principle, and graph theory.

Pre-requisite: None

MATH1001 LINEAR ALGEBRA I

Systems of Linear Equations and matrices. Gaussian elimination. Determinants. Cramer's rule. Euclidean Spaces. Addition and scalar multiplication of vectors. Linear transformations. Vector Spaces. Linear independence and linear dependence.

Pre-requisites: None.

MATH1002 LINEAR ALGEBRA II

Vector Spaces. Basis and dimension. Matrices, row spaces, column spaces and null spaces. Rank and nullity. Inner product spaces. Inner products and orthonormal bases. Gram-Schmidt process. Least square problems and orthogonal matrices. Eigenvalues and eigenvectors. Diagonalization, orthogonal diagonalization. Linear transformations. Kernel and range. Inverse linear transformations. Similarity. Additional topics include quadratic forms, unitary, normal, Hermitian matrices, and canonical forms.

Pre-requisites: MATH1001

MATH1003 INTERMEDIATE CALCULUS

Definite integrals. Fundamental theorem of calculus. Applications of definite integrals. Approximations of definite integrals. Sequence and series. Power series and Taylor series.

Pre-requisite: GEST1004

MATH1004 GEOMETRY

Euclidean geometry, Euclidean space, inner product, distance, and angle. Isometries. Vectors in planes and spaces. Lines and planes and surfaces in 3-dimensional space. Linear transformations, projections, orientations and determinants, isomorphisms, and general linear groups. Symmetries and regular polyhedrons. Affine geometry. Affine spaces and affine transformations. Brief discussion on the development of various geometries such as Euclidean and non-Euclidean ones.

Pre-requisite: None

MATH2000 ENGINEERING MATHEMATICS I

Functions of two or more variables and their derivatives. Applications of partial derivatives. Multiple integrals. Vector fields and line integrals. Surface integrals. Analytic functions of a complex variable.

Pre-requisite: GEST1004

MATH2001 ENGINEERING MATHEMATICS II

Introduction to linear algebra. Linear differential equations. Fourier series and integrals. Laplace transform. Introduction to partial differential equations

Pre-requisite: MATH1003

MATH2002 MULTIVARIABLE CALCULUS

Vectors and analytic space geometry. Norms, convergence of vector sequences, open and closed sets, compact sets. Curves, Frenet frames, surfaces. Functions of several variables. Partial derivatives and their applications, linear approximation, differential, Taylor's formula. Method of Lagrange multiplier. Inverse function theorem, implicit function theorem. Multiple integrals. Green's Theorem. Line and surface integrals. Gauss and Stokes' Theorems.

Pre-requisite: GEST1004

MATH2003 MATHEMATICAL ANALYSIS I

The axioms for the real number system. Countable and uncountable sets. Sequence of real numbers. Nested intervals theorem. Bolzano-Weierstrass theorem, Cauchy criterion and Heine-Borel Theorem. Limits and continuity of functions. Properties of continuous functions.

Pre-requisite: GEST1004

MATH2004 MATHEMATICAL ANALYSIS II

Differentiation. Mean value Theorem. L'Hopital's Rule. Inverse function theorem. Integration. Upper and lower integrals. Riemann integrals. Fundamental theorem of calculus. Elementary functions. Series of numbers. Tests for convergence. Series of functions. Uniform convergence. Power series and Taylor series.

Pre-requisite: MATH2003

MATH2005 PROBABILITY

Sample space, random events, and probability. Discrete and continuous random variables. Distributions, densities, joint distribution, and marginal distributions. Conditional probability and independence. Moments, mean, variance, covariance, Chebyshev's inequality, and moment-generation functions. Special probability distributions, densities, and their applications.

Pre-requisite: GEST1004

MATH2007 NUMERICAL ANALYSIS

Introduction to algorithm. Error analysis. Interpolation. Remainder of interpolation. Error estimate. Spline function. Numerical integration.

Pre-requisite: MATH1003

MATH2008 OPERATIONS RESEARCH

Linear programming and simplex method. Revised simplex method. Duality of linear programming. Sensitivity analysis. Transportation and assignment problems. Network flow problems. Game

theory.

Pre-requisite: MATH1001

MATH2009 LINEAR STATISTICAL ANALYSIS

This course is used to study the way a response variable depending on an unknown, linear combination of explanatory and/or classification variables. This course focuses on the theory of linear models and the topics include: linear regression model, general linear model, prediction problems, sensitivity analysis, analysis of incomplete data, robust regression, multiple comparisons, introduction to generalized linear models.

Pre-requisite: MATH2006

MATH2010 COMPUTATIONAL STATISTICS

Statistical computing is an essential part of modern statistics. Students will learn the core of ideas of programming—functions, objects, data structures, input and output, debugging, logical design and abstraction—through writing code to assist in numerical and graphical statistical analyses. Students will learn how to write maintainable code, as well as debug and test code for correctness. They will learn how to set up and run stochastic simulations, how to fit basic statistical models and assess the results, and how to work with and filter large data sets. Since code is an important form of communication among scientists, students will also learn how to comment and organize code.

Pre-requisite: MATH2006

MATH2011 INTRODUCTION TO SCIENTIFIC COMPUTING

The course is a start for the series courses in Department of Mathematics towards the scientific computing in applied mathematics. The content of the course consists of an introduction to data structures and algorithms, and their applications in mathematical problems.

Pre-requisites: None

MATH3000 ORDINARY DIFFERENTIAL EQUATIONS

First-order differential equations. Second-order linear differential equations. Higher order linear differential equations. Systems of differential equations. Power series solutions of linear differential equations, Sturm-Liouville problems. Laplace transforms. Existence and uniqueness theorem of first-order differential equations. Simple modeling problems.

Pre-requisite: MATH1003

MATH3001 COMPLEX ANALYSIS

Complex numbers. Polar coordinates. Functions of a complex variable. Limits. Derivatives of complex functions. Cauchy-Riemann equations. Harmonic functions, harmonic conjugates. Elementary complex functions, Mobius transformations. Contour integrals. Cauchy-Goursat Theorem. Cauchy integral formula. Liouville's theorem. Maximum moduli of functions. Taylor series. Laurent series. Residue theorems. Evaluation of improper integrals. Rouché's theorem.

Pre-requisite: MATH1003

MATH3002 INTRODUCTION TO STOCHASTIC PROCESS

Conditional expectation, conditional probability, and convergences of random variables. Poisson process and compound Poisson process. Markov chain and Markov processes. Stochastic processes with independent increments, stationary process, and the ergodic theorem. Brownian motion and diffusions.

Pre-requisites: MATH2005

MATH3004 PARTIAL DIFFERENTIAL EQUATIONS

Characteristics, classification of PDE, separation of variables, Fourier transform, and Laplace transform. Well-posedness of the wave and the heat equations. Boundary value problems for the Laplace and Poisson equations. Separation of variables.

Pre-requisites: MATH2002 and MATH3000

MATH3009 TIME SERIES ANALYSIS

Time series and stationary processes. Autocovariance and partial autocorrelation functions. Tests for stationarity. Linear stationary models, autoregressive models, moving average models, and mixed autoregressive-moving average models. Model identification, estimation and testing. Seasonal models. Applications of times series forecasting.

Pre-requisites: MATH2006

MATH3011 NUMERICAL MATRIX ANALYSIS

Matrix factorizations. Perturbation and error analysis. Operation cost and convergence rate. Direct Methods for linear systems. LU and Cholesky factorizations. Perturbation and error analysis. Vector and matrix norms. Perturbation analysis for linear systems. Error analysis. Classical iterative methods. Jacobi and Gauss-Seidel method. Convergence analysis. SOR method. Krylov subspace methods. Steepest descent method. Conjugate gradient method. Practical CG method and convergence analysis. Preconditioning. GMRES method.

Pre-requisites: MATH1002 and MATH2002

MATH3012 INTRODUCTION TO COMPUTATIONAL INTELLIGENCE

The artificial neuron and its learning. Supervised learning neural networks. Back propagation algorithm. Feedforward multilayer ANN. Approximation theorem of ANN. Genetic algorithms. Travelling salesman problem and applications of computational intelligence methods in finance and engineering.

Pre-requisite: MATH1003

MATH3013 MATHEMATICAL MODELING

Modeling techniques for analysis or decision-making. The detailed content in this course can vary from extending students' training and understanding in applied mathematical knowledge to further study in specific areas in applied mathematics.

Pre-requisite: MATH1003

MATH3014 TOPICS IN APPLIED MATHEMATICS

Content and reading materials are to be determined by the instructor. Students have to give presentations on the reading materials.

Pre-requisite: Final year students only

MATH3015 INTRODUCTION TO FINANCIAL MATHEMATICS

Financial derivatives, vanilla options, and exotic options. Binomial financial model and Cox-Ross-Rubinstein option pricing formula. Black-Scholes financial model and Black-Scholes option pricing formula. No-arbitrage, risk-neutral probability, and the completeness of financial market.

Pre-requisites: MATH3002

MATH3017 DATA-DRIVEN SAMPLING METHODS

The course will deal with sampling methods under various statistical frameworks. The course will present principles in the design and analysis of clinical trials, limitations of observational studies and possible solutions, and principles of sampling from finite populations. The purpose of the course is to introduce sampling methods and data analysis emphasizing key statistical aspects of the experiment design; to present the advantages and limitations of different methods, and to choose an appropriate method to each statistical problem.

Pre-requisite: MATH2006

MATH3018 MULTIVARIATE DATA ANALYSIS

This course focuses on the classical theory and methods of multivariate statistical analysis. Topics include: distribution theory, multivariate normal distribution, Hotelling's T-square and Wishart distributions, inference on the mean and covariance, principal components and canonical correlation, factor analysis, discrimination and classification.

Pre-requisite: MATH2002 and MATH2009

MATH3020 BAYESIAN METHOD IN DATA ANALYSIS

The aim of this course is to introduce students to the Bayesian statistical modelling and inference and to the related computational strategies and algorithms. The course starts with the treatment of simple models, such as those based on normal and binomial distributions. Some advanced models will be treated, including hierarchical models, linear regression models and generalized linear models. Bayesian computational methods (MCMC), including Gibbs sampler and Metropolis-Hastings algorithms, are presented with an emphasis on the issues related to their implementation and monitoring of convergence.

Pre-requisite: MATH2006

MATH3021 DATA MINING AND STATISTICAL LEARNING

The course covers statistical techniques and tools such as kernel methods for estimating the density and regression functions, machine learning, hidden Markov Chain, Expectation-Maximization algorithm, classification, cluster analysis and support vector machines for analysing large data sets and for searching for unexpected relationships in the data. It also covers model selection for searching through a large collection of potential local models that describe some aspects of the data in an easily understandable way.

Pre-requisite: MATH2009

MATH3025 TOPICS IN STATISTICS AND DATA SCIENCE

The course will introduce some other topics besides the contents covered by other courses. The main topics include actuarial statistics, analysis of longitudinal data, categorical data analysis, etc.

Pre-requisite: None

MATH3026 REAL ANALYSIS

The content of differentiation and integration for single variable real functions will be extended to a more general context in this course. The topics of this course include measure theory, theory of Lebesgue integration, differentiation and integration theory for Lebesgue integral, as well as an introduction to Hilbert spaces.

Pre-requisites: MATH2003

MATH3027 FUNCTIONAL ANALYSIS

The course is an undergraduate level course in functional analysis. Classically, functional analysis is the study of infinite dimensional vector spaces of functions and linear operators between them. This class deals with relevant function spaces (normed vector spaces, Banach and Hilbert spaces), spaces for, bounded linear operators on normed vector spaces, fundamental principles of functional analysis (i.e., Han-Banach Theorem, Uniform Boundedness Principle, Open Mapping Theorem and Closed Graph Theorem) and their applications, spectral theory of compact linear operators and spectral theory of compact self-adjoint operators on Hilbert spaces.

Pre-requisites: MATH2003

MATH3028 NUMERICAL LINEAR ALGEBRA

This course is intended as a first introduction to the methods of numerical linear algebra. The content of the course consists of an introduction to numerical methods for solving linear systems, least square problems, and eigenvalue problems.

Pre-requisites: MATH1002 and MATH2004

MATH3029 TOPICS IN APPLIED ANALYSIS

The field of Applied analysis brings together many mathematical topics, such as scientific computing, differential equations, dynamical systems, signal and image analysis, statistical methods, integral transformation, and approximation theory. Applied Analysis focuses on these mathematical disciplines and their application to the real world around us.

Pre-requisites: MATH1001 and MATH2004

MATH4005 NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS

This course presents mathematical and computational fundamentals of the numerical solution for scientific problems. It covers

- Explicit and implicit methods for ordinary differential equations
- Finite difference methods for partial differential equations (elliptic, parabolic, hyperbolic equations)
- Finite element methods for elliptic equations
- Consistency, convergence, stability of numerical methods
- Solution of linear systems

Pre-requisites: MATH3004, MATH2007 and MATH2011

MATH4000 ELEMENTARY NUMBER THEORY

Divisibility theory of the integers, primes, unique factorization, congruence. Fermat's little theorem, Diophantine equations. Quadratic residues and quadratic reciprocity laws, primitive roots. Pell's equations and continued fractions.

Pre-requisite: None

MATH4002 RESEARCH IN MATHEMATICS

The students will study selected topics in mathematics under supervision of a faculty member. The student has to submit a report and give a presentation of the study for assessment.

Pre-requisite: Final year students only

MATH4003 NONPARAMETRIC STATISTICS

This course focuses on the theory and methods of making statistical inference based on nonparametric techniques. Students will see the analyses of real data from various areas of applications. Topics include properties of order statistics, statistics based on ranks, distribution-free statistics, inference concerning location and scale parameters for one and two samples, Hajek's projection.

Pre-requisites: MATH2006

MATH4004 GRADUATION PROJECT

Under the supervision of a faculty member, a student will carry out a focus study of a research topic in statistics or do some case studies based on collected data sets. The students are required to submit a report and give a presentation of the study for assessment.

Pre-requisite: Final year students only

STGC1001 GENERAL CHEMISTRY

This course addresses the basic concepts of chemistry and tests theories through experiments. The course covers topics, ranging from basic properties of gases, liquids & solids, chemical kinetics, chemical equilibria, to basic organic molecules, which form a foundation for concepts that will be later developed in Environmental Engineering I & II.

Pre-requisite: None

Course Description

COMM1000 INTERPERSONAL COMMUNICATION

This is an introductory course in the theory and practice of communications, focusing on interpersonal and small group communication. Topics include face-to-face communication, social roles, relationship development, non-verbal as well as verbal communication, perception, leadership, and problem-solving.

Pre-requisite: None

COMM1001 NEW MEDIA

This course introduces students to key aspects of new media and networked applications. Topics include new media landscape, multimedia content ad applications, and cross-media technologies.

Pre-requisite: None

COMM1002 INTRODUCTION TO NEWS AND JOURNALISM

This course is a foundation of journalism. It explores the significance of news and role of journalism in society by focusing on deciphering news in various media, such as television, radio, newspapers, magazines and the Internet, in relation to current affairs. It also examines journalism as a profession with specific values and functions. This course introduces basics of news writing and content analysis, and seeks to stimulate students' interest in the profession.

Pre-requisite: None

COMM2001 INTRODUCTION TO PUBLIC RELATIONS

The course gives a general survey of the public relations discipline. It emphasizes the discipline's professional foundation in law and ethics, and focuses on fundamental theories of public relations management. It teaches strategic planning and execution of public relations campaigns, including campaign evaluation. It encourages hands-on experiences, develops research skills, and prepares students for advanced public relations courses.

Pre-requisite: None

COMM2002 MEDIA AND SOCIETY

This introductory course concentrates on the complex relationships between media and society. Topics include uses and functions of mass communication, the social impact of mass media on knowledge, attitudes and behavior, mass media audiences, and feedback systems. The history, structure, development, and technological trends of various media formats and platforms are explored. Students will have an overview of advertising and public relations industries, international and comparative mass media systems, as well as media professions.

Pre-requisite: None

COMM2003 FUNDAMENTALS OF VISUAL CULTURE

This interdisciplinary course integrates theory and practice, and focuses on the study and analysis of visual images. It applies critical thinking to prints, photographs and advertisements, fine arts, fashion and architecture, as well as film, television and new media. It introduces theories of representation and helps develop critical and analytical skills for application in media production and practices.

Pre-requisite: None

COMM2004 INTRODUCTION TO CULTURE AND COMMUNICATION

This course introduces students to analytical methods informed by critical communication and cultural studies, and exposes them to major research approaches in the field. It primarily draws on but not exclusive to Marxism, Critical Theory, British Cultural Studies and other intellectual traditions, theoretical frameworks, and analytical concerns. It teaches students to analyze a variety of communicative and cultural practices in Macao and international media contexts.

Pre-requisite: None

COMM2005 ADVERTISING

Advertising has creative, business and research aspects. This course introduces students to the structure of advertising, as well as its history, problems, and challenges. It provides an overview of advertising industries and practices. It prepares students for advanced advertising courses in creative development, media planning, and media management.

Pre-requisite: None

COMM2006 VIDEO PRODUCTION

This course integrates theory with practice, and prepares students for advanced video production. It teaches students how to operate the video camera and introduces them to digital editing software and other fundamentals of video production: story board, composition, lighting, sound, and editing, as well as histories and genres of moving images. It uses various teaching formats: lectures, discussions, hands-on exercises, workshops, and screenings. Students will be required to complete small video projects. Completed works may be exhibited publicly.

Pre-requisite: None

COMM2007 PHOTOGRAPHY

In this course students will learn photography through hands-on instruction and exercises. Students will learn to think critically about visual culture, subject/object relationships, and theories of representation. Such genres as photojournalism, picture editorial, and portrait photography may be introduced.

Pre-requisite: None

COMM2009 中國新聞傳播史 CHINESE MEDIA HISTORY

本課程主要介紹中國傳播媒介、傳媒科技和傳播意識形態的發展歷程。過去和現今傳媒的蛻變。通過不同時代的重要事件，探討傳媒科技的革新、意識形態的改變和傳媒與社會的影響。

This course gives an introduction to how the media, media technology and media ideology have been transformed in Chinese history. It will cover changes from the ancient time to the modern period. Issues including technology innovation and ideology changes, media and social changes will be discussed in relation to historical events or milestone incidents.

先修科目：沒有

COMM2010 INTERCULTURAL COMMUNICATION

This is an introductory course to the key theories and the processes of intercultural communication. Students will develop an appreciation and understanding of the cultures other than their own, and be equipped with the skills necessary to become an effective communicator in intercultural and multicultural contexts.

Pre-requisite: None

COMM2011 ENGLISH NEWS WRITING

This course aims at teaching students the core skills of professional journalists. Through the combined module of theoretical inquiry and practical training, the course addresses such issues as the understanding of news values, the cultivation of journalistic observation, the development of interview skills, the structure and organization of news story genres, as well as rules of attribution and quotation. Field trips are part of the course offering.

Pre-requisite: None

COMM2012 中文新聞寫作 CHINESE NEWS WRITING

本課程主要通過課堂講授與練習，介紹中文新聞採訪與寫作的基本方法。側重介紹中文新聞採訪與報道的基礎知識、發現和判別新聞的方法、採訪的基本技巧、幾種主要新聞報道文體的特點，消息的定義、種類、寫作特點、消息的基本格式與構成、新聞主題的選擇與深化、新聞報道材料的鑒別與選擇、新聞語言的特徵等。

This course provides integrated training in basic journalistic skills for news writing in Chinese. It

familiarizes students with key procedures in news gathering, interviews and news writing through lectures and workshops. It specifically focuses on news definitions, story formats, writing styles, theme development, in-depth reports, linguistic characteristics, and other core news writing concerns.

先修科目：沒有

COMM2013 ANIMATION I

This course is the first part of the animation course series. The production of digital animation is emphasized. The basic concepts, principles, and essential techniques of hand-drawn, two-dimensional, and three-dimensional animation, as well as today's trends in the field, develop students' understandings about the fundamentals in storytelling, scripting, and delivery of animated imagery for different platforms.

Pre-requisite: None

COMM3001 COMMUNICATION THEORY

This is an introductory course to major theories of human communication. It is designed to give students a critical understanding of key themes in the field and demonstrate how theories illuminate the nature of human interaction. Specifically, the course examines origins, evolutions, milestones, methods and findings of communication perspectives. It studies intellectual, institutional and socio-political factors that inform the development of the communication discipline.

Pre-requisite: None

COMM3002 QUANTITATIVE METHODS

It is designed to accomplish three closely related goals: (1) to introduce students to the basic logic, process and techniques in quantitative research; (2) to provide students with a critical framework to examine communication problems and evaluate communication research; and (3) to offer students opportunities to gain hands-on experiences in empirical projects. They will learn to apply statistic software such as SPSS for both descriptive and explanative analysis.

Pre-requisite: None

COMM3003 QUALITATIVE RESEARCH METHODS

This course acquaints students with qualitative research methods in communication studies. It addresses philosophical and conceptual issues, and engages students in experimental activities in conceptualizing and carrying out a qualitative project including data collection, analysis and report presentation.

Pre-requisite: None

COMM3004 DIGITAL GRAPHICS

This course introduces students to the possibilities of digital graphics and provides them an education in the history of graphic design. Students will learn practical techniques in a variety of software; and they will concurrently be introduced to the history of graphic design and aesthetic theory. Emphasis will be placed on creatively experimenting with digital means of production.

Pre-requisite: None

COMM3005 MULTIMEDIA DESIGN

This course teaches students graphic design software as well as related digital technologies. Students will examine the history of various media, from online applications to video games, with an eye toward aesthetics, critical thinking, and creativity. Students will study both the production and reception of contemporary multimedia as well as learning to produce it themselves.

Pre-requisite: None

COMM3006 ADVERTISING PLANNING AND STRATEGY

This course acquaints students with advanced training on the development and execution of advertising projects through creative and motivating communication, strategic planning and effective assessment. The emphasis is on providing students opportunities to engage in a real-

life advertising context, and to connect theories with practice in developing creative and effective strategies in advertising.

Pre-requisite: COMM2005

COMM3007 PUBLIC RELATIONS PLANNING AND STRATEGY

This course teaches advanced public relations, dealing with theories of management function and public relations practices. It covers media relations, issues management, and organization-public relationships. It investigates representative public relations cases, with a particular focus on explaining and evaluating theories, strategies, and tactics.

Pre-requisite: COMM2001

COMM3008 PUBLIC OPINION

This course covers the fundamentals of public opinion in democratic environments and evaluates the role, nature and dimensions of public opinion in democratic liberalism. It investigates the role of mass communication in organizing, implementing, and controlling public opinion. By introducing methods of polling and survey research, it highlights the complicated issues related to media, society and citizenry.

Pre-requisite: None

COMM3009 PERSUASION: THEORY AND PRACTICE

This course considers the ethical aspects of persuasion from the perspective of the humanities, business, and social sciences. It challenges students to think critically about persuasive communication. Comparative approaches from Asian and Western perspectives will be deployed for studying various modes, styles and genres of persuasion.

Pre-requisite: None

COMM3010 高級中文新聞寫作與採訪

ADVANCED NEWS WRITING AND REPORTING IN CHINESE

本課程主要通過課堂講授與練習，介紹新聞記者的獨特思維方式與獨家新聞報道、深度新聞報道、通訊與特寫、各類專題新聞報道的採寫技巧，以及不同新聞媒介對採寫的不同要求等內容。

This advanced level course enhances students' journalistic abilities. It emphasizes investigative reporting and in-depth analysis of news events. Students will develop strong skills in interview techniques, deep reporting, background research and writing across genres.

先修科目：沒有

COMM3011 ADVANCED NEWS WRITING & REPORTING IN ENGLISH

This course further expands the skills students acquired in News Writing and Reporting with an emphasis on beat reporting, special assignments and feature writing. It focuses on critical evaluation of evidence, development of investigative skills and improvement in computer-assisted reporting techniques. Students will work on multi-source news stories, features and opinion articles which revolve around public issues of timely significance in society.

Pre-requisite: None

COMM3012 中文編輯學

CHINESE NEWS EDITING

本課程主要通過課堂講授與練習，介紹編輯學的基本理論與基本知識，側重報刊新聞編輯，略述書刊編輯與影視編輯等基本知識。課程內容包括：編輯演變與類型，編輯的職責與修養，文稿的取捨、修改與配置，新聞標題的製作，報刊新聞版面的編輯技巧，報道或書稿選題的策劃與組織，圖片編輯，專刊和副刊編輯，廣播新聞編輯與電視新聞編輯。

This course teaches the fundamentals of desktop publishing in Chinese. Students will learn editing principles, theories, aesthetics and skills for creating and making various kinds of publications under diverse production contexts. Key topics include: the history of news editing, editorial ethics and roles, news and images editing, headline making and so on.

先修科目：沒有

COMM3013 ENGLISH NEWS EDITING

This course introduces students to the fundamentals of news editing and desktop publishing. Addressing the role and ethics of editors in media organizations, the course comprises practical training of basic copy-editing skills, such as proofreading, editing, making headlines. Other key topics include principles of newspaper and magazine layout practices, particularly in a desktop publishing environment that uses multiple graphics software applications.

Pre-requisite: None

COMM3015 ADVANCED VIDEO PRODUCTION

This course teaches students advanced video production skills, including two or more camera setup, interview techniques, special effects, as well as visual and narrative theories. The format of instruction includes lectures, discussions, presentations, exercises and screenings; it strongly encourages active participation and interaction. Critical and independent thinking is emphasized. Students are required to complete small video projects. Completed works will be exhibited publicly.

Pre-requisite: COMM2006

COMM3016 DOCUMENTARY

The course provides a theoretical and practical discussion of the history, aesthetics, genres, and practice of documentary in contemporary society. By highlighting the director/producers' role in the process of production, students are encouraged to examine various visual elements of documentary and develop skills by engaging in documentary production.

Pre-requisite: None

COMM3017 SCRIPTWRITING

Scriptwriting is an opportunity for students to study storytelling and narrative traditions. Students will read original works of fiction and scripts for television, film, and new media content. Students will also write original scripts that will be developed throughout the course via collaborative writing exercises and in class peer review.

Pre-requisite: None

COMM3018 BROADCAST NEWS WRITING IN CHINESE

This course provides students with a critical understanding of television. It offers a range of themes: TV industry and institutions; TV audiences; news, documentary, entertainment programmes, drama and other TV genres. The intricate relationship between production and reception will be highlighted and critically examined. Students are expected to develop a historical and systematic overview of the function and impact of television, from the tube to online formats.

Pre-requisite: None

COMM3019 GENDER, MEDIA AND DIVERSITY

As a venue for civil discourse, media should fairly and accurately represent the various groups that comprise the society. However, the economics of media often contribute to underrepresentation or stereotypical profiling of minority groups. This course takes a critical approach to examining the causes and manifestation of such biases in the media, with emphases on such issues as class, race, gender, ethnicity, age, sexual orientation, and political viewpoints.

Pre-requisite: None

COMM3020 CRISIS MANAGEMENT

This course covers the basic elements of crisis communication and the procedures for creating and implementing communication plans when crisis occurs. It examines different types of crises in commercial corporations and non-profit organizations. It explores pitfalls of crisis communications, teaches crisis prevention and resolution, and addresses ethical issues.

Pre-requisite: None

COMM3021 BROADCAST JOURNALISM

The course is designed to prepare students for responsible roles in the broadcast and television news production. It teaches position chart and trade terminology. It gives emphasis to broadcast

news writing and shooting. Students learn lens operation, video recording and studio control, and postproduction editing skills. Lessons in lighting, sound and setting as well as visual and special effects will be held. Students will participate in anchor and presenter exercises that comprise the following genres: interview, discussion panel, weather reporting, special programme, year-end review, documentary and live news programme.

Pre-requisite: None

COMM3022 NEW MEDIA JOURNALISM

Multimedia is an interactive composite of text, graphic, sound, video and animation elements. This advanced level course adopts a "multiple media" approach to journalism. Students will learn to present news verbally, visually and above all, interactively, using new media formats.

Pre-requisite: COMM1001

COMM3023 POLITICAL COMMUNICATION

The course investigates the processes political candidates and the mass media employ to generate and disseminate political narratives. It explores how political communication and mass media shape the political process and political outcomes: do they contribute – positively or negatively – to the quality of democracy, or do they not make a difference at all?

Pre-requisite: None

COMM3024 ANIMATION II

This course, the second part of the animation course series, walks students through the various stages of an animation project, which include planning, implementation, and management. Hands-on practice integrates students' knowledge of 2D and 3D digital animation into the realization of original narratives. Such storytelling is studied across various platforms from home entertainment, educational, museums, electronic media, advertising billboards, interactive channels, or apps for mobile devices.

Pre-requisite: COMM2013

COMM3025 CINEMA STUDIES

The course offers students a general knowledge about film history, genre and practices. It teaches analytical concepts for understanding film industry and cinema texts as cultural, artistic, industrial and political phenomena. It stimulates students' interest for film studies. Topics may comprise national cinemas, Third cinemas and Chinese language cinemas, including representations of gender and sexualities.

Pre-requisite: None

COMM3026 CULTURAL INDUSTRIES AND POLICIES

This course examines the social, political, economic, and institutional factors affecting the development and regulation of the arts and the media in the contemporary world. With reference to both Macao and international contexts, the course will discuss such topics as heritage, tourism, museums, leisure, sports, architecture, urban development, and the cultural industries, and their consequences for identity, community, and citizenship.

Pre-requisite: None

COMM3027 MACAO MEDIA AND CULTURE

This course introduces student to the historical development of mass media of communication in Macao since the city's establishment more than 450 years ago. It explores issues such as the role of the media and their impact on Macao culture and society, as well as the formation and representation of Macao's unique culture and identity.

Pre-requisite: None

COMM3028 POPULAR CULTURE AND COMMUNICATION

The course aims to engage with social, political, economic and historic meanings of popular culture. It examines a wide range of forms, styles, and practices through which popular culture is produced, performed and consumed. Popular culture genres covered in the course may include

television, music, film, fashion, video games, comics, and subcultures. Students are expected to assess the significance of popular culture through their everyday life experience.

Pre-requisite: None

COMM4000 ORGANIZATIONAL COMMUNICATION

This course focuses on theories and processes related to organizational communication. Students will acquire skills for assessing communication problems, designing communication systems, and improving communication quality. Other key topics include managerial communication, teamwork and leadership, and conflict resolution.

Pre-requisite: None

COMM4001 GLOBAL MEDIA STUDIES

This course provides students with a platform to consider their role in the future of global communication. It analyzes media communication across a wide variety of levels, from personal to local, corporate, and international. The theoretical and methodological approaches are drawn from an interdisciplinary tradition within the arts, humanities and social sciences that focuses on understanding the role of culture, gender, and power in public communication. With a focus on globalization, topics may include specific media industries and markets, and the use of media technologies by both corporations and non-profit organizations.

Pre-requisite: None

COMM4002 MEDIA LAW AND ETHICS

This course covers ethical principles for media practices, including journalism. It examines local and international laws governing media coverage and freedom of expression. Key topics include national security, defamation, privacy, and obscenity, with a particular focus on definitional and implementation issues with respect to laws, principles and ethics.

Pre-requisite: None

COMM4003 FIELD INTERNSHIP

In cooperation with local corporations, agencies, and organizations, final year Communication Major students are assigned short-term work placements that allow them to apply communication knowledge and skills to real-life contexts, including problem solving. Interns will attend an internship class once a week. To pass the course, they must obtain satisfactory performance reports from both the faculty supervisor and internship site director.

Pre-requisite: None

COMM4004 GRADUATION PROJECT

This capstone course provides an opportunity for final year Communication Major students to carry out an original study on topics pertinent to communication studies. The final outcome is an academic or semi-academic thesis. Under the supervision of the thesis instructors, students will independently develop the research topic, review relevant literature, specify research methodology, gather data, analyze data and report findings. The undergraduate thesis may be an individual effort or completed as a small group project. Qualitative, quantitative, or combined research methods may be used.

Pre-requisite: None

COMM4005 WORKSHOP: EVENT PLANNING AND IMPLEMENTATION

Integrating theory and practice, this capstone course is designed for final year Communication Major students to design and implement a campaign event. It offers them hands-on experiences that include fund-raising, budget control, event planning and team-working. Finally it provides ample opportunities for applying academic learning to real-life contexts.

Pre-requisite: None

COMM4006 WORKSHOP: CHINESE PUBLICATION

Integrating theory and practice, this capstone course is designed for final year Communication Major students to produce a Chinese publication, that includes photographic images and graphic

material. It offers them hands-on experience, and puts an emphasis on connecting the magazine with real-life contexts. It sharpens their writing, editing and desktop publishing skills, and finally enhances journalistic professionalism.

Pre-requisite: None

COMM4007 WORKSHOP: VIDEO I

Integrating theory and practice, this capstone course is designed for final year Communication Major students to produce video projects that are of high production quality. It uses the mentor-student approach and gives students ample opportunities to apply their video production skills. Students may complete their video projects in one or two semesters. Completed work will be exhibited publicly.

Pre-requisite: None

COMM4008 WORKSHOP: VIDEO II

This capstone course extends from Video I. It is mainly for students who have embarked on video projects that require two semesters to complete. Video II projects are expected to achieve professional or close-to-professional standards. Completed work will be exhibited publicly.

Pre-requisite: None

COMM4009 WORKSHOP: ENGLISH PUBLICATION

Integrating theory and practice, this capstone course is designed for final year Communication Major students to produce an English publication. It enables them to acquire more hands-on experiences and further enrich academic knowledge in the area of journalistic publication, from news gathering, news and feature writing, photo journalism to editing, page layout, and website design and production.

Pre-requisite: None

COMM4010 INTEGRATED COMMUNICATION CAMPAIGNS

This advanced level campaign course absorbs the integrated approach to advertising and public relations. The instructor will work closely with students to develop campaign projects for the private and public sectors. It encourages students to hold creative campaigns, participate in college-level competitions and build a communication campaigns portfolio. It helps students use both conventional and unconventional methods to reach their targeted audiences. Campaigns designing and implementing with consideration of real-life contexts will be emphasized.

Pre-requisites: COMM2001

COMM4011 MEDIA MANAGEMENT

This course combines business administration and media production. It focuses on the technical, artistic and entrepreneurial aspects of media industries. Students will learn different aspects of managing print media, electronic media and the integrated new media.

Pre-requisite: None

COMM4012 SPECIAL TOPICS IN PUBLIC COMMUNICATION

This course offers special topics in Public Communication that includes in-depth studies of theoretical or practical issues in the public relations industry or public communication field. Topics may vary year to year.

Pre-requisite: None

COMM4013 WRITING FOR PUBLIC RELATIONS AND ADVERTISING

This is a writing-intensive course. Students will examine the intricate between organizations, publics, and the media. They will prepare, compose and write public relations/promotional messages for different media platforms including news releases, copy for company publications, direct mail, and Web sites.

Pre-requisite: None

COMM4015 SPECIAL TOPICS IN CREATIVE MEDIA

This course offers special topics in Creative Media at the advanced level that range from creative arts to creative industries. Topics may vary from year to year.

Pre-requisite: None

COMM7000 VISUAL COMMUNICATION HISTORY SEMINAR

An in-depth understanding of the development of visual communication throughout history and in contemporary societies is fundamental for visual communication designers because it contextualizes his/her creative practice in historical terms. This course provides students the framework for visual communication history and to research on and engage with the contemporary visual communication world through reading, research, discussion, and writing.

Pre-requisite: None

COMM7001 VISUAL COMMUNICATION THEORY

This course aims to investigate visual communication theory, aesthetics, and philosophy related to the formal and perceptual aspects of art, design and creative media. It sheds light on how art and design communicate and what art and design express through different styles, genres and media. The goal is for students to develop a holistic understanding of visual communication and art making, which serves as fundamental training for artists and designers and visual communication researchers.

Pre-requisite: None

COMM7003 VISUAL COMMUNICATION: PRACTICE AND CRITIQUE

Visual Communication: Practice and Critique is a graduate seminar designed to help students develop his/her own body of visual communication work through studio practice, research, and critical analysis of the works as they progress. Students are encouraged to pursue a focused personal vision and creative activities through a combination of studio practice and group critique of the students' works as well as their artist statement and/or design concept.

Pre-requisite: None

COMM7004 RESEARCH AND CREATIVE ACTIVITIES

Research and Creative Activities is a graduate course designed to help students develop his/her own body of visual communication work through studio practice and research in art, design, and creative media. Studio component and instruction are tailored to the student's individual investigations and research direction. The ultimate goal is to help students develop his/her own visually coherent and conceptually unified body of visual communication work.

Pre-requisite: None

COMM7098 PROJECT REPORT

Project Report consist of two elements: 1) a formal presentation of a visually coherent and conceptually unified body of work in arts, design, and/or creative media in the forms of solo and/or group exhibitions and/or performances; and 2) a written report that focuses on the artist statement, design concept statement, and the theoretical analysis of his/her own thesis project.

Pre-requisite: None

COMM7701 THEORIES OF COMMUNICATION

This course is designed to introduce the basic concepts and logic of communication theories with a specific emphasis on linking theoretical concepts to applied communication practices and issues. It serves three inter-related objectives. First, it aims at providing the students critical perspectives of communication problems. Second, it attempts to draw connections between theoretical concepts and practices in various applied areas, including news and entertainment production, advertising, public relations, and public information. Third, it prepares students to approach other courses in the programme and their final graduation project.

Pre-requisite: None

COMM7702 RESEARCH METHODS OF COMMUNICATION

Introduction to applied media research, research criticism, data interpretation, and fundamentals of audience analysis. Topics include: surveys, content analysis, experimental test of programmes, field research, and formative evaluation.

Pre-requisite: None

COMM7703 COMMUNICATION PATTERNS AND CULTURE IN GREATER CHINA

This course focuses on the history of Chinese Communication developments, special features of Chinese communication structure, trends and issues of Chinese media, traditional and modern. Both behavioral and historical approaches will be utilized in such analysis. Emphasis is on contemporary China.

Pre-requisite: None

COMM7704 INTERNATIONAL AND INTERCULTURAL COMMUNICATION

This course examines contemporary issues in international and intercultural communication and the driving political, sociological, cultural and economic forces behind the gathering and disseminating of news, data and entertainment content through various channels in the world, with an emphasis on communication systems. From an interdisciplinary point of view, it covers the basic theoretical concepts about intercultural communication and international relations, and deals with the impact of intercultural encounters on national economy, politics and culture.

Pre-requisite: None

COMM7705 PUBLIC OPINION

The meaning, nature, and functions of public opinion within social and political contexts; measurement through polling; theories and research findings on the formation, dynamics and change of public opinion. Students conduct actual public opinion surveys and write reports.

Pre-requisite: None

COMM7706 NEW MEDIA AND COMMUNICATION STUDIES

The popularity of the Internet and emerging interactive telecommunication services have made multimedia a topic of interest. This course is designed to take a serious look, from both academic and professional perspectives, at the foundations and principles behind development and production processes from inception (developing the concept) to completion (hands-on production, testing, and distribution) in this new entertainment and information medium.

Pre-requisite: None

COMM7707 SPECIAL TOPICS IN JOURNALISM AND DIGITAL MEDIA

This course guides students to enrich their knowledge and skills for more in-depth news writing and reporting. Advanced techniques of news reporting, investigative reporting, and personality profiles will be covered including advanced skills in dealing with news sources, interviewing, library search, and computer assisted reporting (CAR). The course also places a significant emphasis on online news reporting and publishing, providing students with basic knowledge and skills of designing and managing news websites.

Pre-requisite: None

COMM7708 SPECIAL TOPICS ON ADVERTISING

This course develops students' ability to understand and effectively conduct research projects in advertising, such as audience analysis, message/media research, and marketing surveys. It is designed to bring together the theories and methods of communication and social sciences to deal with practical problems in advertising. Emphasis will be on a synthesis of theoretical studies in communication and professional practice in advertising.

Pre-requisite: None

COMM7709 SPECIAL TOPICS ON PUBLIC RELATIONS

This course provides students with a comprehensive and in-depth understanding of all aspects of public relations, including public relations practices in business, education and government with

an emphasis on public relations principles: identifying target publics, press relations, cost management and planning public relations programmes.

Pre-requisite: None

COMM7711 COMMUNICATION AND SOCIAL CHANGE

Analysis of the role of communication in cultural, economic, political and social change. Integration and synthesis of theories concerning communication and change. Case studies will be examined.

Pre-requisite: None

COMM7712 MEDIA FUNCTION AND MANAGEMENT

This course provides in-depth case studies of the functions of different mass media, and conducts field observations and practice in technical operations. In addition, this course will discuss and analyze media organization and management, process and characteristics of media decision making, personnel management and training, planning and production, and sales and distribution.

Pre-requisite: None

COMM7714 PROFESSIONAL WRITING IN ENGLISH

This course provides advanced training in English journalistic writing and editing, promotional writing and other types of professional writing skills.

Pre-requisite: None

COMM7715 DIGITAL MEDIA

In this course transdisciplinary approaches will be used to study digital media in everyday practices, that includes existing and emerging technologies. Students will create original content and gain practical skills in software and imaging technologies.

Pre-requisite: None

COMM7716 SPECIAL TOPICS ON COMMUNICATION AND SOCIETY

This course guides students to examine a range of theories and critical perspectives on communication and society. Covers a range of research contexts and outcomes. Content areas vary according to instructor and student interest.

Pre-requisite: None

COMM7717 SPECIAL TOPICS ON COMMUNICATION AND CULTURE

This course examines interactions between communication and culture as experienced in virtual, mediated and face-to-face contexts. Covers a range of perspectives and research outcomes. Content areas vary according to instructor and student interest.

Pre-requisite: None

COMM7718 SPECIAL TOPICS ON COMMUNICATION RESEARCH

This course provides in-depth training on a particular research method. Content areas vary according to instructor and student interest.

Pre-requisite: None

COMM7719 CREATIVE AND CULTURAL INDUSTRIES: A MEDIA STUDIES APPROACH

This course will draw from a variety of disciplines that focus on popular media production and reception. Particular attention will be directed toward creative and cultural industries in Macao and beyond.

Pre-requisite: None

COMM7721 ACADEMIC WRITING AND SCHOLARSHIP

This master-level course aims to develop students' theoretical knowledge and practical skills required to undertake their research and writing. The course includes an introduction and discussion on academic scholarship and research writing in the field of communication, helping students identify their implicit theoretical hunches, articulate those ideas into a researchable question, and then relate this question to a certain theoretical framework to discover new

knowledge in the relevant context. It is also designed to help students develop a solid proposal through practice, discussion, and mutual critique.

Pre-requisite: None

COMM7998 PROJECT REPORT

The Project Report should consist of an essay that addresses a topic that is of significance to the field of communication. It must be characterized by a comprehensive account of the topic and the issues being analyzed and evaluated; and demonstrate a familiarity with and an ability to utilize different methodologies and scholarship.

Pre-requisite: None

COMM8000 ACADEMIC WRITING FOR VISUAL COMMUNICATION RESEARCH

This course has two main areas of focus. Firstly, it concentrates on the techniques of writing associated with or required by the various disciplines within the wider field of visual communication: this will include writing for specific genres (dissertation writing, writing a journal article, writing a visual communication review, etc.). Secondly, it will deal with contextual issues, both general and specific to the field of visual communication, which inform academic writing. Through analysis and discussion of the formats and key issues of academic writing in visual communication, this doctoral-level seminar provides students the opportunities to practice writing publishable journal articles and essays.

Pre-requisite: None

COMM8001 VISUAL COMMUNICATION THEORY AND RESEARCH METHODS

This course aims to investigate visual communication theory, aesthetics, and philosophy related to the formal and perceptual aspects of visual communication. It sheds light on how visual elements communicate and what visual communication expresses through different styles, genres and media. The goal is for doctoral students to develop a holistic understanding of visual communication, which serves as fundamental training for visual communication researchers.

Pre-requisite: None

COMM8854 ACADEMIC WRITING FOR COMMUNICATION RESEARCH

This course has two main areas of focus. Firstly it will concentrate on the techniques of writing associated with or required by the various disciplines within the wider field of communication (including media studies and cultural studies): this will include writing for specific genres (thesis writing, writing a journal article, writing a literature review). Secondly it will deal with contextual issues, both general and specific to the field of communication, which inform academic writing: this will include editing, proofing, referencing and ethical issues and requirements.

Pre-requisite: None

ECON1000 BASIC MICROECONOMICS

An introduction to the principles of microeconomics. Topics discussed include fundamentals of the market system, determinants of consumer demand, output and pricing decisions of firms, the operations of competitive, monopolistically competitive, monopoly, and oligopoly product markets, labor and other factor markets, and the role of governments in economic activity.

Pre-requisite: None

ECON1001 BASIC MACROECONOMICS

An introductory course in macroeconomic principles. Topics discussed include determination of national income; national income accounting; unemployment and inflation; stabilization instruments of fiscal and monetary policy; economic models developed by Classical and Keynesian economists and the monetarist school.

Pre-requisite: None

ECON1002 MATHEMATICS I

The course is designed to prepare students to apply mathematical analysis to problems in economics. The course emphasizes the mathematics of differential calculus, including the

concept of the derivative and its use in the analysis of functions. Concepts of matrices are also introduced. Illustrative applications to topics in social sciences are given throughout.

Pre-requisite: None

ECON1003 MATHEMATICS II

A continuation of Mathematics I. The course discusses multivariable calculus and its application for solving optimization and analyzing comparative statics of economics. The course also introduces economic dynamic and integral calculus, including dynamics and integration, definite integrals, improper integrals, and their applications.

Pre-requisite: ECON1002

ECON2000 STATISTICS I

Topics discussed include descriptive statistics; probability theory; probability distributions, and sampling distribution. The course is also an introduction to estimation and hypothesis testing. Students are required to use a software package, specifically Microsoft Excel.

Pre-requisite: None

ECON2001 STATISTICS II

The course is a sequence following Statistics I. The course includes topics in estimations and hypothesis testing for multiple populations, simple linear regression, non-parametric analysis, and time-series analysis.

Pre-requisite: ECON2000

ECON2002 INTERMEDIATE MICROECONOMICS I

The study of the behavior of individual participants in the economy. This intermediate-level course emphasizes optimal patterns of consumption and production, analysis of market equilibrium, and the structure of different types of product markets.

Pre-requisite: ECON1000

ECON2003 INTERMEDIATE MICROECONOMICS II

A continuation of Intermediate Microeconomics I. The course analyzes different models of oligopolistic market and factor market equilibrium. Other topics discussed include welfare economics, general equilibrium analysis, externalities, public goods, intertemporal choice, uncertainty, imperfect information.

Pre-requisite: ECON2002

ECON2004 INTERMEDIATE MACROECONOMICS I

An intermediate-level course studying the operations of the aggregate economy. Subjects covered include national income accounting, IS-LM model, aggregate demand and supply, fiscal policy, monetary policy, economic growth and the dynamic AD-AS model.

Pre-requisite: ECON1001

ECON2005 INTERMEDIATE MACROECONOMICS II

A continuation of Intermediate Macroeconomics I, subjects covered include economic growth, microfoundation of consumption and investment functions, demand and supply of money, problems of inflation and unemployment, deficit and inflation, and open economy macroeconomics. The theoretical foundations for formulating and implementing effective macroeconomic policies are also studied.

Pre-requisite: ECON2004

ECON3000 MANAGERIAL ECONOMICS

This course discusses the application of economic principles and methodologies to the decision-making process of firms or organizations. Rules and principles are introduced that aim at facilitating the attainment of the desired economic goals of management. Economic theory and the analytical tools of decision science are integrated to examine how an organization can achieve its goals most efficiently.

Pre-requisite: ECON2002

ECON3001 MONEY AND BANKING

This course provides an understanding of the economic role of money, focusing on discussion of different schools of thought relating to the significance of money and monetary variables.

Pre-requisite: ECON1001

ECON3002 ECONOMETRICS I

Introduces elementary econometric techniques beginning with single- and multi-variable ordinary least squares regression models. Also discussed are generalized least squares methods, the problems of heteroskedasticity and autocorrelation, and the concept of multicollinearity.

Pre-requisites: ECON2000 and ECON2001

ECON3003 ECONOMETRICS II

A continuation of Econometrics I. The course explores more advanced topics in single and multivariate regression analysis, making use of matrix algebra. Empirical studies of econometric relationships make use of econometric software packages, such as EViews, STATA and others.

Pre-requisite: ECON3002

ECON3004 MATHEMATICS FOR ECONOMICS

Introduces mathematical tools and techniques used in the study of economics at an advanced level. Subjects discussed include static analysis, comparative statics, optimization methods, dynamic analysis, and mathematical programming.

Pre-requisites: ECON1002 and ECON1003

ECON3005 FORECASTING METHODS IN ECONOMICS

Presents an overview of different economic forecasting methods, including judgmental, decomposition, exponential smoothing, seasonal ARIMA and econometric methods. Particular emphasis is laid on the use of forecasting methods in practical circumstances. Computer programmes such as Excel, EViews and STATA will be used.

Pre-requisites: ECON1002, ECON1003 and ECON2000

ECON3006 INTERNATIONAL TRADE

A course combining a theoretical treatment of the basis for international trade, focused on comparative advantage, reciprocal demand, factor endowments, and other trade theories, with an examination of the economic effect of various trade policies including tariff and non-tariff trade barriers. The integration of economies through trade and the international movement of factors of production are also discussed. Applications of theoretical models for analyzing current affairs are discussed throughout.

Pre-requisites: ECON1000

ECON3007 INTERNATIONAL MONETARY ECONOMICS

Topics covered in this course include the monetary approach to the balance of payments; different exchange rate regimes; international capital mobility; international monetary organizations; markets for foreign exchange, including the Eurocurrency markets; the automatic adjustment mechanism; interest-rate and purchasing-power parities; speculative activity in money markets; and the setting of international macroeconomic policy.

Pre-requisites: ECON1001

ECON3008 INTERNATIONAL ECONOMIC LAW

Discusses the legal aspects arising from international economic relations. Topics covered include laws covering international trade, technology transfer, international investment, taxation, and the resolution of disputes.

Pre-requisite: None

ECON3009 INTERNSHIP

This course intends to provide our students with the opportunities to apply their economics knowledge to solving real world problems when they receive internship training offered by local

government departments, banks or other financial institutes. Through the internship opportunities, our students will acquire/enhance their social and practical skills that enable them to be better prepared for rapidly shifting needs from the Macao Society.

Pre-requisite: To enrol in this course, students need to have minimum cumulative GPA 2.0 and the approval of the course instructor

ECON3010 DEVELOPMENT ECONOMICS I

Topics covered in this course include the concept of economic development, the measurement of levels of development, poverty and inequality, population, education and health, migration, agricultural and industrial development, the roles of the state and the market, financial and fiscal policies, foreign trade, and environmental issues in developing countries.

Pre-requisites: ECON1000 and ECON1001

ECON3011 DEVELOPMENT ECONOMICS II

Extends the analysis in Development Economics I, with special treatment on development theories and growth models that are applied to the developing economies.

Pre-requisites: ECON1000 and ECON1001

ECON3012 INSTITUTIONAL ECONOMICS

This course focuses on the comparative analysis of the economies of different countries. It develops a theoretical framework for comparing two polar types of economic system - capitalist and socialist - and examines the economies of the United States and the former Soviet Union as representative examples of these polar types. Other countries are studied to develop an appreciation of the broad range of economic systems found in the real world.

Pre-requisites: ECON1000

ECON3013 URBAN ECONOMICS

Focuses on the application of economic principles to the understanding of the structure and functioning of urban areas. Topics discussed include the economic bases of urban growth; economic determinants of urban structure; economic aspects of locational choice; growth and decline in urban economies; and the use of economic principles in the analysis of urban problems.

Pre-requisite: ECON2002

ECON3014 ECONOMY OF HONG KONG, MACAO AND THE PEARL RIVER DELTA

This course provides basic knowledge on the economies of Hong Kong, Macao and the Pearl River Delta region. It focuses on the development of these economic entities in the past 10 -20 years and how these economies interact with each other and integrate into a regional economic bloc.

Pre-requisite: None

ECON3015 EUROPEAN ECONOMIES

This course surveys the ongoing process of economic integration in Europe and critically evaluates the performance from the early stage of integration to the current EMU. The increasing trade and economic relations between China and Europe and the role of Macao are also examined.

Pre-requisite: None

ECON3016 HISTORY OF ECONOMIC THOUGHT

An intensive survey of the development of economic thought. The course introduces the work of outstanding thinkers and theoreticians in economics through discussion of the varied traditions of thought that have developed in the discipline.

Pre-requisites: ECON2002 and ECON2004

ECON3017 WESTERN ECONOMIC HISTORY

A course examining the development of basic economic institutions in Western society. Emphasis is placed on key problems of historical interpretation.

Pre-requisite: None

ECON3018 CHINESE SOCIAL AND ECONOMIC HISTORY

This course examines the traditional Chinese society and economy and their transformation in modern times. Emphasis is placed on the nature of basic socioeconomic structures, social stratification and mobilization, and the interrelationship of the state economy with local society.

Pre-requisite: None

ECON3019 APPLIED ECONOMICS

A course on the application of economic principles to private and public decision making. Topics discussed include pricing decisions and microeconomic forecasting carried out by firms, and the policy consequences of the measurement, forecasting and interpretation of aggregate economic variables carried out by governments.

Pre-requisites: ECON1000 and ECON1001

ECON3020 RESEARCH PROJECT ON SOCIAL SCIENCES I

In this course students in economics develop and carry out individual research projects under the supervision of an economics staff member. Pre-requisite: Classified for third and fourth students in Economics.

Pre-requisite: Classification as A Fourth Year Student in Economics.

ECON4000 ADVANCED MICROECONOMICS

This course is a rigorous treatment of microeconomic theory making extensive use of mathematical tools, including differential calculus and constrained optimization. Topics discussed include public choice, risky assets, game theory, welfare, law and economics.

Pre-requisite: ECON2002

ECON4001 GAME THEORY

This course is designed to study static games as well as dynamic games, and in each case imperfect information is allowed. As such, the core solution concepts of Nash equilibrium and its variants will be covered. Selected economic applications of game theory, especially to the broadly defined economics of information, will also be discussed.

Pre-requisite: ECON2003

ECON4002 ECONOMICS OF INFORMATION

Topics include asymmetric information, adverse selection, moral hazard, signaling, screening, mechanism design and contracting.

Pre-requisite: ECON2003

ECON4003 WELFARE ECONOMICS

A course providing the theoretical knowledge necessary to understand the economics of public sector activity. Concepts discussed include Pareto optimality, public goods, externalities, public choice models, and cost-benefit analysis.

Pre-requisite: ECON2003

ECON4004 ADVANCED MACROECONOMICS

A rigorous treatment of macroeconomic theory, developed from a standard general equilibrium framework. The course examines various modern macroeconomic models with microeconomic foundation, especially growth models and overlapping generation models. These models will be used to discuss the topics in long-term economic growth, taxation, inflation, and social security. This course will also serve as a preparatory course for graduate level study.

Pre-requisite: ECON2004

ECON4005 PUBLIC ECONOMICS

This course aims to provide students with some basic understandings about the role of government and the reasons of government interventions in the economy. How households respond to the government interventions will also be discussed.

Pre-requisites: ECON2002 and ECON2004

ECON4006 LABOUR ECONOMICS

An introduction to the concept of the labor market, and the elements that distinguish it from commodity or other factor markets. The economic theory of trade union behavior is discussed, as well as the effects of unions on labor markets and the economy as a whole. Economic statistics from Macao, Hong Kong, China and the United States are applied to understand problems of the labor markets in those countries.

Pre-requisite: ECON2002

ECON4007 INDUSTRIAL ECONOMICS

This course is an analysis of competition and monopoly power in market economies. It discusses elements and determinants of market structure, the effects of market power on economic performance, the behavior of firms under different market structures, and policies for regulating markets including antitrust policies. The activities of public enterprises are briefly discussed.

Pre-requisite: ECON2002

ECON4008 LAW AND ECONOMICS

This course discusses the application of microeconomic and econometric theory to common legal problems: torts, contracts, property and crime, and the limitations of economic analysis. No previous familiarity with the law is assumed.

Pre-requisite: ECON2003

ECON4009 THE MODERN MACAO ECONOMY

This course provides students with an understanding of the modern Macao economy. Emphasis will be placed on the economic development in the past twenty years. Sectoral analysis includes the dominant tourism, manufacturing, construction, and banking. Current issues such as structural change of the economy will be discussed.

Pre-requisite: None

ECON4010 THE CHINESE ECONOMY

The focus of this course is on reviewing and analyzing the economic performance of China. Topics include economic transition, reforms on agriculture and industry, fiscal and monetary issues, development of the non-state sectors, trade and foreign direct investment, social security system and others.

Pre-requisite: None

ECON4011 ECONOMIES OF THE ASIA-PACIFIC REGION

A course focusing on the economies of nations and territories within the Asia-Pacific region. The economic relationships among different countries within the region are a focus of attention, as are the economic links between the region and other parts of the world.

Pre-requisite: None

ECON4012 SELECTED TOPICS IN ECONOMICS

The major goal of this course is to get students familiar with frontier research in selected areas in economics and to motivate them to begin their own research.

Pre-requisite: approval from instructor

ECON4013 RESEARCH PROJECT ON SOCIAL SCIENCES II

A continuation of Social Sciences Research Project I

Pre-requisite: Classification as A Fourth Year Student in Economics.

ECON4014 FINANCIAL ECONOMICS

This course is an introduction to economics of financial assets and financial markets. Topics: inter-temporal choice, expected utility theory, security valuation, selected asset pricing models, market efficiency, and the term structure of interest rates.

Pre-requisite: ECON2003

ECON7700 MICROECONOMIC THEORY

Methodological foundations of microeconomics. Theories of production and individual choice. Aspects of decision theory under certainty, risk and uncertainty. Introduction to game theory under complete and incomplete information, with applications to oligopoly. Perfect competition as a limiting case. General competitive equilibrium: existence and Pareto efficiency. Private information in markets. Basic auction theory. General theory of markets with adverse selection. Contract design in the context of moral hazard problems.

Pre-requisite: None

ECON7701 PUBLIC ECONOMICS

Measurements of changes in welfare; economy-wide incidence of taxes; taxation, risk-taking, and investments; corporate taxation; effects of taxation on financial markets; taxation of goods and services; taxation of income; and tax arbitrage, tax avoidance, and evasion, also the underground economy. Applied capital theory for public-sector investment decisions; social opportunity cost of capital, labor, and foreign exchange.

Pre-requisite: None

ECON7702 LABOUR ECONOMICS

Neoclassical analysis of labour market and its institutions. Topics on labour demand, labour supply, compensating wage differentials, human capital theory, discrimination and earnings differentials. Theories of wage and wage determination. Worker motivation and behaviour. Recent developments in the distribution of wage and salary income and in key institutions and organizational structures. Unemployment, search and turnover.

Pre-requisite: None

ECON7703 INDUSTRIAL ORGANIZATION

Structure, behavior, and performance of firms and their interactions on social welfare, production, investment and other economic decisions under various forms of market structures. Organization of the firm, monopoly, oligopoly, price discrimination, auctions. Economic and social regulation, deregulation and privatization, patent, anti-trust. Principal agent theory, vertical and horizontal integration, contracts, firms' behavior under monopoly and oligopoly, government regulations.

Pre-requisite: None

ECON7730 MACROECONOMIC THEORY

Overview of some classic topics in macroeconomics, with a view to providing students with the skills required to read critically recent professional articles. The main focus is on the basic analytical structure of economic models, their empirical implications, and some policy applications.

Pre-requisite: None

ECON7731 INTERNATIONAL TRADE AND FINANCE

Applications of basic trade theory to real-world economic problems. Neoclassical trade theory of pattern of trade and gains from trade, strategic trade theory under imperfectly competitive markets, labour migration and capital mobility, market distortions and commercial policies, dynamic trade theory and economic growth. Adjustment in international exchange markets, balance of payments, and international monetary system. Application of recent theoretical analysis on macroeconomic fluctuations and growth within an open economy context.

Pre-requisite: None

ECON7732 DEVELOPMENT ECONOMICS

Applied economic theories to economic growth and development. Meaning of development, economic growth, population and migration, capital flows, foreign aid, stabilisation and adjustment. Income distribution, poverty, hunger, household behaviour, agriculture, rural credit markets, institutions and the problem of corruption. Models of growth and developing emphasizing migration, modernization, technological change. Static and dynamic model of political economy.

Pre-requisite: None

ECON7733 MONETARY ECONOMICS

Survey of monetary and financial economics with an emphasis on macroeconomic elements. Models and theories of money and financial intermediation. Standard methods of introducing money into the neoclassical growth framework, overlapping generations models, and search-theoretical foundations for money.

Pre-requisite: None

ECON7760 METHODS OF ECONOMIC RESEARCH

Develops research ability of students through intensive discussion for preparing dissertation, individual and group research projects. Critical appraisal of modern economic research. Main techniques of empirical investigation and key issues in applying and testing theoretical models.

Pre-requisite: None

ECON7761 ECONOMETRIC ANALYSIS I

Review of conditional distributions, expectation, regression and principles of inference. Linear regression models, ordinary and generalised least squares, heteroscedasticity. Non-linear least squares. Hypothesis testing and confidence intervals. Maximum likelihood estimation and testing. Introduction to models and methods for discrete and censored data. Simultaneity, exogeneity, instrumental variables methods. Dynamic models.

Pre-requisite: None

ECON7762 ECONOMETRIC ANALYSIS II

Study of econometric techniques using time series and spatially dependent cross section data. Generalized method of moments estimation, spatial dependence modeling, vector autoregression models. Applications of these techniques in finance, macroeconomics, marketing, industrial organization, development, and other fields as well. Empirical processes and asymptotic theory, nonparametric and semiparametric estimation, unit roots and cointegration, continuous time econometrics.

Pre-requisite: None

ECON7763 ADVANCED TOPICS IN ECONOMIC THEORY

Topics on some frontier issues in economic theory. Macroeconomics: optimal fiscal and monetary policy, time inconsistency and incentive incompatibility of optimal policy, real business cycle models, etc; Papers on current topics of research in economic theory, mathematical economics.

Pre-requisite: None

ECON7780 THE CHINESE ECONOMY

Applies economic analysis to the study of Chinese economy. Sectoral contribution to the growth of total output. Formation of the development strategies before and after the economic reform. Evaluation of various macroeconomic policies after the 1980s; and China's integration with the global economy.

Pre-requisite: None

ECON7781 REGIONAL ECONOMIES (ASIA-PACIFIC/EUROPEAN MONETARY UNION)

Advanced economic analysis of the growing Asia-Pacific economies and the expanding European monetary union. Major issues such as economic liberalization and restructuring, regional integration and globalization. In-depth reading and individual research for selected regions.

Pre-requisite: None

ECON7998 PROJECT REPORT

A course focusing on developing and conducting individual projects under the supervision of an economics staff member, with the objective to motivate students become familiar with frontier research in selected areas in economics.

Pre-requisite: None

ECON8805 ADVANCED TOPICS IN ECONOMETRICS

The course investigates further current topics in theoretical and applied econometrics. Topics will vary and reflect current student and faculty's demand and instructors' interests. Selected advanced topics may include nonparametric and semi-parametric estimation, numerical optimization, simulation methods, time series, spatial, and panel data models

Pre-requisite: None

ECON8806 ADVANCED TOPICS IN MACROECONOMICS

The objective of this course is to provide an overview of some classic topics in macroeconomics, with a view to providing students with the skills required to read and write professional articles. The main focus is on the basic analytical structure of economic models, their empirical and policy implications.

Pre-requisite: None

ECON8807 ADVANCED TOPICS IN MICROECONOMICS

This course is organized into 3 parts, covering consumer and producer theories (Part I), market equilibrium and welfare (Part II) and selected topics in applied game theory (including part of behavioral economics) and its applications in the economics of information and incentives (Part III).

Pre-requisite: None

ECON8999 DOCTORAL THESIS

The purpose of the dissertation is to train students in a rigorous way to undertake independent economic research and to foster various research-related skills in addition to standard academic writing. The completion of the dissertation aims to encourage students to produce publishable essays, which should benefit future study and employment.

Pre-requisite: None

GPAD1000 INTRODUCTION TO POLITICAL SCIENCE

This course is designed to provide an introduction to political science. It will examine major concepts, issues, and methods of political science through an overview of the principal subjects in the discipline. Specific topics include political philosophy, power distribution, classification of political structures, political socialization, party systems and politics, types of representation, election models, and pressure group activities.

Pre-requisite: None

GPAD1001 INTRODUCTION TO POLITICAL THEORY

This course examines the development of different political ideologies in modern times that attempt to address the problem of governance raised by modern mass society. Topics include Classical Liberalism, Neo-Liberalism, Socialism, Marxism and its variations, and the decline and revival of democratic theory.

Pre-requisite: None

GPAD2000 PUBLIC SECTOR PERSONNEL MANAGEMENT

This course examines the civil service structure with respect to human resources planning, recruitment and decruitment, selection, orientation, employee training, career development, and compensation and benefits. Emphasis will be placed on civil service reform, managing workforce diversity, employment equity, performance assessment, sexual harassment, and family concerns.

Pre-requisite: None

GPAD2001 PUBLIC SECTOR ORGANIZATIONAL BEHAVIOR

A study of the theory, research and practice related to human behavior in public sector organizations. A number of topics will be examined within the context of the civil service structure, including: the causes and effects of interpersonal and group behavior, its dynamics and influences, organizational behavior relating to organizational climates, organizational culture, formal and informal organizations, conflicts and resolutions, and people-oriented management.

Pre-requisite: None

GPAD2002 COMPARATIVE POLITICS

This course examines the theory and practice of western democratic systems. Case studies include the governments of the United States, England, France, Germany, Japan and some small democratic nations in Europe. The socialist part covers such topics as the main features and patterns of socialism, the main principles of Marxism, democratic socialism, government structure, political culture, and political participation.

Pre-requisite: None

GPAD2003 SOCIAL SCIENCES RESEARCH METHODS

This course provides an introduction to basic research concepts and various research methods. The course introduces concepts and methodologies for conducting both qualitative and quantitative research. Topics include: induction and deduction; hypotheses testing; research design and process; archival research; survey research; field research and historical research.

Pre-requisite: None

GPAD2004 HISTORY OF CONTEMPORARY INTERNATIONAL RELATIONS

This course will examine important contemporary themes in international relations since World War I. We will focus on the causes of major wars, the development and retreat of imperialism, the rise of nationalism and the third world, the transformation of international institutions, and international diplomacy. Although we will pay special attention to how historians use historical methods to interpret these major events, we will also look at how international theorists explain them. Students will develop the ability to grasp key concepts in international relations history, to analyze historical events with the help of theoretical tools, and to conduct international relations research that is historically grounded.

Pre-requisite: None

GPAD2005 INTERNATIONAL LAW

This course introduces students to public international law, the systems of norms, rules, institutions, and procedures that regulate the interaction between states as well as states and individuals. This course investigates the building blocks of international system and the forces that are transformative or destructive (or both). We will also examine and debate the role that law plays in international conflicts and some of the pressing issues affecting us today. This course also incorporates various internet technologies to arrive at a better understanding of the practice of law in an increasingly 'virtual' environment.

Pre-requisite: None

GPAD2006 PUBLIC SECTOR ORGANIZATIONAL STRUCTURE AND DESIGN

This course examines the structure and design of public sector organizations. Topics include work specialization, departmentalization, chain of command, span of control, centralization and decentralization, formalization, mechanistic and organic organizations, bureaucracy, systems theory, boundary scanning, and learning organizations.

Pre-requisite: None

GPAD2007 MACROECONOMIC POLICY OF DEVELOPMENT

The course covers topics on the methodology of economic theory and policy, including the general equilibrium, the classical model and the Keynesian IS-LM Model, the recent development of macroeconomic theory. Basic growth and development theories will also be examined.

Pre-requisite: None

GPAD2008 GOVERNMENT AND BUREAUCRACY IN MACAO

This course examines the legal, institutional, and functional interrelationships between the legislative, executive, and judicial branches of the Macao government, and the operation of the government bureaucracy. Topics include: finance and budgeting in the public sector; the policy-

making process; roles of the press and interest groups; and current civil service practices and problems occurring in the civil service.

Pre-requisite: None

GPAD2009 POLITICS OF HONG KONG AND MACAO

This course examines the development of Hong Kong and Macao, their unification with China, and their current political problems. It focuses on the political and socio-economic changes during the period of transition and after the turnover. Topics such as the 'one country, two systems' model, Sino-British and Sino-Portuguese negotiations, the joint declarations, the basic laws, representative government, political institutions, political participation and socialization, process of democratization, civil liberties and the rule of law will be examined.

Pre-requisite: None

GPAD2010 POLITICS OF CHINA

This course provides an introduction to Chinese politics, beginning with the rise of the Chinese Communist Party to power in 1949. It examines the Yanan and Soviet models of socialist development, their modification during the 1950s and 1960s, and political development after the death of Mao Zedong in 1976.

Pre-requisite: None

GPAD2011 AMERICAN POLITICS

The American political system is one of the most successful and influential in the world. It has been learnt and emulated by many countries in history. The purpose of this introductory course is to help students make sense out of the seemingly puzzling and sometimes even chaotic political phenomenon in the United States. In doing so throughout the course, students are expected to acquire a balanced and comprehensive understanding of theories and practices, institutions and processes, continuities and changes, merits and defects of the American political system. For students of international relations who are interested in United States' foreign relations and its role in the world, it is a highly recommended course as American foreign policy is closely related to the dynamics of its domestic politics.

Pre-requisite: None

GPAD2012 ASIAN POLITICS

This course examines the politics of key Asian countries such as Japan, South Korea, and India. It will cover countries that, traditionally and presently, have strong connections with Macao, such as Thailand, East Timor, Burma, the Philippines and Indonesia. Main themes to be covered in this course may include: government structure, political culture, corruption and governance, ethnic politics, nationalism, globalization, development strategy, gender politics, social movements and democratization.

Pre-requisite: None

GPAD2013 POLITICAL AND SUSTAINABLE DEVELOPMENT

What is political development? What explains development and underdevelopment in the global South? How can states achieve development? This course will introduce to students the major theories and issues in the field of political development. The main focus is on the political economy of development in developing countries. We will start with a critical review of the major theories and debates in development. Then we will shift to specific public policy issues in the field of development, with a focus on exploring solutions to current problems in development. Key issues include: nation-building, democratization, human rights, urbanization, political culture, and so on. Students will learn how to critically evaluate key concepts and theories, to develop research skills that are necessary in the field of political development.

Pre-requisite: None

GPAD2014 THE RISE OF ASIA

This course reviews the process of social, political and economic modernization in Asia. It is a multi-disciplinary course that facilitates the students to acquire the foundational knowledge of

Asian power politics and dynamic changes, covering topics of political history, political culture, political economy and foreign relations of major powers in the region. With an emphasis on comparative politics it will analyze the pattern of Asian democratization: the drivers and obstacles. The course will also assess key IR issues affecting regional security, e.g. US Asia pivot, China's rise and power transition and Japan's normalization drive.

Pre-requisite: None

GPAD2015 AN INTRODUCTION TO POLITICAL ECONOMY

This course will introduce students to fundamental perspectives of political economy. It will provide a survey of the history of political economy, examining the free market perspective of Adam Smith, the free trade argument of David Ricardo, Karl Marx's critiques of capitalism, Veblen's focus on conspicuous consumption and the leisure class, Keynes's ideas to bring capitalist economies out of the Great Depression, and more recent neoclassical and neo-Marxist perspectives.

Pre-requisite: None

GPAD3000 ADMINISTRATIVE LAW I

This is a survey course on the structure and operation of public administration and the body of norms that govern it (constitution and the laws) as well as those emanated therefrom (such as regulations, orders, and directions, etc.) It further examines the nature of administrative act and the principles of its legality and rationality. Finally, the remedies for administrative actions will be analyzed.

Pre-requisite: None

GPAD3001 ADMINISTRATIVE LAW II

This course is a continuation of Administrative I. The concepts covered in Administrative Law I will be further explored to provide a deeper understanding of relevant theory and practice.

Pre-requisite: Administrative Law I

GPAD3002 PUBLIC FINANCE

This course examines the use of fiscal and monetary policies to achieve socio-economic and political objectives. Topics include: the functions of public budgeting, Keynesian model and the monetary revision, budgetary process, revenue budgeting, expenditure budgeting, capital budgeting, concepts of taxation, protective strategies and counter strategies, interest and exchange rates issues, auditing and evaluation.

Pre-requisite: None

GPAD3003 PUBLIC POLICY ANALYSIS

This course aims at developing critical understanding of public policy, especially in the context of social justice. It will focus on the introduction and examination of policy analysis frameworks and decision theories. Examples will be drawn from China, Macao, and Hong Kong to demonstrate the process of policy analysis.

Pre-requisite: None

GPAD3004 INTERNATIONAL RELATIONS THEORY

This course introduces and examines key theories and approaches in the study of international relations, including realism and neo-realism; theories about war, security and the use of force in international relations; classical liberalism, globalization, and transformation in world politics; theories about inter-state co-operation and transnationalism; the concept of international society; constructivism and the impact of law and norms in international relations; neo-Marxist and critical theoretical approaches to international relations; and normative theory and international ethics.

Pre-requisite: None

GPAD3005 INTERNATIONAL ORGANIZATION AND WORLD GOVERNANCE

As international organizations have become an integral part of a complex hub of a multi-level governance structure, and that international organizations have proliferated its roles in world

governance under the effect of globalization, this course will study the development of international organizations and its emerging network in world governance by examining the nature, role, impact, and potential of international organizations. This course will also examine various actors who operate at the global level, including nation states, international organizations, multinational corporations (MNCs), non-governmental organizations (NGOs) and individuals, to better understand the perspectives these actors bring to global discussions and explore the mandate of these organizations through various issues: global and multilateral governance of public health, trade, energy, food safety, peace and security, global environmental governance, and settlement of transnational disputes.

Pre-requisite: None

GPAD3006 FOREIGN POLICY DECISION-MAKING

This course examines definition and process of foreign policy and major theoretical approaches to Foreign Policy Analysis, including realism, liberalism and constructivism. It then introduces rational, bureaucratic, organizational and psychological models of foreign policy decision-making. It also addresses the role of media and public opinion, national security and economic issue in foreign policy. Case studies are conducted on major powers like the U.S., China, Russia, the U.K., France, Germany, Japan, and the EU.

Pre-requisite: None

GPAD3007 PUBLIC SECTOR STRATEGIC PLANNING

This course examines the importance and the process of strategic planning. Emphasis will be placed on PEST environmental scanning and SWOT analysis. Strategic planning at different levels of public sector organizations will be examined, with emphasis on proactive decision-making, contingency planning, environmental adaptability, and turning threats into opportunities.

Pre-requisite: None

GPAD3008 PUBLIC RELATIONS

This course examines the theories and concepts underlying public relations principles, actions, and problem-solving. It provides study and practice in public relations and promotion to influence and persuade diverse audiences, using skills and techniques to promote organizations, their policies, actions, goods, services, and public missions to create and maintain favorable public opinion. The focus is on how images and messages enhance public persuasion. Students practice promotional writing with exercises in the preparation of memoranda, press releases, features, and copy design for internal and external communications.

Pre-requisite: None

GPAD3009 STATISTICS FOR PUBLIC MANAGEMENT

This course provides an introduction to statistical techniques which can be applied to public administration. The emphasis is on explaining statistical procedures and interpreting the resulting conclusions. Topics include: introduction to statistics, organization and presentation of data, frequency distribution, central tendency and dispersion, probability and probability distributions, central limited theorem, hypothesis testing, one-sample significance test, sampling concepts, correlation analysis, measurement of association, introduction to SPSS.

Pre-requisite: None

GPAD3010 EUROPEAN UNION'S POLITICS

This course is an introduction to the governmental structures, political cultures, and policy-making processes that characterize European countries and the European Union. Case studies include the European Union, its member states, as well as other countries.

Pre-requisite: None

GPAD3011 CHINESE FOREIGN POLICY

This course examines the determinants of China's foreign policy and her foreign relations since the founding of the People's Republic of China in 1949. The course will focus on China's new social conditions, directions, and foreign policies in the rapidly changing global environment. It will

also discuss the new opportunities and challenges that China is facing as a rising power on the world stage. The course is designed to examine relevant issues from both Chinese and other perspectives in order to stimulate discussion among students of different disciplines and backgrounds.

Pre-requisite: None

GPAD3012 AMERICAN FOREIGN POLICY

More than a half century ago, the United States emerged from the Second World War as the most powerful nation on the earth. At the beginning of the 21st century it remains the sole superpower in the world. Because of its unique position in international relations, the success or failure of American foreign policy not only affects the well-being of the American people, but also has a great impact on war and peace in the rest of the world. This course examines American foreign policy from three vantage points: the evolution of American foreign policy in the Cold War period, policy making process in the context of the American political system, and the challenges the United States is facing in the post-Cold War and post-'9.11' era. By taking this course, students will acquire a more informed, balanced, and intellectual understanding of the main features of American foreign policy, the connection between American domestic politics and foreign policy, and the potential and limitation of the United States as a world power vis-a-vis other countries.

Pre-requisite: None

GPAD3013 SINO-AMERICAN RELATIONS

Sino-American relations are characterized by the American President Obama as the 'most important bilateral relations in the world.' With China's rise to the level of world power, the state of this pivotal relationship is increasingly impacting the rest of the world for better or worse? This course introduces students to the geopolitical, domestic, and ideological factors that have shaped the Sino-American relationship in the past and the present. It examines the military, economic, and diplomatic dimensions of current interactions to arrive at a clearer understanding of the past trajectory, present state, and possible future direction of relations between the United States and China.

Pre-requisite: None

GPAD3014 CHINA-EUROPEAN RELATIONS

This course examines the international interactions between China and Europe. Following a brief historical account of bilateral relations, it focuses on issues of major concern, including economic, security, energy, environment, human rights and cultural aspects. It then introduces China's relations with major European powers, including the U.K. France, Germany, Eastern European countries, and the EU. The unique role of Hong Kong and Macao in Sino-European relations is also discussed.

Pre-requisite: None

GPAD3015 FOREIGN POLICY OF THE EUROPEAN UNION

European Union is both an international organization of 27 European states and a supranational polity governed by a legislative and judicial bodies guided by the EU law and its founding treaties. Its double nature – an international organization and a supranational polity - is reflected in its foreign policy. The course examines the competencies and functioning of the foreign policy-making bodies of the European Union – the Council, the European Commission and Parliament and the High Representative for Foreign and Security Affairs. In addition, it examines the processes and procedures of foreign-policy decision making, including the role of individual Member States and their governments in the shaping and implementation of the EU foreign policy. Particular attention will be given to separate strands in the EU's foreign policy - its international trade policy, international humanitarian and development aid policies as well as its policies regarding international conflicts such as those in Iraq and Afghanistan.

Pre-requisite: None

GPAD3016 CHINA-EAST ASIAN RELATIONS

This course explores China's relations with some major players in East Asia such as Japan, South Korea, Russia and ASEAN countries. Historically China's relations with these countries were far from being peaceful and cooperative. In recent decades, China has invented a new strategy of 'peripheral diplomacy' which has significantly improved its relations with East Asian neighbors. However some outstanding problems and difficulties remain in China-East-Asian relations including territorial disputes, historical and cultural discord, and ideological and geopolitical conflicts. The course will analyze China's major bilateral relations as well as its diplomacy with multilateral institutions and organizations in the region.

Pre-requisite: None

GPAD3017 INTERNATIONAL POLITICAL THEORY

The course aims to explore international relations from the perspective of political theory. We examine the meaning of morality and ethical judgment in the context of a number of issues and practices in international relations, including wars, terrorism, human rights, state sovereignty, globalization, role of international law and global inequality. Students will critically assess the ethical practices of states and non-state actors through theoretical analysis, case studies and simulation exercises.

Pre-requisite: None

GPAD3018 CAPITALISM AND MODERNITY

This course examines the foundations of political economy. While these foundations were originally optimistic, promising human progress through economic progress, they were challenged in the 19th century by both reactionary pessimism and by radical critique. In our own time, growing awareness of the problems of generating unlimited growth and granting unrestricted capital mobility across nations have led some to question the idea of economic progress. The course demonstrates the historical novelty of capitalism and demonstrates that the human impulse to accumulation of capital is in no way a fundamental part of the human condition. By contrast with today, until the early 19th century in Europe, the needs of the society have historically taken precedence over the needs of the economy. The writings of classical thinkers in political economy will be explored to develop these ideas. No prior knowledge of modern political theory or of economics is assumed.

Pre-requisite: None

GPAD3019 CONFLICT AND COOPERATION IN INTERNATIONAL RELATIONS

This course is an introduction to the causes, nature and processes of conflict and cooperation in international relations. Historical and modern cases will be combined with an overview of theoretical frameworks to provide students with a comprehensive understanding of conflict and cooperation in the contemporary world.

Pre-requisite: None

GPAD3020 RELIGION IN INTERNATIONAL RELATIONS

This advanced course will examine the complicated relationship between religion and global politics. Topics will include the problem of defining religion as an analytical category, the religious origins of modern state sovereignty, the role of religion in violence and peacemaking, varieties of religious fundamentalism, the politics of sacred spaces and conflicts between religious practices and emerging human rights norms. Readings will draw broadly from political science, religious studies, sociology, and history. A prior course in international relations, comparative politics, or religious studies is required. Students not meeting this requirement will be admitted at the discretion of the instructor.

Pre-requisite: None

GPAD3021 DEMOCRACY AND DEMOCRATIZATION

This course aims to study democracy in theory and practice based a comparative approach. It looks into the transition and consolidation processes that began in the late 20th century. Is democracy the 'best' institutional arrangement in modern or post-industrial society? With the

collapse of communism in the 90s, has history 'ended'? Are 'Asian values' anathema to Western liberal democratic 'values'? What are the conditions, both domestic and international, that help explain democratic development? What explains the resurgence of authoritarianism? How important is deliberative democracy? In addition to addressing the problems with democratic transition and consolidation, this course examines the concepts of democracy and democratization, deliberative process in making public policy, and their significance and relevance for academics, politicians, activists and citizens.

Pre-requisite: None

GPAD3022 E-GOVERNMENT AND E-GOVERNANCE

The government's use of Information and Communication Technologies (ICTs) is not only a tool to achieve better government but also aims at good governance. This course is divided into two parts. The first part covers issues on the establishment of e-government, including: reasons to embrace e-government, challenges to e-government, planning, implementation and management of e-government, and types and forms of e-services. The second part focuses on the use of ICTs to bring citizens to the government process for the sake of good governance; topics include e-participation, e-deliberation, e-voting and e-democracy.

Pre-requisite: None

GPAD3023 GAME THEORY APPLICATIONS IN POLITICS AND ADMINISTRATION

This course is an introduction to game theory, concentrating on applications in politics and public management. Game theory is the formal method of examining interdependent decisions. An interdependent decision is one where what you do will depend on what someone else does. For example, a politician running for office may consider how voters will react to an issue stance. Topics include prisoner's dilemma, coordination games, signalling in politics, etc. Game theory provides tools for evaluating these situations. By the end of the course, students should be able to recognize strategic situations, apply formal models, and 'solve' them.

Pre-requisite: None

GPAD3024 GOVERNANCE REFORM IN CONTEMPORARY CHINA

This course deals with governance reforms (and their limitations) in China during the transition to market socialism. It explores the factors necessitating the reforms, the impact of the reforms on state-society relations, the emergence of a civil society and the rising political aspiration of the people.

Pre-requisite: None

GPAD3025 LABOR POLITICS

The class provides an overview of labor and employment relations, including the perspective of working people and their organizations. Some of the topics covered in this course include the changing nature of work, workers and workers' organizations; the impact of technology, the economic cycle, class, immigration, race, ethnicity and gender; the role of government in labor policy; the history of unions, their role in politics and challenges the labor movement faces today. Following this course, students will demonstrate an understanding of the policy and political issues relating to labour, and the political nature of work.

Pre-requisite: None

GPAD3026 POLITICS OF THE TOURISM ECONOMY

Tourism has become an important engine of economic growth in many Asian societies. This turn to tourism however has generated a set of social, political and ecological conflicts between and within the guests and the host societies. This course aims to train students with a better understanding on the socio-political dynamics unleashed by this development strategy. It is divided into three sections. The first part introduces students to various theories accounting for the rise of tourism and its transformation into a core development strategy in the post-industrial world. The second part covers main political conflicts inside tourist economies involving ethnicity, gender, labour, environment and class. The final section devolves into detailed studies of thematic topics (for instance, heritage tourism, national parks, ecotourism, sex tourism, casino tourism)

and/or country studies (for instance, tourism policy of China, Singapore, South Africa) in order to provide more nuanced illustrations of the political dynamics of tourism economies.

Pre-requisite: None

GPAD3027 SOCIAL POLICY AND ECONOMIC DEVELOPMENT IN MACAO

Industrial transformation and the change of demographic profile of Macao Special Administrative Region steer to revision of social policy in parallel to its economic development. This course focuses on the evolution of Macao's social policy corresponding to the changing socio-economic-political circumstances. It aims to provide a comprehensive understanding of the impact of demographic profile, poverty, education/ health inequality and regional integration on social policy. Apart from the introduction of concepts and theories for the understanding of social policy, some advanced statistical methods, like the decomposition of the Gini Coefficient, cluster analysis and factor analysis, will be introduced and applied for analyzing the effect of social policy change.

Pre-requisite: None

GPAD3028 INTERNSHIP

In collaboration with relevant government departments and agencies, private and public companies, and other social organizations, this course provides short-term work placement opportunities in Macao and elsewhere for students in the Department so as to enhance their skills of applying academic knowledge to solve real world problems.

Pre-requisite: None

GPAD3029 INDEPENDENT STUDIES ON POLITICAL SCIENCE AND PUBLIC ADMINISTRATION

In this course individual students and instructors will work together to select a specific topic for intensive study. This study will be arranged in the form of weekly thesis workshop. The instructor will train the participants advanced method of research, including thesis design, data processing and analysis and writing skills. The students will present their research findings, project composition and thesis contents (structure, argument and conclusion) in the class and engage fellow students for meaningful discussion.

Pre-requisite: None

GPAD3030 PUBLIC CHOICE

Essentially all public policies can be characterized as political equilibria among self-interested participants in political process. Public policies change when these equilibria change. Political and legal institutions affect those equilibria, because they create the rules of the political game. This course provides a survey of the public choice literature and explores the connections between political institutions, politics, and public policy. In particular, methodologies of neoclassical economic analysis as applied to political science will be explored. It is hoped that students will be able to use this toolkit.

Pre-requisite: None

GPAD3031 PUBLIC MANAGEMENT IN ASIAN STATES

This senior level course traces development in the field of public administration based on a comparative approach in studying administrative reforms in Asian societies, such as Singapore, Hong Kong, Macao and China (at least two of these states). It takes into account the paradigmatic shift in the discipline in view of the challenges posed by the 'new public management (NPM) paradigm' since the 1980s. In assessing public administration reform outcomes, this course encourages students to explore viable alternatives or approaches (e.g. neo-Weberian school, governance, participatory and networks) in tackling reform problems pertaining to the implementation of NPM in Asian states.

Pre-requisite: None

GPAD4000 CONSTITUTIONAL LAW

This is an introductory course to familiarize the students with the inception of constitutional movements and the specific goals of having a constitution on the one hand and constitutional

theories and practices on the other. The contents and classifications will be briefly surveyed. Of pivotal importance is the mechanisms of its working in a society; therefore, constitutional tribunals and its like, such as the ordinary reviewing courts, will be closely examined.

Pre-requisite: None

GPAD4001 RESEARCH PROJECT

Student is required to identify and conduct an individual research project under the supervision of a staff member. Topics are selected within the discipline of government and public administration.

Pre-requisite: None

GPAD4002 INTERNATIONAL SECURITY

This course examines the fundamental elements and factors underlying global and regional security. The course will analyze the historical evolution of international security since World War II, from the Cold War to the current conflicts. Contending theoretical arguments, such as Realism, Trans-nationalism and Constructivism, will be presented and critically examined. Students will be encouraged to study the competing strategies employed by different players and to predict the potential ramifications. It will also study the evolution of security study as a subfield of international relations with a focus on the emergence of non-traditional security issues and its increasing importance.

Pre-requisite: None

GPAD4003 GRADUATION PROJECT ON INTERNATIONAL RELATIONS

In this course, students are required to identify and conduct an individual research project on international relations independently under the supervision of the instructor. Topics are selected within the discipline of international relations broadly defined by students in consultation with the instructor. A substantive research paper with theoretical rigor and empirical richness is expected from students. The course also serves the function of assessment of overall knowledge, analytic skill, writing capability, and original thinking that students have acquired in the course of four-year study in the programme.

Pre-requisite: None

GPAD4004 ADMINISTRATIVE ACCOUNTABILITY AND ETHICS

This course examines the different types of accountability and issues regarding ethical management. Topics include social responsibility, social responsiveness, professional ethics, value-based management, different views of ethics, factoring affecting managerial ethics, managing ethical conflicts, administrative transparency, sustainable development, and the 'greening' of management.

Pre-requisite: None

GPAD4005 PROGRAMME EVALUATION AND PERFORMANCE ASSESSMENT

This course examines the process and issues regarding performance measurement at the organizational, programme, and individual levels. A number of approaches to performance measurement will be introduced. The process of goal setting, establishing achievable objectives, setting performance targets and indicators, data collection, setting regular reviews, and providing feedback is examined from the perspective of organizational learning in the context of public sector management.

Pre-requisite: None

GPAD4006 PUBLIC ADMINISTRATION: MACAO AND HONG KONG

This course examines the development of Hong Kong and Macao, their unification with China, and their current political problems. It focuses on the political and socio-economic changes during the period of transition. Topics such as the 'one country, two systems' model, Sino-British and Sino-Portuguese negotiations, the joint declarations, the basic laws, representative government, political institutions, political participation and socialization, process of democratization, civil liberties and the rule of law will be examined.

Pre-requisite: None

GPAD4007 PUBLIC ADMINISTRATION: CHINA

This course examines the public administrative institutions and processes in China. Topics include the reform of the cadre system and its relationship with other institutional changes, the anti-corruption policy, social welfare policy, budgeting, and the relationship between the central and local governments.

Pre-requisite: None

GPAD4008 SELECTED TOPICS IN PUBLIC ADMINISTRATION

This course is designed to be highly flexible to allow examination and discussion of issues in public administration that warrant attention. Discussion topics will be selected by the instructor with emphasis on current events.

Pre-requisite: None

GPAD4009 RESEARCH PROJECT ON PUBLIC ADMINISTRATION

This subject provides opportunity for students to do advanced research and to peruse academic scholarship in the field of public administration and management as well as to evolve as independent thinker. Different to the Research Project course, it allows students to explore their aptitude for research with theoretical concepts and individualized framework. Students are expected to address questions and issues for which no known or generally accepted answers exist. At the end, students have to present and defense their research findings in an examination committee.

Pre-requisite: None

GPAD4010 INTERNATIONAL PUBLIC POLICY

This course aims to help students better understand the various important international public policy issues facing the world today. As globalization deepens around the world, states are challenged by pressing issues such as poverty, climate change, transnational migration, HIV and AIDS, and civil wars. On the one hand, states authority is weakened as a result of increasingly powerful NGOs, global firms, and individuals. On the other hand, certain global issues such as climate change cannot be resolved without the coordination among states. Thus we will pay close attention to the ways states and the global civil society interacts. This course will discuss these issues in details, and explore possible solutions to some of the problems. Theoretical frameworks in international relations (realism, liberalism, and constructivism) will be employed to analyze the issues.

Pre-requisite: None

GPAD4011 INTERNATIONAL ENVIRONMENTAL AND ENERGY POLICY

This course examines the nature and emergence of international environmental problems, issue of energies and the response of the international community. Looking at a number of cases, including ozone depletion, desertification, bio-diversity, global warming, and competition for energy resources, the student will investigate international environmental and energy policies and the extent to which such policies and institutions provide effective governance, the extent to which international relations theory can explain such policies and also discuss the ethical dimensions of decision making.

Pre-requisite: None

GPAD4012 INTERNATIONAL HUMAN RIGHTS POLICY

In the era of rapid globalization, human rights and their protection have increasingly become subject of international policies of governmental as well non-governmental actors. And yet, in spite of growing international protection of human rights, there are still many unresolved questions regarding their scope and implementation. For example, what rights are to be recognized as universal human rights? And which institutions – international or domestic - are obliged or entitled to protect human rights of individuals and groups? These highly controversial questions will be examined in the context of current theories of human rights and of the role of international institutions such as the UN. The course explores the history of international recognition and protection of human rights and the major international declarations and covenants regarding

human rights (such as the UN and European covenants on human rights). The role of international organizations of states (the UN, African Union and the like) as well as non-governmental organizations such as Human Rights Watch and Amnesty International is to be discussed. The course also explores current developments in the theory and practice of international protection of human fight such as the R2P – Responsibility to Protect.

Pre-requisite: None

GPAD4013 EAST ASIAN INTERNATIONAL RELATIONS

Will China become a threat to international stability as its power continues to grow in the coming years? Will the twenty-first century be the century of the Asia-Pacific? Is the East Asian model of development sustainable? How does globalization affect security, political economy, human rights, and environment in East Asia? How should the international society deal with the North Korean nuclear crisis? This course aims to answer the above questions. We will start with a survey of major theories in international relations, including realism, liberalism, and constructivism. Our emphasis will be on the advantages and disadvantages of each theory in explaining major events in East Asia. We will pay special attention to East Asian histories, particularly since 1945. Topics to be addressed include: patterns of conflict and cooperation in East Asia, security arrangements, international political economy, globalization, human rights, and new security concerns. After completing this course, students should be able to apply international theories to analyze various political and economic issues concerning East Asia.

Pre-requisite: None

GPAD4014 RESEARCH PROJECT ON INTERNATIONAL RELATIONS

This subject provides opportunity for students to do advanced research and to peruse academic scholarship in the field of international relations as well as to evolve as independent thinker. Different to the Research Project course, it allows students to explore their aptitude for research with theoretical concepts and individualized framework. Students are expected to address questions and issues for which no known or generally accepted answers exist. At the end, students have to present and defense their research findings in an examination committee.

Pre-requisite: None

GPAD4015 SELECTED TOPICS IN INTERNATIONAL RELATIONS I

This course is designed to be highly flexible to allow examination and discussion of important issues in international relations that may not be covered by other courses in international relations. Discussion topics will be selected by the instructor with emphasis on current events. Students are encouraged to apply learned concepts, theories and analytic approaches to critically understand and explain international events and phenomena in the real world. This course also provides an opportunity for students to independently investigate and explore international issues that intellectually interest them.

Pre-requisite: None

GPAD4016 SELECTED TOPICS IN INTERNATIONAL RELATIONS II

This course is designed to be highly flexible to allow examination and discussion of important issues in international relations that may not be covered by other courses in international relations. Discussion topics will be selected by the instructor with emphasis on current events. Students are encouraged to apply learned concepts, theories and analytic approaches to critically understand and explain international events and phenomena in the real world. This course also provides an opportunity for students to independently investigate and explore international issues that intellectually interest them.

Pre-requisite: None

GPAD4017 SELECTED TOPICS IN INTERNATIONAL RELATIONS III

This course is designed to be highly flexible to allow examination and discussion of important issues in international relations that may not be covered by other courses in international relations. Discussion topics will be selected by the instructor with emphasis on current events. Students are encouraged to apply learned concepts, theories and analytic approaches to critically understand

and explain international events and phenomena in the real world. This course also provides an opportunity for students to independently investigate and explore international issues that intellectually interest them.

Pre-requisite: None

GPAD4018 SELECTED TOPICS IN INTERNATIONAL RELATIONS IV

This course is designed to be highly flexible to allow examination and discussion of important issues in international relations that may not be covered by other courses in international relations. Discussion topics will be selected by the instructor with emphasis on current events. Students are encouraged to apply learned concepts, theories and analytic approaches to critically understand and explain international events and phenomena in the real world. This course also provides an opportunity for students to independently investigate and explore international issues that intellectually interest them.

Pre-requisite: None

GPAD7100 PUBLIC ADMINISTRATION: THEORY AND PRACTICE

This is a postgraduate course in the theory and practice of public administration as a discipline. Although students taking this course should preferably have some background knowledge in a cognate discipline, this is, however, not a course in social administration, social work and welfare studies, sociology, communication, international trade, and economics. Students will acquire knowledge of major theoretical advances in the discipline and practical knowledge from empirical studies related to administrative reforms since the 18th century in developed countries. The course assesses student's ability to "marry" concepts and theories to the empirical studies in public administration.

Pre-requisite: None

GPAD7101 PUBLIC POLICY ANALYSIS

This course introduces the methods of public policy analysis by reviewing the main theoretical approaches in the field and examining key policy issues in Macao, Hong Kong and mainland China. The course has three main components: First, basic concepts in the analysis of the policymaking process and the political and institutional contexts of policy making. Second, the major theoretical approaches to the study of policy making, policy implementation and evaluation. Finally, several important policy issues in Macao, Hong Kong and mainland China will be illustrated as case studies.

Pre-requisite: None

GPAD7102 PUBLIC FINANCE

This course introduces the role of government in the economy, as well as, some theories of public administration and economics to explain the impacts of some selected policies on the economy. This course covers welfare economics, the relationship between government and the market, some key concepts in public finance (public goods, merit goods, externality, efficiency, and equity), besides, the background and impacts of selected public policies, like housing policy and social welfare policy.

Pre-requisite: None

GPAD7103 HUMAN RESOURCES MANAGEMENT

This is a postgraduate course in the theory and practice of personnel management in the public, non-profit and private sectors. This course covers workforce planning, position management, performance management, and some key concepts, including motivation, and health and safety. The students can apply and relate the concepts and theories of personnel management in modern government to empirical studies in the non-profit and private sectors as well, taking into account change and development in the environment.

Pre-requisite: None

GPAD7104 PUBLIC POLICY IN CHINA

This course focuses on the public policy-making system in mainland China and includes an

examination of policy making in specific sectors, such as industry, agriculture and the open-door policy.

Pre-requisite: None

GPAD7105 PUBLIC ADMINISTRATION IN CONTEMPORARY CHINA

This course examines the context of public administration in contemporary China: party and state institutions, central and local relations, the role of the state in the economy, and state and society relations.

Pre-requisite: None

GPAD7106 ORGANIZATIONAL BEHAVIOR

This course focuses on the nature, types and characteristics of organizations as well as the tools and skills used in management. Emphasis is placed on problem solving. Topics include organizational structure and design, control and distortions, bureaucratic corruption, administrative leadership, motivation and work behavior, decision-making and resource management.

Pre-requisite: None

GPAD7107 POLITICAL ECONOMY

This course surveys the objectives pursued by government in managing the economy, the means employed in pursuit of those objectives, and theories concerning economic behavior of governments.

Pre-requisite: None

GPAD7108 RESEARCH METHODS IN PUBLIC ADMINISTRATION

Social Science Research Methods examine the scientific methods applied to various public administration and social science research topics. As it is a master course, all students are assumed to have specific research experience or knowledge of research methods. Therefore, in this course, all students are introduced to various real projects, and the instructor explains the selected projects in detail..

Pre-requisite: None

GPAD7109 CONSTITUTIONAL LAW

This is an introductory course to familiarize the students with the inception of constitutional movements and the specific goals of having a constitution on the one hand and constitutional theories and practices on the other. The contents and classifications will be briefly surveyed. Of pivotal importance is the mechanisms of its working in a society; therefore, constitutional tribunals and its like, such as the ordinary reviewing courts, will be closely examined.

Pre-requisite: None

GPAD7110 ADMINISTRATIVE LAW

This is a survey course on the structure and operation of public administration and the body of norms that govern it (constitution and the laws) as well as those emanated therefrom (such as regulations, orders, and directions, etc.) It further examines the nature of administrative act and the principles of its legality and rationality. Finally, the remedies for administrative actions will be analyzed.

Pre-requisite: None

GPAD7111 DECISION MAKING: THEORY AND PRACTICE

As a foundational course in the MPA curriculum, this course will focus on theoretical and empirical analysis of decision making. The goals of the course are to introduce a variety of accepted theories in understanding decision making. The course seeks to help students familiarize themselves with decision making within organizations and collective choices with conflicting interests, as well as coordination and institutional solutions to problems related to collective choices. To help students think analytically about the ways decisions are made within organizations in the political, economic and security arena. The knowledge gained will be applied

to several real-life cases in American foreign and security policies. Comparison will be made between America and China.

Pre-requisite: None

GPAD7112 RESEARCH DESIGN

This course aims to improve students' ability to design feasible and theoretically sound research projects. The course will introduce a variety of research designs for social sciences, from the commonly used approaches, such as survey, focus group, and case study, to the multidisciplinary approach of operations research, such as game theory and simulation. Heavier emphasis will be placed on the commonly used approaches. This course emphasizes improving the ability to find good solutions to research design problems, rather than introducing different research methods. Students enrolling in this course are required to have taken at least an introductory research method course at either graduate or undergraduate level.

Pre-requisite: None

GPAD7198 PROJECT REPORT

The Project Report is an extended research essay to report findings of an individual research project. Students should undertake a systematic study into a topic in the scope of international relations, broadly defined. They should apply substantive knowledge and develop analytical skills, acquired from the Programme and beyond. They are required to define a central research question, design a proper analytical process, and develop a reasonable argument. The body of the report should be organized into sections in a logical way and follow the standard format and styles. It must be written in English or Chinese.

Pre-requisite: None

GPAD7300 PUBLIC ADMINISTRATION: THEORY AND PRACTICE

This course begins with a brief review of the development in public administration theories and provides a comprehensive coverage of relevant theories and concepts including: organizational management, personnel systems, public policy and finance, performance assessment, ethics, civil service reforms, and public sector development. The course examines the actual applications of the theories and concepts in Macao, Hong Kong and other governments and encourages students to analyze their effects and consequences. Emphasis will be placed on studying East Asia summits, international forums, and Asia-Europe meetings.

Pre-requisite: None

GPAD7301 PUBLIC POLICY ANALYSIS: THEORY AND PRACTICE

This course introduces the methods of public policy analysis by reviewing the main theoretical approaches in the field and examining key policy issues in Macao, Hong Kong and the mainland. The course has three main components: First, basic concepts in the analysis of the policy-making process and the political and institutional contexts of policy making; Second, the major theoretical approaches to the study of policy making, policy implementation and evaluation. Finally, important policy issues, such as public consultation, social justice and social harmony, in Macao, Hong Kong and the mainland will be illustrated as case studies.

Pre-requisite: None

GPAD7302 SEMINAR ON POLITICAL SCIENCE

This course provides an introduction to quantitative data analysis as practiced in political science. The goals are to equip students with the skills necessary to: 1) read, understand, and evaluate the academic literature in empirical political science, and 2) design and carry out studies that employ these techniques for testing substantive theories. Upon successful completion of the course, students should be able to critically evaluate quantitative analyses published in leading political science journals and conduct independent empirical research to answer their research question.

Pre-requisite: None

GPAD7303 SEMINAR ON INTERNATIONAL RELATIONS

This course examines theories and approaches in the study of international relations, such as realism and neo-realism, classical liberalism, transnationalism, constructivism, Marxism and neo-Marxist, etc. Detailed analysis of current and historical events will be presented to enhance students' understanding of relevant concepts. Students are required to present their own critical analysis of selected cases to demonstrate their understanding and ability.

Pre-requisite: None

GPAD7304 SEMINAR ON CONTEMPORARY POLITICAL THEORY

This course deals with different perspectives in contemporary political theory. Students will learn about the conceptual lexicons and analytical tools employed by different theoretical approaches. The course will explore the assumptions, methodologies, and biases deployed by various theoretical perspectives in understanding the same political phenomena.

Pre-requisite: None

GPAD7305 SEMINAR ON INTERNATIONAL POLITICAL ECONOMY

This course examines the political process of international economy, and the interaction between state and market, and power and wealth in international relations. Issues on trade, investment, development, globalization and regional integration will be examined in details. Different schools of thought and approaches will be explained. Regional cases, especially the implications of the rising China, will be examined. Students are required to present critical analysis to demonstrate their understanding and ability.

Pre-requisite: None

GPAD7306 INTERNATIONAL ORGANIZATIONS AND GLOBAL GOVERNANCE

The course examines the central issues of global governance today, in particular, with regards issues of international peace and security, global financial and trade regulations, protection of the environment, humanitarian and development assistance, and human rights protection. The role and impact of the major international organizations such as the United Nations, the European Union, etc. will be examined in this context. However, emphasis will also be placed on other international actors, including multi-national corporations, international non-governmental organizations as well as the state governments. The challenges and opportunities that face the international community in the continuing globalization of politics, economy, society, and culture will be addressed. As a major objective, key concepts and theories will be introduced as analytical tools, as well as introduction to essential research design in the field.

Pre-requisite: None

GPAD7307 INTERNATIONAL LAW

This course introduces students to public international law and the institutional regimes of global governance. We will examine the role of written rules and agreements (treaties) as well as customary practices that govern relations between states. The course begins with an exploration of the law and institutions related to international security, an area in which some of the oldest practices of international law have emerged. We will then discuss the effectiveness of international law in regulating international economic, human rights, and environmental issues.

Pre-requisite: None

GPAD7308 CONSTITUTIONAL LAW

This is an introductory course to familiarize the students with the inception of constitutional movements and the specific goals of having a constitution on the one hand and constitutional theories and practices on the other. The contents and classifications will be briefly surveyed. Of pivotal importance is the mechanisms of its working in a society; therefore, constitutional tribunals and its like, such as the ordinary reviewing courts, will be closely examined.

Pre-requisite: None

GPAD7309 ADMINISTRATIVE LAW

This is a survey course on the structure and operation of public administration and the body of

norms that govern it (constitution and the laws) as well as those emanated therefrom (such as regulations, orders, and directions, etc.). It further examines the nature of administrative act and the principles of its legality and rationality. Finally, the remedies for administrative actions will be analyzed.

Pre-requisite: None

GPAD7310 PUBLIC FINANCE: THEORY AND PRACTICE

This course examines theories of public finance from the perspectives of resources allocation, re-distribution of income and wealth, and economic stability and growth, with an emphasis on the impact of budget decisions on social justice and social harmony. Specific emphasis will be placed on the budgetary process, budget assessment, and budget reforms. This course will also examine the implications of monetary policy, such as interest rate, exchange rate and money supply, on public finance.

Pre-requisite: None

GPAD7311 COMPARATIVE HUMAN RESOURCES MANAGEMENT

This course examines the policies and practices of human resources management in the public sector. Emphasis will be placed on comparing the differences between the private and public sectors. Specific topics include staffing, training and development, performance management, and staff relations. The course also considers recent human resources management developments in the public sector in the rest of China and overseas.

Pre-requisite: None

GPAD7312 RESEARCH METHODS IN PUBLIC ADMINISTRATION

This course covers theories of research, the structure and process of scientific inquiry, modes of observation, research design, sampling methods, threats to validity and reliability, and data collection and analysis. Both quantitative and qualitative research methods will be covered in this course. In particular, methods for policy and programme evaluations will be examined in details with practical cases.

Pre-requisite: None

GPAD7313 SEMINARS ON CURRENT ISSUES

This course focuses on developing a more theory-informed understanding of current issues in international relations through a survey of major theories and approaches in international relations, such as realism and neo-realism, classical liberalism, liberalism, the English School, constructivism, critical theory, Marxism and neo-Marxist, poststructuralism, postcolonialism, feminism, relationalism and posthumanism. The strengths, weaknesses, and contemporary relevance of these theories as well as major theoretical debates will be examined to help students deepen their understanding of relevant concepts and their connections with the practices and challenges of world politics. Students are required to participate in the class discussion and write a research essay to present their own critical analysis of a chosen topic.

Pre-requisite: None

GPAD7314 SEMINARS ON SELECTED TOPICS OF INTERNATIONAL RELATIONS

The seminars aim at ensuring that students gain adequate knowledge of the recent developments in international relations theory, recent international policies, and new policy initiatives and programmes. For example, topics may include recent developments in one or several theoretical approaches to international relations (constructivism or neoliberalism). In addition, new international policies or initiatives of regional organizations or individual states may be examined, and their future development and impact discussed. Among possible topics are the EU initiatives in its relations with China, or Asia, or the new foreign policies of individual governments in the region (e.g. Australia).

Pre-requisite: None

GPAD7315 SEMINARS ON SELECTED TOPICS OF PUBLIC MANAGEMENT

The seminars aim at ensuring that students gain adequate knowledge of recent developments in

public management theory and practice. Emphasis will be placed on public decision making process, public consultation process and crisis management through the examination of case studies. Among the topics selected include new theoretical approaches to public management, and recent initiatives for civil service reform. In relation to the latter, special attention will be paid to the interest and prospective employment of our students. In consequence, recent innovations or reforms of public management in Macao, Hong Kong and the mainland will be discussed in some details.

Pre-requisite: None

GPAD7398 PROJECT REPORT

The Project Report is an extended research essay to report findings of an individual research project. Students should undertake a systematic study into a topic in the scope of international relations, broadly defined. They should apply substantive knowledge and develop analytical skills, acquired from the Programme and beyond. They are required to define a central research question, design a proper analytical process, and develop a reasonable argument. The body of the report should be organized into sections in a logical way and follow the standard format and styles. It must be written in English.

Pre-requisite: None

GPAD7504 RESEARCH METHODS

This course aims to introduce a variety of research methods to assist the students in designing feasible and theoretically sound research studies. The course consists of two parts: lecture and proposal presentation.

Pre-requisite: None

GPAD7505 ACADEMIC WRITING

This course, intensive in its nature, introduces students to the basics of academic writing. Aspects of focus include style, structure, grammar and punctuation. The course will also allow learners to explore issues regarding process of writing.

Pre-requisite: None

GPAD7510 GLOBALIZATION AND EU'S FOREIGN DIRECT INVESTMENT

It illustrates the growing importance of globalization and multinational enterprises in the world economy. The theories that explain the internationalization process of companies will be analyzed, as well as the evolving organizational structures according to the degree of multinationality of firms. The tendencies of multinational enterprises to enter into joint ventures and other collaborative agreements will also be studied. Special attention will be devoted to the outward direct investment of the EU.

Pre-requisite: None

GPAD7514 EU AND SUSTAINABLE DEVELOPMENT

The 'Lisbon Strategy' was the EU's response to globalization in the first decade of this century and it is succeeded by the 'Europe 2020' for the second decade. The course introduces the economic, social and environmental dimensions of this ten year plan and examines how this agenda addresses the structural problems and issues about the sustainable development of the EU.

Pre-requisite: None

GPAD7520 EU AND THE WORLD III: THE REST OF THE WORLD

It introduces the relations between EU and Africa and EU with the America. Europe has with Africa historical relations, from its colonial past. It is therefore a special relation with positive as well as negative outcomes. EU-African relations will be analyzed against the backdrop of recent developments of Africa in the international context, namely Africa-China relations and Europe reactions to the development of these relations. On the other hand EU has strong relations with some of the leading countries of South America, particularly those belonging to Mercosur. Region-to-region dialogue as well as bilateral relations will be analyzed. Lastly, the EU-US relations, is

the corner stone, the most important single element of EU's external dimension. All implications of those relations from the bilateral perspective as well as multilateral implications will be covered, as well as the implications of this Atlantic connection to overall EU relations with the world in the various dimensions of the CSFP as well as CESDP.

Pre-requisite: None

GPAD7521 PUBLIC POLICY AND POLITICS

This is an introductory course in the theory and practice of public policy wherein the problems, agendas and formulation of policy formation will be discussed. It also examines several theories of public policy including theories of policy adoption and policy implementation. The course will conclude with discussions on topics such as policy impact, evaluation and change in public policy making.

Pre-requisite: None

GPAD7522 GOVERNMENTS AND EU GOVERNANCE

This course discusses the institutional dimension of the EU as a multilevel civilian political entity, while addressing the socio-economic dimension of multilevel governance after the Lisbon Treaty. It also allows students to have understandings in the institutional framework of the EU external relations as well as the EU global governance and the concepts of multilateralism.

Pre-requisite: None

GPAD7523 SOCIAL POLICY AND EUROPEAN IDENTITY

The course approaches the welfare states and social model in the EU from the legislation phases with respect to the relevant economic policies under Europe's democratic background and also introduces the concepts about European Identity. There are needs for the reform in the social policies regarding its sustainability while the EU is facing globalization and other social and economic problems.

Pre-requisite: None

GPAD7524 HISTORY OF EUROPEAN INTEGRATION

This course introduces students to the process of the construction of the European Union since the end of the Second World War: it analyzes the essence of every stage in the integration processes; discusses the major driving forces and challenges in each stage, including socioeconomic, political, institutional and individual factors. In this course students should develop their abilities of theoretical and empirical analysis of processes and stages of the European integration. Through lectures and discussions, students should be able to distinguish between primary information and secondary one, to express one's own opinion clearly and support it with evidence and arguments. Students should also extend their knowledge by searching for relevant readings.

Pre-requisite: None

GPAD7525 SEMINAR ON SELECTED TOPICS ABOUT EUROPEAN POLITICS, GOVERNANCE, SOCIAL OR PUBLIC POLICIES

The integration process in Europe is an ever evolving and multi-dimensional one. This seminar provides flexibility for introducing the latest topics about EU's governance, politics social or public policies. The EU is facing several challenges and at times, conflicting socio-economic and political developments. Those issues need to be addressed with a complex conjunction of various policies from different angles that constitutes important features of the continuous process and progress of European integration.

Pre-requisite: None

GPAD7526 INTRODUCTION TO MACROECONOMICS

The course is composed of theoretical and factual contents. Its objective is to provide the students with the Microeconomic theories at intermediate level and it is combined with the historical background of the European Union, the rise of the integration and also a general picture about the European Union today. The core of the theoretical part falls onto the IS-LM as well as the AD-

AS model while the students should understand how the economic policies function.
Pre-requisite: None

GPAD7527 THEORY OF EUROPEAN INTEGRATION

It presents the different stages of integration (from the customs union, free trade area, common market... to the economic union), problems and benefits, policies and the movement for the completion of a single market, supported by empirical studies and theories from both the political and economic point of view upon the dimensions of widening and deepening.

Pre-requisite: None

GPAD7528 ECONOMIC POLICIES OF THE EU

This course explains the economic policies for the internal market, the financing and institutional set-up of the policies, Agricultural Policy, Cohesion Policy (Structural Funds), and the structural reforms along with the dynamic integration process in Europe.

Pre-requisite: None

GPAD7529 THE EUROPEAN MONETARY UNION IN THE WORLD CONTEXT

The course includes an introduction about the European monetary unification in an historical perspective, the costs and benefits of a monetary union, the governance and the strategy of the European Central Bank, with the analysis of the enlargement process of both the European Union and the Eurozone. It also discusses the global role of the euro and the development of the single European capital market.

Pre-requisite: None

GPAD7530 SEMINAR ON SELECTED TOPICS ABOUT EUROPEAN ECONOMY

The seminar serves as a platform for students to understand and discuss the up-to-date topics and trends of EU's economic growth and models of development. It is especially important to notice the EU experiences a series of economic challenges like the sovereign debt crisis, recession, Brexit ... etc. Reforms and new strategies at both the Union and national levels are necessary to ensure the solidarity of the integration process in Europe. Technological innovation, smart and inclusive cities, infrastructure development and structural investment, are just some of the major issues that will be featured in the course.

Pre-requisite: None

GPAD7531 EU LAW I: INSTITUTIONS AND TREATIES

The course explains the legal foundation of the European Communities/Union, which is based on the treaties signed by the member states, and it introduces the decision-making procedures, roles and competences of the institutions, and especially the Commission, Council, Parliament, Court of Justice ... etc. in the process of construction of the European single market.

Pre-requisite: None

GPAD7532 EU LAW II: FOUR FREEDOMS

The course's rationale is to further the students' understanding about the EU internal market and the rules governing it with the focus on the four freedoms and the principles regulating free movement within the EU. Its builds upon the foundation material in ECIEU taught earlier in the year and examines the substantive law of the ED. As such, the course provides combination of lectures on laws and rules regulating internal market followed by discussion. It also explains the free movement of goods, persons, services and capital and concludes with basic competition rules with reference to the case law.

Pre-requisite: None

GPAD7533 SEMINAR ON SELECTED TOPICS IN THE LEGAL & INSTITUTIONAL ASPECTS OF THE EU

The seminar leads the students into a discussion not just about the assessment and the reforms in the EU institutions after the 10 years of the post-Lisbon Treaty era but also the latest issues in the legal and institutional aspects as well as democracy and judicial matters at both the national

and Union levels.
Pre-requisite: None

GPAD7534 THEORY OF INTERNATIONAL RELATIONS

By an overview of IR theories, the course aims to enable students to grasp the main themes of the theories that have been most influential in explaining world politics and, to some extent, to apply them in analyzing the reality of world affairs. This course examines traditions of key theories and approaches in the study of international relations, including classical realism and neo-realism; classical liberalism and neo-liberalism; the concept of international society; social constructivism and its application in IR; the relations between states and markets in world affairs (international political economy); the study of managing external relations and activities of nation states (foreign policy analysis).

Pre-requisite: None

GPAD7535 EU AND THE WORLD I: THE NEIGHBOURHOOD

The course introduces how the new members in the east joined the European Union and the relation between the former Communist countries as well as those in the Mediterranean region. It also presents the discussions for further enlargement of the EU.

Pre-requisite: None

GPAD7536 EU AND THE WORLD II: EU-ASIA RELATIONS

This course aims to introduce the complexities of EU-Asia relations, both, at the inter-regional level and at the bilateral level. It will focus on matters that will encompass the following Asian sub-regions: East Asia, Central Asia and South-Asia. Within East Asia, special attention will be given to China-EU relations, both from the historical point of view as well as the most recent developments, including bilateral negotiations towards a new Partnership and Cooperation Agreement (PCA). EU-Japan and EU-ASEAN relations will be given some attention, as well. The ASEM process (Asia Europe Meeting) will be introduced as a case of summit diplomacy with all its merits and limitations. In regard to Central-Asia, a brief analysis of Central-Asia significance in the context of Asia-Europe relations and the overall economic and security concerns of EURASIA will be the focus of our attention. In the same token, EU-India relations will be briefly analyzed. Because the EU integration force is such an overall successful process, by bringing peace and development to the whole continent of Europe, it will attract other regions to also try the similar experiences. Regionalism in Asia is an on-going issues and it is worth comparing currents Asian trends with the case of the EU.

Pre-requisite: None

GPAD7537 SEMINAR ON SELECTED TOPICS ABOUT EU'S COMMON FOREIGN & SECURITY POLICIES

The seminar guides students into discussions after introducing the latest picture of the EU's latest development in its Common Foreign & Security Policies one decade after the establishment of the European External Action Service under the Lisbon Treaty and also its actions in response to the geopolitical challenges at the global level.

Pre-requisite: None

GPAD7598 PROJECT REPORT

The Project Report is an extended research paper/essay of either academic or policy nature to report findings of an individual research project, agreed with the supervisor and approved by the coordinator. Students are expected to undertake a systematic study into a topic or an issue, in the scope of European studies, broadly defined. They should apply substantive knowledge and develop analytical and presentation skills, acquired from the Programme and beyond into their individual research project. They are required to define a central research question, design a proper analytical process, and develop a reasonable argument.

Pre-requisite: None

GPAD8000 SELECTED TOPICS IN PUBLIC ADMINISTRATION

In this course, students will engage with high-level readings of primary sources for exploration of various topics related to the public administration. Exploration of topics is annually determined and involves issues not covered by the standard curriculum but of interest to faculty and students in a particular semester.

Pre-requisite: None

GPAD8099 DOCTORAL THESIS

Writing the doctoral thesis is the advanced stage of doctoral studies. The candidates should first select a topic in the field of public administration, with consultation of their supervisors. They should, based on extensive literature review, engage vigorously in construction for a suitable theoretical and analytical framework and then apply it to the analysis of empirical issues. The thesis needs to develop a cohesive structure, a sound research question, a central argument, and a rich set of data to support the comprehensive discussion. The writing style and standards must strictly follow the UM regulations.

Pre-requisite: None

GPAD8100 SELECTED TOPICS IN POLITICAL SCIENCE

This course will be designed according to students' specific areas of research interest. Students will be required to get familiar with and have an in-depth understanding of the existing literature and research achievements in the field. Students will then be asked to explore the feasibility to make new scholarly contribution in the field of their particular interest.

Pre-requisite: None

GPAD8199 DOCTORAL THESIS

Writing the doctoral thesis is the advanced stage of doctoral studies. The candidates should first select a topic in the field of political science, with consultation of their supervisors. They should, based on extensive literature review, engage vigorously in construction for a suitable theoretical and analytical framework and then apply it to the analysis of empirical issues. The thesis needs to develop a cohesive structure, a sound research question, a central argument, and a rich set of data to support the comprehensive discussion. The writing style and standards must strictly follow the UM regulations.

Pre-requisite: None

PSYC1000 GENERAL PSYCHOLOGY

This is a foundation course offering an introductory survey of the various areas of psychology from the perspective of psychology as the scientific study of behaviour. The course explores the major theories, methods, and research findings in such topics as personality, life-span development, social relations, as well as the biological bases of behaviour. The focus will be on relationship between research results and their applications to daily life.

Pre-requisite: None

PSYC1001 PSYCHOLOGY STATISTICS I

This course provides the fundamental skills and knowledge needed to understand and use statistical procedures in basic psychological research. Topics cover basic descriptive and inferential statistics, including measures of central tendency and variability, probability, sampling, the normal distribution, hypothesis testing and statistical power, t-tests for means, analysis of variance, correlation and simple linear regression. Activities will include the use of statistical software packages to explore data and conduct an analysis.

Pre-requisite: None

PSYC2000 DEVELOPMENTAL PSYCHOLOGY

In this course, students examine theories of human development across the life cycle of the individual from birth to death, in different domains including physical, cognitive, and social and personality. Research methods for studying developmental processes, as well as various issues related to the processes and challenges of developmental transitions in different life periods within

a local context are discussed.
Pre-requisite: GESB1010 / PSYC1000

PSYC2001 SENSATION AND PERCEPTION

In this course, students will study the sensory process in acquiring information and how the information is understood and interpreted in our brains resulting in various perceptual experiences. Various sensory systems will be introduced with a primary emphasis on the visual system.
Pre-requisite: None

PSYC2002 HUMAN LEARNING AND COGNITION

This course introduces the theoretical and empirical research of cognitive processes. The course covers the fundamental concepts and theories of thinking and levels of mental processes of how human mind works (and fails to work) such as how we perceive, attend, remember (or forget), think and reason.
Pre-requisite: None

PSYC2003 SOCIAL PSYCHOLOGY

This course examines how people think, feel, and behave when they are in the actual or imagined presence of others. The course covers classical and contemporary topics in social psychology, including perceptions of the self in relation to others, attitudes, social cognition, and the interpersonal dynamics of social behaviours, such as attraction, persuasion, and conformity. Instruction may also include the application of social principles and research to various settings.
Pre-requisite: None

PSYC2004 PERSONALITY PSYCHOLOGY

In this course, students encounter the major theories and theorists that historically shaped the psychological understanding of personality. The focus is on different questions, units of analysis, assumptions about causes of behaviour, and approaches to personality change proposed by theories of personality. Students engage in examining the underlying assumptions, conceptual issues, and motivation of human behaviour based on contemporary research regarding human nature and personality.
Pre-requisite: None

PSYC2005 PSYCHOLOGY STATISTICS II

This course covers advanced statistical methods and procedures commonly used in experimental and non-experimental research in psychology. Topics include multiple regression and, at more advanced levels, mediating effect, interaction effect, factor analysis, path analysis, structural equation modeling, and hierarchical linear modeling. This course focuses on the application of these and other analytical procedures especially in non-experimental research.
Pre-requisite: PSYC1001

PSYC2006 CLOSE RELATIONSHIPS

Close relationships are central to our lives; friends, parents, siblings, romantic partners, social networks, and acquaintances, have an enormous influence on our thoughts, feelings and behavior. The purpose of this course is to help students understand the processes that regulate human social relationships, through the lens of psychological method. It will include an overview of the social-psychological theories of relationships research and an exploration of the current literature. Specifically, this course will focus on topics such as: our need for relationships, interpersonal attraction, intimacy, love, attachment, communication, relationship maintenance, sexuality, relationship trajectories, relationship dissolution, jealousy, and extra-dyadic relationships.
Pre-requisite: None

PSYC3000 ABNORMAL PSYCHOLOGY

Abnormal Psychology introduces students to the scientific study of psychological disorders and dysfunctional behaviour. While the course surveys a broad selection of disorders, it focuses on the contributing factors, clinical presentation, and treatment implications of these selected

disorders. At the same time, students will explore how biological, psychological, social and multicultural dimensions interact to cause a particular disorder.

Pre-requisite: GESB1010 / PSYC1000

PSYC3001 CULTURAL PSYCHOLOGY

The course examines the relationship between individual psychological functioning and cultural contexts, both from a theoretical and practical/research point of view. The focus is on cross-cultural comparisons of behaviour, cognition, self, attribution, reasoning, decision making, communication, emotion, motivation, socialization, and more, with the aim of raising awareness and understanding of human commonality and diversity.

Pre-requisite: PSYC2003

PSYC3002 RESEARCH METHODS

This course presents the concepts of scientific inquiry and the methods used by psychologists to investigate human behavior and individual differences. It covers basic concepts and procedures across the research process, including reliability and validity, and instrument development and validation (measurement), experimental designs, sampling and surveys, as well as qualitative methods (research design), and the application of analytical tools in testing hypotheses and research questions (data analysis). This course focuses on the quantitative methodological approach. Students are expected to understand the process of quantitative research and be able to conduct their own studies using some of the necessary methods and approaches.

Pre-requisite: PSYC1001

PSYC3003 PSYCHOLOGY OF ADDICTION

The main objective of this course is to understand addictive behaviour and its paradoxes using fundamental psychological concepts and focusing on the psychological causes of excessive behavioural patterns such as drug dependence, gambling disorder, and Internet addiction. Addictive behaviours and behavioural change are examined from different perspectives such as personality, social, and cognitive psychology, as well as the growing body of knowledge in the field, including assessment, treatment, and prevention strategies.

Pre-requisites: GESB1010 / PSYC1000

PSYC3004 PHYSIOLOGICAL PSYCHOLOGY

This course focuses on introducing the fundamental principles of brain structures and their associated functions, and the physiological basis of behaviour. Topics include anatomy and physiology of the nervous system, genetic influences on behaviour, the physiological bases of emotional behaviour (e.g., anxiety & stress), and the study of psychological disorders (e.g., alcoholism, drug abuse, & depression).

Pre-requisite: None

PSYC3006 COGNITIVE NEUROSCIENCE

The course provides a basic understanding of brain structure and function, brain trauma and disease, and plasticity. The methodologies utilized to study brain-behaviour relationships are reviewed, and an appreciation of the role of clinical perspectives is provided.

Pre-requisite: GESB1010 / PSYC1000

PSYC3008 PSYCHOLOGY OF LEADERSHIP

This course examines how leadership is defined and how views of leadership have changed over time. Psychological contributions to understanding leadership form the main basis of the course, including topics such as the types of power, personal characteristics, interpersonal interactions, hierarchical relationships, and others. Readings and discussions address the question of how people become leaders, how environmental circumstances can encourage or inhibit potential leaders, and the various personal qualities needed to be a successful leader.

Pre-requisites: None

PSYC3009 CONSUMER PSYCHOLOGY

This course explores how consumer think, feel and act. We will focus on applying theories in social psychology, cognitive psychology and assessment in consumer decision making processes. Topics include attitude formation and change, consumer information processing, decision processes, assessment of cultural and individual differences etc.

Pre-requisite: GESB1010 / PSYC1000 / PSYC2003

PSYC3013 EVOLUTION, HUMAN NATURE AND BEHAVIOUR

Whereas it is well accepted in biology that human bodies are products of natural selection, it is still controversial in the mainstream social sciences to link human behaviours to evolution. This course takes an evolutionary approach to explore the ultimate question of why, but not just how, human beings behave in the ways in which they do. Broadly covered by evolutionary cognitive, social, and developmental psychology, the topics include how the human mind works and why it works in these ways, how and why human beings negotiate social contracts with conspecies, and how and why related individuals love and hate in resolving family conflict of interest. In addition to the coverage of evolutionary psychological concepts, theoretical perspectives, and empirical findings, this course also introduces natural selection, sexual selection, kin selection, reciprocal altruism, life history, and other theoretical foundations of evolution and their applications to the study of human behaviours.

Pre-requisite: None

PSYC3014 HEALTH AND BEHAVIOUR

This course studies how psychology improves our understanding of health and illness. We will particularly discuss the biopsychosocial model of health and illness, which highlights the interplay among psychosocial factors, physiological processes, and behavioral pattern involved in health and illness. We will examine the contribution of this biopsychosocial model to the understanding of: a) health promotion and illness prevention, b) responses to an illness and its recovery, and c) coping with chronic diseases. In each domain, we will discuss the basic concepts, explanatory theories, research methods, and interventions developed or adopted by health psychologists. Application of the knowledge to improving individual or public health in the local context is emphasized.

Pre-requisite: None

PSYC3016 PSYCHOLOGY OF LEARNING AND MOTIVATION

This course offers an overview of different theories and empirical research on learning and motivation from diverse perspective and approaches (behaviorist, biological, evolutionary, cognitive, cross-cultural, etc.). Current research of learning and motivation, and their applications in applied settings will also be discussed (e.g, achievement motivation in educational settings).

Pre-requisite: None

PSYC3017 SELECTED TOPICS I

Intensive focus concerning a selected topic of contemporary interest in psychology forms the basis for this course. The course can also include extensive fieldwork experience and may require additional hours of practical work at a selected site in the local community. Topics change with the interests and speciality of the faculty and the content varies from semester to semester. The instructor will select a topic or area of interest for discussion based on current developments in psychology and her or his expertise.

Pre-requisite: GESB1010 / PSYC1000

PSYC3018 SELECTED TOPICS II

Intensive focus is given to a selected topic of contemporary interest in psychology. The course can also include extensive fieldwork experience and may require additional hours of practical work at a selected site in the local community. Topics change with the interests and speciality of the faculty and the content varies from semester to semester. The instructor will select a topic or area of interest for discussion based on current developments in psychology and her or his expertise.

Pre-requisite: GESB1010 / PSYC1000

PSYC3020 COGNITIVE DEVELOPMENT

In this course, emphasis will be on the research findings from the study of cognitive development, particularly the development of thinking in the first decade of life. We will examine children's understanding of the physical world, psychological kinds, biological entities, number, objects, and space. Topics to be explored include theories in cognitive development, neural development, language development, conceptual development, social cognition, and academic achievements in reading and mathematics.

Pre-requisite: GESB1010 / PSYC1000

PSYC3021 EXPERIMENTAL PSYCHOLOGY

Experimentation is one of the major methods in psychology (it is a way of gathering new knowledge). This course introduces the essential features of this method, with reference to general concepts related to scientific knowledge, psychological research questions, and statistical analysis/inference. These general concepts will be illustrated with the help of examples from six different topics of research: These include the experimental studies of (1) goals (2) honesty/dishonesty, (3) rule-following and rule-violation (4) sense of control (5) free choice and forced choice, and (6) daydreaming. We will discuss instances in which the experimental method is a good choice and instances where it might not be appropriate.

Pre-requisite: GESB1010 / PSYC1000

PSYC3022 PSYCHOLOGY OF TESTING

This course is a survey of psychological testing through an overview of measurement principles, the psychological assessment process, test construction and development, reliability and validity, and the use of test results in individual psychological evaluation. Examples relevant to clinical psychology (e.g., personality, mental disorders) and school psychology (e.g., ability, aptitude, learning, etc.) are given.

Pre-requisite: PSYC1000 and PSYC1001 / GESB1010

PSYC4000 GRADUATION PROJECT

Students will gain practical experience in applying psychological knowledge and research skills learnt. Emphasis will be put on enhancing skills in conducting literature review and designing research studies. "Students are expected to participate in a group research project, which can be an empirical study, a systematic review, or other kind of research projects.

Pre-requisite: PSYC3002

PSYC4001 RESEARCH PROJECT I

This course allows promising students carrying out an independent psychological research under the supervision of a psychology faculty member. It engages the student in practical experience conducting psychological research from the proposal to writing up the thesis. With the support of the thesis mentor, a student may start working on an honors thesis in year 3.

Pre-requisites: PSYC3002

PSYC4002 RESEARCH PROJECT II

A continuation of Research Project I

Pre-requisite: PSYC4001

PSYC4003 FIELD EXPERIENCE I

This course includes supervised field work/internship experiences in different work settings or counseling settings pertinent to formal academic training in applied psychology or counselling psychology. Students' performance in the Field Experience will be evaluated by the individual supervising faculty member and students' immediate supervisor in the work settings. In addition to learning how to apply psychological concepts with clinical populations, the field experience course provides students the opportunity to conduct supervised applied field research, to apply their analytic skills toward investigating ways to evaluate community health programmes and gather data to improve local services.

Pre-requisite: None

PSYC4004 FIELD EXPERIENCE II

This course includes supervised field work/internship experiences in different work settings or counseling settings pertinent to formal academic training in applied psychology or counselling psychology. Students' performance in the Field Experience will be evaluated by the individual supervising faculty member and students' immediate supervisor in the work settings. In addition to learning how to apply psychological concepts with clinical populations, the field experience course provides students the opportunity to conduct supervised applied field research, to apply their analytic skills toward investigating ways to evaluate community health programmes and gather data to improve local services.

Pre-requisite: None

PSYC4005 CLINICAL PSYCHOLOGY

This course introduces students to the specialization of clinical and counselling psychology. It covers the basic theoretical assumptions when understanding and treating pathological behaviours; spectrum of subfields and their prospects; and paradigms and implications in clinical and counselling psychology as a profession.

Pre-requisites: GESB1010 / PSYC1000

PSYC4006 ORGANIZATIONAL PSYCHOLOGY

This course examines human behavior in organizations based on classical organizational theory and contemporary empirical research at the micro (individual, interpersonal, and group) and macro (organizational/environmental) levels. Theoretical bases include the principles of scientific management, the human relations movement, and organizations as systems. Empirical and applied foci will be on traditional organizational psychology topics, such as motivation, groups as teams, leadership, decision-making, and organizational socialization, as well as organizational analysis and change.

Pre-requisites: None

PSYC4007 GLOBAL MENTAL HEALTH

Global mental health is an emerging transdisciplinary scientific field. It utilizes approaches from multiple fields including psychology, anthropology, sociology, medicine, public health and epidemiology. Students in this course will explore 1) public health and global health approaches to the treatment and prevention of ill mental health, substance abuse and neurological disorders, 2) the role of culture in mental illness and its definitions, 3) epidemiological approaches to study and measure the prevalence and incidence of mental health globally, 4) public policy implications for ill mental health, and 5) mental health systems. Readings in the course will focus on peer-reviewed research literature. A particular emphasis will be placed on research and case examples from Asian country contexts (e.g., East and South East Asia), including Macao and Mainland China, so the course will have particular local and regional relevance to students.

Pre-requisite: None

PSYC4008 INTELLIGENCE AND CREATIVITY

This course provides an overview of emerging concepts of intelligence, intelligence development and creativity from biological, cognitive and methodological approaches. Contemporary models of intelligences and creativity are introduced and compared. Practical implications of the theories and findings in applied settings such as education, workplace and interpersonal relationships are discussed.

Pre-requisite: None

PSYC4012 SOCIAL COGNITION

This course provides an introduction to research and theories in social cognition. The course will examine how people reason and make sense of the social world. Specifically, topics examined in the course include the dual processing model, social perception and impression formation, mental representation and memory, the self, attribution, heuristics, attitudes and persuasion, stereotyping, etc.

Pre-requisite: PSYC2003

PSYC4015 GREAT IDEAS IN PSYCHOLOGY

Psychology is a heterogeneous discipline with diverse historical roots. In this course, we will cover some of the major ideas, thinkers, movements in the discipline of Psychology with particular focus on ideas that have had a largescale impact on the discipline and society. The goal of this course is to enrich our perspective with regard to psychology's history, its current state and its possible futures. Course content is organized around 6 topics: How to think about psychological research methodology (how psychologists support their claims), what is behaviour, what is a person, what are goals, what are games, and what is meaning? In discussing these central topic, we will meet some of the greatest thinkers that have contributed to the discipline.

Pre-requisite: GESB1010 / PSYC1000

PSYC4017 ADVANCES IN PSYCHOLOGICAL SCIENCE

This is an advanced course devoted to current development and advancement of one or more than one area of psychology. The content coverage is expected to change from time to time and should not represent fixed textbook material but focus on the recent development in psychology at the time of offering. Attending to the feature of new and recent advancement in psychology, an offering of this course may focus on depth by going into details of a narrow topic area or may focus on breadth by covering many aspects and related issues forming a broader area of research.

Pre-requisite: GESB1010 / PSYC1000

PSYC4018 ISSUES IN APPLIED PSYCHOLOGY

This course provides an analysis of current or controversial cutting-edge topics in applied psychological science. Students will engage with readings from primary sources for exploration of various topics of relevance to local and global issues in applied psychology. The readings will vary from year to year depending on the expertise of specialist staff and the needs for advanced study of psychology.

Pre-requisite: GESB1010 / PSYC1000

PSYC7001 ETHNICAL ISSUES IN PSYCHOLOGY

The course focuses on issues related to professional development and ethical practice, particularly as they apply to the practice of clinical psychology. The professional development component underscores the importance of self-care and post-qualification learning throughout one's career to maintain competence. Ethical issues with regard to case reports, legal procedures, and mental health care in a gambling and addiction dominated society, etc. will be discussed in seminar format in order to develop candidates' ethical acculturation in the field of psychology.

Pre-requisite: None

PSYC7006 PSYCHOPHARMACOLOGY

General principles of psychopharmacology, an overview of neurochemistry and understanding of the use of psychoactive drugs are discussed. The focus is on the use of psychopharmacological agents in psychotherapy and their phenomenology.

Pre-requisite: None

PSYC7007 PSYCHOTHERAPY: HUMANISTIC THERAPY

In this course, the development, principles, conceptual models, applications and limitations of major humanistic counseling and therapy approaches are investigated for working with people in contexts of individual and group interventions. Current research and case conceptualization models from humanistic and person-centered therapy perspectives will be discussed. The lab segment of this course focuses on foundational principles, processes, and skills involved in working with clients from a humanistic, person-centered perspective. Candidates will participate in class format training that is skill-based, interactive and focused on experiential learning.

Pre-requisite: None

PSYC7008 PSYCHOTHERAPY: COGNITIVE-BEHAVIORAL THERAPY

In this course, the development, principles, conceptual models, applications and limitations of behavioral and cognitive behavior therapies are investigated for working with various age groups

and specialized clinical populations. Current research and related case conceptualization models will be discussed. The lab segment of this course focuses on an orientation to the principles, processes and practice of cognitive behavioral therapy psychological intervention as related to particular client groups such as children, adolescents, adults and those with particular disorders. Candidates will participate in class format training that is skill-based, interactive and focused on experiential learning.

Pre-requisite: None

PSYC7009 PSYCHOTHERAPY: FAMILY THERAPY

In this course, the development, principles, conceptual models, applications and limitations of major psychotherapy theories are investigated for working with families. Current research and related case conceptualization models will be discussed. The lab segment of this course focuses on an orientation to the principles, processes and practice of psychological intervention as related to working with families. Candidates will participate in class format training that is skill-based, interactive and focused on experiential learning.

Pre-requisite: None

PSYC7010 PSYCHOTHERAPY: PSYCHOANALYSIS THERAPY

In this course, the development, principles, conceptual models, applications and limitations of psychoanalysis and psychodynamic psychotherapy intervention will be covered in addition to their application in working with various client populations. Current research and related case conceptualization models will be discussed. The lab segment of this course focuses on an orientation to the principles, processes and practice of these treatments to varied groups. Candidates will participate in class format training that is skill-based, interactive and focused on experiential learning.

Pre-requisite: None

PSYC7701 PSYCHOLOGICAL ASSESSMENT: NEUROPSYCHOLOGY

This course introduces students at the master level to the principles and practice of psychological and neuropsychological assessment, covering childhood and adulthood. Current trends in the theoretical understanding of personality, psychopathology and cognitive ability will provide the conceptual basis assessment practice. The assessments will be understood through all aspects of the clinical encounter which lead to diagnostic case formulation. In particular, this course will address the application of techniques derived from psychological science to enhance correct classification of psychological conditions.

Pre-requisite: None

PSYC7702 PSYCHOLOGICAL ASSESSMENT: COGNITIVE ABILITIES

The course explores the theory and techniques of assessment for intervention purposes including the administration, scoring, and understanding of cognitive and intellectual psychological tests, interview-based assessments of mental status, and other achievement and special assessment tools. Research, ethics, and clinical implications of cognitive and achievement assessment will be covered, as well as writing appropriate reports. Practical experience administering instruments will be done under supervision.

Pre-requisite: None

PSYC7703 PSYCHOLOGICAL ASSESSMENT: PERSONALITY/EMOTION

The course examines theory and techniques of assessment for intervention purposes as well as the administration, scoring, and understanding of major personality instruments in clinical practice. Related interview-based assessments (e.g., intake, clinical history, diagnostic interviews) will also be considered. Research, ethics and clinical implications of assessing symptomatic behaviours, personality patterns and clinical issues will be presented including objective and projective techniques. The practice of evaluation strategies will be conducted under supervision. Candidates will be guided in the selection of instruments appropriate for personality/diagnostic assessment and report writing based on the integration of varied assessment data.

Pre-requisite: None

PSYC7704 RESEARCH METHODS IN PSYCHOLOGY

This course trains students to conduct and consume research in psychology. The training includes basic methodology and statistics involved in experimental and correlational research. Analysis of variance (ANOVA) as the analytical tool and experimental design as the methodological architecture for conducting experiment and quasi-experiment will be introduced. Correlation and regression will be introduced as the main analytical framework for non-experimental or correlational research together with discussions on methodological and research validity issues involved in correlational studies.

Pre-requisite: None

PSYC7705 PSYCHOPATHOLOGY

The course involves an investigation of dysfunctional behaviour in children and adults including a discussion of contexts. Candidates are trained towards an understanding of human actions that exceed the boundaries of culturally and socially accepted behaviour. Behaviours usually defined as normal/abnormal are critically discussed and studied from various paradigms, as well as the genetic and neurological processes will be examined. The focus of the course will be on the DSM and ICD.

Pre-requisite: None

PSYC7706 NEUROPSYCHOLOGY

This course aims to provide a general introduction to the theory and practice of clinical neuropsychology. The course focuses on neurological disorders (e.g., dementia, epilepsy, and traumatic brain injury), neuropsychological disorders (e.g., aphasia, amnesia), psychiatric disorders (e.g., depression) and behavioural syndromes (e.g., autism). The content will be taught through the following parts: (1) advanced issues in neuropsychological testing in professional settings; (2) principles of clinical interaction, including interviewing and history-taking; (3) diagnostic formulation; and (4) report writing.

Pre-requisite: None

PSYC7707 HEALTH PSYCHOLOGY

The course provides an overview of major content areas in health psychology including stress and coping, principles of positive psychology, health and wellness of the person in context, and psychological influences on chronic illnesses. Consideration of cross-cultural psychology and critical perspectives such as systems theory and issues related to minorities in the community are also considered. Candidates will learn to develop, implement, and evaluate individual, group and societal intervention programs (e.g., life skills programs), and program evaluation for primary preventive interventions within a variety of contexts.

Pre-requisite: None

PSYC7709 SELECTED TOPICS IN HUMAN DEVELOPMENT AND MENTAL HEALTH

This advanced course will provide in-depth coverage on a specialized content area related to clinical psychology and mental health. Students will gain knowledge about associated theory, research, current assessment and intervention approaches as well as information on relevance to practice within the context of Macao. Topics will vary depending on staff expertise and availability.

Pre-requisite: None

PSYC7710 ADVANCES AND TRENDS IN CLINICAL PSYCHOLOGY

The aim of this course is to inform students of the state of the art of a particular area of psychological knowledge, research, and development that is related to the clinical and counseling profession. Some of the areas include neuro-cognitive approach and techniques (e.g., brain imaging and neuro network analysis) of mental health and treatment, evolutionary psychology and psychopathology and adaptation and fitness views about human health and development, cultural and cross-cultural perspectives on the theories and practice related to the counseling and clinical profession, and other areas of scientific development in psychology. The course will focus on in-depth analysis and evaluation of the issues, advances, and trends of the development at

the time of an area of psychology.

Pre-requisite: None

PSYC7711 CLINICAL PRACTICUM & SUPERVISION I

Clinical Practicum I is a supervised field placement in an approved training site for clinical practice and learning. Performances and professional development will be monitored and evaluated. The minimum number of hours to document for this field placement is 334 hours. Candidates will participate in weekly individual and group supervision as scheduled for case consultation and professional development.

Pre-requisite: None

PSYC7712 CLINICAL PRACTICUM & SUPERVISION II

Clinical Practicum II is a supervised field placement in an approved training site for clinical practice and learning. Performances and professional development will be monitored and evaluated. The minimum number of hours to document for this field placement is 334 hours. Candidates will participate in weekly individual and group supervision as scheduled for case consultation and professional development.

Pre-requisite: None

PSYC7713 CLINICAL PRACTICUM & SUPERVISION III

Clinical Practicum III is a supervised field placement in an approved training site for clinical practice and learning. Performances and professional development will be monitored and evaluated. The minimum number of hours to document for this field placement is 334 hours. Candidates will participate in weekly individual and group supervision as scheduled for case consultation and professional development.

Pre-requisite: None

PSYC8805 ADVANCED TOPICS IN PSYCHOLOGICAL RESEARCH METHODS

In this course, students will engage in the nature of inquiry in psychological sciences and explore different epistemological perspectives and related methodological issues in psychology research. The course covers various advanced topics related to psychological science and research in applied contexts (e.g., business/industry, education, community, policy, health, national development, etc.), professional practice (e.g., clinical, counselling, school, etc.), and cultural settings.

Pre-requisite: None

PSYC8810 SEMINAR IN PSYCHOLOGICAL SCIENCES

In this seminar-based course, students will engage with high-level readings of primary sources for exploration of various topics related to the psychological sciences. The readings will vary from year to year depending on the expertise of specialist staff and the needs for advanced study of psychology.

Pre-requisite: None

PSYC8811 SEMINAR IN PERSONALITY AND SOCIAL PSYCHOLOGY

In this seminar-based course, students will engage with high-level readings from primary sources for exploration of various topics related to personality and social psychology, with an emphasis on the cultural dimensions of personality and social psychological phenomena and research. The readings will vary from year to year depending on the expertise of specialist staff and the needs for advanced study in the area of personality and social psychology.

Pre-requisite: None

PSYC8812 SEMINAR IN APPLIED PSYCHOLOGY

In this seminar-based course, students will engage with high-level readings from primary sources for exploration of various topics of relevance to local and global issues in applied psychology. The readings will vary from year to year depending on the expertise of specialist staff and the needs for advanced study of psychology.

Pre-requisite: None

PSYC8813 SEMINAR IN SELECTED TOPICS IN PSYCHOLOGY

In this seminar-based course, students will engage with high-level readings from primary sources for exploration of selected topics related to psychology but not covered in other Seminar courses, such as topics on the latest trends in psychology, issues currently under debate, or new paradigms and approaches recently proposed.

Pre-requisite: None

SOCY1000 INTRODUCTION TO SOCIOLOGY

This course is designed to study how society works, (e.g. culture, groups and societies), why it works that way (e.g. socialization, social interaction, conflict theory, functionalism), in what way we are all affected (e.g. gender, race, class, deviance), and in what way we can change society (e.g. social movements). By the end of the course, students should understand society better and their relation to it more clearly.

Pre-requisite: None

SOCY1001 READING SOCIOLOGY

This course aims to inculcate students with the basic reading skills that are necessary for understanding sociological literature, and in this way to acquaint students with the distinctive approach of sociology as an academic discipline and a way of seeing. Foundational concepts such as culture and social interaction are introduced by way of intensively reading elementary and classic texts. By the time the students finish this course, they should be able to read and analyze sociological texts with a reasonable level of language proficiency and intellectual literacy.

Pre-requisite: Sociology majors only

SOCY1002 INTRODUCTION TO ANTHROPOLOGY

Anthropology is the study of the human species in all its aspects: biological, social and cultural; behavioral and psychological; spiritual and symbolic; historic, environmental and material. This course concentrates on the multiple dimensions of cultural anthropology, or what it means to be human, through an examination of different cultures, topics and case studies taken from around the world. Goals of the course include appreciation of the variety and range of human achievement, the understanding of change and progress, and the imagination of alternative possibilities for much of what we take for granted in everyday life.

Pre-requisite: None

SOCY1003 SOCIAL RESEARCH METHODS

This course introduces to students some of the basic concepts and practices of social research as adopted and codified by social sciences in general and sociology in particular. Comprehensive treatment of major research methods, including survey, in-depth interview, ethnography, and comparative-historical method, will be offered. The logic of social research will also be discussed, with the purpose of clarifying fundamental issues such as the nature of causality and correlation, the criterion and procedure of scientific falsification, etc. Methodological problems in the broad sense, such as the distinction among positivist, interpretive and critical approaches to social reality, will be covered as well.

Pre-requisite: Sociology majors only

SOCY2000 SOCIOLOGICAL THEORY

This course introduces and familiarizes sociology students with the major theoretical paradigms as they have emerged and evolved in the classical foundation and contemporary development of the discipline. Accordingly the course is intended to be at once analytical and historical, examining the shifting contexts within which various concepts and approaches have been formulated. We will focus on four sociological traditions, namely, rational choice, class analysis, institutional analysis, and symbolic interactionism. The course will also highlight the relevance and applicability of these perspectives to real social life.

Pre-requisite: None

SOCY2001 SOCIAL STATISTICS

The primary purpose of this course is to provide students with the basic skills and understanding to conduct data analysis in social research. It aims to equip students with the statistical techniques used most commonly by social scientists. In addition, students are also instructed on the relationship between social theory and empirical analysis. At the end of the course, students should be able to understand research reports in social science publications and in the mass media, and should also be able to evaluate the accuracy and adequacy of the conclusions reached.

Pre-requisite: SOCY1003 Social Research Methods

SOCY2002 POLITICAL SOCIOLOGY

This course examines major theoretical questions about power, politics, and the state from a sociological perspective. We will explore the dynamics of political institutions and processes, on the basis of which issues concerning state formation and nationalism, social movements, globalization, political culture and participation, and civil society etc. will be discussed.

Pre-requisite: None

SOCY2003 SOCIAL STRATIFICATION AND INEQUALITY

This course overviews the major sociological approaches to the study of social stratification and inequality. We begin with an examination of the concepts of social stratification and social inequality, with an emphasis on the major dimensions of stratification including caste, class, gender, and ethnicity. The consequences of stratification on life chances and life style and on social mobility will be explored. The empirical relevance of these issues to the changing stratification system of Macao will also be addressed.

Pre-requisite: None

SOCY2005 QUALITATIVE SOCIAL RESEARCH METHODS

This course is designed to introduce students to the principles and methods of qualitative research. It aims to guide students to appreciate the value of qualitative research as well as to get a practical grasp of a variety of qualitative research strategies and techniques. We will examine some of the main methods used by qualitative researchers in social sciences and in particular sociology such as participant observation, interviewing, documentary research, and content analysis etc. Our examination will consist of both readings and actual practice. The purpose is not only to understand the comparative strengths and weaknesses of each method but also to gain experience using them.

Pre-requisite: SOCY1003 Social Research Methods

SOCY2006 SOCIOLOGY OF DEVIANCE

We will study how and why certain behaviors are considered dangerous enough to deserve negative sanctions, how deviant careers are socially constructed, and how deviants and conventional society cope with each other. In addition to theories, we will study criminal behavior, drug use, heterosexual and homosexual deviance, physical deviance such as body piercing and tattooing, religious deviance, and mental disorders, etc.

Pre-requisite: None

SOCY2007 SOCIOLOGY OF GAMING

This course will cover topics related to gaming and society. We will examine briefly the history of the gaming industry in leading casino cities, and the social consequences generated by it. This course will focus on four tendencies in the development of the gaming industry: legalization, popularization, entertainment, and modernization. The development of Macao's casino industry and the challenges it faces will be emphasized.

Pre-requisite: None

SOCY2008 ENVIRONMENT AND SOCIETY

This course addresses the complex and often problematic relationships and connections between humans and natural and built environments by examining how cultures and societies construct

knowledge about nature and attribute value to it, how they use or abuse environments and resources, and how human activity, culture and social organization have always been deeply linked to the natural, material world. It also examines how factors such as gender, race, class, ethnicity, and cultural/historical experience influence the ways people perceive, understand, interact with, and are affected by the environments in which they live.

Pre-requisite: None

SOCY2009 THEORY IN ANTHROPOLOGY

This course examines why theory matters and how and why anthropological theories have influenced and been influenced by empirical studies of human communities and on-going debates about culture. We will discover why theory in anthropology has often been contentious, controversial, and marked by many productive disagreements and varieties of approach. The goals are to foster critical understanding of the aims and scope of any theory by examining, in historical context, the ideas of some of the discipline's most influential thinkers and evaluating their continued relevance to contemporary research.

Pre-requisite: None

SOCY2010 INTRODUCTION TO CRIMINOLOGY

The purpose of this course is to familiarize students with the major issues in the field of criminology, i.e., various approaches to criminology, concepts of crime and law, theories of crime causation, types of crime, and the criminal justice system. In other words, we are studying the what, why and how of crime and justice. The course is characterized by class discussions, presentations, mini-lectures, guest lectures, field trips, videos, and a major research project

Pre-requisite: None

SOCY2011 SOCIOLOGY OF ADDICTIVE BEHAVIOR

This course will focus on several major types of addictive behaviour, including substance abuse, gambling addiction, Internet addiction, and video addiction. In each of these domains, we will discuss (1) the nature and distribution of the addictive behaviours; (2) the causes of the behaviours; (3) the psychological and social consequences of the behaviours; (4) the prevention and treatment of the addictive behaviours. Special focuses will be given to drug abuse and treatment in the greater China region, especially Macao and mainland China.

Pre-requisite: None

SOCY2014 CHINESE SOCIETY

The course is structured not as an historical chronology but rather as a thematic discussion of some of the major issues in contemporary China. We will explore the basic institutional make-up of Chinese society, the structural changes brought forth in the reform era, and the impacts on the daily existence of the people therein. It is expected that after taking the course, students would not just know, but could also make sense of, what is going on in Chinese society today.

Pre-requisite: None

SOCY2015 POLICING

This course aims to provide students with a criminological understanding of police and policing in a historical and comparative perspective. Up completion of the course, students will be able to master key concepts and theories of policing; critically analyze various issues and controversies on contemporary policing; understand social structural factors in shaping police practice in a given country; locate a local police issue in a historical and global context; and understand future development of policing.

Pre-requisite: None

SOCY2016 CULTURAL SOCIOLOGY

Culture is one of the most complicated terms in the human vocabulary. It refers to particular cultural products and formats, such as arts, music, and literature, as well as the meanings, symbols, ideas, and habits that make us who we are. To familiarize students with the field, this course will explore major sociological approaches to culture (sociology of culture vs. cultural

sociology) and introduce representative themes, theories, and methodological debates regarding culture. Students will also have opportunities to connect the cultural theories to their own life experiences, studying the significance of culture in political, economic, and social settings more generally.

Pre-requisite: None

SOCY3000 GENDER AND SOCIETY

This course studies how pervasive gender is in organizing our social life. We shall examine how gender organizes everything from our sense of personal identity to our daily face-to-face interactions, and how gender is embedded in institutions such as the family, labor market, religious institutions, and the state. The aim is to provide students with sociological ways of thinking about gender.

Pre-requisite: None

SOCY3001 SURVEY METHODS AND SAMPLING

This course aims to teach students how to design a questionnaire and implement surveys using simple random, systematic, stratified, clustered or multistage sampling designs. Students are also expected to learn how to estimate sample size, test hypothesis and adjust for non-response upon successfully completing this course.

Pre-requisite: SOCY1003 Social Research Methods

SOCY3002 INTERNSHIP

This course is designed as a field practice course. Students will learn how to apply what they have learnt in class to a practical situation. They are expected to write reports and meet with the instructor regularly, in groups and/or in person, to share their experiences and discuss what they have learnt.

Pre-requisite: With instructor's approval

SOCY3004 RELIGION AND SOCIETY

This course examines the various approaches and studies pertaining to the complex interrelationships between religion and society. Some of the major themes it covers include: the classic secularization debate, sect and cult as the agents of religious and social change, the social and symbolic functions of ritual, the ambiguous power relationship between church and the state, the role of different religions in the making of modern civil society, as well as the resurgence of religions in the age of globalization. Examples from religions in Macao and other societies will be used in the illustration and discussion of relevant concepts and theories.

Pre-requisite: None

SOCY3005 SOCIOLOGY OF EDUCATION

This course examines the articulation of education with the broader social system. The various issues of educational attainment, ideologies and hidden curriculums, classroom as an interaction system between teachers and students, and the role of social, symbolic and cultural capitals in the determination of educational success and the reproduction of society, will be discussed.

Pre-requisite: None

SOCY3006 SOCIAL MOVEMENTS AND COLLECTIVE BEHAVIOUR

This course focuses on theories of social movements and collective behaviour through an examination of contemporary movements. The goal is for students to learn the analytic tools necessary to examine and critically assess the role of social movements in our society. Students will learn the theoretical frameworks and perspectives to understand social movements and collective actions. The selected texts include articles from academic journals and case studies of movements which will further our theoretical and conceptual understanding of social movements.

Pre-requisite: None

SOCY3007 FUNDAMENTALS OF URBAN STUDIES

More and more people in today's world live in cities. This course examines the special and often

unique problems and challenges of both urban living and doing anthropological research on distinctly urban cultures, lifestyles and communities. Topics include the material and symbolic implications of increased urbanization worldwide; continuity and change in urban cultures; new opportunities, values and ways of life made possible in cities; concepts of space and place; and the conflicts and problems generated by recent trends in urban policy, planning, community development, and environmental impacts.

Pre-requisite: None

SOCY3012 HEALTH AND SOCIETY

The purpose of this course is to introduce students to the major social variables—social class, race, gender, poverty, income distribution, social networks/support, community cohesion, the work and neighborhood environment—that affect population health. The course covers the theoretical underpinnings of each construct, and surveys the empirical research linking each to population health status. Methods are introduced to operationalize each construct for the purposes of empirical application in epidemiologic research.

Pre-requisite: None

SOCY3013 WHITE-COLLAR CRIME

This course provides an examination of theory and research in the field of white-collar crime. Classic theoretical works will be considered as well as contemporary writings. The course will begin with an introduction to the field, including definitional and theoretical issues regarding the areas of white-collar, occupational, organizational, and corporate crime. Following this, we will examine various forms of white-collar crime including: consumer crime, corporate crime, computer crime, and financial fraud. Finally, we will review salient issues regarding the causes, prevention, enforcement, and sanctioning of white-collar crime.

Pre-requisite: None

SOCY3015 CRIME AND CRIMINAL JUSTICE IN CHINA

The landscape of crime and criminal justice system in China has under dramatic changes in the past six decades. While pre-reform China has been regarded as a “crime-free” society, the crime rate has soared in the recent three decades due to rapid industrialization, urbanization and modernization. China’s incarceration rate is around the world average, but its wide use of death penalty makes it one of the most punitive countries in the world. How to understand the unprecedented change of crime and Chinese government’s effort in controlling crime? What are similarities and differences of Chinese experience of crime and its control in a global perspective? This course will provide a criminological analysis on various issues on crime, policing and punishment in China.

Pre-requisite: None

SOCY4000 RESEARCH PROJECT

This course aims to help final-year students to consolidate and deepen their understanding of sociological perspectives by applying them to the analysis of social phenomena and specific issues. Students are responsible for defining a research topic, articulating a research problem, and designing a feasible research project. Emphasis will be put on training the competence of the students to position their research projects in the broader relevant fields of the discipline, and to conduct constructive dialogues with the existing literature.

Pre-requisite: Sociology majors only

SOCY4001 INDEPENDENT STUDY IN SOCIOLOGY

This course is designed to provide the student with an opportunity to gain or enhance sociological knowledge and to explore an area of interest related to sociology or criminology research under the supervision of a professor.

Pre-requisite: None

SOCY4002 SELECTED TOPICS IN SOCIOLOGY

This course is designed to be highly flexible to allow examination and discussion of specific issues

in sociology not included in the regular degree curriculum. Discussion topics will be selected by the instructor and may vary from year to year.

Pre-requisite: None

SOCY4003 SELECTED TOPICS IN ANTHROPOLOGY

This course is designed to be highly flexible to allow examination and discussion of specific issues in anthropology not included in the regular degree curriculum. Discussion topics will be selected by the instructor and may vary from year to year.

Pre-requisite: None

SOCY4004 SOCIOLOGY OF CONSUMPTION AND LEISURE

Consumption and leisure is an intrinsic part of modern life and the dominant economy in Macao. But what is a "consumer society"? What is the essence of economic and social relationship in consumer society and how is it different from other ways of structuring society? What is "consumerist culture" that is blamed for causing family disintegration and social alienation? This course will take students through the key readings and theories on consumption and leisure and on modernity and globalization at large, which are built upon classical sociological theories. The theories will be combined with topical discussion and case studies.

Pre-requisite: Students are required to take and pass SOCY1000, SOCY1001 and SOCY2000 prior to this course

SOCY7700 CRIMINOLOGY AND CRIMINAL JUSTICE

This course provides an overview of the nature and extent of crime, the causes of criminal behavior, crime typologies and measurements, and the criminal justice system. The course takes an international approach, reviewing knowledge and theories about crime and assessing the effectiveness of crime prevention and offender treatment programmes in major social and cultural contexts.

Pre-requisite: None

SOCY7701 CRIMINOLOGICAL THEORIES

This course will consider historical and contemporary explanations of crime and criminal behavior. Theories covered include strain, control, cultural, labeling, conflict, as well as more recent attempts at theoretical integration and multidisciplinary integration.

Pre-requisite: None

SOCY7703 APPLIED STATISTICS

This course represents an introduction to statistical methods for analysing empirical data. Students will learn basic and advanced methods for quantitative and qualitative data analyses, gain experience in using statistical software, and apply their statistical knowledge and technical skills to real datasets in criminology and criminal justice.

Pre-requisite: None

SOCY7704 POLICING

The course is an introduction to the study of modern policing from its 19th century origins to current controversies about community relations, public order, miscarriages of justice and the possible futures of police-work. It provides historical, social and political analysis of the roles and functions of policing. And it engages some current controversies about community policing, accountability, public order, private security and the future of police work.

Pre-requisite: None

SOCY7705 CORRECTIONS

The course examines the prison and issues of corrections in terms of historical development and current applications. It examines various perspectives and definitions of social control; philosophical underpinnings of the system; and prisoner and societal implications of social control. We deal with the history, forms, and functions of correctional philosophies, institutions, programmes, and policies. Topics include the structure and functions of prisons and jails,

community corrections, intermediate sanctions, and the growth of correctional control in modern society.

Pre-requisite: None

SOCY7710 RESEARCH METHODS

This course is a postgraduate level seminar designed to increase knowledge of research methods commonly used in social science research. Through lecture, discussion and class activities, this course will introduce different methods of conducting research. The seminar will focus on issues related to theory development, hypothesis formation, variable construction, research design, sampling methodology and the techniques and methods of data collection. Students will write a research proposal that details a research question and the research design appropriate for addressing that question.

Pre-requisite: None

SOCY7711 COMPARATIVE CRIMINOLOGY

We study selected criminal justice systems in other jurisdictions, including the organization, administration and operation of criminal justice agencies in the United States, Europe, the United Kingdom, and Asia.

Pre-requisite: None

SOCY7712 SUBSTANCE ABUSE AND ADDICTION

This course provides students with a survey of the historical context of the legislative initiatives that have been attempted to combat the use of drugs, the relationship between drug use/abuse and crime, and the public policy problems surrounding the control of drugs. We describe major drugs, what effects they have, their methods of use, their prevalence, production and marketing and common street names. The course analyzes the composition, manufacture, use, and misuse of drugs (including alcohol); their relationship to criminality, and current responses by governmental and private organizations. Exposure to treatment programmes may be required.

Pre-requisite: None

SOCY7713 ADVANCED STATISTICS

The course is designed to help students to master advanced quantitative methods used in the social sciences, and to facilitate them learning more advanced methods. The main topics that will be covered in depth during this semester include ANOVA, simple and multiple regression, logistic regression, and Poisson regression.

Pre-requisite: None

SOCY7715 CRIMINAL PSYCHOLOGY

This course focuses on biological, environmental, cognitive, and personality factors that influence delinquency and crime. Major topics of discussion will include psychopathology, maladjustment patterns, psychoses, personality disorders, cognitive development, and alcohol and drug dependency, and the relationships between these factors and criminal behavior. The course will also cover offender profiling, sexual violence, and psychological treatment of delinquents and criminal offenders.

Pre-requisite: None

SOCY7720 SPECIAL TOPICS IN CRIMINOLOGY AND CRIMINAL JUSTICE I

This course is designed to provide up to date development in research and practice on certain topics in criminology and criminal justice field.

Pre-requisite: None

SOCY7721 SPECIAL TOPICS IN CRIMINOLOGY AND CRIMINAL JUSTICE II

This course examines selected topics and recent developments in research, policy, and practices in the areas of criminology and criminal justice.

Pre-requisite: None

SOCY7722 JUVENILE DELINQUENCY

This graduate level course aims to provide the groundwork for the study of juvenile delinquency and juvenile justice. It provides students with knowledge regarding the following: juvenile delinquency and its causes and correlates, strategies and policies being used to control delinquency, a broad picture about the juvenile justice system using the American model as an example. Cross-cultural comparisons will be made to further students' understanding of delinquent behavior and to examine the applicability of Western theories and policies in the Chinese context.

Pre-requisite: None

SOCY7723 QUALITATIVE RESEARCH METHODS IN CRIMINOLOGY AND CRIMINAL JUSTICE

This course will provide students an advanced training in qualitative research methods in criminology and criminal justice. It will cover different ways of thinking between qualitative and quantitative methods, how to integrate qualitative and quantitative methods in a research project, how to do ethnography, interview and qualitative data mining in social sciences, how to manage and analyze qualitative data, how to appreciate and write a qualitative research paper, and strategies in publication. The lecture will draw extensively from my over one decade firsthand research experience in applying various qualitative research methods. Students will be encouraged to practice classroom knowledge and "get your hands and pants dirty" (Robert Park) in real research.

Pre-requisite: None

SOCY7998 PROJECT REPORT

The Project Report should consist of an essay that may involve or combine a variety of forms and methods to address a topic that is of significance to the field of criminology or criminal justice. The project must be characterized by a comprehensive account of the topic and the issues being analysed and evaluated; and demonstrate a familiarity with and an ability to utilize different methodologies and scholarship.

Pre-requisite: None

SOCY8801 SELECTED TOPICS IN SPECIALIZED THEORIES

The objective of the course is to deepen students' understanding of theory by connecting larger paradigms of sociological theories to specific theories that analyze a specific field of study in sociology. Selected topics in this course may include theories focusing on specific issues in sociology such as gender and sexuality; marriage and family; adolescent development; globalization; political participation; deviance and crime; social movements; religion; race and ethnicity; nationalism and national identity, etc. The specialized theories covered depend on the needs of the students.

Pre-requisite: None

SOCY8802 SELECTED TOPICS IN ADVANCED RESEARCH METHODS

The objective of the course is to strengthen students' abilities in sociological research. This course teaches students advanced research methodologies as well as data management and analysis skills. These may include advanced statistical methods and recent developments in research design in the quantitative tradition, and/or qualitative approaches in the interpretive and critical traditions. The specific topics covered depend on the needs of the students.

Pre-requisite: None

SOCY8805 SELECTED TOPICS IN ADVANCED SOCIOLOGICAL RESEARCH

In this course, students will engage with classical and/or contemporary readings of primary sources for exploration of various topics related to sociology and sociological research. The readings will vary from year to year depending on the needs for advanced study of sociology.

Pre-requisite: None

SOCY8999 DOCTORAL THESIS

The PhD thesis is a highly original work. It requires both theoretical foundation and empirical evidence to apply, enrich or develop certain theories in sociology/criminology.

Pre-requisite: None

SSGC7001 RESEARCH SEMINARS ON MACAO STUDIES

This seminar course aims to provide an overview of the latest research outcomes about Macao to the students. Experts from the different areas of Macao studies will deliver lectures about their research and findings of particular research projects. Topics will cover history, culture, social institutions, political developments and other aspects of social sciences or issues in humanities and even natural science.

Pre-requisite: None

SSGC7002 MACAO HISTORY

This course traces the history of Macao. Emphasis will be on the relations between the Chinese, Portuguese, and other power in the early days of Portuguese settlement, the colonial history after the Opium Wars, and major historical events before and around the return of Macao sovereignty to China.

Pre-requisite: None

SSGC7003 CONTEMPORARY ISSUES OF MACAO

This course adopts a "problem-based" approach where students engage with contemporary issues about Macao from four major perspectives: Politics, Economy, Culture and Society. It will cover topics including: Basic Law and the Political system of Macao; Local Macao Politics and social organizations; Macao and the Greater China; Macao economics and Industry Policy; Macao population and social development; Macao's cultural heritage and its cultural development, Greater Bay Area and Macao; Belt and Road Initiative and Macao; Macao and the Portuguese speaking countries.

Pre-requisite: None

SSGC7004 RESEARCH METHODS

This course provides students with knowledge of major social sciences research methods that are relevant in Macao Studies. Quantitative and qualitative research methods are introduced. A focus will be given on conceptualization, research design and operationalization of quantitative and qualitative projects, providing a foundation for an academic exploration.

Pre-requisite: None

SSGC7005 CULTURE AND SOCIETY OF MACAO

This course will examine the various aspects of Macao culture, including the aspects of the Chinese, Portuguese, and other cultures and religions. In addition, the course will examine various social issues like gender, race, class, deviance and crime, urban housing, traffic and transportation, air pollution, etc. An emphasis is on social change, civil society formation and a Macao identity formation.

Pre-requisite: None

SSGC7007 LITERATURE AND THE ARTS IN MACAO

Macao has a rich history of literary tradition among the Chinese, Portuguese, Macanese, and English. Novels, short stories, poems, and other works of literature and the arts all vividly portray Macao's culture and society and define Macao's identity. This course will examine how different literary works portray Macao's socioeconomic life and help shape Macao's identity.

Pre-requisite: None

SSGC7010 URBAN GEOGRAPHY OF MACAO

This course covers the spatial aspects of Macao's rapid-pace development, including the built and natural environment over time as a result of human-land-maritime interactions and historical

harborworks and the maritime/fishing interface. It also deals with a range of current local and cross-border issues, including pollution, energy, water supply, public transport, housing, urban planning, recreation/nature zones, expanded land reclamation etc. An emphasis is on a historical-comparative understanding versus such other built environments-coastal cities as Singapore, Hong Kong, and Shanghai.

Pre-requisite: None

SSGC7011 HISTORICAL HERITAGE OF MACAO

This course folds into post-colonial studies and cultural studies understandings. We will emphasize memory and remembering as part of this reflective trope. We will study monuments, museums, churches, temples, colonial buildings, industrial buildings, and other representations like street names and compare with such regional "heritage" managed cities as Penang, Malacca, Hoi An (Vietnam), Goa, etc.

Pre-requisite: None

SSGC7012 AND SSGC7013 SELECTED TOPICS I AND II

Each of these is a course that provides students with knowledge and/or skills that is or are related to a specific issue in Macao studies. It will be taught by an instructor with the special knowledge and/or skills in that area of study.

Pre-requisite: None

SSGC7015 THE MACAO ECONOMY

This course will overview the historical development of the different industries in Macao and focus on Macao's economic growth in the 20th and 21st century. It will introduce basic political economy concepts like monopoly and provide an economic explanation of the current Macao economic status.

Pre-requisite: None

SSGC7016 POLITICS AND POLITICAL SYSTEM IN MACAO

This course explores politics between China and Portugal as well as among the world powers after the Portuguese settled in Macao. The course will especially examine and evaluate the contemporary political system under the "One Country, Two Systems" formula. How political factors interact with each other and influence the evolution of the political system throughout history will be the focus of the course.

Pre-requisite: None

SSGC7017 REGIONAL STUDIES

The course aims at providing students with an understanding of the critical concepts and issues related to regional studies. Through the regional studies approach. Students will learn about political, economic and cultural processes occurring at a sub- and supra-state level. It will introduce the main concepts concerning the modern State, the concepts of localism and regionalism. It will also analyse the political developments around the world through some regional case studies, and pay special attention to China's national, regional development policies like the Greater Bay Area and the Belt and Road Initiative.

Pre-requisite: None

SSGC7018 RESEARCH PRACTICE

This course integrates theoretical learning with practice in real research projects. It trains students towards acquiring competence in research endeavors including information search, literature reviews, methodological designs, data collection, data analysis, proposal and report writing, experimental/laboratory skills and so on.

Pre-requisite: None

SSGC7100 RESEARCH METHODS ON POLICE AFFAIR

This course systematically describes the science, scientific research, academic paper topic selection, scientific research methods and application, features, and science research papers

writing. The highlight of the course is the topic selection methods and skills of police science research with information technology.

Pre-requisites: None

SSGC7101 STUDIES OF CRIMINAL INVESTIGATION

This course mainly introduces the research status of theories and basic principles of criminal investigation, and discusses methods, strategies and patterns of investigation, etc. According to the current situation of crime and investigation, this course discusses the serialization, industrialization, networking of crimes and related investigation countermeasures.

Pre-requisite: None

SSGC7102 CRIMINOLOGICAL THEORY

This course will provide an overview of the most influential criminological theories. It focuses on major perspectives related to crime causation, including biological, psychological, sociological, and developmental theories of delinquency and crime. Another focus of the course is the application of these theories to predict and explain criminal activities mostly commonly observed in the contemporary societies of Macao and mainland China.

Pre-requisite: None

SSGC7103 POLICING TACTICS AND COMBAT

This course is derived from the guiding ideology of safe police law enforcement and aims to build a necessary bridge between basic theoretical study and police law enforcement practice. Under the premise of consolidating the basic theory, this course uses case teaching and adversarial training throughout the course to explore the concepts and essence of police tactics, and then cultivate tactical awareness and group training capabilities.

Pre-requisite: None

SSGC7104 STRATEGY AND PRACTICE OF CRIME PREVENTION AND CONTROL

This course will provide an overview of the current strategies and practices of crime prevention and control. Under the premise of explicating the basic ideas, basic theories, the subject and object, and operating mechanism of public security maintaining, this course teaches special topics (including public security order management, emergency management, public security maintaining in important infrastructure, key areas and cyberspace, and so on) combined with practical cases.

Pre-requisite: None

SSGC7105 THEORIES AND PRACTICE OF CRIMINAL LAW

The course is through face-to-face study in the professional fields of public security management, legal system, prevention and control practice and social security governance within the established learning period, after passing the results of each subject, the students write their graduation thesis based on theory and practical work experience.

Pre-requisite: None

SSGC7106 THEORIES AND PRACTICE OF COMMUNITY POLICING

This course draws on the theories and practices of public security, sociology, political science, management, and other disciplines, combines with the latest developments in social governance and community policing in the country, and aims to cultivate the comprehensive ability of master students of public security management to solve public security practical problems especially in community policing.

Pre-requisite: None

SSGC7107 MODERN POLICING TECHNOLOGY

This course mainly introduces common scientific and technological methods, principles and applications in modern police work, including biometric identification technology, video investigation technology, forged document inspection technology, voice inspection technology, spectral imaging technology, biological evidence technology, big data technology, digital forensics

technology, network attack and defense technology, etc.

Pre-requisite: None

SSGC7108 SOCIAL ISSUES AND GOVERNANCE

This subject provides students with a series of approaches to the study of social policy and governance in Macau or the Greater Bay Area. The subject bridges theories from sociology, political economy, and epidemiology to develop students' capacity to provide a holistic analysis of the policies surrounding social issues in the light of socio-economic changes. The subject will help students to understand and examine the potential contradictions that market failure and government failure have for specific socio-demographic groups.

Pre-requisite: None

SSGC7109 PUBLIC RELATIONS AND MEDIA COMMUNICATION SKILLS

The primary objective of this course is to train students on the theories/concepts/principles/practices of media relations from public relations perspectives. It helps students understand what media relations is all about, and how to communicate and manage the relationships with the media. Due emphasis is also placed on such technical aspects as planning, developing and executing the programs focusing on improving and enhancing the relationships with the media. Local and overseas cases are to be used to help students comprehend how to cope with and deal with the media in reality.

Pre-requisite: None

SSGC7197 INTERNSHIP AND REPORT

Students will place an internship at a public security department or a relevant unit for public order and security. The internship exercise aims at articulating and applying theories and knowledge discussed in the class at real workplace so as to enhance students' capacity in managing agency for public security. In addition, students will have to critically review and reflect internship experience, suggest policy/reform for public security issues and hence, contribute to the understanding in the field of public security and policing.

Pre-requisite: None

SSGC7990 THESIS

The thesis can be in either Macao history, politics, economics, sociology, education, law, or comparative literature of Macao. But it has to integrate the knowledge learned in the programme. It has to demonstrate that the student is well-prepared for PhD studies. And it can be in either Chinese or English, depending on the language used by the student and supervisor.

Pre-requisites: None

SSGC8000 GOVERNANCE: POLITICS, POLICIES AND NETWORKS

This course provides the candidates with an understanding of the key concept of governance in politics and public administration, and the candidates can know how to apply the concept to current issues. It introduces different approaches of public management and governance, both normative and empirical, besides, it focus on the relationship between governance and public administration reform in terms of new public management/ new public governance, in addition, the policy networks of governance, and the diversity of organisations involved in policy formulation and public service delivery.

Pre-requisite: None

SSGC8001 PUBLIC POLICY ANALYSIS

The course introduces candidates to the concepts of public policy analysis, like collective action, political efficacy and transparency, as well as, tools useful for evaluating policy impact and effectiveness. The candidates can understand the tradeoffs involved in the design of policies and institution, besides, the impacts of public administration reforms on efficiency, accountability and transparency.

Pre-requisite: None

SSGC8002 PUBLIC ADMINISTRATION THEORY AND PRACTICE

This course introduces to the candidates the evolution and the future direction of public administration theory and practice. In fact, the focus of public administration theory is shifting from mechanical efficiency of traditional public administration to social efficiency of New Public Management and, recently, to public values and public interests of New Public Governance or New Public Service. Interdisciplinary and integrative approach becomes more and more important to public administration and public policy research.

Pre-requisite: None

SSGC8003 PUBLIC ADMINISTRATION IN MACAO AND HONG KONG

The course provides the candidates with an overview of some major issues in public administration and public policy in Macao and Hong Kong. Topics may include the public administrative system of Macao and Hong Kong, political participation and socialization, the sustainability of social welfare system, civic engagement and public governance.

Pre-requisite: None

SSGC8004 PUBLIC ADMINISTRATION IN CHINA

The course provides the candidates with an overview of some major issues in public administration and public policy in China. Topics may include the public administrative system of China, social welfare system and welfare dependency, performance evaluation of municipal government, smart city development, civic engagement and public governance.

Pre-requisite: None

SSGC8005 RESEARCH WRITING AND ETHICS

This course covers the international standards associated with the conduct of human-subject research, with a particular focus on survey, ethnographic, archival, and qualitative research. Topics also covered include issues of authorship, mentoring, and professional ethics for academics in the university. Some guest speakers from public sector will also share their viewpoints and insights about public administration and management.

Pre-requisite: None

SSGC8006 ETHICS AND PUBLIC AFFAIRS

Under the principle of Good Governance Agenda, public values and public interests are integrated into policymaking and public services delivery. This course provides candidates with an understanding of the principles of ethical considerations of public affairs and public policy, like ageism, feminism and sustainability. Researchers and senior civil servants are invited to demonstrate the concerns of ethics on various public affairs.

Pre-requisite: None

SSGC8007 PUBLIC ADMINISTRATION AND POLICY RESEARCH

Research skills are essential for evidence-based policy-making in public sector. This course provides the students with an overview of the theory and practice of qualitative methods and quantitative methods. This course enables candidates to deliver empirical studies, like the examination of causal effects of policy on observed outcomes and practical experience in applying techniques of qualitative analysis using computer software.

Pre-requisite: None

SSGC8010 CURRENT ISSUES IN PUBLIC ADMINISTRATION AND PUBLIC POLICY

The course provides the candidates with an overview of current issues in public administration and public policy in Guangdong-Hong Kong-Macau Greater Bay Area. Topics may include the development of the recruitment and training of civil servants, the principal officials accountability system and smart public administration.

Pre-requisite: None

SSGC8011 CURRENT ISSUES IN ECONOMICS AND FINANCE

The course provides the candidates with an overview of current issues in economic and fiscal

policy in Guangdong-Hong Kong-Macau Greater Bay Area (GBA). Topics may include the exchange rate policy of Renminbi (Hong Kong Dollar and Pataca), the development of stock exchange and featured finance, the role of GBA in service platform between China and Portuguese-speaking Countries and “the Belt and Road” Initiative, as well as, the development of GBA city clusters.

Pre-requisite: None

SSGC8012 CURRENT ISSUES IN PUBLIC SECURITY

The course provides the candidates with an overview of public security in Guangdong-Hong Kong-Macau Greater Bay Area (GBA). Topics may include the crisis management of natural disaster, the development of smart police management, the legislation of national security, and the development of anti-corruption authority anti-money laundry authority.

Pre-requisite: None

SSGC8013 CURRENT ISSUES IN SOCIAL SECURITY AND SOCIAL WELFARE

The course provides the candidates with an overview of social security and social welfare in Guangdong-Hong Kong-Macau Greater Bay Area (GBA). Topics may include the social welfare system and welfare dependence, the sustainability of social welfare system, the role of voucher system and social insurance in social welfare system, tourism poverty alleviation, furthermore, smart health care and smart elderly service.

Pre-requisite: None

SSGC8014 CURRENT ISSUES IN URBAN PLANNING

The course provides the candidates with an overview of urban planning in Guangdong-Hong Kong-Macau Greater Bay Area (GBA). Topics may include urban renewal policy, smart transportation, public housing policy and the infrastructure development.

Pre-requisite: None

SSGC8099 DOCTORAL THESIS

By this course, candidates have the opportunity to apply the concepts and the theories learned from the programme. The thesis-writing process could consolidate the candidates' ability to conduct independent research, demonstrate their expertise in a chosen area of interest and make an intellectual contribution to the practice of public administration and public policy.

Pre-requisite: None

SSGC8802 QUANTITATIVE RESEARCH METHODS

This course is a doctoral level seminar designed to develop the students' knowledge and skills of quantitative methods in social sciences, familiarize them with procedures of designing and implementing quantitative research projects, improve their critical thinking capability, and increase their competency in writing research papers for publication in refereed English journals. It will provide the students with hand-on experiences in data analysis using state-of-the-art tools and methods.

Pre-requisite: None

SSGC8803 QUALITATIVE RESEARCH METHODS

This doctoral level course aims to develop students' knowledge and skills of qualitative research methods in social sciences. Students explore different ontological, epistemological and related methodological perspectives of qualitative research in applied contexts, professional practice, and cultural settings. Students also engage with high-level readings of primary sources and apply critical analysis of exemplary qualitative research papers in preparation for designing and implementing qualitative research projects, develop interpretive/hermeneutic skills, and enhance competency in writing research papers for publication in refereed English journals.

Pre-requisite: None

SSGC8806 UNIVERSITY TEACHING AND PRACTICE

The purpose of this seminar-based course is to introduce students to the issues, practices and

strategies involved in collaborative and interactive teaching in higher education settings. Through assigned readings and online and in-class discussion, the course focuses on the nature of teaching and learning, the role of student engagement, how student development impacts learning, the use of technology to enhance student learning, course design, learning outcomes, and models of teaching practice. The course further explores strategies for authentic assessment and whole person education, as well as the development of a teaching portfolio through practical application.

Pre-requisite: None

SSGC8807 ACADEMIC WRITING AND SCHOLARSHIP

This doctoral level course aims to develop students' knowledge and skills regarding academic scholarship and research writing within the social sciences. The course includes the discussion of ways in which culture informs academic writing, and the underlying principles of logic, argumentation and reasoning in academic writing practices. Discipline-specific scholarly conventions and technical requirements for quantitative and qualitative research reporting are discussed and applied in preparation for dissertation writing and the writing of research papers for publication in refereed English journals. Students will also engage with relevant primary and secondary source readings, and conduct critical analysis of exemplary texts.

Pre-requisite: None

SSGC8808 SOCIAL THEORY

This seminar-based course covers a wide range of material derived from a variety of theoretical traditions and bodies of work. It introduces students to, and help them develop an understanding of, complex issues and texts that are now established as the theoretical basis of scholarship in a number of relevant cognate fields, including communication studies, media studies, cultural studies, gender studies, visual culture, postcolonial studies, literary studies, anthropology, education, film studies, sociology and psychology. Topics in this course will vary according to course instructor and student interest, and may include readings of classical and/or contemporary theories in the social sciences.

Pre-requisite: None

SSGC8809 RESEARCH ETHICS

In this online research ethics course, students will engage as independent learners in the CITI training programme to gain in-depth knowledge and understanding of all aspects of ethics as it applies in the social sciences. The CITI training programme comprises the minimal standards to demonstrate ethical competence and to comply with UM policy and Macau governed regulations for research with vulnerable populations, emerging designs, technology, and more. All students need to complete the discipline-specific prescribed units of the CITI training programme with a default score of 80% or more.

Pre-requisite: None

Honours College

PROGRAMME CURRICULUM

The curriculum is designed to nurture high flying students into globally competitive leaders and intellectual achievers committed to collaborative and creative thinking for Macao and beyond. It provides students with courses for learning and practicing leadership, experience of study abroad, community engagement at residential college (RC) and service learning on and off campus. In completion of the Honours College Certificate Programme, students will have:

- earned seven credits of honours courses
- gained study abroad experience
- fulfilled the RC residency requirement
- completed a leadership & service learning requirement

HONOURS COURSE

Students have to complete one 3-credit lecture base honours course, one 1-credit honours project and one 3-credit capstone project with a "B" or higher grade earned for each course.

Course Title	Type	Credits
HONR2003 Developing Leadership	Compulsory	3
HONR2004 Project on Social Awareness	Compulsory (Group Project)	1
HONR4001 Honours Project	Compulsory (Individual Project)	3
Total credit requirement:		7

STUDY ABROAD EXPERIENCE

Students are required to fulfil "study abroad" experience during their studies at UM. The experience must be semester/ academic year based and credit bearing with a minimum of 3 abroad credit successfully transferred back to UM. It must be *international* experience. Hence, mobility programmes to universities in Mainland China, Taiwan and Hong Kong regions will not be considered as fulfillment of the Honours College Certificate Programme. There are multiple ways in fulfilling this requirement with different types of financial support and requirements as stipulated by internal regulations; e.g.

- A full time semester abroad at universities having agreement with the Honours College.
- A full time semester/ year abroad through the programme operated by UM.

† Different types of scholarship with requirements will be awarded to support this study abroad experience based on the availability of university's financial resources.

RESIDENTIAL COLLEGE RESIDENCY

- Students are required to have four-semester RC residency during their undergraduate study at UM
- For students admitted through recommendation of RC Masters and Dean of Students, they are required to have full (except study abroad period) RC residency during their undergraduate study at UM

LEADERSHIP & SERVICE LEARNING

- Students are required to demonstrate their leadership skills and services on and/or off campus by satisfying requirements through the Whole Person Development Award Programme offered by the Student Affairs Office (SAO), or an equivalent programme recognized by SAO
- With the Whole Person Development Award Programme, students are required to earn a minimum of 900 cumulative Competency Score (CS) with a minimum of 150 CS in each of the 5 core areas of development for graduation
 - Interpersonal Relation and Teamwork
 - Healthy Living
 - Cultural Engagement
 - Citizenship with Global Perspectives
 - Leadership and Service

ADMISSION

Students pursuing a Bachelor's degree could be admitted to the Honours College Certificate Programme through three different channels:

1. Direct Admission of incoming first-year students

Students who are offered any of the following scholarship awards are eligible for application of expedited admission to the Honours College, and will be admitted upon passing the admission interview*.

- UM Grand Lotus Scholarship (by Principals' Recommended Admission)
- UM Golden Lotus Scholarship (by Principals' Recommended Admission & Admission Examination channels)
- UM Full Scholarship for Mainland China, Hong Kong and Taiwan Region Students
- UM International Student Scholarship (Full Scholarship)
- Any other scholarships subject to the University's decision

*Admission interview will be conducted by the Honours College at the beginning of the academic year.

The Honours College offers activities focusing on personality development for the incoming first-year students.

2. Admission by Open Application

First-year students for 4-year programme and second-year students for 5-year programme could be admitted through application.

- A minimum 3.3 cumulative GPA (Scale Average 15 for Faculty of Law) is required at the time of application and admission
- Applicants will be assessed based on their academic and extracurricular documents submitted with the application, and by interview if needed

3. Admission by Recommendation of Residential College and Student Affairs Office

Students who have demonstrated strong leadership potential, stronger participation in services and/or special talents in areas such as arts, sports, language, music, literature can be admitted by recommendation of RC Masters and Dean of Students.

- RC Master could recommend 2 students per year from the corresponding RC into the Honours College
- Dean of Students could recommend 2 students per year into the Honours College
- First-year students for 4-year programme and second-year students for 5-year programme could be admitted through application.
- A minimum 3.0 cumulative GPA (Scale Average 14 for Faculty of Law) is required at the time of recommendation and admission

CONTINUATION REQUIREMENTS

To remain enrolled in the Honours College, a student must normally satisfy the following requirements

- Enroll each semester on the degree programme at the student's home unit.
- Maintain cumulative GPA* of 3.0 (cumulative Scale Average 14* for Faculty of Law students) or above.
- Those with cumulative GPA* dropping below 3.0 but not below 2.95 would be placed on probation and would be given a grace period of one semester to achieve a cumulative GPA* of 3.0 or higher.
- Pass every subject taken at the partner University in the Study Abroad experience.
- For students admitted through recommendation of RC Masters and Dean of Students, maintain residency on RC except during study abroad period.
- Meet the English language proficiency requirement by obtaining certain scores from a public examination by the end of the first year of study at HC:
 - TOEFL iBT 79 or above, or
 - TOEFL Paper test 550 or above, or
 - IELTS 6.5 or above
- † Other proof of equivalent language skills to be considered on a case-by-case basis.
- For students in the programmes of Bachelor of Law and Bachelor of Arts in Portuguese Studies, valid CAPLE or CELPE-Bras exam certification at Level CIPLE (A2) or above should be obtained by the end of the first year of study at HC.

*The above mentioned cumulative GPA and cumulative Scale Average refer to the overall performance of a student in all the semesters of the specified years of studies, including all courses taken for the degree programme, minor programme(s).

COMPLETION REQUIREMENTS

To graduate from the University of Macau with special recognition at congregation and an Honours College certificate to signify passing of the Honours College Certificate Programme, a student must satisfy the following requirements.

- Complete the requirements of the degree programme at the student's home unit.
- Complete the requirements of the Honours College Certificate Programme.
 - Receive a "B" or higher grade for each of the honours courses taken.
 - Satisfy the Study Abroad Experience requirement.
 - Satisfy the four-semester RC residency requirement; for students admitted through recommendation of RC Masters and Dean of Students, satisfy the full (except study abroad period) RC residency requirement.
 - Satisfy the leadership and service learning requirement by earning 900 cumulative competency score through the Whole Person Development Award Programme of the University. The 900 CS must include a minimum of 150 CS in each of the 5 core areas of development (Interpersonal Relation and Teamwork; Healthy Living; Cultural Engagement; Citizenship with Global Perspectives; Leadership and Service).
- For students admitted through direct admission or open application – Has (1) cumulative GPA* of 3.3 (cumulative Scale Average* of 15 for Faculty of Law students) or above and (2) Honours College Certificate Programme cumulative GPA of 3.3 or above.
- For students admitted through recommendation of RC Masters and Dean of Students – Has (1) cumulative GPA* of 3.0 (cumulative Scale Average* of 14 for Faculty of Law students) or above and (2) Honours College Certificate Programme cumulative GPA of 3.0 or above.

*The above mentioned cumulative GPA and cumulative Scale Average refer to the overall performance of a student in all the semesters of the specified years of studies, including all courses taken for the degree programme, minor programme(s).

HONOURS RECOGNITION

Upon completion of all requirements of the Honours College Certificate Programme and the degree programme at their home unit, the honours students will receive special recognition at congregation and a Certificate of Honours College. Honours work is noted on transcripts.

Course Description**HONR2003 DEVELOPING LEADERSHIP** (3 credits)

This course has three interrelated components focused on the individual, community, and global society, and is designed to develop leadership abilities. The first component focuses on developing students' individual self-awareness and personal development through an exploration of values, beliefs, and socio-cognitive skills. The second component focuses on developing students' leadership skills in the local community. The third component focuses on preparing students to be global citizens, with an enhanced understanding of the diverse values, beliefs, and behaviours typical of different cultures and societies. Taken together, these three distinct course components will build students' capacity to be global leaders.

HONR2004 PROJECT ON SOCIAL AWARENESS (1 credit)

The course brings together students of different majors to conduct small group research and discussion on current social issues of local and global communities, and everyday problems, under the supervision of members from the Residential Colleges, including resident fellows, non-resident fellows, and college affiliates. Students are motivated to develop their skills on critical thinking, multidisciplinary approach to problem solving, and teamwork.

HONR4001 HONOURS PROJECT (3 credits)

Students are required to apply knowledge from their disciplines of studies to broader global issues such as innovation, entrepreneurship, and sustainability, and complete scholarly projects under the supervision of faculty advisors in the respective field of study of the research topics, including multidisciplinary topics. The projects are expected to meet the scholarly standards of the disciplines and of the Honours College. Students are required to present their projects.

LANGUAGE OF INSTRUCTION

English is the main language of instruction.

Course Description

DOCTORAL DEGREE PROGRAMME

APME8001 SOLID STATE PHYSICS

In this course, the behavior of atoms and shared electrons in solids will be described by classical physics and quantum mechanics. The discussion of solid with crystalline structure will be one of the emphases. Some properties of crystal such as defects, disorder and thermal vibration will be studied. Then, band theory will be investigated. The physics of p-n junction semiconductor will also be introduced. Materials will be classified by models of magnetism as well as electric properties.

Pre-requisite: None

APME8003 ADVANCED INSTRUMENTATION FOR MATERIALS CHARACTERIZATION

Introduction of commonly used materials characterization methods (XPS, SEM, AFM, XRD, XRF, Raman, XPS), including their theory of operation and hands-on experience. Includes a discussion of the measurement process and instrumental analysis of samples.

Pre-requisite: None

APME8007 THIN FILM PHYSICS

Definition of thin films. Environment and molecular and plasma processes in thin film deposition. Cold and thermal plasma. Requirement for substrate, substrate cleaning. Formation of thin films. Properties of thin films. Mechanical, electrical, thermal, chemical, and optical properties of thin films. Thermal evaporation. Laser ablation, synthesis of nanomaterials. Electrical discharges used in thin film deposition. Practical electric discharge configuration for deposition of thin films, direct current electric discharges, radio-frequency discharges, microwave discharges, electron cyclotron resonance plasma, matching units, floating potential, bias potential, plasma potential, effective bias, self-bias. Physical deposition techniques. Chemical vapor deposition techniques (CVD). Other processing technologies.

Pre-requisite: None

APME8014 ADVANCED ELECTROCHEMICAL ENERGY CONVERSION AND STORAGE

This advanced course introduces principles, mathematical models and implementation of electrochemical energy conversion and storage. The principle of electrochemistry is introduced, including components of an electrolytic cell, Nernst's equation, thermodynamics and electrokinetics. The basic of power conversion is also introduced, including power electronics switches, converters and their control. The applications to batteries, solar cells, fuel cells and other emerging energy generation technologies are explored.

Pre-requisite: None

APME8020 ADVANCED OPTOELECTRONICS

Brief introduction of semiconductor physics and condensed matter physics. Theory of the interaction between light and matter. Optical gain, light transmission and absorption in media. Applications of light emission device and photo-electric transfer device. Principle and structure of selected photoelectric device.

Pre-requisite: None

APME8021 ADVANCED LASER SPECTROSCOPY TECHNOLOGY

Provide essential knowledge for the research frontiers in ultrafast laser spectroscopy and novel optical materials. Topics include: laser fundamentals, linear and nonlinear optical spectroscopy, time-resolved spectroscopy, single molecule spectroscopy, fluorescence and Raman microscopy, optical manipulation, optical properties of novel materials and some optoelectronic applications.

Pre-requisite: None

APME8022 TRANSMISSION ELECTRON MICROSCOPY

Introduction to imaging and diffraction analysis with transmission electron microscopy. Common sample preparation techniques. Basic diffraction theory and imaging principles using different imaging techniques, including bright field, dark field, high resolution and z-contrast imaging. Working principles of related compositional analysis techniques, including energy dispersive X-ray spectroscopy (EDS) and electron energy loss spectroscopy (EELS). Hands-on operation of the microscope can be optional.

Pre-requisite: None

APME8024 SPECIAL TOPICS IN APPLIED PHYSICS AND MATERIALS ENGINEERING

Any specialized topic in Applied Physics and Materials Engineering chosen by the staff member who has experience in that particular field, but the topic is not covered by the other postgraduate courses in the PhD Programme.

Pre-requisite: None

APME8025 ADVANCED QUANTUM MECHANICS

History and philosophy of quantum mechanics will first be reviewed in this course. Wave function and its statistical interpretation will be investigated. Time-independent Schrodinger equation will be discussed with some examples of infinite square well, finite square well and harmonic oscillator, etc. Then, hydrogen atom will be studied by Schrodinger equations in three dimensions. Furthermore, wave function of two-particle systems, atoms and solids will be introduced. The parts of application cover contents of perturbation theory, variational principle, WKB approximation and adiabatic approximation.

Pre-requisite: None

APME8027 RESEARCH ETHICS

The course provides students with an understanding of the following issues:

- The need for research ethics and the responsibility of the researcher (the student)
- The most common types of academic dishonesty (such as fabrication and plagiarism)
- How to avoid committing acts of academic dishonesty (such as through using citations and references)

Pre-requisite: None

APME8029 ADVANCED INORGANIC CHEMICAL SYNTHESIS

Brief introduction of chemistry basics and main focus on classic and emerging inorganic chemical synthesis methods as well as some physical and mechanical approaches for comparison. Some characterization techniques and their chemical principles. Implications of the inorganic synthesis techniques to the research and development in applied physics and materials science.

Pre-requisite: None

APME8030 ADVANCED MECHANICS OF MATERIALS

Basic training for students to understand the advanced mechanics of materials such as elastic behavior, inelastic behavior, anisotropic behavior, fracture behavior, and fatigue. With these knowledge, students will be able to analyze the materials mechanical behavior and wisely use the materials. Students with the knowledge of different mechanical behavior of materials, both isotropic and anisotropic.

Pre-requisite: None

APME8031 ADVANCED MICRO AND NANO-SYSTEMS: FROM FUNDAMENTALS TO APPLICATIONS

Overall introduction to miniaturization and microelectromechanical systems (MEMS); Fundamental physics of scaling in micro/nano-worlds; Overview of advanced micro/nano-fabrication materials & technologies & devices; Governing principle of physical phenomenon in micro/nano-scales, e.g. actuation, transduction, resonance, and manipulation, etc.; State-of-the-art applications of micro/nano-systems for interdisciplinary fields.

Pre-requisite: None

APME8032 ADVANCED ORGANIC-INORGANIC ENGINEERING MATERIALS

Briefly introducing basic knowledge of traditional engineering materials including polymer and cement. Mainly focus on: Introduction of organic/inorganic composite and nanocomposite materials; Introduction of polymeric admixtures for high-performance inorganic materials; Crystallization, surface and interface science of composite materials; Achievement of functionalization and ultimate mechanical properties for engineering composites; Design of advanced engineering composites; Industrial processing and application of engineering composites. Students will learn how to apply the basic knowledge of polymer, cement and composite into the design of advanced organic/inorganic engineering materials towards practical applications. They will also have a good impression for the real industrial use of engineering composites.

Pre-requisite: None

APME8033 NANOMATERIALS AND NANO CHEMISTRY

Introduction of low dimensional nanomaterials, e.g. carbon nanotube, graphene and transition metal dichalcogenides, and the corresponding methods of synthesis and characterization. Surface and interface modification of nanomaterials. Band-structure engineering of nanomaterials. Low-dimensional Van der Waals heterostructures. Applications of electronic devices, thermodynamics and fluid dynamics.

Pre-requisite: None

APME8034 SEMICONDUCTOR PHYSICS

Brief introduction of solid-state physics and crystallography. Mainly focus on the knowledge of semiconductor physics, condensed matter physics and semiconductor device physics: Intrinsic semiconductor, doped semiconductor and the carrier transportation in semiconductors will be introduced; the operating principles of some kinds of semiconductor devices will be introduced, such as pn junction, MS junction and FET, as well as the fabrication method and application in present. Also, some commercial semiconductor devices, such as LED and solar cells, will be introduced.

Pre-requisite: None

APME8035 ADVANCED MATERIALS SCIENCE AND ENGINEERING

A historical account of the discovery and development of materials science & engineering, including in-depth discussion of metals, ceramics, semiconductors, and other strongly-correlated electron systems. Fundamental knowledge in development of energy materials and single crystal growth, introduction of the modern neutron & synchrotron X-ray scattering techniques based on worldwide national large facilities, review of the most updated research achievements in the study of advanced functional materials such as spintronic, multiferroicity, superconductivity, spin frustration, spic ice, solar cell, battery, etc.

Pre-requisite: None

APME8036 ADVANCED ELECTROMAGNETISM AND MODERN SCATTERING TECHNIQUES

Magnetism is a very active and challenging subject since it represents a typical many-body problem and a complex application of quantum-mechanics, statistical physics and electromagnetism. During the last decades, new discoveries have emerged such as the high temperature superconductors and the colossal magneto-resistance manganite compounds. Besides bulk materials, magnetism of thin films and surfaces became a topic of great current interest. A promising new field of application emerges, so-called magneto-electronics with spin transistors. This progress is largely due to new experimental methods and only neutron and synchrotron X-ray scattering would be mentioned.

Pre-requisite: None

APME8037 RESEARCH WRITING

The course focuses on helping students to make academic presentations whether verbally (as in

a conference) or in writing (as in a paper). Topics include:

- How to write a research proposal
- How to structure a presentation (on paper and in power point)
- Tenses used in various parts of a paper presentation
- How to structure clear logical paragraphs
- How to be concise
- How to avoid ambiguity and different writing styles (for example, conventions for use of numbers, abbreviations, etc.)

Pre-requisite: None

APME8999 DOCTORAL THESIS

An independent investigation under the supervision of an institute staff member.

Pre-requisite: None

MASTER'S DEGREE PROGRAMMES

APME7001 DEVELOPMENT ON INNOVATIVE MATERIALS

In this course, seminar on latest development of applied physics and chemistry will be presented by students, faculty and guest speakers.

Pre-requisite: None

APME7002 ECO-FRIENDLY MATERIALS FOR SUSTAINABILITY

Introduction of materials and their relationship to environment, emphasizing the mitigation of the impact to the environments in various stages of material, including manufacturing, use and disposal. Topics covered include: materials and energy dependence; production and application of materials in industries; material lifecycle and its relationship to energy and carbon; material selection strategies, material sustainability, materials for low-carbon power, material efficiency, properties of engineering & natural materials and their relationship to environment and how to minimize the environmental impact arising from material disposal with new generation of recyclable-engineered materials.

Pre-requisite: None

APME7003 SUSTAINABLE ENERGY HARVESTING TECHNOLOGIES

This course covers the basic principles and recent advances in energy harvesting materials and technologies, with a focus on the role of materials and nanotechnology in the development of these technologies. The course will cover photovoltaic & bi-functional devices, thermoelectric, piezoelectric, triboelectric and pyroelectric energy harvesting, nuclear energy, water energy, wind energy, and the relevant materials and device considerations.

Pre-requisite: None

APME7004 TECHNOLOGIES FOR MATERIALS CHARACTERIZATION

Introduction of commonly used materials characterization technologies, including their theory of operation, hands-on experience, the measurement process and instrumental analysis of samples.

Pre-requisite: None

APME7005 ADVANCED ENERGY STORAGE TECHNOLOGIES

This course will give a general picture of energy society and different energy storage technologies, while focusing on some major ones (battery, capacitor, hydrogen and fuel cell). Some principles and important progress in energy storage technologies will be introduced in this course.

Pre-requisite: None

APME7006 SPECIAL TOPICS IN EMERGING MATERIALS

In this course, special topics in emerging materials will be presented by students, faculty and guest speakers.

Pre-requisite: None

APME7007 ENERGY, ENVIRONMENT AND SUSTAINABLE DEVELOPMENT

In this course, the concepts and principles for the sustainable development shall be introduced. The impact of energy and environment on the sustainable society shall be discussed. The utilization and recycle of natural resources shall be introduced. The relationship among economics, climate, energy, and environment shall be presented.

Pre-requisite: None

APME7008 FUNCTIONAL MATERIALS

Provide an in-depth education in the field of materials science, an interdisciplinary area of knowledge that includes the study of structures, properties, processing, and applications. It covers traditional structural materials, functional materials, and nanomaterials. The course shows that the behavior of materials is directly linked to their fundamental structures, and how structures and hence properties may be altered through processing. Properties, processing, design and environmental protection and degradation will be considered. Case studies in materials selection will be included and some examples of state-of-the-art applications of novel materials will be given.

Pre-requisite: None

APME7009 INTRODUCTION OF SOLID STATE MATERIALS

In this course, the behavior of atoms and shared electrons in solids will be described by classical physics and quantum mechanics. The discussion of solid with crystalline structure will be one of the emphases. Some properties of crystal such as defects, disorder and thermal vibration will be studied. Then, band theory and motion of electron will be investigated.

Pre-requisite: None

APME7010 MATERIALS DESIGN

This course involves the design of materials from computational methods. Some popular simulations methods in the materials science will be provided. In this course, the students will understand the theory and mechanisms governing the various applications for designing materials and tailoring the properties to meet the needs.

Pre-requisite: None

APME7011 MICRO AND NANO SYSTEMS

This course mainly focuses on the overall introduction to the miniaturization, fabrication, and applications of micro/nano- electromechanical systems (MEMS/NEMS). The fundamental physics and governing formulas will be introduced, along with the typical phenomenon and principle in micro/nano- scales. Overview of the advanced micro/nano- fabrication technologies, e.g. photolithography, will be introduced to describe the fabrication of advanced micro/nano- devices. Some important phenomena in micro/nano- scales will be discussed including sensing, transduction, resonance, and manipulation, etc. Finally, the State-of-the-art applications of micro/nano-systems for interdisciplinary fields such as biomedical sensing, wearable devices, and lab-on-chip systems will be covered.

Pre-requisite: None

APME7012 PRINCIPLES OF QUANTUM MECHANICS

This course introduces the principle of quantum mechanics and its applications in materials. The students will study the knowledge of quantum mechanics, such as schrödinger equation, observables, mechanical quantities expressed by operators and representation transformation, and approximation method. There will be case studies on different materials with their properties related to quantum phenomena such as low dimensional materials, nanostructures and optoelectronic materials.

Pre-requisite: None

APME7013 SEMICONDUCTOR MATERIALS AND PHYSICS

Brief introduction of solid-state physics and crystallography. Mainly focus on the knowledge of semiconductor materials growth technology and semiconductor physics, include the topic below: typical semiconductors and their fabrications, electronic state in semiconductors, defects in

semiconductors, the carrier transportation in semiconductors, nonequilibrium carriers in semiconductors and semiconductor junctions. Working mechanisms of typical semiconductor devices are also introduced.

Pre-requisite: None

APME7098 PROJECT REPORT

An independent project under the supervision of an academic staff member. An independent project report focuses on combining existing academic theories with an evaluation of a case study or industrial project. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

Course Description

CMED7001 PHARMACOLOGY AND SAFETY EVALUATION

- Principles of Pharmacology.
- Mechanisms of some classes of drugs.
- Pharmacokinetics.
- In vitro and in vivo models for pharmacology research.
- Experimental models for evaluating drugs used in the areas of cancer, cardiovascular diseases, immunology and endocrinology.
- Principle of safety evaluation.
- Experimental models for drug safety evaluation.
- Acute toxicity in drug safety evaluation, suchronic and chronic toxicity studies, genotoxicity, developmental and reproductive toxicity testing, carcinogenicity studies.
- Pharmacological studies and safety evaluation of Chinese medicine.

Pre-requisite: None

CMED7002 INTRODUCTION TO RESEARCH IN CHINESE MEDICINAL SCIENCE

- Harmless Chinese medicine and medicinal plants.
- Novel technology on the extraction, separation and purification of Chinese medicine.
- Novel dosage forms of Chinese medicine.
- Regulation and accreditation of the quality standard of Chinese medicine.
- Toxicity and adverse effects of Chinese medicine.
- Research, development and trends of the usage of Chinese medicine in clinical prevention, treatment and rehabilitation.

Pre-requisite: None

CMED7003 MEDICAL TECHNOLOGY MANAGEMENT

- An introduction to:
 - Management.
 - Human resources management.
 - Financial control.
 - Costing study.
 - Audit system.
 - Organization development.
 - Centralization & Decentralization.
 - Marketing of pharmaceutical products.
 - Sales strategy of medical products.
- Quality control and surveillance of drugs and health products.
- International requirements on quality, safety and clinical trials of registered drugs.
- Good Guideline Practice (GGP).
- Good Agricultural Practice (GAP) of pollution-free Chinese medicine.
- Good Laboratory Practice (GLP) of non-clinical research.
- Good Clinical Practice (GCP).
- Good Manufacturing Practice (GMP).
- Good Supply Practice (GSP).
- Regulations of herbs and Chinese medicine in China, EU, US and East Asia.

Pre-requisite: None

CMED7004 SOCIAL MEDICINE

- Theory and methods of social medicine research.
- Interactions between social economy, politics, culture and education.
- Principles and applications of economics on health delivery system.
- Social survey and its assessment.

- Medicine ethics.
- Human interactions and communication in medical practice.
- Analysis of psychological, behavioural and social factors of drug usage and abuse.
- Supply and demand of health services.
- Social responsibility of pharmacist.
- Marketing and regulation of drugs.
- Social welfare systems of China (Macao, Hong Kong, Taiwan) and other major western countries.
- Macro policy analysis and methodology.

Pre-requisite: None

CMED7005 INTERNATIONAL BUSINESS AND LAW FOR MEDICINE

- An introduction to international business and trade.
- Introduction of health economics and pharmaceutical economics.
- Health Act & Regulation.
- Types of main international legal systems for medicine.
- Regulations and international treaties for the control of medicine.
- Establishment and operation of multi-national, joint-venture pharmaceutical enterprises/companies.
- Legal settlement for business disputes.
- Medical patenting, trademarks and intellectual property.
- Legal rights and obligations of medical wholesalers.
- Censorships and responsibility of advertisements of medical products.
- Registration of Chinese medicine in European and US markets and its related laws.

Pre-requisite: None

CMED7006 INTRODUCTION TO RESEARCH IN MEDICAL ADMINISTRATION

- Medical care and social security systems in Europe, US and China.
- Developmental strategies for medical health economy and medical technology industry.
- Development strategies for medical technology.
- Development and trends of research in surveillance and management of medicine, functional food, cosmetics and other health products in China and worldwide.

Pre-requisite: None

CMED7007 BIOMEDICAL INFORMATICS

Informatics broadly covers the studies of natural and artificial domains for communication, interaction, data, and information, and relating them to the processes of defining, developing, managing, criticising, and refining knowledge. Biomedical informatics focuses on the theories, methodologies, and technologies of informatics that are related to processing biological and medical knowledge. This course mainly introduces important concepts (not trivial details), including those in basic informatics, medical informatics, bioinformatics, and Chinese medicine informatics. Later parts of this course will cover the recent advances in some integrative approaches such as systems biology, translational medicine, and evidence-based/led Chinese medicine.

Syllabus:

- Knowledge representations and computational reasoning
- Knowledge management
- Web, semantic Web, and multi-agents
- Practical software development
- Medical knowledge-based technologies
- Medical evidence reasoning
- Medical knowledge discovery
- Algorithms for biological sequences and structures
- Prediction of protein structure and protein interactions

-
- Analysing data from high-throughput experimentation
 - Systems biology and pathway modelling
 - Translational research in biomedicine
 - Medical research protocols
 - Evidence-based/led Chinese medicine

Pre-requisite: None

CMED7008 QUALITY CONTROL OF CHINESE MEDICINE

- Strategies of quality control for Chinese medicine.
- Optimization of marker for quality control of Chinese medicine.
- Samples preparation for quality control.
- New development for extraction, separation, and purification of major groups of active components.
- Application of modern biology on quality control of Chinese medicine.
- Chemical identification of major groups.
- Significant factors affecting the quality of Chinese medicine.
- Origin and species identification.
- Analysis of residual pesticides, heavy metals and arsenic salts.
- Contemporary analytical techniques in the quality control of Chinese medicine.
- Spectrophotometry, chromatography, mass spectrophotometry and their combined applications.

Pre-requisite: None

CMED7009 DEVELOPMENT OF DRUGS AND HEALTH PRODUCTS

- Introduction of international herbs, Chinese medicine and its health products.
- Precursor compounds.
- Principle and methods of drug design.
- Drug forms and process control.
- Screening of bioactive ingredients.
- Investigation of cellular and molecular mechanisms.
- Pharmacokinetics.
- Toxicology and drug dependence.
- Integrated clinical evaluation.
- Development of Chinese medicine, health products and cosmetics.
- Functions and safety assessment of health products and cosmetics.
- Development of simulation design on new drugs and health products.

Pre-requisite: None

CMED7010 PHARMACEUTICAL SCIENCE

- Optimal design of drug preparation.
- Novel medical subsidiary materials.
- Stability of drug preparation.
- Different types of preparations: slow-release and controlled-release preparations, targeted preparations, important and new types of Chinese medicine preparations, biotechnological preparations, etc.
- Manufacturing techniques and instruments used in drug preparation.
- Techniques and their applications in Chinese medicine preparations: inclusion technique, solid dispersion, micro-cyst, liposome, etc.

Pre-requisite: None

CMED7011 SYSTEMS BIOLOGY

- Principles of system biology.
- Gene expression, regulation and molecular cloning.
- Genomics (that is, organismal DNA sequence) and its application.

- Epigenetics (that is, DNA methylation, histone acetylation and deacetylation, etc.) and its application.
- Proteomics (that is, whole proteins and peptides from organismal, tissue, or cell level) and its application.
- Metabolomics (that is, organismal, tissue, or cell level measurements of all small-molecules) and its application.
- Application of system biology for studying Chinese medicine.

Pre-requisite: None

CMED7012 TARGETS AND MODELS FOR DRUG SCREEN

- Principles of targets, models and drug screen.
- Drug screen for the samples from different sources.
- High-throughput drug screen.
- High-content drug screen.
- Targets and models for anti-cancer compounds screen.
- Targets and models for anti-microorganism compounds screen.
- Targets and models for neuro-protective compounds screen.
- Targets and models for immune-regulation compounds screen.
- Targets and models for screening compounds for treatment of cardiovascular diseases.
- Screen biological active compounds from Chinese medicine.

Pre-requisite: None

CMED7013 EMERGING MATERIALS IN CLINICAL MEDICINE

This course aims to provide students a broad understanding of cutting-edge development in biomedical materials, devices and implants, and their emerging applications in clinical medicine. This course will introduce successful stories from bench to bedside (and beyond), discuss exciting breakthroughs in nanomedicine, tissue engineering, cancer therapy and regenerative medicine, as well as outline important regulatory and marketing challenges for these inventions.

Pre-requisite: None

CMED7014 ADVANCED NATURAL PRODUCTS CHEMISTRY

This course introduces and reviews the basic concepts of natural products chemistry, focusing on modern extraction and purification methods, and advanced spectroscopic methods. Biogenesis pathways of common natural products, as well as the biological activities and pharmaceutical importance of natural products will also be discussed. The course includes lectures and group discussion.

Pre-requisite: None

CMED7015 PROGRESS IN CONTEMPORARY STUDY OF CHINESE MEDICINE

The objective of this course is to provide an overview of progress in contemporary study of Chinese medicine. The course will consist of a series lectures based on the specific disciplines of Chinese medicine research, focusing on immunopharmacology, tumor pharmacology, cardiovascular pharmacology, toxicology, chemistry and medicinal pharmacy, etc. The academic staff in ICMS or guest speakers will be recruited to provide lectures in their areas of expertise, and each is responsible for respective course objectives. This course will also have a journal club component, which will enable students to read and present a scientific journal article related to the course.

Pre-requisite: None

CMED7016 APPLICATION OF PHARMACOKINETICS AND METABONOMICS IN DRUG DEVELOPMENT

This course aims to equip students with practical working knowledge of pharmacokinetics and metabonomics and its application to lead identification and target validation in drug discovery and development. Properties that affect pharmacokinetics, pharmacodynamics, and toxicity are discussed (i.e., physicochemical, interactions with human body). Cutting-edge models and

technique platforms as well as comprehensive strategies are introduced. Cases examples from the literature illustrate successful lead selection and optimization using pharmacokinetics and metabonomics approaches in drug development.

Pre-requisite: None

CMED7017 ACROSS THE GAP BETWEEN SCIENCE AND INDUSTRY

There is a big gap between science and industry. This course tries to help student get across this gap by introducing necessary knowledge and skills in the industry. The course covers a wide range of information including: over all view of business of Chinese medical science, a glance of big Pharms, the organization of global company, product development strategies, project management, business communication skills, leadership and team work, knowledge transfer issues, introduction of generic drugs and the GXP in drug development. The course will be useful for those who want to move to industry after graduation and also for those who want to develop health related products in the university.

Pre-requisite: None

CMED7018 BIO-STATISTICS

This course is designed for master students to understand the basic bio-statics theory and skills. Also the course will teach students how to use the most advanced bio-statics softwares.

Pre-requisite: None

CMED7019 STANDARDIZATION AND QUALITY MANAGEMENT OF CHINESE MEDICINE

In 'Standardization and Quality Management of Chinese Medicine' course, some basic concepts and theories of standardization will be introduced. The topics include standard substance, uniformity stability, precision, ISO, Total Quality Management (TQM), Six Sigma (6σ), Lean Manufacturing and Lab certification. Moreover, some cases will also be introduced to show how to design the quality of traditional Chinese medicine or new drugs.

Pre-requisite: None

CMED7020 COMPUTATIONAL PHARMACY

The course introduces computer application to pharmacy, including expert and knowledge-based systems, artificial intelligence, online pharmacy and medical databases, molecular modeling and computer-aided drug design, computational pharmaceuticals and bioinformatics. In computer laboratory, students will acquire initial skills of molecular modeling. They will also practice in searching online databases. The course will build a bridge between computer science and pharmacy for students.

Pre-requisite: None

CMED7021 RESEARCH METHODOLOGY

This course aims to help students to master the main research methods for their thesis projects, including qualitative methodology, case study, web content analysis, qualitative data analysis, network visualization and analysis, correlation analysis, multiple regression, etc. Moreover, students will learn how to write and publish academic papers in major journals.

Pre-requisite: None

CMED7030 INTRODUCTION TO MEDICINAL ADMINISTRATION

This is an introductory course that aims to provide an overview of the discipline of medicinal administration to the students. With an integrative vision of pharmacy and social science, the principles of and knowledge about modern pharmacy management, the approaches to medicinal management analysis, and the applications of evidence-based policy development and strategic planning in medicinal administration will be explained and discussed in details. Real-world case study in areas such as global drug research and development and drug-related laws and regulations (local, national and international) will be used to support the transformation of basic knowledge to practical skills. The students will also be supported to develop practical writing and presentation skills as important tools to communicate effectively about medicinal administration

at international level.

Pre-requisite: None

CMED7031 SOCIAL AND ADMINISTRATIVE PHARMACY

The core functionality of an effective pharmaceutical system are driven by the widespread use and the speedy innovation of pharmaceutical products, as well as the evolving development and application of pharmaceutical services. This prompts an increasing need for individuals who are able to evaluate and leverage the social, psychosocial, political, legal, historic and economic factors impinging upon the availability, accessibility, affordability and acceptability of such products and services. To address such need, this course is designed to equip students with the abilities to apply interdisciplinary theories, knowledge and skills to pharmacy problem solving and pharmaceutical system development for positions of responsibilities and leadership in such sectors as industry, clinical setting, government agencies and educational institutions.

Pre-requisite: None

CMED7032 HEALTH INDUSTRY INNOVATION

Health industry, composed of several components such as health care, pharmaceutical, medical device, community pharmacy, health insurance, etc, is facing multiple challenges and opportunities. This course will introduce the main frameworks of health industry innovation at both meso and micro level. Key management innovation practices will be presented and discussed in this course. Frontier documents in health industry innovation will also be introduced in this course to the students.

Pre-requisite: None

CMED7033 APPLICATION OF MEDICAL STATISTICS

Bio- and medical statistics incorporate a variety of data types. The most common statistics reported are vital (birth, death, marriage, divorce rates), morbidity (incidence of disease in a population) and mortality (the number of people who die of a certain disease compared with the total number of people). Other common statistical data commonly used in the health sector include health care costs, the demographic distribution of disease based on geographic, ethnic, and gender variables, and data on the socioeconomic status and education of health care professionals. This course is designed to enable students to develop essential skills to determine the root causes of health-related problems, identify and collect the relevant data, and interpret the results of data analysis appropriately. Real-world examples will be used to demonstrate the translation of statistical concepts and techniques in problem-solving application in the health sector.

Pre-requisite: None

CMED7034 APPLICATION METHODOLOGY FOR MEDICINAL MANAGEMENT

This course aims to introduce the key application methodologies that are needed for medicinal administration. Both qualitative and quantitative methods will be discussed in details in this course. Application project design will also be experimented to enhance students' ability to apply different kinds of application methodologies for medicinal administration.

Pre-requisite: None

CMED7035 APPLICATION OF COMPUTER TECHNOLOGY IN PHARMACY

This course introduces computationally algorithmic methods in collection, transformation, storage, organization, distribution, retrieval, visualization, and analysis of pharmaceutical and healthcare information. It provides a unique opportunity for students to learn essential computational chemistry, bioinformatics, artificial intelligence, physiologically-based pharmacokinetic modelling and simulation, computer science and their applications in pharmacy and medicine.

Pre-requisite: None

CMED7036 MEDICAL INNOVATION AND TECHNOLOGY MANAGEMENT

Medical Innovation and Technology Management is a discipline that combines medical sciences, technological innovation and practical management. It will introduce the current laws and policies

of medical innovation management, provide basic knowledge and research methods, and train students' management ability in the development of new drug discovery by discussing the frontier issues of medical innovation management.

Pre-requisite: None

CMED7037 HEALTH POLICY ASSESSMENT

Health policy assessment is the systematic evaluation of the properties and effects of a health policy, addressing the direct and intended effects of this policy approach, indicated its indirect and unintended consequences, and aimed mainly at policy decision making regarding health services. It includes method of evidence synthesis that considers evidence regarding clinical effectiveness, safety, cost-effectiveness and, health applications, includes social, ethical, and legal aspects of the use of health policy.

Pre-requisite: None

CMED7038 TECHNICAL ENGLISH FOR HEALTHCARE SECTOR

Effective gathering, analysing, responding to and communicating about global medical information are pivotal for professionals in the health science and the health industry, especially in the current age of globalisation. This course aims to enable graduate students to understand the essentials of career technical requirements of English communication skills as professionals of 21st century in the health sector. The course content will focus on reading with precise and accurate interpretation of texts, establishing a formal style and objective tone in analysis about a given text, writing business plans and biomedical essays, and conveying a clear and distinct perspective through written and oral presentations. Interesting topics also include the structure of logical paragraphs, the tips to write concisely and avoid ambiguity, and tenses used in various forms of presentation.

Pre-requisite: None

CMED8001 ADVANCED PHARMACOKINETICS

The principal objective of the course is to provide the students an in-depth insight into the basic processes that governs the disposition of drugs and other xenobiotics by the human body and the correlation with efficacy and toxicity. The course focuses on the application of the principles of pharmacokinetics solving problems in new drug discovery and development and the development of the herbal medicine products. Real-world cases will be reviewed and formal readings and discussions will occur throughout the course to foster critical thinking and independent learning.

Pre-requisite: Participants need to have knowledge in biological sciences, pharmaceutical sciences, mathematics

CMED8002 ADVANCED PHARMACEUTICS

This course introduces the recent progress in the interdisciplinary field of pharmaceutical sciences, with particular emphases on drug delivery systems, nanoscale formulations as well as gene/cell therapy. It enables students to understand how these new theories and technologies can improve drug safety, enhance therapeutic efficacy and translate into new therapeutic modalities.

Pre-requisite: None

CMED8003 FUNCTIONAL FOOD PRODUCT DEVELOPMENT IN CHINESE MEDICINE

This course will introduce students to the essential concept and development procedure of functional food in Chinese Medicine (CM). It includes basic knowledge of medicine - food dual purpose CM, functional ingredients in CM, pharmacological activity evaluation and safety evaluation. These lectures will also cover in moderate detail the new technologies and methodologies for the development of functional food from CM. Moreover, this course will introduce selected topics of functional food from other natural products, including functional fatty acids, mushroom, soy extracts, grape, etc. In addition, functional food regulations in China, USA and Europe will be briefly introduced.

Pre-requisite: None

CMED8004 HEALTHCARE DECISION ANALYSIS

This course aims to equip research students with the knowledge and skills to conduct evaluation research into the healthcare issues that require evidence-based reasoning and data analytics. Major healthcare cases related to complex diseases will be studied through interactive study and project-based research.

Pre-requisite: Before taking this course, the students should prepare themselves with a working knowledge of basic multivariate statistics and pathophysiology. Some knowledge of statistical software or data mining packages based on R or Python would be an advantage.

CMED8005 QUALITY RESEARCH IN CHINESE MEDICINE

This subject introduces the novel strategies, new methodologies and state-of-the-art techniques for quality research of Chinese medicines. Strategy of systematic evaluation, advanced instruments and analytical techniques including sample preparation and detection will be emphasized in the course.

Pre-requisite: None

CMED8006 SEMINARS

The Seminar is a graduate level course designed to give students an opportunity to hear from and interact with experts in their fields of study. ICMS will invite the leading local, national, and international scientists to speak about the latest advances in Biomedical Sciences. Graduate students also present talks about their own research. This experience gives the students practice speaking to the others and allows for the exchange of ideas as they conduct their thesis research.

Pre-requisite: None

CMED8007 CHEMISTRY OF NATURAL MEDICINE

This course is intended to provide an extensive understanding of chemistry of natural medicine and the cutting-edge techniques in discovering and developing natural medicines. Especially, the isolation, structural elucidation, classification, bioactivities and toxicities of natural medicines and related topics will be discussed in this course.

Pre-requisite: None

CMED8008 ADVANCED PHARMACEUTICAL ANALYSIS

The principal objective of the course is to provide the students an in-depth insight into the advanced development in strategies and practices in pharmaceutical analysis. The course focuses on the new methodologies and state of the art techniques for including sample preparation, instrumental analysis and data processing for pharmaceutical analysis. Real-world cases will be reviewed and formal readings and discussions will occur throughout the course to foster critical thinking and independent learning.

Pre-requisite: Participants need to have knowledge in analytical chemistry, pharmaceutical sciences, pharmaceutical analysis

CMED8009 DRUG DISCOVERY

This course will introduce students to the essential concepts and principles of drug discovery. It covers the latest and most outstanding developments on the medicinal chemistry and pharmacology of molecular drug targets, e.g. disease specific proteins, receptors, enzymes, and genes. This course also includes descriptions of current techniques in isolation and structural elucidation, screening techniques and high-capacity instrumentation for increased productivity in the development and discovery of new drugs.

Pre-requisite: None

CMED8010 ADVANCED PHARMACOLOGY

This course will introduce students to the essential concepts and principles of pharmacology. It includes descriptions of type of receptor, agonist and antagonist activities, analysis of agonist-effect relationships and the intracellular signaling pathways and transcriptional regulation at molecular level by which endogenous and exogenously applied compounds elicit effects. Also,

this course will introduce some new research strategies recently developed in pharmacology such as systems pharmacology, network pharmacology. Lastly, this course will emphasize the hot topics of biology such as autophagy, hormesis, epithelial-mesenchymal transition, etc., which could be integrated into pharmacological study of Chinese medicine research.

Pre-requisite: None

CMED8011 ADVANCED TOPICS IN MEDICINAL ADMINISTRATION

This course will introduce various advanced topics in medicinal administration to PhD students, including pharmaceutical care at community pharmacy, pharmaceutical innovation system, basic theories of standardization and quality management (ISO 9001), total quality management (TQM) and relevant case study, data and visualization of data, e-learning in pharmacy education, ICT in pharmaceutical industry, and drug registration and patent linkage. Once completing this course successfully, students can have a wide understanding of cutting-edge theories and methods in medicinal administration, which is crucial to integrate multidisciplinary resources to develop PhD study.

Pre-requisite: None

CMED8012 RESEARCH ETHICS

The on-line course provides students with an understanding of the following issues:

- the need for research ethics and the responsibility of the researcher (the student)
- the most common types of academic dishonesty (such as fabrication and plagiarism)
- how to avoid committing acts of academic dishonesty (such as through using citations and references)
- how the University deals with students who have been proven to have committed acts of academic dishonesty (The University's 'Rules on Handling Student Academic Dishonesty' will be outlined)

Pre-requisite: None

CMED8013 RESEARCH WRITING

The course focuses on helping students to make academic presentations whether verbally (as in a conference) or in writing (as in a paper). Topics include:

- how to write a research proposal
- how to structure a presentation (on paper and in powerpoint)
- tenses used in various parts of a paper presentation
- how to structure clear and logical paragraphs
- how to be concise
- how to avoid ambiguity and different writing styles (for example, conventions for use of numbers, abbreviations, etc.)

Pre-requisite: None

PROGRAMMES OF STUDY

Institute of Collaborative Innovation

Master's Degree Programmes

Master of Science

• Cognitive Neuroscience

Compulsory Courses		Credits
CCBS7001	Principles of Neuroscience	3
CCBS7002	Cognitive Neuroscience	3
CCBS7003	Brain Stimulation and Neuroimaging Techniques	3
CCBS7098	Project Report	6
Total Credits:		15

Required Electives – Group 1 (<i>Students are required to take 2 Required Electives from Group 1 to obtain 6 credits</i>)		Credits
CCBS7004	Magnetic Resonance Imaging	3
CCBS7005	Computational Cognitive Neuroscience	3
CMED7018	Bio-Statistics	3
Total Credits:		6

Required Electives – Group 2 (<i>Students are required to take 3 Required Electives from Group 2 to obtain 9 credits</i>)		Credits
EDUC7402	Psychology of Learning	3
EDUC7503	Advanced Exercise Physiology	3
EDUC7403	Advanced Developmental Psychology	3
AHGC7400	Clinical Linguistics	3
ENGL7004	Psycholinguistics	3
AHGC7302	Second Language Acquisition	3
ENGL7005	Sociolinguistics	3
ECEN7021	Biomedical Transducers and Instruments	3
CISC7026	Introduction to Deep Learning	3
CISC7013	Principles of Artificial Intelligence	3
CISC7202	Tools for Machine Learning	3
PYSC7708	Behavioral Addiction	3
IRTM7036	Cross Cultural Gambling Psychology	3
CCBS7006	Neuroeconomics	3

- **Data Science**

Compulsory Courses		Credits
CISC7201	Introduction to Data Science Programming	3
CISC7204	Data Science and Data Visualization	3
CISC7203	Database and Data Mining Technologies	3
CISC7202	Tools for Machine Learning	3
Total Credits:		12

Specialization A -- Artificial Intelligence Applications:

Compulsory Courses		Credits
CISC7298	Project Report	6
Total Credits:		6

Required Elective	<i>(Choose 4 Required Electives from the following)</i>	Credits
CISC7013	Principles of Artificial Intelligence	3
CISC7018	Computer Vision and Pattern Recognition	3
CISC7019	Web Mining	3
CISC7021	Applied Natural Language Processing	3
CISC7022	Big Data Processing and Analysis	3
CISC7026	Introduction to Deep Learning	3
Total Credits:		12

Grand Total:	30
---------------------	-----------

Specialization B -- Marketing Analytics:

Compulsory Courses		Credits
MKTG7010	Marketing Management	3
MKTG7030	Consumer Behavior	3
MKTG7033	Marketing Analytics	3
BAGC7011	Research Methods	3
BAGC7891	Project Report	6
Total Credits:		18

Grand Total:	30
---------------------	-----------

Specialization C -- Financial Technology:

Compulsory Courses

FINC7060	Topics in Data Analytics and Financial Technology	3
FINC7054	Introduction to Modern Financial Technology	3
BAGC7891	Project Report	6
Total Credits:		12

Required Elective	(Choose 2 Required Electives from the following)	Credits
FINC7010	Corporate Finance	3
FINC7026	International Banking and Bank Management	3
FINC7035	Financial Risk Management	3
ACCT7060	Financial Statement Analysis for Decision Making	3
BECO7010	Statistics and Financial Econometrics	3
Total Credits:		6

Grand Total: 30

Specialization D -- Data Strategy and Compliance:

Compulsory Courses		Credits
LAWS7701	Data Applications and Regulation in Digital Society	3
LAWS7702	Big Data Analytics and Compliance in E-business	3
LAWS7703	Data Strategy and Protection in Healthcare and E-governance	3
LAWS7704	Artificial Intelligence and Comparative Law	3
LAWS7791	Project Report	6
Total Credits:		18

Grand Total: 30

Specialization E -- Precision Medicine:

Compulsory Courses		Credits
HSCI7001	Artificial Intelligence in Medicine	3
HSCI7002	Biomedical Sciences	3
HSCI7003	Digital Bio-medicine	3
HSCI7004	Healthcare Analytics	3
HSCI7998	Project Report	6
Total Credits:		18

Course Description

Master of Science - Data Science

CISC7201 INTRODUCTION TO DATA SCIENCE PROGRAMMING

This course covers both the fundamental and advanced topics in Natural Language Processing (NLP), which deals with the application of computational models to text data. In this course, the core tasks in natural language processing will be examined, including minimum edit distance, language modelling, N  ve Bayes, Maximum Entropy, text classification, sequence labelling, POS tagging, syntax parsing and computational lexical semantics. Modern NLP applications will be explored such as information retrieval, and statistical machine translation. Students will learn how to formulate and investigate research questions on related topics.

Pre-requisite: None

CISC7204 DATA SCIENCE AND DATA VISUALIZATION

This course is designed to enable students to learn the significance of data visualization in data science and big data analytics, and develop knowledge and skills to present quantitative data using data visualization tools. This course emphasizes on the practical aspects of data science with a focus on using R or Python programming language to process data, produce visualizations, and interpret these visualizations. Students will learn the practice of data cleaning, reshaping of data, basic tabulations, aggregations and visual representation in order to increase the understanding of complex data and models.

Pre-requisite: None

CISC7203 DATABASE AND DATA MINING TECHNOLOGIES

This course is designed to enable students to learn the database and data mining concepts and techniques for big data analytics and development in different domains. The course concentrates on the practical issues of database and data mining for solving big data problems. The content includes data modeling in database and data warehouse, SQL, Python programming for database, Python programming and R programming for data mining applications. Students will learn the skills of database modeling, querying, and programming, as well as the programming techniques for data mining.

Pre-requisite: None

CISC7202 TOOLS FOR MACHINE LEARNING

This course introduces Machine Learning (ML) basics, methods, and algorithms, with a significant amount of hands-on practice using modern software tools (e.g., Scikit-learn and PyTorch). After the first introductory lecture on machine learning, the course covers four key topics of ML: 1) regression techniques including linear regression, ridge and lasso regression, nearest neighbor and kernel regression; 2) classification techniques including logistic regression decision trees, boosting and bagging, SVM and N  ve Bayes; 3) clustering techniques including k-means, hierarchical clustering, DBScan, and mixture models; and 4) deep learning techniques including neural network basics, convolutional neural networks, and generative neural networks.

Pre-requisite: Introduction to Data Science Programming

Specialization A: Artificial Intelligence Applications

CISC7013 PRINCIPLES OF ARTIFICIAL INTELLIGENCE

Overview of Traditional Artificial Intelligence Principles: Problem Solving, and Logical Agent. Overview of Modern Artificial Intelligence Principles: Machine Learning, Decision Tree, Neural Networks, Support Vector Machines, and Introduction to Deep Learning.

Pre-requisite: None

CISC7018 COMPUTER VISION AND PATTERN RECOGNITION

This course introduces the fundamentals and advanced topics of computer vision and pattern recognition for postgraduate students. It emphasizes both theory and applications of computer vision and pattern recognition. Topics include Bayesian decision theory, support vector machine, image features, image stitching, component analysis, neural networks and deep learning.

Pre-requisite: None

CISC7019 WEB MINING

The course will cover the fundamental concepts, principles and algorithms in the area of Web Mining. It will firstly give an introduction to the concepts of the traditional information retrieval systems and the principles of web search engines, then, the course will extensively discuss techniques and algorithms of web mining, including Link-Base analysis, web page classifications, web advertisement, recommendation algorithms, web information extractions, web image indexing. The course also requires each student to complete a related course project.

Pre-requisite: None

CISC7021 APPLIED NATURAL LANGUAGE PROCESSING

This course covers both the fundamental and advanced topics in Natural Language Processing (NLP), which deals with the application of computational models to text data. In this course, the core tasks in natural language processing will be examined, including minimum edit distance, language modelling, N vie Bayes, Maximum Entropy, text classification, sequence labelling, POS tagging, syntax parsing and computational lexical semantics. Modern NLP applications will be explored such as information retrieval, and statistical machine translation. Students will learn how to formulate and investigate research questions on related topics.

Pre-requisite: None

CISC7022 BIG DATA PROCESSING AND ANALYSIS

This course introduces the latest development of data engineering techniques, including data query processing (e.g., multi-dimensional data, sequence data, and spatial-temporal data) in cloud computing and HPC environments. Students will learn study and learn how to formulate and investigate the state-of-the-art problems and solutions on related topics.

Pre-requisite: None

CISC7026 INTRODUCTION TO DEEP LEARNING

This course introduces Deep Learning (DL) basics, methods, and algorithms, with hands-on practice using modern DL library tools (e.g., PyTorch). After the introductory lecture on deep learning, the course first covers the fundamental of neural networks, including universal approximator theory, learning neural networks, backpropagation, optimization, stochastic gradient descent, and tricks on training neural networks, and then focuses on typical neural network architectures, including Convolutional Neural Networks, Recurrent Neural Networks, and Generative Neural Networks.

Pre-requisite: None

CISC7298 PROJECT REPORT

Project Report focuses on combining existing academic theories or advanced technologies with an evaluation of a case study or academic project. Students will learn systematic problem-solving process skills, professional research and development practices, and project management skills. The goal of this option is to facilitate the integration of practice with academic research.

Pre-requisite: None

Specialization B: Marketing Analytics

MKTG7010 MARKETING MANAGEMENT

This course seeks to equip students with the key conceptual, analytical and problem solving skills to address marketing problems and decisions. Specifically, it introduces students to various

marketing analyses (customer, competitor and company analysis) and marketing strategies. Tools and methods used in planning and implementing the four Ps (product, price, place and promotion) will be explored. This course integrates theory and practice within the context of organizations operating locally and globally.

Pre-requisite: None

MKTG7030 CONSUMER BEHAVIOR

The purpose of this course is to study the process of consumer decision-making and its determinants, and the resulting implications for marketing strategy. Concepts and theories covered in this course are essential for consumer analysis and the development of effective marketing strategies. A strategic orientation will permeate most facets of this course. At the same time, knowledge of consumer behavior requires an understanding of important theoretical concepts borrowed from fields such as social psychology, consumer psychology, and experimental psychology.

Pre-requisite: MKTG 7010 Marketing Management

MKTG7033 MARKETING ANALYTICS

This course is designed to help students understand the development of marketing data in the big data era and the value of such data in marketing decision making. Students will be introduced the broad range of marketing data available to businesses, ways to gain insights from the data and convert insights into profitable customer acquisition, retention and growth efforts. Important marketing data usages (e.g., customer behavior prediction, customer value evaluation, social listening, etc.) are discussed using examples from different industries. Issues of data privacy and implementation challenges in big data marketing will also be explored.

Pre-requisite: MKTG 7010 Marketing Management

BAGC7011 RESEARCH METHODS

The course provides postgraduate business students with the fundamental analytical skills that they need for their project report, as well as a good understanding of the overall research process. The course guides students through every step of a research project, from getting started to analyzing data and writing a mock project report. It provides enhanced coverage of quantitative methods available for a variety of business topics, and contains demonstrations of the use of statistical software in a wide range of business research.

Prerequisite: None (for students of Master of Science in Data Science (Big Data and Analytics in Marketing))

BAGC7891 PROJECT REPORT

This Project Report gives the students an opportunity to apply the knowledge obtained from their previous studies in data science and their field of specialization. Students will be required to identify existing practical problems in their field of specialization. To develop solutions for the problems identified, they need to conduct detailed literature review, design appropriate research method, gather relevant data, analyze their data using big data analytic techniques, interpret their findings, and finally write up the entire project report.

Pre-requisite: Research Methods, Marketing Analytics [for students of MSc in Data Science (Big Data and Analytics in Marketing)] & FINC7010 Corporate Finance AND FINC7054 Introduction to Modern Financial Technology [for students of MSc in Data Science (Financial Technology)]

Specialization C: Financial Technology

FINC7010 CORPORATE FINANCE

This course offers students a more advanced understanding of important concepts in the field of corporate finance. It covers basic topics including capital budgeting, alternative valuation methods, capital structure decisions, corporate payout policy, securities offering decisions, as well as more advanced topics (optional) such as corporate governance, mergers and acquisitions, and

corporate risk management. The objective of this course is to provide students with essential tools to study more advanced courses in finance.

Pre-requisite: None (for Master of Science in Data Science (Financial Technology))

FINC7026 INTERNATIONAL BANKING AND BANK MANAGEMENT

This course is structured around the microeconomic problems of financial management of banking firms. It focuses on decision making and offers a unique approach to understanding commercial bank management. Topics to be covered include banking trends and competition, performance analysis, liquidity planning, interest rate risk management, credit risk analysis, cost of funds, and capital management. Both domestic and international banking activities will be examined. The objective of this course is to provide the student with the conceptual framework necessary to analyze and comprehend the current problems confronting managers of commercial.

Pre-requisite: FINC7010 Corporate Finance/FINC7011 Managerial Finance

FINC7035 FINANCIAL RISK MANAGEMENT

This course focuses on risk management techniques in multinational corporations and credit risk management. A strand of risk management topics would be covered such as foreign exchange, money market instruments, derivative products, risk exposure of corporations, measurement of exposure, and risk management in financial institutions. The credit risk will discuss various economic and financial factors that affect credit quality of corporations, evaluating corporation's debt servicing ability and their likelihood of default. Topics covered will include business and financial risk analysis, debt covenants, security structures, credit scoring and credit rating models.

Pre-requisite: FINC7010 Corporate Finance

FINC7054 INTRODUCTION TO MODERN FINANCIAL TECHNOLOGY

The financial industry is undergoing profound changes in the past several years. With the arrival of new technologies, financial services firms are increasingly using these new technologies to increase their efficiency, develop new businesses and services, and revolutionize their marketing practices. The lines between financial services and technology firms have also blurred, as we are seeing more and more technology companies venturing into the finance industry, particularly in China.

This course aims to provide you with an overview of FinTech and its implications within the finance industry and beyond. We will review companies in the FinTech industry, their businesses, products, and technologies. We will also cover the basic technologies that power the FinTech revolution, such as Artificial Intelligence (AI), Blockchain (B), Cloud Computing (C), and Big Data (D). We will also discuss FinTech's current status and future trends. After this course, you will have a basic understanding of the FinTech landscape and be ready to explore more about it.

Pre-requisite: FINC7010 Corporate Finance

FINC7060 TOPICS IN DATA ANALYTICS AND FINANCIAL TECHNOLOGY

This course introduces to students the advanced statistical and decision analysis tools. It emphasizes on the applications of data analytics techniques in business practices. Students will learn the intuition behind the methods and build hands-on experiences using Python, which is the most popular programming tool with versatile applications in finance and economics.

Pre-requisite: None

ACCT7060 FINANCIAL STATEMENT ANALYSIS FOR DECISION MAKING

This course aims to demonstrate how financial statements can be reformulated, analyzed and interpreted for decision making. It first identifies information sources that analysts frequently employ in financial statement analysis and examines the steps of the financial statement analysis framework. It then discusses the objective of financial reporting and how financial reporting standards affect security analysis and valuation. The course will cover important tools and techniques used in financial analysis including activity, liquidity, solvency, profitability and valuation ratios, describe the relationships among those ratios and evaluate real life companies using ratio analysis. It also demonstrates the application of DuPont analysis of return on equity, and other ratios especially used in equity analysis and credit analysis. Finally, it provides a

framework for considering potential analyst adjustments that are necessary when comparing companies that use different accounting methods or estimates.

Pre-requisite: None (for Master of Science in Data Science (Financial Technology))

BECO7010 STATISTICS AND FINANCIAL ECONOMETRICS

This course introduces the basic tools with the aid of data for decision making in finance. It covers introductory probability, decision analysis, basic statistics, regression, simulation, linear and nonlinear optimization, and discrete optimization. Computer Programming exercises, cases, and examples, deliver in SAS® (by the SAS Institute Inc.) are drawn from asset pricing, market microstructure, derivatives, and other functions.

Pre-requisite: None

BAGC7891 PROJECT REPORT

This Project Report gives the students an opportunity to apply the knowledge obtained from their previous studies in data science and their field of specialization. Students will be required to identify existing practical problems in their field of specialization. To develop solutions for the problems identified, they need to conduct detailed literature review, design appropriate research method, gather relevant data, analyze their data using big data analytic techniques, interpret their findings, and finally write up the entire project report.

Pre-requisite: Research Methods, Marketing Analytics [for students of MSc in Data Science (Big Data and Analytics in Marketing)] & FINC7010 Corporate Finance AND FINC7054 Introduction to Modern Financial Technology [for students of MSc in Data Science (Financial Technology)]

Specialization D: Data Strategy and Compliance

LAWS7701 DATA APPLICATIONS AND REGULATION IN DIGITAL SOCIETY

The evolution of data science and its applications in a digital society raise various legal and regulatory questions. This course aims to introduce the legal concepts and principles necessary to understand the pertinent rights and obligations as well as compliance requirements in the development and use of data applications. The course will identify the key legal issues facing diverse data applications and technologies and introduce applicable legal and regulatory regimes. The course will examine the scope and limitations of the relevant domestic and international laws governing the data applications within a digital society and in the context of cross-border transactions.

Pre-requisite: None

LAWS7702 BIG DATA ANALYTICS AND COMPLIANCE IN E-BUSINESS

Data analytics is emerging as a fundamental part of strategic planning and decision making in modern businesses. The success of a data-analytics embedded e-business strategy depends not only on proficient analytical models but also on the competence to address challenges and externalities that are beyond the control of individual enterprises. This course is aimed at nurturing the competence to identify and address various legal and compliance requirements impacting relevant data strategies. Legal and regulatory issues facing data applications in e-business including in business-to-business and business-to-consumer sectors and effective means to prevent and resolve related legal disputes will be covered.

Pre-requisite: None

LAWS7703 DATA STRATEGY AND PROTECTION IN HEALTHCARE AND E-GOVERNANCE

The course is designed to introduce students to gain an in-depth understanding of e-governance with an emphasis on regulatory frameworks for data security, information protection, and transparent governance. It examines legal challenges associated with the use of data collected by various smart applications for smart city plans. The course also gives a focused examination of digitalized healthcare and biomedical research, and the regulations that govern them. It

addresses not only privacy and security matters but also other important challenges, such as those related to data quality and data analysis in precision medicine and clinical research.

Pre-requisite: None

LAWS7704 ARTIFICIAL INTELLIGENCE AND COMPARATIVE LAW

Developing effective Artificial Intelligence (AI) applications entails the competence to identify relevant opportunities and challenges and address them strategically. This course aims to explore the nexus between AI and law and introduce contemporary and emerging issues in the field. It will study specific AI applications and identify related legal challenges and compare how key jurisdictions regulate such challenges. The course will cover potential legal risks and liability facing usage of AI and explore precautionary measures to limit liability. Contemporary legal issues in AI including data protection and privacy obligations, Intellectual Property Rights and regulation of algorithms will be comparatively studied.

Pre-requisite: None

LAWS7791 PROJECT REPORT

The Project Report serves the purpose of demonstrating the ability to systematically analyze the fundamental relationship between law and data applications and related strategies in a specific context. Students will identify, study, and critically examine key inter-disciplinary issues arising in the context of a chosen topic or a case study approved by the Faculty. The students may conduct a fundamental or applied research to seek practical solutions to legal and policy challenges facing formulation and implementation of effective data strategies. A faculty member competent in the selected legal field will supervise the project research and finally approve the project report.

Pre-requisite: None

Specialization E: Precision Medicine

HSCI7002 BIOMEDICAL SCIENCES

This course introduces the essential biological knowledge to students with non-biology background in order for them to understand, explain and evaluate the basic concepts of precision medicine. It uses cancer as a model disease to illustrate how precision medicine can provide better, individually tailored healthcare solutions to patients. The course introduces the methods of discovering the causes of cancer, the techniques to perform accurate diagnoses, the mechanisms of cancer therapies, and the different strategies for cancer treatment. In addition, basic knowledge on immunology, microbiology and infectious diseases will be introduced in this course, topics such as “Viruses,” “Bacteria,” “Immune System,” “DNA analysis” will be added to the existing topics.

Pre-requisite: None

HSCI7003 DIGITAL BIO-MEDICINE

This course introduces the knowledge in digital medicine, technologies, and the associated big data and analysis to students with non-biology background, focusing on the public health issues with the global insights. Digital medicine is the convergence of digital technologies (including genomic technologies) with medicine, living, and society to enhance the efficiency of medicine delivery and make medicines more personalized and precise. This course covers high-throughput (HT) genotyping, HT phenotyping, artificial intelligence, big data analysis, public database, proteomics and other omics. The goal of this course is to develop students' understanding of digital medicine and required analytical skills for the exciting possibilities towards creating a new paradigm of precision medicine.

Pre-requisite: CISC7204 Data Science and Data Visualization

HSCI7004 HEALTHCARE ANALYTICS

Healthcare analytics is one of the fastest growing industries in our economy. Healthcare analytics allows for the examination of patterns in various healthcare data in order to determine how clinical care can be improved. This course introduces the essential elements of healthcare analytics to students with non-healthcare background, and provides them with an overview of population

health informatics, clinical informatics, imaging informatics, mobile healthcare and their contributions to precision medicine. The goal of this course is to develop students' understanding of healthcare analytics and analytical skills to comprehend healthcare data.

Pre-requisite: None

HSCI7001 ARTIFICIAL INTELLIGENCE IN MEDICINE

This course introduces the concept of artificial intelligence (AI) in medicine, the associated big data analysis, and analytic programming. Medical AI is the use of algorithms and software to approximate human cognition in the analysis of complex medical data including those in global public health. AI is currently transforming healthcare delivery and is augmenting doctors' roles in medicine. This course covers analytic programming (predominately in R), big data analysis, and application for AI in medicine and global public health. The goal of this course is to develop students' understanding and to confer hands-on analytical skills for AI in medicine on them. It also covers topics in global public health.

Pre-requisite: None

HSCI7998 PROJECT REPORT

An individual project provides the opportunity to plan and execute a significant project of research, investigation or development, and to integrate learning and put the techniques learnt throughout the master programme into practice under an academic supervision. Using large datasets from academia, hospitals, industry or government, students carry out high-level coordinated academic and practical work to solve a real-world problem in the field of biomedical sciences, medicine or healthcare, including collecting and processing real data, designing and implementing data science methods and tools, and applying, evaluating and critically assessing data analysis, visualization and prediction techniques to solve the real problem.

Pre-requisite: None

Specialization F: Computational Linguistics

AHGC7315 LANGUAGE AND LINGUISTICS

This course introduces key concepts and approaches to the study of language and linguistics. It provides an overview, with basic terminology, of the major subfields of linguistics, investigating the nature, history, and structure of language and how language relates to the mind, society, and education. It provides the basis of investigation in subsequent courses in the Computational Linguistics program. Students are encouraged to reflect on their own language experience and apply the theories covered in the course to their own linguistic context.

Pre-requisite: None

CISC7021 APPLIED NATURAL LANGUAGE PROCESSING

This course covers both the fundamental and advanced topics in Natural Language Processing (NLP), which deals with the application of computational models to text data. In this course, the core tasks in natural language processing will be examined, including minimum edit distance, language modelling, N vie Bayes, Maximum Entropy, text classification, sequence labelling, POS tagging, syntax parsing and computational lexical semantics. Modern NLP applications will be explored such as information retrieval, and statistical machine translation. Students will learn how to formulate and investigate research questions on related topics.

Pre-requisite: None

ENGL7022 CORPUS LINGUISTICS

This course will introduce students to the methods and issues involved in corpus linguistics. It aims to demonstrate the practical use of online corpora to explore questions asked by scholars of language, and to address some of the central issues raised by corpus design and analysis. Students will familiarize themselves with the research use of online corpora and the construction and analysis of original corpora using freeware concordance tools. At the same time, the classes will consider various aspects of language analysis concerning lexis and grammar, and questions

of language variation and change.

Pre-requisite: None

AHGC7039 COMPUTER-AIDED TRANSLATION

This course reviews state-of-the-art technology in translation. In addition to Translation Memory, which allows users to leverage existing data, deep learning technologies have allowed Machine Translation to achieve fully automatic translations for some genres of writing. The course will include an extensive practical component using these technologies in addition to exploring assessment of Machine Translation quality, emerging possibilities and issues. In addition to these, the use of the World Wide Web, Web-based translation aids and other applications for producing rapid, localized and high-quality translation are discussed.

Pre-requisite: None

AHGC7303 EVALUATION AND ASSESSMENT OF LANGUAGE USE

This course is an introduction to the field of language assessment. Topics covered in the course include purpose and context of testing, assessing skills and components of language ability, content analysis of test instruments, and statistical analysis of test performance data, and fairness and justice in language assessment.

Pre-requisite: None

CHLL7101 漢語語言學研究方法 METHODS IN CHINESE LINGUISTICS

本課程旨在系統介紹語言學的研究思路、方法和一些重要的語言學理論，指導學生採用科學的工具和方法對漢語進行共時或歷時的系統研究。課程包括語言學研究的一般方法和特殊方法，語言學研究中經常使用的工具性概念，各個語言學流派所採用的分析技術，國內學者建立的語言學理論等內容。

Pre-requisite: None

AHGC7308 SPECIAL TOPICS IN APPLIED LINGUISTICS I

This course is designed to offer visiting scholars, existing or future staff, the opportunity to offer courses in their particular area of specialization. The topic and content of the courses will vary from year to year depending on the availability of expert staff. Examples of specialized topics that may be offered include: data-driven learning, computer-adaptive language testing, automated scoring, corpus-based EAP (English for academic purposes), etc.

Pre-requisite: None

PHIL7101 TOPICS IN SEMANTICS

This course is an introduction to the formal analysis of natural language semantics as situated within the larger domain of linguistics. Students will be introduced to the main goals and methods of formal semantics, with a special focus on some of its core empirical results, and to some mathematical concepts underlying semantic interpretation systems (sets, relations, functions). Topics include: predication, the semantics of quantificational determiners, indexicals, semantic binding, tense, and modality.

Pre-requisite: None

AHGC7398 PROJECT REPORT

A "Project Report" addresses a particular issue in a specific context and may incorporate elements of data collection, data processing, data analysis and data solution. Students demonstrate their ability to reflectively examine a particular context, identify and define an issue in that context, access, summarize, and synthesize current literature relevant to the issue, and develop a justified approach to address that issue. Various linguistics and applied linguistics related topics are acceptable.

Pre-requisite: None

Specialization G: Analytics in Teaching and Learning**EDUC7041 ASSESSMENT AND EVALUATION OF EDUCATIONAL BIG DATA**

This course is designed to introduce graduate students to the application of big data in educational context, including the epistemological underpinnings of data science, in-depth knowledge of data science theories in education, and the methodological nuts-and-bolts in conducting educational evaluation.

Pre-requisite: None

EDUC7042 DATA-DRIVEN APPROACH TO EDUCATIONAL ADMINISTRATION

This course is to introduce prospective data scientists to data management in educational administration. Emphasis is placed on the use and repurposing of data to enhance governance and efficiency of school education as well as to formulate or update relevant policies and administrative measures emerged in response to changing social development or enactment of laws or rules.

Pre-requisite: None

EDUC7043 LEARNING ENHANCEMENT WITH BIG DATA

This course is designed to improve instruction using data. In the digital age, a wealth of data is available for teaching and learning purposes. This course aims to broaden students with the initiatives undertaken to make use of data-driven approaches that can improve the learning process. Students are expected to make use of tools to mine a wide range of learning patterns and behaviors so as to enhance the quality of instruction. They will study, experience and review the theory and practice of existing applications of big data in order to make informed judgment about their educational duties.

Pre-requisite: None

EDUC7044 QUANTITATIVE SOCIAL SCIENCE RESEARCH WITH BIG DATA

This course is designed to be part of the emerging field of quantitative/computational social sciences. The goal is to equip students with data science approach to answer social science questions. This course will introduce principles and skills of quantitative social science research. Students will receive an update of the major tools and ideas used in the field and be guided toward their first data-driven research project throughout this course.

Pre-requisite: None

SSGC7201 DATA CIVIC DATA ACQUISITION AND ANALYSIS

To promote studies using computational methods in social sciences, this course focuses on machine learning techniques and their applications in social sciences. By introducing principal ideas in statistical learning, the course will help students to understand the conceptual underpinnings of methods in data mining, how classical concepts of research design in the social sciences can be implemented in new data sources, and how these new data sources might require social scientists to update their thinking on research design. The course focuses more on the usage of existing software packages (mainly in R) than developing the algorithms by the students. Students will be required to work on projects to practice applying the existing software.

Pre-requisite: None

EDUC7098 PROJECT REPORT

Project Report is designed to encourage students in this program to participate in various projects and practices at different levels relevant to the use of big data and cultivate their abilities in collecting, managing, and processing big data in related areas of education independently. The Project Report should include the purpose, process and outcomes of participation in the project.

Pre-requisite: None

Specialization H: Smart Governance

SSGC7201 CIVIC DATA ACQUISITION AND ANALYSIS

To promote studies using computational methods in social sciences, this course focuses on machine learning techniques and their applications in social sciences. By introducing principal ideas in statistical learning, the course will help students to understand the conceptual underpinnings of methods in data mining, how classical concepts of research design in the social sciences can be implemented in new data sources, and how these new data sources might require social scientists to update their thinking on research design. The course focuses more on the usage of existing software packages (mainly in R) than developing the algorithms by the students. Students will be required to work on projects to practice applying the existing software. Pre-requisite: None

SSGC7202 BIG DATA AND SMART GOVERNANCE

This course is designed to teach students analytical techniques of dealing with open government data and other (usually big) data that are related to smart governance. We will focus on two types of data: text data and geo-spatial data.

Digitalized text represents an important source of data for social scientists. This is particularly true in political science, where a large amount of political information, otherwise difficult to analyze, is embodied in historical and contemporary speeches and documents that can be converted into digitalized text with increasing ease. Another source of text-based data come from online contents. Pre-requisite: None

SSGC7203 ANALYSIS OF MEDIA AND OPINION DATA

This course introduces students to the theories and techniques of data analysis for monitoring and understanding media behavior and public opinion.

While theories of statistics, communication, media effects, and public opinion will be reviewed, the emphasis is on hands-on analysis and presentation of data. The objectives are two-folds 1) facilitate data-based policy making and decision making in government and cooperate settings; 2) facilitate data-based theory building in both applied and academic settings.

Pre-requisite: None

SSGC7204 MAKING SENSE OF SMART GOVERNANCE

Smart Governance is an essence for the development of smart city that stressing on the public-private collaboration for city management through the use of Information and Communication Technologies (ICTs). This course introduces the concept, main theories, and updated studies of smart governance, as well as integrate a course project with several assignments to offer practical skills training. After the first introductory lecture on smart governance, the course covers four key topics of SG: 1) major theories of governance in political science and public administration; 2) the practice of using IOT technologies to design and implement solutions for smart and sustainable governance in the context of China and beyond; 3) experimental social science techniques including survey experiment, field experiment, quasi-experiment (e.g., PSM, DID, RDD, IV), and natural experiment.

Pre-requisite: None

EDUC7044 QUANTITATIVE SOCIAL SCIENCE RESEARCH WITH BIG DATA

This course is designed to be part of the emerging field of quantitative/computational social sciences. The goal is to equip students with data science approach to answer social science questions. This course will introduce principles and skills of quantitative social science research. Students will receive an update of the major tools and ideas used in the field and be guided toward their first data-driven research project throughout this course.

Pre-requisite: None

SSGC7298 PROJECT REPORT

Project report gives the students an opportunity to apply the knowledge obtained from their previous studies in data science and field of specialization based on their interest. Students,

guided and supervised by individual instructor on a person-to-person basis, are required to independently and individually complete a research project on smart governance that subject with a report of no less than 4,000 words in length. Mini conferences would be organized by the academic year-end and students were required to deliver their projects which would be graded. Pre-requisite: None

Master of Science - Cognitive Neuroscience

CCBS7001 PRINCIPLES OF NEUROSCIENCE

Introduction to the mammalian nervous system with emphasis on the structure and function of the human brain. Topics include the function of nerve cells, sensory systems, control of movement and speech, learning and memory, emotion, and diseases of the brain. No prerequisites, but knowledge of biology and chemistry at the high school level is assumed. The course also aims to have students to know the basic knowledge in functional aspects of nervous system organization, psychiatric and neurological disorders and molecular and cellular neurosciences.

Pre-requisite: None

CCBS7002 COGNITIVE NEUROSCIENCE

This course provides an introduction to the neuroscientific study of cognition. Topics surveyed in the course include the neural bases of perception, attention, memory, language, executive function, emotion, social cognition, and decision making. In covering these topics, the course will draw on evidence from brain imaging (fMRI, EEG, MEG), transcranial magnetic stimulation, electrophysiology, and neuropsychology. The course will also consider how knowledge about the brain constrains our understanding of the mind.

Pre-requisite: None

CCBS7003 BRAIN STIMULATION AND NEUROIMAGING TECHNIQUES

This course is one of the core introductory courses of the Programme that give an overview of the methodologies currently in place to study cognition and brain function based on neuroimaging and brain intervention techniques. Methods such as functional near-infrared spectroscopy (fNIRS), electroencephalography (EEG), magnetoencephalography (MEG), transcranial magnetic stimulation (TMS), Transcranial Direct Current Stimulation (tDCS) and Transcranial Alternating Current Stimulation (tACS), and others will be respectively introduced, which can provide the students with new insights into the structure and function of human brain. Nature and origin of electric, magnetic, light responses of human brain will be discussed throughout the course.

Pre-requisite: None

CCBS7098 PROJECT REPORT

A project report is required for all students completing the UM CNS Program. By the nature of this program, the performance of projects cuts across departmental boundaries, with faculty from neurobiology, psychology & neuroscience, radiology, psychiatry, biomedical science, engineering, neurology, biology, and philosophy. Thus, the program explicitly involves collaboration between FAH, FSS, FED, ICMS, FHS, and FBA. Students will join individual labs and be guided by Professors in different faculties. By doing a project, students will synthesize and integrate knowledge from their course work, apply it to a particular topic area, and communicate their ideas and findings through a scholarly written thesis. Additionally, students are encouraged to publish their thesis in academic journals.

Pre-requisite: None

CCBS7004 MAGNETIC RESONANCE IMAGING

In this course, basic MR-physics, spatial encoding, basic pulse sequences, MR image contrast in MR, MR hardware, practical considerations, general clinical applications of MRI, perfusion and diffusion MRI, and clinical MR spectroscopy will be introduced. In addition, introduction to functional MRI (fMRI) will provide students with the basic and practical principles underlying fMRI

of the brain. Students will complete the course having an in-depth introduction to neurophysiological mechanisms that couple magnetic resonance phenomenon to task- or stimulus dependent changes in neuronal activity and cerebral metabolism.

Pre-requisite: None

CCBS7005 COMPUTATIONAL COGNITIVE NEUROSCIENCE

This course will introduce a collection of computer simulation techniques useful for investigating a variety of cognitive phenomena involving perception, action, learning, and memory. This course is formatted to support interdisciplinary inquiry, with the backgrounds of students expected to vary broadly across the range of such disciplines as computer science, cognitive science, psychology, and neuroscience, as well as other related fields. The learning of both classic and contemporary methods for cognitive modeling will be facilitated by readings, presentations by class participants as well as by the instructor, homework assignments, a term project, and ample interaction and discussion between attendees.

Pre-requisite: None

CMED7018 BIO-STATISTICS

This course is designed for master students to understand the basic bio-statistics theory and skills. The course will also teach students how to use the most advanced bio-statistics software.

Pre-requisite: None

EDUC7402 PSYCHOLOGY OF LEARNING

This course introduces psychological theories pertinent to the learning of students, and current views of how people learn. Particular focus is placed on linking theories to classroom situations. Topics included are: behavioristic, information- processing, constructivistic, and humanistic theories of learning.

Pre-requisite: None

EDUC7503 ADVANCED EXERCISE PHYSIOLOGY

The programme introduces the nature of human body and examines its biological nature to the teaching and learning of physical education. Students will have chances to focus on human anatomy, exercise physiology and its biomechanics principles to development of movement exercises. The programme also aims to promote an understanding of the variety of laboratory and field skills used in the biomechanical assessment of the exercising human. The purpose is to enhance human performance growth in physical education and sport through the knowledge of body science.

Pre-requisite: None

EDUC7403 ADVANCED DEVELOPMENTAL PSYCHOLOGY

This course focuses on an integrated study of human development across the life span with implications for educational psychology. It aims at familiarizing students with current state of knowledge and major theories of human development with particular emphasis on childhood and adolescence. The interrelationship among biological, social-psychological, and educational factors that influence human development will be examined. In particular the influence of Chinese culture and context on development during the childhood and adolescence will be discussed.

Pre-requisite: None

AHGC7400 CLINICAL LINGUISTICS

This course provides a systematic study of linguistic theories, methods and findings concerning the description of natural language, Language acquisition and learning, intelligibility, normal and impaired speech, language developmental and acquired disorders. Covering areas of human speech development, production and perception, prosody, language variation and bilingualism, students will be able to understand how does brain process language, the effects of neurological disorders and brain injury on language use. They will become familiar with the tools most often used for language, speech and voice analysis, such as FEELtrace (evaluating dynamics of speech), Hoarseness Diagram (properties of normal and pathological voices) and PRAAT (speech

and phonetics analyses).

Pre-requisite: None

ENGL7004 PSYCHOLINGUISTICS

This course introduces students to the biological, neurological and cognitive bases for language, language development, multilingualism and second language acquisition, and language disorders. It will also deal with some aspects of natural language processing in relation to certain areas of linguistic analysis: phonology, the lexicon, morphology, syntax, semantics, and discourse.

Pre-requisite: None

AHGC7302 SECOND LANGUAGE ACQUISITION

This course will examine current theories of second language acquisition, in relation to the acquisitional process, developmental stages, and external factors conditioning acquisition, including the effects of the first language, age of acquisition, motivation, instructional context and the nature of input. Topics discussed will include the critical period hypothesis, cross-linguistic influences, individual differences such as cognition, affect and language aptitude.

Pre-requisite: None

ENGL7005 SOCIOLINGUISTICS

This course introduces key concepts and approaches to the sociolinguistics of bilingualism and multilingualism, with a particular focus on Chinese communities such as Macau, Hong Kong, Singapore, Taiwan and other Chinese cities. Topics covered include language use in bilingual/multilingual communities, language choice, language maintenance and shift, language attitudes and language ideologies, and language in globalization. Students are encouraged to reflect on their own bilingual or multilingual experience to apply the theories or models critically in their own social contexts. Not only classic papers but also current research articles will be discussed in the hope of providing the necessary background for students who consider writing their MA theses on topics of societal bilingualism or multilingualism.

Pre-requisite: None

ECEN7021 BIOMEDICAL TRANSDUCERS AND INSTRUMENTS

This essentially interdisciplinary course aims to introduce students the basic principles & techniques for biomedical transducers and instrumentations. This course covers sensing and measurement for qualitative description and quantitative analysis in biomedical engineering field mainly on noninvasive techniques.

Pre-requisite: None

CISC7026 INTRODUCTION TO DEEP LEARNING

This course introduces Deep Learning (DL) basics, methods, and algorithms, with hands-on practice using modern DL library tools (e.g., PyTorch). After the introductory lecture on deep learning, the course first covers the fundamental of neural networks, including universal approximator theory, learning neural networks, backpropagation, optimization, stochastic gradient descent, and tricks on training neural networks, and then focuses on typical neural network architectures, including Convolutional Neural Networks, Recurrent Neural Networks, and Generative Neural Networks.

Pre-requisite: For student of MSc Cognitive Neuroscience to take this course, basic knowledge is required in 1) Math, in particular, linear algebra, and 2) Programming skills with python

CISC7013 PRINCIPLES OF ARTIFICIAL INTELLIGENCE

Overview of Traditional Artificial Intelligence Principles: Problem Solving, and Logical Agent. Overview of Modern Artificial Intelligence Principles: Machine Learning, Decision Tree, Neural Networks, Support Vector Machines, and Introduction to Deep Learning.

Pre-requisite: None

CISC7202 TOOLS FOR MACHINE LEARNING

This course introduces Machine Learning (ML) basics, methods, and algorithms, with a significant amount of hands-on practice using modern software tools (e.g., Scikit-learn and PyTorch). After the first introductory lecture on machine learning, the course covers four key topics of ML: 1) regression techniques including linear regression, ridge and lasso regression, nearest neighbor and kernel regression; 2) classification techniques including logistic regression decision trees, boosting and bagging, SVM and Naïve Bayes; 3) clustering techniques including k-means, hierarchical clustering, DBScan, and mixture models; and 4) deep learning techniques including neural network basics, convolutional neural networks, and generative neural networks.

Pre-requisite: For student of MSc Cognitive Neuroscience to take this course, basic knowledge is required in 1) Math, in particular, linear algebra, and 2) Programming skills with python

PSYC7708 BEHAVIORAL ADDICTION

This course aims to be informative and practical. It focuses on developing learners' overall knowledge on the history, prevalence, theories, research, assessment, and interventions of different types of behavioral addiction, including gambling disorder, gaming disorder, internet/smartphone addiction, compulsive eating and buying, and workaholism. Specific attention will be paid to their biological, neurological, and cognitive features and mechanisms. Students will learn to identify different types of risk factors for the development and maintenance of behavioral addiction. Through team project and experiment participation, students will have hands-on experience of theory application and use of common assessment tools in the Chinese context.

Pre-requisite: None

IRTM7036 CROSS CULTURAL GAMBLING PSYCHOLOGY

This course focuses on the application of psychological knowledge to gambling behaviors. Topics include motivations, decision-making strategies, cognitive heuristics and biases, group and social influences, and pathological addictive gambling behaviors. Students will be able to better formulate organizational strategies for integrated resorts and enhancing both their communication and analytical skills.

Pre-requisite: None

CCBS7006 NEUROECONOMICS

Neuroeconomics is the study of human behavior, decision making in particular, by adopting the value-based approach in economics and through the use the neuroscientific methodologies. Behavioral economics is a confluence of economics, psychology and neuroscience. The course will start with some normative theory from economics. Yet decision makers do not behave "rationally" as required by the classical economic theory. These psychological insights will be discussed based on the theoretical frameworks in behavioral economics such as behavioral decision theory and behavioral game theory. We will then survey the neuroscientific studies motivated by these theories.

Pre-requisite: None

Students who take Project Report are required to take 7 courses from the following List of Required Electives to obtain 21 credits; students who take Internship and Report are required to take 8 courses from the following List of Required Electives to obtain 24 credits.

List of Required Electives for MSc in Microelectronics

IMEL7001	Integrated Circuits Research Methodology and Applications
IMEL7002	Digital Integrated Circuits
IMEL7003	Data Converter Integrated Circuits
IMEL7004	Flexible Alternating Current Transmission System
IMEL7005	Power Management Integrated Circuit Design
IMEL7006	Special Topics in Biomedical Engineering
IMEL7007	High-Frequency and High-Speed Wireless/Wireline Integrated Circuit
IMEL7008	Analog IC Design Methodology
IMEL7009	Machine Learning and Analog Accelerators
IMEL7010	Interface Microelectronic Circuits and Sensors Design
IMEL7011	Microelectronics for the Internet of Things

Course Description

IMEL7000 MICROELECTRONIC CIRCUIT DESIGN

This course is designed to discuss on fundamental principles for analysis and design of analog circuits and the practical considerations in integrated circuit design. Students will learn how to design, analyze and evaluate amplifiers as an essential integrated circuit building block. Advanced amplifiers/analog circuit layout techniques with case studies will also be introduced. By providing hands-on practice with one real advanced VLSI CMOS process using industrial EDA tools, students can have a deep understanding on how to design practical integrated circuits and make real world engineering tradeoffs. This course will be assessed with assignments, presentations and projects.

This course enables students to have:

- Apply the essential knowledge in analog circuit design.
- Design the common analog circuit building blocks with practical considerations.
- Design and simulate analog circuits using industrial simulation tools with real-world CMOS processes.

Pre-requisite: None

IMEL7001 INTEGRATED CIRCUITS RESEARCH METHODOLOGY AND APPLICATIONS

This is an introductory course of integrated circuits research methodology and applications. It aims to aid the students to build up an internationally competitive research goal by understanding the state-of-the-art, trends in applications and technologies, and systematically formulate a feasible schedule, with available resources, to approach the research goals. Preparation of related academic publications and system-level case studies of advanced integrated circuits and systems will be organized for the students to digest and present them. The course aims to provide the students a set of essential engineering skills for research in the integrated circuits area.

This course enables students to have:

- Apply the essential knowledge on starting integrated circuits research.
- Identify the trends of integrated circuits for practical applications.
- Recognize the impact of integrated circuit solutions in a global and societal context.

Pre-requisite: None

IMEL7002 DIGITAL INTEGRATED CIRCUITS

This is an introductory course in digital integrated circuits. It covers topics from MOS inverters and different logic family. The student will learn how to model interconnect wires and design optimization with respect to a number of metrics: cost, reliability, speed and power. This course also covers sequential and dynamic logic circuit design, timing considerations, and clocking approaches, as well as design of large system blocks, including memories, such as D-flip-flop and SRAM. This customized course from bottom-up based, which starts from the fundamental techniques for the design and analysis of digital circuits. Then, it provides a detailed understanding of basic logic synthesis and analysis algorithms, and to enable students to apply this knowledge in the design of digital systems and EDA tools. The course aims to give a basic idea of the digital integrated circuit design. The students will have a hands-on experience on combinational circuit optimization (two-level and multi-level synthesis), sequential circuit optimization (state encoding, retiming), timing analysis, testing, and logic verification through the lab work.

This course enables students to have:

- Apply the essential knowledge in digital circuit design both for custom and autogeneration schemes.
- Apply common digital circuit building blocks, such as logic gates, adder and SRAM, with practical considerations.
- Design and simulate digital circuits and digital standard cells using industrial simulation tools with real-world CMOS processes.

Pre-requisite: None

IMEL7003 DATA CONVERTER INTEGRATED CIRCUITS

This course will provide an introduction to the various type of Data Conversion System. The performance characterization of Data Converters will be presented, and various type of data converters (including Analog-to-Digital and Digital-to-Analog) will be discussed. This course can be served as the beginning course in the field of Data Conversion and Signal Processing in the area of Analog IC Design.

This course enables students to have:

- Recognize and analyze the definitions of performance parameters for data converters, in datasheet and research papers.
- Design the various types of data converters.
- Implement the systems above using EDA tools widely adopted in IC industries.

Pre-requisite: None

IMEL7004 FLEXIBLE ALTERNATING CURRENT TRANSMISSION SYSTEM

The Flexible Alternating Current Transmission System and Distribution Flexible AC Transmission System (FACTS/DFACTS) are a new converging technology based on the Power Electronics, Control Theory and Power System for revolution of ever more efficient control and better utilization of power and energy in the existing systems. The FACTS offers an opportunity to enhance controllability, stability and power transfer capability of AC transmission systems with fastest control speed. DFACTS is the extended modern technique of FACTS to focus on the Custom issues or power line conditioning in the distribution site as well as the Information Technology's Electricity Issues.

This course enables students to have:

- Recognize the basic concepts, fundamental operational principles, advantages, and disadvantages of different FACTS/DFACTS devices.
- Identify the control strategies of some selected FACTS/DFACTS devices.
- Present the operation principles of selected FACTS/DFACTS devices.

Pre-requisite: None

IMEL7005 POWER MANAGEMENT INTEGRATED CIRCUIT DESIGN

This course starts from a single transistor, with introductions on transistor fabrication and electrical characteristics. Then, single-stage analog amplifier will be analyzed, design and analyses of two-stage amplifier will be discussed. After we know the analog integrated circuit (IC) design basics, we will learn the basic components of power management ICs: low-dropout regulators, inductor-based and switched-capacitor DC-DC converters. Last but not least, wireless power transfer circuits and systems will be briefly introduced.

This course enables students to have:

- Apply the essential knowledge in power management integrated circuits design.
- Design and simulate the power management ICs using EDA tools with the CMOS process.
- Present the design project results both orally and in IEEE-style reports.

Pre-requisite: None

IMEL7006 SPECIAL TOPICS IIN BIOMEDICAL ENGINEERING

This course is an introductory course on multidisciplinary topics covering microelectronics, biomedical engineering, and digital microfluidics. As a special topic course, it will focus on the principles and biomedical applications of digital microfluidics, which utilizes electronic signal to manipulate liquid droplets on an array of micro-electrodes. The course also covers the introduction of the fabrication technology in clean room related to MEMS and soft-lithography. The coating and etching techniques on silicon wafers or glass chips will be introduced and practiced in this course.

This course enables students to have:

- Introduce state-of-the-art knowledge in the development of biomedical engineering.
- Design microfluidic chips and implement chips into microfluidic systems, including PDMS-based channel microfluidics and electronic-based digital microfluidics.
- Apply microfluidic systems in biomedical applications.

Pre-requisite: None

IMEL7007 HIGH-FREQUENCY AND HIGH-SPEED WIRELESS/WIRELINE INTEGRATED CIRCUIT

This is an introductory course in the high-frequency and high-speed systems and circuit of both wireless and wireline tailored for ECE students. It covers topics from basic circuit techniques in the data path of both wireless and wireline, such as low-noise amplifier, mixer, linear equalizer, non-linear equalizer, automatic gain control amplifier, clock and data recovery circuit, to basic circuit techniques in the clock path, for example, PLL, VCO and divider. Also, we brief more recent techniques such as non-contact communication and RF+BB communication with special attention to hardware aspects and wireline applications. The course aims to offer students a set of modern wideband system and circuit solutions as well as the basic ideas and intuition behind, with more emphasis on hands-on experience through practical examples such as high-frequency and high-speed circuit implementation and case studies with Cadence/MATLAB.

This course enables students to have:

- Apply the essential knowledge of high-frequency and high-speed systems and circuits in both wireless and wireline designs.
- Identify the common wireless/wireline circuit building blocks with practical considerations in the data and clock paths.
- Design and simulate high-frequency and high-speed circuits using industrial simulation tools with real-world CMOS processes.

Pre-requisite: None

IMEL7008 ANALOG IC DESIGN METHODOLOGY

This course provides the necessary systematic approach methodology in generic analog IC designs. The topics covered include the technique in systematic method in analysis and design of the amplifiers and opamps, such as using the scaled current and multiplier techniques, the impedance rules-of-thumb, and layout-oriented amplifier design techniques. Advanced layout techniques in detail, the analog IC simulations methodology, etc. will be covered. Project-based evaluations will be the primary assessments for the students' performance.

This course enables students to have:

- Recognize the systematic design approach on how to design amplifiers and opamps.
- Explain the theories for simulations.
- Implement master a practical circuit design project.

Pre-requisite: None

IMEL7009 MACHINE LEARNING AND ANALOG ACCELERATORS

This is an introductory course in machine learning tailored for IME students. It covers the topics from classification, regression and statistical signal processing, to more recent techniques such as neural network and deep learning. It also covers the analog approximate computing integrated circuit design considerations for acceleration purpose. The course aims to offer students the fundamental concepts in the advanced artificial intelligence theory with emphasis on hands-on experience through practical examples such as intelligent hardware system implementation and case studies with MATLAB/Python. The verified algorithm can be further implemented on an FPGA for applications such as image/audio recognition.

This course enables students to have:

- Apply the essential knowledge in machine learning and deep learning.
- Design analog accelerators with practical circuit considerations.
- Design and verify neural networks for image/audio classification problems using MATLAB/Python.

Pre-requisite: None

IMEL7010 INTERFACE MICROELECTRONIC CIRCUITS AND SENSORS DESIGN

The sensors and their interfaces with the circuits are important part of the electronic devices. They capture vital information from the real world. This course covers the design of sensors and

interfacing circuits in CMOS process. The student will learn to design the sensors for different sensing purposes and their front-end interfaces to process the acquired signals at both system- and circuit-level. Different design considerations such as noise, power consumption, distortion/nonlinearity will be discussed. Fabrication of the micro-electro-mechanical systems and their integration with the CMOS integrated circuits will also be covered.

This course enables students to have:

- Design fundamental building blocks in the CMOS process for signal readout and sensing systems.
- Implement different sensing elements (thermal, capacitive, resistive, etc.) in the CMOS process and discover their potential applications.
- Simulate the sensing circuits and systems in the CMOS process using simulation tools and realize their limitations.

Pre-requisite: None

IMEL7011 MICROELECTRONICS FOR THE INTERNET OF THINGS

As enabled by the powerful technology, microelectronics have become essential in our daily lives. They are also used in a wide range of fields such as healthcare, environmental monitoring, robotics or entertainment etc. This introductory course in microelectronics is tailored for the Internet of Things (IoT), which teaches how to use microelectronic circuits interacting with the environment through sensors and communicate wirelessly with the other devices. It covers topics from evaluation and implementation of sensor interface, data conversion, signal processing and device communications. This customized course from bottom-up based, which starts from introducing the fundamental building blocks in microelectronics for the IoT. Then, followed by system and architectural interface considerations. Finally, the students have chance to realize a basic IoT system based on available microelectronic module. The course aims to give a basic idea of the key microelectronic building blocks for the IoT application. The students will have a hands-on experience through practical design examples and case studies with available microelectronic module.

This course enables students to have:

- Apply the essential knowledge in basic building blocks and system of the Internet of Things (IoT) system.
- Introduce practical considerations of IoT systems, especially emphasized on sensing and data communication.
- Design and verify the various IoT systems with existing modules.

Pre-requisite: None

IMEL7990 THESIS

An independent and original research study under the supervision of a faculty staff member. An academic thesis is a scholarly written document of a piece of original research on a particular topic in consistent with every detail of research methodology. In general, the study could result in a technical publication or a presentation at a professional meeting.

This course enables students to have:

- Apply knowledge and recognize specialist topics in microelectronics research.
- Design the integrated circuits and conduct research.
- Create innovative circuit and system techniques in the development of microelectronic integrated circuits.
- Use the computer-aided design and analysis techniques appropriate to microelectronics engineering.

Pre-requisite: None

IMEL7997 INTERNSHIP AND REPORT

An independent project carried out under the supervision of a faculty staff member and a project manager in industry. Internship training will be carried out at a selected industry.

This course enables students to have:

- Apply knowledge and recognize specialist topics in microelectronics engineering.

- Design the integrated circuits and conduct engineering projects.
- Use the computer-aided design and analysis techniques appropriate to microelectronics engineering.
- Show more application-oriented project experiences in microelectronics through an industrial internship project.

Pre-requisite: None

IMEL7998 PROJECT REPORT

An independent project carried out under the supervision of a faculty staff member.

This course enables students to have:

- Apply knowledge and recognize specialist topics in microelectronics engineering.
- Design the integrated circuits and conduct engineering projects.
- Use the computer-aided design and analysis techniques appropriate to microelectronics engineering.
- Show more application-oriented project experiences in microelectronics through an engineering project.

Pre-requisite: None

Residential Colleges

Residential Colleges

The Residential College (hereinafter referred to as “the College”) system at the University of Macau is a comprehensive community-based educational platform that embodies the University’s 4-in-1 education model and student-centered philosophy of whole-person education. The College system works in conjunction with faculties, institutes, Student Affairs Office, and Office of Sports Affairs in a synergistic manner to foster student development. The core focus of the College system is to provide undergraduate students with an experiential curriculum designed to promote whole-person education, enabling them to position themselves as individuals with firm roots in Macao, while at the same time being committed to participating in the development of the Greater Bay Area. In this way, students are empowered to not only integrate themselves into national development but also reach out to the world. The College system cultivates students to become exemplary citizens with affection for home country. College education aims to enhance the qualities and competencies of students in terms of responsible citizenship, global competitiveness, knowledge integration, teamwork and collaboration, service and leadership, cultural engagement, and healthy lifestyle. In order to develop these seven competencies in students, College education offers five major experiential education measures, including activity learning, communal meal participation education, academic support, RC courses and pastoral care.

Students from different academic disciplines live together in colleges, creating a stimulating learning environment in which they learn from each other, broaden their intellectual horizons, and communicate and work with people of different backgrounds and cultures. The educational environment within the College system provides opportunities for the active participation of students in the preparation and planning of activities. Students not only participate in these activities but also play an active role in organizing and promoting College education. Through their involvement in different stages and experiences, from planning to feedback, students have the opportunity to showcase their strengths and enhance their competencies. There are currently ten colleges in UM, namely Cheong Kun Lun College, Chao Kuang Piu College, Choi Kai Yau College, Cheng Yu Tung College, Henry Fok Pearl Jubilee College, Lui Che Woo College, Ma Man Kei and Lo Pak Sam College, Moon Chun Memorial College, Shiu Pong College, and Stanley Ho East Asia College.

For further details of RC education system, please go to RC website: <https://rc.um.edu.mo/>

Student Life

Student Life

The Way to UM - New Student Orientation Programme

The Orientation Programme is designed to provide students with a dynamic and informative experience, helping students adapt to the University learning environment, plan their university life, and develop essential skills for success. Through our programme, students will set a foundation for a rewarding university experience at UM.

Psychological Counselling Service

Psychological Counselling Service aims at enhancing students' self-understanding and personal development, empowering students to cope with their issues, facilitating their adjustment to university life, and assisting them in making healthy life changes. The service provides individual and group counselling to students according to their needs, in areas such as interpersonal relationship, self-esteem, self-awareness, stress management, emotional management, adjustment to campus life, etc. All counselling information is kept strictly confidential.

Social Work/Counselling Service in Residential Colleges

Social Work/Counselling Service aims to enhance students' whole person education and development. Based in the residential colleges, social workers/counsellors provide consultation and organize activities to foster students' adjustment and growth. Social workers/counsellors will also refer students to appropriate community resources if necessary.

Disability Support Service

Disability Support Service aims at providing appropriate resources to allow each student with disability to have an equal opportunity in education, university life activities and service at the University of Macau. Students with disabilities include those who have physical, visual, hearing, speech, learning, and psychological impairments which substantially limit their learning and/or activities of daily living. The services are tailor-made to meet the individual needs of students with documented permanent or temporary disabilities.

Smart Point Scheme

Smart Point (SP) is an incentive scheme that encourages students to participate in major activities in the University, thereby broadening their horizons and enhancing their sense of belonging to UM. The more Smart Points (SP) students accumulated, the more chances they are selected to participate in the Summer Programme with a subsidy up to Mop 15,000 or 70% of the total cost.

Whole Person Development Award Programme

The Whole Person Development Award Programme encourages students to participate in different extracurricular activities, cultivating their balanced development in the 7 competencies (Responsible Citizenship, Global Competitiveness, Knowledge Integration, Teamwork and Collaboration, Service and leadership, Cultural Engagement, Healthy Lifestyle). A total of 22 scholarships of MOP5,000 each are available for students with the most outstanding performance in the programme.

Sports Activity

In order to promote sports culture and healthy living on campus, a wide range of sports activities (Orientation Sports Activities, Sports Fair, Sportswear Day, Sports Fest, Campus Run, National Day Happy March and Happy Walk etc.), sports interest courses (Aerial Yoga, Kendo, Kickboxing, Lawn Bowling, Rope Skipping, Salsa Dance, Swimming, Taekowndo, U-Bound, Wing Chun and Yoga etc.) are being organized and co-organized by Office of Sports Affairs.

Alumni Mentorship Scheme

The scheme aims at providing opportunities for students to interact with and learn from alumni.

Alumni will act as mentors to share their life experiences, successful stories in academic study and career development.

Corporate Experience Scheme

In order to provide opportunities for students to understand the industry development, work environment and employment market of different industries, the Career Development Centre organizes corporate visits and tea sessions for students to interact with professionals from various sectors.

Career Advising Service

Students can make appointments for career advising, mock interviews and resume review service in the Career Development Centre.

Career Interest Assessment Workshops

The workshops aim at helping students to better understand their occupational interests and characteristics through self-exploration activities and career interest assessments, so students can make more informed decisions about their career development.

Career Training Workshops

The training workshops aim at enhancing students' skills in job hunting and increasing their competitiveness in career development.

UM Student Job-hunting Platform

The Career Development Centre liaises with employers and assists students in job searching. The UM Student Job Vacancy E-system is an electronic platform for such function. Each year, the Centre organizes Career & Internship Fair and Recruitment Talks, inviting companies and organizations from various sectors to provide students with a broad perspective of the job market, employment and internship opportunities.

Internship

The Career Development Centre arranges internship to assist students in obtaining practical experience and skills related to their studies and establish positive contact with prospective employers.

Preparation Courses on Graduate Admission Tests

The courses aim at assisting students to prepare for graduate school admission tests and enhancing their confidence and skills when taking the tests. The courses include TOEFL, IELTS, GRE and GMAT.

Tea with Professors

The Career Development Centre invites professors from different faculties to meet students in small groups over tea, giving students guidance and advice on further study and career matters.

Further Study Experience Sharing Sessions

Professors from different faculties and outstanding alumni will share their further study experiences in the sharing sessions, including how to select graduate schools and programmes, as well as to prepare for admission. Students can learn from their experiences and success in further study.

Further Study Advising Service

The Career Development Centre provides further study advising services that cover advisory sessions, resume and personal statement review to assist students in graduate study preparation. The Centre also connects students with alumni through the UM Alumni Online to assist students in getting first-hand information on overseas further studies and life as postgraduates.

Further Study Talks

Students can learn up-to-date information about further study in the talks, such as postgraduate programmes overseas and scholarship opportunities. The Career Development Centre also organizes overseas graduate programme introduction sessions in which representatives from top universities will share their admission information.

Further Study Workshops

The workshops aim at enhancing students' skills and competitiveness in the graduate school admission application.

Student Insurance

The Student Affairs Office (SAO) is responsible for the arrangement of personal accident insurance, travel insurance and medical insurance for students.

The UM medical insurance is mandatory for all registered students, unless exemption is approved. The insured period starts from the registration day to 31 July 2025 and covers out-patient visits and hospitalization benefits. For further information about the UM Medical Insurance Scheme, Waiver Guidelines and Exemption Application, please visit <https://srs.sao.um.edu.mo/medical-insurance>.

Student Caring Service

The Student Affairs Office (SAO) provides special assistance to students who are in need. Upon receiving report from the responsible unit or concerned individual, SAO will immediately contact the concerned student and provide him/ her consultation to assist him/ her to overcome difficulties.

Non-local Student Service

In order to help new non-local students adapt to the new environment, the Student Affairs Office (SAO) provides pick-up service for them, arrange them to do medical check and apply for first Stay Permit at the beginning of each academic year.

Financial Aid

The Student Affairs Office (SAO) provides financial aid and related consultation to students in need. Students with financial difficulties may approach SAO to apply for Tuition Fee Installment and seek advice on financial aid resources.

Campus Training Programme

Campus Training Programme (CTP) provides students with opportunities to apply knowledge into practical work. Students can utilize their spare time to gain real working experience through the "on-the-job" training provided by the Student Affairs Office as well as the participation at university activities. There are four streams of programme including office administrative trainees, masters of ceremony, activity ambassadors and social media planners. It aims to enhance students' personal competitiveness, and build up their sense of belonging to the University and the society. To recognize trainees' hard work, awards will be presented to the trainees with outstanding performance every academic year. Outstanding trainees will also be nominated to the summer programme with subsidy.

Stage Management Programme

Stage Management Programme (SMP) aims to provide practical skills and on-the-job training to interested students during their study, so that they can gain more valuable working experience, professional skills and improve their competitiveness. Students are trained with technical skill for stage management including stage set up, backstage coordination, video, audio and lighting control and theatre management at the Student Activity Centre.

Student Leadership Training Programme

Student Leadership Training Programme (SLP) aims to recruit potential students from different

majors and residential colleges, equip them with soft and hard skills to be future leaders. By offering them a series of workshops, theme-based projects, exchange tour, etc., members are set to contribute to the community with their creativity and enthusiasm. Outstanding members will be awarded the "Outstanding Award" in the annual UM Student Award Ceremony. Sponsorship and nomination to Summer Programme and exchange trips will also be offered to excellent members.

Summer Exchange Programme

Students can participate in various Summer Exchange Programmes in Australia, Austria, Belgium, Canada, China, France, Germany, Greece, Hungary, Israel, Italy, Japan, Korea, Malaysia, Netherlands, Norway, Poland, Portugal, Singapore, Spain, United Kingdom and United States to enhance their English proficiency. At the same time, they can enrich cultural experience and sensitivity by interacting with other international students and visiting famous landmarks in the exchange countries.

UM Volunteer Programme

UM Volunteer Programme (UMVP) aims at supporting local volunteer needs, promoting a caring culture, spreading the spirit of caring and dedication to the local community, and enhancing our students' cohesion and sense of belongings to UM and Macau thru different kinds of visit and community activities.

Postgraduate House

The SAO manages the Postgraduate House (PGH), which offers accommodation and living services to postgraduate students (mainly non-local and exchange students).

SAO strives to create a "FISH" (FRIENDLY, INTELLECTUAL, SMART and HEALTHY) environment for the residents in order to enrich their residential life, broaden their horizons, and assist them to develop various skills and abilities.

The PGH launches the below programmes and activities to foster the FISH environment:

- Dean of Students' Tea Series
- Floor Activities
- PGH Fellow System
- PGH House Tutor Programme

Locker Rental Service

SAO provides locker rental service for students. A total of 2283 lockers are located at the Central Teaching Building and different faculty buildings. The rental period begins in August and students need to apply it online. The relevant fee will be paid via "GovPay" at the online system.

Sports Teams and Performing Teams

Sports Teams and Performing Teams are managed by Office of Sports Affairs, with the aim to facilitate student-athletes to soar higher performance in sports; to develop student-athletes' essential attributes; to develop global outlook through various competitions / performances and exchange programmes; to nurture our student-athletes not only in sports excellence but also all-round attributes (such as team spirit, leadership, inter-personal skills, global outlook, sportsmanship, etc).

The University offers regular trainings, team members will represent the University to participate in competitions and exchange activities. Member recruitment will be held at the beginning of each academic year, all students are welcome to join the member selection. Currently, there are 17 Sports Teams and 2 Sports Performing Teams, including:

- Badminton Team
- Men's Basketball Team
- Women's Basketball Team
- Cheerleading Team
- Dragon Boat Team
- Dragon and Lion Dance Team

-
- Fencing Team
 - Karate Team
 - Korfball Team
 - Martial Arts Team
 - Rock Climbing Team
 - Men's Soccer Team
 - Squash Team
 - Swimming Team
 - Table Tennis Team
 - Tennis Team
 - Track and Field Team
 - Men's Volleyball Team
 - Women's Volleyball Team

Activities on National and Regional Education, Innovation and Entrepreneurship

To be in line with the youth education policy of the Macao S.A.R. government, SAO organizes various student activities to enhance students' knowledge on national affairs as well as the development of the Guangdong-Hong Kong-Macao Greater Bay Area and Macao S.A.R.

National Flag Team

The National Flag Team (NFT) is the only military uniformed team in the University of Macau, which aims at promoting national flag raising culture to students on campus and to other young individuals in primary and secondary schools. It holds flag-raising ceremonies on major days of the People's Republic of China, Macao S.A.R and the University of Macau. Outstanding members will be awarded with certificates and may have the opportunity to get the "Bank of China Macau University of Macau National Flag Team Outstanding Team Members Scholarship".

Cultural and Arts University Teams

Cultural and Arts University Teams (C&A U-Teams) aim to enrich student life through debating, public speaking and art aspects. These teams also allow students to explore and develop their talents. In addition to regular trainings, competitions and performances, team members are also encouraged to participate in cultural promotion activities on campus, as well as to have ideas exchange and collaboration with local, mainland and overseas communities and organisations. Recruitment of members will be held at the beginning of each academic year. Interested students are welcome to join the teams. C&A U-Teams include:

Cantonese Debating Team

Communication is an everyday issue for all of us. Aiming at improving presentation skills and establishing critical thinking, the Cantonese Debating Team has regular training and friendly contests with Hong Kong debating teams every year. The team also invited famous debaters to conduct training workshops.

English Debating Team

The English Debating Team welcomes students who speak fluent English and possess good presentation skills to join. The team provides an excellent opportunity for students to foster critical thinking and improve persuasion skills. The team has participated in many renowned international and regional competitions and got good results. It has been ranked Top 8 at the World Universities Debating Championship, awarded 3 National Champions, 3 1st Runner-up, 1 2nd Runner-up and Best 10 Debaters for 10 year in FLTRP Cup National Debating Competition. It is also the Champion of the Macao Inter-Tertiary English Debating Competition for 10 consecutive years. The Team organized the Greater Bay Area Inter-Varsity English Debate Competition and won the Champion for two consecutive years.

Mandarin Debating Team

The Mandarin Debating Team was established in 2001. Besides friendly debating competitions with universities around the world, the team participates in renowned international, national and

regional debating contests and got good results. It got the Champions of the "Walk with the Constitution and the Basic Law – Chinese Debate Competition for Higher Education Institutions in Macao" for 3 consecutive years, "Courtesy Living Charter - Respect life and Zero Discrimination" Youth Debate Contest 2022, 1st "Star of CBA" Greater Bay area contest, the 6th International Chinese Debating Competition organized by Beijing Normal University, Zhuhai, the 1st International Mandarin Debating Championship organized by Chongqing University and Chinese Debate Association and the 2nd and 3rd Return of Kings International Varsity Debating Contests. The team is also engaged in the promotion and development of Mandarin debating in Macao S.A.R.

Portuguese Debating Team

Established in 2014, the Portuguese Debating Team aims at promoting Portuguese language on campus. At the same time, it provides trainings to members to enhance their debating skills, promote their team spirit and collective problem solving abilities. By taking part in debating competitions, the UM Portuguese Debating Team members have the opportunity to compete with their counterparts and improve their Portuguese skill. The Team won the Champion, the 3rd Prize, and the 2nd Prize in the 10th, 8th, and 6th of the Portuguese Debate Competition for Higher Education Institutions in China and Asia respectively.

Public Speaking Team

The Public Speaking Team of the University was established in 2008. The Team welcomes students who are interested in public speaking, possess good presentation skill and confident in making public speeches. Regular trainings will be offered to team members to help improving their speaking and presentation skills. It is also established with the purpose of providing a chance for English speaking talents to participate in public speaking competitions.

Choir

The UM Choir was established in 2004. It aims at promoting chorus music and provide high-quality music performance for all UM members. The Team actively performs in various University events and ceremonies and hold at least two concerts every year. It has also cooperated with other local and overseas choirs and participated in international choral events, such as the 6th National Inter-Varsity Art Show in Sichuan, IFCM World Choral Expo and International Choir Festival – Grand Prix.

Chinese Orchestra

The UM Chinese Orchestra aims at promoting Chinese music in the University. It currently consists of ten different sessions namely: Er Hu, Pi Pa, Di Zi, Gu Zheng, Liuqin, Ruan, Yangqin, Sheng, Souna and Chinese Percussion. The orchestra welcomes students with basic skills to join. It has regular training on a weekly basis and engages in performances both on and off campus. Our repertoire covers a wide range of musical genre, from traditional to contemporary musical pieces.

Dance Troupe

The UM Dance Troupe was established in 2014 and consists of around 30 members from different faculties. The troupe aims to enrich the dance culture at UM and provide high-quality performances for all UM members. The team holds an annual showcase each academic year and actively participates in various university events and local dance activities. It has also taken part in the International Youth Dance Festival organized by the Education and Youth Development Bureau and the Macao International Parade organized by the Cultural Affairs Bureau. Moreover, the troupe has achieved significant recognition, winning the 1st Prize in the 5th National Inter-Varsity Art Show in Shanghai for their performance of "Scared to Be Lonely" and the 3rd Prize in the 6th National Inter-Varsity Art Show in Sichuan for their performance of "Hidden Courage." Additionally, the troupe won the 3rd Prize in the dance category (non-professional) at the Third Guangdong-Hong Kong-Macao Greater Bay Area's University Students Arts Festival.

String Orchestra

The UM String Orchestra was established in 2009 and welcomes students who are music enthusiasts and have basic knowledge on orchestra music to join. It currently has around 40 members and consists of 5 sessions: 1st Violin; 2nd Violin; Viola, Cello and Double Bass. The team offers regular training to improve members' performance skills. It participates in various internal and external performances throughout the academic year.

Symphonic Band

The UM Symphonic Band was established in 2007. It is the first and unique collegiate band in Macao. It consists of around 60 members and provides a platform for band enthusiasts to perform and exchange. It holds regular rehearsal and performances at different occasions throughout the academic year, which helps promote cultural development of local band music in UM. The band was selected to participate in the 6th National Inter-Varsity Art Show in Sichuan and awarded the first prize for their performance of "Greensleeves".

Student Activity Centre

The Student Activity Centre is a multi-purpose building located in the centre of the campus. It houses offices and conference rooms of the Student Affairs Office and University of Macau Students' Union (UMSU), practice rooms and offices of C&A U-Teams and various venues for student activities including a 243-seat theatre, an outdoor plaza, an exhibition gallery, a recreation room (Student's Corner), meeting rooms, multi-function hall and multi-function rooms. A wide range of student activities and cultural events will be held year round, such as music concerts, dance performances, talent shows, various type of competitions, film screenings, and many more!

Sports Facilities

The campus has various large-scale sports facilities, including the UM Sports Complex with a 10 lanes 50 metres long indoor swimming pool, UM Stadium suitable for soccer and track and field activities, plus many other indoor and outdoor sports facilities. The five-storey UM Sports Complex has a total net floor area of approximately 9,600 square metres. It can be used for large-scale events and performances.

Indoor sports facilities:

- UM Sports Complex
 - 1st Floor Common Area
 - Activity Room
 - Badminton Hall
 - Bouldering Wall
 - Dance Room
 - Fitness Room
 - Multi-Purpose Room
 - Sport Climbing Wall
 - Sports Pavilion
 - Squash Court
 - Swimming Pool
 - Table Tennis Room
 - Training Hall

Outdoor sports facilities:

- Archery Range
- Basketball Courts
- Beach Court
- Lawn Bowling Green
- Mini Artificial Soccer Pitch
- Tennis Courts & Practice Court
- UM Stadium

- Volleyball Court

Student Organizations and Development

To facilitate the operation and development of student organizations, we give advice on the organization of student activities, provide support on resources and funding for student organizations. We also provide training, development activities, student leadership seminars and cultural exchange trips to help students become well rounded student leaders and to strengthen their competences. Operating student organizations offers a wide variety of opportunities for students to enhance their academic and social life on campus via involvement, leadership, and empowerment. These experiences nurture campus pride and student success to advance an inclusive and fruitful community.

The University of Macau Students' Union

The University of Macau Students' Union (UMSU) was established on 29 March, 1993. Its office is located at Student Activity Centre (E31-1014). UMSU organizes extracurricular activities for students, aiming at enriching students' campus life. The University encourages students to actively participate in UMSU's activities and act as cabinet members of UMSU or its sub-organizations. All UM students can join UMSU and its sub-organizations but may be subject to different membership fees.

There are currently around 80 sub-organizations under UMSU, offering tailor-made services to suit the needs of students from different faculties, with different interests and demands.

The University of Macau Postgraduate Association

The University of Macau Postgraduate Association (UMPA) was founded in July, 2005. Its office is located at the Postgraduate House (S3-G017). It aims at promoting a benign academic and cultural environment in accordance with the University Motto “Humanity, Integrity, Propriety, Wisdom and Sincerity”; advancing the all-rounded development of UM postgraduate students; enhancing the academic and cultural exchanges among postgraduates and undergraduates; tightening relationships with other associations in UM, Macau and abroad.

There are currently 10 sub-organizations under UMPA:

- Calligraphy Club
- Chinese Herbal Plant Association
- Health Sciences PhD Society
- Institute of Applied Physics and Materials Engineering Postgraduate Association
- Institute of Chinese Medical Sciences Postgraduate Association
- Society of Literature Theory in South China
- UM Mirror Newspaper Office
- Vision & Photography Association
- Youth Association of International Affairs
- Sports Association

Academic Support Services

ACADEMIC SUPPORT SERVICES

Centre for Teaching and Learning Enhancement

The Centre for Teaching and Learning Enhancement (CTLE) is an academic support unit under the Vice Rector for Academic Affairs (VRAA). CTLE works with academic units, University Library, Residential Colleges and relevant administrative units and student bodies to enhance teaching and learning at UM. CTLE organizes professional development events in which local, regional and international experts share their expertise and insights on teaching and learning with UM's seasoned and new academic staff. CTLE works to identify and recognize exemplary teaching and educational initiatives. CTLE also works closely with the Information and Communication Technology Office (ICTO) to help academic staff in the use of technologies for enhancing student learning and engagement. Our website (ctle.um.edu.mo) contains information on professional development events, teaching and learning resources as well as e-learning tools including UMMoodle.

Major functions of the Centre:

- To provide professional development programmes that help faculty members develop pedagogies for student-centred education;
- To provide teaching enhancement and evaluation services, including consultations for academic staff;
- To provide advice on and support for quality assurance matters and processes;
- To develop, review and evaluate teaching and learning policies and practices at UM;
- To work with different units in implementing outcome-based teaching and learning (OBTL) and e-learning; and
- To support individuals, projects and educational programmes that exemplify excellence in teaching and learning.

Information and Communication Technology Office

The Information and Communication Technology Office (ICTO) provides general IT services and facilities for all UM members on campus. These services include Internet access, wired and wireless network connectivity across the campus, various applications such as Email, Student Information System (SIS) for course enrolment, course add/drop and study plan, Sports Facilities Booking System, etc. All users are provided with UMPASS which consists of UserID and password to access various services and applications.

Besides, ICTO also provides the following computing facilities:

- **myUM** is a portal service that provides an all-in-one access point to online services and information of the University. For more details, please visit (<https://myum.um.edu.mo>) or (<https://faq.icto.um.edu.mo/what-is-myum-portal>).
- **UM App** is a one-stop mobile application designed to provide staff, students, alumni, and public with convenient access to various UM services from mobile devices. For more details, please visit (<https://icto.um.edu.mo/mobile-applications/um-app/>).
- **Computer Room** are equipped with personal computers installed with Windows operating system and general application software, which located at Central Teaching Building (E5) and (E6). For more details, please visit (<https://icto.um.edu.mo/academic-computing-facilities/computer-room>).
- **Virtual Computer Room** allows students and staff to access the specialized software from their own personal computer or mobile device remotely. For more details , please visit (<https://icto.um.edu.mo/virtual-computer-room>).
- **Printing service** provides Follow-You student printing, WebPrint, Macau Pass printing and copying service for our students. For more details , please visit (<https://icto.um.edu.mo/printing>).
- **High Performance Computing Cluster (HPCC)** provides high performance computing resources, allows users to run the computational jobs on those connected computers simultaneously to achieve higher processing performance. For more details , please visit (<https://icto.um.edu.mo/teaching-learning-research/high-performance-computing-cluster-hpcc>).
- **Help Desk support** provides technical support to users who need help with ICT services. For more details , please visit (<https://icto.um.edu.mo/help-desk-services>).

In order to facilitate teaching and learning, the elearning systems (<https://elearning.um.edu.mo>) below are provided.

- **UMMoodle** provides a space for teachers to post teaching materials and conduct online activities. Users can have self-learning, online-testing, and lecture discussions, submit assignments and check their learning progress.
- **ePortfolio** is a web system that allows users to record and share evidence of learning.

It provides functions of blogs, social networking and learning records.

- **Community** provides various activity modules for assisting users in managing attendance records and facilitating information sharing for academic research projects.
- **Zoom** assists UM members in the organization of online meetings, presentations, interviews, teaching and learning activities.

For any general consultation and assistance in using facilities and services, please contact ICTO Help Desk at room E5-2085 of Central Teaching Building, email: icto_helpdesk@um.edu.mo. Moreover, in order to make the best possible use of the computing facilities and services, ICTO regularly offers training courses to our staff and students on the use of our computing facilities.

For more information about ICTO, please visit our homepage at <https://icto.um.edu.mo>.

Wu Yee Sun Library – An Academic Library of the 21st Century

The University of Macau Library (UM Library) aims to build a systematic knowledge community to benefit every university member with plentiful library resources and advanced library services. Our missions include (1) to support and pursue the excellency of learning, teaching and research anywhere anytime by its services; (2) to satisfy the evolving needs of library users by various kinds of collaborative learning spaces, equipment and technology innovations; (3) to ensure the academic integrity and promote lifelong learning skills by its online and on-site workshops and information literacy classes; (4) to cultivate the campus culture by its talks, exhibitions and various kinds of events; (5) to curate the institutional and regional cultural heritages by its special collections, archives and museums; (6) to extend its social services to the public or external individual and institutional users by its inter-library cooperation and alliances.

The UM Library has moved into the current “University of Macau Wu Yee Sun Library” building in July 2014. Standing in the forefront and occupying a very central location of the new campus, and surrounded by a man-made lake and a man-made river, the Library is the landmark building of the whole campus. The main entrance, facing the Library Square, connects with the Central Teaching Building and Faculties through corridors and bridges. The Library is a magnificent building of 7 floors with two lower wings on its sides. The size of the new library is about 30,000 square meters, and is projected to hold one million volumes of books and journals, and to provide some 3,000 seats. The Library was designed by Professor He Jingtang (何鏡堂教授), Academician of the Chinese Academy of Engineering. In tune with the design principles of the UM campus, it combines the best features of the Chinese and Western cultural elements in its exterior. Looking from outside, it exudes learning and scholarship, just like any great university library anywhere in the world, and at the same time, it projects warmth and beams welcome on its visitors.

The interior of the Library has an atrium lobby with natural sunlight. There is a sky garden located on the second floor. The sky garden area is decorated with a large number of plants and flowers, infusing natural elements into the reading atmosphere. The hanging round-shape exhibition hall located on the fifth floor contrasts with the square-shape atrium lobby on the ground floor. In Chinese tradition, this kind of contrast is known as 「天圓地方」 (“round sky and square land”), representing the whole world. This also implies that the Library holds comprehensive and large amount of collections from all over the world.

With over 40 years of development, the Library has become the largest library in Macao. At this moment, the Library holds a collection of about 17.8 million pieces/items, which includes about 860,000 books, 6,000 titles of periodicals, 27,000 rare books, 30,000 items of AV materials, 1,000 paintings/antiques, 3,000 items of special collections and 5,000 rolls of microfilms. With the rapid development of web services, the Library has acquired quite a number of electronic resources, which includes about 260 e-databases, 787,000 e-books, 16,000,000 e-theses, 2,000 titles of e-newspapers and 172,000 titles of e-journals.

While actively developing its collections, the UM Library develops extensive interlibrary cooperation, serving the university members through resource sharing such as Inter-Library Loan (ILL) and Document Delivery Services (DSS), as well as providing services to libraries in Macao, the Guangdong-Hong Kong-Macao Greater Bay Area and around the world.

The Library continues to integrate the use of innovative technologies into traditional library services, and apply the pioneering and innovative concepts to its functions. Currently, the Library

is using UHF RFID management system to manage its book collections. In addition, the books are not simply shelved strictly according to the classification scheme. Instead, they are grouped and shelved in clusters by their subjects. This facilitates better use of the collection and makes it easier for readers to use the collection.

The Library also encourages and emphasizes on discussion, sharing and interaction among students. With easy accessibility of information on the web, libraries these days have to become places for collaborative learning and interaction among their readers. To achieve this aim, the Library provides a large number of group discussion rooms installed with state-of-the-art equipment. In addition, there will be some informal discussion and interaction spaces throughout the Library for students to socialize, interact, and to learn from each other.

However, the Library also has to cater to the needs of other readers who may prefer individual study and, therefore, a quieter environment. For this, the Library is divided up into several different zones to take care of the different requirements of its users. Some parts of the Library are designated as the silent zone, where serious and scholarly study may be conducted. And some parts of the Library are made into semi-silent zone, where students may study with their friends and generate some discussion whereas other readers just regard the noise thus generated as background noise.

In summary, to support the overall development of the university's teaching, learning and research, and consider the development trend of higher education on the importance of collaborative learning, the Library is designed with a new and open concept, aiming to let teachers and students experience a brand new way of learning and acquiring information.

RESEARCH CENTRES AND LABORATORIES

Laboratories

The University continuously puts in resources to develop various laboratories according to the needs for course development, teaching and research. The various laboratories are listed as follows:

List of Laboratories

Biomedical Sciences Laboratories

- Animal Research Core
- Biological Imaging and Stem Cell Core
- Genomics, Bioinformatics and Single Cell Analysis Core
- Proteomics, Metabolomics and Drug Development Core

Center for Cognitive Brain and Science (CCBS) Laboratories

- Brain Intervention Core
- Cognition and Behavioral Data Collection Core
- High Performance Computing Facility
- Institute of Biophysics of Chinese Academy of Sciences – University of Macau Joint Research Laboratory of Brain and Cognitive Sciences
- Neuroimaging Core

China Southern Power Grid – University of Macau Joint Laboratory of Smart Power and Energy for Carbon Neutrality

Guangdong-Hong Kong-Macao Joint Laboratories

- Guangdong-Hong Kong-Macao Joint Laboratory for Smart Cities
- Guangdong-Hong Kong-Macao Joint Laboratory of Human-Machine Intelligence-Synergy Systems
- Guangdong-Hong Kong-Macao Neutron Scattering Science and Technology Joint Laboratory
- Guangdong-Macao Joint Laboratory of Advanced and Intelligent Computing

Ministry of Education Joint Key Laboratory

- Sun Yat-Sen University – University of Macau Ministry of Education Joint Key Laboratory

State Key Laboratories

- The State Key Laboratory of Analog and Mixed-Signal VLSI (University of Macau)
- The State Key Laboratory of Internet of Things for Smart City (University of Macau)
- The State Key Laboratory of Quality Research in Chinese Medicine (University of Macau)

University of Macau - Chinese Academy of Sciences Joint Laboratories

- Joint Laboratory of Aerospace Information
- Joint Laboratory of Artificial Intelligence and Robotics
- Joint Laboratory of Ocean Environment and Engineering

University of Macau – BoardWare Macau Joint-Laboratory

University of Macau – Huafa Group Joint Laboratory

Science and Technology Laboratories

- Advanced Physics Laboratory
- Analog Electronics Laboratory

Arrangements of Classes and Final Examinations during Typhoons or Rainstorms in Macao

APPENDICES

Arrangements of Classes and Final Examinations during Typhoons or Rainstorms in Macao

(Approved by the Senate on 12 August 2020)

- **Tropical Cyclone Signal No.1 or No. 3/Yellow or Red Rainstorm Warning Signal**
When Tropical Cyclone Signal No. 1 or No. 3/Yellow or Red Rainstorm Warning Signal is hoisted, all classes and final examinations will be held as scheduled.
- **Tropical Cyclone Signal No. 8 (or above)/Black Rainstorm Warning Signal**
When Tropical Cyclone Signal No. 8 (or above)/Black Rainstorm Warning Signal is hoisted or cancelled, the following arrangements will be made for classes and final examinations:

Arrangement of classes and final examinations when the signal is hoisted	
<u>Before</u> the classes and final examinations start	All classes, final examinations and outdoor teaching activities will be suspended until the related signal is cancelled.
<u>After</u> the classes and final examinations start	<p>All classes and outdoor teaching activities* will be suspended immediately while final examinations will be continued till the end as scheduled.</p> <p>* The staff responsible should take all students to a safe place and make sure that it is safe for them to leave.</p>
Arrangement of classes and final examinations when the signal is cancelled	
Classes and final examinations which begin <u>2 hours after</u> the cancellation of signal will be held as scheduled. All outdoor teaching activities on that day will be cancelled.	
<i>(E.g.: If the signal is cancelled on 13:00, classes and final examinations which begin at or after 15:00 will be held as scheduled.)</i>	

1. Academic units will announce arrangements for final examination postponement on their webpages.
2. The above arrangements are not applicable to the practicum or internship courses. Students who are doing these courses should follow the related arrangements and guidelines of the host organization.

Guidelines for Student Conduct in the Classrooms

APPENDICES

Guidelines for Student Conduct in the Classrooms

(Approved by the University Senate Pedagogic Council on 14 May 2004)

The classrooms are for teaching and learning. Students should pay attention to the lecture and participate actively during the lecture. Students must strictly adhere to the following rules:

- Be punctual and attend the full lecture;
- Be quiet;
- Turn off mobile phones and pagers. These devices are not to be used during class.
- Don't move about or leave the classroom during the lecture unless you have permission of the teacher;
- No smoking;
- No drink or foods;
- Avoid all unauthorized activity that interferes with or interrupts teaching and learning.

If a student violates any of the above rules, he/she will receive a warning from the teacher. The teacher may also ask a student guilty of misconduct to leave the class immediately and may further report the incident to the Head of the Academic Unit concerned for consideration of disciplinary action.

Acceptable Use Policy

- ICTO Computing Facilities, Campus Network and Internet

APPENDICES

Acceptable Use Policy**- ICTO Computing Facilities, Campus Network and Internet**

(Approved by the Rector on 17 May 2021)

1. Introduction**1.1 Purpose**

The purpose of this policy is to ensure that the use of information and communication facilities and services provided by Information and Communication Technology Office (ICTO) is consistent with the highest standards and practices of teaching, learning, research and administration.

1.2 Policy

According to the "Regulations of the Organizational Structure of the University of Macau", ICTO is given the major authority to provide the necessary information and communication facilities and services for teaching, learning, research and administration, it also authorizes ICTO to supervise the proper use of rights of the related facilities and services on behalf of the University of Macau. Users shall abide by this policy and are also bound by the applicable laws of Macao and University's related policies as well.

1.3 Scope

All users (staff, students, visitors, contractors and others) who are using the University's information and communication facilities and services are bound by the provisions of this policy.

2. Code of Use

2.1 Be consistent with academic, research and administration purposes, policies and goals of the University.

2.2 Information and communication facilities and services shall be used appropriately, and only for conduct in accordance with your role in the University.

2.3 The establishment or use of information and communication systems, facilities and services shall comply with the laws of Macao.

2.4 Do not conduct or attempt to conduct in any manner that endanger information security, including but not limited to improper acts of interference, interruption, intrusion or paralysis of services on any network, information and communication systems or facilities inside and outside the University.

2.5 Unless otherwise agreed by ICTO, a user's right to use the related facilities and services is nontransferable.

2.6 Unless otherwise agreed by ICTO, the security measures of information and communication systems or facilities shall not be disabled, interfered with or removed, and users are not allowed to install and use any unauthorized computer programs.

-
- 2.7 Users shall not process, store, publish, broadcast or bulk-distribute the following with information and communication facilities and services:
- Contents that violate the laws of relevant regions and advocate or promote any illegal behavior;
 - Contains any contents of harassment, bullying, curse, intimidation, hatred, defamation, threat, discrimination, extremism or rumor, etc., and that may intensify contradictions and conflicts;
 - Contains objectionable, obscene or indecent contents;
 - Contents used for personal, political, economic, or commercial benefits;
 - Information that is not related to your role in the University.
- 2.8 If you, as a service provider, need to provide information services to users in the University, or set up networks, information and communication systems or facilities in the University, you shall conduct risk assessment, periodic maintenance, defining appropriate security measures and guidelines for related services, systems or facilities. In addition, you shall obtain comment from ICTO first.
- 2.9 When you need to access University's internal data, you shall take appropriate data protection measures, and you shall use suitable facilities to process, store, and transfer the related data.
- 2.10 In case you encounter any information security incident, you shall notify ICTO as soon as possible, and shall provide necessary information for incident investigation.
- 2.11 All users shall follow the Guidelines for User Account and Password, and are responsible for keeping passwords secure and confidential. Password shall be changed periodically or two-factor authentication service shall be enabled for account protection. For any loss occurrence of identity and authorization tools, such as passwords, e-certificates, you shall notify ICTO as soon as possible.
- 2.12 If a research project has a potential violation of relevant policies, you shall obtain comment from ICTO first.
- 2.13 Before visitors, outsourced service personnel or service providers having access to any UM systems, the relevant reception unit and personnel shall ensure that they have signed a non-disclosure agreement, and comply with this policy.

3. Relevant examples of the policy mentioned above for reference:

- 3.1 Abuse of information and communication facilities and services
- Malicious occupy extra computers in learning common;
 - Eating and playing in the computer room;
 - Unplug the cables of university equipment, such as power cord, network cable etc. in order to connect your own electronic device;
 - Use University's facility to play video games or browse pornographic websites;
 - Loan, rent or sell your user account to let others obtain computer services of the University;
 - Send bulk-mail to the University users to promote promotional activities of your friend's new shop;
 - Use the University email address to register a personal online shop for running a business.

3.2 Hazard information and communication facilities:

- Use or access to any computer system without authorization inside or outside the University;
- Delete, modify or insert data to a system without authorization;
- Hire or assist hackers to attack the campus network or information system;
- Unplug the power supply of the wireless network device to interrupt the service;
- Distribute spam mail or viruses to cause network congestion or interfere with the works of others;
- To conduct network scanning activities or experiments to test system vulnerabilities without the consent of ICTO, or to monitor or steal information on the campus network or information system;
- No matter intentionally or unintentionally, whether with or without tangible or intangible damage to information and communication facilities, to alter any university information system, hardware and software without authorization.

3.3 Improper handling of information or abusing of information services:

- Publish tools or methods that can hack the University system in the discussion forum;
- Pick up external storage devices in campus area and read the content without authorization;
- Use personal email to process UM's administrative information or data;
- Store or process any protected information or data by using public cloud services or tools (e.g. online file hosting services or instant messaging tools), or use communication tools or network services in public places to process any protected information or data;
- Click an hyperlink or open an attachment of an suspicious email;
- Browse untrusted websites;
- Use, distribute, or crack any copyright-protected materials, such as computer software, audio-visual products, and works, without the consent of the copyright owner.

3.4 Research project potentially violating this policy:

- Research on wireless network technology (if it would cause interference to the signal of the university's wireless network, users shall obtain comment from ICTO first);
- Research on new technology of cellular base stations must comply with the laws of Macao, users are recommended to seek legal advice before proceeding.

4. Major applicable laws of Macao and the University's policies:

- Law on Combating Computer Crime
- The Macau Cybersecurity Law
- Personal Data Protection Act
- Electronic Governance (Governação electrónica)
- Privacy Policy, UM
- University Policy on Use of Computer Software within Campus, UM
- Guidelines for User Account and Password, UM
- Other applicable laws against criminal behaviors on Internet, and other University's policies and guidelines

For relevant applicable laws, policies and guidelines, please refer to <https://icto.um.edu.mo/infosec>.

5. Consequences of breach

In the event of a breach of this policy, ICTO may, in its sole discretion, suspend or terminate all rights of users to use the information and communication facilities and services. The University may also take disciplinary action or other appropriate measures. If it involves illegal activities, the user may take the legal responsibility.

(The University reserves the right of final interpretation of this policy.)

Academic Computing Facility Room Rules

Academic Computing Facility Room Rules

(Approved by the Rector on 18 August 2023)

1. Introduction

The academic computing facility room provides several computing facilities for use by staff and students of University of Macau. The following rules and guidelines which governs the use of computer rooms, OMR, personal multimedia computer rooms and printing rooms, may from time to time be amended as necessary.

2. Usage Guidelines

- 2.1 Before using the computing room, user should read and agree with the policies as stated in the document ICTO.04/201210/001 "Acceptable Use Policy - ICTO Computing Facilities, Campus Network and Internet".
- 2.2 Always keep the room environment clean.
- 2.3 User should clear up all their belongings after using the facilities and leaving the room.
- 2.4 In case of any malfunction of any equipment, user should inform ICTO through service hotline or via e-mail to ICTO Help Desk. Under no circumstances should users attempt to repair any equipment themselves.
- 2.5 When there is no further use of the computing facility room, user should leave the room.
- 2.6 User should pay attention and follow the instructions provided by ICTO staff and those guidelines being posted in the room and on the door.
- 2.7 If it was identified that a user had left the computing facility room and the PC he/she had been using was no further in use, ICTO reserves the right to release it for other users to use. ICTO is not responsible for any loss of data/work from the release actions.

3. Usage Rules

- 3.1 User should bring his/her valid campus card when using the computing facility room.
- 3.2 User should only use one computer at any one time.
- 3.3 Smoking is strictly prohibited in computing facility room at all times.
- 3.4 Maintain silence and refrain from disturbing other users.
- 3.5 Do not litter in computing facility room.
- 3.6 Do not bring any food and beverages into or eating or drinking in the computing facility room.

- 3.7 User should make sure that their self-provided portable storage devices are virus free before using them in the computing facility room.
- 3.8 Under any circumstances listening to music, watching movies and playing computer games are not allowed in the computing facility room unless it is for academic purpose.
- 3.9 Users are allowed to use PC speakers only when they are in an instructor-led class or in preparing multimedia files in personal multimedia computer rooms.
- 3.10 Do not move any equipment, sockets, and/or cables from their original locations.
- 3.11 Do not use any account set up for another user; or try to make any attempt to find out the password of a service for which you have not been authorized, including accounts set up for other users.
- 3.12 Do not disturb, delete or tamper with the programme/data files of ICTO and of other users.
- 3.13 Do not run any software or print any job that is not for academic purposes
- 3.14 Computing facility rooms should not be used for any purposes other than the use of computing facilities.
- 3.15 Users are reminded that the use of unlicensed software, as well as the unauthorized copying of software, is strictly prohibited on University equipment. Users are solely responsible for any and all unlicensed software and documentation in their possession.
- 3.16 The use of computing facilities and Audio-video system on the teacher's desk is allowed only under the lead of and/or permitted by the instructor.

4. Penalties for Misconduct and Abuse of Using Computing Facilities and Services

- 4.1 User who had violated any of the above stated usage rules will be warned instantly to stop the said activity or will be asked to leave the room immediately. Records will be marked down for further reference.
- 4.2 User who had violated any of the above stated usage rules, ICTO reserved the right to suspend his/her privileged of using the following ICTO services: computer rooms, virtual computer room, personal multimedia computer rooms, fast-access PCs, loaning devices, printing and copying service for one week in the following working day and report the case to related department;
 - 4.2.1 For student, the case will be forwarded to Student Affairs Office (SAO);
 - 4.2.2 For staff, the case will be forwarded to the related department and Human Resources Section of Office of Administration (ADMO-HRS).
- 4.3 Any user who was identified that he/she had subsequently violated any of the above stated usage rules, ICTO will suspend his/her privileged of using the following ICTO services: computer rooms, virtual computer room, personal multimedia computer rooms, fast-access PCs, loaning devices, printing and copying service for one month in the following working day and report the case to related department;
 - 4.3.1 For student, the case will be forwarded to Student Affairs Office (SAO);
 - 4.3.2 For staff, the case will be forwarded to the related department and Human Resources Section of Office of Administration (ADMO-HRS).

-
- 4.4 Any user who intentionally damaging the computing facilities, equipment or furniture in the facility room will be required to pay for the cost of repair or replacement.
 - 4.5 Any user who commits serious offenses, such as stealing computer items, accessories or furniture; ICTO will report the case to the Security and Transport Section of Campus Management and Development Office (CMDO-STO) and the faculty or department concerned for further action.
 - 4.6 During the period of privilege suspension if there is the need of using the computing services for academic or administrative purpose, user can request his/her academic unit or department to send a written request to ICTO to temporarily restore his/her privileges for accessing the services stated in 4.2 and 4.3. ICTO can consider the request but is under no obligation to restore the suspended privileges.

Fees and Charges for 2024/2025 Newly Admitted Students

Tuition Fee 2024/2025

Tuition Fees for Postgraduate Programmes

(All fees in MOP)

Programmes ³	Programme Full Tuition Fees within Normative Study Period ¹		Continuation Fees per Semester ²	
	Local Students ⁴	Non-Local Students	Local Students ⁴	Non-Local Students
PhD Degree Programmes	150,000	150,000	9,380	9,380
Master's Degree Programmes				
- Offered by the Faculty of Business Administration	97,800	204,000	12,230	25,500
- Offered by other academic units	97,800	174,000	12,230	21,750
Postgraduate Certificate/Diploma Programmes				
- Postgraduate Certificate in Education	20,600	41,300	5,150	10,330
- Introduction to Macau Law	30,600	61,400	3,830	7,680

1. Programme full tuition fees are charged in installments (semesters) during normative study period. Students who complete a programme, including those who complete a programme before the end of normative study period, are required to settle their programme full tuition fees, i.e., all installments of tuition fees. The following table shows tuition fees per installment:

Programmes ³	Normative Study Period	No. of Installments	Tuition Fees per Installment	
			Local Students ⁴	Non-Local Students
PhD Degree Programmes	4 years	8 installments	18,750	18,750
Master's Degree Programmes				
- Offered by the Faculty of Business Administration	2 years	4 installments	24,450	51,000
- Offered by other academic units	2 years	4 installments	24,450	43,500
- Offered by other academic units (3-year programmes)	3 years	6 installments	16,300	29,000
Postgraduate Certificate/Diploma Programmes				
- Postgraduate Certificate in Education	1 year	2 installments	10,300	20,650
- Introduction to Macau Law	2 years	4 installments	7,650	15,350

2. Continuation fees are charged to students who continue studies beyond normative study period.
3. Students who study in the following programmes are required to settle tuition fees according to the tuition fee tables announced on the websites of the respective academic units: the Doctor of Fine Arts programme, the Master of Fine Arts programme, the Doctor of Business Administration programme, the Executive Master of Business Administration programme, the Doctor of Education programme, the Doctor of Public Health programme, and the Doctor of Public Administration programme.
4. Local students refer to holders of Macau SAR resident identity cards.

Notes

- a) Students who are **admitted in Academic Year 2024/2025** should refer to the previous page for tuition fees.
- b) Students who **resume studies in Academic Year 2024/2025** and follow:
- Programme-based tuition fee schemes: please refer to the previous page for tuition fees.
 - Credit-based tuition fee schemes: please refer to the following table. The minimum charge per semester is equivalent to tuition fees for 3 credits.

Programme [#]	Tuition Fees per Credit	
	Local Students*	Non-Local Students
PhD Degree Programmes	3,130	3,130
Master's Degree Programmes		
- Offered by the Faculty of Business Administration	4,080	8,500
- Offered by other academic units	4,080	7,250
Postgraduate Certificate/Diploma Programmes		
- Postgraduate Certificate in Education	1,720	3,440
- Introduction to Macau Law	1,280	2,560

[#] Not applicable to the Doctor of Fine Arts programme, the Master of Fine Arts programme, the Doctor of Business Administration programme, the Executive Master of Business Administration programme, the Doctor of Education programme, the Doctor of Public Health programme, and the Doctor of Public Administration programme.

* Local students refer to holders of Macau SAR resident identity cards.

- c) Retake course fees are charged to students who retake course(s). Please refer to the table under note (b) for retake course fees per credit. If the course to be retaken is a non-credit bearing course, the retake course fee is equivalent to the fee for 1 credit.
- d) Students who join outgoing exchange or study abroad programmes are required to pay tuition fees to the University of Macau.

Tuition Fees for the Doctor of Fine Arts Programme

(All fees in MOP)

Fee	All Students
Programme Full Tuition Fees within Normative Study Period	280,000
Continuation Fees per Semester	15,000
Non-refundable Deposit	15,000
Retake Course Fee (per credit)	5,000

- A. The programme full tuition fees within normative study period are settled in 8 installments (8 semesters):

Tuition Fees per Installment	All Students
The 1 st installment to the 8 th installment	35,000

- B. Students who complete the programme, including those who complete before the end of the normative study period, are required to settle the programme full tuition fees. The normative study period of this programme is 4 years.
- C. Students who continue studies beyond the normative study period are required to pay the continuation fees.
- D. Students who accept their admission offers are required to pay the non-refundable deposit. The non-refundable deposit will offset part of the 1st installment of the programme full tuition fees.
- E. Students who retake course(s) are required to pay the retake course fee. If the course to be retaken is a non-credit bearing course, the retake course fee is equivalent to the fee for 1 credit.
- F. Students who join outgoing exchange or study abroad programmes are required to pay tuition fees to the University of Macau.

Tuition Fees for the Master of Fine Arts Programme

(All fees in MOP)

Fee	Local Students	Non-local Students
Programme Full Tuition Fees within Normative Study Period	122,400	217,500
Continuation Fees per Semester	12,230	21,750
Non-refundable Deposit	20,400	36,250
Retake Course Fee (per credit)	4,080	7,250

- A. The programme full tuition fees within normative study period are settled in 6 installments (6 semesters):

Tuition Fees per Installment	Local Students	Non-local Students
The 1 st installment to the 6 th installment	20,400	36,250

- B. Students who complete the programme, including those who complete before the end of the normative study period, are required to settle the programme full tuition fees. The normative study period of this programme is 3 years.
- C. Students who continue studies beyond the normative study period are required to pay the continuation fees.
- D. Students who accept their admission offers are required to pay the non-refundable deposit. The non-refundable deposit will be the 1st installment of the programme full tuition fees.
- E. Students who retake course(s) are required to pay the retake course fee. If the course to be retaken is a non-credit bearing course, the retake course fee is equivalent to the fee for 1 credit.
- F. Students who join outgoing exchange or study abroad programmes are required to pay tuition fees to the University of Macau.
- G. Local students refer to holders of Macao SAR resident identity cards.

Tuition Fees for the Doctor of Business Administration Programme

A. Programme Tuition Fee

(All fees in MOP)

Programme	All Students
Doctor of Business Administration	830,000

B. Tuition Fee Summary

Item	Amount	Payment Date
Reservation Deposit	30,000	Upon acceptance of admission offer
1 st Installment	270,000	Before the class commencement of the 1 st semester of the 1 st year
2 nd Installment	300,000	Before the class commencement of the 1 st semester of the 2 nd year
3 rd Installment	230,000	Before the class commencement of the 1 st semester of the 3 rd year
Continuation Fee (per semester)	50,000	Before the class commencement of the semester starts
Retake/Extra Course Fee (per credit)	16,600	

Remarks:

1. The reservation deposit is non-refundable. This deposit will be offset against the students' first year tuition fee;
2. Continuation fee shall be paid by a student who needs to continue beyond normal duration of the programme, i.e. 3 years;
3. Additional fees shall be paid by a student who needs to retake course and/or taking extra course;
4. A student who completed the whole programme before the end of the normal duration of the programme must also settle the full amount of tuition fees of the programme.

C. Residential Workshops

Expenses on residential workshops are excluded in the tuition fee. Students are responsible for the costs of travel, accommodation and subsistence incurred in attending the compulsory workshops in the curriculum.

D. Students who are admitted in or after academic year 2019/2020 should pay the tuition fees according to the above scheme.

Tuition Fees for the Executive Master of Business Administration Programme

A. Programme Tuition Fee

(All fees in MOP)

Programme	All Students
Executive Master of Business Administration	550,000

Expenses on residential workshops are excluded in the tuition fee. Students are responsible for the costs of travel, accommodation and subsistence incurred in attending the compulsory workshops in the curriculum.

D. Students who are admitted in or after academic year 2020/2021 should pay the tuition fees according to the above scheme.

Refund Policy for Programme Withdrawal (For DBA and EMBA Programmes)

1. Purpose

Students are admitted to the University with the understanding that they will remain until the end of the semester unless unforeseen circumstances necessitate their withdrawal, or unless they are discontinued studies. Students who are discontinued from the University forfeit all refunds of tuition and fees.

2. Policy Parameters and Conditions

- a. The completed (1) Application for Deferment of Study/Withdrawal Form, (2) Check-out Form, (3) Application Form for Tuition Fee Refund and (4) supporting document(s) must be submitted to the Postgraduate Office of the Faculty of Business Administration in order to officially withdraw from the programme.
- b. In the event of a prolonged illness, accident, or other circumstances making it impractical or impossible to complete the study, students must contact FBA Postgraduate Office as soon as possible.
- c. Refund will be credited to the student's bank account provided in the record of our University.
- d. Administrative fee of MOP500 will be charged for any successful refund application. The administrative fee of MOP500 will be deducted from the refund of tuition fee.
- e. Any application for Tuition Fee Refund is subject to the approval from the Programme Coordinator, the Dean of the Faculty of Business Administration and the Director of Finance Office.

Refund Calculations

Date of Applications	Percentage of Tuition Refunded (Excluding non-refundable deposit)
Before class commencement	100 % installment refund
Class commencement – October 15	80 % installment refund
October 16 – November 30	60 % installment refund
December 01 – January 31	40 % installment refund
After January 31	No refund will be issued

Tuition Fees for the Doctor of Education Programme

(All fees in MOP)

Fee / Deposit	All Students
Programme Full Tuition Fee within Normative Study Period	240,000

Rules Governing the Use of UM Campus Card

APPENDICES

Rules Governing the Use of UM Campus Card**(For Students)**

(Approved by the Rector on 31 July 2022)

A. INTRODUCTION

A multi-purpose UM Campus Card is issued for all members of the University (academic and administrative staff as well as students) for identification, facility/physical access control and information system access, etc.

B. FUNCTIONS OFFERED BY THE CARD

The UM Campus Card serves as:

- A traditional identification card;
- A library card;
- A facility access card to various facilities on campus, including the computer rooms, laboratories, offices, etc.

C. ACCESS CONTROL TO UNIVERSITY'S FACILITIES

With a valid UM Campus Card, a student is able to access all ICTO computer rooms. However, access to other facilities, such as individual faculty laboratories, has to be approved in advance by the relevant academic units. For further information, please contact ICTO Help Desk.

D. CARD REPLACEMENT FEE

Students do NOT need to pay for the first and all subsequent renewal cards issued by the University. However, **students have to pay MOP100 for replacement due to loss, damage*, and theft.**

* If a damaged campus card does not have any physical damage on it (e.g. scratch and bent mark), students are not obliged to pay the replacement fee of MOP100. However, the fee is applicable for the replacement of all other campus cards with physical damages.

E. REPORTING THE LOSS OR THEFT OF THE CARD

If your UM Campus Card is lost or stolen, please approach the Registry or Graduate School as soon as possible, to both report the loss/theft and apply for the issuance of a replacement card. Failure to immediately report the loss or theft of one's UM Campus Card to the Registry or Graduate School, will render the original holder liable to any and all negative consequences arising as a result of the loss/theft.

F. NOTES FOR USING THE CARD

1. All UM Campus Cards remain the property of the University.
2. Use of the UM Campus Card constitutes acceptance of all of the terms and conditions stated in the document "Rules Governing the Use of UM Campus Card".
3. UM Campus Card is NOT transferable.
4. The functions of your card in campus will be invalidated upon termination of the relationship with the University.
5. Do not scratch or fold the card.
6. The card chip must be stored under normal room temperatures and in a clean environment.
7. Students must not tamper with the UM Campus Card (including all information printed or stored on the card) in any way. Any unauthorized attempts for reading/writing the data stored on your Campus Card may be a criminal offence.

Academic Prizes

APPENDICES

 3. One prize of MOP5,000

One prize of MOP10,000 for student majoring in Law in Portuguese Language

Akrostar Academic Prize**芯耀輝學術獎項**

- Eligibility : Bachelor's degree potential graduates majoring in Electrical and Computer Engineering, local students preferred
- Criteria : Academic performance & R&D result in microelectronics circuit design
- Amount : Four prizes, MOP5,000 each

Choi Kai Yau Academic Prize**蔡繼有學術獎項**

- Eligibility : Bachelor's degree potential graduates
- Criteria : Academic performance
- Amount : Six prizes, MOP5,000 each

Lou Tou Vo Mathematics Academic Prize**盧道和數學學術獎項**

- Eligibility : Bachelor's degree potential graduates from Department of Mathematics of Faculty of Science and Technology
- Criteria : Academic performance
- Amount : Two prizes, MOP5,000 each

Jorge Alvares Foundation Academic Prize**歐維治基金會學術獎項**

- Eligibility : Bachelor's degree potential graduates
- Criteria : Academic performance
- Amount :
1. One prize of EUR2,000 for student from Faculty of Arts and Humanities, Faculty of Business Administration, Faculty of Education, Faculty of Health Sciences, Faculty of Science and Technology or Faculty of Social Sciences
 2. One prize of EUR1,500 for student from Faculty of Law

WICH Law Firm and Private Notary Academic Prize

永俊豪律師事務所暨私人公證員學術獎項

Eligibility	:	Bachelor's degree potential graduates majoring in Law in Chinese language (Daytime/Evening) or majoring in Law (Conducted in Chinese and Portuguese)
Criteria	:	Academic performance
Amount	:	1. One prize of MOP10,000 for student majoring in Law in Chinese language 2. One prize of MOP10,000 for student majoring in Law (Conducted in Chinese and Portuguese)

X Fintech Asia Academic Prize

亞洲金融科技有限公司學術獎項

Eligibility	:	Local bachelor's degree potential graduates majoring in Computer Science
Criteria	:	Academic performance
Amount	:	Two prizes, MOP5,000 each

Macau Civil Engineering Laboratory (LECM) Academic Prize

土木工程實驗室學術獎項

Eligibility	:	Bachelor's degree potential graduates majoring in Civil Engineering
Criteria	:	Academic performance
Amount	:	One prize of MOP10,000

ERS Academic Prize

易研方案學術獎項

Eligibility	:	Bachelor's degree potential graduates in the Department of Communication and Department of Computer and Information Science
Criteria	:	Academic performance
Amount	:	Two prizes, MOP5,000 each

MIL Law Office Academic Prize

莫綺玲律師事務所學術獎項

Eligibility	:	Best bachelor's degree potential graduates majoring in Law in Portuguese language
Criteria	:	Academic performance (with minimum scale 15)
Amount	:	One prize of MOP10,000

Scholarships and Studentships

APPENDICES

Undergraduate Scholarships

University of Macau Grand Lotus Scholarship

澳門大學大蓮花獎學金

- Eligibility : Applicants of bachelor's degree programmes admitted through the Principals' Recommended Admission Scheme (PRA)
- Criteria : Students who have outstanding academic performance, talents or achievements
- Amount : Full waiver of tuition fee and RC fee; scholarship of MOP30,000 per year; eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

University of Macau Golden Lotus Scholarship

澳門大學金蓮花獎學金

- Eligibility : Applicants of bachelor's degree programmes admitted through the Principals' Recommended Admission Scheme (PRA)
- Criteria : Students who have outstanding academic performance, talents or achievements
- Amount : Full waiver of tuition fee; eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

University of Macau Silver Lotus Scholarship

澳門大學銀蓮花獎學金

- Eligibility : Applicants of bachelor's degree programmes admitted through the Principals' Recommended Admission Scheme (PRA)
- Criteria : Students who have outstanding academic performance, talents or achievements
- Amount : Half waiver of tuition fee
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

University of Macau First Year Scholarship

澳門大學首年級獎學金

- Eligibility : Applicants of bachelor's degree programmes admitted through the Principals' Recommended Admission Scheme (PRA)
- Criteria : Other students admitted through the PRA Scheme
- Amount : One-off scholarship of MOP5,000 tuition fee reduction in the first year of study (no continuation)

University of Macau Golden Lotus Scholarship for Admission Examination

澳門大學入學考試金蓮花獎學金

- Eligibility : Admission examination candidates
- Criteria : Admission examination candidates with outstanding examination result
- Amount : Full waiver of tuition fee; eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

University of Macau Full Scholarship for Undergraduate Students

澳門大學學士學生全免獎學金

- Eligibility : Bachelor's degree students from Mainland China, Hong Kong and Taiwan region
- Criteria : Students who have outstanding academic performance and assessment evaluation
- Amount : Full waiver of tuition fee and RC fee; eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

International Student Scholarship (Bachelor Students) – Full Scholarship

國際學生獎學金（學士學位）－全免獎學金

- Eligibility : International bachelor's degree students, excluding Mainland China, Hong Kong and Taiwan region
- Criteria : Students who have outstanding academic performance and assessment evaluation
- Amount : Full waiver of tuition fee and RC fee
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

International Student Scholarship (Bachelor Students) – Half Scholarship

國際學生獎學金（學士學位）－半免獎學金

- Eligibility : International bachelor's degree students, excluding Mainland China, Hong Kong and Taiwan region
- Criteria : Students who have outstanding academic performance and assessment evaluation
- Amount : Half waiver of tuition fee and RC fee
- Continuation : Students can continue their scholarship during the normal study period upon fulfilment of the particular academic and RC requirements

University of Macau Golden Lotus Scholarship for Outstanding Student-Athletes

澳門大學傑出運動員金蓮花獎學金

- Eligibility : Local applicants of bachelor's degree programmes admitted through the Outstanding Student-Athletes Admission Scheme
- Criteria : Students who meet the academic requirements, with excellent sports performance and achievements

APPENDICES

Principals' Recommended Admission Rules

(Approval by the Rector on 30 October 2023)

1. Introduction

As the primary comprehensive university in the region, the University of Macau (UM) is committed to fostering local high quality and well-round talents as our mission. To this end, the **"Principals' Recommended Admission Scheme"** is established to allow local secondary school principals to recommend outstanding local students for direct admission. Under the scope of general Principals' Recommended Scheme, two sub-schemes namely the **"Chinese and Portuguese Bilingual Talent Nurturing Scheme"** and **"Outstanding Student-Athletes Admission Scheme"** are also devised so as to cultivate outstanding local Chinese and Portuguese talents for Macao S.A.R. as well as to encourage local student-athletes to pursue higher academic qualifications and to continue to make breakthrough in their sports achievement.

2. Recommended Qualification

Scheme	Application Qualification
"Principals' Recommended Admission Scheme"	<ol style="list-style-type: none"> Excellent academic performance and good conduct; Must hold Macao SAR Resident I.D. card and currently studying in Form 6 or equivalent of Macao secondary school; Ranked among top 10% in terms of academic performance amongst all Form 5 (or equivalent) students (among total students from arts, commerce, science and other streams). Applicants who may not meet criteria of above point 3 but possess any of the following outstanding academic performance, talents or achievements may also be recommended: <ul style="list-style-type: none"> ✓ Academic awards/ qualifications achieved (e.g. public academic competitions or public exams); ✓ Non-academic awards/ qualifications achieved (e.g. talents of the musicianship or sports area).
"Chinese and Portuguese Bilingual Talent Nurturing Scheme"	<ol style="list-style-type: none"> Excellent academic performance and good conduct; Must hold Macao SAR Resident I.D. card and currently studying in Form 6 or equivalent of Macao secondary school; Ranked among the top 30% in terms of academic performance amongst all Form 5 (or equivalent) students (including all students in arts, commerce, science and other streams); Attained the proficiency of CIPLE Level A2 (Certificado Inicial de Português Língua Estrangeira Nível A2) or equivalent (or such proficiency proof can be declared by the school); Applicants must apply for admission to Bachelor of Arts in Portuguese Studies of Faculty of Arts and Humanities.
"Outstanding Student-Athletes Admission Scheme"	<ol style="list-style-type: none"> Excellent sports performance and good conduct; Must hold Macao SAR Resident I.D. card and currently studying in Form 6 or equivalent of Macao secondary school; Represented Macao S.A.R. to participate in international/regional sports competition within the last two years; Applicants, who may not fulfil the condition of above point 3 but have represented Macao S.A.R. with good sports performance, can also apply by submitting the recommendation letter from sports association together with the recommendation by the school principal.

3. Application Procedures and Documents

- Recommended applicants must submit an on-line application for Principals' Recommended Admission together with the following required documents within the

application period (Please refer to the “User Manual of Online Application System for Principals’ Recommended Admission 2024/2025”):

Documents (in A4 size except photo)	Remarks
<ul style="list-style-type: none"> Valid Macao I.D. card 	Both sides on one paper
<ul style="list-style-type: none"> One passport size color photo 	<ul style="list-style-type: none"> 3.5cm X 4.5cm white background is preferred
<ul style="list-style-type: none"> Official transcript of academic records for the recent two years of secondary education 	Academic records for Form 4 to Form 5
<p>Applicants being recommended with qualification of specific talents or outstanding achievements:</p> <ul style="list-style-type: none"> Related certificates or proof for supplementary information of special talents, awards or community service 	<ul style="list-style-type: none"> Qualification or award attained only during secondary school study is accepted. Photo of medal/trophy cannot serve as proof of award, which should be provided in the form of a testimonial issued by related authority/association or secondary school.
<p>Applicable to applicants for “Chinese and Portuguese Bilingual Talent Nurturing Scheme” only:</p> <ul style="list-style-type: none"> Related certificates or proof for proficiency of CIPLE Level A2 (Certificado Inicial de Português Língua Estrangeira Nível A2) or equivalent 	If such proof is not available, a declaration to support applicants’ equivalent proficiency issued by the school is accepted.
<p>Applicable to applications for “Outstanding Student-Athletes Admission Scheme” only:</p> <ul style="list-style-type: none"> Related certificates or proof of representing Macao S.A.R. to participate in international/regional sports competition within the last two years, or a written recommendation from sports association. 	---

3.2 Interview will be conducted for qualified applicants.

4. Successful Applicants

4.1 Admission and Scholarship

4.1.1 For admission selection of “Principals’ Recommended Admission Scheme” and “Chinese and Portuguese Bilingual Talent Nurturing Scheme”:

4.1.1.1 The admission assessment is made by a holistic approach including factors of students’ school performance, ranking, academic and non-academic talents, community service and interview, etc.,

4.1.1.2 Successful students admitted to our bachelor programme 2024/2025 intake may be granted one of the following scholarships:

- University of Macau Grand Lotus Scholarship;
- University of Macau Golden Lotus Scholarship;
- University of Macau Silver Lotus Scholarship;
- University of Macau First Year Scholarship.

4.1.1.3 Scholarship Content

Scholarship Type	Content	Remarks
University of Macau Grand Lotus Scholarship*	<ul style="list-style-type: none"> • Full waiver of tuition fee for 1st academic year; • Full waiver of Residential College accommodation fee for 1st academic year for around 10 months of 2 semesters (Students must stay in Residential College for the 1st academic year as to enjoy the full waiver of Residential College accommodation fee. If students are waived to stay in Residential College during the study period, the full waiver of fee will not be granted.); 	<ul style="list-style-type: none"> • The Lotus Scholarships are renewable. Please refer to Continuation Rules of “University of Macau Lotus Scholarship” 2024/2025 attached. • Subject to the scholarship type and continuation eligibility, students will also enjoy appropriate tuition fee waiver if they enrol in Honours College Certificate Programme and first registered minor programme upon admission.
University of Macau Grand Lotus Scholarship (continue)	<ul style="list-style-type: none"> • A scholarship of MOP 30,000 for 1st academic year; • Eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview 	
University of Macau Golden Lotus Scholarship*	<ul style="list-style-type: none"> • Full waiver of tuition fee for 1st academic year; • Eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview 	
University of Macau Silver Lotus Scholarship*	<ul style="list-style-type: none"> • Half waiver of tuition fee for 1st academic year. 	

Scholarship Type	Content	Remarks
University of Macau First Year Scholarship	<ul style="list-style-type: none"> One-off MOP5,000 scholarship. 	<ul style="list-style-type: none"> The amount will be used to offset part of the tuition fee payable for the 1st semester of 1st academic year.

4.1.2 For students to be admitted through “Outstanding Student-Athletes Admission Scheme”, admission assessment will base on applicants’ sports achievements, faculty interview and sports skill test performance (if applicable). For more information about the scholarship, please visit the website at <https://sports.osa.um.edu.mo/scholarshipscheme/>.

4.1.3 Successful applicants must hold a valid Macao I.D. card.

4.1.4 If a successful applicant defers study in the first academic year, the scholarship qualification will be terminated (inclusive of tuition fee waiver, Residential College accommodation fee waiver and related eligibility).

4.2 Successful applicants are not permitted to change their programmes of study once they have confirmed acceptance to the University.

4.3 After a successful applicant has accepted the admission (returning the “Statement of Acceptance”), he/she is not permitted to apply for admission to the Bachelor’s degree programmes of the University by other channels. If he/she is found to be admitted through other channels, the University reserves the rights to cancel his/her admission qualifications.

4.4 All students admitted through the Principals’ Recommended Admission Scheme will follow the Admission Rules Governing Bachelor’s Degree Programmes. Please visit the website at <https://reg.um.edu.mo/admissions/> for details.

4.5 Obligation

4.5.1 Upon admission, scholarship recipients of “Principals’ Recommended Admission Scheme” and “Chinese and Portuguese Bilingual Talent Nurturing Scheme” are obliged to participate and assist in any university activities which aim to cultivate students’ sense of community service and their practical competence during the undergraduate study.

4.5.2 Upon admission, scholarship recipients of “Outstanding Student-Athletes Admission Scheme” are obliged to participate and assist in any university sports activities and represent UM to participate in any sports competitions during the undergraduate study.

5. Important Dates to Note

Date	Event
23 September 2023	Principals’ Recommended Admission Talk
18 September – 6 October 2023	Application period
6 – 12 November 2023	Release of interview eligibility (interview permit will be released via online application system)
11 – 12 November 2023	Interview
Early December 2023	▪ Announcement of interview result

Date	Event
	▪ Confirmation of admission by offered applicants
Late January 2024	Submission of "Statement of Acceptance"
Late July 2024	Submission of registration documents (students are advised to proceed the medical examination from mid-May)
Mid-August 2024	New students move in Residential Colleges and Orientation
19 August 2024	Class commencement 2024/2025 (please visit to website at https://reg.um.edu.mo/university-almanac/ for details)

6. Admission Policy for Students with Disability

To provide equal admission opportunities, necessary study environment and facilities for students with disability, the University has devised the "Admission Policy for Students with Disability". Please visit the website at <https://reg.um.edu.mo/admissionpolicy> for details.

7. Disqualification

Applicants must guarantee that the information given in the application form is TRUE. The University of Macau reserves the rights to terminate an application, admission, study and scholarship at any time if:

- any information given in his/her application form is found later to be untrue and/or incorrect;
- an applicant had made untruthful declarations;
- an applicant offered with admission is found to have violated any of the regulations of the University of Macau or misconduct behavior.

Should such cases occur, the applicant any fees paid will not be refunded and all documents submitted will not be returned, the applicant shall bear the administrative, civil and criminal responsibilities under the law. He/she has to return the scholarship and no scholarship will be granted during the study.

Continuation Rules of “University of Macau Lotus Scholarship” 2024/2025

1. Target students

For students admitted with “University of Macau Lotus Scholarship” 2024/2025.

2. Qualifications

To enjoy the continuation of scholarship within the normal study period, students must:

- 2.1 complete at least 24 credits or the number of credits required by the designated study plan of the academic year at the University;
- 2.2 achieve the Residential College requirements (Please refer to website of Residential College at <https://rc.um.edu.mo/>)
- 2.3 achieve the following academic year's performance (yearly GPA):

Scholarship Type	For Faculty of Arts and Humanities, Faculty of Business Administration, Faculty of Education, Faculty of Health Sciences, Faculty of Social Sciences and Faculty of Science and Technology	For Faculty of Law		
	Grade Point Average (The highest letter grade is A, GPA=4.00)	% of Tuition Exempted	20-Point System	% of Tuition Exempted
University of Macau Grand Lotus Scholarship/ University of Macau Golden Lotus Scholarship	GPA: 3.30-4.00	100%	14	100%
University of Macau Silver Lotus Scholarship	GPA: 3.30-4.00	50%	14	50%

3. Scholarship period

The scholarship period is based on the normal study period of the registered major.

4. Termination of scholarship

The University reserves the rights to terminate the scholarship (inclusive of tuition fee waiver, Residential College accommodation fee waiver and related eligibility) if a student:

- 4.1 cannot achieve the academic year's performance mentioned above;
- 4.2 cannot complete his/her study within the normal period of study;
- 4.3 cannot achieve the Residential College requirements.

The University of Macau reserves the rights to terminate the study and scholarship at any time if the student is found to have any misconduct behavior who shall bear the administrative, civil and criminal responsibilities under the law, any fees paid will not be refunded, have to return the scholarship and no scholarship will be granted during the study.

5. For students admitted through “Outstanding Student-Athletes Admission Scheme”, please visit Office of Sports Affairs website at <https://osa.um.edu.mo/> for details of Continuation Rules of University of Macau Lotus Scholarship.

Rules on University of Macau Lotus Scholarship for Admission Examination

(Approval by the Rector on 28 November 2023)

To recognize candidates for their outstanding performance in the Admission Examination, the “University of Macau Golden Lotus Scholarship for Admission Examination” is awarded to the most competent students.

1. Target students

- 1.1 All eligible candidates must hold a valid Macao I.D. card; and
- 1.2 Must have sat for the Admission Examination of the current year. Candidates who have been exempted from taking particular Admission Examination subject(s) will not be eligible for selection of the scholarship for Admission Examination.

Scholarship selection is based on a candidate's Admission Examination result, but not including any bonus marks added through the Preferential Admission Scheme.

2. Scholarship Content

- 2.1 “University of Macau Golden Lotus Scholarship for Admission Examination” includes:
 - 2.1.1 Full waiver of tuition fee for 1st academic year;
 - 2.1.2 Eligibility of conditional admission to Honours College Certificate Programme upon passing the screening interview;
 - 2.1.3 Tuition fee for Honours College Certificate Programme (if applicable);
 - 2.1.4 Tuition fee for the first registered minor programme (if applicable).
- 2.2 For the continuation scheme of scholarship, please refer to point 3 for “Continuation Rules for Scholarship”. If a successful applicant defers study in the first academic year, the scholarship qualification will be terminated.
- 2.3 Scholarship recipients are obliged to participate and assist in any university activities which aim to cultivate students' sense of community service and their practical competence during
 - 1.1 the undergraduate study.

3. Continuation Rules for Scholarship

- 3.1 All students granted with the “University of Macau Golden Lotus Scholarship for Admission Examination”, subject to their yearly academic performance, can continue enjoying full tuition fee waiver during 2nd to 4th academic year of study (during 2nd to 5th academic year of study for Bachelor of Law five-year programmes);
- 3.2 Evaluation is based on each academic year's performance, the yearly GPA;
- 3.3 Students must complete at least 24 credits or the number of credits required by the designated study plan of the academic year at the University.

3.4 Requirement of academic performance:

Scholarship Type	For students of the Faculty of Arts and Humanities, Faculty of Business Administration, Faculty of Education, Faculty of Health Sciences, Faculty of Social Sciences and Faculty of Science and Technology		For students of the Faculty of Law	
	Grade Point Average (GPA)	% of Tuition Exempted	20-Point System	% of Tuition Exempted
University of Macau Golden Lotus Scholarship for Admission Examination	3.30-4.00	100%	14	100%

4. Termination of Scholarship

- 4.1 If a candidate accepts a scholarship through "Principals' Recommended Admission" of the current year, he/she is not permitted to attend the Admission Examination of our University. If he/she is found to have applied for or to have attended the Admission Examination and is granted a scholarship for Admission Examination, the University reserves the right to remove his/her qualification for both scholarships (inclusive of tuition fee waiver and related eligibility).
- 4.2 The University reserves the right to disqualify the candidate's scholarship (inclusive of tuition fee waivers stipulated in item 2.1) if the candidate:
 - 4.2.1 cannot achieve the academic year's performance mentioned above;
 - 4.2.2 cannot complete his/her study within the normal period of study;
 - 4.2.3 cannot achieve Residential College requirements.
- 4.3 If a student who has made untruthful declarations, provided false information or obtained the benefits under the Scholarship by any illegal means should bear the administrative, civil and criminal responsibilities under the law, and should return to the University the monetary value granted under the subsidy.

Scholarship Continuation Policy for UM's Outgoing Exchange Students

(Approved by the Financial Management Committee on 31 October 2018)

[For Undergraduate Programmes Only]

This scholarship continuation policy applies to all UM's outgoing exchange students who are awarded scholarships by UM when admitted. UM's outgoing exchange students are advised to read this policy before they go abroad so as to know what requirements they should fulfil in order to continue their scholarships for the next academic year.

To be eligible for scholarship continuation, an outgoing exchange student should:

1. fulfil the exchange study plan which they have agreed with the academic unit concerned before they go abroad; and
2. achieve an overall result of Grade B, 3.0 on the 4-point GPA scale, or 13 on the 20-point scale at the exchange university. If the exchange university does not adopt any of these grading systems, the academic unit concerned could decide whether the student achieves such requirement based on the grading system adopted by the exchange university.

If the above 3 requirements are fulfilled, scholarship continuation would be granted and tuition fee would be exempted based on the student's academic result achieved at UM accordingly.

- For students joining the one-year exchange programme, tuition fee exemption would be based on their yearly GPA achieved at UM in the previous academic year.
- For students joining the one-semester exchange programme, tuition fee exemption would be based on their GPA achieved in the semester at UM in the exchange academic year.

For details of the related scholarship schemes, please visit the Registry's webpage at <https://reg.um.edu.mo/current-students/enrolment-and-examinations/scholarships/>.

APPENDICES

Funding Guidelines for PhD and Master's Students

Guidelines for the UM PhD Scholarship and the UM PhD Teaching Research Assistant

(Approved by the Rector on 05 January 2024)

1. Objective

The University of Macau (UM) established the UM PhD Scholarship (*UMPS*) and the UM PhD Teaching Research Assistant (*UMTRA*) to recruit outstanding PhD students worldwide to pursue PhD studies as well as to gain practical teaching experience and conduct research at UM.

2. Application

2.1. Eligibility

2.1.1. Anyone seeking full-time PhD degree studies and opportunities to gain teaching and research experience at the UM is eligible to apply, regardless of nationality, ethnic background, or prior work experience.

2.1.2. Applicants should fulfill all general admission requirements for PhD degree programmes and any additional admission requirements for certain programmes.

2.2. Application procedures

2.2.1. Applications for the UMPS and the UMTRA should be submitted along with applications for admission to PhD degree programmes.

2.2.2. Degree certificates, research publications, academic awards, and other documents of academic achievements (if any), should be provided in their applications.

3. Selection

3.1. Applicants are assessed by the university-level selection committee according to the following criteria:

3.1.1. Academic excellence

3.1.2. Research abilities or potential

3.1.3. Innovation skills

3.1.4. Communication and interpersonal skills

3.1.5. Leadership abilities

3.2. The availability of the UMPS and the UMTRA is subject to quota limitation and decision of the university-level selection committee.

3.3. The UMPS is awarded to top-ranked applicants with excellent performance on the selection criteria. The UMTRA is classified into UMTRA-Type A and Type B, with UMTRA-Type A awarded to applicants with better performance on the selection criteria. The results of the UMPS or the UMTRA (Type A and Type B) are subject to the final decision of the university-level selection committee.

4. Offers

4.1. Successful applicants of the UMPS or the UMTRA are notified along with their PhD programme admission offers.

4.2. Successful applicants will be asked to provisionally accept their UMPS or UMTRA offers before registration. All conditions (if any) stated in the offers must be fulfilled. Offers that are once declined will not be re-considered.

4.3. Offer holders are strongly encouraged to complete registration at the UM on or before the 15th of the designated month of initial registration (usually August) in the 1st semester of an academic year. Late registration in the 1st semester will result in shortened support period (please refer to "7. Financial Support for UMPS Awardees" and "8. Financial Support for TRAs").

-
- 4.4. If an offer holder applies for deferment of studies before registration, he/she should also submit a separate application for suspension of support (please refer to “12. Deferment of Studies”).
- 4.5. Following the completion of registration, offer holders are required to sign their offer letters of the UMPS or the UMTRA with their respective academic units and provide information of their bank accounts in Macao on the student information system (<https://isw.um.edu.mo/siweb/>). If an offer holder fails to sign the offer letter, the UM may withhold or cancel the offer. If an offer holder fails to provide their bank information at the time of processing, the disbursement of monthly stipend will be delayed.

5. Requirements for UMPS Awardees and TRAs

- 5.1. To be eligible for UMPS or UMTRA, students must comply with the following requirements throughout their support period:
- 5.1.1. Remain without any form of paid employment (please refer to “14. Termination of Support”). Services for the UM with non-monetary rewards or benefits (e.g. meals or accommodation) are not considered as paid employment.
 - 5.1.2. Remain without any other form of scholarships or assistantships (please refer to “14. Termination of Support”).
 - 5.1.3. Study exclusively at UM as full-time students of their enrolled PhD degree programmes (except academic agreements approved by the UM).
 - 5.1.4. Maintain an active status throughout the support period.
 - 5.1.5. Report to the supervisor regularly and fulfil duties assigned by the UM (please refer to “10. Duties”).
 - 5.1.6. Submit progress reports on time (please refer to “13. Suspension of Support” and “14. Termination of Support”).
- 5.2. Item 5.1.1 and 5.1.2 are not applicable to UMTRA-Type B.
- 5.3. Students who are or have been supported by the UMPS or the UMTRA have to specify UM as their primary affiliation in all publications out of the thesis/theses, unless agreed by the supervisor.
- 5.4. Failure to comply with any of the above requirements will result in suspension or termination of the UMPS or the UMTRA, unless justifications are endorsed by the Deans/Directors of the academic units concerned, and approved by the Vice Rector (Research) via the Graduate School.

6. Renewal

- 6.1. The UMPS or the UMTRA is renewed on an annual basis. Awardees or TRAs should confirm and accept their renewal with their respective academic units.
- 6.2. Renewal of the UMPS or the UMTRA is based on academic performance, duty performance, and evaluation by supervisor.

7. Financial Support for UMPS Awardees

- 7.1. The support for all eligible awardees begins only after they have completed registration, except special cases approved by the UM. The six-month period from August to January of the next calendar year is regarded as the 1st semester, while the six-month period from February to July is regarded as the 2nd semester.
- 7.2. Shortened support period due to late registration will not be compensated.
- 7.3. Monthly stipend
- 7.3.1. The UMPS provides each eligible awardee with a monthly stipend of MOP20,000 for a support period up to four years (48 months).
 - 7.3.2. Eligible awardees who complete their registration on or before the 15th of that month will be provided with full-month support starting from the month of registration. If registration is completed only after the 15th of that month, no support will be provided for that month.
 - 7.3.3. Tuition fees will be offset by the monthly stipend before stipend disbursement (please refer to “9. Tuition Fees Offset”).

8. Financial Support for TRAs

- 8.1. The support for all eligible TRAs begins only after the TRAs have completed registration, except special cases approved by the UM. The six-month period from August to January of the next calendar year is regarded as the 1st semester, while the six-month period from February to July is regarded as the 2nd semester.
- 8.2. Shortened support period due to late registration will not be compensated.
- 8.3. TRAs admitted in Academic Year 2023/2024 are supported by UMTRA-Type A. TRAs admitted in Academic Year 2024/2025 onwards are supported by UMTRA-Type A or UMTRA-Type B.
- 8.4. Monthly stipend of UMTRA-Type A
 - 8.4.1. The UMTRA-Type A provides each eligible TRA with a starting monthly stipend of MOP12,500 for a support period up to four years (48 months).
 - 8.4.2. TRAs who submit both progress reports on time in an academic year, and are graded Scale 5 in both progress reports in the same academic year by their supervisors, will be entitled to a MOP500 increase in monthly stipend starting from the next academic year. The upper limit of the monthly stipend amount is MOP14,000.
 - 8.4.3. TRAs who postpone their registration to the 2nd semester and thus have only one progress report rating will not be entitled to the MOP500 increase in the next academic year.
 - 8.4.4. Tuition fees will be offset by the monthly stipend before stipend disbursement (please refer to "9. Tuition Fees Offset").
- 8.5. Monthly stipend of UMTRA-Type B
 - 8.5.1. The UMTRA-Type B provides each eligible TRA with a monthly stipend that is equivalent to the monthly average of the programme full tuition fees during the normative study period.
 - 8.5.2. UMTRA-Type B is compatible with other financial support. The upper limit of financial support given to a TRA per month is MOP12,500 less the monthly stipend of UMTRA-Type B.
- 8.6. Eligible TRAs who complete their registration on or before the 15th of that month will be provided with full-month support starting from the month of registration. If registration is completed only after the 15th of that month, no support will be provided for that month.

9. Tuition Fees Offset

- 9.1. Tuition fees are offset in monthly installments by the monthly stipend before stipend disbursement. Under normal circumstances, UMPS awardees and TRAs do not need to settle the tuition fees by themselves during their support period.
- 9.2. The following are details of monthly tuition fees offset for UMPS awardees and TRAs (examples in "Appendix"):
 - 9.2.1. The amount of monthly tuition fees offset is the monthly average of the programme full tuition fees.
 - 9.2.2. For UMTRA-Type A, in the first five months upon registration (except late registration), tuition fees will also be offset by the monthly average of the non-refundable deposit. For UMTRA-Type B, the non-refundable deposit will be returned to the student after initial registration.
 - 9.2.3. For awardees and TRAs who register late at UM, tuition fees incurred that are not covered by the monthly stipend will be paid by the student to the Finance Office.
- 9.3. After the end of the support period or when support is suspended or terminated, students will need to begin settling tuition fees by themselves.
- 9.4. In case of suspension or termination of support, any outstanding tuition fees not offset by the monthly stipend are payable by the students. The payable amount will be shown in the Debit Note provided by the Finance Office.

10. Duties

- 10.1. Aside from fulfilling the duties and responsibilities as full-time PhD students, UMPS awardees and TRAs are required to fulfil one or more of the following types of duties:

-
- 10.1.1. Ancillary teaching (including the supervision of master's theses)
 - 10.1.2. Administrative service
 - 10.1.3. Research
- 10.2. Duties of 5 to 15 hours per week are assigned by academic units and/or supervisors.

11. Responsibilities of Supervisors

- 11.1. Supervisors should schedule regular meetings with their students and provide them with guidance.
- 11.2. Supervisors should maintain a fair and professional manner in accordance with relevant regulations, rules, and guidelines of the UM.

12. Deferment of Studies

- 12.1. UMPS awardees or TRAs who defer their studies should submit a separate application for the suspension of support if deemed necessary. Only medical or other exceptional cases with strong justifications will be accepted for suspension. Otherwise, the UMPS or the UMTRA will be terminated.
- 12.2. The suspension of support due to deferment of studies should be endorsed by supervisors and approved by the Deans/Directors of academic units concerned. The Graduate School and the Finance Office should then be informed accordingly.
- 12.3. UMPS awardees or TRAs can only apply for suspension once and the suspension period should not exceed two semesters. Special cases are subject to the approval by the Vice Rector (Research).
- 12.4. For UMPS awardees and TRA-Type As, the monthly stipend for the starting month of deferment is provided on a pro rata basis, while no financial support is provided during other months of deferment. For TRA-Type Bs, the full monthly stipend for the starting month of deferment is provided if the approval date of deferment is on or after the 16th of the month.
- 12.5. The starting month of deferment is counted as a whole month towards the support period, regardless of the amount of monthly stipend disbursed. However, other months of deferment are not counted towards the support period.

13. Suspension of Support

- 13.1. The UMPS or the UMTRA will be suspended in any of the following cases:
 - 13.1.1. Deferment of studies (please refer to "12. Deferment of Studies").
 - 13.1.2. Failure to fulfil duties assigned by the UM (please refer to "10. Duties").
 - 13.1.3. Absence from duties without prior approval or unjustified absence.
 - 13.1.4. Failure to submit progress reports on time.
- 13.2. For suspension due to conditions stated in Item 13.1.2 to 13.1.4, the period of suspension is counted towards the support period.
- 13.3. If awardees or TRAs fail to submit the progress report within one month after the submission deadline, the UMPS or the UMTRA will automatically be suspended from the subsequent month until the month following the submission of report.

14. Termination of Support

- 14.1. The UMPS or the UMTRA will be terminated in any of the following cases:
 - 14.1.1. Failure to maintain an active status, except conditions stated in Item 12.1.
 - 14.1.2. Completion of the PhD degree programme.
 - 14.1.3. Awardees or TRAs undertaking any forms of paid employment.
 - 14.1.4. Awardees or TRAs receiving any other form of scholarships and assistantships.
 - 14.1.5. Concurrent registration at other higher education institutions (except academic agreements approved by the UM).
 - 14.1.6. Violation of regulations, rules, and guidelines of the UM.
 - 14.1.7. Misrepresentation, fraudulence, and non-disclosure of information in the applications of the UMPS or the UMTRA.
 - 14.1.8. Non-compliance with leave of absence requirements.

- 14.1.9. Awardees or TRAs receive any of the following combinations of progress report ratings from supervisors:
 - 14.1.9.1. Two Scale 2 in any two progress reports; or
 - 14.1.9.2. Two Scale 1 in any two progress reports; or
 - 14.1.9.3. A Scale 2 and a Scale 1 in any two progress reports.
 - 14.1.9.4. In extraordinary circumstances, a Scale 1 in any one report.
 - 14.1.10. Unsatisfactory duty performance.
 - 14.2. Item 14.1.3 and 14.1.4 are not applicable to UMTRA-Type B.
 - 14.3. Terminated UMPS and UMTRA cannot be resumed.
 - 14.4. No stipend will be provided for the effective month of termination regardless of the hours of duties fulfilled. Exception for UMPS awardees and TRA-Type As is graduation or withdrawal of studies before the end of the support period, for which the stipend for the effective month will be provided on a pro rata basis. Exception for TRA-Type Bs is graduation before the end of support period, for which the full stipend for the effective month will be provided if the graduate date is on or after the 16th of the month.
 - 14.5. Termination does not exempt students from the payment of any outstanding fees.
 - 14.6. For cases from 14.1.3 to 14.1.7, the UM reserves the right to collect any financial support previously provided to the awardees or TRAs.
 - 14.7. For cases from 14.1.9.1 to 14.1.9.3, the UMPS or the UMTRA will be terminated automatically at the end of the month of evaluation.
 - 14.8. For cases of 14.1.9.4, the supervisor may suggest termination to the UMPS or the UMTRA with justification to the Dean/Director of the academic unit concern for endorsement, and to the Dean of Graduate School for approval. However, this should be exercised only under extraordinary circumstances. For example, for an awardee or a TRA who refuses a substantial portion of the assigned duties in the semester.
 - 14.9. For termination due to unsatisfactory performance of the duties assigned by the academic units or the supervisor, the concerned unit shall form a unit-level ad-hoc committee to review the case and make recommendation for approval of Vice Rector (Research) via the Graduate School.
- 15. Demotion**
- 15.1. UMPS Awardees and TRA-Type As will be demoted if they have received any of the following combinations of progress report ratings from their supervisors:
 - 15.1.1. Two Scale 3 in any two reports; or
 - 15.1.2. A Scale 3 and a Scale 2 in any two reports; or
 - 15.1.3. A Scale 3 and a Scale 1 in any two reports.
 - 15.1.4. In extraordinary circumstances, a Scale 2 or Scale 1 in any one report.
 - 15.2. Demotion is proposed by the supervisor to the Dean/Director of the academic unit concerned for endorsement, and to the Vice Rector (Research) for approval via the Graduate School.
- 16. Special Cases**
- 16.1. For UMPS awardees and TRAs under the “1+3 PhD Programme”, tuition fees offset will apply after their tuition fee waiver period and duties will apply after the completion of their arranged master’s degree programmes.
 - 16.2. For UMPS awardees and TRAs under the Dual Doctoral Degree Programme, they are required to maintain an active status during their outgoing semesters.
 - 16.3. Participation in exchange programmes will be approved on a case-by-case basis.
 - 16.4. For duly justified exceptions, special approval from the Vice Rector (Research) should be sought.
- 17. Administration**
- The UMPS and the UMTRA are administered by the Graduate School. For uncertain or ambiguous cases, discretion from the Graduate School should be sought.
- 18. Applicability**

This set of Guidelines is effective upon approval and is only applicable to UMPS awardees and TRAs who are admitted from Academic Year 2023/2024 onwards (UM-centralized funding).

19. Remark

The Guidelines are subject to revisions by the UM. When revisions are made, UMPS awardees and TRAs will be informed accordingly.

Appendix Examples of Tuition Fees Offset

Example 1

Admission Year: Academic Year 2023/2024

Residence: Mainland China

Details	UMPS Awardee	TRA-Type A
Period: August to December 2023	Amount (MOP)	Amount (MOP)
Original monthly stipend	20,000	12,500
Tuition fees offset (MOP150,000 per programme ÷ 48 months) – (MOP5,000 Non-refundable deposit ÷ 5 months)	-2,125	-2,125
Monthly stipend after tuition fees offset	17,875	10,375

Details	UMPS Awardee	TRA-Type A
Period: January 2024 onward	Amount (MOP)	Amount (MOP)
Original monthly stipend	20,000	12,500
Tuition fees offset (MOP150,000 per programme ÷ 48 months)	-3,125	-3,125
Monthly stipend after tuition fees offset	16,875	9,375

Example 2

Admission Year: Academic Year 2023/2024

Residence: Mainland China

Graduation Date: 28 July 2027

Details	UMPS Awardee	TRA-Type A
Period: July 2027	Amount (MOP)	Amount (MOP)
Monthly stipend (MOP20,000 or 12,500 x 28 days ÷ 30 days)	18,666.67	11,666.67
Tuition fees offset (MOP150,000 per programme ÷ 48 months)	-3,125.00	-3,125.00
Monthly stipend after tuition fees offset	15,541.67	8,541.67

Guidelines for the UM Macao PhD Scholarship and the UM PhD Assistantship

(Approved by by the Rector on 05 January 2024)

1. Objective

The University of Macau (UM) established the UM Macao PhD Scholarship (*MPDS*) and the UM PhD Assistantship (*Assistantship*) to recruit outstanding PhD students worldwide.

2. Application

2.1. Eligibility

2.1.1. Anyone seeking full-time PhD degree studies at the UM is eligible to apply, regardless of nationality, ethnic background, or prior work experience.

2.1.2. Applicants should fulfill all general admission requirements for PhD degree programmes and any additional admission requirements for certain programmes.

2.2. Application procedures

2.2.1. Applications for the MPDS and the Assistantship should be submitted along with applications for admission to PhD degree programmes.

2.2.2. Degree certificates, research publications, academic awards, and other documents of academic achievements (if any), should be provided in their applications.

3. Selection

3.1. Applicants are assessed by the university-level selection committee according to the following criteria:

3.1.1. Academic excellence

3.1.2. Research abilities or potential

3.1.3. Innovation skills

3.1.4. Communication and interpersonal skills

3.1.5. Leadership abilities

3.2. The availability of the MPDS and the Assistantship is subject to quota limitation and decision of the university-level selection committee.

3.3. The MPDS is awarded to top-ranked applicants with excellent performance on the selection criteria. The results of the MPDS or the Assistantship are subject to the final decision of the university-level selection committee.

4. Offers

4.1. Successful applicants of the MPDS or the Assistantship are notified along with their PhD programme admission offers.

4.2. Successful applicants will be asked to provisionally accept their MPDS or Assistantship offers before initial registration. All conditions (if any) stated in the offers must be fulfilled. Offers that are once declined will not be re-considered.

4.3. Offer holders are strongly encouraged to complete registration at the UM on or before the 15th of the designated month of initial registration (usually August) in the 1st semester of an academic year. Late registration in the 1st semester will result in shortened support period (please refer to "7. Financial Support for MPDS Awardees" and "8. Financial Support for Assistantship Recipients").

4.4. If an offer holder applies for deferment of studies before registration, he/she should also submit a separate application for suspension of support (please refer to "12. Deferment of Studies").

4.5. Following the completion of registration, offer holders are required to sign their offer letters of the MPDS or the Assistantship with their respective academic units and provide information of their bank accounts in Macao on the student information system (<https://isw.um.edu.mo/siweb/>). If an offer holder fails to sign the offer letter, the UM may withhold or cancel the offer. If an offer holder fails to provide their bank information at the time of processing, the disbursement of monthly stipend will be delayed.

5. Requirements for MPDS Awardees and Assistantship Recipients

- 5.1. To be eligible for MPDS or Assistantship, students must comply with the following requirements throughout their support period:
 - 5.1.1. Remain without any form of paid employment (please refer to “14. Termination of Support”). Services for the UM with non-monetary rewards or benefits (e.g. meals or accommodation) are not considered as paid employment.
 - 5.1.2. Remain without any other form of scholarships or assistantships (please refer to “14. Termination of Support”).
 - 5.1.3. Study exclusively at UM as full-time students of their enrolled PhD degree programmes (except academic agreements approved by the UM).
 - 5.1.4. Maintain an active status throughout the support period.
 - 5.1.5. Report to the supervisor regularly and fulfil duties assigned by the UM (please refer to “10. Duties”).
 - 5.1.6. Submit progress reports on time (please refer to “13. Suspension of Support” and “14. Termination of Support”).
- 5.2. Students who are or have been supported by the MPDS or Assistantship have to specify UM as their primary affiliation in all publications out of the thesis/theses, unless agreed by the supervisor.
- 5.3. Failure to comply with any of the above requirements will result in suspension or termination of the MPDS or the Assistantship, unless justifications are endorsed by the Deans/Directors of the academic units concerned, and approved by the Vice Rector (Research) via the Graduate School.

6. Renewal

- 6.1. The MPDS or the Assistantship is renewed on an annual basis. Awardees or recipients should confirm and accept their renewal with their respective academic units.
- 6.2. Renewal of the MPDS or the Assistantship is based on academic performance, duty performance, and evaluation by supervisor.

7. Financial Support for MPDS Awardees

- 7.1. The support for all eligible awardees begins only after they have completed registration, except special cases approved by the UM. The six-month period from August to January of the next calendar year is regarded as the 1st semester, while the six-month period from February to July is regarded as the 2nd semester.
- 7.2. Shortened support period due to late registration will not be compensated.
- 7.3. Monthly stipend
 - 7.3.1. The MPDS provides each eligible awardee with a monthly stipend of MOP20,000 for a support period up to four years (48 months).
 - 7.3.2. Eligible awardees who complete their registration on or before the 15th of that month will be provided with full-month support starting from the month of registration. If registration is completed only after the 15th of that month, no support will be provided for that month.
 - 7.3.3. Tuition fees will be offset by the monthly stipend before stipend disbursement (please refer to “9. Tuition Fees Offset”).
- 7.4. Conference or research-related travel allowance
 - 7.4.1. The MPDS provides each eligible awardee with a conference or research-related travel allowance. Awardees should refer to the *Guidelines for Conference or Research-Related Travel Allowance of the UM Macao PhD Scholarship* for details.

8. Financial Support for Assistantship Recipients

- 8.1. The support for all eligible recipients begins only after the awardees have completed registration, except special cases approved by the UM. The six-month period from August to January of the next calendar year is regarded as the 1st semester, while the six-month period from February to July is regarded as the 2nd semester.
- 8.2. Shortened support period due to late registration will not be compensated.
- 8.3. Monthly stipend

- 8.3.1. The Assistantship provides each eligible recipient with a starting monthly stipend of MOP12,500 for a support period up to four years (48 months).
- 8.3.2. Recipients who submit both progress reports on time in an academic year, and are graded Scale 5 in both progress reports in the same academic year by their supervisors, will be entitled to a MOP500 increase in monthly stipend starting from the next academic year. The upper limit of the monthly stipend amount is MOP14,000.
- 8.3.3. Recipients who postpone their registration to the 2nd semester and thus have only one progress report rating will not be entitled to the MOP500 increase in the next academic year.
- 8.3.4. Eligible recipients who complete their registration on or before the 15th of that month will be provided with full-month support starting from the month of registration. If registration is completed only after the 15th of that month, no support will be provided for that month.
- 8.3.5. Tuition fees will be offset by the monthly stipend before stipend disbursement (please refer to "9. Tuition Fees Offset").

9. Tuition Fees Offset

- 9.1. Starting from 1 February 2021, tuition fees are offset in monthly installments by the monthly stipend before stipend disbursement. Under normal circumstances, MPDS awardees and Assistantship recipients do not need to settle the tuition fees by themselves during their support period.
- 9.2. The following are the amounts of tuition fees offset per month for MPDS awardees and Assistantship recipients admitted or resuming studies in different academic years (examples in "Appendix"):
- 9.2.1. For awardees admitted in Academic Year 2018/2019 or 2019/2020 and recipients admitted in Academic Year 2019/2020 and are following a credit-based tuition fee scheme, the amount of tuition fees offset will be the monthly average of three credits per semester. For the tuition fees due to enrolled credits beyond this amount, the awardees and recipients will need to pay by themselves.
- 9.2.2. For awardees and recipients who begin or resume their studies from Academic Year 2020/2021 onwards and are following a programme-based tuition fee scheme, the amount of tuition fees offset will be the monthly average of the programme full tuition fees.
- 9.2.3. In the first five months upon registration (except late registration), tuition fees will also be offset by the monthly average of the non-refundable deposit.
- 9.2.4. For awardees and recipients who register late at UM, tuition fees incurred that were not covered by the monthly stipend will be paid by the student to the Finance Office.
- 9.3. After the end of the support period or when support is suspended or terminated, students will need to begin settling tuition fees by themselves.
- 9.4. In case of suspension or termination of support, any outstanding tuition fees not offset by the monthly stipend are payable by the students. The payable amount will be shown in the Debit Note provided by the Finance Office.

10. Duties

- 10.1. Aside from fulfilling the duties and responsibilities as full-time PhD students, MPDS awardees and Assistantship recipients are required to fulfil one or more of the following types of duties:
 - 10.1.1. Ancillary teaching (including the supervision of master's theses)
 - 10.1.2. Administrative service
 - 10.1.3. Research
- 10.2. Duties of 5 to 15 hours per week are assigned by academic units and/or supervisors.

11. Responsibilities of Supervisors

- 11.1. Supervisors should schedule regular meetings with their students and provide them with guidance.
- 11.2. Supervisors should maintain a fair and professional manner in accordance with relevant regulations, rules, and guidelines of the UM.

12. Deferment of Studies

- 12.1. MPDS awardees or Assistantship recipients who defer their studies should submit a separate application for the suspension of support if deemed necessary. Only medical or other exceptional cases with strong justifications will be accepted for suspension. Otherwise, the MPDS or the Assistantship will be terminated.
- 12.2. The suspension of support due to deferment of studies should be endorsed by supervisors and approved by the Deans/Directors of academic units concerned. The Graduate School and the Finance Office should then be informed accordingly.
- 12.3. MPDS awardees or Assistantship recipients can only apply for suspension once and the suspension period should not exceed two semesters. Special cases are subject to the approval by the Vice Rector (Research).
- 12.4. Monthly stipend for the starting month of deferment is provided on a pro rata basis, while no financial support is provided during other months of deferment.
- 12.5. The starting month of deferment is counted as a whole month towards the support period, regardless of the amount of monthly stipend disbursed. However, other months of deferment are not counted towards the support period.

13. Suspension of Support

- 13.1. The MPDS or the Assistantship will be suspended in any of the following cases:
 - 13.1.1. Deferment of studies (please refer to “12. Deferment of Studies”).
 - 13.1.2. Failure to fulfil duties assigned by the UM (please refer to “10. Duties”).
 - 13.1.3. Absence from duties without prior approval or unjustified absence.
 - 13.1.4. Failure to submit progress reports on time.
- 13.2. For suspension due to conditions stated in Item 13.1.2 to 13.1.4, the period of suspension is counted towards the support period.
- 13.3. If awardees or recipients fail to submit the progress report within one month after the submission deadline, the MPDS or Assistantship will automatically be suspended from the subsequent month until the month following the submission of report.

14. Termination of Support

- 14.1. The MPDS or the Assistantship will be terminated in any of the following cases:
 - 14.1.1. Failure to maintain an active status, except conditions stated in Item 12.1.
 - 14.1.2. Completion of the PhD degree programme.
 - 14.1.3. Awardees or recipients undertaking any forms of paid employment.
 - 14.1.4. Awardees or recipients receiving any other form of scholarships and assistantships.
 - 14.1.5. Concurrent registration at other higher education institutions (except academic agreements approved by the UM).
 - 14.1.6. Violation of regulations, rules, and guidelines of the UM.
 - 14.1.7. Misrepresentation, fraudulence, and non-disclosure of information in the applications of the MPDS or the Assistantships.
 - 14.1.8. Non-compliance with leave of absence requirements.
 - 14.1.9. Awardees or recipients receive any of the following combinations of progress report ratings from supervisors:
 - 14.1.9.1. Two Scale 2 in any two progress reports; or
 - 14.1.9.2. Two Scale 1 in any two progress reports; or
 - 14.1.9.3. A Scale 2 and a Scale 1 in any two progress reports.
 - 14.1.9.4. In extraordinary circumstances, a Scale 1 in any one report.
 - 14.1.10. Unsatisfactory duty performance.
- 14.2. Terminated MPDS and Assistantship cannot be resumed.

- 14.3. No stipend will be provided for the effective month of termination regardless of the hours of duties fulfilled. Exception to that is graduation or withdrawal of studies before the end of the support period, in which the stipend for the effective month of termination will be provided on a pro rata basis.
 - 14.4. Termination does not exempt students from the payment of any outstanding fees.
 - 14.5. For cases from 14.1.3 to 14.1.7, the UM reserves the right to collect any financial support previously provided to the awardees or recipients.
 - 14.6. For cases from 14.1.9.1 to 14.1.9.3, the MPDS or Assistantship will be terminated automatically at the end of the month of evaluation.
 - 14.7. For cases of 14.1.9.4, the supervisor may suggest termination to the MPDS or Assistantship with justification to the Dean/Director of the academic unit concerned for endorsement, and to the Dean of Graduate School for approval. However, this should be exercised only under extraordinary circumstances. For example, for an awardee or a recipient who refuses a substantial portion of the assigned duties in the semester.
 - 14.8. For termination due to unsatisfactory performance of the duties assigned by the academic units or the supervisor, the concerned unit shall form a unit-level ad-hoc committee to review the case and make recommendation for approval of Vice Rector (Research) via the Graduate School.
- 15. Demotion**
- 15.1. MPDS awardees and Assistantship recipients will be demoted if they have received any of the following combinations of progress report ratings from their supervisors:
 - 15.1.1. Two Scale 3 in any two reports; or
 - 15.1.2. A Scale 3 and a Scale 2 in any two reports; or
 - 15.1.3. A Scale 3 and a Scale 1 in any two reports.
 - 15.1.4. In extraordinary circumstances, a Scale 2 or Scale 1 in any one report.
 - 15.2. Demotion is proposed by the supervisor to the Dean/Director of the academic unit concerned for endorsement, and to the Vice Rector (Research) for approval via the Graduate School.
- 16. Special Cases**
- 16.1. For MPDS awardees and Assistantship recipients under the “1+3 PhD Programme”, tuition fees offset will apply after their tuition fee waiver period and duties will apply after the completion of their arranged master’s degree programmes.
 - 16.2. Participation in exchange programmes will be approved on a case-by-case basis.
 - 16.3. For duly justified exceptions, special approval from the Vice Rector (Research) should be sought.
- 17. Administration**
- The MPDS and the Assistantship are administered by the Graduate School. For uncertain or ambiguous cases, discretion from the Graduate School should be sought.
- 18. Applicability**
- This set of Guidelines is effective upon approval and is only applicable to MPDS awardees and UM PhD Assistantship recipients (UM-centralized funding).
- 19. Remark**
- The Guidelines are subject to revisions by the UM. When revisions are made, MPDS awardees and Assistantship recipients will be informed accordingly.

Appendix Examples of Tuition Fees Offset

Example 1

Admission Year: Academic Year 2018/2019 or 2019/2020

Tuition Fee Scheme: Credit-based

Residence: Mainland China

	MPDS Awardee	Assistantship Recipient
Details	Amount (MOP)	Amount (MOP)
Original monthly stipend	20,000	12,500
Tuition fees offset (MOP3,310 per credit x 3 credits ÷ 6 months)	-1,655	-1,655
Monthly stipend disbursed to awardee/recipient	18,345	10,845

Example 2

Admission Year: Academic Year 2020/2021

Tuition Fee Scheme: Programme-based

Residence: Mainland China

	MPDS Awardee	Assistantship Recipient
Details	Amount (MOP)	Amount (MOP)
Original monthly stipend	20,000	12,500
Tuition fees offset (MOP111,760 per programme ÷ 48 months)	-2,328.33	-2,328.33
Monthly stipend disbursed to awardee/recipient	17,671.67	10,171.67

Example 3

Admission Year: Academic Year 2021/2022

Registration Date: 10 August 2021

Tuition Fee Scheme: Programme-based

Residence: Mainland China

	MPDS Awardee	Assistantship Recipient
Details	Amount (MOP)	Amount (MOP)
Period: August to December 2021 (5 months)		
Original monthly stipend	20,000	12,500
Tuition fees offset (MOP111,760 per programme ÷ 48 months) – (MOP5,000 Non-refundable deposit ÷ 5 months)	-1,328.33	-1,328.33
Monthly stipend disbursed to awardee/recipient	18,671.67	11,171.67
Details	Amount (MOP)	Amount (MOP)
Period: January 2022 onwards		
Original monthly stipend	20,000	12,500
Tuition fees offset (MOP111,760 per programme ÷ 48 months)	-2,328.33	-2,328.33
Monthly stipend disbursed to awardee/recipient	17,671.67	10,171.67

Example 4

Admission Year: Academic Year 2021/2022

Registration Date: 10 August 2021

Tuition Fee Scheme: Programme-based

Residence: Mainland China

Termination Date*: 18 May 2025

	MPDS Awardee	Assistantship Recipient
Details	Amount (MOP)	Amount (MOP)
Period: May 2025 (the 46 th month of support)		
Monthly stipend (MOP20,000 ÷ 30 days x 18 days) or (MOP12,500 ÷ 30 days x 18 days)	12,000	7,500
Tuition fees offset (MOP111,760 per programme ÷ 48 months)	-2,328.33	-2,328.33
Monthly stipend disbursed to awardee/recipient	9,671.67	5,171.67

*Due to circumstances that are eligible for pro rata monthly stipend as mentioned in the current Guidelines.

Guidelines for Conference or Research-Related Travel Allowance of the UM Macao PhD Scholarship

(Approved by the Rector on 14 October 2022)

1. General Guidelines

- 1.1. The UM Macao PhD Scholarship (MPDS) provides each eligible awardee with a conference or research-related travel allowance of MOP10,000 per calendar year (January to December) on a reimbursement basis during the support period.
- 1.2. Applications for the travel allowance are accepted starting from the second semester upon registration.
- 1.3. The travel allowance covers a maximum of two trips per calendar year.
- 1.4. The unused travel allowance in a calendar year cannot be carried forward to the next calendar year.
- 1.5. Trips taken by eligible awardees must be finished before the end of a calendar year and their support periods.

2. Applications

- 2.1. Each application for travel allowance consists of two steps:
 - 2.1.1. Trip application: to obtain approval for the trip and budget from Deans/Directors of academic units concerned, which should be completed before the trip and expenses.
 - 2.1.2. Reimbursement application: to obtain reimbursement for the expenses paid for the trip, which should be completed after the trip.

3. Trip Application

- 3.1. At least 30 days before the payment deadline of conference registration fees or the payment for intercity transport (whichever is earlier), applicants should submit trip applications to their respective academic units (faculty/institution). Late submissions will not be processed.
- 3.2. No expenses should be paid before approval.
- 3.3. Applicants must be invited or accepted to present at conferences (conference trips) or to conduct research at destination universities or institutions (research trips).
- 3.4. Expenses covered by the travel allowance:
 - 3.4.1. Conference registration fee (if applicable)
 - 3.4.2. Accommodation
 - 3.4.3. Intercity transportation (limited to standard economy class flights, trains, buses, or ferries. Other types of economy class, e.g. premium economy, are not covered)
 - 3.4.4. Local transportation at destination
- 3.5. Trip period:
 - 3.5.1. Trip period should not exceed the duration of conference or research work.
 - 3.5.2. For destinations outside the Hong Kong Special Administrative Region and Guangdong Province, the trip period can be extended for two days: one for the outgoing trip and one for the return trip.
 - 3.5.3. For destinations outside Asia, the trip period can be extended for another additional day, either for the outgoing trip or the return trip.
 - 3.5.4. Special cases should be backed up with justifications.
 - 3.5.5. Trip period includes weekends and public holidays in Macau.
- 3.6. Documents required for conference trip application:
 - 3.6.1. Conference and registration information
 - 3.6.2. Invitation or acceptance letter from the conference organizer
 - 3.6.3. Abstract
 - 3.6.4. Proposed budget
 - 3.6.5. Written consultation (quotations) for accommodation and transportation

- 3.7. Documents required for research trip application:
 - 3.7.1. Invitation or acceptance letter from the destination university or institution
 - 3.7.2. Brief description of the trip, including:
 - 3.7.2.1. Research topic
 - 3.7.2.2. Purpose of the trip
 - 3.7.2.3. Expected outcome(s)
 - 3.7.2.4. Daily schedule
 - 3.7.2.5. Justification(s) for conducting the research work outside Macau
 - 3.7.3. Proposed budget
 - 3.7.4. Written consultation (quotations) for accommodation and transportation
4. **Reimbursement Application**
 - 4.1. Within one week after the end of the trip, applicants should submit reimbursement applications to their respective academic units (faculty/institution). Late submissions will not be processed.
 - 4.2. For trips in December, reimbursement applications must be submitted within three days after the end of the trips or by the last working day of the month, whichever comes earlier.
 - 4.3. Only one application per trip is accepted.
 - 4.4. Documents required for reimbursement application:
 - 4.4.1. All original receipts of accommodation, transportation, and conference registration (if applicable)
 - 4.4.2. Trip report (with signature by supervisor)
5. **Remarks**
 - 5.1. Budget should reflect actual need for the trip.
 - 5.2. Any special cases not covered in the current Guidelines are subject to approval from the Vice Rector (Research).

Funding Guidelines for Research Assistantships

(Approved by the Rector on 17 December 2020)

1. Purpose

The *Funding Guidelines for Research Assistantships* apply to any PhD or master's students who receive financial support from their supervisors for performing duties related to research projects (except consultancy projects). The sources of funding include all internal and external sources recognized by the Research Services and Knowledge Transfer Office (RSKTO). For the purpose of this set of Guidelines, the financial support received by a PhD student or a master's student is known as "PhD Assistantship" or "Master's Assistantship".

2. Amount of PhD Assistantship and Master's Assistantship

2.1

PhD Students	Maximum Support
Before approval of PhD candidacy	MOP12,500/month
After approval of PhD candidacy	MOP14,000/month

Master's Students	Maximum Support
	MOP8,000/month

2.2 The amount of stipend to be received by a student will be subject to the available research funding of his/her supervisor.

2.3 The total stipend that a student can receive in a calendar month must not exceed the maximum support amount, regardless of the source(s) of financial support involved in the same period. Otherwise, the exceeding amount of stipend shall not be remunerated.

2.4 Stipend for support period less than one month is provided on a pro rata basis.

2.5 Students will be eligible to receive the new ceiling of stipend (i.e., maximum MOP14,000 per month) starting from the subsequent semester upon approval of their PhD candidacy.

2.6 Benefits or rewards not in monetary form (e.g. meals, accommodations, etc.) granted to students in return for services that they provide on campus shall not be considered as a component of the PhD or master's assistantship as stipulated in these Guidelines.

2.7 The RSKTO and the Finance Office (FO) should be informed on any change in stipend arrangements at least one month before the change takes effect.

3. Duties of Assistantship Recipients

3.1 All research assistantship recipients are required to engage in duties related to research as assigned by his/her supervisor, ancillary teaching and/or student services.

3.2 In addition to research, every PhD assistantship recipient is required to engage in a maximum of 10 hours of ancillary teaching per week.

3.3 Considering that an assistantship recipient may have more than one appointment at UM, the number of hours stated above may be fully/partially waived, subject to the approval of the respective Dean/Director.

3.4 Satisfactory performance of such duties is one of the preconditions for the renewal of the research assistantships.

4. Change of Supervisor and Suspension/Termination of Assistantship

- 4.1 If change of supervisor occurs, the availability and the amount of Assistantship should be determined by the new supervisor. This arrangement is not applicable to cases where the change of supervisor is due to the unsatisfactory performance of the student, which includes but not limited to performance in study, and/or his or her duties as assistantship recipient stipulated in article 3 of the Guidelines, is found to be unsatisfactory, or when the student has violated any other UM regulations, rules and guidelines.
- 4.2 Research assistantships may be suspended or terminated by the supervisor when the performance of the student, which includes but not limited to performance in study, and/or his or her duties as assistantship recipient stipulated in article 3 of the Guidelines, is found to be unsatisfactory, or when the student has violated any other UM regulations, rules and guidelines. However, such decision must be well justified according to the relevant regulations, rules and guidelines of UM. Normally two weeks' notice in writing for suspension/termination should be given.
- 4.3 A research assistantship recipient may relinquish the offer with one month's advance notice in writing.
- 4.4 The suspension/termination of assistantship, or relinquishment of the assistantship by the recipient, does not release the recipient concerned from his or her duty to settle any outstanding fees owed to the UM.
- 4.5 The academic unit concerned should inform RSKTO and FO about any change in the recipient's status as referred to in this provision immediately.

5. Duty and Role of Supervisors

Supervisors should meet their PhD or master's students regularly, monitor their study progress, and treat them in a fair and equal way according to the relevant regulations, rules and guidelines of UM.

6. Special Cases

Any special cases not covered in the current Guidelines are subject to the endorsement from the Director of RSKTO and the approval from the Vice Rector (Research).

7. Administration

Research Assistantships are administered by RSKTO. For uncertain or ambiguous cases, discretion from RSKTO should be sought.

8. Applicability

The current Guidelines are applicable to all Research Assistantship recipients (except Research Assistantships for Consultancy Projects).

9. Remark

The Guidelines are subject to revisions by the UM. When revisions are made, assistantship recipients will be informed accordingly.

Funding Guidelines for Teaching Assistantships

(Approved by the Rector on 18 August 2022)

1. Purpose

The *Funding Guidelines for Teaching Assistantships* apply to all PhD and master's students who receive stipends for the teaching service that they provide to academic units. The stipend received by a teaching assistant (TA) is known as "Teaching Assistantship".

2. Eligibility

PhD and master's students with good academic performance are eligible to apply.

3. Amount and Duration

3.1

PhD Students	Maximum Support
Before approval of PhD candidacy	MOP12,500/month
After approval of PhD candidacy	MOP14,000/month

Master's Students	Maximum Support
	MOP8,000/month

3.2 The duration and amount of Teaching Assistantships are determined by the academic unit concerned.

3.3 The total stipend that a student can receive in a calendar month must not exceed the maximum support amount, regardless of the source(s) of financial support involved in the same period. Otherwise, the exceeding amount of stipend shall not be remunerated.

3.4 Monthly stipend for a service period of less than one month shall be provided on a pro rata basis.

3.5 Students will be eligible to receive the new ceiling of stipend (i.e., maximum MOP14,000 per month) starting from the subsequent semester upon approval of their PhD candidacy.

3.6 Benefits or rewards not in monetary form (e.g., meals, accommodations, etc.) granted to students in return for services that they provide on campus shall not be considered as a component of the Assistantships as stipulated in these Guidelines.

3.7 The Finance Office (FO) should be informed on any change in stipend arrangements.

4. Duties of Assistantship Recipients

4.1 Every TA is required to engage in academic activities which include ancillary teaching and/or administrative services as assigned by the academic unit concerned for 5 to 15 hours per week.

4.2 Satisfactory performance of such duties is one of the preconditions for the renewal of the Assistantships.

5. Suspension/Termination of Assistantships

5.1 A recipient may apply for suspension of Teaching Assistantship due to medical reasons, family emergency, deferral or other reasons with strong justifications. All applications are subject to the approval of Dean/Director of academic unit concerned.

-
- 5.2 Teaching Assistantship may be terminated by the academic unit concerned when the academic performance or the performance of duties as an assistantship recipient is considered unsatisfactory, or when the student has seriously violated UM regulations, rules and guidelines. However, such decision must be well justified according to the relevant regulations, rules and guidelines of UM, and approved by the Dean/Director of academic unit concerned. A written notice for termination should be given at least two weeks in advance.
- 5.3 The academic unit concerned should inform FO of any change in the recipient's status as referred to in this provision as soon as possible.
- 6. Special Cases**
Any special cases are subject to endorsement from the Deans/Directors of academic units concerned and approval from the Vice Rector (Academic Affairs).
- 7. Administration**
Teaching Assistantships are administered by academic units and supervised by the Office of the Vice Rector (Academic Affairs).
- 8. Applicability**
The current Guidelines are applicable to all recipients of Teaching Assistantships.
- 9. Remark**
The Guidelines are subject to revisions by the UM. The recipients of Teaching Assistantships should check the website of the Graduate School for the most up-to-date information on Teaching Assistantships.

APPENDICES / STAFF LIST

Fundamental Academic Units

Faculty of Law

DEAN 院長

Io Cheng TONG 唐曉晴

LLB, University of Macau; LLM, Sun Yat-sen University; PhD, Chinese Academy of Social Sciences; Private Notary (inactive)

ASSOCIATE DEAN 副院長

Dan WEI 魏丹

LLB, Peking University; LLM, PhD of Law, University of Coimbra

Teng Pao IAU 邱庭彪

LLB, LLM, University of Macau; PhD, China University of Political Science and Law

ASSISTANT DEAN 助理院長

Chao WANG 汪超

LLB, Shanghai University of International Business and Economics; MA, LLM, PhD, University of British Columbia

Xiaobo ZHAI 翟小波

LLB, Zhengzhou University; LLM, Peking University; PhD, University College London and Chinese Academy of Social Sciences

HEAD OF DEPARTMENT 系主任

Department of Global Legal Studies 環球法律學系

Rostam J. NEUWIRTH

High Diploma of Law, Université d'Auvergne; LLM, Karl-Franzens Universität Graz;

LLM, McGill University; LLD, European University Institute

Department of Macao Legal Studies 澳門法學系

Zhe LI 李哲

LLB, LLM, PhD, China University of Political Science and Law

EMERITUS PROFESSOR 榮休教授

Gaolong LIU 劉高龍

LLB, LLM, University of Beijing; LLM, University of Dalhousie

Cândida da Silva Antunes PIRES 李淑華

LLB, LLM, Classic University of Lisbon; Lawyer (inactive)

CHAIR PROFESSOR 講座教授

Xingzhong YU 於興中

BA, Lanzhou University, People's Republic of China; LLM, SJD, Harvard Law School

DISTINGUISHED PROFESSOR 特聘教授

Jianhong LIU 劉建宏

MA, Nankai University; MA, PhD, University at Albany, State University of New York

PROFESSOR 教授

Chaoyang JIANG 蔣朝陽

LLB, LLM, PhD, Peking University

Rostam J. NEUWIRTH

High Diploma of Law, Université d'Auvergne; LLM, Karl-Franzens Universität Graz;

LLM, McGill University; LLD, European University Institute

Bing SHUI 稅兵

LLB, Sichuan Normal University; LLM, PhD, Peking University

Io Cheng TONG 唐曉晴

LLB, University of Macau; LLM, Sun Yat-sen University; PhD, Chinese Academy of Social Sciences; Private Notary (inactive)

Guangjian TU 涂廣建

Diploma of Law, Zhejiang University; Bachelor of Medicine in Forensic Medicine, Tong Ji Medical University; LLM, PhD, University of Aberdeen

Chao WANG 汪超

LLB, Shanghai Institute of Foreign Trade; MA, LLM, PhD, University of British Columbia

Yu WANG 王禹

LLB, Renmin University of China; LLM, PhD of Law, Peking University

Dan WEI 魏丹

LLB, Peking University; LLM, PhD of Law, University of Coimbra

ASSOCIATE PROFESSOR 副教授

Manuel Marcelino ESCOVAR TRIGO 尹思哲

LLB, LLM, University of Coimbra; Director of Legal and Judicial Centre of the Macao SAR

Teng Pio IAU 邱庭彪

LLB, LLM, University of Macau; PhD, China University of Political Science and Law;

Member of the Legislative Assembly of the Macao SAR

Zhe LI 李哲

LLB, LLM, PhD, China University of Political Science and Law

Perumal RAMASWAMY 白祿孟

BA, LLB, Bhara thiar University; PG in International Trade Law, University Institute of European Studies; LLM, Cochin University; MSc, Portuguese Catholic University of Lisbon and Inter-University Institute of Macau; MPhil, Jawaharlal Nehru University; PhD, University of Hong Kong

Alexandr SVETLICINII

Licentiate in Law, Free International University of Moldova; LLM, Central European University; Master of Research (Law), PhD, European University Institute

Paulo Jorge TAVARES CANELAS DE CASTRO

LLB, LLM, University of Coimbra; LLM, University of Nice, PG in European Community Law and International Relations, Institut Européen des Hautes Etudes Internationales

Xiaobo ZHAI 翟小波

LLB, Zhengzhou University; LLM, Peking University; PhD, Chinese Academy of Social Sciences

Li DU 杜立

Double BA Degree of Medicine and Law, LLM, Wuhan University; PhD, University of Alberta

ASSISTANT PROFESSOR 助理教授

Célia Filipa FERREIRA MATIAS

LLB, University of Lisbon; PG in Business Law, University of Coimbra; LLM, PhD, University of Hong Kong

João LORETO ILHÃO MOREIRA

LLB, LLM, University of Coimbra; MSt, Oxford University; PhD, University of Oxford

Teresa LANCERY G ALBUQUERQUE E SOUSA ROBALO

LLB, University of Lisbon; LLM, PhD, University of Macau;

Sara MIGLIORINI

Double Degree Program in Italian and French Law, University Paris 1, Panthéon-Sorbonne and University of Florence; LLM, University Paris 1, Panthéon-Sorbonne (with distinction); PhD, the European University Institute

Isabel MOUSINHO DE FIGUEIREDO

LLB, LLM, PhD, University of Lisbon
